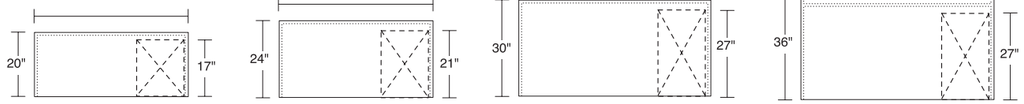
Grommet Options

700 Series® Desk Product Offering

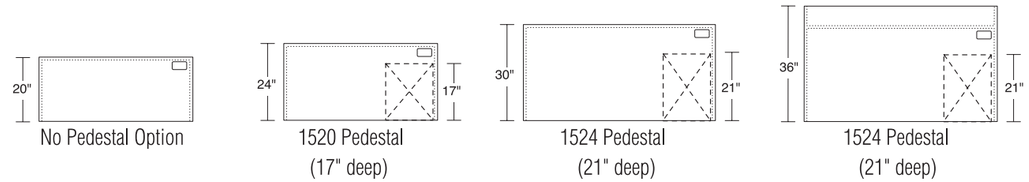
Pedestal Options Depth

When no grommets are specified:



1520 Pedestal (17" deep) | 1524 Pedestal (21" deep) | 1530 Pedestal (27" deep) | 1530 Pedestal (27" deep)

When worksurface or end panel grommets are specified:



No Pedestal Option | 1520 Pedestal (17" deep) | 1524 Pedestal (21" deep) | 1524 Pedestal (21" deep)

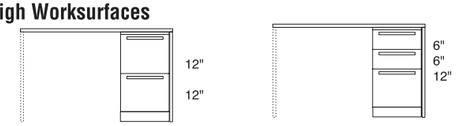
Dimensions are nominal. Contact customer service for exact dimensions.

Pedestal Height Options

29" High Worksurfaces

File/File Hanging | Box/Box/File Hanging | Pencil/Box/File Hanging

29" High Worksurfaces

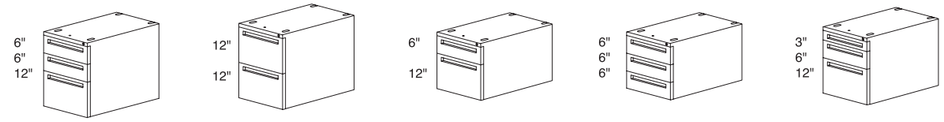


File/File Worksurface Supporting | Box/Box/File Worksurface Supporting

When ordering a desk shell or return with a partial modesty, Box/File hanging pedestals are recommended. Otherwise pedestals will hang below the partial modesty.

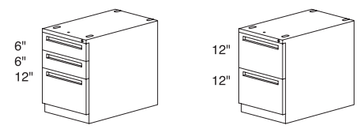
Pedestal Drawer Configurations

Hanging Pedestals



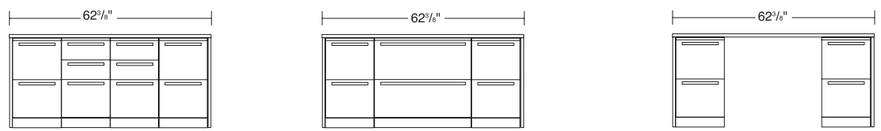
Box/Box/File | File/File | Box/File | Box/Box/Box | Pencil/Box/File

Worksurface Supporting Pedestals 29" H



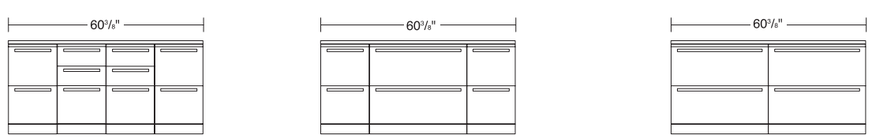
Box/Box/File | File/File

62" Credenza Shell



Credenza Shell allows one to four worksurface supporting pedestals, one or two credenza laterals or a combination of both.

60" Credenza Top



Credenza top allows two or more worksurface supporting pedestals, two credenza laterals or a combination of both.

700 Series Desk Typicals

700 Series® Desk Specifications
The 700 Series® Desk line is a free standing, modular system of desks, returns, bridges, credenzas, corner units and overhead storage components. Designed for flexibility, it can be set up to suit differing customer requirements. It is shipped knock-down and accepts 700 Series® or U-Series® Pedestals.

Worksurfaces
Worksurfaces shall be 1-1/4" thick laminate top with a particle board core. Edge treatments shall be wood edge or 74P edge. All tops shall be pre-drilled for mounting of end panels, modesty panels, wire management channels, return or bridge connectors and hanging or worksurface supporting pedestals.

Desk Shells
Desk shells shall consist of a worksurface top, two end panels, full or partial modesty panel and wire management channel. Desks are available in depths of 24", 30" and 36", and widths of 48", 54", 60", 66" and 72" and shall be 29" high. The 36" deep desk worksurface shall have a 6" overhang. The desk shall accept a variety of hanging or worksurface supporting pedestals.

End Panels
Desk, return, corner, and credenza end panels shall be floor height and feature double-wall construction. The outer panel shall be 20-gauge with double flanges formed on both vertical edges and single flanges formed on the top and bottom. The inner panel shall be 20-gauge with flanges formed on all edges. Two keyhole pads of 16-gauge shall be welded into the top of the end panel to interface with shoulder screws for mounting to the top. The outer and inner panels shall be spot welded together, as well as fastened together at the bottom with the nut inserts that accept the leveling glides. Two 20-gauge channels shall be welded into the 36" deep end panels to provide additional reinforcement. All end panels shall feature prepunched holes through two metal thickness for connecting modesty panels.

Desks, credenzas, P-shape worksurfaces, D-shape worksurfaces and corners shall be 29" high. Returns and bridges shall be available in 29" high. Both interface with the desk or corner unit with 16-guage connectors that are screwed to the tops.

Modesty Panels
Desk, return, corner, bridge and credenza modesty panels shall span the full width of the unit connecting to the end panels. The modesty panels shall be spaced down from the top by 1-5/8" to allow for the routing of cables. They shall be available in full floor length, for privacy, or partial, which is spaced up off the floor by 8-3/8" for outlet access and increased air circulation. The modesty panels on a 36" deep desk shall be recessed by 6" for visitor knee space. All modesty panels shall be 20-gauge with double flanges formed along the top and bottom. Desk and credenza panels shall have single flanges formed on both vertical edges. Return panels shall have offset flanges formed on one end and a single flange on the other. Bridge panels shall have offset flanges formed on both ends. The vertical flanges of all modesty panels have prepunched holes for connecting to the end panels.

Wire Management
Desks, returns, corners, bridges and credenzas shall be equipped with a wire management channel. This 20-gauge channel shall have the bottom edge hemmed for safety and strength. The wire management channel shall fasten to the underside of the top and run between end panels.

Returns
Returns shall be the same construction as the desk and credenza worksurfaces. Returns consist of a top, end panel, full or partial modesty panel and wire management channel. They are available in depths of 24" and 30". A 24" deep return is available in widths of 24", 30", 36", 42", 48", 54", 60", 66" and 72" and shall be 29" high. A 30" deep return is available in widths of 36", 42", 48", 54" and 60" and shall be 29" high. One level connector will be included with each return.

Bridges
Bridge worksurfaces shall be the same construction as the desk and credenza worksurfaces. Bridges consist of a top, full or partial modesty panel and wire management channel. They are available in depths of 20" and 24" and widths of 36", 42", 48", 54", 60", 66"and 72" and shall be 29" high. Two level connectors shall be included with 29" high units.

P-Shape Worksurfaces
P-Shape worksurfaces shall be the same construction as the desk and credenza worksurfaces. The worksurfaces shall be available in 30" or 36" depths and 60", 66" and 72" lengths and shall be 29" high. The P-Shape worksurface shall be available for mounting right or left. The worksurface is standard with a supporting T-base and 14-gauge tubular leg. Product is designed to be mounted to adjacent surfaces.

D-Shape Worksurfaces
D-Shape worksurfaces shall be the same construction as the desk and credenza worksurfaces. The worksurfaces shall be available in 30" or 36" depths and 60", 66" and 72" lengths and shall be 29" high. The worksurface is standard with a supporting T-base and 14-gauge tubular leg. Product is designed to be mounted to adjacent surfaces.

D-Shape Returns
D-Shape returns shall be the same construction as the desk and credenza worksurfaces. The returns shall be available in 24", 30" or 36" depths and 36", 42", 48", 54", 60", 66" and 72" lengths and shall be 29" high. The return is standard with a supporting 14-guage tubular leg and includes a level connector.

P-Shape Returns
P-Shape returns shall be the same construction as the desk and credenza worksurfaces. The worksurfaces shall be available in 30" or 36" depths and 60", 66" and 72" lengths and shall be 29" high. The P-Shape returns shall be available for mounting right or left. The return is standard with a supporting 14-gauge tubular leg and includes a level connector.

Corner Units
Corner units shall accept 29" high returns and bridges. The corner units shall be 24" deep and 36" or 42" wide and 30" deep and 42" or 48" wide. The modesty panels shall be 20-gauge and consist of two end panels with one leveling glide each and two side panels with two leveling glides each. The end panel and side panels shall have double flanges formed along the bottom and both vertical edges. A single flange with prepunched holes shall have double flanges formed on the top and bottom and single flanges on the vertical edges. It shall be spaced down from the top by 1-5/8" to allow for the routing of cables.

Credenza Top
Credenza top shall be constructed of 1-1/4" thick particle board available in wood edge or 74P edge. The top shall be available 20" or 24" deep and 60" wide and shall be predrilled to accept up to four worksurface supporting pedestals.

Credenza Shell
The credenza shell consists of a 1-1/4" particle-board top available with wood edge or 74P edge. The top shall be available in a 20" depth and 62" width and 24" depth and 60" and 62" widths. It is available with either a full or partial modesty panel and end panels of 20-gauge steel. The credenza shall accept up to four hanging or worksurface supporting pedestals.

Overhead Storage
Units shall be standard with an open back allowing for interaction in a group situation. Overhead storage shall be available in an open or closed style. The closed style overhead storage shall have one door on 30", 36", 42", 48", 54" and 60" and two doors on 66" and 72". The door shall have a lock as standard. The closed overhead doors are available in steel or fabric covered steel.

Task Lights
Task lights shall be offered in three levels of efficiency and cost. The standard light shall have a magnetic high-power factor ballast with rapid start, cool white T-8 fluorescent lamp. The energy efficiency model shall have an electronic ballast with rapid start, cool-white T-8 fluorescent lamp. The third model shall have 2-step (hi/low) high-power factor ballast with rapid start, cool-white T-8 fluorescent lamp which shall help reduce glare on computer screens and help reduce eye strain. Task lights shall attach to the underside of the shelf on overhead cabinets. Lights shall be UL Listed and available in black only. They shall be available as 20" wide for use with 30" and 36" wide overhead cabinets, 32" wide for 42" and 48" wide units and 48" wide for 60", 66" and 72" units.

Center Drawer
The center drawer shall mount below a 24" or 30" deep worksurface which has an 18" wide clearance. The drawer pan shall be constructed of 22-gauge steel with a hem along the front edge for safety and strength. A deep rib shall form a pencil tray and provide additional strength and a double flange across the back shall prevent spillage of contents. The drawer sides shall be 20-gauge with a hem along the top edge for safety. The drawer shall run on a pair of full extension, ball-bearing suspensions and shall be available with or without a lock, keyed randomly as standard. Field drilling for installation shall be necessary. The center drawer shall be painted to match the color of desk.

Key Options
There are various key options available depending on the component model. The key alike option (KA) allows multiple components of a workstation to be keyed alike. The key standard option (KS) allows each component to have its own randomly selected key number shipped with the individual component. The No lock core (NLC) provides more flexibility in keying workstations alike. All locks and keys for the individual components specified with no lock core will be packaged separately from the components. The location of the lock core and corresponding numbered key will be determined upon installation.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
34S	- 3/8” Wood band edge

Ⓒ Select modesty panel style.

P	- Partial
F	- Full

Ⓓ Select grommet option.

NG	- No grommet
G	- Grommets - left and right; add $85

Ⓔ Select desk color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain colors. Due to natural variations of fine woods, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
34S	- 3/8" Wood band edge

Ⓒ Select modesty panel style.

P	- Partial
F	- Full

Ⓓ Select grommet option.

NG	- No grommet
G	- Grommets - left and right; add $85

Ⓔ Select desk color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain colors. Due to natural variations of fine woods, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

700 Series® Lateral Files and Storage
General Information

GENERAL INFORMATION

KI 700 Series lateral files are designed on a 1-1/2" module to provide an unparalleled degree of internal flexibility. Interior components are available 3", 6", 7-1/2", 9", 10-1/2", 12", 13-1/2" and 15" high. These components are designed to efficiently accommodate virtually any filing and storage requirement.

To assure KI files are compatible with panel systems, desks or custom architectural details, cabinets are available in 18 different heights.

Preconfigured Units
To simplify the specification process, KI offers preconfigured files and storage cabinets in the most popular sizes with the most popular internal components. These units are assembled using standard components. Lateral files and storage cabinets can be field-retrofitted and updated by specifying componentry from the Custom-Built section of this price list. This does not include current series.

Height
Lateral files and storage cabinets are available in 40 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
All lateral files and storage cabinets are 18" deep.

Width
Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions
Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell
Shell common to lateral file and storage cabinet units. Uprights punched to accept interior components on 1-1/2" centers. Uprights and top and bottom reinforcements are welded into rigid "box frame." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners. Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers
Drawer fronts, 20-gauge steel with full-width flush inset pull and label holder or flat front with exterior pulls and no label holder. Fronts are screw-mounted to roll-out shelves to build drawers. Roll-out shelf body, 22-gauge steel slotted on 1-1/2" centers to accept dividers. Leading edge formed to provide pull; center section offset for additional strength. Shelf ends, 19-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Components have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.9-2004 standards for lateral files when recommended counterbalance weight is installed. Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 110 degrees to prevent contact with adjacent cabinet and full height vertical flush inset pull.

