HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

F	- Flat edge
P3	- Three wave profile edge
P4	- Four wave profile edge

Ⓒ Select horizontal surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select vertical surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select power station.

PS0	- No Power Station
PS2	- Two Power Stations (for two-piece tops); add $491

TECHNICAL SPECIFICATIONS

Table Bases

Tapered Base (ATH3)
Tapered round pedestal base is .07" thick steel. Tapered base is 26" in diameter for 36" square and 42" Round tops only. Tapered base is 22" diameter for all other top sizes. 3" diameter column is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface using eight #12 Phillips pan head screws. Adjustable glides are 1" diameter, nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Disc Base (ATH4)
Flat round pedestal base is a .07" thick steel cover over a $^{1}/_{4}$" thick steel plate. Base is 20" diameter for all 24" and 30" round table units and for all 24" square table units. Base is 24" diameter for all 36" round table units, for 42" round table units at 29" OTH (overall table height), and for all 30" square table units. Base is 32" diameter for 42" round table units at 42" OTH, and for all 36" and 42" square table units. 4" diameter column is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface using eight #12 Phillips pan head screws. Adjustable glides are 1" diameter nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Table Base ATH5
Flat round pedestal base is a .07" thick steel cover over a $^{1}/_{4}$" thick steel plate. Base is 32" diameter for all round and square table units. 5" diameter column is constructed of 14-gauge steel and is used for all 48" and 54" round table units and all square table units. 6" diameter column is used on 60" round table units and is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface with eight #12 Phillips pan head screws. Adjustable glides are 1" diameter nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Booth Table Base

Heavy Base (AHDAA & AHDAC)
Heavy round pedestal base consists of a 14-gauge spun steel cover adhered to two $^{1}/_{4}$" thick steel plates. Heavy base is 20" in diameter for all 24" and 26" booth table units, 24" in diameter for all 30" and 36" units and 32" in diameter for 42" and 48" units. 4" diameter column is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface using eight #12 Phillips pan head screws. Adjustable glides are 1" diameter nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Base Finishes
Standard base finishes include electroplated chrome and powder-coated, oven-cured paint.

Laminate Table Surfaces
Laminate tops feature a $1^{1}/_{8}$" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Total thickness of table top is $1^{1}/_{4}$". Tops are pre-drilled.

Veneer Table Surfaces
Veneer tops feature a $1^{1}/_{8}$" thick high-density particleboard core with wood veneer and backing sheet, and finished with a catalyzed varnish finish. Total thickness of table top is $1^{1}/_{4}$". Tops are pre-drilled.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
34S	- 3/8" Wood band edge
RE	- Veneer reed
PT	- Plateau-post-formed veneer

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
34S	- 3/8" Wood band edge
RE	- Veneer reed
PT	- Plateau-post-formed veneer

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
34R	- 1-1/4" Wood band, radius corner
RE	- Veneer reed
PT	- Plateau-post-formed veneer

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

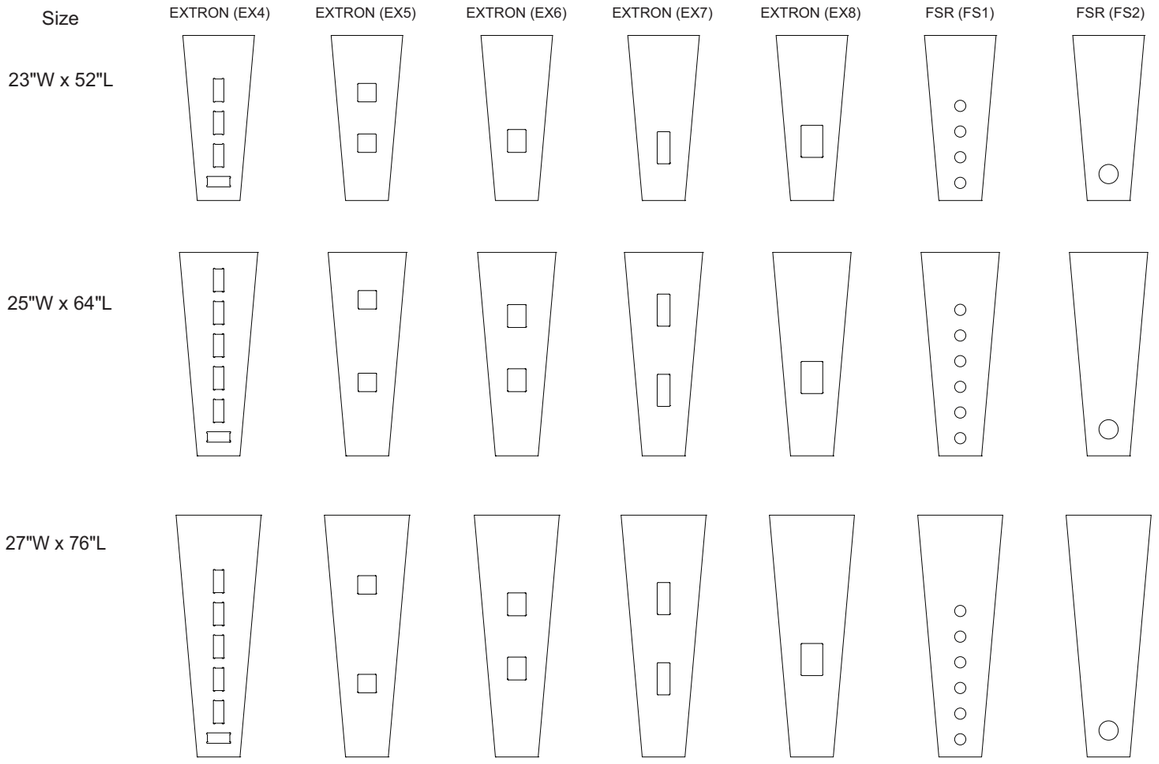
Cutout Patterns for Mobile Units



Enclosure
Enclosure shall consist of 3/4" thick 45# particle board with exposed surfaces finished with a minimum of .030" thick high pressure laminate. Access to internal wiring shall be provided by a lockable removable door with minimum dimensions measuring 10" tall by 48" long. Ventilation is provided through openings on each end measuring a minimum 8" x 15" and covered with powder coated perforated steel panels.

The Stationary units will be supported by two 11-gauge formed and welded steel supports containing leveling glides. These powder coated supports are bolted to the lower support cross members. This unit will be topped by a 1-1/8" thick 45# particle board top.

The Mobile units will be supported by four 2.44" diameter casters and contain rare earth ganging magnets on two sides. These unit will be topped with a 3/4" thick 45# particle board top. Mobile tables are available with a Trek base. Table tops are either 3/4" or 1-1/8" thick 45# particle board topped with a minimum .030" HPL and backed with .020" HPL backer. All Mobile Tables will have (8) rare earth magnets to provide ganging options. Tables gang to the enclosure and each other in three different configurations.

All tops will be finished with a minimum .030" thick high pressure laminate and banded with 2mm polypropylene edge material and routered for the quantity and size of the chosen switching hardware.

Monitor Support
Monitor support shall consist of 3/4" thick 45# particle board with exposed surfaces finished with a minimum of .030" thick high pressure laminate. Units have T-nuts to attach to both Stationary and Mobile units with (6) bolts. For use with Backbone tables only.

SPECIFICATIONS

Barron Pedestal Base Table
This system employs 14-gauge tubular steel components in fixed, folding or flip-top models. Barron includes T, TT, X, LX and cantilevered T base combinations. Fixed table column welded to an 8" x 8" formed steel plate.

Bases
Built of 1-3/4" round tubular steel feet, legs and plugs; highly polished finish. LX series is furnished with 3" o.d. seamless tubular steel column. Adjustable glides are secured to the legs. All ends capped with finished steel plugs brazed in place, ground and polished smooth.

Barron Table's Folding Mechanism
Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit between leg and mechanism. Built-in nylon bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces
1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled.

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top
Standard flip-top table does not have a detachable top.

Barron Plus Ganging Mechanism
Built of black high-strength nylon, userfriendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top.

Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table. CAUTION: Gangers are not retrofittable to earlier purchased tables.

Folding Modesty Panels
.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Mounting brackets are black and packed with base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. The modesty panel is shipped k.d.

Bright Chrome Finish
Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Powder-Coated Finish
Hybrid powder coating is electrostatically applied. Finish is chemical-resistant, hard, tough and mar-resistant.

Barron Lightweight Table
Top is 5-ply construction consisting of .050" thick laminate, 5.2mm 3-ply plywood, .75" thick high-density particleboard frame with honeycomb core, 5.2mm 3-ply plywood and .040" HPL backer.

Quick-Release Modesty Panels
.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge extends 7-1/4" from underside of table. Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Panel ships k.d.

Barron Table Truck
Black powder-coated finish. Two swivel and two rigid 6" diameter casters with heavy-duty roller bearings. Rectangular or square table storage. Felt is standard on top edges.

Barron with PowerUp®
Barron tables are available with one or two power/data modules, PowerUp, centrally located 4-1/4" from front edge of table top. PowerUp is a UL Listed, Relocatable Power Tap, which mounts flush into the table top. When flipped up, cover open, one (1) duplex receptacle and two (2) data ports are exposed. The underside of the table is provided with a hinged plastic channel (cord management trough) which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines. The PowerUp module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15 ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks. Cords are further managed by the vertical leg wire manager which comes standard with PowerUp.

Rolling Barron Base
Rolling Barron base be may be ordered with any two-column Barron or Barron Plus table, or may be field-installed on existing two-column Barron or Barron Plus table. By placing embedded wheels on one end of a Barron two-column table, one person can easily move it by lifting the end without wheels and "driving" the table. Also, rolling Barron base is only available on Single "T" Bases. Not available on "TT", "X" and "LX".

Under-Table Wire Management
Constructed of high quality black velcro. Harness is fastened to table bottom with screws. Shipped assembled. Wire management options (HO, HW and WO) are only available on rectangle tables 96" and smaller.

Leg Wireways
Scuff-resistant, high-impact rigid plastic. Two separate wire channels per leg. Fastened to legs with full length adhesive bond. Black only. One wireway per leg. Shipped assembled. Two leg wireways per top. Not available on 18" x 60" fixed base tables, 18" x 60" and 24" x 60" cantilevered base and folding tables.

Grommets
Plastic grommets are 3" diameter and recessed into table top. Cap is removable and has retractable slot cover. Two grommets per top. Grommet option is available on rectangle tables 96" and smaller except for all 18"x60" and 24"x60" cantilevered fixed and folding tables (24"x60" tables with standard fixed bases are okay). Grommet location for tables that are 36" deep and smaller will be on the corners of the table. Grommet location for the tables 42" deep and larger will be the centerline of the table. See graphics above.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

OPTIONS

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
15W	- 1-3/4" Wood bullnose

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select grommet.

YG	- Grommets; add $27
NG	- No grommets

Ⓖ Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron® Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
15W	- 1-3/4" Wood bullnose

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select Cord Length (feet).

15	- 15' cord length
9	- 9' cord length

Ⓖ Select module color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron® Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron® Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron® Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
34S	- 3/8" Wood band edge
36S	- 1-3/4" Wood band edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron® Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
34S	- 3/8" Wood band edge
36S	- 1-3/4" Wood band edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron® Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Rolling Barron° Base:
Only available on single "T". Wheels are black only. Housing matches base finish. Add a "/R" to end of model for rolling base. Factory installed. For field installable, see accessory sections.
Upcharge is list $106 per table.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

Bobbr™ Undermount Storage
General Information

PRODUCT SPECIFICATIONS

Bobbr™ Undermount Storage

June 2021

TECHNICAL SPECIFICATIONS

General Undermount

Bobbr Undermount Storage units mount directly to the underside of a worksurface to provide storage space. The unit is supported entirely from the worksurface, allowing it to move freely with adjustable-height desks for maximum user convenience. A fully loaded unit may weigh 58.1 lb.

Shells are symmetrical. Drawers and doors feature a push-to-open mechanism which can be configured when ordered, or ordered later and installed in the field. Installation does not require any specialized tools. Door hand can be easily reconfigured in the field.

The drawer, fixed shelf, and unit bottom feature a felt pad to gently store items.

A perforated hole pattern on 1" centers allows users to hang accessories or other standard pegboard style components from the unit. These perforations also provide air ventilation.

Unit Construction

Each unit is constructed primarily of steel. The shell consists of 16-gauge steel body and a 20-gauge steel fixed shelf. The drawer and hanging shelf are constructed of 20-gauge steel and the cubby door is of 16-gauge steel.

Finish

Components are finished with an electrostatically applied hybrid epoxy powder-coat paint. All standard KI powder-coat finishes are available. When configured with drawers or cubby doors, these options may be specified to a different color than the shell at no extra charge.

USB Charging Port

Storage units may be ordered with a USB-A charging port, accessible at the upper left-hand or right-hand exterior of the unit. The charging port is mounted inside the unit, under the fixed shelf and the cable exits through a $^{3}/_{4}$" hole at the rear of the storage unit and attaches to a 10.5-watt power converter. The power converter comes standard with the cable and plugs into a standard power receptacle. Alternately, the charging port may be connected to a computer for power and data transfer, with a maximum data transfer rate of 480Mb/s.

Hanging Metal Shelf

A $9^{5}/_{8}$" wide by $13^{1}/_{8}$" deep shelf may be added later as an option. The hanging shelf features integrated reinforcements which allow letter-sized hanging holders to be mounted side-to-side underneath. No tools are required for hanging metal shelf assembly.

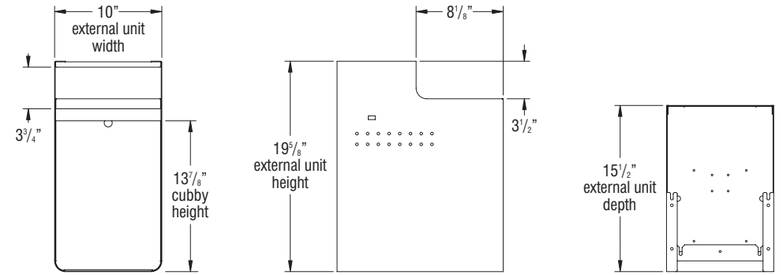
P-Series Locks

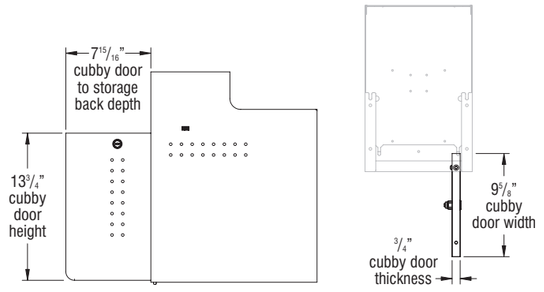
When configured with a drawer or cubby door, storage units feature a P-Series lock. P-Series locks are a high security double-bit lock system, with master key-able lock cores. The lock cores are randomly keyed.

Compliance

Bobbr Undermount Storage s designed and manufactured to meet or exceed required ANSI/BIFMA x5.9-2012.

DIMENSIONS - External Unit Dimensions



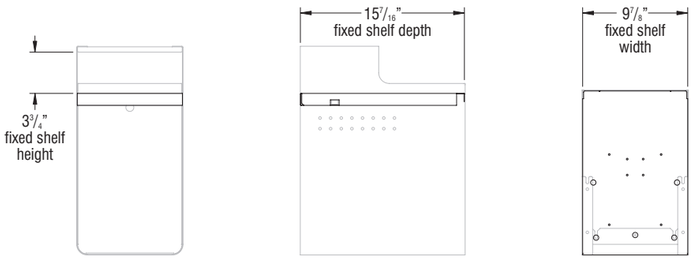


Note: When mounted under a 29" high table with $1^{3}/_{16}$" thick worksurface, there is 8" clearance under the Bobbr unit.

Bobbr™ Undermount Storage
General Information

DIMENSIONS - Internal Unit Dimensions

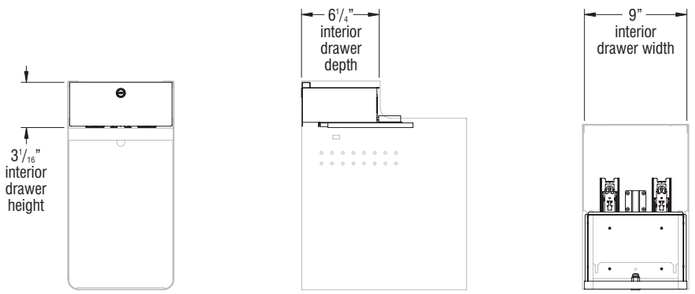
Fixed Shelf



(front view) (side view) (top view)

Note: These dimensions are for the unit only, components under the desk worksurface may reduce these values.

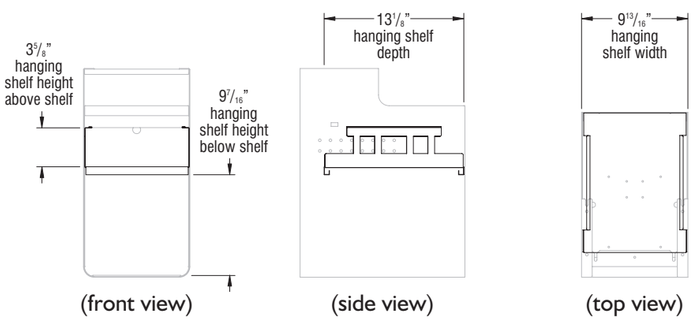
Drawers



(front view) (side view) (top view)

Note: When a door is added, the usable depth behind the door is 13 3/4".

Hanging Shelf



(front view) (side view) (top view)

Sprayed edge (SY) Urethane edge (MC)

SPECIFICATIONS

CaféWay® Overview
Tables shall be listed with Underwriters Laboratories in compliance with their testing for folding rollaway tables.

Lift Mechanism and Table Undercarriage
All critical parts at the pivot points are attached to the unitized steel frame. Steel latches are automatic in both the storage and in-use positions and are located so that they cannot be accidentally opened or knocked out of adjustment. Down latch is field-adjustable. Compression springs provide significant lift assistance and controlled down-placement and are capable of holding the table in the semi-open position throughout its range of motion for safety and easy floor cleaning. Anti-tip 3" casters allow table to be folded flat (parallel tops) for safety during transport and for minimum storage space requirement. The device is permanent, fixed, non-adjustable and cannot be disabled. The anti-tip 3" casters do not contact the floor during normal operation, but assist in rolling the table over doorway thresholds or other obstructions. All legs are robotically welded for continued consistent quality assurance.

