Veneer
Boss is standard with Quartered Walnut veneer that is slip-matched. They are cut perpendicular to a log's growth rings with quartered veneers and generally produce a very straight grain. Veneer leaves are cut consecutively and are easy to match. In many species, this method will reveal a decorative element in the wood. Quarter slicing produces smaller veneer leaves and has a higher-end veneer appearance. Boss veneers are slipmatched, meaning adjoining veneer leaves are fed out in sequence without being turned so that the same side of the veneer leaves is exposed. This allows the leaves' grain pattern to repeat across the face of the panel, improving color uniformity.

Veneer tops
Veneer table desk and Veneer conferencing tops are 1-1/8" thick on 45lb density MDF core comprised of 100% recycled and recovered wood fibers with a balanced 3-ply construction. All veneer tops are Quartered Walnut that is slipmatched and features a 3mm external solid hardwood band with profile edge. Tops are finished in a 5-sheen matte finish.

Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

CAL133

To meet the California Technical Bulletin 133 flammability regulation, a combination of proper materials must be used to pass, as it tests the fire resistance of a finished product. Flame resistant fabric, a fire blocker material and special foam must be used to pass CAL133 fire codes.

Testing is available for all seating products with the following fees and considerations:

- If laboratory certification is not required, any style can be manufactured to comply with California Technical Bulletin 133 for $75 list per yard required. (Customer's Own Materials must factor in additional yardage requirements based on repeat.)
- The purchase order must clearly indicate the requirement of California Technical Bullet133
- If laboratory California Technical Bulletin 133 certification is required, the cost of testing a chair is $820 NET, plus the cost of the chair and covering material.
- An additional lead time of 4 to 6 weeks is required for testing for CAL133.
- Once testing is completed, we will provide a certification letter specific to the sample tested for CAL133.
- DARRAN's manufacturing procedures for California TB 133 compliance are based on the testing of representative style with specific fabrics. Please contact Customer Service for an updated list of tested models.
- A copy of test certification is available upon request.

Veneer
DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

Veneer tops
Capitol park veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

Laminate tops
Capitol park high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge, laminate self-edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. All units are standard with 1” adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tearout.

Overhead cabinet construction Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

Tackboards

Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Drawers
All drawers are constructed with mitre joint/dowel construction in a natural maple finish with four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Cleaning wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Adjustable glides

Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Power

DARRAN

Grove Live Edge Warranty & Care

The DARRAN Grove Collection features natural live edge solid wood slab tables. The Grove slabs are all individually unique with different grain variations, knots, variations in color, splits, and holes that all add to the natural beauty of each table. The natural characteristics are further enhanced by a protective varnish top coat that provides superior resistance to water marks, heat damage, chemical contact, and scratch resistance.

Warranty

All tables and bases have a one-year warranty. We will repair or replace (at our option) any faulty product deemed to have been caused by manufacturing defects. Live edge materials have inherent inconsistencies, natural defects and irregularities that are part of their unique nature. These are considered to be desired effects. Solid wood adjusts different times of the year to the moisture content of the air. In a sense the wood breathes. Wood will also adjust to the moisture content of your office and its surroundings. You may notice your slab furniture piece move and develop small cracks or dips. This is normal. Slab furniture cannot be compared to other solid wood furniture pieces. This product will have movement during its life and this is just the nature of natural wood slab furniture.

Care

In order to maintain the natural beauty of your Grove table, DARRAN recommends the following:

- Clean your Grove Table using a soft, damp cloth with a mild soap and wipe dry.
- DARRAN's protective varnish top coat uses the latest advanced finishing technology to preserve the beauty of each Grove Table. Even with this protection, DARRAN recommends the use of coasters with drinks and to clean up any spilled liquids immediately. Avoid direct contact with hot items, harsh chemicals, and some plastic feet on desk accessories as they could damage the finish.
- Take into account the humidity levels. This natural solid wood will continually contract and expand throughout its life and it will remain very sensitive to abrupt environment change, such as humidity, long after it has been harvested. Humidity levels should always remain between 30-50% to preserve your Grove table. Exposure to extreme fluxuations can cause additional cracking in the slab and would not be considered a manufacturer defect. A furniture repair expert can secure a new crack with a wood butterfly and then recoat the top.
- Avoid placing your table in direct sunlight to prevent wood bleaching and color changes associated with UV exposure.