Shelves
Blank shelf, 22-gauge steel, formed 7/8" thick on front and back edges. End tab shelf, 22-gauge steel shelf and back, 18-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Preconfigured lateral files meet or exceed ANSI/BIFMA X5.9-2004 standards.

Receding Door
20-gauge steel with full-width flush inset pull and label holder. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation. The diagrams on the following page identify various shelf and drawer combinations and related height clearances behind a receding door. The diagrams show typical use. Additional interior options can be installed behind a receding door.

Note: Dimensions have been taken from the front raised edge of the roll-out shelf.

Accessories
Plate dividers, 18-gauge steel, notched to lock into shelf. Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.
How to Build a Model Number
Example: Preconfigured 700 Series Lateral Files & Multimedia Storage

S7L	36	480	4D	BL	CBW50	334FBK

S7L	Product name	**700 Series Lateral File**
36	Width	**36" wide**
480	Interior height (nominal)	**48" high**
4D	Type of unit	**4 high, 4 drawer**
BL	Color code	**Black**
CBW50	Optional	**50# Counterbalance weight**
334FBK	Optional	**Front-to-back filing bars**

Each internal component has a corresponding character:

D	Drawer with side-to-side folder bars
R	Receding door, rollout shelf with side-to-side folder bars
E	End tab shelf with plate dividers
HD	Hinged door cabinet with blank shelves
HX	Hinged door cupboard without shelves
OVHD	Overfile storage cabinet

The 334 model number for accessories indicates the item may be used in all cabinet widths.

Suspended binder frames are constructed of 14- to 18-gauge steel. Screw-mounted to cabinet. Can be used behind 13-1/2" and 15" receding doors and hinged storage cabinet doors.

Adjustable Glides
Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment, longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock
All cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tip-over by permitting only one drawer to be opened at a time. With some unique combinations, an individual drawer may not be controlled by the interlock. In these instances, a caution label will be affixed to the drawer body.

Locks
Locks are standard on all units. Locks are a high-security double-bit design. One KI breakaway key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify “lock plugs not installed” on order. Order must specify total quantity of specific key numbered locks.
Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface. All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

INSTALLATION

Caution Labels
Caution and safety-related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.
Caution: Information is also permanently affixed to the left side of the top drawer. Both labels contain important installation and loading information

Installation Information
Complete instructions on the proper installation and use of KI files are provided in each file shipped. The instructions refer to correct methods of leveling, ganging and loading. Counterbalance weights should be installed in all single freestanding files.

Field Reconfiguration
As needs change, KI lateral files and storage cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

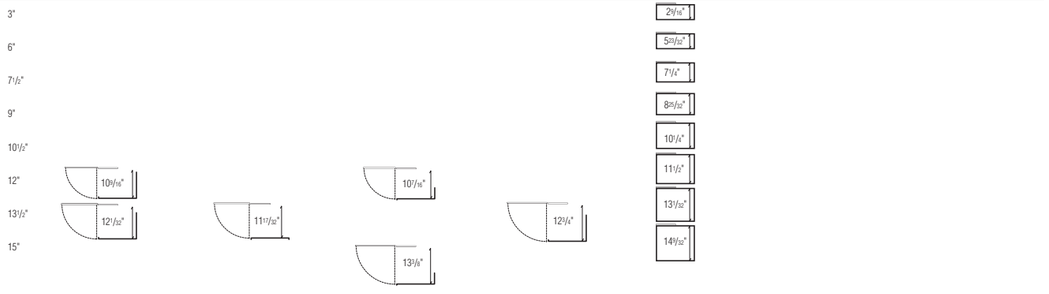
Inside Clear Height of Shelf and Drawer Options



700 Series® Curve Lateral Files and Storage
General Information

GENERAL INFORMATION

KI Curve lateral files are designed on a 1-1/2" module to provide an unparalleled degree of internal flexibility. Interior components are available 3", 6", 7-1/2", 9", 10-1/2", 12", 13-1/2" and 15" high. Clean stylish looks, flexible aesthetics and durability allow Curve to work in private offices and open-plan environments. With a gentle curved frame and contoured drawer pulls, Curve creates a timeless design element.

Flexible aesthetic and format. Curve allows you to design from the inside out, fitting the media to the appropriate lateral, pedestal, cupboard, bookcase and combination file/locker unit. Heavy-gauge steel construction and welded internal box frame provide structural integrity. Multi-extension suspensions provide smooth operation. KI's unique patented interlock/anti-tilt mechanism with automatic restaging prevents the opening of more than one drawer at a time. Curve enhances security with its key possibilities.

Preconfigured Units
To simplify the specification process, KI offers preconfigured files and storage cabinets in the most popular sizes with the most popular internal components. These units are assembled using standard components.

Height
Lateral files and storage cabinets are available in 14 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
Lateral files and storage cabinets are 18" deep. Curve combination locker/file units are available in both 18" and 24" depths.

Width
Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions
Refer to the illustrations for the range of drawer sizes and the height clearance of each.

Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners. Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers
Drawer fronts, 20-gauge steel with full-width contoured curved pull. Fronts are screw-mounted to roll-out shelves to build drawers. Roll-out shelf body, 20-gauge steel slotted on 1-1/2" centers to accept dividers. Shelf ends, 18-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Components have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.9-2004 standards for lateral files. Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 95 degrees to prevent contact with adjacent cabinet.

Shelves
Blank shelf, 22-gauge steel, formed 7/8" thick on front and back edges. End tab shelf, 22-gauge steel shelf and back, 20-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Preconfigured lateral files meet or exceed ANSI/BIFMA X5.9-2004 standards when recommended counterbalance weight is installed.

Receding Door
20-gauge steel with full-width contoured curve pull. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation. The diagrams on the following page identify various shelf and drawer combinations and related height clearances behind a receding door. The diagrams show typical use. Additional interior options can be installed behind a receding door.
Note: Dimensions have been taken from the front raised edge of the roll-out shelf.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.
How to Build a Model Number
Example: Preconfigured 700 Series Curve Lateral Files & Multimedia Storage

S7CL	36	480	4D	BL	CBW50	334FBK

S7CL	Product name	**700 Series Curve Lateral File**
36	Width	**36" wide**
480	Interior height (nominal)	**48" high**
4D	Type of unit	**4 high, 4 drawer**
BL	Color code	**Black**
CBW50	Optional	**50# Counterbalance weight**
334FBK	Optional	**Front-to-back filing bars**

Each internal component has a corresponding character:

D	Drawer with side-to-side folder bars
R	Receding door, rollout shelf with side-to-side folder bars
E	End tab shelf with plate dividers
HD	Hinged door cabinet with blank shelves
HX	Hinged door cupboard without shelves
OVHD	Overfile storage cabinet

The 334 model number for accessories indicates the item may be used in all cabinet widths.

Accessories
Plate dividers, 18-gauge steel, notched to lock into shelf. Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength. Suspended binder frames are constructed of 14- to 18-gauge steel. Screw-mounted to cabinet uprights. Fit behind multi-media cabinets and behind receding doors.

Adjustable Glides
Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment, longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock
All cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tip-over by permitting only one drawer to be opened at a time. With some unique combinations, an individual drawer may not be controlled by the interlock. In these instances, a caution label will be affixed to the drawer body.

Locks
Locks are standard on all units. Locks are a high-security double-bit design. One KI breakaway key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.
Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface. All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

INSTALLATION

Caution Labels
Caution and safety-related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.
Caution: Information is also permanently affixed to the left side of the top drawer. Both labels contain important installation and loading information

Installation Information
Complete instructions on the proper installation and use of KI files are provided in each file shipped. The instructions refer to correct methods of leveling, ganging and loading. Counterbalance weights should be installed in all single freestanding files.

Field Reconfiguration
As needs change, KI lateral files and storage cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select pull option.

ALBT	- Aluminum bow tie pull
ALMT	- Aluminum metric pull
ARCN	- Arc nickel pull
CLSC	- Classic (inset pull)
CZP	- Connection Zone pull
NKBT	- Nickel bow tie pull
RETN	- Retro nickel pull

Ⓒ Select unit and drawer color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select counterbalance weight.

CBW	- With Counterbalance
NOCBW	- No Counterbalance

See pricing column for counterbalance weight upcharge.

Ⓔ Select lock option.

KA	- Key alike
KS	- Key standard
NLC	- No lock core

Ⓕ Select lock color.
Refer to the **Product Color Options** page in this price list.

700 Series® Custom-Built Lateral Files
General Information

GENERAL INFORMATION

To meet specific filing requirements, 700 Series lateral file and storage cabinet units can be created from an unparalleled selection of cabinet sizes and specialized interior options. This section includes shells and corresponding drawers, receding doors, storage cabinets and legal/letter and EDP interiors.

Cabinet shells are available in three widths and 40 standard heights. Shells are notched in 1-1/2" increments to accept a wide variety of interior options. Interior options range from 3", 6", 7-1/2", 9" and 10-1/2" drawers through 12", 13-1/2" and 15" drawers and receding doors. Cupboards are also available in numerous heights. Various shelves and computer media storage accessories may be specified behind storage cabinet doors and receding doors.

Height
Lateral files and storage cabinets are available in 40 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
All lateral files and storage cabinets are 18" deep.

Width
Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions
Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell
Shell common to lateral file and storage cabinet units. Uprights punched to accept interior components on 1-1/2" centers. Uprights and top and bottom reinforcements are welded into rigid "box frame." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners. Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers
Drawer fronts, 20-gauge steel with full-width flush inset pull and label holder. Fronts are screw-mounted to roll-out shelves to build drawers. Roll-out shelf body, 22-gauge steel slotted on 1-1/2" centers to accept dividers. Leading edge formed to provide pull; center section offset for additional strength. Shelf ends, 19-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Drawers have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.9-2004 standards for lateral files when recommended counterbalance weight is installed. Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 110 degrees to prevent contact with adjacent cabinet and full height vertical flush inset pull.

Shelves
Blank shelf, 22-gauge steel, formed 7/8" thick on front and back edges. End tab shelf, 20-gauge steel shelf and back, 18-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Lateral files meet or exceed ANSI/BIFMA X5.9-2004 standards.

Receding Door
20-gauge steel with full-width flush inset pull and label holder. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation. The diagrams on the following page identify various shelf and drawer combinations and related height clearances behind a receding door. The diagrams show typical use. Additional interior options can be installed behind a receding door.

Note: Dimensions have been taken from the front raised edge of the roll-out shelf.
Note: Receding doors cannot be installed directly below a drawer.

Accessories
Plate dividers, 18-gauge steel, notched to lock into shelf. Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength. Suspended binder frames are constructed of 14- to 18-gauge steel. Screw-mounted to cabinet. Can be used behind 13-1/2" and 15" receding doors and hinged storage cabinet doors.

Adjustable Glides
Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment, longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock
All cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tip-over by permitting only one drawer to be opened at a time. With some unique combinations, an individual drawer may not be controlled by the interlock. In these instances, a caution label will be affixed to the drawer body.

Locks
Locks are standard on all units. Locks are a high-security double-bit design. One KI breakaway key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface. All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Nonstock Plastic Laminate Surfaces
Additional laminates are available but may be subject to additional leadtime. Other laminates may be requested through a Product Modification Request. Contact KI Customer Service for details.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.
How to Build a Model Number
Example: 700 Series Custom Built Lateral Files

					Optional Picks	
S7L	**36**	**555**	**BL**	**Insert drawer options here**	**CBW50**	**33412DV**

S7L	Product name	**700 Series Shell**
36	Width	**36" wide**
555	Interior height (nominal)	**55 1/2" high**
		Custom Built
BL	Color code	**Black**
	Insert internal components here…	
CBW50	Optional	**50# Counterbalance weight**
33412DV	Optional	**12" Front-to-back filing bars**

Each internal component has a corresponding character:

D	Drawer with no interiors
DA	Drawer with FBA folder bars
DE	Drawer with FBE folder bars
R	Receding door
RS	Receding door, rollout shelf
RSA	Receding door, rollout shelf with FBA folder bars
RSE	Receding door, rollout shelf with FBE folder bars
RED	Receding door, end tab shelf with dividers
S	Rollout shelf
BS	Blank shelf
ES	End tab shelf
SS	Slotted shelf
CR	Coat rod

Models are built from the TOP TO THE BOTTOM.
The 334 model number for accessories indicates the item may be used in all cabinet widths.

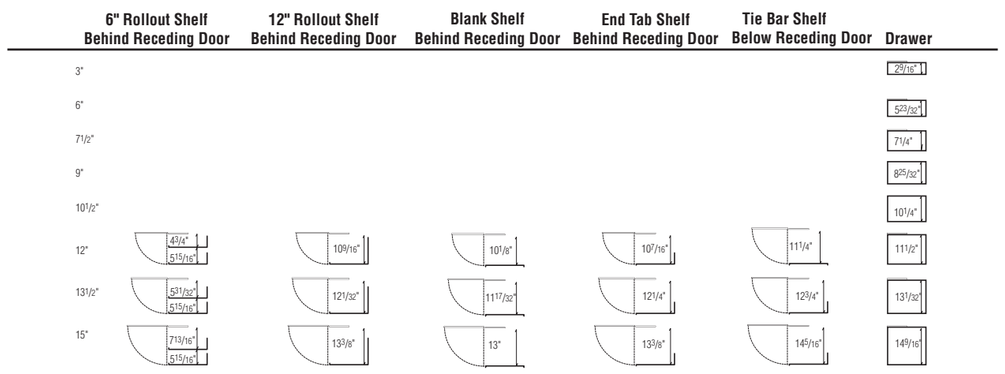
Inside Clear Dimensions of Shelf and Drawer Options



700 Series® Custom-Built Lateral Files
General Information

TERMINOLOGY

BIFMA. "Business and Institutional Furniture Manufacturer's Association" set minimum standards by which contract furniture manufacturers measure the performance of their products.