Table Tops and Benches
Table top and bench shall be constructed of 3/4" thick 3M grade particleboard (sprayed or molded edge) shall have a 1/2" corner radius. Table top and bench are laminated with a .030 high-pressure laminate sheet for superior abrasion resistance. Laminates shall meet or exceed NEMA standards. A .028" phenolic backer is bonded to the bottom of the table core for stability and moisture resistance. Thickness shall be .808 +/- .004". Table top and bench are secured to frame with #10 x 3/4" screws, 9" on centers.

Edges
Table top edges shall be finished as either sprayed or molded urethane. Sprayed Edge (SY) - Edges are sealed and finished with sprayed-on black polyurea edge treatment that provides superior resistance to moisture, eliminates unsanitary food traps and is extremely tamper resistant. Molded Urethane Edge (MC) - Edges shall be made of 1/4" thick by 3/4" high, cast black polyurethane that is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface
edges to provide a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Self-supporting MIG welded, unitized frame design. Hinge plates and hinges are 11-gauge steel. Low profile 1-3/4" 16-gauge aprons with full 180-degree hem have effective strength of 11-gauge steel and provide maximum clearance under the top. Center leg assemblies are 16-gauge 1",1-9/16 " and 1-3/8" steel tubing. Grade 5 hex machine bolts with aircraft-type lock nuts are used at all assembly points. Nylon bushings are included at all critical pivots points for ease of operation.

Frame Finishes
Frames shall be finished as either powdercoat or chrome. Powdercoat Finish - All metal parts are thoroughly cleaned to resist corrosion and provide maximum paint adhesion, finished with high-grade electrostatically applied baked-on epoxy powdercoat for superior resistance to abrasion, marring, and scratching. The metal finish shall be baked-on lightly textured polyester powdercoat. Chrome Finish - Chrome plating is available on leg sets touching the ground.

Casters
Table rolls on four 4" diameter x 1¼" wide Poly II gray rubber, non-marking, ball-bearing swivel casters.
Poly II rubber wheels provide excellent floor protection, abrasion resistance, impact strength, quiet operation, and rolling ease. Casters are resistant to water, oil and most acids and chemicals.

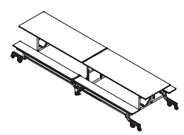
CafeWay® Cafeteria Tables

Rectangular Tables with Benches (Freight Excluded)

CafeWay® Cafeteria Tables

Rectangular Tables with Benches (Freight Excluded)



ECRCB

Rectangular Tables with Benches

- Tables ship blanket wrapped as standard
- Orders picked up or shipments outside continental US require pallet upcharge. Contact KI Customer Service
- Safety latches automatically lock the table in either the up or down position
- Compression springs provide smooth controlled lift assistance
- Self adjusting support legs are spring loaded to ensure contact with the floor while the table is in the down position
- Outrigger casters enable tables to fold flat and nest to minimize the table's storage footprint while still exceeding UL tip over requirements: (6) Tables will store in less than a 5' x 8' footprint
- Table tops extend past the outrigger casters to accommodate end to end table layouts without caster interference
- Two edge styles available on table tops and benches ONLY (SY) sprayed edge and (MC) molded urethane edge

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select table/bench edge style.

SY	- Sprayed Edge
MC	- Urethane edge

Ⓒ Select table surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select table/bench edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓔ Select bench surface.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select frame color.
Refer to the **Product Color Options** page in this price list.
**Undercarriage remains black with any choice
**Chrome Upcharge ; add $488

INFORMATION

Sprayed Edge

Sprayed Edge (SY) is textured, which may result in surface variations that fall within an acceptable range.

Delivery Note

At the time of order acknowledgement the customer will be acknowledged the week their product will deliver. A delivery appointment will be made approximately 1 to 2 weeks prior to the week of delivery by one of KI's carrier partners. In some situations, specific delivery date and time requests may result in additional charges.

SPECIFICATIONS

CaféWay® Overview
Tables shall be listed with Underwriters Laboratories in compliance with their testing for folding rollaway tables.

Lift Mechanism and Table Undercarriage
All critical parts at the pivot points are attached to the unitized steel frame. Steel latches are automatic in both the storage and in-use positions and are located so that they cannot be accidentally opened or knocked out of adjustment. Torsion springs in conjunction with torsion bars provide easy lifting throughout the complete operating range. Torsion bars are shot-peened to impart compressive strength and increase lifecycle. Torsion bars are epoxy e-coated to prevent rusting and extend usable life. Torsion bars have machined grooves at each end, which receive e-clips to lock in position and prevent lateral movement. All legs are robotically welded for continued consistent quality assurance.

Table Tops
Table top shall be constructed of 5/8" thick 3M particleboard. Table top (sprayed or molded edge) shall have a ½" corner radius. Table top is laminated with a .030 high-pressure laminate sheet for superior abrasion resistance. Laminates shall meet or exceed NEMA standards. A .028" phenolic backer is bonded to the bottom of the table core for stability and moisture resistance. Thickness shall be .808 +/- .004". Top is secured to frame with #10 x 5/8" screws, 9" on centers.

Stools
13" diameter, high-impact polypropylene shall be of heavy-duty construction with ribs to reinforce points of stress and rolled edges for comfort and strength. Top shall be textured and color must permeate stool. Stools are fastened directly on a 6" square 11-gauge steel place with eight #14 x 5/8" screws. This plate is welded to a 1" diameter, 14-gauge vertical tube. Seat columns contact floor directly with rubber-cushioned, molded-in steel washer and non-skid, non-marring end cap.

Edges
Table top edges shall be finished as either sprayed or molded urethane.
Sprayed Edge (SY) - Edges are sealed and finished with sprayed-on black polyurea edge treatment that provides superior resistance to moisture, eliminates unsanitary food traps, and is extremely tamper resistant.

Frames
Self-supporting MIG welded, unitized frame design uses 14-gauge 1" and 1¼" steel tubing. Lock plates are 7-gauge steel, laser cut to exact tolerances. Low profile 2" high, 14-gauge C-shaped aprons provide maximum top clearance. Grade 5 hex machine bolts with aircraft type lock nuts are used at all assembly points.

Frame Finishes
Frames shall be finished as either powdercoat or chrome.
Powdercoat Finish - All metal parts are thoroughly cleaned to resist corrosion and provide maximum paint adhesion, finished with high-grade electrostatically applied baked-on epoxy powdercoat for superior resistance to abrasion, marring, and scratching. The metal finish shall be baked-on lightly textured polyester powdercoat.
Chrome Finish - Chrome plating is available on leg sets touching the ground.

Casters
Table rolls on four 4" diameter x 1¼" wide Poly II gray rubber, non-marking, ball-bearing swivel casters. Poly II rubber wheels provide excellent floor protection, abrasion resistance, impact strength, quiet operation, and rolling ease. Casters are resistant to water, oil and most acids and chemicals.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
SY - Sprayed Edge

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select surface edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓔ Select frame color.
**Undercarriage remains black with any choice
**Chrome Upcharge ; add $580
Refer to the **Product Color Options** page in this price list.

Ⓕ Select stool color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Sprayed Edge
Sprayed Edge (SY) is textured, which may result in surface variations that fall within an acceptable range.

Delivery Note
At the time of order acknowledgement the customer will be acknowledged the week their product will deliver. A delivery appointment will be made approximately 1 to 2 weeks prior to the week of delivery by one of KI's carrier partners. In some situations, specific delivery date and time requests may result in additional charges.

SPECIFICATIONS

CaféWay® Overview
Tables shall be listed with Underwriters Laboratories in compliance with their testing for folding rollaway tables.

Lift Mechanism and Table Undercarriage
All critical parts at the pivot points are attached to the unitized steel frame. Steel latches are automatic in both the storage and in-use positions and are located so that they cannot be accidentally opened or knocked out of adjustment. Two-handed release mechanism protects fingers and hands during operation. Torsion bars assist in closing and opening tables. Torsion springs in conjunction with torsion bars provide easy lifting throughout the complete operating range. Torsion bars are shot-peened to impart compressive strength and increase lifecycle. Torsion bars are epoxy e-coated to prevent rusting and extend usable life. Torsion bars have machined grooves at each end, which receive e-clips to lock in position and prevent lateral movement. All legs are robotically welded for continued consistent quality assurance.

Table Tops and Benches
Table top and bench shall be constructed of 3/4" thick 3M particleboard. Table top and bench (sprayed or molded edge) shall have a 1/2" corner radius. Table top and bench are laminated with a .030 high-pressure laminate sheet for superior abrasion resistance. Laminates shall meet or exceed NEMA standards. A .028" phenolic backer is bonded to the bottom of the table core for stability and moisture resistance. Thickness shall be .808 +/- .004". Top is secured to frame with #10 x 3/4" screws, 9" on centers. Benches on end legs are mounted with eight #10 x 3/4" screws. Two additional bench-mounting brackets secure seat plate to bench with three #10 x 3/4" screws per bracket. Benches on mid-legs are secured to dual 15/8" high C-shaped 14-gauge aprons with #10 x 3/4" screws. Tubing is 1-3/8" OD 14-gauge and MIG welded to 1-5/16" 14-gauge tubing to form the bench attachment assembly, which is attached to the aprons using 5/16 -18" bolts and nylock nuts. Both bench attachment assemblies are inserted and anchored into the center leg assemblies with one 5/16 -18" bolt and nylock nut per down leg.

Stools
13" diameter, high-impact polypropylene shall be of heavy-duty construction with ribs to reinforce points of stress and rolled edges for comfort and strength. Top shall be textured and color must permeate stool. Stools are fastened directly on a 6" square 11-gauge steel plate with eight #14 x 5/8" screws. This plate is welded to a 1" diameter, 14-gauge vertical tube. Seat columns contact floor directly with rubber-cushioned, molded-in steel washer and non-skid, non-marring end cap.

Edges
Table top and bench edges shall be finished as either sprayed or molded urethane.
Sprayed Edge (SY) - Edges are sealed and finished with sprayed-on black polyurea edge treatment that provides superior resistance to moisture, eliminates unsanitary food traps, and is extremely tamper-resistant.
Molded Urethane Edge (MC) - Edges shall be made of 1/4" thick by 3/4" high, cast black polyurethane that is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edges to provide a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Self-supporting MIG welded, unitized frame design uses 14-gauge 1",1¼", and 1½" steel tubing. Lock plates are 8-gauge steel, laser cut to exact tolerances. Low profile 2" high, 14-gauge C-shaped aprons provide maximum top clearance. Grade 5 hex machine bolts with aircraft-type lock nuts are used at assembly points and shoulder bolts are used at stretcher bar-to-leg connections.

Frame Finishes
Frames shall be finished as either powdercoat or chrome.
Powdercoat Finish - All metal parts are thoroughly cleaned to resist corrosion and provide maximum paint adhesion, finished with high-grade electrostatically applied baked-on epoxy powdercoat for superior resistance to abrasion, marring, and scratching. The metal finish shall be baked-on lightly textured polyester powdercoat.
Chrome Finish - Chrome plating is available on leg sets touching the ground.

Casters
Table rolls on six 4" diameter x 1-1/4" wide Poly II gray rubber, non-marking, ball-bearing swivel casters. Poly II rubber wheels provide excellent floor protection, abrasion resistance, impact strength, quiet operation, and rolling ease. Casters are resistant to water, oil and most acids and chemicals.

Model#	**Capacity**
ECTOC290508PY 8 stools	8
ECTOC270508PY 8 stools	8

SPECIFICATIONS

CaféWay® Overview
Tables shall be listed with Underwriters Laboratories in compliance with their testing for folding rollaway tables.

Lift Mechanism and Table Undercarriage
All critical parts at the pivot points are attached to the unitized steel frame. Steel latches are automatic in both the storage and in-use positions and are located so that they cannot be accidentally opened or knocked out of adjustment. Two-handed release mechanism protects fingers and hands during operation. Torsion bars assist in closing and opening tables. Torsion springs in conjunction with torsion bars provide easy lifting throughout the complete operating range. Torsion bars are shot-peened to impart compressive strength and increase lifecycle. Torsion bars are epoxy e-coated to prevent rusting and extend usable life. Torsion bars have machined grooves at each end, which receive e-clips to lock in position and prevent lateral movement. All legs are robotically welded for continued consistent quality assurance.

Table Tops
Table top shall be constructed of 3/4"" thick 3M particleboard. Table top (sprayed or molded edge) shall have a ½" corner radius. Table top is laminated with a .030 high-pressure laminate sheet for superior abrasion resistance. Laminates shall meet or exceed NEMA standards. A .028" phenolic backer is bonded to the bottom of the table core for stability and moisture resistance. Thickness shall be .808 +/- .004". Top is secured to frame with #10 x ¾" screws, 9" on centers.

Stools
13" diameter, high-impact polypropylene shall be of heavy-duty construction with ribs to reinforce points of stress and rolled edges for comfort and strength. Top shall be textured and color must permeate stool. Stools are fastened directly on a 6" square 11-gauge steel plate with eight #14 x 5/8" screws. This plate is welded to a 1" diameter, 14-gauge vertical tube. Seat columns contact floor directly with rubber-cushioned, molded-in steel washer and non-skid, non-marring end cap.

Edges
Table top edges shall be finished as either sprayed or molded urethane.
Sprayed Edge (SY) - Edges are sealed and finished with sprayed-on black polyurea edge treatment that provides superior resistance to moisture, eliminates unsanitary food traps, and is extremely tamper-resistant.

Frames
Self-supporting MIG welded, unitized frame design uses 14-gauge 1",1¼", and 1½" steel tubing. Lock plates are 8-gauge steel, laser cut to exact tolerances. Low profile 2" high, 14-gauge C-shaped aprons provide maximum top clearance. Grade 5 hex machine bolts with aircraft-type lock nuts are used at assembly points and shoulder bolts are used at stretcher bar-to-leg connections.

Frame Finishes
Frames shall be finished as either powdercoat or chrome.
Powdercoat Finish - All metal parts are thoroughly cleaned to resist corrosion and provide maximum paint adhesion, finished with high-grade electrostatically applied baked-on epoxy powdercoat for superior resistance to abrasion, marring, and scratching. The metal finish shall be baked-on lightly textured polyester powdercoat.
Chrome Finish - Chrome plating is available on leg sets touching the ground.

Casters
Table rolls on six 4" diameter x 1¼" wide Poly II gray rubber, non-marking, ball-bearing swivel casters. Poly II rubber wheels provide excellent floor protection, abrasion resistance, impact strength, quiet operation, and rolling ease. Casters are resistant to water, oil and most acids and chemicals.

SPECIFICATIONS

CaféWay® Overview
Tables shall be listed with Underwriters Laboratories in compliance with their testing for folding rollaway tables.

Lift Mechanism and Table Undercarriage
All critical parts at the pivot points are attached to the unitized steel frame. Steel latches are automatic in both the storage and in-use positions and are located so that they cannot be accidentally opened or knocked out of adjustment. Two-handed release mechanism protects fingers and hands during operation. Torsion bars assist in closing and opening tables. Torsion springs in conjunction with torsion bars provide easy lifting throughout the complete operating range. Torsion bars are shot-peened to impart compressive strength and increase lifecycle. Torsion bars are epoxy e-coated to prevent rusting and extend usable life. Torsion bars have machined grooves at each end, which receive e-clips to lock in position and prevent lateral movement. All legs are robotically welded for continued consistent quality assurance.

Table Tops and Benches
Table top and bench shall be constructed of 3/4" thick 3M particleboard. Table top (sprayed or molded edge) shall have a ½" corner radius. Table top is laminated with a .030 high-pressure laminate sheet for superior abrasion resistance. Laminates shall meet or exceed NEMA standards. A .028" phenolic backer is bonded to the bottom of the table core for stability and moisture resistance. Thickness shall be .808 +/- .004". Top is secured to frame with #10 x ¾" screws, 9" on centers. Benches are mounted to end legs with eight #10 x ¾" screws. Two additional bench-mounting brackets secure seat plate to bench with three #10 x ¾" screws each.

Stools
13" diameter, high-impact polypropylene shall be of heavy-duty construction with ribs to reinforce points of stress and rolled edges for comfort and strength. Top shall be textured and color must permeate stool. Stools are fastened directly on a 6" square 11-gauge steel plate with eight #14 x 5/8" screws. This plate is welded to a 1" diameter, 14-gauge vertical tube. Seat columns contact floor directly with rubber-cushioned, molded-in steel washer and non-skid, non-marring end cap.

Edges
Table top edges shall be finished as either sprayed or molded urethane.
Sprayed Edge (SY) - Edges are sealed and finished with sprayed-on black polyurea edge treatment that provides superior resistance to moisture, eliminates unsanitary food traps, and is extremely tamper-resistant.
Molded Urethane Edge (MC) - Edges shall be made of ¼" thick by ¾" high, cast black polyurethane that is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edges to provide a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Self-supporting MIG welded, unitized frame design uses 14-gauge 1",1¼", and 1½" steel tubing. Lock plates are 8-gauge steel, laser cut to exact tolerances. Low profile 2" high, 14-gauge C-shaped aprons provide maximum top clearance. Grade 5 hex machine bolts with aircraft-type lock nuts are used at assembly points and shoulder bolts are used at stretcher bar-to-leg connections.

Frame Finishes
Frames shall be finished as either powdercoat or chrome.
Powdercoat Finish - All metal parts are thoroughly cleaned to resist corrosion and provide maximum paint adhesion, finished with high-grade electrostatically applied baked-on epoxy powdercoat for superior resistance to abrasion, marring, and scratching. The metal finish shall be baked-on lightly textured polyester powdercoat.
Chrome Finish - Chrome plating is available on leg sets touching the ground.

Casters
Table rolls on six 4" diameter x 1¼" wide Poly II gray rubber, non-marking, ball-bearing swivel casters. Poly II rubber wheels provide excellent floor protection, abrasion resistance, impact strength, quiet operation, and rolling ease. Casters are resistant to water, oil and most acids and chemicals.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

SY	- Sprayed Edge
MC	- Urethane edge

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select surface edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓔ Select frame color.
**Undercarriage remains black with any choice
**Chrome Upcharge ; add $517
Refer to the **Product Color Options** page in this price list.

Ⓕ Select stool color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Sprayed Edge
Sprayed Edge (SY) is textured, which may result in surface variations that fall within an acceptable range.

Delivery Note
At the time of order acknowledgement the customer will be acknowledged the week their product will deliver. A delivery appointment will be made approximately 1 to 2 weeks prior to the week of delivery by one of KI’s carrier partners. In some situations, specific delivery date and time requests may result in additional charges.