Veneer tops

Veneer tops are 1" thick and comprised of 45-pound density MDF core with a balanced 3-ply construction. Veneer tops, screens, and lounge backs are standard in Quartered Walnut and Rift Cut White Oak Veneers that are slip-matched. Veneer tops are available in Flat or Cliff edge profile, with multiple banding options. Tops are finished in either 5-sheen matte finish or 40-sheen depending on finish selection.

HPL laminate tops

Honey high-pressure laminate tops are 1" thick and comprised of 45-pound density MDF core with a balanced 3-ply construction. Tops are available in Flat or Cliff edge profile, with multiple banding option.

TFL tops

Thermally Fused Laminate tops are 1-1/8" thick and fused to a 45-pound density substrate of the top for a durable surface. Tops are available in a Flat edge profile with multiple banding options.

Panel construction

Panels are composed of ¾” and 1” birch plywood with tenon and groove construction that is secured with screws and glued. MDF trim pieces create soft rounded edges and beautiful contours. The frame is covered with 4.5mm PET acoustic panels for sound absorption. PET panels are composed of recycled content, are flame retardant, mold resistant and have zero emissions. Panels are standard elevated on 5” solid wood legs that feature 2” Glide for adjustment on uneven surfaces.

Case construction

Case pieces including pedestals, towers and credenzas are constructed of ¾” thick particle board with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. Credenzas and Towers are elevated on 6” solid wood legs featuring 1” glide for adjustment on uneven surfaces.

Lounge construction

Lounge units are constructed from plywood with 2” thick bottom platform, ¾” seat pan and 4” of high resiliency foam for comfort and durability. The honey Lounge back is a curved plywood core with veneer or laminate. Honey lounge consists of high resilient foam with a minimum of 2.5 density in seats and blown fiber cushions, further advances support and durability.

Lounge unit is elevated on 10.5" solid wood leg with oval shape to match panel stations.

Screens

Honey screens are available in Acrylic or Veneer over plywood. Acrylic is ¼” thick and available in frosted, white, and black. Plywood screens are ½” thick and are available in Quartered Walnut and Rift Cut White Oak Veneer that runs horizontally on the screen. Screens secure to the underside of the worksurfaces with an L bracket. Screens feature a center cutout to allow clip-on power pods and easy wire management to the MGT: Wire Tray below the worksurface. The screen is 24” tall for added privacy; the screen's unique curved wings mimic the worksurface top creating a barrier between users and work area to focus.

Cleaning wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Suspensions

All cabinets and mobile pedestals utilize cold rolled steel zinc plated high-grade drawer suspensions. All suspensions are warranted for the lifetime of the product. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion with soft close operation and are rated 100lbs.

Filing

Honey features a highly durable black plastic extrusion that is securely fastened into a route on top of the drawer to support hanging files. An adjustable crossbar is provided for all file drawers that enables legal/letter filing front to back or side-to-side based on the drawer size.

Locks

Locks are optional on pedestals and doors. Each drawer pedestal is independently locked. Lock plugs are factory or field installed.

Keying

Keying is available either factory or field installed. Factory installed keying offers two options: random or designated. When the random keying option is selected an arbitrary key number will be assigned to the unit. When the designated keying option is selected a key number must be specified between 101 and 110. Higher numbers may be specified if noted on the purchase order and may be factory or field installed. Black and silver face lock have silver keys.

Wire management

Wire management capabilities include standard and optional worksurface grommets. Specify W21 under surface wire channels for organization and management of all communication wires and cords. Sold separately to conceal wire under worksurfaces. Top feature a cutout in the back and unique curved wings allowing for clip on modules or easy wire management to the power tray below the worksurface.