Clear Filing Height. The available, unobstructed storage space in a drawer or on a shelf.

Counterbalance Weight. A weight affixed into the inside back of the file to minimize the possibility of the cabinet tipping over when a fully loaded drawer is opened.

"Double Bit" Lock. A lock plug with metal wafers or "bits" on opposing sides of the channel in which the key fits. The corresponding key has teeth on both sides of its blade. The double bit system provides greater security and a wider variety of keying options when compared to single bit locks.

End Tab Filing. Describes storage materials which have the identification tab at the short end of the file folder. The tab is seen from the side, not the top, of the folder.

Tie Bar. Used to complete the available filing height when no insert is required or where no insert is available to complete the remaining height. Required on 5 and 6-high cabinets. (Perpendicular to the width of the cabinet).

Folder Bars. The heavy gauge steel bars that fit into a drawer to suspend hanging folders and computer print-out binders. Available for side-to-side (across the width of the cabinet) and front-to-back filing.

Ganging. Describes the bolting together of cabinets when installed side by side. Enhances safety.

Glides. Adjustable large footed bolts that screw into the four bottom corners of all lateral files, cupboards, and pedestals; adjusts the level and height of a cabinet.

Interlock. A safety mechanism installed in all lateral files. Prevents opening more than one drawer at a time. Minimizes the possibility of the cabinet tipping over.

Lock Plug. The removable center portion of the lock. With a special key, lock plugs can be removed to allow for customer keying configurations after the lateral files or pedestals have been installed.

Posting Shelf. A horizontal extendible worksurface that can fit into a 1½" opening of a lateral file, in place of a tie bar.

Receding Door. Sometimes called a "flipper door"; the door opens by lifting it at the bottom and sliding it into the file on a horizontal plane.

Suspensions. Sometimes called "glides;" the ball bearing support mechanism on which a rollout shelf or drawer operates.

"X" High. (ie. 2 high, 3 high, etc.) The nominal height of a unity measured in 12-inch increments.

CUSTOM UNIT EXAMPLES

Requirement: 30-inch wide cabinet with binder storage in top two openings and legal file storage in bottom two openings. Maximum height, 57".

Unit Height	x	Qty	=	Insert Height	Description	Model No.	Price	x	Qty	=	Extended Price
56 3/32"		1		52 1/2" max.	Shell, 5 high	S7L/30525	$589		1		$589
15"		2		30"	Receding door	S7L/30150R	145		2		290

15"		2		30"	Drawer for EDP	S7L/42150DE	433		2		866
Total insert height:				**60"**			**Total Price:**				**$2316**
Color code:											

Note: Structural Filler Shelf
All 42" wide units taller than 65 9/32" require a 1½" structural tie bar shelf nominally loacated between 25½" and 36" from the top of the cabinet based on configuration.

HOW TO ORDER A CUSTOM UNIT

1. Specify the apropriate shell height and width.

2. Specify the required number of internal components from the TOP to the BOTTOM of the shell.

3. Be certain the dimensions of the components add up to match the available interior shell height.

4. A 1½" tie bar/tie bar shelf is required on all shells 65 9/32" and over and must be specified. Optimally located between 12" from top and 24" from bottom of unit.

5. All units over 65 9/32" and 42" wide have a structural filler shelf located nominally 25½" - 39" from the top of the cabinet.

6. Specify interior options directly below the component in which they are required.

7. Specify color code.

General Guidelines

- Use this worksheet when specifying components to help build a unit and ensure that all components are in the proper sequence.
- Specify the interior components from the top to the bottom of the cabinet.
- Be sure that the internal components add up to the interior space available in the basic shell.
- In units 65 9/32" and higher be sure to specify 1½" tie bar/tie bar shelf following case specific rules.
- Locking tie bar may be substituted for tie bar in units without structural filler shelves.
- Counterbalance weights are recommended for all free standing units.

Note: Hinged cupboard door inserts include 1½" tie bar shelf, additional tie bar not required.

Guidelines for Ordering Components

- Receding doors are recommended when the top of the component is above eye level or approximately 50" from the floor.
- The quantity of rollout components specified behind a receding door is limited only by the interior component height.
- Rollout components should not be specified in openings above eye level.
- In most instances, interior accessories are not included with components and must be specified separately.
- Locks are included in all units.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select unit color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select counterbalance weight.

CBW	- With Counterbalance
NOCBW	- No Counterbalance

See pricing column for counterbalance weight upcharge.

Ⓓ Select lock option.

KA	- Key alike
KS	- Key standard
NLC	- No lock core

Ⓔ Select lock color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Height
All dimensions shown include 1/8" allowance for glides in recessed position.

Weights
Figures provided are approximate and reflect packaged product without additional accessories.

SPECIAL SERVICES

Special Carton Marking

With specially marked information	N/C

Shipping
Ships **assembled, FOB Pembroke, ON K8A 0E1, freight prepaid.** Freight class 70.

700 Series® Bookcases
General Information

GENERAL INFORMATION

KI 700 Series Bookcases have been designed to optimally store standard three-ring binders on **all** shelves. Shelves are adjustable on 1" increments to accommodate other media storage needs.

The units described on the following pages are to suit the most common storage requirements. Other bookcase sizes can be built to suit specific needs.

Contact KI Customer Service for details.

Height
Bookcases are available in several standard heights. Non-standard heights will be considered through Product Modification Requests. Contact KI Customer Service for details. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
Bookcases are available in two standard depths: 12" and 15".

Width
All bookcases are 30" and 36" wide.

Shelf Clearance
Refer to height and depth clearance dimensions.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell
Shells are unique to bookcases, featuring a flush inner liner. The liner is punched to accept shelf brackets on 1" increments starting approximately 8" from the bottom of the cabinet and terminating approximately 8" from the top of the cabinet. The liners, top and bottom reinforcements are welded into a rigid box frame. The shell is constructed from 18- and 20-gauge steel, with multiple strategically-located offsets to maximize strength. The back is seamless. All corners are reinforced. Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Shelves
Shelves are constructed using 22-gauge steel, formed 7/8" thick on the leading and trailing edges to enhance strength.

Adjustable Glides
Bookcases are supplied with four adjustable glides. The glides can be adjusted from inside the bookcase using a 1/4" hex socket wrench, or from outside the bookcase using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall bookcase heights include the glide in its recessed position.

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a highbred epox . The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.

66 13/16"	12 9/16"	12 1/8"	12 23/32"

Note: Dimensions shown above are with shelves located to provide for storage of three-ring binders. Shelves are easily adjustable on 1" increments. Dimensions will vary according.

700 Series® Curve Bookcases
General Information

GENERAL INFORMATION

KI 700 Series Curve Bookcases have been designed to optimally store standard three-ring binders on all shelves. Shelves are adjustable on 1" increments to accommodate other media storage needs.

The units described on the following pages are to suit the most common storage requirements. Other bookcase sizes can be built to suit specific needs. Contact KI Customer Service for details.

Height
Bookcases are available in several standard heights. Non-standard heights will be considered through Product Modification Requests. Contact KI Customer Service for details. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
Bookcases are available in two standard depths: 12" and 15".

Width
All bookcases are 30" and 36" wide.

Shelf Clearance
Refer to height and depth clearance dimensions.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell
Shells are unique to bookcases, featuring a flush inner liner. The liner is punched to accept shelf brackets on 1" increments, starting approximately 8" from the bottom of the cabinet and terminating approximately 8" from the top of the cabinet. The liners, top and bottom reinforcements are welded into a rigid box frame. The shell is constructed from 18- and 20-gauge steel, with multiple strategically located offsets to maximize strength. The back is seamless. All corners are reinforced.

Illustrated shell heights include 7/8" for adjustable glide in recessed position.

Shelves
Shelves are constructed using 22-gauge steel, formed 1/8" thick on the leading and trailing edges to enhance strength.

Adjustable Glides
Bookcases are supplied with four adjustable glides. The glides can be adjusted from inside the bookcase using a 3/4" hex socket wrench, or from outside the bookcase using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall bookcase heights include the glide in its recessed position.

Standard Paint Finishes
All KI products are chemically etched prior to painting. This process enhances top coat bonding. The top coat is a high solids modified polyester enamel. The enamel is baked on to provide a scratch-and stain-resistant surface.

All inside and outside shell and drawer front surfaces are painted with the same specified paint color.

Interior components and accessories are Dark Tone. Mechanical components are black chrome-plated.

Powder coated/enamel finish colors shown in Product Color Options page are standard and available where specifications call for painted surfaces.

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. The wet coat application is either alkyd or acrylic paint finish. The powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown are standard and are available where specifications call for painted surfaces.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.
How to Build a Model Number
Example: 700 Series Bookcases

700 Series® Pedestals
General Information

GENERAL INFORMATION

KI 700 Series pedestals are available in sizes and drawer combinations to suit any personal storage requirement. Freestanding and mobile units are designed to fit below most worksurfaces. Hanging and worksurface supporting units are sized to fit under KI Systems furniture. A mounting kit is provided with each unit to allow installation under other compatible workstations.

Preconfigured Units
To simplify the specification process, KI offers preconfigured pedestals in the most popular sizes with the most popular internal components. These units are assembled using standard components.

Height
Four pedestal styles are available. Heights include 1/4" allowance for leveling glides fully recessed.
Worksurface Supporting: 27-7/8"
Freestanding: 22-3/8", 25-5/16"
Mobile: 24-11/16", 27-5/8"
Hanging: 19-3/16", 22-1/8"

Depth
All lateral files and storage cabinets are 18" deep.

Width
Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions
Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES
Basic Shell
Twenty-gauge steel body with 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

Drawers
Drawer fronts, two-piece metal construction, 22-gauge steel outerskin welded to 22-gauge inner liner with full-width flush inset or overlap front of pedestal.

Three-inch pencil drawer, single wall two-piece construction. Body 22-gauge, back 22-gauge. Operates on two section 3/4 extension ball bearing suspension.

Six-inch box drawer, single wall two-piece construction. Body 22-gauge, back 22-gauge. Operates on two-section 3/4 extension ball-bearing suspension.

Twelve-inch file, single wall, two-piece construction. Front liner 20-gauge, body 22-gauge. Mounted on full extension slide arm suspensions.

Adjustable Glides
Freestanding and floor supporting pedestals include four glides, adjustable from outside the cabinet. Standard glides provide 1" adjustment

Counterbalance
Counterbalance weight is included on all mobile units (file/file) that do not use the 5th wheel under the bottom drawer. Counterbalance weight is recommended in all freestanding units.

Caster Kit
Consists of four twin-wheel hooded casters. Front two casters are locking; rear two casters are non-locking. 1-1/4" 5th wheel caster is included for model specific units.

Locks
Locks are standard on all units. Locks are a high-security double-bit design. One KI breakaway key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify “lock plugs not installed” on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface. All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

INSTALLATION
Caution Labels
Caution and safety-related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.
Caution: Information is also permanently affixed to the left side of the top drawer. Both labels contain important installation and loading information

Field Reconfiguration
As needs change, KI lateral files and storage cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.
How to Build a Model Number
Example: 700 Series Pedestals

						Optional Picks
S7P	**15**	**24**	**F**	**FF**	**BL**	**CBW50**

S7P	Product name	**700 Series Pedestal**
15	Cabinet width	**15" wide**
24	Cabinet depth (nominal)	**24" depth**
F	Pedestal type	**Freestanding**
FF	Drawer type	**Two 12" file drawers**
BL	Color code	**Black**
CBW50	Optional	**50# Counterbalance weight**

Each pedestal type and accessory has a corresponding character:

M	Mobile
H	Hanging/suspended
F	Freestanding
W	Worksurface supporting
P	3" pencil drawer
B	6" box drawer
F	12" file drawer

Inside Dimensions of Drawers

	17⅝"D PEDESTAL			**21⅝"D PEDESTAL**			**27⅝"D PEDESTAL**

700 Series® Vertical Files
General Information

GENERAL INFORMATION

KI vertical files are designed on a 11" module. To assure KI files are compatible with panel systems, desks or custom architectural details, cabinets are available in 4 different heights.

Height
Vertical files are available in 4 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth
All products are 27⅝" deep.

Width
Cabinets are available in two standard widths: 15" and 18".

Drawer Dimensions
Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell
Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners. 5-drawer cabinets also feature a welded tie bar midway in the shell.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers
Drawer fronts, 20-gauge steel double wall with full-width flush inset pull and label holder. Fronts are screw-mounted to shelves to build drawers. Shelf body, 20-gauge steel. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions. Components have been tested to accept loads of 75 lbs.

Adjustable Glides
Cabinets are supplied with two adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench, or from outside the cabinet using a 7/8"wrench. Standard glides provide 3/4"adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Locks
Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack
This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes
All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Model Numbering System
Each character in the basic model number corresponds to a specific unit feature.
How to Build a Model Number
Example: 700 Series Vertical Files

						Optional Picks
S7V	**15**	**30**	**3D**	**CF**	**BL**	**CBW50**

S7V	Product name	**700 Series Vertical File**
15	Width	**15" wide, letter size**
30	Depth (nominal)	**30" depth**
3D	Number of drawers	**3 drawers**
CF	Equipped with	**Compressor follower** (as opposed to folder bars)
BL	Color code	**Black**

Each internal component has a corresponding character:

D	11" file drawer
CF	Compressor follower
FB	Folder bar

NOTE: Must SPECIFY either**CF** or **FB** for each unit.

All Terrain® Screens
General Information

SCREENS

Screen Frame
Screens shall be available in the following sizes: heights of 54" and 66"; widths of 24", 30", 36", 42" and 48".