Occasional Table 14

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

General Information

TECHNICAL SPECIFICATIONS

Upholstered Seat & Backrest

Upholstered Seat & Back - Lounge Chair & High Back Lounge Chair
Backrest foam is $1\frac{3}{16}$" thick, is glued to a continuous curved Birch plywood structure, then upholstered using glue. Seat foam is $2\frac{1}{2}$" thick, is glued to the seat structure, then upholstered using heat activated glue.

Upholstered Seat & Backrest - Stool
Foam is 2" thick single piece of polyurethane injection molded over a curved metal structure, then upholstered using heat activated glue.

Frames

Swivel Frame (with glides or casters)
Swivel frame bases are made of cast aluminum. A formed steel plate attaches to the underside of the seat using four fasteners. A metal support column connects the seat plate and the aluminum base, allowing for free rotation, utilizing a plastic bushing at the support column and base.
Swivel frame with casters includes an additional black, plastic cap covering the support column. Swivel frames with glides and swivel frames with casters are geometrically different and not interchangeable without additional parts. Casters cannot be interchanged with felt glides and glides cannot be interchanged with casters on swivel frames.

Swivel Frame Finishes
Cast aluminum frames are either polished or finished with baked-on powder-coat paint in select KI standard finishes.

Wood Leg Frame
Plywood frame legs are made of $1\frac{3}{16}$" Birch plywood and are clear coated or stained Black. A steel plate connects to the chair and is welded to curved metal wire, which is then inserted, glued and fastened to the plywood legs.

Sled Base Frame
Frame is formed from a $\frac{5}{8}$" square steel tubing and welded. Frames are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat black paint. Sled bases come equipped with plastic glides. Sled base chairs do not stack.

4-Leg Stool Frame
4-Leg Stool frames are available in 4-leg frames, and in 24" and 30" seat heights. Frames are made from 25 mm thick tubular steel with a reinforcing footring made of 12 mm steel wire welded to the tubular frame. Frames are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat black paint. Stool frames come equipped with either plastic or felt glides. Stools do not stack.

Glides
Swivel frame option is available with white felt glides. Wood frame option includes black plastic glides. Stool is available with either black plastic or black felt glides. Sled base frame option includes black plastic glides.

Casters
Swivel frame option is available with 50 mm hooded casters. Casters are always soft-wheeled (for hard floors), are field-replaceable and only available in Black.

Table Frame
Plywood frame legs are made of $1\frac{3}{16}$" Birch plywood and are clear-coated or stained black. A steel plate connects to the table underside and is welded to curved metal wire, which is then inserted, glued and fastened to the plywood legs.

Table Surface
Tables are offered in $\frac{3}{4}$" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Total thickness of top is $\frac{7}{8}$". Tops are available with a 2 mm (73P) edge.

Compliance
Seating passes BIFMA X5.4-2012 and KI's internal standard testing for 300-pound capacity.

Information

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

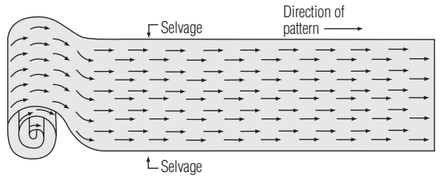

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

C.O.M. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

In all instances, send this form to the C.O.M. Specialist.

Connection Zone® Benching
General Information

Connection Zone Benching General Information

The Connection Zone Collection offers well-designed efficiency in space planning, supporting the focused work of an individual, the collaborative process of a group interaction, or the temporary needs of a touch-down space.

Connection Zone Benching is ideal for high density planning. Smaller footprints bring more users into a space and reduce per-user costs, while its simple design supports multiple planning styles. Privacy screens, dividers and optional modesty panels enable users to define personal space and establish a higher degree of privacy while maintaining an open, collaborative environment.
Connection Zone Benching is designed to withstand the rigors all markets. From its frame to screens, to storage, it is built to last.

Connection Zone Benching offers three distinct planning styles.
- Basic workstations, with 29" nominal finished height, for traditional benching applications in single- and dual-sided planning styles
- Café height (42" nominal finished height) single-sided and teaming tables
- Work rail-based planning that allows for the attachment of supporting privacy screens, shelves, and storage elements

Worksurfaces

Connection Zone Benching offers a variety of worksurface shapes designed for flexible workstation planning. All are available in a wide range of sizes. Worksurfaces feature a 1-1/8" thick high density particle board core with high pressure laminate top and phenolic backing sheet. Tops are predrilled to accept bases and standard components. Total dimension is 1-1/4" thick. When attached to frames, worksurfaces will "float" above the frame.

Dual-sided applications feature two worksurfaces. When no screen is specified, worksurfaces abut one another. Optional Framed Privacy Screens are inserted between worksurfaces and are attached to the legs. Frameless Privacy Screens and Supporting Privacy Screens utilize a center work rail that separates the worksurfaces. Overhang of worksurface will vary by configuration and screen use.

74P and Knife edge styles are available and grommet locations may be specified for most worksurfaces. Knife edge use is restricted to the edge facing the occupant.

Worksurface options for 29" finished height applications include:
- Rectilinear
- Peninsula
- Extended Corner
- Return
- Adjoining
- Conference End
- Elliptical

Rectilinear worksurfaces for 29" finished height dual-sided applications may be specified with an optional sliding feature to facilitate cable routing at installation.

Worksurface options for 42" finished height applications include single-sided rectilinear tops and teaming rectilinear tops. Sliding worksurfaces are not available on 42" units.

Frames for 29" Finished Assemblies

Single- & dual-sided support frames provide structural support for the worksurfaces. They are available in single sided (24" & 30"depths), and dual-sided (48" & 60" depths) applications. Frames are specified as "starter" or "adder," depending upon their placement in a row. Single Sided frames support fixed worksurfaces only, while dual-sided frames support either fixed or sliding worksurfaces.
All Connection Zone support beams are telescopic to allow for support of multiple worksurface widths. Telescopic range varies by frame size; consult pricelist for details. Steel frame base support profile is 1-1/2" x 2-3/8", and a gap of 1-5/8" will be present between base structure and worksurface when assembled.

Wood leg frame base support features angled wood legs. No gap is present between worksurface and frame.

Starter models contain a set of end frames along with the necessary worksurface brackets and beam(s). These units are used as stand-alone by themselves or in conjunction with adder models to create rows of workstations.

Adder models contain a single Intermediate frame support and the necessary worksurface brackets and beam(s) to be used along with a starter model number to create rows. A typical row would contain (1) starter model and any number of adder models.

Perpendicular Support Frames are a group of parts that provide structural support for worksurfaces that are configured perpendicular to the main frame supported beams. Frames are available for support of single worksurface depths of 24" and 30" or for support of dual worksurface depths of 48" and 60". Perpendicular support frames can also be ordered as needed for reconfigurations.

Wood leg desks and conference tables include both frame and worksurface in a single model.

Frames for 42" Café Height" Finished Assemblies

Frames for 42"H assemblies are offered in 24" and 30" worksurface depths on single sided rows, and in 42" and 48" worksurface depths for teaming tables. Frames are specified as "starter" or "adder," depending upon their placement in a row. Starter legs for 42"H assemblies are inset from the edge of the worksurface, and adder legs span two worksurfaces. Frames include integral modesty panels which are attached to the legs for support. Modesty panels extend beyond the legs to the table edge.

Note: Fixed worksurfaces only should be specified for 42"H assemblies.

Above Worksurface Framed Screens and Dividers

Framed Screens and Dividers are constructed with an aluminum frame that provides superior strength and can be powder coated in frame matching or accent colors. The standard top rail provides a single slot that may be used to hang accessories; alternately an optional tool rail containing three slots may be specified. Insert material options include acrylic, acrylic markerboard, and tackable fabric.

Framed Screens and Dividers are offered in heights of 13" and 19" for all insert materials and in a 31" height with fabric only inserts. Single, uninterrupted screens are available in 6" increments from 24" to 78". 60", 64", 72" and 84" screens are offered with center segmentation, and 90" and 96" units are available in two or three equal segments. Privacy Screens are located flush with the bottom of the worksurfaces, run parallel with the support beam, and do not require the use of a work rail. On single-sided applications, mounting brackets are attached directly to the bottom of the worksurfaces.
On dual-sided applications, mounting brackets are attached to the support frames.
Divider Screens rest on top of the worksurface and run perpendicular to Privacy Screens. When used with a Privacy Screen, the Divider attaches to one end and is supported by a sliding or fixed worksurface attachment bracket on the other end. Divider screens may also be specified without Privacy Screens.

Modesty Panels

All modesty panels are 10" tall and constructed of 14 gauge steel with 1/4" diameter holes on 3/4" centers. They are available in standard powder coat colors and are supported by brackets that attach to the underside of a worksurface.

Modesty panels for use on single-sided frames for 29" high assemblies are located flush to and inset of the frame legs. These modesty panels do not attach to the legs and are not required for structural integrity.

Modesty panels for wood leg frames are located within the leg span, and are always included.

Modesty panels for use on single-sided or teaming table frames for 42" high assemblies are attached to the legs and span the entire width of the worksurface with a 1/4" reveal. One modesty panel is included and required for structural integrity on single-sided applications and two modesty panels are included and required for teaming table applications.

Electrical Components

The prewired electrical is a 10-Wire 6 Circiut/6-2-2 system (UL183): (6) hot wires, (2) shared oversized neutral wires, (2) ground wires ((1) isolated ground, and (1) building ground). The 6-2-2 system allows more workstations to feed from one power supply point. Each wireway is designed to accept one duplex receptacle per side on each end, for a total of four. Table-to-table electrical is accomplished by jumpers. The system is energized by either a Base Infeed (liquid tight covered flexible conduit) or a Top Infeed (metal flexible conduit housed by an extruded aluminum pole). Hardwire electrical is also offered.

For ease of specification, some rectilinear and teaming worksurface models include preconfigured rigid wireway.
Peninsula worksurfaces, returns, and all assemblies that feature a "center work rail" do not include any electrical components. Supporting privacy screens or frameless privacy screens require the use of specific electrical components for attachment below the center work rail.
Infeeds, receptacles, cable risers and jumpers are all specified separately.
Consult the Planning Guide and Pricelist for rules and specific models as they relate to Electrical Planning.

Connection Zone® Workrail Planning
General Information

Frameless Privacy Screens

Frameless Privacy Screens feature the option of either acrylic or glass inserts fitted into an aluminum work rail whose top rests flush with the top of the worksurface. Screens are offered in 13" and 19" heights and in widths of 6" increments from 36-96" (64" is also available).

Frameless Privacy Screens are offered on dual-sided benching assemblies only. Corresponding worksurfaces must be specified as non-powered, and must utilize "Rail Supported" electrical components.

Note: Dividers cannot be attached to Frameless Privacy Screens.

Supporting Privacy Screens

Supporting privacy screens feature an aluminum work rail whose top rests flush with the top of the worksurface. Vertical aluminum posts and a single top rail enclose insert panels offered in steel dry erase markerboard, acrylic, or tackable fabric options. Screens are 19" high and are available in widths of 6" increments from 36-96" (64" is also available). Supporting Privacy Screens require the attachment of a Laminate Counter Shelf or Upmount Storage Cubby, specified separately, to complete the assembly.

Supporting Privacy Screens are offered on dual-sided benching assemblies only. Corresponding worksurfaces must be specified as non-powered, and must utilize "Rail Supported" electrical components. Dividers may be attached to Supporting Privacy Screens at intersection locations.

Shelves and Upmount Storage Cubbies

Designed to complete a Supporting Privacy Screen assembly, Laminate Counter Shelves and Upmount Storage Cubbies expand storage options within Benching applications. Shelves are 15-3/4" deep, and overhang each side by approximately 7". Widths range from 36-96" in 6" increments. Upmount Storage Cubbies are split (open on the right hand side) to provide each of two facing users equal storage space. Open laminate with steel partition or steel with sliding/locking doors are available in 6" increments from 36-72"

Connection Zone® Storage
General Information

GENERAL INFORMATION

The Connection Zone Storage offering is a collection of elements created for space efficiency within open environments. The collection consists of shared Lockers and individual Credenzas and Pedestals.

CONSTRUCTION AND STANDARD FEATURES

Shared Lockers:
Standard size and large lockers are sized to accommodate binders, bags and other personal items. A coat hook is standard and an optional fixed blank shelf (which divides the compartment vertically in two) is available for the large lockers. Large lockers are double the height of standard lockers.
Both the standard and large locker shells are available in 30 & 36" widths. The standard locker is available in 3 heights: 33-1/8", 48-7/16" & 63-3/4" and large locker is available in 2 heights: 33-1/8" & 63-3/4".

Interior Clearance:
Single Module: 13-1/2 & 16-1/2W x 16-7/8D x 14-1/2H
Double Module: 13-1/2 & 16-1/2W x 16-7/8D x 30-1/8H

Shell:
Connection Locker shells are formed of 18 ga, uprights, top and bottom reinforcements welded together to create a rigid box frame. The outer skin is constructed of 19 and 20 ga CRS with a seamless back detail. Lockers feature leveling glides with a 1" adjustment range. Shell is common to the 700 Series lateral storage units.

Partitions:
A 1-1/2" thick double wall hidden partition divides the locker shell in half running from top to bottom into which the cupboard doors lock.

Shelves:
1" thick shelves with front and back flanges screw into the upright members of the case and center partition to create separation between modules.

Doors:
Locker doors are single-wall construction with a structural hinge channel running the length of the door. Self-closing European style hinges with 110 degree opening provide 3 way adjustment of door to ensure consisting gapping and operation.

Locker Locks
Locks are available anywhere a door is used, with four locking options for Ruckus Storage:

1. **Standard key lock** (comes with pull option only) - Locks are a high-security double-bit design. One KI breakaway key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers available for order). Note that units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

2. **Padlock** - Robust zinc housing allows the end user to apply their own combination lock. Lock is backed with a stainless steel escutcheon plate to protect the paint finish.
3. **Combination lock** - A 4-dial combination lock that allows user to access locker without the need of a key. All locks are shipped with a factory set code 3333, combination is set by the end user or facility manager. In the case of lost or forgotten codes, a master key override will unlock the unit and allow the lock to be recoded. Combination lock features solid zinc construction. And a four digit combination allows up to 10,000 unique codes.
4. **Digital lock** – Stand-alone battery operated lock allows user immediate and simple keypad access without the need of a key. All locks are shipped with a factory set code 2244, the new access code is set by the end user or facility manager. Users have the flexibility to set and change a personal entry code, while a preset master code ensures that supervisor access is always available, or in an emergency, the key code can be overridden.

Features:
•Up to 80,000 operating cycle's battery life
•Low battery warning
•Battery failure key override
•8-digit master code and 6-digit sub-master codes
•4-digit user code (10,000 unique codes)
•6-digit technician code
•Code changeable
•Not suitable for chlorinated environments
•Can be programed for single use set at time of use or fixed combination mode

Credenzas:
Connection Zone credenza shells are constructed of 18 and 20 ga steel components with 18 ga structural top and bottom reinforcements and vertical uprights. Credenzas are available in 60" & 72" widths and feature variations of open bookcase and drawer sections. Credenzas are available in heights of 17-11/16", 20-3/4" and 23-13/16."

Interior Configuration & Clearance:
17-11/16 high unit:
Bookcase section – 12-3/8" H x 28-1/2" & 34-1/5" W x 18"D

Drawer Section – A) 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately)
B) Qty, 2 6" box drawers that will accept plate dividers (sold separately)

20-3/4" high unit:
Bookcase section – 15-7/16" H x 28-1/2" & 34-1/5" W x 18"D
Drawer Section – 3" Pencil Drawer & 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately)

23-13/16" high unit:
Bookcase section – 18-1/2" H x 28-1/2" & 34-1/5" W x 18"D with 1 adjustable blank shelf
Drawer Section – 6" Drawer that will accept plate dividers (sold separately), 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately)

Drawers:
Steel and laminate drawer fronts that accept exterior pulls are available as standard. Fronts are screw-mounted to roll-out shelves to build drawers. All drawers feature smooth riding, full-extension, ball bearing slides. Pull options include ADA-compliant nickel plated loop pulls or nickel-plated rectangular pulls. Key lock is standard on 12" drawers.

Testing
Components have been tested to accept loads of 125 pounds, exceeding ANSI/BIFM X5.9 2004 standards for filing when recommended counterbalance weight is installed.

Partition:
A 1-1/2" thick double wall partition runs down the center of the unit dividing the bookcase section from the file section.

Legs:
1-1/2" x ¾" Steel legs with threaded insert and 16 ga top plate are bolted to the underside of the credenza raising it 3-1/16 off the floor. Adjustable leveling glides provide 1" of adjustment.

Pedestals:
Mobile Box/ File Pedestals 15 W x 21-3/4" are available in 3 depths, 17-5/8", 21-5/8" and 27-5/8"

Basic Shell
Twenty-gauge steel body with 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

Drawers
Single wall metal or laminate fronts screw mount to pre-painted drawer bodies and overlap the face of the unit. Box (6") Drawers operate on 2 piece ¾ extensions ball bearing suspensions, File Drawers operate on 3 piece full extension ball bearing suspensions. Pull options include ADA-compliant nickel plated loop pulls or nickel-plated rectangular pulls.

See **ki.com\fabrics**

Connection Zone® Screens, as part of the Connection Zone® Collection, offer freestanding mobile collaboration and space division. Mobile screens feature steel frames and acrylic inserts, either printed or unprinted, with dry-erase coating. All Connection Zone® Screen models meet or exceed relevant ANSI/BIFMA X5.6-2010/ BIFMA 5.9-2012 standards, available upon request.

CONSTRUCTION AND STANDARD FEATURES

Frame Construction
Mobile frames are constructed of steel tube supports. Tubes are shaped and joined to create a screen with interior storage compartments. Frame is fully coated with dry-erase powdercoat paint, allowing marker writability on all painted surfaces. Frames support the attachment of acrylic sheets for the creation of a two-sided complete screen, and frame design allows for physical connection of one screen to another. Frames feature 2 steel formed hooks for attachment of flip chart pads.

Screens available in heights of 72” and 80”, and in widths of 36” and 42”. Screen floor space depth is 22-1/2”.

Acrylic Inserts
One-quarter inch thick acrylic sheets are captured on either side of steel frame. Acrylic features dry-erase coating on user-facing side of each sheet for full surface writability.

Inserts may be specified in either unprinted or printed styles. See images above and pricelist for available options. Other print patterns, sizes, or individual requests can be submitted through Product Modification Requests, contact Customer Service for details.

Steel Inserts
Steel inserts feature a dry erase-writable surface attached to a hardboard core. Steel inserts are magnetic and accept optional tackable fabric bulletin boards and rails.