Grommets

Metal grommets are provided to match the drawer pull selection. Metal grommets are available in black, silver or white. Must specify standard or non-standard location. TM50 Black plastic grommets are available as an option for vertical applications.

Veneer
DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

Veneer Tops
Jamestown veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

Laminate Tops
Jamestown high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge, laminate self-edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. All units are standard with 1” adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tear out.

Overhead cabinet construction
Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Bookcase construction
All chassis (sides, back, top and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

Tackboards
Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Drawers
All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of maple veneer 1/2” thick material for drawer sides, fronts and backs with a UV finish for maximum durability. Drawer bottoms are 3/16” thick 3-ply maple veneer. Drawer boxes are assembled at each corner with dowel joinery for maximum drawer strength. Lifetime free replacement warranty.

Standard Wood Drawers
Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.

Drawer Fronts
Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2 / 4 and 6 doors. All drawers and doors have traditional scallop profile edge shape. All tower fronts matched in vertical sets.

Suspensions

All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion with soft close operation and are rated 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and is rated at 150lbs. Lateral files include anti tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

Hinges

Units with doors include 95 degree swing hinges.

Veneer
DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

Veneer Tops
Prado veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8" thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

Laminate Tops
Prado high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8" thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge, laminate self-edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Chassis & pedestal
Chassis components are ¾" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. All units are standard with 1" adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tear out.

Overhead cabinet construction Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1" and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel "z" bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel "z" bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Bookcase construction
All chassis (sides, back, top and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1" thick lumber core balanced 5 ply construction.

Tackboards
Wall mount tackboards are constructed of .75" thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75" thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel "z" bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel "z" bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Drawers
All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of maple veneer 1/2" thick material for drawer sides, fronts and backs with a UV finish for maximum durability. Drawer bottoms are 3/16" thick 3-ply maple veneer. Drawer boxes are assembled at each corner with dowel joinery for maximum drawer strength. Lifetime free replacement warranty.

Drawer Fronts
Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2 / 4 and 6 doors. All tower fronts matched in vertical sets.

Standard Wood Drawers
Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.

Suspensions
All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion

with soft close operation and are rated 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and is rated at 150lbs. Lateral files include anti tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

Veneer
DARRAN only uses HPVA AA Grade Flat Cut Cherry and Walnut Veneers. All veneers are selected and matched for balance and consistency.

Veneer tops
Richmond park veneer tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All veneer tops are slipmatched and feature a 3mm external solid hardwood band or profile edge.

Laminate tops
Richmond park high-pressure laminate tops feature a 45-pound density substrate with balanced 3-ply construction. Tops are 1-1/8” thick on MDF core comprised of 100% recycled and recovered wood fibers. All high pressure laminate tops are available with a profile edge, laminate self-edge or 2mm PVC edge band. Laminates in wood grain patterns feature a fine grain texture that features the polish and luxe of a real wood veneer with a subtle narrow grain structure.

Cleaning wood & laminate
In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Chassis & pedestal
Chassis components are ¾” thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Pedestal and Cabinets feature dowel construction reinforced with steel bracket plates, wood cleats, screws and glue. All units are standard with 1” adjustable glides that allow for leveling of units that are secured in solid wood glide blocks to prevent tearout.

Overhead cabinet construction Freestanding & wall mount
Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Bookcase Construction
All chassis (sides, back, top and bottom panels) are constructed with 3/4" thick core of prticle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

Tackboards
Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Adjustable glides
Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Drawers
All drawers are constructed with mitre joint/dowel construction in a natural maple finish with four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of 1/2” thick wood grained wrapped 5 sided miter-folded construction with 1/4” thick hardboard bottoms reinforced for heavy weight capacity. Drawers have been tested and pass BIFMA 50,000 cycle test. All drawers are guaranteed lifetime with free replacement warranty.

Drawer fronts
Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2 / 4 and 6 doors. All tower fronts matched in vertical sets.