The framework shall be constructed of extruded aluminum horizontal and vertical members. The framework shall have a powder-coat finish.

Foot and Peg Legs
The screen shall be available with four contact points with the floor, which is made up of two feet. 24" and 30" wide screens shall be available with three points of contact with the floor, which is made up of one foot and one peg leg.

The foot and peg leg shall be constructed of molded aluminum with a powder-coat finish. The foot and peg leg shall be fastened to the vertical and horizontal framework and will support the screen. The foot and peg leg will provide sufficient clearance to allow nesting of screens for storage purposes.

Casters
Casters shall be available for the screen. Four large twin-wheel casters shall be constructed with 70mm (2-3/4") diameter black tread and black hub. Casters shall have a swivel radius of 2-1/2". Casters shall be available in both locking and nonlocking swivel versions.

There shall be three caster options available to use with the feet and peg leg combinations: three casters are specified; two locking and one-swivel casters are used. When four casters are specified, two locking and two swivel casters are used. When two casters and one glide are specified, two locking casters are used with one glide.

Glides
Screens shall also be available with telescoping glides. Glides shall have a nominal mounting height (3-1/4") equal to the caster height, allowing casters and glides to be interchangeable without changing the screen height. Glides shall be adjustable by 1/2" from the nominal position. Each glide shall include a telescoping hood that maintains contact with the bottom of the foot or peg leg. Glide base shall be KI Glacier white molded nylon. Glide body and telescoping hood shall be black nylon. Glide base diameter shall be 2-3/4".

There shall be three glide options available to use with the feet and peg leg combinations: three glides, two casters and one glide, or four glides.

Fabric Core
The fabric screen core shall be constructed of mineral fiberboard, a fiberglass matting overlay with the fiber adhered to both sides. The finished thickness shall be 1/2". The core shall be trapped in the screen framework. The fabric core is standard with the same fabric on both sides of the cores.

Markerboard Core
The markerboard core shall be constructed of 20-gauge painted steel adhered to both sides of a corrugate core to a finished thickness of 1/2". The paint shall be colormatched to the white porcelain paint finish of other KI markerboard products. The core shall be trapped in the screen framework.

Clear Plastic Core
The clear plastic core shall be constructed of fluted, extruded, clear polycarbonate. It shall be extruded to a 10mm thickness. The core shall be trapped in the screen framework.

Edge Trim
The vertical frame extrusion shall receive a powder coated aluminum edge trim.

Full-Height Core Screen
The full-height core screens shall extend from the top of the screen's framework to the bottom of the screen's framework. Core options of fabric, markerboard, and clear plastic shall be available.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Rails for Paper Management Tools
General Information

Wall Rail
The wall rail shall be constructed of two aluminum extrusions. One extrusion shall be fastened to the wall. The second extrusion shall be snapped onto the first extrusion. The second extrusion shall provide a means for displaying and storing KI paper management accessories.

The second extrusion shall have a machining operation performed on the end of it for aesthetic appeal and shall have a powder-coat finish. The extrusion shall be available in lengths of: 24", 36", 48", 72" and 96".

Panel Rail
The panel rail shall be constructed of one aluminum extrusion and two 16-gauge, cut and formed steel brackets. The extrusion shall mount to KI panel and wall systems.

The extrusion shall provide a means for displaying and storing KI paper management accessories. The extrusion shall have a machining operation performed on the end of it for aesthetic appeal and shall have a powder-coat finish. The extrusion shall be available in lengths of: 24", 36", 48", 72" and 96".

The extrusion shall slide along the brackets to allow for the extrusion to be "off-module" from the panel and wall system.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood finish color.*
Refer to the **Product Color Options** page price list.
*For Kensington Maple add upcharge.

Ⓔ Select glide option.

NG	- Nylon glides
PG	- Polycarbonate glides
RG	- Rubber glides
FG	- Felt glides

Ⓕ Select armcaps.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $253

Ⓖ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

UPHOLSTERY INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix for additional yardage needed. For C.O.M. fabric sent to KI-High Point on mulitple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e, 4.75 x 18 = 85.5 sq. ft).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select table connection.

NT	- No connecting table
LT	- Left facing table connectors
RT	- Right facing table connectors
LTRT	- Left and Right table connectors

Left connector = right side when seated.
Right connector = left side when seated.

Ⓒ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓓ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓔ Select wood finish color.*
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓕ Select armcaps.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $253

Ⓖ Select glide option.

NG	- Nylon glides
PG	- Polycarbonate glides
RG	- Rubber glides
FG	- Felt glides

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. and C.O.L. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq ft).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select pull handle color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcap option.

NAC	- No armcap
WAC	- Wood armcaps (pair)<price o=”1324024” ps=”4” s=”44” t=”1”/>
SAC	- Solid surface; add $1006

Solid surface armcap color is always Corian™ glacier white.

Ⓕ Select wood finish color.*
Pick only if product has wood armcaps or “no casters” is selected.
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓖ Select casters.

NCST	- No casters (standard)
FRCST	- Locking casters-fixed front/rear swivel; add $249

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.

Model	
ALS	$44
ALSS/LFS	$44
ALSS/RFS	$44
ALSS/DS	$44

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select arm option.

WAC	- Wood armcaps
PAC	- Black poly; add $238

Ⓔ Select wood finish color.*
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓕ Select glide option.

NG	- Nylon glides
PG	- Polycarbonate glides
RG	- Rubber glides
FG	- Felt glides

Ⓖ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.

Model	
AOCL	$74
APCL	$74

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select I.V. pole.
(specified facing chair)

NS	- No pole
LFFIV	- Left facing front; add $434
LRFIV	- Left facing rear; add $434
RFFIV	- Right facing front; add $434
RRFIV	- Right facing rear; add $434

If tablet is specified, tablet, I.V. pole and/or catheter bag attachment must all be specified in unique locations.

Ⓔ Select catheter bag attachment.
(specified facing chair)

NCA	- No catheter attachment
LFCA	- Left facing front; add $71
LRCA	- Left facing rear; add $71
RFCA	- Right facing front; add $71
RRCA	- Right facing rear; add $71

If tablet is specified, tablet, I.V. pole and/or catheter bag attachment must all be specified in unique locations.

Ⓕ Select magazine pouch.
(specified facing chair)

NMR	- No magazine pouch
LFP	- Left side pouch (requires add'l fabric; matches arm); add $290
RFP	- Right side pouch (requires add'l fabric; matches arm); add $290

If optional I.V. pole is specified, magazine pouch cannot be specified on the same side.

Ⓖ Select mechanism type.

SM	- Standard mechanism
TM	- Trendelenburg mechanism; add $241

Ⓗ Select armcap option.

WAC	- Wood armcaps
PAC	- Black poly<price o="1324024" ps="4" s="44" t="1"/>
SAC	- Solid surface; add $1006

Solid surface armcap color is always Corian™ glacier white.

Ⓘ Select wood finish color.*
Pick only if product has wood armcaps.
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓙ Select veneer color.
Refer to the **Product Color Options** page in this price list.

Ⓚ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.

AR/RFRT/LT	$30
AR/LFT/VT	$30
AR/RFT/VT	$30
AR/LFRT/VT	$30
AR/RFRT/VT	$30

Placement Rules
-Magazine pouch cannot be on same side as I.V. pole.

-Catheter hooks cannot be on same side as I.V. pole.

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

Side-Mounted Articulating Fold-Down Tablet

Chair Testing and Loading

The Affina II Recliners have passed all standard ANSI BIFMA tests for seating products, and in addition, the chairs also passed KI's bariatric test battery (see document KI-98829) which allows the chairs to safely accommodate weights of up to 750 pounds.

Field Replaceable Seat, Back, Ottoman and Armcaps

Replacement seats include new foam and upholstery and are Velcro Fastened to the seat. Backs are attached to the frame mechanism with a metal-to-metal hinge connection that allows for easy replacement. Removing two screws at the bottom of the back will allow lifting the entire back off the mechanism. Replacement backs come with complete wood frame, foam and upholstery. Footrest Ottoman replacements are fully upholstered and bolt on to the frame. Armcaps are attached to the arms using compression dowels for easy replacement. For full arm replacement. contact a factory representative.

UPHOLSTERY INFORMATION

C.O.M. Fabric

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirement. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

*For Kensington Maple add upcharge.

Ⓜ Select laminate color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.
Model
Affina 1.5 Recliner $32

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select Heat and Massage option.

NHM	- No Heat and Massage
WHM	- With Heat and Massage; add $1466

Ⓔ Select USB Power option.

NUSB	- No USB Power
WUSB	- With USB Power; add $280

Only available if Heat and Massage option is selected.

Ⓕ Select I.V. pole (facing).

NS	- No pole
LRFIV	- Left facing rear; add $415
RFFIV	- Right facing front; add $415
RRFIV	- Right facing rear; add $415

If optional magazine pouch is specified, only Left-facing-rear (LRFIV) or No pole (NS) can be specified.

Ⓖ Select catheter bag attachment hook (facing).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $70
RFCA	- Right facing front; add $70
RRCA	- Right facing rear; add $70

If optional I.V. pole is specified, catheter attachment can not be specified in the same location.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $263

Ⓘ Select mechanism type.

SM	- Standard mechanism
TM	- Trendelenburg mechanism; add $447

Ⓙ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $238
SAC	- Solid surface; add $1006

Solid surface armcap color is always Corian™ glacier white.

Ⓚ Select wingback.

NWB	- No wingback
WWB	- With wingback (requires add'l fabric); add $993

Wingback fabric will match back fabric selection.

Ⓛ Select wood finish color.*
Pick only if product has wood armcaps.
Refer to the **Product Color Options** page in this price list.

Recliner with Wings (ARII/WWB)

Bariatric Recliner with Wings (ARIIBAR/WWB)

Wood Arm Caps
Wood arm caps are constructed of 5/4 select hardwood kiln dried to a moisture content of 5% to 7%, fastened to hardwood plywood panels. Joinery utilizes three (3) 1/2" x 1" spring steel dowels, screwed into position on the arm cap. Plywood arm panels are 1/2" thick plywood skins, inside and out. glued and stapled using mortise, butt, and lap joints throughout. Craftboard (.09 thick) is stapled over edges and bottom beneath 1/4" thick soft polyurethane foam padding.

Mechanism and Chair Frame
Rectangular steel tube frame ranging from 14 to 10 guage, is welded, or riveted, at all member connections and fully powder coated to seal frame. Steel frame arm and footrest mounting plates are 14 guage thickness. Frame is bolted to wood arms at 12 locations using 1/4"-20 machine bolts. Back frame is constructed of 1" laminated plywood with solid wood cross rails. Dowel and lap joints are utilized. Seat frame is 5/4 solid maple wood. Mechanism is all steel ranging in guage from 14-11 guage.

Recliner Back and Seat
Back is 1" hardwood plywood (7 ply) utilixing dowel and lap joints. Six (6) 3" woven web straps are stretched and interwoven across the seat and stapled. Sea Board mounts to steel seat frame using two (2) 1/4"-20 machne bolts. Propex woven polypropylene fabric covers the back surface openings. A layer of 1/4" thick soft polyurethane foam padding covers all non-cushioned surfaces.

Polyurethane Foam Cushions
Seat cushion is composed of 2.5 lb. 35 density high resilient polyurethane foam measuring 4" in thickness. A 1" thick slab of 1.5 lb. 14 density foam is laminated to the top and front edge. Back cushion is composed of 2.5 lb. 35 density high resilient polyurethane foam measuring 2" in thickness. A 1" thick slab of 1.5 lb. 14 density foam is laminated to the foam surface.

Upholstery Covers
Traditional upholstery methods are used throughout.

Central Locking Caster System
5" sealed, locking casters are activated using a foot lever, and are controlled by a series of steel and cast aluminum linkages inside the chair.

Optional Heat & Massage
Heat & Massage units are installed into the backrest and the seat of the unit. Control functions are performed at a built-in control unit in the right-facing arm. Three temperature levels are available for the heat option: low (37C/99F), medium (38C/101F), and high (39C/102F), with an automatic shut-off after four hours of operation. The vibrating massage modules are built into the backrest of the unit, with the controller managing four modes of operation: low location low vibration, low location high vibration, high location low vibration, and high location high vibration, also with an automatic shut-off after 15 minutes of operation. The entire assembly meets TUVRheinland and IEC 60601-1 ratings. The powercoard is a 14 AWG, 15-Amp NEMA rated three conducted SJT, with a three-prong grounded plug. A 72" length of exposed power cord extends from the back of the unit and is strain releaf mounted to the rear of the unit. Use of this product is not intended to offer any medical benefits, but rather supports relaxation, comfort, and convenience to the user.

Optional USB Charger (requires Heat & Massage selection)
The USB power module houses one 5V DC USB (type 2.0 and type 3.0 compatible) charging plug-in receptacle with 1-AMP DC total power (no data). The module is installed in the front of the right-side facing arm.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirement. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Chair Testing and Loading
The Affina II Recliners have passed all standard ANSI BIFMA tests for seating products, and in addition, the chairs also passed KI's bariatric test battery (see document KI-98829) which allows the chairs to safely accommodate weights of up to 750 pounds.

Field Replaceable Seat, Back, Ottoman and Armcaps
Replacement seats include new foam and upholstery and are Velcro Fastened to the seat. Backs are attached to the frame mechanism with a metal-to-metal hinge connection that allows for easy replacement. Removing two screws at the bottom of the back will allow lifting the entire back off the mechanism. Replacement backs come with complete wood frame, foam and upholstery. Footrest Ottoman replacements are fully upholstered and bolt on to the frame. Armcaps are attached to the arms using compression dowels for easy replacement. For full arm replacement. contact a factory representative.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select Heat and Massage option.

NHM	- No Heat and Massage
WHM	- With Heat and Massage; add $1466

Ⓔ Select USB Power option.