Fabric Inserts
Fabric inserts feature fiberglass cores. Inserts are tackable and are offered in a variety of colors. Fabric inserts are neither writeable nor magnetic.

Casters
Casters feature 4” black swivel twin wheels, and are plate-mounted.

Ledge
An optional steel accessory shelf ledge is available allowing for placement of foam board or other presentation materials at the bottom of the unit.

Bulletin Boards and Rails
Optional tackable bulletin boards are intended for placement on the upper portion of steel insert tiles. Boards are magnetically attached and are fully repositionable.

Rails are intended for horizontal placement anywhere on a steel insert.

CrossRoads® Library Furniture
General Information

SPECIFICATIONS

Study Table Top
Tabletop is 1-1/4" thick, particleboard core construction with .05" high pressure laminate facer and .026" backer on the underside. All four edges shall be banded with a 1-1/4" thick and 2" wide solid oak or maple external knife edge laminated to core after application of the facer laminate. The edge is beveled to a .25" radiused bullnose at the top. The edge band has mitered corners.
Table tops are offered without grommets, with grommets, or with PowerUp® modules. Grommets and PowerUp® modules fit in the same size top cutout. For grommet and PowerUp® options, placement on table top will either be in the table center or offset to one edge. Offset grommet or PowerUp® locations will be centered on the longest outside edge of the table and 7-3/4" from the table edge to the center of the grommets or PowerUp®. For round and square tables, grommet or PowerUp® placement on the outer edge of the table will be centered on the outer edge between two legs.

Study Table Legs
The legs are attached to the apron using a heavy gauge metal plate with two heavy-duty anchoring bolts. The legs are 2-1/4" square glued up face to face. All of the edges are eased with a 1/4" radius. For tables with grommets or PowerUp®, cords are managed by the vertical leg wire manager or the wood routed wireway. Leg wireway is scuff-resistant, high-impact rigid Polypropylene plastic and is fastened to the leg with full-length adhesive bond. The solid wood routed wireway is 1" wide and 3/4" deep and runs from the bottom of the leg to just under the intersection with the apron. 1/4" solid wood cap attaches with (6) knurled thumbscrews.

Study Table Aprons
A 3/4" thick solid oak or maple apron rail is fit between the legs on all four sides of the table. The apron shall be machined to have a full length arch that is 3-7/8" high at the ends and 2" at the center. The apron rails are screwed to the underside of the top. Optional apron has straight bottom with a beveled face.

Study Table Glides
Each leg has a 2" diameter nylon-based adjustable leveling glide with a 1-1/2" thread stem.

Study Table Worksurface Height
Standard height is 29". Optional 27" or 32" heights may be specified.

Study Table Routed Wireway
Solid wood routed wireway, 1" wide x 3/4" deep runs from bottom of leg to just under intersection with apron. 1/4" solid wood cap attaches with (6) knurled thumbscrews.

Panel End Table Top
Tabletop is 1-1/4" thick, particleboard core construction with .05" high pressure laminate facer and .026" backer on the underside. All four edges shall be banded with a 1-1/4" thick and 2" wide solid oak or maple external knife edge laminated to core after application of the facer laminate. The edge is beveled to a .25" radiused bullnose at the top. The edge band is mitered at all four
corners. Table tops are offered without grommets, with grommets, or with PowerUp® modules. Grommets and PowerUp® modules fit in the same size top cutout. For grommet and PowerUp® options, placement on table top will either be in the table center or offset to one edge. Offset grommet or PowerUp® locations will be centered on the longest outside edge of the table and 7-3/4" from the table edge to the center of the grommets or PowerUp®.

Panel End Table End Panels
The end panels are 1-3/16" thick, particle core construction with select oak or maple veneer on both faces. The verticle edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The panel base is solid oak or maple with a .13" deep x .38" high reveal groove. The base is glued and screwed to the bottom of the end panel. The end panels are attached to the top using two 21" long, steel "L" brackets with six screws per bracket. The longitudinal stabilizing keel shall be 3/4" thick x 7" wide, particleboard construction with select oak or maple face and back. Bottom edge is banded with 1.5mm solid oak or maple and attached to the end panels and the top using mortise and tenon joinery. For tables with grommets or PowerUp®, cords are managed by the vertical leg wire manager

Panel End Table Glides
Each end and intermediate panel has a pair of 1-1/8" diameter steel-based adjustable leveling glide with a 1-1/4" threaded stem.

Panel End Table Worksurface Height
Standard height is 29".

Study and Stand-up Carrels Top
The worksurface is 1-1/4" thick x 33-1/2" or 45-1/2" wide x 27-1/2" deep, particleboard core construction with .05" high pressure laminate facer and .026" backer on the underside. Exposed edge shall be banded with a 1-1/4" thick and 2" wide solid oak or maple external knife edge laminated to core after application of the facer laminate. The edge is beveled to a .25" radiused bullnose at the top. The worksurface is attached to the end panels and back with a 21" long, steel "L" bracket screwed into brass inserts in the panel and then screwed into the top of the worksurface.

Study and Stand-up Carrels End Panels
The end panels are 1-3/16" thick particleboard core construction with Grade A oak or maple veneer on both faces. The vertical edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The panels have brass inserts for mounting the worksurface at four different heights (25", 27", 29" and 32" ADA heights). The panel base is select solid oak or maple with a .13" deep x .38" high reveal groove. The base is glued and screwed to the bottom of the end panel. End panels for study and stand-up carrels are machined on one side.

Study and Stand-up Carrels Shared Panels
The intermediate panels are the same construction as the end panels, however, the worksurface and shelf inserts are on both sides of the panel. Shared panels for study and stand-up carrels are machined on both sides.

Study and Stand-up Carrels Back Panels
The back panels are 3/4" thick, 5-ply particleboard core construction with Grade A oak or maple veneer on both faces. The top and bottom edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The top edge is located 6-1/2" down from the top of the end panels and 4" up from the bottom. Back panels are attached to end panels using cam-lock fasteners. Double-faced units share 1-3/4" thick back panel.

Study and Stand-up Carrels Shelf
The storage shelf shall be 3/4" thick x 33-1/2" or 45-1/2" wide x 10" deep, plywood core construction. Both faces will be covered with select oak or maple veneers and banded on the exposed edge with 1.5mm solid oak or maple. The study carrel shelf is located 15" above the worksurface. The stand-up carrel shelf is located 26" below the worksurface. Shelf is connected to end panels with shoulder screw and insert in panel and cam-lock fasteners in shelf bottom.

Study and Stand-up Carrels Glides
Each end and intermediate panel has a pair of 1-1/8" diameter steel-based adjustable leveling glides with a 1-1/4" threaded stem.

Circulation Desk Top
Joints are secured with steel "L" brackets. Desk top is 1-1/4" thick, particleboard core construction with .05" high-pressure laminate facer and .026" thick backer on the underside.

Circulation Desk Cabinet Construction
The front panels are 3/4" thick, 5-ply plywood with Grade A oak or maple veneer. All exterior faces are matched for color and grain. The side panels are 1-3/16" thick particleboard with Grade A oak or maple veneers and banded on the exposed edge with a 1.5mm solid oak or maple.

Circulation Desk Adjustable Shelves
Adjustable storage shelves are 3/4" thick, 5-ply plywood construction with select oak or maple veneer and banded on exposed edge with solid oak or maple. Shelves are adjustable in 1-1/4" increments and are notched at the ends over metal dowel support.

Circulation Desk Hinged Doors
Doors are 3/4" thick, MDF construction with Grade A oak or maple veneer on both sides. All four edges are banded with solid oak or maple edge. Each door shall be fitted with brushed aluminum or flat black pull and lock.

Circulation Desk Storage Drawers
All drawer fronts are 3/4" thick, MDF construction with Grade A oak or maple veneer on both sides. All four edges are banded with solid oak or maple edge. Each drawer shall be fitted with brushed aluminum or flat black pull and lock.

Circulation Desk Heights
Depending on the component, various heights are available. 27", 29", 32" and 39" may be specified.

Power and Data Management
Study tables, panel leg tables, study carrels, stand-up computer stations and circulation desk modules are available with grommets, PowerUp® system. The PowerUp® module is 6-1/4" long x 3" wide x 2-1/2" high. The module is constructed of textured polycarbonate. The module has one duplex receptacle (110 volts) and two ports for data connectors. The standard module will accommodate most data connectors. The customer purchases the data connectors. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. Module comes standard with a 9 ft. cord and 3-prong plug. For both grommets and the PowerUp® system, the underside of the table is provided with a plastic channel (cord management trough, which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines. For starter and adder carrels with grommets or PowerUp® modules, round cutouts in the end panels allow wires to pass through from one unit to the other. PowerUp® door extrusion and vertical plastic wire manager are standard. Cords are further managed by the vertical leg wire manager, which comes standard with grommets or the PowerUp® system. Leg wireway is scuff-resistant, high-impact rigid Polypropylene plastic, and is fastened to the leg with full-length adhesive bond.

Shelving End Panel
The end panels are 1-3/16" thick, particle core construction with Grade A oak or maple veneer on both faces. The vertical edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The panel base has a .13" deep x .25" high vein line 4" from the bottom. Two stainless steel adjustable glides are at the bottom of each panel.

Shelving Shared Panel
Same construction as the end panels except brass inserts are on both sides of the panel. Shared panels for shelving are machined on both sides. Adder units are attached with 5/16" through bolts and nuts.

Top Shelf/Cornice Unit
Shelf is 3/4" thick oak or maple construction. The flush-fitting cornice rail at the face sides is 3/4" thick x 2-1/8" high solid oak or maple. Shelf is attached using 1-1/4' x 1-1/4" wood cleats with bolts and metal inserts in the end panels.

Base
Preassembled box with a finished outer kick rail enables shelving to be assembled in the vertical position. Bottom shelf is set into place and positioned by using steel pegs.

Adjustable Wood Shelves
Wood shelves are 3/4" thick solid oak or maple construction. the shelf is grooved on the underside to fit over turned and grooved steel pegs, which are inserted into holes in the end panels. Holes are spaced at 1-1/4" space intervals. Peg and groove design prevents accidental removal. The fixed middle shelf is mounted using wood cleats and screws on units 60-1/2" and higher.

Adjustable Metal Shelves
Metal shelves are 18-gauge steel with notches on the underside to rest on turned and grooved steel pegs. Flat shelf is 1" thick and triple bent front and back edges provide superior strength and eliminate sharp edges. Book stop shelf is bend upward to form 90-dgree angle, 1-5/8" high above the shelf surface to function as a book stop. electro-statically appied powder coat finish. Metal shelves accept spring-type overhead wire book support. Metal shelf units are shipped with a wood base shelf.

Periodical Shelving
End panels, shared panels, and top and bottom shelf assembly construction are the same as standard shelving. Adjustable shelves include 3/4" solid wood angled bracket supports and a 14-gauge steel shelf pivot bracket. A 3/4" solid wood shelf with a 1/2" x 1-1/2" stop rail is mounted at an angle of approximately 45° so that periodicals can be easily viewed. The shelf pivots and can be flipped up to lay flat for storage access below.

Media Shelving
End panels and top and bottom self assembly construction are the same as standard shelving. Media metal shelves are 18-gauge steel with notches on the underside to rest on turned and grooved steel pegs. Angled shelves have slots spaced 1-1/4" to accept metal partitions that can be adjusted to provide separation between displays. Electrostatically-applied powder coated finish for long-term durability. Media shelf units are shipped with a wood base shelf.

Book Truck
Truck sides and bottom are 3/4" plywood with top edge banded. No seams show where side panels adjoin. Descending platform is 3/4" plywood with plastic laminate top surface. Platform is guided on rollers and supported by spring compression. As the platform is loaded, it descends toward the bottom of the truck. The truck is mounted on four swivel casters.

Dictionary Stand
End panels are constructed of 1-3/16" particle core with oak or maple veneer and 1.5mm thick solid wood edge banding. The top and bottom surfaces are attached to the end panel using cam-lock fasteners. The top surface is constructed of 1-1/4" particleboard core construction with a plastic laminate worksurface (customer-specified). One 3/4" adjustable shelf has a 16" adjustability range using steel pins and drilled holes.

Atlas Stand
End panels are constructed of 1-3/16" particle core with oak or maple veneer and 1.5mm thick solid wood edge banding. The top and bottom surfaces are attached to the end panel using cam-lock fasteners. The top surface is constructed of particleboard core with a plastic laminate worksurface (customer-specified). Five 1-3/16" particleboard sliding shelves have a 3/4" x 2" stop rail at the edge of each shelf.

Newspaper Display Unit End Panels/ Shared Panels
End panels are constructed of 1-3/16" particle core with oak or maple veneer and 1.5mm thick solid wood edge banding. End panels for newspaper display units are machined on one side. Shared panels for newspaper display units are machined on both sides.

Newspaper Display Unit Top Shelf/ Cornice Unit
Shelf is 3/4" thick oak or maple construction. The flush-fitting cornice rail at the face sides is 3/4" thick x 3-1/4" high solid oak or maple.

Newspaper Display Unit Base
Pre-assembled box has a finished outer kick rail which enables shelving to be assembled in the vertical position. Two adjustable shelves are 3/4" thick solid oak or maple construction. The shelf is notched at the ends to fit over dowel pins and prevent accidental removal. Two 1" thick rails mounted on the end panels are notched to hold eight newspaper sticks at an angle for easy removal and display.

Rolling Book Cart
All end panels and shelves are 3/4" plywood with oak or maple veneer laminate and a 1.5mm solid wood edge banding. Shelves are attached to the end panels using camlock fasteners and solid wood dowels. Bottom shelf is reinforced with wood cleat screwed into the shelf and end panels. Casters are two swivel and two stationary. Two cart sizes: 29-7/8" wide x 36-11/64" high x 14-1/2 " deep with two shelves and 39-7/8" wide x 43-17/32" high x 14-1/2" deep with two shelves.

Rolling Book Cart With Slanted Shelves
All end panels and shelves are 3/4" plywood with oak or maple veneer laminate and a 1.5mm solid wood edge banding. Shelves are attached to the end panels using camlock fasteners and solid wood dowels. Bottom shelf is reinforced with wood cleat screwed into the shelf and end panels. Casters are two swivel and two stationary. Two cart sizes: 29-7/8" wide x 38-3/16" high x 14-1/2" deep with two shelves slanted inward with slanted shelf backs, and 39-7/8" wide x 44-51/64" high x 14-1/2" deep with two shelves slanted inward with slanted shelf backs.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select wood type.
- **O** - Oak
- **M** - Maple

Ⓒ Select apron detail.
- **PCRV** - Curved apron
- **PSTR** - Straight apron

Ⓓ Select height.
- **27** - Junior height - 27”
- **29** - Adult height - 29”
- **32** - ADA wheelchair height - 32”

Ⓔ Select grommet or PowerUp.
60” & 72” wide tables are available with 2 grommets or 2 PowerUp modules or none.
84” & 96” wide tables are available with 3 grommets or 3 PowerUp modules or none.
- **2G** - 2 Grommets; add $128
- **2P** - 2 PowerUp modules; add $312
- **3G** - 3 Grommets; add $194
- **3P** - 3 PowerUp modules; add $467
- **NG** - No Grommets/PowerUp

Ⓕ Select grommet or PowerUp location.
- **CTRG** - Center grommet/module location
- **EDGG** - Edge grommet/module location

If no grommet or PowerUp module were selected, then skip “location” selection.

Ⓖ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select wood finish (for table edge & legs).
Refer to the **Product Color Options** page in this price list.
Stained finish colors $41.

Ⓘ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Additional plastic laminate surfaces are available but may require an upcharge and additional leadtime. Please contact KI.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

OPTIONS

Electrical Ganging
Contact KI for electrical ganging of multiple tables.

Wood Leg Wireway
If grommets or PowerUp® modules are ordered, a routered wood leg wireway may be ordered in place of the standard wireway. Add /RL to the end of model number for routered wood leg wireway option and add $180 to list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select wood type.

O	- Oak
M	- Maple

C Select panel.

PCRV	- Curved panel
PSTR	- Straight panel

D Select base.

BCRV	- Curved base
BSTR	- Straight base

E Select grommet or PowerUp.

1G	- 1 Grommet-standard
1P	- 1 PowerUp module; add $155

F Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

G Select wood finish (for table edge & base).
Refer to the **Product Color Options** page in this price list.
Stained finish colors; add $66.

H Select surface finish.
Refer to the **Product Color Options** page in this price list.
Additional plastic laminate surfaces are available but may require an upcharge and additional leadtime. Please contact KI.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

CrossRoads® Seating
General Information

SPECIFICATIONS

Chair Back Posts
Back posts shall be made of 5/4" stock, steam bent to shape and finished to 1" thickness.

Chair Front Posts
Front posts shall be made of 8/4" stock an tapered on two inside faces. The front outside corners are shaped to a 3/4" radius.
Finished size is 1-3/4" x 1-3/4" at the top and 1-1/4" x 1-1/4" at the bottom.

Chair Side Rails
Side rails shall be made of 4/4" stock, finished to 13/16" thickness x 2" wide and double doweled to the front and back posts using 5/8" x 2" dowels.

Chair Side Stretchers
Side stretchers shall be made of 4/4" stock, finished to 13/16" x 13/16". The stretchers shall be fastened to the front and back posts using 9/16" chucks with each joint pinned to further reinforce the joint.

Chair Top Slat
The top slat shall be made of 4/4" stock finished to 13/16" thickness and steam bent to a 24" radius. The top slat shall be shaped to form and double doweled to the back posts using 3/8" x 1-1/2" dowels.

Chair Bottom Slat
The bottom slat shall be made of 4/4" stock, steam bent to a 24" radius, finished to 13/16" thickness x 3-3/8" wide and double doweled to the back posts using 3/8" x 1-1/2" dowels.

Chair Banisters
Banisters shall be made of 6/4" stock finished 3/8" x 1" wide, steam bent to shape and mortised into the top and bottom slats.

Chair Front Rail
The front rail shall be made of 4/4" stock, finished to 13/16" x 2" wide and double doweled to the front posts using 3/8" x 2" dowels.

Chair Cross Stretchers
Cross stretchers shall be made of 4/4" stock, finished to 13/16" x 13/16" and fastened to the side stretchers using 9/16" chucks with each joint pinned to further reinforce the joint.

Chair Wood Seat
Seats shall be made of 5/4" stock, surfaced to 13/16" prior to being defect ripped on a straight-line ripsaw. Individual seat pieces shall not exceed 3-1/2". Seat stock will be mechanically glued to ensure uniform coating of polyvinyl acetate emulsion glue prior to being clamped using a pneumatic torque drive to insure proper pressure on glue joints. Seat blanks will be double surfaced prior to shaping to form and saddling. Seat shall be gained into bottom slat and fastened to each back post by one 12 x 2-1/4" tapping screw concealed by a wood button. Two 12 x 2" tapping screws secure the seat to the front rail and one 12 x 2" tapping screw shall secure the seat to teach side rail.