Optional wood drawers

Cleaning wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Chassis & pedestal

All pedestals and chassis are constructed with 3/4” thick balanced 3-ply panels. Panels are securely fastened together using rails that are bored and doweled, glued, metal reinforcement brackets and wood cleat construction. Thick end panels are pre-bored to accept a tee nut for the adjustable glide and are reinforced with pvc banding to prevent glide tear out. Glue blocks are used where 3/4” thick panels are joined, bored for tee nut to accept adjustable glide.

Overhead cabinet construction Freestanding & wall mount

Freestanding Overhead storage cabinets are constructed of 1” and 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam fasteners in conjunction with dowels securely adhered with glue. All surface mount cabinets connect to work surface with anti-slip tape. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Bookcase Construction

All chassis (sides, back, top and bottom panels) are constructed with 3/4" thick core of particle board or MDF rated EPP/SCS/CARB-II material with 3-ply balanced construction. Panels are attached with cam-lock fasteners in conjunction with dowels securely adhered with glue. Shelves on all units are 3/4" thick balance 3 ply panels. Optional heavy duty shelves are 1” thick lumber core balanced 5 ply construction.

Tackboards

Wall mount tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard with a sock on cover. Overhead storage tackboards are constructed of .75” thick fiberboard. The fabric is precisely aligned and fitted to the tackboard and adhered to the rigid hardboard with staples. Wall mount cabinets are mounted to the wall with steel “z” bracket attachment method using 5mm euro screws to attach to the back of the cabinet. All units ship with a steel “z” bracket. This bracket is mounted to the wall by field installers. Installers are responsible for selecting and supplying appropriate fasteners for wall conditions.

Adjustable glides

Glides provide 1" of vertical leveling adjustment. Glide bottom is durable metal. Glides are secured in solid wood blocks that are screwed and glued for durability.

Drawers

All drawers are constructed of four sides and a bottom, which are attached to a drawer front with screws for easy removal. Drawer fronts are vertically matched in balanced sets. Pencil trays are standard in all box drawers. Drawers are constructed of maple veneer 1/2” thick material for drawer sides, fronts and backs with a UV finish for maximum durability. Drawer bottoms are 3/16” thick 3-ply maple veneer. Drawer boxes are assembled at each corner with dowel joinery for maximum drawer strength. Lifetime free replacement warranty.

Drawer fronts

Drawer fronts are vertically matched in balanced sets. Doors feature vertical veneer bookmatched horizontally in sets of 2 / 4 and 6 doors. All drawers and doors have traditional scallop profile edge shape. All tower fronts matched in vertical sets.

Standard wood drawers

Optional hardwood veneer plywood drawers feature banded top and bottom edges for smoothness. Drawers are dowel joint construction with a UV cured finish over maple veneers, plus a lifetime free replacement guarantee.

Suspensions

All casegoods utilize cold rolled steel zinc plated high-grade drawer suspensions. Box and File drawers are full extension, featuring steel ball bearings for a smoother quieter range of motion with soft close operation and are rated 100lbs. Lateral file drawers are a progressive action full extension suspension with the soft close operation and is rated at 150lbs. Lateral files include anti tip mechanism that will allow only one drawer at a time to be opened. All suspensions are soft close and are warranted for the lifetime of the product.

Cleaing wood & laminate

In addition to regular dusting, give your furniture an occasional cleaning in accordance with our cleaning instructions. DARRAN wood and laminate products can be cleaned with a soft cloth and a mild soap and water mixture. Use approximately 32 oz of water mixed with one tablespoon of dish soap, always wiping with the grain. Dry with a soft cloth, going with the grain, to avoid spotting or streaking.

Wood products should be waxed periodically using a non-wax liquid; please do not use any waxy polish or cleaner. Interior of drawers may also be cleaned with mild soap and water mixture, or any household cleaner that is not petroleum or thinner-based.

Powerports

A large selection of power pods are available and handle power, data, docking stations and communication. See options section for selection.