NUSB	- No USB Power
WUSB	- With USB Power; add $280

Only available if Heat and Massage option is selected.

Ⓕ Select I.V. pole (facing).

NS	- No pole
LRFIV	- Left facing rear; add $415
RFFIV	- Right facing front; add $415
RRFIV	- Right facing rear; add $415

If optional magazine pouch is specified, only Left-facing-rear (LRFIV) or No pole (NS) can be specified.

Ⓖ Select catheter bag attachment hook (facing).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $70
RFCA	- Right facing front; add $70
RRCA	- Right facing rear; add $70

If optional I.V. pole is specified, catheter attachment can not be specified in the same location.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $263

Ⓘ Select mechanism type.

SM	- Standard mechanism
TM	- Trendelenburg mechanism; add $447

Ⓙ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $238
SAC	- Solid surface; add $1006

Solid surface armcap color is always Corian™ glacier white.

Ⓚ Select wingback.

NWB	- No wingback
WWB	- With wingback (requires add'l fabric); add $993

Wingback fabric will match back fabric selection.

Ⓛ Select wood finish color.*
Pick only if product has wood armcaps.
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

INFORMATION

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.
Model
Affina II Recliner $32

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $70
RFCA	- Right facing front; add $70
RRCA	- Right facing rear; add $70

If optional I.V. pole is specified, catheter attachment can not be specified in the same location.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $263

Ⓘ Select mechanism type.

SM	- Standard mechanism
TM	- Trendelenburg mechanism; add $447

Ⓙ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $238
SAC	- Solid surface; add $1006

Solid surface armcap color is always Corian™ glacier white.

Ⓚ Select wingback.

NWB	- No wingback
WWB	- With wingback (requires add'l fabric); add $993

Wingback fabric will match back fabric selection.

Ⓛ Select wood finish color.*
Pick only if product has wood armcaps.
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓜ Select veneer color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.
Model
Affina II Recliner $32

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select Heat and Massage option.

NHM	- No Heat and Massage
WHM	- With Heat and Massage; add $1466

Ⓔ Select USB Power option.

NUSB	- No USB Power
WUSB	- With USB Power; add $280

Only available if Heat and Massage option is selected.

Ⓕ Select I.V. pole (facing).

NS	- No pole
LRFIV	- Left facing rear; add $415
RFFIV	- Right facing front; add $415
RRFIV	- Right facing rear; add $415

If optional magazine pouch is specified, only Left-facing-rear (LRFIV) or No pole (NS) can be specified.

Ⓖ Select catheter bag attachment hook (facing).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $70
RFCA	- Right facing front; add $70
RRCA	- Right facing rear; add $70

If optional I.V. pole is specified, catheter attachment can not be specified in the same location.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $263

Ⓘ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $238
SAC	- Solid surface; add $1006

Solid surface armcap color is always Corian™ glacier white.

Ⓙ Select wingback.

NWB	- No wingback
WWB	- With wingback (requires add'l fabric); add $993

Wingback fabric will match back fabric selection.

Ⓚ Select wood finish color.*
Pick only if product has wood armcaps.
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓛ Select veneer color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam.

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.

Model	
Affina II Recliner	$32

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

SPECIAL SERVICES

All Terrain® Storage - All Models
General Information

STORAGE

Locks
Locks are standard on all storage units except for certain binder tower units (see binder tower general information). Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Note that units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify “lock plugs not installed” on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Bases
All Terrain pedestals, binder towers, and low height storage units are offered in a choice of 3" dual-wheeled casters (3-1/2" with threaded insert) or 3" glides. These units may be specified with 4 casters (2 locking), 2 casters and 2 glides or 4 glides. Outrigger casters are offered on some models.

All Terrain storage towers and AV towers are offered with larger 4" casters (4-1/2" with threaded insert) or with a plinth base. Plinth base features adjustable glides.

Casters are black with black wheel hubs and are nylon. Plinth base is steel.

Inboard casters or glides shall be mounted to cast aluminum plates.

The optional outriggers shall be cast aluminum. The outriggers are mounted to the bottom of the shell by four 1/4” - 20 machine screws fastened to the weldnuts. The outriggers on peds hold the caster stems at a 5° angle to the floor. This provides more true tracking of the ped when it is being pulled or pushed.

For similar models, inboard mounting plate, outriggers, casters and glides are completely interchangeable to adapt the level of mobility or aesthetic to changing needs. Changing the casters, glides, etc., will not affect the unit’s height.

Finishes
All Terrain storage units have standard detail and finish options, providing the designer with a wide variety of looks. Some of these options include paint colors, laminate fronts, pull designs and optional top styles. See below for information on paint and laminate choices and conditions. See the general information section for the particular storage type for design choices applicable to that product group.

Standard Paint Finishes
All KI storage products are chemically pre-pared prior to painting. This process enhances top coat bonding. Standard topcoat finishes are electrostatically applied powder and /or medium solids ALKYD baking enamel provide a stain- and scratch-resistant surface.

All inside and outside shell and drawer front surfaces are painted with the same specified paint color. Interior components and accessories are Black. Mechanical components are plated. Additional colors are standard and may be available where specifications call for painted surfaces.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Nonstock Plastic Laminates
Additional laminates are available but may be subject to additional lead time. Other laminates may be requested through a Product Modification Request. Contact Customer Service for details.

Door Fronts
All Terrain AV towers, modular towers with cupboard modules, and binder towers configured with doors will have hinged doors. All Terrain modular tower cupboard doors utilize 94° concealed hinges. The AV tower and binder tower doors utilize 270° “wrap-around” hinges.
Steel doors are constructed from outer door bodies and inner door liners. The door body is constructed from 20-gauge formed steel. A 3/4” flange is formed on all edges. The pull edge has an additional flange, formed inward to accept the liner. The liner is formed from 20-gauge steel and is spot-and MIG-welded to the door body. The steel door is specified with one of the four pull options (see below). The steel door is standard with a lock.

Laminate doors are constructed from .03 HPL laminate front and back and on the edges. Core material is particleboard. The laminate door is constructed to a finished thickness of 3/4”. The laminate door is specified with one of the three pull options (see below). The laminate door does not accommodate the inset plastic pull. The laminate door is standard with a lock.

Drawer Fronts
All All Terrain storage drawers (except binder tower file drawers) include an over-lapping drawer front (see binder tower specifications). Drawer fronts are screw-mounted to the drawer body.

The steel-front option outer fronts are fabricated to accept the associated plastic or protruding pull options (see below). The front is 20-gauge formed steel with 3/4” flanges on all four sides. Behind the front is welded18-gauge steel mounting strips at both side ends. The laminate front option outer fronts are fabricated to accept the associated protruding pull options (see below). Laminate fronts are 3/4” thick with a particleboard core, .03 HPL laminate front and edge banding and phenolic backing sheet.

Drawer and Door Pulls
All All Terrain storage units are available with steel fronts or laminate fronts with a choice of protruding pulls.

The pulls are made from aluminum or steel and attach to steel or laminate fronts by use of two machine screws. The metric pull is available in an aluminum finish. The bow tie pull is available in a nickel or aluminum finish. The beveled steel pull is available in satin chrome or black.

Tops
All All Terrain storage units (except binder towers) are available in a seamless 20-gauge cold-rolled steel painted top. All storage units are available with a 3/4” thick non-steel directly attached top. Some All Terrain storage units are available with a landing pad top.

Non-Steel Tops
Non-steel directly attached or landing pad tops are 3/4” thick. The laminate tops are constructed from .03 HPL laminate on top and a .03 melamine sheet backer on the bottom. 74P banding is applied to the edges. Core material is particleboard.

Landing Pad Tops
Landing pad tops are non-steel tops that are elevated above a standard steel top. Landing pads are useful for providing additional worksurfaces. The landing pad tops are fixed to the steel tops by four aluminum posts with steel through-bolts. The top surface of a landing pad is flat and smooth with no through-holes or any protrusions.

Installation Information
Complete instructions on the proper installation and use of KI files and storage are provided in each unit shipped.

When applicable, the installation instructions refer to the correct methods of leveling, ganging (lateral files only) and loading.

Counterbalance weights should be installed in all single free-standing lateral files. All Terrain pedestals, binder towers, low height and modular tower units are shipped with factory-installed counter weights as required.

Field Reconfiguration
As needs change, All Terrain storage units can readily be field-changed; however, this process should be undertaken by a qualified service technician.

All Terrain® Pedestals
General Information

PEDESTALS

General Information
See All Terrain General Storage Specifications located within this price book for specification information common to all All Terrain storage products. All Terrain pedestals are available in sizes and drawer combinations to suit any personal storage requirement. Most All Terrain mobile pedestals are designed to fit below worksurfaces. Pedestals with landing pads are designed to supplement worksurface space.Pedestals with ourtriggers are specially designed to provide straight tracking when pushed or pulled but still allow unit movement in all directions. Pedestals with retractable handles provide the highest level of ergonomic mobility and allow pushing as well as pulling the unit.

Mobility
All Terrain pedestals are available in 3 levels of mobility. All pedestals come standard with large 3" twin-wheel swiveling casters. The optional caster outriggers provide straight tracking of the units when pushed or pulled. The optional retractable handle provides the highest level of ergonomic mobility by allowing pushing or pulling of the unit from an ergonomically friendly position.

Height
Pedestal height is determined by the drawer configuration and top style. For units with steel tops, there are three unit heights of: 23-11/16", 26-3/4", and 29-13/16" (will not fit under a 29" high worksurface). An optional direct-mounted top adds 3/4" to these heights. Optional landing pad tops on the two shorter box sizes increase the unit height to 29" (to match worksurface height). An optional landing pad top on the largest box size increases unit height to 34-13/32".

Depth and Width
All pedestals are 15" wide and are available in two standard depths: 17-5/8" and 21-5/8". Optional outriggers add 3-23/32" to the overall width and depth.

Basic Shell
All Terrain pedestal shell is constructed of components consisting of top, wrapper (sides and back), front and back interior uprights, and bottom reinforcements. The pedestal shell is spot-welded and MIG-weld-ed together.

The top is 20-gauge cold-rolled steel (C.R.S) with 1-1/8" flanges on all four sides. The front face has an additional flange formed inward to provide additional strength. The front 1-1/8" flange has a prepunched hole approximately 2" from the right corner for the lock.

The wrapper is formed 20-gauge C.R.S. The wrapper is formed with 3/4" flanges along the 2 vertical sides. An additional flange is formed inward for additional strength and accepts the upright interior side panels. The upper edges are offset formed to accept the 1-1/8" top flange. The bottom edges are formed with a 3/4" flange to accept the uprights and bottom supports.

The bottom reinforcement is formed 20-gauge C.R.S. with 3/4" flanges on two sides. Two bottom 20-gauge reinforcements are welded inward along the front and back of the bottom of the pedestal shell. The bottom reinforcements are made with eight 1/4 - 20 threaded weldnuts that accept plate-mount or outrigger-mount casters.

The interior uprights are made from formed 20-gauge C.R.S. They are welded on each side of the pedestal at the front and back. The rear edge has 3/4" flange for strength.The front upright assembly is a spot-welded box frame design, in which both front upright members are securely welded to the top reinforcement and the bottom reinforce-ment to provide a strong, square frame. Each corner or joint has a unique bracing design punched from the parent material.This design provides for a double thickness at each corner for maximum strength.

Drawer
Drawers are available in 3" (pencil), 6" (box), 9" (box with hidden extending pencil drawer), 10-1/2" (compact file), and 12" (file) heights.

The drawer back is formed from 22-gauge prepainted C.R.S. with a 30° form along the top edge and is mechanically clenched to the body. Each file drawer has a Z-shaped component welded to the front liner to function as a support for one end of the hanging folders. The other end of the hanging folder is supported by locating the full-height divider in the appropriate slots.

The drawer body is formed from 22-gauge prepainted steel. The upper edges are formed to provide a smooth edge as well as providing full-length reinforcements. The box and file drawers are designed with four rows of slots to accept adjustable dividers. The file drawer size allows for hanging of letter-sized hanging file folders. A second set of punched holes allows mounting of the divider for hanging A4-sized hanging file folders.

NOTE: The 10-1/2" compact file drawer does not contain slots for drawer dividers and cannot hang legal files.

Drawer Suspension
The pencil and box drawers operate on a 3/4" travel, two-section slide assembly constructed from roll-formed precision sections, rolling on hardened steel ball bearings. The file drawers operate on a three-piece suspension assembly that allows for the drawer body to extend clear of the front face of the pedestal. The roll-formed precision sections operate on hardened steel ball bearings. The suspension has a hold-in or retaining device to hold the drawer in a closed position. Slides are a decorative black finish.

Counterbalance
A counterbalance weight is installed in the pedestal to assure stability when the drawers are extended.

Interlock
All 6", 9", 10-1/2" and 12" pedestal drawers are equipped with a unique patented inter-lock safety system which permits only one drawer to be opened at a time. The system is designed to reduce the risk of a stand-alone unit tipping over. To minimize possible damage to the interlock system, activating cams restage. If during servicing or installing more than one opening is extended, these openings can be closed without damage to the interlock components.

Finish
The pedestal shell, drawers, steel doors, out-riggers, and landing pad posts are thoroughly cleaned and subjected to a phosphate etching process before painting. A modified polyester backing enamel is applied to all metal surfaces and baked at 300° for 20 minutes to ensure a durable scratch-resistant finish.

Sizes
Height: 23-11/16", 24-7/16", 26-3/4" 27-1/2", 29", 29-13/16", 30-9/16", and 34-25-32"

Width: 15", 18-1/8"

Depth: 17-5/8", 21-5/8", 21-11/32", and 25-11/32"

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/edge style.

74P	- 3/4" laminate top w/74P edge band

Ⓑ Select front/pull style.