Chair Corner Blocks
Corner blocks shall further reinforce the frame and are glued and screwed in place. Two 10 x 1-1/4" twin fast screws and one 12 x 2-1/4" tapping screw shall secure each block to the frame.

Chair Glue
The glue used in final chair assembly shall be polyvinyl alcohol ester blend with polyvinyl acetate.

Chair Glides
7/8" diameter rubber cushion chrome-plated glides are standard.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

General Information and Technical Specifications

C-Table Personal Worksurface (27" Fixed Height)

Dimensions	
Base diameter	15-1/2"
Tabletop diameter	18"
Overall height	27"

Tabletop

Tabletops are18" diameter and consist of 3/4" thick high-density 45 lb particleboard core with a .03" thick high-pressure laminate top and a .028" thick phenolic backer (bottom). The table edge is 2 mm polypropylene (73P) and is available in a variety of colors. See KI Color Addendum for laminate and edge finish options.

Base Frame

The table base frame is constructed of welded steel. The spider plate is 14-gauge, base is 3/8" thick and the vertical post is 1 1/2" diameter by .083" thick wall. The base frame is finished in electrostatically applied hybrid powdercoating. The coating is then fused and cured in a baking oven to form a smooth, continuous finish that is chemical-resistant, hard, tough and mar-resistant. Powder-coated paint is available in all standard KI paint colors except for chrome. See KI Color Addendum for complete options.

Glides

Six 1" diameter self-adhesive white polyurethane glides are recessed into machined pockets within the steel base.

Table Assembly

Tabletops are attached to the base frame using seven #12 x 3/4" Phillips truss head screws. Tables are shipped completely assembled with a packaged weight of 23 lbs. Assembled tables without packaging weigh 17 1/2" lbs.

C-Table™ Max
Technical Specifications

TECHNICAL SPECIFICATIONS

Fixed-Height Table - Dual-Post Cantilever

The fixed-height table is offered in 26" or 29" tabletop heights. The base frame is constructed of welded 1 1/2" diameter, 16-gauge steel tubing with a top mounting plate of 7-gauge (.179" thick) steel and a 3/8" (10 mm) thick C-shaped steel base. A 1/2" diameter welded steel cross brace member stabilizes the entire frame.

Adjustable-Height Table - Dual-Post Cantilever

The adjustable-height table raises and lowers in 1" locking increments, between 25" and 30" overall table height. Adjustability is controlled by a lever assembly that protrudes from the base, underneath the tabletop. When compressed, the lever assembly unlocks the upper frame weldment from the lower frame weldment, allowing height adjustment that is assisted by a pneumatic cylinder enclosed within one of the vertical leg tubes. When the tabletop is positioned at the desired height, the lever can be released, and the bottom of the lever assembly locks into one of six height positioning holes in one of the lower leg tubes. Delrin bushings are installed between the tubes of the upper and lower frames, allowing for smooth adjustment. The outer portion of the lever assembly ships loose and is secured to the inner portion of the lever with a hex jam nut during assembly of the table units.

The upper frame of the adjustable-height table is constructed with two 1 1/4" diameter, 14-gauge steel tubes and a 7-gauge (.179" thick) steel mounting plate, all welded together. The lower frame of the adjustable-height table is constructed with two 1 1/2" diameter, 16-gauge steel tubes, a 7-gauge (.179") steel mounting plate, and a 3/8" (10 mm) thick C-shaped steel base, all welded together. The height adjustment lever is 5/16" diameter welded steel. A 1/2" diameter welded steel cross brace member stabilizes the entire frame.

Base Finish

Base frames are powder-coat painted, and may be specified in all standard KI colors. Chrome-plated finish is not available. See KI Color Addendum for color options offered.

Table Surfaces

Table surfaces are 3/4" thick high-density 45 lb particle board core with .03" thick high pressure laminate and .028" thick phenolic backer (bottom). The table edge is 2 mm polypropylene (73P) and is available in a variety of colors. See KI Color Addendum for laminate and edge finish options.

Glides

Seven 1" diameter self-adhesive white polyurethane glides are recessed into machined pockets within the steel base.

Table Assembly

The tabletop is secured to the base using seven #12 x 3/4" Phillips truss head screws. All tabletops are shipped separately from bases.

FINISH INFORMATION

ADDITIONAL LAMINATE OFFERING
Additional laminates, beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

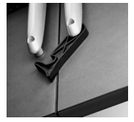
Wire Manager Door



Ganger

PowerUp® Module

SPECIFICATIONS

Worksurfaces
Worksurface tops are 1-1/4" nominal overall thickness with .042" thick high-pressure laminate and .030" thick backer. Density is 45 lbs/ft³, M3 grade.

Edge Style
There are 5 choices of edge styles available: (74P); Flat Vinyl T-edge (BN); Urethane (ME); Postformed (PL); and 3/8" Wood Band Edge (34S). The BN and PL edges are not available on wedge worksurfaces. 34S edge is standard in Natural Red Oak.

Fixed Base Worksurfaces
Worksurfaces for fixed base tables have a solid 45 lb/ft³ particleboard core construction. PowerUp Module, Activ8 or grommet locations will be available along the back edge of the worksurface away from the user in either the right- or left-hand corners, both corners or center.

Wedge Worksurfaces
Wedge worksurfaces have a solid particleboard core construction. PowerUp Module, Activ8 or grommet locations are not available. The wedge is supported between two tables by four 1-1/2" x 3/4" rectangular metal splice tubes. Four nylon gangers are also used to draw the wedge up to each table and keep the splice tubes from disengaging.

Leg Assemblies
The leg assembly is made up of a 24" or 30" foot, leg upright with access door, fixed leg. The feet and the cantilevers are die cast aluminum and the leg and access door are extruded aluminum. The feet each have two nylon glides that attach to the foot via 5/16" diameter x 7/8" long threaded studs. The leg contains a 1" x 2-1/2" wireway that directs wires from the foot into the horizontal wire manager. The leg wireway is divided into two halves that keep data cables separate from electrical cables. The leg wireway also has an aluminum access door that hinges on two steel dowel pins and snaps shut via a nylon snap. The cantilever attaches the leg assembly to the worksurface via raised bosses that provide 3/4" of clearance between the cantilever and the bottom of the worksurface, allowing a space to pass cables from table to table. The raised bosses on the cantilever also serve as mounting studs for the nylon table gangers that hold tables/wedges together. Each table has one right leg and one left leg assembly. The leg assemblies are available in two standard heights: 27" and 29". The leg assemblies are held together by two 1/4" diameter draw bolts that clamp the assembly together. The legs are available in standard powder coat finishes. Fixed leg tables ship knocked down.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/power option.
T6 = Power

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
PL	- Postformed edge
ME	- Urethane edge
34S	- 3/8" Wood band edge

Ⓒ Select PowerUp/power module or grommet location.
Location is from the seated side of the table.

NOPU-NOGR	- No PowerUp/no grommet
NOPU-GL	- Grommet left; add $25
NOPU-GR	- Grommet right; add $25
NOPU-GC	- Grommet center; add $25
NOPU-GB	- Grommet left and right; add $54
NOGR-ML	- PowerUp left; add $165
NOGR-MR	- PowerUp right; add $165
NOGR-MC	- PowerUp center; add $165
NOGR-MB	- PowerUp left and right; add $327
NOPU-VL	- Villa Grommet left; add $95
NOPU-VR	- Villa Grommet right; add $95
NOPU-VC	- Villa Grommet center; add $95
NOPU-VB	- Villa Grommet left and right; add $190
NOGR-VPL	- Villa Power Module w/ USB left; add $453
NOGR-VPR	- Villa Power Module w/ USB right; add $453
NOGR-VPC	- Villa Power Module w/ USB center; add $453
NOGR-VPB	- Villa Power Module w/ USB left and right; add $905

Ⓓ Select PowerUp module/grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

INFORMATION

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an up-charge and additional leadtime.
Contact KI.

INFORMATION

Wood Color Variations

High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an up-charge and additional leadtime.
Contact KI.

TERMS & CONDITIONS

Terms of Sale
All prices are valid through December 31, 2022

Prices do not include sales or any other taxes, storage or insurance charges, or charges for special packing, handling and transportation methods required by the customer.

Payment terms are net 30 days.

Sales Policy
Possession of this price list does not constitute authority to purchase and/or sell products contained herein.

Acknowledgements
Every order is acknowledged. Orders will be manufactured and invoiced based upon the information on the acknowledgement. If there is any discrepancy, please notify KI immediately. Orders are accepted by KI per terms of the acknowledgement.

Change Orders or Cancellations
Orders entered and acknowledged cannot be changed without KI's consent. Revisions to the order quantity or the product specifications may be acceptable provided they occur before the order is processed for material purchases and production. For changes or cancellations after manufacturing has started, the customer is responsible for all costs incurred, up to 100% of the order value.

Installation
Installation is not included.

Freight Terms
Freight terms are F.O.B. New York, NY and based on full truck load quantities (approximately 320 LNF). Less than full truck loads will be subject to additional freight charges. Less than 10 panel orders will be subject to a $275.00 crating charge.
Loads delivering to New York City will be subject to additional charges.
KI reserves the rights to select the "best way" shipping method and means.

Shipment Damage or Shortage
All merchandise is packed to comply with carrier requirements. All shipments should be carefully inspected by the consignee before acceptance, and the delivering carrier should be requested to record any damage or shortage.

If further damage is found after delivery, immediate inspection by the delivering carrier should be requested. Notification of concealed damages must be made to the delivering carrier within 15 days after delivery of the merchandise. Carrier liability ceases after 15 days.

In addition to being noted on the carrier bill of lading, any shortage must be reported in writing to KI within 3 days of receipt of shipment. Claims for missing materials cannot be honored after that time period.

Warranty
Subject to the limitations set forth below, KI warrants the Evoke Wall panels, glazed units, door frames and related components to be without defects in material or workmanship for a period of five (10) years from the date of delivery. Wood veneer wrapped parts shall be without defects in material or workmanship for a period of five (5) years from the date of delivery. During this warranty period, KI will repair or replace, at KI's exclusive option, alleged defective merchandise. Wood doors are warranted for (10) years from the date of installation, subject to the manufacturer's instructions and exclusions.

This warranty does not cover defects or damage resulting from accidents, misuse, improper installation and relocation methods or transfer to storage. Vinyl and textile wall coverings, plastic laminates, and wood veneer finishes are not warranted against fading or wearing, or if improperly cleaned or treated by the customer of by others.

The warranty provided in this policy extends only to the KI customer which is defined as the purchaser of products initially and directly from KI or authorized KI dealers. The warranty does not extend to any third party that obtains, acquires or purchases KI products from a KI customer.

KI makes no other warranty with regard to any item manufactured by it, whether express or implied.

All inquiries and correspondence should be directed to:

TERMS & CONDITIONS

Terms of Sale
All prices are valid through December 31, 2022

Prices do not include sales or any other taxes, storage or insurance charges, or charges for special packing, handling and transportation methods required by the customer.

Payment terms are net 30 days.

Sales Policy
Possession of this price list does not constitute authority to purchase and/or sell products contained herein.

Acknowledgements
Every order is acknowledged. Orders will be manufactured and invoiced based upon the information on the acknowledgement. If there is any discrepancy, please notify KI immediately. Orders are accepted by KI per terms of the acknowledgement.

Change Orders or Cancellations
Orders entered and acknowledged cannot be changed without KI's consent. Revisions to the order quantity or the product specifications may be acceptable provided they occur before the order is processed for material purchases and production. For changes or cancellations after manufacturing has started, the customer is responsible for all costs incurred, up to 100% of the order value.

Installation
Installation is not included.

Freight Terms
Freight terms are F.O.B. New York, NY and based on full truck load quantities (approximately 320 LNF). Less than full truck loads will be subject to additional freight charges. Less than 10 panel orders will be subject to a $275.00 crating charge.
Loads delivering to New York City will be subject to additional charges.
KI reserves the rights to select the "best way" shipping method and means.

Shipment Damage or Shortage
All merchandise is packed to comply with carrier requirements. All shipments should be carefully inspected by the consignee before acceptance, and the delivering carrier should be requested to record any damage or shortage.

If further damage is found after delivery, immediate inspection by the delivering carrier should be requested. Notification of concealed damages must be made to the delivering carrier within 15 days after delivery of the merchandise. Carrier liability ceases after 15 days.

In addition to being noted on the carrier bill of lading, any shortage must be reported in writing to KI within 3 days of receipt of shipment. Claims for missing materials cannot be honored after that time period.

Warranty
Subject to the limitations set forth below, KI warrants the Genius Wall panels, glazed units, door frames and related components to be without defects in material or workmanship for a period of five (10) years from the date of delivery. Wood veneer wrapped parts shall be without defects in material or workmanship for a period of five (5) years from the date of delivery. During this warranty period, KI will repair or replace, at KI's exclusive option, alleged defective merchandise. Wood doors are warranted for (10) years from the date of installation, subject to the manufacturer's instructions and exclusions.

This warranty does not cover defects or damage resulting from accidents, misuse, improper installation and relocation methods or transfer to storage. Vinyl and textile wall coverings, plastic laminates, and wood veneer finishes are not warranted against fading or wearing, or if improperly cleaned or treated by the customer of by others.

The warranty provided in this policy extends only to the KI customer which is defined as the purchaser of products initially and directly from KI or authorized KI dealers. The warranty does not extend to any third party that obtains, acquires or purchases KI products from a KI customer.

KI makes no other warranty with regard to any item manufactured by it, whether express or implied.

Information

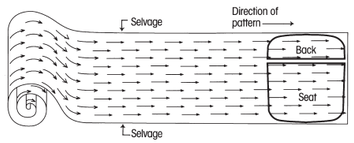
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

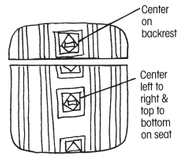


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Diem®
General Information

Diem - sensible seating for every day

(1D detail)

A. Backrest has poly frame and elastomeric mesh for long-term stretch and support day after day - in Black, Grey or White.

B. Weight-activated back tilt moves freely or locks in 3 positions.

C. Adjustable arms support forearms and keep shoulders relaxed - 4D arm (arm height and width adjustable; plus arm pad moves forward/backward, side-to-side and pivots) or 1D arm (height adjustable) - armless also available.

D. Seat cushion - 3.5" thick, highly resilient molded foam with contoured curves provides impressive comfort.

E. Seat depth (optional) adjusts 2.5" to prevent pressure on knee backs.

F. Seat height adjusts from 17.5 to 22.25" to accommodate people of all sizes (add 0.75" with optional seat depth adjustment).

G. 26" diameter, glass-reinforced nylon, five-star base in Black (optional Polished Aluminum base).

H. 55mm dual-surface casters are designed for use on both hard floor and carpet surfaces.

I. Stool has adjustable height (22"-30" range). 18" diameter chrome footring.

Tested to 300 pound weight rating. 15-year warranty.

TECHNICAL SPECIFICATIONS

Mechanism
A weight-activated mechanism passively adjusts backrest tilt tension based on occupant weight. The mechanism is made of stamped steel with a black plastic trim cover. One lever operates the height-adjust cylinder and a second lever allows the backrest tilt mechanism to move freely, or locks it in one of four positions.

Seat
Plywood seat board with $3^{1}/_{2}$" thick molded urethane foam is upholstered using a drawstring method. Optional seat depth adjustment range of 2.5".

Backrest
Reinforced nylon frame with mesh insert. Backrest frame and mesh are available in black, grey or white.

Base
Chair and stool have an injection-molded, glass-reinforced black nylon 5-blade base or a polished die-cast aluminum 5-blade base. Standard chair cylinder available in Black or Chrome. Standard stool cylinder available in Chrome only.

Casters
Casters are 55 mm O.D., double-wheel high-impact thermoplastic, and are designed for use on both commercial carpet and hard floors.

Foot Ring
Task stools are equipped with an adjustable-height foot ring with black, die-cast aluminum hub and spokes, with an 18" diameter chrome-plated tubular steel ring.

Arms
Optional height-adjustable arms are molded in black reinforced plastic with molded black polyurethane arm caps. Armrests mount directly to the seat board.

1D Arms
1D Arms are height-adjustable with a range of $3^{1}/_{4}$".

4D Arms
4D Arms are two-way adjustable, by width and height. Forward-slanting arms with ergonomic, maximum mobility arm top (button-activated and lockable arm pad; 1" side-to-side, 2" forward and back, and pivoting). Adjustable-height range of $4^{1}/_{4}$". Adjustable width range of $1^{3}/_{4}$" per side.

Ordering COM, COL and COV
Information

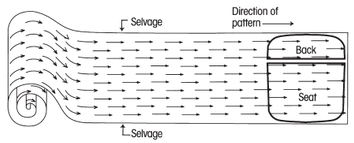
Ordering COM, COL and COV
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

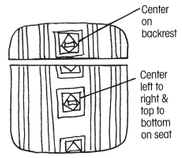


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

Doni®
Guest Chair General Information

Seat Shell and Backrest Articulation Mechanism
The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Optional Upholstered Seat and Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

Wire Tower Base
A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Legs are 7/16" diameter steel wire, fully gusseted with 5/16" diameter wire. All joints are welded and frames are finished in bright nickel-chrome plating.

Wood Leg Base
A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Inner leg wires made of 1/2" diameter steel wire complete the subframe. All joints are welded and the subframes are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint. Legs are turned from beech, stained, and clear-coat finished. Legs are drilled to accept subframe inner leg wires, and fastened by means of a two-part epoxy adhesive.

Tapered Steel Leg Base
A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Inner leg wires are made of 1/2" diameter steel wire and are plug welded to tapered tubular legs. All joints are welded and the frames are finished in either baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint or bright nickel-chrome plating.

Fourstar Swivel Base
The under-seat support structure is a die-drawn 12-gauge steel plate. A 3/4" diameter steel pin is welded to the seat plate, allowing the seat to swivel on a nylon bushing housed in the base. Seat structure is finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint. The fixed-height base is constructed of a polished die-cast aluminum fourstar base and a chrome-plated steel tube column.

Glides
The tapered steel legs and wood legs are equipped with swivel glides in a bright steel finish. The floor contact surface on the tapered steel leg is steel, and on the wood legs is natural nylon. The wire tower base and fourstar swivel base are all equipped with black nylon glides.