S5	- Steel/satin chrome beveled pull
S6	- Steel/black beveled pull
S2	- Steel/aluminum metric
S3	- Steel/aluminum bow tie
S4	- Steel/nickel bow tie
L2	- Laminate/aluminum metric
L3	- Laminate/aluminum bow tie
L4	- Laminate/nickel bow tie

Ⓒ Select base style.

4CW	- 4 black casters (2 locking)

Ⓓ Select unit color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

All Terrain® Binder Towers
General Information

BINDER TOWERS

General Information
See All Terrain General Storage Specifications located within this price book for specification information common to all All Terrain storage products. All Terrain binder towers are available in heights and drawer combinations to suit personal or shared storage requirements. Binder towers specified without drawers are optimized for book or binder storage. These units include two adjustable shelves. Units may be specified with a single file drawer that can be used for letter files, legal files, or for A4 files. Units with a file drawer include one fixed and one adjustable shelf and may also be specified with pullout pencil drawer.

All Terrain binder towers may be specified with or without a door, on casters or glides with or without outriggers. The binder tower always includes a laminate either directly attached or as a raised landing pad. These tops can be specified as bowed front rectan-gular or as shaped.

Height
All Terrain binder towers are available in 39-3/4" or 44-11/32" heights. Both heights provide a standing-height worksurface that invites collaboration. Specifying a landing pad, outriggers, casters or glides do not affect the unit height.

Depth and Width
All All Terrain binder towers shells are 18"wide and 17" deep. A shaped top or outriggers add to the overall unit width and depth. Optional outriggers add 3-23/32" to the overall width and depth. Shaped tops add 2-1/2" to the depth and 4" to the width.

Binder Tower Shell
All Terrain binder tower shells are constructed of components consisting of top, top reinforcements, bottom, wrapper (sides and back), upright interior side panels, and bottom reinforcements. The binder tower shell is spot-welded and MIG-welded together.

The top is 18-gauge cold-rolled steel (C.R.S.) with 3/4" flanges on all four sides. The front face has an additional flange formed inward to provide additional strength. Two top 20-gauge reinforcements are welded inward along each side of the top. The reinforcements are punched to allow mounting of the pencil drawer.

The wrapper is formed 20-gauge C.R.S. The wrapper is formed with 3/4" flanges along the two vertical sides. An additional flange is formed inward for additional strength and accepts the upright interior side panels. The upper edges are offset formed to accept the 3/4" top flange. The bottom edges are formed with a 3/4" flange to accept the binder tower bottom.

The bottom is formed 20-gauge C.R.S. with 3/4" flanges on all four sides. The front face has an additional flange formed inward to provide additional strength. Two bottom 20-gauge reinforcements are welded inward along each side of the bottom. The bottom reinforcements are made with eight 1/4" - 20 threaded weldnuts that accept plate-mount or outrigger-mount casters.

The upright interior side panels are made from formed 20-gauge C.R.S. They fill up the interior left and right side of the binder tower. The front and the upright is formed to fit inside the channel form of the wrapper. The rear edge has a 3/4" flange for strength. The uprights are MIG-welded internally at each end, top and bottom. The welding provides a rugged shell design. The uprights are punched with 1" slots on a 1-inch increment pattern to hang the shelf supports. The uprights are also punched to mount the drawer suspensions.

Acrylic Doors
In addition to no door, steel door and laminate door options (see general storage specifications), All Terrain binder towers are available with an acrylic door. The acrylic door is constructed from 1/4" thick frosted clear polycarbonate. The edges are finished with a rounded edge. The door's pull is machined into the door. Acrylic doors are reversible to change between right and left swinging. Acrylic doors do not include locks.

Drawer
Drawer fronts are fabricated from 18-gauge steel, are hemmed at the top, and have a 3/4" flange at the bottom for welding to the drawer body. The front is punched to receive a 1-1/2" diameter rubber grommet pull.

The drawer back is formed from 20-gauge C.R.S. and is hemmed along the top edge. The back is spot-welded to the drawer body.

The drawer body is formed from 20-gauge steel and is hemmed along the top edges. It is spot-welded to the drawer back and drawer front. The drawer body is sized to allow for hanging of legal-size hanging file folders. Also, binder tower drawers do not lock. The sides of the drawer are punched to allow the mounting of hanging bars. The hanger bars allow for hanging of letter-sized hanging file folders. A second set of punched holes allows mounting of the divider for hanging A4-sized hanging file folders.

The optional pencil drawer is a plastic drawer with multiple compartments for small items such as pens, paperclips, etc., and letter or A4-size paper.

Counterbalance
To ensure stability when the drawer is open, a counterbalance weight is factory-installed in binder towers specified with file drawer.

Drawer Suspension
The three-piece suspension assembly allows for the drawer body to extend. The roll-formed precision sections operate on hardened steel ball bearings. The suspension has a hold-in or retaining device to hold the drawer in a closed position.

Binder Tower Shelf and Support
Binder tower shelves are formed from 20-gauge C.R.S. with 3/4" flanges front and back. The front and back faces have an additional flange formed inward 3/4" and another small flange formed upwards to provide additional strength. The shelf support is formed from 20-gauge steel and supports the shelf along the full length of the left and right sides of the shelf. The shelves move up and down the interior of the binder tower in 1" increments.

Locks
Locks are standard on binder tower steel and laminate doors. Locks are not available on acrylic doors or drawers. Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Note that units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

All Terrain® Low Height Storage
General Information

LOW HEIGHT STORAGE

General Information
All Terrain low height storage units are available in sizes and drawer combinations to suit personal or group storage requirements. They are sized to tuck under worksurfaces or, with a landing pad option, to provide supplemental worksurfaces.

Base Options
Base options for low height storage units include exposed 75mm (3") wheeled casters or glides or a combination. With the combined caster/glide option, units can be positioned flush to walls/panels while still providing a more static look and function.

Height
All Terrain low height storage unit height is determined by the drawer configuration and top style. For units with steel tops, there are two unit heights of 26-3/4" and 29-3/16" (will not fit under a 29" high worksurface). An optional direct-mounted top adds 3/4" to these heights. Optional landing pad tops on the shorter box size increases the unit height to 29" (to match the worksurface height). An optional landing pad top on the largest box size increases unit height to 34-13/32".

Depth and Width
All All Terrain low height storage units are 21-5/8" deep, and are available in two standard widths of 24" and 30".

Basic Shell
All Terrain low height storage unit shell is constructed of components consisting of top, wrapper (sides and back), front and back interior uprights, and bottom reinforcements. The unit shell is spot-welded and MIG welded together.

The wrapper is formed 20-gauge C.R.S. The wrapper is formed with 3/4" flanges along the two vertical sides. An additional flange is formed inward for additional strength and accepts the upright interior side panels. The upper edges are offset-formed to accept the 1-1/8" top flange. The bottom edges are formed with a 3/4" flange to accept the uprights and bottom.

The bottom reinforcement is formed 20-gauge C.R.S. with 3/4" flanges on two sides. Two bottom 20-gauge reinforcements are welded inward along the front and back of the bottom of the unit shell. The bottom reinforcements are made with eight 1/4" - 20 threaded weldnuts that accept plate-mount or outrigger-mount casters.

The interior uprights are made from formed 20-gauge C.R.S. They are welded on each side of the unit at the front and back. The rear edge has 3/4" flange for strength. The front upright assembly is a spot-welded boxframe design, in which both front upright members are securely welded to the top reinforcement and the bottom reinforcement to provide a strong, square frame. Each corner or joint has a unique bracing design punched from the parent material. This design provides for a double thickness at each corner for maximum strength.

Drawer
Drawers are available in 10-1/2" (compact file) and 12" (file) heights. Fronts are screw mounted to the drawer body.

The drawer back is formed from 22-gauge pre-painted C.R.S. with a 30° form along the top edge and is mechanically clenched to the body.

Each file drawer has a Z-shaped component welded to the front liner to function as a support for one end of the hanging folders. The other end of the hanging folder is supported by locating the full-height divider in the appropriate slots.

The drawer body is formed from 22-gauge pre-painted steel. The upper edges are formed to provide a smooth edge as well as providing full-length reinforcements. The box and file drawers are designed with four rows of slots to accept adjustable dividers. The drawer body is sized to allow for hanging of legal-size hanging file folders. The file drawer size allows for hanging of letter-size hanging file folders. A second set of punched holes allows mounting of the divider for hanging A4-size hanging file folders.

Drawer Suspension
The file drawers operate on a three-piece suspension assembly. The roll-formed precision sections operate on hardened steel ball bearings. The suspension has a hold-in or retaining device to hold the drawer in a closed position.

Counterbalance
A counterbalance weight is installed in low height storage units to assure stability when the drawers are extended.

Interlock
All Terrain low height storage unit drawers are equipped with a unique patented interlock safety system, which permits only one drawer to be opened at a time. The system is designed to reduce the risk of a standalone unit tipping over. To minimize possible damage to the interlock system, activating cams restage. If during servicing or installing more than one opening is extended, these openings can be closed without damage to the interlock components.

All Terrain® Storage Towers
General Information

STORAGE TOWERS

General Information
See All Terrain General Storage Specifications located within this price book for specification information common to all All Terrain storage products.

All Terrain storage towers are available in sizes for drawer and other module type combinations to suit any personal, shared, or group storage requirement. Storage tower configurations range in heights from standing height 39"to tall 66" height. They are always 24" deep to stand next to worksurfaces without wasting the space behind. Storage towers come in 24" and 30" widths.

All Terrain storage towers are modular in construction. In this way, a vast number of different configurations are available to perfectly suit users' needs. Modules are bolted together in the factory to provide a fully assembled configured unit.

All All Terrain storage towers are built upon a base module and a drawer module. Other modules may be bolted above or beside the drawer module. There is always a top module bolted to the top of the tower. The types of modules that can be bolted above the drawer module are: bookcase modules (open to the side of the tower), cupboard modules (front facing with cupboard doors), and binder drawer modules (roll-out drawers with side access for binders). Modules are bolted together using #10 bolts, nuts and sheet metal screws.

Base module options include a heavy-duty base that includes exposed large wheeled caster or a box (plinth) base that includes concealed leveling glides.

Top modules include choice of a 3/4" steel or laminate top. Also available for 39" and 44" towers are landing pad tops.

All modules include a lock, except for bookcase modules. Units with multiple locks are keyed.

Laminate Fronts
When laminate fronts are specified on storage towers, the laminate is applied to drawer fronts, cupboard doors and tie bars. Base modules, steel top modules (if specified) and tower sides and back are all painted. For storage towers with bookcase modules, a laminate front option is only available with a Product Modification Request. Contact Customer Service for details.

Storage Tower Sizes:

DEPTHS
All All Terrain storage towers are 24" deep. Optional outriggers add 3-23/32" to the overall width and depth. Optional protruding pulls add 1-1/8" to the depth.

WIDTHS
Storage towers come in 24" and 30" widths. Optional caster or glide outriggers add 3-23/32" to the overall width and depth.

HEIGHTS
Available storage tower heights: Heights with tops at a standing height are 39" (39-3/4" actual), and 44" (44-11/32" actual). Other heights: 48" (48-15/16" actual), 54" (55-1/16" actual), and 66" (67-5/16" actual).

Storage Tower Modules - Module Construction
All storage tower modules consist of a wrapper and reinforcement channels. Some modules also include flush liners.

Wrapper
All storage tower modules have a 20-gauge steel wrapper with 1" flanges on top and bottom edges for bolting together the modules. Wardrobe modules have an L-shaped wrapper that bolts to the top, bottom and side of adjacent modules. The back edge of the wrapper includes a 1" flange for bolting to the side of adjacent modules. All modules have a 3/4" channel formed in the front edge providing a seamless rigid form.

Reinforcements
All storage tower modules have 18-gauge top hat channel reinforcement channels providing strength, rigidity and, where applicable, a firm structure for attachment of drawer slides. Drawer modules (including binder drawer modules) include two sets of reinforcement channels welded to the sides of the wrapper. Each channel set is constructed by welding three sections of channel into a U-shaped structure. This structural channel set is welded to the rapper with the bottom of the U-shaped section forming reinforcement across the top of the module. Bookcase and cupboard modules include two pairs of reinforcement channels welded across the top and bottom of the wrapper. Wardrobe modules have a pair of reinforcement channels across the top of the module. Additionally, there is a front flush filler welded to the front edge of the wrapper.

Liners
Bookcase and cupboard modules include liners. Bookcase modules include 20-gauge flush liners welded to the wrapper along the bottom and sides. The sideliners provide a rigid box structure as well as providing shelving slots on 1/2" centers. 22-gauge top liners are screwed in place to finish bookcase. A 20-gauge top front filler finishes the top front of the cupboard modules and provides a secure point for locking.

Drawer Modules
All All Terrain storage towers consist of a base module bolted to a drawer module. Drawer modules come in widths of 30" (30" wide towers only), 24" and 15" wide (24" wide towers with a wardrobe). All drawer modules have a 1-1/2" high lock bar above the set of drawers and usually have fullwidth drawers.

30" wide drawer modules can contain two vertical rows of 15" wide drawers. In this configuration there are two independent locks in the full-width lock bar (one for each row of drawers). This is particularly useful for allowing a single unit to be shared by individuals.

The height of the drawer modules is dictated by the number and height of the drawers. All Terrain storage tower drawers pull out toward the front of the unit. Drawer heights available are: 3" (pencil), 4-1/2" (box), 6" (box), 7-1/2" (box), 1-1/2" (file), and 12" (file) heights. Smaller drawers are always above larger drawers.

Binder Drawer Module
Binder drawer modules are 15" wide. They contain a single drawer with independent lock. One side of the drawer body is full height while the other has a drawer pan height of 4-1/2". This provides side access for convenient storage of books and binders. Binder drawers are not intended for file storage. Binder drawer modules are always positioned directly above a drawer module and next to either a bookcase, cupboard or wardrobe module.

Sizes
Height: 13.781", 15.31", 16.84"
Width: 15"
Depth: 24"

Drawer Suspension
All All Terrain storage tower drawers operate on a three-piece suspension assembly. The roll-formed precision sections operate on hardened steel ball bearings. The suspension has a hold-in or retaining device to hold the drawer in a closed position. Slides are a decorative black finish.

Interlock
All drawers (except 3" pencil drawers) are equipped with a unique patented interlock safety system, which permits only one drawer to be opened at a time. The system is designed to reduce the risk of a stand-alone unit tipping over. Modules with side-by-side drawers have two independent interlock systems that allow unimpeded drawer access in shared tower situations. To minimize possible damage to the interlock system, activating cams restage. If during servicing or installing more than one opening is extended, these openings can be closed without damage to the interlock components

Bookcase Modules
Bookcase modules always face the side of the tower. When facing this module from the tower side, the module measures 24" wide and 15" deep. Bookcase modules are perfect for storing books, binders, or other items that are frequently accessed. Clutter remains unseen since the opening faces the side. Bookcase modules are always mounted above a drawer module. When configured with a 26" or 29-3/32" lower drawer module, the bookcase height is slightly above a typical worksurface height. This makes the unit ideal for positioning at the end of a worksurface.

Sizes
Height: 13.781", 15.31", 16.84", 19.906", 21.438", 22.969", 35.219"
Width: 24"
Depth: 15"

Cupboard Modules
Cupboard modules are always front facing with one or more doors. They are always 24" deep. They may span the width of the unit or may be configured next to bookcase, binder drawer, or wardrobe modules.

Sizes
Height: 13.781", 15.31", 16.84", 19.906", 21.438", 22.969", 35.219"
Width: 9", 15", 21", 24", 30"
Depth: 24"

Shelf and Supports
The shelves for both bookcase and cupboard modules are formed from 20-gauge C.R.S. with 3/4" flanges front and back. The front and back faces have an additional flange formed inward 3/4" and another small flange formed upwards to provide additional strength. The shelf support is formed from 20-gauge steel and supports the shelf along the full length of the left and right sides of the shelf. The shelves move up and down the interior of the bookcases and cupboards in 1/2" increments.

Wardrobe Modules
Wardrobe modules are 9" wide and include coat hanger hooks at the top. Wardrobe modules are bolted to the base of the unit and to the side of two or more modules.

Sizes
Height: 41.34", 43.25", 44.41", 49.25", 61.25"
Width: 9"
Depth: 24"

Locks
Locks are standard on all storage towers. Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Note that units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/edge style.

NT	- No optional top (steel)
74P	- 3/4" laminate top w/74P edge band

Ⓑ Select front/pull style.

S5	- Steel/satin chrome beveled pull
S6	- Steel/black beveled pull
S2	- Steel/aluminum metric
S3	- Steel/aluminum bow tie
S4	- Steel/nickel bow tie

Ⓒ Select base style.

4CW	- 4 black casters (2 locking)
PLNT	- Traditional Plinth Base

Ⓓ Select unit color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓖ Select lock option.

KS	- Key standard
NLC	- No lock core
KA	- Key alike

Ⓗ Select lock color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

All Terrain® AV Towers
General Information

AV TOWERS

General Information
All Terrain AV towers are available in one size with two configurations. They have the same size, general look, and finish options as the 66" high x 30" wide All Terrain storage towers. Both configurations include a top module that is a special AV cupboard module. One configuration has an AV media drawer lower module, which is specially configured for AV media. The other configuration has an AV cupboard module similar to the top module. Reinforced shelves support AV equipment and include wire apertures. The AV cupboard modules include apertures with grommets between modules (in cupboard/cupboard option) and through the back for wire management and wraparound 270° hinges.

Options
AV towers have all of the options available for 66" All Terrain storage towers.

Height, Depth and Width
All Terrain AV towers are 67-11/32" high x 30" wide x 24" deep.

Basic Shell
All Terrain AV tower unit is of modular construction and consists of top, cupboard and drawer modules on a base. The upper module is always a cupboard.

Upper Cupboard/Lower Cupboard
The module consists of a one-piece wrapper (sides, back and front face) with two structural upright frames and a welded-in bottom. In the upper module, both the bottom and back of the unit have two 1-1/2" diameter grommeted holes for wire management.

The wrapper is formed 20-gauge C.R.S. The wrapper is formed with 3/4" flanges along the two vertical sides. An additional flange is formed inwards for additional strength and accepts the upright interior side panels. The top and bottom edges are formed with a 1" flange with appropriate holes for fastening the top and lower module.

The upright components are 18-gauge channel-formed sections electrospot-welded together into a structural box frame. The frame consists of two vertical channels with lugging to accept the adjustable shelf, a top and bottom member. There are two frames: one at the front of the cabinet and one at the back.

A 20-gauge bottom with 3/4" side, front and back flanges is welded to the wrappers.

Adjustable Shelf
The 20-gauge shelf has multiple return flanges front and back for superior strength. Notched side flanges slip into the lugging on the upright members of the case providing an integral shelf bracket. Two 18-gauge top hat channel sections are welded to the shelf stops short of the back of the case providing as space for wires to be routed.

Drawer Unit
The drawer module is identical in construction to the All Terrain storage tower drawer modules. The drawer configuration is intended for AV media. The drawer combination includes a 4-1/2" drawer for media including VHS tapes and CD's, a 7-1/2" drawer for media including DVD's and a 12" drawer for training documents such as letter-sized files or binders.

Locks
Locks are standard on all All Terrain towers. Locks are a high-security double-bit design.One KI break-away key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers. Note that All Terrain units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

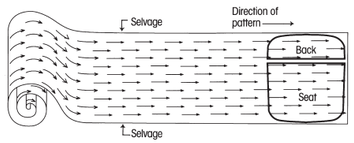
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

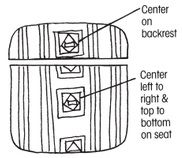

Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Mechanism (Fabric and Mesh Task Chair)
Reinforced plastic base on cast aluminum housing with three control levers. One lever activates the pneumatic cylinder for a range in seat height. The second lever controls the back tilt angle, which has four settings. The third lever adjusts the tilt force and is located at the side of the chair for ease of use.

Mechanism (Conference Chair)
Swivel tilt mechanism is a stamped steel dual housing which includes swivel and tilt tension. Steel handle with molded urethane paddle controls seat height adjustments along with single lock-out or free-float action. Standard seat height range adjusts from 16-1/4" to 19-1/2". An auto height/auto return pneumatic cylinder option is available which returns the chair to its original front-facing and highest position.

Backrest (Conference and Mesh Task Chair)
A black reinforced plastic frame with mesh insert.

Backrest (Fabric Task Chair)
Flannel plastic back liner with polyurethane foam and a replaceable fabric slip cover attached to a black reinforced plastic frame. A plastic strip sewn to the edge of the fabric slip cover slides into a channel in the back liner.

Seat (Fabric and Mesh Task Chair)
Plastic seat liner and polyurethane foam covered with a replaceable fabric slip cover. The fabric slip cover is attached to the seat with Velcro.

Seat (Conference Chair)
Seat foam, upholstery, and underseat plastic liner are one unit which is field-replaceable.

Seat Slide (Fabric and Mesh Task Chair)
Seat depth is adjustable to one of five settings.

Adjustable Lumbar (Mesh Task Chair)
Optional clear adjustable lumbar has two control levers. One adjusts the lumbar height and the other adjusts the lumbar depth. Levers telescope and retract for ease of use.

Headrest
Upholstered in black faux leather. The headrest pad rotates forward or backward (Mesh Task Chair) or adjusts vertically and forward or backward (Fabric Task Chair). The Fabric Task Chair headrest automatically maintains a supportive position as the user tilts back. Headrests are field-installed.

Adjustable Arm (Fabric Task Chair)
Black molded arm cap is mounted to a reinforced black plastic arm post. The arm cap is made of TPU (thermal polyurethane), a non-irritating, recyclable material which is soft to the touch. It has 2" of depth adjustment and 3" of height adjustment. The arm caps pivot to provide a 4" range between the arm caps from 17 - 21".

Adjustable Arm (Mesh Task Chair)
Black molded polyurethane arm cap is mounted to a reinforced black plastic arm post. It has 2" of depth adjustment and 2" of height adjustment. The arm caps pivot to provide a 5-3/4" range between the arm caps from 16-3/4 - 22-1/2".

Fixed T-Arm and Loop Arm
Black reinforced plastic arm.

Base
Two 26" five-blade base options are available: a reinforced black nylon base or a polished aluminum base.

Casters
Double wheel black carpet or hard surface casters are molded of reinforced plastic. A reinforced plastic glide option is available on the Conference Chair.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test sample must be sent to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

C.O.M. Availabilty
C.O.M. is only offered on the Mesh Task Chair.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

24/7
Altus Fabric Task and Mesh Task chairs can be used in 24/7 applications.

Information

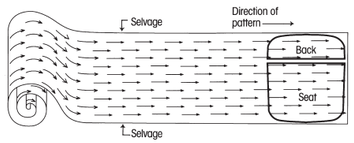
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

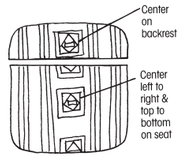


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

INFORMATION

C.O.M. Testing and ProductionRequire-ments

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. Upholstered only and cushioned/upholstered chairs must be tested separately. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Customer's own vinyl cannot be used on this product.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

Apply® Stack Seating
General Information

PRODUCT SPECIFICATIONS

Shell
One-piece contoured wood shell is constructed of formed plywood, .460"-.480" thick, 7-ply Maple and Poplar construction. The mold-formed seat and back provide for comfort and strength. Top/bottom and front/back surfaces are vertical grade postforming, product type 335, high-pressure laminate thickness of .028". Standard finish is #38 or #60 with a sanded edge with tung oil finish. The wood shell is supported by four plywood circular disks and 1/4 -20 T-nuts bonded with construction-grade adhesive and fastened to a variety of base structures with four 1/4 -20 x 1/2" thread-locking screws. The chair perimeter is designed such that it provides a feature to support backpacks or courier bags. Shells are available in wood grain laminates or solid laminates. Café stools are available with high-back shell or low-back shell. See color addendum for details.

Optional Upholstered Seat
As an option, shells may be equipped with an upholstered seat pad. Urethane foam is attached to a formed poly upholstery liner, then upholstered using a drawstring process. The foam is a nominal 1/2" thickness. The pad assembly is attached to the shell using #10-24 screws, engaging the plastic bosses in the liner. Upholstery is available in most KI in-grades, Pallas, or COM/KOM. See color addendum for details.

Frames
Legs are formed from 3/4" O.D. by 13-gauge tubular steel. Sled bases are formed from 3/4" O.D. by 14-gauge tubular steel. The seat plate is formed from 12-gauge steel and reinforced with 7/16" diameter wire crossmembers. All joints are welded. The frames are finished in either baked-on electrostatically-applied 30 degree gloss epoxy powder-coat paint, or bright nickel-chrome plating. An injection-molded polypropylene shroud finishes the underside of the assembly, and provides a contoured surface for stacking. Sled base or 4-leg chairs stack 6-high on the floor.

Café Stool
Café stools are available in nominal 24" and 30" seat heights and are not stackable. Legs are formed from 3/4" O.D. by 13-gauge tubular steel. The seat plate is formed from 12-gauge steel and reinforced with 7/16" diameter wire crossmembers. All joints are welded. The frames are finished in either baked-on electrostatically-applied 30 degree gloss epoxy powder-coat paint, or bright nickel-chrome plating. An injection-molded polypropylene shroud finishes the underside of the assembly. Stool frames have an added foot ring made of 1/2" diameter steel wire.

Glides
4-leg chairs are equipped with swivel glides with a stainless steel contact surface. Standard sled-base chairs have no glides, but optional glides may be ordered. The optional glides are attached to the sled tube using screws and are available in black nylon, natural nylon, non-skid, or capped in stainless steel.

Transport Dolly
Frame construction is welded tubular steel with black powder-coat finish and 5" wheels (two swivel and two fixed). The dolly fits 4-leg or sled-base chairs and has a capacity of fifteen wood chairs or six upholstered.

The wood shell is supported by four plywood circular disks and 1/4-20 T-nuts bonded with construction-grade adhesive and fastened to a variety of base structures with four 1/4-20 x 1/2" thread-locking screws. The chair perimeter is designed such that it provides a feature to support backpacks or courier bags. Shells are available in wood grain laminates or solid laminates. See color addendum for details.

Optional Upholstered Seat
Urethane foam is attached to a formed plywood upholstery liner, then upholstered using a drawstring process. The foam is a nominal 1/2" thickness. The pad assembly is attached to the shell using #10-24 screws, engaging the plastic bosses in the liner. Upholstery is available in most KI in-grades, Pallas, or COM/KOM. See color addendum for details.

Underseat Structure
The shell is attached to an 11-gauge steel seat spider and cast aluminum height-adjust control.

Base
The 5-blade base is injection-molded glass-reinforced nylon. A single paddle under the seat operates the height-adjusting pneumatic cylinder.

Stool Base
Stools are equipped with an 18" diameter, adjustable-height foot ring made of die-cast aluminum with a chrome-plated tubular steel ring and black "spokes."

Casters
Casters are double-wheel high-impact thermoplastic, available with hard or soft wheel surface. Casters, base, and cylinder are available in black.

Foot Ring
Task stools are equipped with an adjustable-height 18" diameter chrome-plated steel foot ring with black, die-cast aluminum hub and spokes.

Aristotle® Classic
General Information

General Information

The Aristotle Casegoods collection from KI creates upscale environments for intelligent workspaces without a heavy price tag. Warm wood grains offer classic appeal while solid finishes provide a more contemporary aesthetic. Both may be combined with metallic accents for truly unique style.