Doni®
Stack Chair General Information

TECHNICAL SPECIFICATIONS

Seat Shell and Backrest Articulation Mechanism
The backrest, seat, and shroud are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17-degrees of motion.

Optional Upholstered Seat and Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

4-leg and Caster Frames
Legs are made from 7/8" O.D. by 13-gauge tubular steel. A single ring of 1/2" diameter steel wire forms the crossmember. All joints are welded. An optional wallsaver configuration is available. The wallsaver configuration maintains 1/2" gap between backrest and wall by locking the backrest mechanisms in the upright position.

Sled Frames
Sled side frames are made from 3/4" O.D. by 13-gauge tubular steel. A single ring of 1/2" diameter steel wire forms the crossmember. All joints are welded.

Frame Finishes
Frames are finished in either baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint, or bright nickel-chrome plating.

Arms
Optional armrests are available. When equipped with arms, the support structure is a continuation of the rear leg, finished to match the frame color. The armrests are injection-molded glass-reinforced polypropylene. Arm color matches the frame finish, (except Chrome, hammertone, and metallic finishes; which match the outer shell poly color). The steel frame tube is inserted into a socket molded into the armrest, and secured with a screw.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

Glides

4-Leg Chairs

The bottom ends of the leg tubes are formed to be vertical where they meet the floor and the glides are pressed into them. Three glide options are available; felt, plastic, and steel. Felt and plastic glides have a swivel base and have easy-on/easy-off replaceable caps, which makes field replacement easy and efficient (plastic & felt caps are interchangeable). Steel glides have a non-swivel base and do not have interchangeable caps. No color options are available for glides.

Sled Base Chairs

Three glide options are available; non-skid, plastic, and steel. Non-skid glides are molded in two shots with a high impact ridged PVC upper and a flexible PVC base. Plastic glides are injection molded polypropylene. Steel glides are two-part construction consisting of a plastic housing with a stainless steel insert for the base. Glides are attached to the chair frame with one screw each. No color options are available for glides.

Casters

4-leg chairs may be ordered with casters instead of glides. Casters are 50 mm O.D., double-wheel high-impact thermoplastic, available with hard or soft wheel surface, in black only.

Gangers

Optional gangers are available on armless 4-leg and sled base chairs only. Gangers are made of chrome-plated 3/16" diameter steel wire, mounted to the chair with an injection-molded nylon hub.

Café Stool Base

A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Legs are made from 3/4" diameter steel tubing, and the footring is formed of 1/2" diameter steel wire. All joints are welded and the frames are finished in either baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint or bright nickel-chrome plating.

Glides

Café stools are equipped with swivel glides in a bright steel finish. The floor contact surface is either steel or neutral color nylon.

Transport Dolly

Frame construction is welded tubular steel with black powder-coated finish and 5" wheels (two swivel and two fixed). The dolly fits 4-leg or sled base chairs and has a capacity of twelve poly chairs or six upholstered.

ChangeUp™ Tablet Arm

ChangeUp tablet support is integral to the chair frame and consists of a 7/8" diameter solid steel rod welded to the front and rear support tubes. A three-piece molded plastic armrest is included and attached to the chair frame using a #10 x 2 1/2" Phillips pan head tapping screw.

The tablet mechanism consists a die-cast aluminum housing, upper and lower plastic bearings, and 11-gauge steel clamp and tablet board support plates. The tablet mechanism is clamped onto the chair frame over two plastic bushing halves and a 5/16" diameter by 1 3/4" hardened steel pin with a die-cast aluminum cap secured with two 1/4-20 x 3/4" button socket head cap screws. The pin creates a solid 90° up/down pivot stop and the bushings provide a smooth, quiet operation. In the use position, the tablet mechanism rotates outward from the chair back an additional 20° and permits approximately 3 1/2" of adjustment for ingress/egress without stowing the tablet.

The tablet worksurface is 21" wide by 13 1/2" deep (235 square inches) is secured to the tablet board support plate with twelve #12 x 5/8" Phillips flat head tapping screws. The tablet board is made of 18 mm Baltic Birch plywood with .040" high-pressure laminate top surface and .02" thick phenolic backer surface for an overall board thickness of approximately 3/4". Edges are lacquered with a clear finish and sealed. The factory installed tablet assembly is not field installable and may not be removed.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Design
Designed by Giancarlo Piretti and manufac-tured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

Doni®
Task Chair General Information

PRODUCT SPECIFICATIONS

Seat Shell and Backrest Articulation Mechanism
The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17-degrees of motion.

Optional Upholstered Seat and Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

Under-Seat Structure
Support structure is a die-drawn 12-gauge steel plate. Structure is finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint coordinated with base selection.

Arms
Optional armrests are available. When equipped with arms, a support structure is 7/8" O.D. by 13-gauge tubular steel welded directly to the seat structure plate. The steel support tube is inserted into a socket molded into the armrest, and secured with a screw. Armrests are molded from glass-reinforced polypropylene. Structure and armrests are Warm Grey when Warm Grey base is selected, or Black when Black or aluminum is selected.

Base
The base is a 26" injection-molded glass-reinforced nylon 5-blade base. A single paddle under the seat operates the height-adjusting pneumatic cylinder. Standard chair base and cylinder available in Black or Warm Grey. Standard stool base available in Black or Warm Grey. Standard stool cylinder available in Black only. An optional polished die-cast aluminum 5-blade base is also available on both chairs and stools.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

Casters
Casters are 60 mm O.D., double-wheel, high-impact thermoplastic and are available with hard (warm grey or black) or soft (black only) wheel surface.

Foot Ring
Task stools are equipped with an adjustable-height foot ring with black, die-cast aluminum hub and spokes, with an 18" diameter chrome-plated tubular steel ring.

ChangeUp™ Tablet Arm
ChangeUp tablet support is integral to the chair frame and consists of a $^{7}/_{8}$" diameter solid steel rod welded to the front and rear support tubes. A three-piece molded plastic armrest is included and attached to the chair frame using a #10 x $2^{1}/_{2}$" Phillips pan head tapping screw.

The tablet mechanism consists a die-cast aluminum housing, upper and lower plastic bearings, and 11-gauge steel clamp and tablet board support plates. The tablet mechanism is clamped onto the chair frame over two plastic bushing halves and a $^{5}/_{16}$" diameter by $1^{3}/_{4}$" hardened steel pin with a die-cast aluminum cap secured with two $^{1}/_{4}$-20 x $^{3}/_{4}$" button socket head cap screws. The pin creates a solid 90° up/down pivot stop and the bushings provide a smooth, quiet operation. In the use position, the tablet mechanism rotates outward from the chair back an additional 20° and permits approximately $3^{1}/_{2}$" of adjustment for ingress/egress without stowing the tablet.

The tablet worksurface is 21" wide by $13^{1}/_{2}$" deep (235 square inches) is secured to the tablet board support plate with twelve #12 x $^{5}/_{8}$" Phillips flat head tapping screws. The tablet board is made of 18 mm Baltic Birch plywood with .040" high-pressure laminate top surface and .02" thick phenolic backer surface for an overall board thickness of approximately $^{3}/_{4}$". Edges are lacquered with a clear finish and sealed. The factory installed tablet assembly is not field installable and may not be removed.

STATEMENT OF LINE

All models are available in polypropylene seat/backrest, upholstered seat/ polypropylene backrest, or upholstered seat/backrest.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See Upholstery Information for TB133 upcharge.

Ⓒ Select solid poly color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select outside/inside poly color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base color.
Refer to the **Product Color Options** page in this price list.
*Add $108 for polished aluminum base.

Ⓕ Select casters.

CHC	- Hard floor casters
CCC	- Carpet casters

Ⓖ Select tablet arm color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for 10 chairs or less with upholstered seat or upholstered seat and back is 3/4 yard per chair of 54" wide nondirectional fabric. For orders of 11 or more with upholstered seat and back and for complete information on ordering C.O.M. see "Ordering C.O.M., C.O.V. and C.O.L." section.

Californina TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, add the following upcharge.

Model=Solid Color, Polypropylene
Added List Price=$13
Model=Solid Color, Upholstered Seat
Added List Price=$83
Model=Solid Color, Upholstered Seat/Back
Added List Price=$120

Unit height	33"	33"	33"	33"
Corner table top	30" x 30"	30" x 30"	30" x 30"	30" x 30"
In-line table	20" x 20"	20" x 20"	20" x 20"	20" x 20"
Table height (all table models)	17"	17"	17"	17"

Seat Shell and Backrest Articulation Mechanism
The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Optional Upholstered Seat and Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

Under-seat Structure
Support structure is a die-drawn 12-gauge steel plate. Structure is finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint.

Tandem Base
Cast aluminum alloy leg section. 14-gauge 1" x 2" seamless steel column. Upright and base are painted monochromatic with beam and yoke. Columns are welded to a plate which clamps onto beam.

In-Line Table
Solid core top is 20" x 20" x 7/8" with a vinyl bullnose edge.

Corner Table
Solid core top is 30" x 30" x 7/8" with a vinyl bullnose edge.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Design
Designed by Giancarlo Piretti and manufac-tured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select fire code.
NFR - Compliance to TB 117-2013

Ⓓ Select outside/inside poly color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish for table.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select table edge color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select upholstery grade/color.
Refer to **ki.com/fabrics**

Ordering C.O.M., C.O.L., and C.O.V.

Bonduel, Green Bay, La Palma, Ontario and Shipping Locations

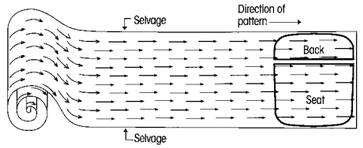
Ordering C.O.M., C.O.L., and C.O.V.
Bonduel, Green Bay, La Palma, Ontario and Shipping Locations

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

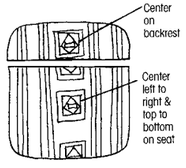


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Intellectual Property Authorization

Copyright/Logo/Trademark Release Form

(Intellectual Property)

I, _____, am the owner of the entire rights, title, and interests in the Intellectual Property identified in "Exhibit A" attached and grant Krueger International, Inc. ("KI") the right to use and display Intellectual Property on products produced and manufactured by KI.

I warrant and represent that I am the owner of the Intellectual Property in Exhibit A and have the necessary legal rights and permissions to use said materials and/or convey their use to others.

I agree that I will not infringe or violate the Intellectual Property Rights of any party. I agree to indemnify, defend, and hold KI harmless against any claims, actions, judgements, losses, and/or damages (including, but not limited to, reasonable attorney's fees) which may arise from any claims by any third party of an alleged or actual infringement out of the use and display of Intellectual Property on products.

I warrant I am of full legal age and have a right to contract in my name for the attached Intellectual Property. I have read the above authorization and release, before its execution, and I am familiar with the contents thereof. This authorization and release shall be binding upon me, my heirs, legal representatives, and/or assignees.

400 Series Folding Chairs
General Information

PRODUCT SPECIFICATIONS

400 Series Folding Chair

February 2020

TECHNICAL SPECIFICATIONS

The KI 400 Series Folding Chairs deliver optimum quality at a minimum price.

- KI Model 401 - no upholstery
- KI Model 404 - vinyl upholstered seat and backrest

400 Series Frames
Frames are electrically seam-welded 19-gauge, 7/8" O.D. tubular steel. The two leg braces are 19-gauge, 5/8" O.D. tubular steel.

Steel Backrests
Backrests are 7 1/2" deep, pitched for proper posture support. Panel is curved 24-gauge cold-rolled steel with fully curled edge and spot-welded to frame.

404 Upholstered Backrest
Vinyl upholstered backrest panel of 1/2" polyfoam is stapled to plastic base. Attached to backrest by rivets. Backrests are not field replacable.

401 Steel Seat
One piece 21-gauge cold-rolled drawn and shaped steel. Seat pivots on 1/4" tempered steel rivets.

404 Upholstered Seats
20-gauge recessed steel seat pan. Vinyl upholstered 1.25" polyfoam stapled to hardboard panel attached by rivets. Upholstered Seats are not field replaceable.

Feet
Replaceable non-marring linear polypropylene.

Frame Finish
Chair frames are finished with baked-on, electrostatically-applied epoxy powder-coat paint.

600 SERIES INDUSTRIAL STOOLS SPECIFICATIONS

Frames
Two leg sections of 18-gauge, 7/8" o.d. seam-welded tubular steel are crossed and welded together. Footring and leg frame are welded into a single unit. Footrings are 18-gauge, 5/8" o.d.; shaped for an enlarged weld area at point of contact with leg. Replaceable polyethylene feet.

Steel Seat
20-gauge die-formed steel pan with fully curled edges for strength and safety. 14" diameter. Tempered hardboard Masonite inset riveted into seat recess.

Upholstered Seat
20-gauge die-formed steel pan. 14" diameter. Replaceable 5/8" foam pad mounted to linerboard, fastened into seat recess with mechanical fasteners. Upholstered in vinyl.

Wood Seat
14" diameter, 1-1/4" hardwood (rubberwood) with clear lacquer finish. Attached to seat with screws.

Polypropylene Stool Seats
Injection-molded thermoplastic with integral rib construction for strength. 13" diameter. Color permeates throughout. White marks may occur at four spots on the front edge of seat but does not alter the structural integrity of the chair.

Nonstandard Steel Stool Seat Heights
Minimum order of 10 stools. Minimum height is 15". Specify standard model with next greater height than required.

Base Spreads
Base spread for 18" stools are 14"; 24" stools are 15-1/4"; 30" stools are 15-1/2".

Glides
Glides are available on standard or adjustable stools. Glides are optional on non-adjustable stools.

Frame Finish
Baked-on, electrostatically-applied epoxy powder coating.

SPECIFICATIONS

The capacity listed in the above chart is for non-tablet arm chairs. Tablet arm chairs require double the space. Replacement feet and bumpers are available.

KV Series Vertical Storage Caddy

One-piece bed of 16-gauge steel with sides channeled to 1-1/2" high. To each end, a 4-1/2" x 1-1/2" angle steel member is electrically welded. To each outside corner of the bed is welded a 14-gauge, 1-1/4" o.d. end post socket to support removable 1-1/8" o.d., 18-gauge end posts. Loading stops are stamped into the bed. 4" high x 1-1/4" wide roller-bearing wheels.

Optional adjustable end post sockets are constructed of welded steel. Sockets and removable end post are positioned against partial loads to eliminate load from shifting.

KH Series Horizontal Storage Caddy

One-piece bed of 16-gauge steel with sides channeled to 1-1/2" high. Side rails are fitted into sockets welded to end posts. Distance between side rails is equal to folded height of chairs from top to bottom crossbrace for snug storage. 4" high x 1-1/4" wide roller-bearing wheels.

KDT84 Caddy

Legs, uprights and crossbrace are fabricated of 11-gauge, 1" x 2" tubular steel. Legs are welded to uprights; crossbraces are bolted. Open tubing ends are covered with plastic end caps. Chair suspension tines of 14-gauge, 1" o.d. round tubing. 5" high x 1-3/8" wide roller bearing wheels.

Heritage™ Folding Tables
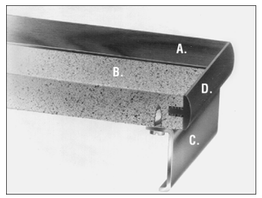
General Information

Heritage Fixed Leg

Features	
Solid core top	•
High-pressure laminate top	•
Bullnose edge	•
Round legs	•
General Dimensions	
Standard height	29"
Width range	24 - 36"
Length range	60 - 96"
Adjustable height range	



Solid Core

A. High-pressure laminate surface.
B. 3/4" thick, high-density, high-strength Particleboard solid core top.
C. Standard one-piece, roll-formed, 18-gauge steel apron.
D. Extruded vinyl bullnose edge. Bradded at the joint.

SPECIFICATIONS

Table, Legs and Frames
Legs fold in pairs. Constructed of 18-gauge seam-welded tubular steel. Folding linkage, hinges, locks and fastening hardware of die-formed steel. Aprons are roll-formed for solid, one-piece construction, fastened to top with screws.

Rectangular Tables, Round Legs
1-1/8" o.d. steel tubing. Powder coat legs have polypropylene feet.

Wishbone Legs
18" wide tables have 1" o.d., steel tubing with knifelock hinge. 16-gauge, 2-1/4" die-formed steel apron.

Table Tops
3/4" thick particleboard core with high-pressure laminate surface. Extruded bullnose edges are "T"-shaped with serrations mechanically locked into table with brads at the joint.

KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Enamel Finish
Powder coat finish on legs and frame.

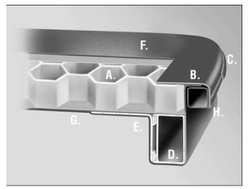
DuraLite® Lightweight Folding Tables
General Information

	Rectangular Top	Round Top
Features		
Honeycomb cellular core	•	•
High-impact ABS surface	•	•
Corner protection covers	•	•
Aluminum framework	•	•
Adjustable legs		
General Dimensions		
Height range	29"	29"
Width range	30"	60 - 72"
Length range	60 - 96"	60 - 72"



Honeycomb Core
A. Honeycomb core
B. Sonically welded edges
C. Molded corner covers
D. Aluminum beam structure
E. Aluminum leg plate attached to aluminum beam
F. .080" thick co-extruded ABS top shell
G. .095" thick co-extruded ABS bottom shell
H. Edge extrusion

SPECIFICATIONS

Table Top
The top is composed of a .080" thick, high impact Lustran 752 ABS top shell, internal core, internal framework and .095" thick high impact Lustran 752 ABS bottom shell, chemically bonded together. Edges of top and bottom shell are ultra-sonically welded together to form a fully enclosed unit that cannot separate and is impervious to moisture seepage. Top thickness is 2-3/8". The 3/4" thick table edge accepts standard industry skirt clips and is protected by a polypropylene edge bumper which allows for rigorous use and ensures a smooth, snag-free edge.

ABS top and bottom shells are supplied in a "flat-line haircell" texture which provides the optimal combination of concealment to scratches.

The undersurface is clean and smooth for better appearance and discourages collection of gum or other undesirable materials.

Four black rubber stacking bumpers are attached to the underside of each table top to protect table surfaces when stacked, and to keep loads from shifting on table caddies.

KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Internal Framework
Extruded aluminum channels create a framework around the entire perimeter of the top and are joined at the corners with a molded, high-impact polycarbonate corner reinforcing bracket. Unique aluminum leg attachment brackets attach directly to the aluminum side channels, creating superior strength.

Internal Core
3/4" thick honeycomb cellular core is chemically bonded under pressure to the top and bottom shells creating excellent rigidity and strength with minimum added weight.