Aristotle is offered in both a Classic version and an Executive version. Aristotle in its Classic offering is more economical when budget is a key concern. It features 1" work surfaces and a flat grain-matched edge. For a more upscale aesthetic, Aristotle Executive features 1-1/2" worksurfaces, and any of three edge band options may be featured. Aside from worksurfaces, the Classic Aristotle and the Executive Aristotle lines feature similiar construction and specifications and both are planned in keeping with the guidelines set forth in this document.

Aristotle Classic Construction

All worksurfaces, tops and end panels are 1" thick. Bookcases have 1" thick top and shelves. Edge banding is 2.5 mm thick and matches the laminate finish. Adjustable glides keep surfaces level.
Most products are shipped pre-assembled. Products that are shipped ready-to-configure have most fittings pre-attached for quick installation.
All dimensions shown are nominal.
Approximate weights and volumes relate to crated items and are indicated for shipping purposes.
Glides allow for 5/8" adjustment.

Edge detail

1" thick worksurface and top
2.5 mm flat edge banding

Drawer construction

Pedestals feature five-sided drawer construction and full depth drawers to maximize storage capacity. Pedestals also feature a pencil tray standard in the upper drawer box.
Lateral files have steel drawers.

Drawer suspension

File drawers utilize a heavy-duty full extension ball bearing slide for smooth operation. Box drawers operate on full extension slides allowing total access to drawer.

File drawers

Credenza, pedestal, and lateral file drawers accommodate letter and legal filing.
Lateral file unit drawers are equipped to accept front-to-back filing hardware, specified separately. Lateral files have an anti-tip interlock system.

Overheads

Overheads have a 133⁄4" internal height clearance and feature a full width, concealed cable pass-through 13⁄4" high. 36" high overheads have 171⁄2" clearance above desktops and are 65" high installed. 43" high overheads have 24" clearance above desk top and are 72" high installed. Wall mount overheads include instructions and mounting hardware.

Frosted glass door cabinets

Frosted glass doors on overheads and select storage towers have a vinyl wrapped MDF frame in silver finish with tempered, frosted glass.

Acrylic Door Cabinets

Cabinets feature 13-3/4" internal height clearance. Full-width concealed cable pass through (1-3/4") is provided for 36" and 43" high units. Wall mount also available. Units are non-locking.

Desktop panel screens

Desktop panels are 1⁄4" thick frosted acrylic to offer personal privacy while enhancing the overall design. Desktop panel supports are available separately in silver or black finish. A simple surface-mounted attachment secures the panel support to the desktop as a field installation.

Sizes

Published width and depth dimensions are nominal. To determine actual sizes use the multiplier 0.9843. (Example: a desk listed with a nominal width of 60" is actually 60" x 0.9843 = 591⁄16"), and refer to the conversion chart below:

Nominal/Actual		Nominal/Actual	
24"	23-5⁄8"	72"	70-7⁄8"
30"	29-1⁄2"	78"	76-3⁄4"
36"	35-7⁄16"	84"	82-11⁄16"
42"	41-5⁄16"	90"	88-9⁄16"
48"	47-1⁄4"	96"	94-1⁄2"
54"	53-1⁄8"	102"	100-3⁄8"
60"	59-1⁄16"	108"	106-1⁄4"
66"	64-15/16"		

Grommets

Grommets are indicated on all product illustrations when standard and have a 23⁄4" diameter opening. For non-standard locations, field-installed grommet kits are available. See Accessories.

End and Back Panels

Full height end and back panels are standard on most items. Partial height panels are available as a no charge option on most desk shells, extended corner desk shells, and corner units. The 2Q option provides 14" clearance from the floor, and the 3Q option provides 8" clearance from the floor.

Modesty Panels

Partial modesty panels (PMP) are 14" and provide 14" of lower clearance. Full height modesty panels (FMP) extend to the floor. Partial modesty panels are standard with no upcharge. Full modesty panels are offered on limited models at an upcharge.

Note: Electrical outlets may be fully or partially covered by modesty, end or back panels. Verify outlet locations and request specific sized panels if needed.

Pulls

NP - No pulls. An integral pull is standard on all drawers and doors.
Three pull options are available. To order, add pull code to product code and $10 per pull to list price. Note that overheads cannot have pulls specified.

Laminate top and base finish

All surfaces are manufactured using highperformance thermally fused laminate, providing a durable, resilient finish.
Laminates can be mixed and matched to create a two-toned look. Edge banding matches laminate finish.
Shelf finish on bookcases and overheads matches shell (vertical) finish.

Meeting table, freestanding desk and return base metal leg finish

Matching freestanding tables provide auxiliary worksurfaces. Metal legs in two styles offer strength and durability in a contemporary profile.
Metal-legged returns are attached to a primary desk with flat attachment brackets. The legs include an integrated wire management slot and an adjustable glide.

Keying options

Locks are standard on all pedestals, credenzas, and lateral files.
Locks are pre-installed in all workstation components (all multi-lock units are keyed alike).
Workstations are available keyed alike at time of order. Indicate clearly which offices are to be keyed alike. See Keyed Alike Kits if additional key sets are required.
The following key options are available at the end of the model strings:
KS - Key standard
KA - Key alike (note room numbers on order)

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select modesty panel.

PMP	- 14" partial back panel (Standard)
FMP	- Full height modesty panel; add $90

SPECIAL SERVICES

Special Carton Marking

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select corner leg finish
Refer to the **Product Color Options** page in this price list.

Ⓔ Select back panel height.

FULL	- Full height (standard)
2Q	- 1/2 height back panel
2QL	- 1/2 height back panel,left
2QR	- 1/2 height back panel,right
3Q	- 3/4 height back panel
3QL	- 3/4 height back panel,left
3QR	- 3/4 height back panel,right

Ⓕ Select cutaway option.

ST	- Straight cutaway
CV	- Curved cutaway

Ⓖ Select grommet.

NGR	- No grommet
G	- Grommet

Aristotle® Executive
General Information

General Information

The Aristotle Casegoods collection from KI creates upscale environments for intelligent workspaces without a heavy price tag. Warm wood grains offer classic appeal while solid finishes provide a more contemporary aesthetic. Both may be combined with metallic accents for truly unique style.

Aristotle is offered in both a Classic version and an Executive version. Aristotle in its Classic offering is more economical when budget is a key concern. It features 1" work surfaces and a flat grain-matched edge. For a more upscale aesthetic, Aristotle Executive features 1-1/2" worksurfaces, and any of three edge band options may be featured. Aside from worksurfaces, the Classic Aristotle and the Executive Aristotle lines feature similiar construction and specifications and both are planned in keeping with the guidelines set forth in this document.

Aristotle Executive Construction

All worksurfaces, tops and end panels are 1-1/2" thick. Bookcases have 1-1/2" thick top and shelves. Edge banding is 2.5 mm thick and matches the laminate finish. Adjustable glides keep surfaces level.
Most products are shipped pre-assembled. Products that are shipped ready-to-configure have most fittings pre-attached for quick installation.
All dimensions shown are nominal.
Approximate weights and volumes relate to crated items and are indicated for shipping purposes.
Glides allow for 5/8" adjustment.

Drawer construction

Pedestals feature five-sided drawer construction and full depth drawers to maximize storage capacity. Pedestals also feature a pencil tray standard in the upper drawer box.
Lateral files have steel drawers.

Drawer suspension

File drawers utilize a heavy-duty full extension ball bearing slide for smooth operation. Box drawers operate on full extension slides allowing total access to drawer.

File drawers

Credenza, pedestal, and lateral file drawers accommodate letter and legal filing.
Lateral file unit drawers are equipped to accept front-to-back filing hardware, specified separately. Lateral files have an anti-tip interlock system.

Overheads

Overheads have a 13-3⁄4" internal height clearance and feature a full width, concealed cable pass-through 1-3⁄4" high. 36" high overheads have 17-1⁄2" clearance above desktops and are 65" high installed. 43" high overheads have 24" clearance above desk top and are 72" high installed. Wall
mount overheads include instructions and mounting hardware.

Frosted glass door cabinets

Frosted glass doors on overheads and select storage towers have a vinyl wrapped MDF frame in silver finish with tempered, frosted glass.

Acrylic Door Cabinets

Cabinets feature 13-3/4" internal height clearance. Full-width concealed cable pass through (1-3/4") is provided for 36" and 43" high units. Wall mount also available. Units are non-locking.

Desktop panel screens

Desktop panels are 1⁄4" thick frosted acrylic to offer personal privacy while enhancing the overall design. Desktop panel supports are available separately in silver or black finish. A simple surface-mounted attachment secures the panel support to the desktop as a field installation.

Sizes

Published width and depth dimensions are nominal. To determine actual sizes use the multiplier 0.9843. (Example: a desk listed with a nominal width of 60" is actually 60" x 0.9843 = 59-1⁄16"), and refer to the conversion chart below:

Nominal/Actual		Nominal/Actual	
24"	23-5⁄8"	72"	70-7⁄8"
30"	29-1⁄2"	78"	76-3⁄4"
36"	35-7⁄16"	84"	82-11⁄16"
42"	41-5⁄16"	90"	88-9⁄16"
48"	47-1⁄4"	96"	94-1⁄2"
54"	53-1⁄8"	102"	100-3⁄8"
60"	59-1⁄16"	108"	106-1⁄4"
66"	64-15/16"		

Grommets

Grommets are indicated on all product illustrations when standard and have a 2-3⁄4" diameter opening. For non-standard locations, field-installed grommet kits are available. See Accessories.

End and Back Panels

Full height end and back panels are standard on most items. Partial height panels are available as a no charge option on most desk shells, extended corner desk shells, and corner units. The 2Q option provides 14" clearance from the floor, and the 3Q option provides 8" clearance from the floor.

Modesty Panels

Partial modesty panels (PMP) are 14" and provide 14" of lower clearance. Full height modesty panels (FMP) extend to the floor. Partial modesty panels are standard with no upcharge. Full modesty panels are offered on limited models at an upcharge.

Pulls

Surface-mounted handles are standard where shown.
Note that overheads do not feature pulls.

Laminate top and base finish

All surfaces are manufactured using highperformance thermally fused laminate, providing a durable, resilient finish.
Laminates can be mixed and matched to create a two-toned look. Edge banding matches laminate finish.
Shelf finish on bookcases and overheads matches shell (vertical) finish.

Meeting table, freestanding desk and return base metal leg finish

Matching freestanding tables provide auxiliary worksurfaces. Metal legs in two styles offer strength and durability in a contemporary profile.
Metal-legged returns are attached to a primary desk with flat attachment brackets. The legs include an integrated wire management slot and an adjustable glide.

Keying options

Locks are standard on all pedestals, credenzas, and lateral files.
Locks are pre-installed in all workstation components (all multi-lock units are keyed alike).
Workstations are available keyed alike at time of order. Indicate clearly which offices are to be keyed alike. See Keyed Alike Kits if additional key sets are required.
The following key options are available at the end of the model strings:
KS - Key standard
KA - Key alike (note room numbers on order)

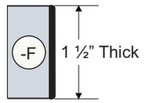
Power Station

Each power station features three grounded outlets, two jacks (RJ45/RJ11) and a 10-ft power cord. Hole diameter is 4-1/4".

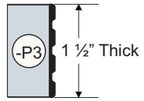
Power Station

Edge detail

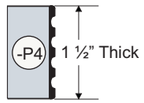
1-1/2" thick worksurface and top 2.5 mm flat edge banding.



Flat edge



Profiled edge



Profiled edge

Pulls

Surface-mounted handles are standard where shown.

Note that overheads do not feature pulls.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select end panel option.

CGR	- Recessed end panel right side
FULL	- Full end panel both sides

Ⓕ Select pull option.

BPA2	- Silver bar pull (2)
BPA3	- Silver bar pull (3)
KIB2	- Waterfall black pull (2)
KIB3	- Waterfall black pull (3)
KIS2	- Waterfall silver pull (2)
KIS3	- Waterfall silver pull (3)
RCP2	- Rectangular silver pull (2)
RCP3	- Rectangular silver pull (3)

Ⓖ Select lock option.

KA	- Key alike
KS	- Key standard

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select modesty panel.

PMP	- 14" partial back panel (Standard)
FMP	- Full height modesty panel; add $90

SPECIAL SERVICES

Special Carton Marking

With specially marked information	N/C

Shipping

Ships **knocked down, FOB KI-Aristotle Brampton, ON L6T 5T6, freight prepaid.** Freight class 85.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select pull option.

BPA2	- Silver bar pull (2)
BPA3	- Silver bar pull (3)
KIB2	- Waterfall black pull (2)
KIB3	- Waterfall black pull (3)
KIS2	- Waterfall silver pull (2)
KIS3	- Waterfall silver pull (3)
RCP2	- Rectangular silver pull (2)
RCP3	- Rectangular silver pull (3)

Ⓕ Select lock option.

KA	- Key alike
KS	- Key standard

Ⓖ Select end panel.

CGR	- Recessed end panel right side
FULL	- Full end panel both sides

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select back panel height.

FULL	- Full height (standard)
2Q	- 1/2 height back panel
3Q	- 3/4 height back panel

Ⓕ Select grommet.

NGR	- No grommet
G	- Grommet

Grommets are factory installed.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select cutaway gable option.

CGN	- No Cutaway gable (standard)
CGL	- Cutaway gable left; add $90
CGR	- Cutaway gable right; add $90
CLR	- Cutaway gable left and right; add $183

Ⓓ Select locking option.

NL	- No lock (standard)
L	- With lock; add $82

Ⓔ Select key option.

KA	- Key alike
KS	- Key standard

Ⓕ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select pull option.

BPA2	- Silver bar pull (2)
KIB2	- Waterfall black pull (2)
KIS2	- Waterfall silver pull (2)
RCP2	- Rectangular silver pull (2)

Ⓕ Select lock option.

NL	- No lock (standard)
L	- With lock; add $82

Ⓖ Select key option.

KA	- Key alike
KS	- Key standard