Corner Protection Covers
Rectangular table corners are protected by an exclusive high-impact polycarbonate corner cover. These are field-replaceable to allow table corners to be "freshened up" in case of damage from misuse or abuse.

Table Legs
Fixed height legs are constructed of 18-gauge, 1-1/8" o.d., seam-welded tubular steel with a non-marring polyethylene glide. Folding linkage, hinges, locks and fastening hardware are of heavy-duty die-formed steel. The leg lock is a gravity operated C-shape designed to prevent binding in the leg mechanism during the folding process. Leg uprights are attached to the inverse-U shaped lower section by "fish-mouthing" the uprights to match the curvature of the lower section tubing and are securely welded together. Metal-to-metal leg attachment to table top ensures durability and allows for sure and easy leg replacement, if necessary. Legs and mechanisms are furnished in a

high quality black electrostatically applied and baked on enamel finish.

ValueLite® Folding Tables
General Information

ValueLite® Rectangle Top

ValueLite® Round Top

Features		
Blow molded top	•	•
Folding frames	•	•
Steel framework	•	•
Round legs	•	•
General Dimensions		
Height	29"	29"
Width range	30"	48, 60, 71"
Length range	60 - 96"	48, 60, 71"
Stack height	2-1/8" - 2-1/4"	3-5/8"

SPECIFICATIONS

Table Top
The top is composed of high density polyethylene. The blow molded top is seamless, eliminating the possibility of separation. Added UV inhibitors prevent fading and maintain appearance. The polyethelyne tops are resistent to stains and easy to clean.

KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Rectangle Table Legs
Fixed height legs are constructed of 19 ga. 1-1/8" tubing O.D., seam-welded tubular steel with non-marring feet. Folding linkage, hinges, locks and fastening hardware are of heavy-duty die-formed steel. The gravity operated chain link leg lock puts 200% more material at the point of stress. Leg brace below the bend is stronger than common u-shaped legs.

Round Table Legs
Fixed height legs are constructed of 19 ga. 1-1/4" tubing O.D., seam-welded tubular steel with non-marring feet with snap lock legs.

Legs and mechanisms are furnished in a high quality, black hammertone powder coat finish.

SPECIFICATIONS

KTV and KTH Table Caddy Frames
Uni-welded construction with all components welded into an integral unit. 16-gauge, 1-1/2" x 4-1/2" angle steel side members with 2-1/4" x 7" channel steel cross members. 18-gauge, 1-1/8" o.d. tubular removable endposts and sideposts.

KTR9 Table Caddy Frame
14-gauge, 1" x 2" seam-welded tubular steel frame welded into an integral unit. Tubular steel table supports of 1-1/8" o.d., 18-gauge seam-welded tubular steel; removable.

Table Caddy Wheels
Black phenolic wheels with roller bearings; 2 fixed and 2 swivel. KTV and KTH have 4" wheels; KTR9 has 5" wheels. (Not recommended for wood floors.)

Enamel
Nonchipping enamel is electostatically applied, then baked; alkyd urea formula.

INFORMATION

ANSI Requirements
All fixed and adjustable tables meet or exceed ANSI/BIFMA 1998 requirements for desk products. The adjustable tables meet the ANSI/HFS 100-1988 standard for adjustability and knee clearance.

ADA Requirements
The tables meet the ADA specification for wheelchair access and height of surfaces.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

Genesis® Specifications

Genesis tables are available in fixed height as well as adjustable. All fixed and adjustable tables meet or exceed ANSI/BIFMA 1998 requirements for desk products. The adjustable tables meet the ANSI/HFS 100-1988 standard for adjustability and knee clearance. The tables meet the ADA specifications for wheelchair access and height of surfaces. The metal components of Genesis tables are powder coated for appearance and durability. All plastic components are color matched in accordance with the KI color program.

TABLE BASE SPECIFICATIONS

Fixed-Height Tables

Each leg assembly is comprised of a 2" x 3" x 14-gauge steel tube that is welded to a steel foot, and on the other end, to worksurface support. The 14-gauge, draw-formed foot provides strength and room for carpet levelers in a low profile, sculpted component. The worksurface support is an 11-gauge steel, draw-formed component that provides high strength to support large, cantilevered loads. Extruded aluminum covers are attached to the front and back of the upright tubing. Leg assemblies are modified in the factory so that finished heights with glides is 29".

Pin-Adjustable Tables

Each leg assembly is comprised of 1-3/8" x 2-3/4" x 16-gauge steel tube that telescopes inside a 2" x 3" x 14-gauge steel outer leg tube. Nylon bushings ensure a smooth, telescoping action between the tubes. A 14-gauge, draw-formed foot is welded to the outer leg tube, and provides strength and room for carpet levelers in a low profile, sculpted component. An 11-gauge steel, draw-formed worksurface support is welded to the inner tube, and provides strength to support large, cantilevered loads. Extruded aluminum covers are attached to the front and back of the upright tubing for visual appeal. A spring steel button, protruding through holes in both tubes, allows for adjustment in one-inch increments from 24" to 31".

Crank-Adjustable Tables

Each leg assembly is comprised of 1-3/8" x 2-3/4" x 16-gauge steel tube that telescopes inside a 2" x 3" x 14-gauge steel outer leg tube. Nylon bushings ensure a smooth, telescoping action between the tubes. A 14-gauge, draw-formed foot is welded to the outer leg tube, and provides strength and room for carpet levelers in a low profile, sculpted component. An 11-gauge steel, draw-formed worksurface support is welded to the inner tube, and provides strength to support large, cantilevered loads on the worksurface. Extruded aluminum covers are attached to the front and back of the upright tubing for visual appeal. The table is manually adjustable from 22" to 33" or 27" to 43" by turning a crank. The crank raises or lowers the table at a rate of 1 inch per 10 revolutions. A lifting mechanism inside of each leg provides a uniform lifting force to the worksurface, regardless of the loading condition. Each mechanism is comprised of a steel acme-threaded rod turning through a delrin lead nut. The delrin nut provides a silent operation, low friction, and excellent wear characteristics. The acme rods deliver a lifting force to the underside of the surface supports. Precision needle roller bearings provide a smooth, quiet interface between the rotating acme rods and the surface supports. The lifting mechanisms are synchronized via a 1/4" pitch roller chain that spans the distance between the table legs. The chain engages each acme-threaded rod through a delrin sprocket that is attached to the rod.

Electric-Adjustable Tables

Each leg assembly is comprised of a triple telescoping steel tube with an overall dimension of 4.3" x 2.28". Extruded aluminum covers are attached to the back of the upright tubing for visual appeal. The table is electrically adjustable from 24" to 51" by pressing a button. Motors raise or lower the table at a rate of 1.4 inches per second. The motors drive a lifting mechanism inside of each leg to provide a uniform lifting force to the worksurface, regardless of the loading condition. The parallel connectors synchronize the motors electronically. The controller keeps track of each motor revolution, and ensures that the motors remain in perfect synchronization. The user interface occurs at the switch. The basic controller includes up/down buttons and three memory presets. The deluxe also includes a digital display indicating the height of the worksurface.

WORKSURFACE SPECIFICATIONS

74P, EP and KN Worksurfaces

74P, elliptical-postform (EP) and Knife-edge (KN) worksurfaces are constructed of 1-1/8" thick, 45-pound density particleboard. A .030" minimum thickness laminate provides a durable writing surface. The backer is a .030" minimum thickness melamine sheet. This provides a balanced construction that gives greater strength and prevents warping. All mounting holes are pre-drilled for easier table assembly and maximum holding power. A steel channel is provided for extra structure on tables with unsupported spans over 51". The 74P and KN surfaces are available in curvilinear or traditional shapes. The elliptical-postform surfaces are available in traditional shapes.

MP Worksurfaces

Membrane pressed worksurfaces are constructed of 1-1/8" thick, high-density fiberboard. A .021" thick vinyl foil sheet is applied to the core under heat and pressure. The vinyl foil includes a .005" thick urethane topcoat for surface protection. All mounting holes are pre-drilled for easier table assembly and maximum holding power. A steel channel is provided for extra structure on tables with unsupported spans over 51". Membrane pressed worksurfaces are available in curvilinear or transitional shapes. Peninsula and square shoe shapes are not available.

Powder-Coated Finish

Epoxy powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

Wire Management Trough

Troughs are formed from 16-gauge cold rolled steel and powder coated to match the table base. Trough is 5" tall; width on the bottom of the trough is 3.9" and opens up to 6.4" at the top. On fixed-height tables, the wire management trough is attached to the back of the legs with 4 thread-forming screws.

Modesty Panel

Modesty panels are constructed of rigidized cold rolled steel, 18-gauge to 16-gauge in thickness. The 8" modesty panels are suspended from the worksurface via 11-gauge steel brackets. There is a 1" gap between the panels and the worksurface in order to pass wires, and the panels are inset from the back edge by 1". Modesty panels can be used on all types of Genesis Desking, regardless of adjustability. However, the modesty panel will conflict with a wire trough on adjustable tables and the two accessories should not be specified together. All corner tables and square shoes use two modesty panels along the back edges. Peninsula tables use one panel along the 48" back edge only so as not to interfere with conferencing capabilities.

Universal and Balance Overhead- Note different stanchion for overhead support

Balance Overhead Storage

The overhead storage unit shall have door(s) that are mechanically assisted in such a way as to keep the door(s) balanced throughout its operation such that the action of both opening and closing is automatically controlled such that the door doesn't spring open or slam closed. The overhead storage unit structure and mechanical assist mechanism shall have a Lifetime warranty. The overhead storage unit shall comply with the Americans with Disabilities Act ADA 4.2.5 and 4.2.6 whereby a user shall not reach higher than 48" from the floor to the front of the unit or no higher than 54" to the side. The overhead storage unit shall comply with the Americans with Disabilities Act ADA 4.27.4 whereby the door shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to operate the door (open and close) shall be no greater than five foot pounds. The door of the overhead storage unit shall open to the outside of the cabinet to help prevent the storage of unsightly papers on the top of the cabinet, yet there shall be a narrow space at the rear of the cabinet to allow plants or other small items to be displayed. The overhead storage unit shall accommodate standard American size three ring binders as well as A4 and Folscap sized binders, up to 13-3/4" high. The overhead storage unit shall be available with an upper door that can be upholstered in fabric as well as offered in solid colored, translucent, and high-pressure laminate.

Universal Overhead Cabinet

The product shall be offered in widths of 24", 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 16-1/2" high and 14-1/2" deep. The shelf depth shall be 13-1/4". Each cabinet shall include separate brackets, which allow for either on or off-module mounting. Off-module cabinet shall mount into slots in vertical posts. Cabinet must be same width as the panel to which it is mounted. Off-module cabinet shall mount into the integral track in the horizontal rail, allowing cabinet to slide along track. Door fronts shall be offered in steel, fabric, and laminate versions with a dual-durometer extruded handle. The door front will operate on a rack and pinion gear system and will utilize a center lock mechanism. The door front will store recessed inside the cabinet with the handle exposed. The steel door front shall be of honeycomb core constructions with a powder coat finish. The construction of the fabric door front shall be identical to the steel door front except that the outer surface of the door front is covered with fabric. The laminate door front shall be high-pressure laminate covering a particleboard core. The overhead stanchions mount to the under surface of any fixed desk with overhead grommets.

Shelf Dividers

Shelf dividers shall be offered in the same color trim as the panels. The shelf dividers shall be powder coated steel. Installation and removal shall be accomplished without the use of tools or fasteners.

Accessories

Task lights shall be available which suspend from the shelf and overhead cabinet. The task light shall mount flush with the underside of the shelf and overhead cabinet. Task lights shall be offered in standard panel trim colors. The task light shall have a 9' cord. Task lights will be available in three versions: standard high-power factor ballast, variable (high/low) high-power factor ballast and electronic ballast. All three options include a cool white lamp. Cords can be concealed by tucking between the reveal along tiles.

Privacy Screens

Privacy screens shall be available to provide sit down privacy or standup privacy within Genesis workstations. Screens shall be 3/4" thick, 18" through 38" high and available to fit all worksurfaces. Screens shall attach to the back of the legs providing a stationary height for the screen even when attached to an adjustable height desk. Screens are mounted 1" to 1-1/2" from the worksurface edge. Privacy screens shall be designed for straight-line applications. They shall include mounting brackets for attachment. Screens shall be available for straight applications in 24", 30", 36", 42", 48", 54", 60", 66" and 72" widths. The 66" and 72" widths shall consist of a pair of screens (1) 30" screen plus (1) 36" screen for the 66" application and (2) 36" screens with splice for 72" applications. Screens may be used to serve two worksurfaces placed back-to-back. Privacy screens shall be useable on worksurfaces with overhead storage units to close the opening between the worksurface and the bottom shelf. Privacy screens will consist of two different aluminum extrusion profiles, each with die-cast corner connectors to create a rectangular frame. The frames will be either upholstered or painted, depending on the options. Between the two assembled frames, different core materials can be inserted. The screen material shall be made of 1/2" or 3/4" thick tackable core light or a 10 mm thick non-tackable translucent plastic. The extruded aluminum frame shall be .060" thick. The attachment bracket shall be made of 7 gauge steel. End-of-run privacy screens shall be available in 24" and 30" widths to match the depth of the fixed height worksurface that it will be used on. End-of-run privacy screens attach to the underside of the worksurface. End-of-run privacy screens shall have the same height and finishes as the regular privacy screens.

10-Wire Electrical Distribution System

The 10-wire system is available in two configurations (6-2-2 and 4-4-2). The UL label is green for 6-2-2 and blue for 4-4-2 applications. These numbers refer to the quantity of hot, neutral and ground wires configured in each system. Both 6-2-2 and 4-4-2 systems may be brought into the system from the ceiling, the wall or the floor, through the use of top feeds and base feeds. Genesis 10-wire electrical will be able to integrate with KI's WireWorks panel system with the addition of the appropriate connectors. The 10-wire electrical distribution system will consist of a 10-wire harness, table-to-table connectors and a 10-wire infeed kit. The 2.16" wide double-sided rigid 10-wire harness shall mount inside the wire management trough and shall be available in widths to span the worksurface. The 30" to 66" wide worksurface harness kit shall accommodate (2) 15 amp duplex receptacles and the 72" wide worksurface harness kit shall accommodate up to (4) 15 amp duplex receptacles. Receptacles shall be available to access the up to 6 circuits within the harness and must be ordered separately. Both 10-wire circuits are rated at 120 VAC@ 20 amps. All receptacles are rated at 15 amps. The specifics of each wiring configuration are detailed below.

Note: The two 10-wire systems (4-4-2 and 6-2-2) cannot be mixed together. The wiring systems must be separate. There are different receptacles for each system, and different connectors specific to each system. Keyed connectors will not allow the 2 systems to be mixed.

6-2-2 Configuration

The 6-2-2 configuration of the 10-wire system will have three "convenience" circuits (1, 2 and 3) which will each have their own hot wire, will share an oversized neutral wire and will share the building ground wire. Circuits 4, 5 and 6 are "isolated ground" circuits that will each have their own hot wire, will share an oversized neutral wire, and will share an isolated ground wire. The advantage of this system is that it will be able to have 6 circuits coming in via one top feed or base feed. This will cut down on the number of feed points on an installation. The number 4, 5 and 6 receptacles will be colored orange to designate that they are on the isolated ground while the number 1, 2 and 3 receptacles come in standard trim colors.

4-4-2 Configuration

The 4-4-2 configuration of the 10-wire system will have two "convenience" circuits (1 and 2), which will each have their own hot wire, their own neutral wire and will share the building ground wire. Circuits 3 and 4 receptacles are the "isolated ground" which will each have their own hot wire, their own neutral wire, and will share an isolated ground wire. The advantage of this system is that all of the circuits will have their own neutral wires and it has two circuits (3 and 4) that use an isolated ground. The number 3 and 4 receptacles will be colored orange to designate that they are on the isolated ground, while the number 1 and 2 receptacles come in standard trim colors.

10-Wire Power Infeed Kit

The 10-wire power infeed kit shall provide power from fixed floor or wall sources to the 10-wire harness. It shall include 6' of plastic covered flexible conduit. To connect the hardwire end of a 10-wire top feed or base feed to your building, use a 3/4" Romex connector on the conduit.

10-Wire Power Table-to-Table Connector

10-wire table-to-table connector shall consist of a sleeved flexible harness, which provides power connections from adjoining desks. The jumper shall have a length of 27".

Fabric

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
EP	- Elliptical postformed edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUC	- Center module; add $146
PUB	- Both left and right modules; add $296

PUL and PUR option only available on worksurfaces 42” wide or greater. PUB option only available on 60”, 66” and 72” wide only. PUC and OGY may not both be selected for 66” and 72” wide.

Ⓓ Select modesty panel option.

NM	- No modesty panel
WM	- With modesty panel

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “WM” option.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WW	- Wire trough

Add upcharge to unit price for “WW” option.

Ⓕ Select overhead grommet.

OGN	- Overhead grommets no
OGY	- Overhead grommets yes

Ⓖ Select transition legs.

TS	- No transition foot
TL	- Left transition foot
TR	- Right transition foot
TB	- Both transition feet

Ⓗ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select edge/PowerUp module color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓙ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge, (EP) elliptical postformed edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
EP	- Elliptical postformed edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUC	- Center module; add $146
PUB	- Both left and right modules; add $296

PUL and PUR option only available on worksurfaces 42" wide or greater. PUB option only available on 60", 66" and 72" wide only.

Ⓓ Select modesty panel option.

NM	- No modesty panel
WM	- With modesty panel

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "WM" option.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WW	- Wire trough

Add upcharge to unit price for "WW" option.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp module color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge, (EP) elliptical postformed edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
EP	- Elliptical postformed edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUC	- Center module; add $146
PUB	- Both left and right modules; add $296

PUL and PUR option only available on worksurfaces 42” wide or greater. PUB option only available on 60”, 66” and 72” wide only.

Ⓓ Select modesty panel option.

NM	- No modesty panel
WM	- With modesty panel

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “WM” option.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WW	- Wire trough

Add upcharge to unit price for “WW” option.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp module color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge, (EP) elliptical postformed edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
EP	- Elliptical postformed edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUC	- Center module; add $146
PUB	- Both left and right modules; add $296

PUL and PUR option only available on worksurfaces 42” wide or greater. PUB option only available on 60”, 66” and 72” wide only.

Ⓓ Select modesty panel option.

NM	- No modesty panel
WM	- With modesty panel

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “WM” option.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WW	- Wire trough

Add upcharge to unit price for “WW” option.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp module color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge, (EP) elliptical postformed edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.

Ⓐ Ⓑ Ⓒ Ⓓ Ⓔ Ⓕ Ⓖ Ⓗ

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “LM”, “RM” and “WM” options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for “WL”, “WR” and “WW” options.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp/crank grommet color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn’t apply to the membrane edge selection.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for "WL", "WR" and "WW" options.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp/crank grommet color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn't apply to the membrane edge selection.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “LM”, “RM” and “WM” options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for “WL”, “WR” and “WW” options.

Ⓕ Select overhead grommet.

OGN	- Overhead grommets no
OGL	- Overhead grommets left
OGR	- Overhead grommets right

OGL not available on 84” worksurfaces.

Ⓖ Select transition legs.

TS	- No transition foot
TL	- Left transition foot
TR	- Right transition foot
TB	- Both transition feet

TR, TL and TB not allowed on 24” deep dual surfaces.

Ⓗ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn’t apply to the membrane edge selection.

Ⓙ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for "WL", "WR" and "WW" options.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn't apply to the membrane edge selection.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for "WL", "WR" and "WW" options.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn't apply to the membrane edge selection.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select electric control style.

S	- Standard up/down switch
D	- Deluxe up/down switch; add $152

Ⓓ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓔ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “LM”, “RM” and “WM” options.

Ⓕ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for “WL”, “WR” and “WW” options.

Ⓖ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn’t apply to the membrane edge selection.

Ⓘ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for "WL", "WR" and "WW" options.

Ⓕ Select overhead grommet.

OGN	- Overhead grommets no
OGL	- Overhead grommets left
OGR	- Overhead grommets right

Ⓖ Select transition legs.

TS	- No transition foot
TL	- Left transition foot
TR	- Right transition foot
TB	- Both transition feet

Ⓗ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn't apply to the membrane edge selection.

Ⓙ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for "WL", "WR" and "WW" options.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn't apply to the membrane edge selection.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for "WL", "WR" and "WW" options.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn't apply to the membrane edge selection.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select electric control style.

S	- Standard up/down switch
D	- Deluxe up/down switch; add $152

Ⓓ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓔ Select modesty panel option.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for “LM”, “RM” and “WM” options.

Ⓕ Select wire trough and power option.

NW	- No wire trough
WL	- Wire trough LH only
WR	- Wire trough RH only
WW	- Wire trough Both

Add upcharge to unit price for “WL”, “WR” and “WW” options.

Ⓖ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select edge/PowerUp color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge, PowerUp module and crank grommet. Trim color doesn’t apply to the membrane edge selection.

Ⓘ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WW	- Wire trough

Add upcharge to unit price for "WW" option.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge and PowerUp module.

Ⓗ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select PowerUp module location.
Select only one from the following and add the appropriate upcharge to the base price.

PUN	- No data
PUL	- Left module; add $146
PUR	- Right module; add $146
PUB	- Both left and right modules; add $296

Ⓓ Select modesty panel.

NM	- No modesty panel
LM	- LH modesty only
RM	- RH modesty only
WM	- Both modesty panels

See pricing column for full modesty panel upcharge.
Add upcharge to unit price for "LM", "RM" and "WM" options.

Ⓔ Select wire trough and power option.

NW	- No wire trough
WW	- Wire trough

Add upcharge to unit price for "WW" option.

Ⓕ Select overhead grommet.

OGN	- Overhead grommets no
OGY	- Overhead grommets yes

Ⓖ Select transition legs.

TS	- No transition foot
TL	- Left transition foot
TR	- Right transition foot
TB	- Both transition feet

Ⓗ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. The color selection will apply to the trim, edge and PowerUp module.

Ⓙ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) 74P edge and (KN) knife edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
MP	- Membrane edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. Trim color doesn’t apply to the membrane edge selection.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. Laminate finishes are only available on (74P) edge and (KN) knife edge worksurfaces. The membrane color selections are only available on the (MP) membrane edge worksurfaces.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard finish is the supplier’s recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Customer's Own Material ■

Specifications Form
September 2021

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
Attn: COM Fabrics
6892 Marlin Circle
La Palma, CA 90623

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC REPEAT	INCREASE COM REQUIREMENT BY:
4.75" and under	0%
5" - 10.75"	12%
11" - 15.75"	18%
16" - 20.75"	25%
21" and over	40%

For upholstery fabrics that are less than 54" wide, please contact customer service for additional yardage(s) requirements. Specific models and quantities will determine final yardage amounts.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

Height	31.5”	31.5”
Overall Dimensions		
Seat Width	23.5”	23.5”
Seat Depth	19.5”	19.5”
Seat Height	17.75”	17.75”

TECHNICAL SPECIFICATIONS

Interior Frame Construction
Interior frame and arms are constructed using $^{3}/_{4}$” engineered Russian Birch plywood. All inner frame components are CNC-machined (computer numerical control) to maintain accuracy of part dimensions and also to ensure that all connection joints are engineered to interlink with the other hardwood components. All joints are glued and further secured with adhesive staples and/or wood screws.

Seat and Back Construction
The seat and back are similarly CNC-machined to ensure accuracy of part dimensions. A universal decking material is stapled over the frame to provide a barrier between the foam cushion and the structural components. This webbing is used on all faces to maintain a smooth consistent shape around the perimeter of the unit. A 2" thick piece of polyurethane foam is glued to the webbing to form a padded interior of the unit.

The seat utilizes four rows of 3” wide by 17” long serpentine springs that are affixed to the machined seat. A universal decking material is stapled over the springs to provide a barrier between the foam cushion and the structural components. The seat foam is $6^{3}/_{4}$” thick high-resilient (HR-36) polyurethane, comprised of 2.1 lb weight density, that is shaped to the contour of the frame.

The back foam is 4” thick high-resilient (180-24) polyurethane, comprised of 1.88 lb weight density, that is shaped to the contour of the frame. The polyurethane foam is CFC-free and latex-free to prevent allergic reaction.

The upholstery material used on the unit is backed with a thin Dacron that allows for additional comfort. An upholstery tuck detail on the back cushion is included on all models as an aesthetic feature.

Upholstery
Upholstery is available in non-contrasting or contrasting options on all models. When contrasting is chosen, the contrasting fabric will be applied to the seat cushion as standard. A variety of KI In-Grades, Pallas, and COM/KOM materials have been approved for use on the Gladly product line.

Legs
The tapered wood leg is solid Beech and the tapered metal leg is a 14-guage tapered steel tube. Both include a custom steel fabricated top plate that allows for attachment to the frame using four $^{1}/_{4}$-20 x 1” Phillips pan-head steel bolts per leg. Wood and metal legs are available in a variety of standard KI finishes.

Glides
Wood leg models with plastic or felt glides are non-adjustable, non-skid glides allow $^{1}/_{2}$” of adjustment. On metal legs models, all glides are non-adjustable and are available in plastic, felt or non-skid. Reference Gladly Lounge Seating - Glide Selection Guidelines (KI-PG-000028) for glide recommendations.

Gladly™
General Information

Electrical System Options

Byrne Mini-Tap® Power Module with 3-Prong Plug
Gladly lounge seating can be configured with optional Byrne Mini-Tap® power modules with 3-prong plug (a self-contained, UL listed single relocatable power tap). One 15-amp, 125 volt AC simplex receptacle and two 2.1-amp, 5 volt DC USB Type A connector ports (2.0 and 3.0 compatible, no data), provide connection for device charging or direct AC power. Byrne Mini-Tap power module is standard with 72" long, 14 AWG, 15-amp NEMA rated 3-conductor SJT cord with a three-prong grounded plug. Power modules available in black or white. Cord is black.

One Byrne Mini-Tap® power module with 3-prong plug is available per model, and may be configurable for front power outlets. Power is routed at the back of the lounge unit with plastic cord managers that mount directly into the wooden frame.

Compliance

This product has been tested according to the Business & Institutional Furniture Manufacturers Association (BIFMA) voluntary standards known as ANSI/BIFMA X5.4-2020 for Public and Lounge Seating, meeting or exceeding all applicable testing requirements of the standard.

This product meets third party certification for Indoor Air Quality as certified by SCS Global Services. The product meets all qualifications for Indoor Advantage Gold, the highest standard which conforms to the ANSI/BIFMA Furniture Emissions Standard (M7.1/X7.1-2011 R2016) and ANSI/BIFMA e3-2019 (Credits 7.6.1, 7.6.2) for seating parameters.

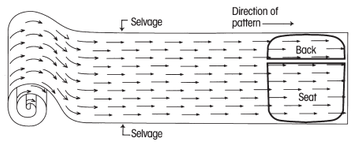
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

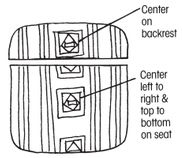


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

4-Leg Frame
Legs are 7/8" o.d. x 13-gauge tubular steel. A double ring of 7/16" diameter steel wire forms the cross member. The fixed backrest mechanism structure is formed of 1/2" diameter steel wire. All joints are welded.

Sled Frame
Frames are 3/4" o.d. x 13-gauge tubular steel. A double ring of 7/16" diameter steel wire forms the cross member. The fixed backrest mechanism structure is formed of 1/2" diameter steel wire. All joints are welded.

Seat and Shroud
Injection molded polypropylene.

Frame Finishes
Baked-on electrostatically-applied 30° gloss epoxy powder coating or bright nickel-chrome plating.

Glides
The bottom ends of the leg tubes are formed to be vertical where they meet the floor. The leg tubes are capped with polypropylene end caps matching the leg color, (except chrome or hammertone, which use black caps). Three optional glide types are available for leg chairs: swivel poly/nylon, swivel steel and swivel felt glides. The swivel function allows the bottom of the glide to correctly match uneven floor conditions, resulting in less wear. Poly/nylon and felt glides are interchangeable and have easy-on/easy-off replaceable glide caps, which makes field replacement easy and efficient. Swivel poly glides are available in Stone color only. Optional glides for the sled base are co-extuded to provide a softer (non-skid surface to protect the floor, but do not glide. Sled base chairs are also available with black nylon (plastic) glides, stainless steel glides, or non-marring (clear nylon) glides.

Casters
4-leg chairs may be ordered with casters instead of glides. Casters are double-wheel, high-impact thermoplastic available with hard or soft wheel surface, in black only.

Arms
Optional cantilever arms are available. When equipped with arms, the support structure is a continuation of the rear leg finished to match the frame color. The armrests are injection-molded, glass-reinforced nylon matching the frame finish (except for chrome, hammertone, and metallic finishes which will match poly color. Diamond translucent poly will have light tone armests; Pewter translucent will have flannel armrests. The steel frame tube is inserted into a socket molded into the armrest and secured with a screw.

Flip-up Tablet Arm
Tablet support loop is a continuation of the rear leg and may be ordered on the right or left side. A formed steel hinge is welded to the top of the support structure and secured with screws to the underside of the writing surface. Writing surface for standard tablet is 9-1/2" x 20-3/4" x 12-1/2" and oversize tablet is 15-1/2" x 22-1/2" x 14". Plywood core of 5/8" thick, 11-ply hardwood surfaced with .030" high-pressure laminate top and plain backer undersurface. Tablet flips up for easy access. Edges are lacquered and sealed.

Flip-and-Store (G2) Tablet Arm
The pivot mechanism consists of two pivot cams, two steel hinge barrels, a pivot shaft, and a hinged steel support plate which fastens to the tablet board. Available in right - or left-hand models. The working surface is 13-3/4" x 18-1/8".

Backrest Articulation Mechanism
A pair of outer backrest supports formed from 1' diameter tubular steel are inserted into sockets molded into the backrest and secured with screws. The backrest assembly moves over molded thermoplastic slide bushings and is supported by steel coil springs. This mechanism allows the backrest to move through 15 degrees of movement, about an axis of rotation that is through the hips of the occupant.

Optional Upholstered Seat and Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness and back foam is nominal 1/2" thickness. The fasteners that attach the back pad are color-matched to the polypropylene.

Transport Dolly
Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Powder-coated finish.

Universal Dolly Handle
Tubular steel and plate steel construction. Handle is powder coated. Field-assembled to dolly.

Design
Designed by Giancarlo Piretti and manufac-tured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

Stacking Vinyl, Polyurethane, and Imitation Leather Upholstered Chairs
It is recommended that chairs to be stacked be covered in material other than vinyl, polyurethane, or imitation leather as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl, polyurethane, or imitation leather upholstery.

INFORMATION

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.
Inc. under license from Pro-Cord S.p.A

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.
Test samples must be sent to:

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select poly seat and back color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select glide option.

F	- Felt Glides
P	- Plastic glides
S	- Steel glides

Ⓔ Select tablet arm color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See Upholstery Information for TB133 upcharge.

Ⓖ Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for 10 chairs or less with upholstered seat or upholstered seat and back is 3/4 yard per chair of 54" wide nondirectional fabric. HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select seat height.

24	- 24” Seat Height
30	- 30” Seat Height

Ⓒ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select poly seat and back color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select glide option.

F	- Felt Glides
P	- Plastic glides
S	- Steel glides

Ⓕ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See Upholstery Information for TB133

Ⓖ Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for 10 chairs or less with upholstered seat or upholstered seat and back is 3/4 yard per chair of 54” wide nondirectional fabric. For orders of 11 or more with upholstered seat and back and for complete information on ordering C.O.M. see “Ordering C.O.M., C.O.V. and C.O.L.” section.

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, add the following upcharge:
Model=Polypropylene
Added List Price=$13
Model=Upholstered Seat
Added List Price=$87
Model=Upholstered Seat and Back
Added List Price=$123

SPECIFICATIONS

Tandem Base
Cast aluminum alloy leg section. 14-gauge 1" x 2" seamless steel column. Upright and base are painted monochromatic with beam and yoke. Columns are welded to a plate which clamps onto beam.

Tandem Arm
Oval tubular steel arm support with self-skinning urethane armrests measuring 10-¼" long x 4" wide. The tubular arm support is welded to a yoke and then fastened to the beam via a coverplate.

Underseat Structure
Support structure is die-drawn 12-gauge steel plate. Fixed backrest mechanism structures are made from 1/2" dia. steel wire and attached by welding. Structure is finished with baked-on electrostatically-applied 30 degree gloss epoxy.

Backrest, Seat and Shroud
Injection molded polypropylene.

Optional Upholstered Seat or Seat & Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

Backrest Articulation Mechanism
Two outer backrest supports formed from 1" dia. tubular steel are inserted into sockets molded into the backrest and secured with screws. The backrest assembly moves over molded thermoplastic slide bushings and is supported by steel coil springs. This mechanism allows the backrest to move through 15 degrees of movement, about an axis of rotation that is through the hips of the occupant.

In-Line Table
Solid core top is 20" x 20" x 7/8" with a vinyl bullnose edge.

Corner Table
Solid core top is 30" x 30" x 7/8" with a vinyl bullnose edge.

INFORMATION

C.O.M Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1-1/2 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

Whatever you imagine, whatever you require. KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating information can be found here.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select fire code.

FR	- Compliance to TB 133
NFR	- No Fire Retardant

See pricing column for TB133 upcharge.

Ⓓ Select seat/back color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish for table.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select table edge color.
Refer to the **Product Color Options** page in this price list.

OPTIONS

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

SPECIFICATIONS

Underseat Structure
Support structure is die-drawn, 12-gauge steel plate. Fixed backrest mechanism structures are made from 1/2" diamter steel wire and attached by welding. Structure is finished with baked-on, electrostatically-applied, 30-degree gloss epoxy powder coating.

Arms
Optional cantilever arms are available. When equipped with arms, the supporting structure is 7/8" o.d. x 13-gauge tubular steel welded directly to the seat structure plate. The steel support tube is inserted into a socket molded into the armrest and secured with a screw. Armrests are molded from glass-reinforced nylon. Steel support tube and armcap color matches poly color. Diamond translucent poly has light tone arms; Pewter translucent has flannel arms

Backrest, Seat and Shroud
Injection molded polypropylene.

Backrest Articulation Mechanism
A pair of outer backrest supports formed from 1' diameter tubular steel are inserted into sockets molded into the backrest and secured with screws. The backrest assembly moves over molded thermoplastic slide bushings and is supported by steel coil springs. This mechanism allows the backrest to move through 15 degrees of movement, about an axis of rotation that is through the hips of the occupant.

Optional Upholstered Seat and Back
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness and back foam is nominal 1/2" thickness. The fasteners that attach the back pad are color-matched to the polypropylene.

Base
26" injection-molded, glass-reinforced, nylon 5-blade base. A single paddle under the seat operates the height-adjusting pneumatic cylinder. Standard chair base and cylinder available in black or warm grey. Standard stool base available in black or warm grey. Standard stool cylinder available in black only. An optional polished die-cast aluminum base is available on both chairs and stools.

Base color selection for black includes; black base, black cylinder and black carpet or hard floor casters.

Base color selection for warm grey includes; warm grey base, warm grey cylinder and warm grey carpet casters. Stool cylinder is always black.

Base color selection for polished aluminum includes; polished aluminum base, black cylinder and black carpet or hard floor casters.
Hard floor casters are black only.

Casters
Casters are double-wheel, high-impact thermoplastic available with hard (warm grey or black) or soft (black only) wheel surface.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

Design
Designed by Giancarlo Piretti and manufac-tured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

Whatever you imagine, whatever you require. KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating information can be found here.

Customer's Own Material ■

Specifications Form
January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

Wood Frame
Seat frames are constructed of 3/4" laminated hardwood plywood that is CNC cut with 5/4 maple cross rails. Ottomans are constructed of 3/4" laminated hardwood plywood. All mainframe joints are nailed and glued. Stress points are further reinforced with the use of glue blocks that are stapled or screwed in place. Plywood is assembled with notch and pocket type connections.

Sled Base
All legs are constructed of 1" O.D. x 16-gauge round steel tubing welded to 14-gauge steel mounting plate and secured to the frame with 16 #10 x 1.5" steel pan head wood screws. Optional glides are a nylon press-fit to the underside of the metal tubing.

Seat and Back
The seat is constructed with stretch strap webbing, inner woven and stapled into position. Both seats and backs are covered with a layer of reinforced non-woven fiber (FLW) on top.
The back foam has a density of 1.5 and compression of 26 lb. foam that is 3" thick and countour cut for consistency. The seat foam is 6" thick with a density of 2.5 and compression of 45 lb. A .5" super soft wrap covers the front and top of the seat.

Backrest Supports
Backrest supports are 1-1/8" O.D. 16-gauge for lounges with laminated transom or 12-gauge steel tubing inserted over 7/8" O.D. 16-gauge steel tubing for all fully upholstered models. Backrest supports are fastened to the wooden lounge frames using 1/4-20 steel bolts into steel threaded inserts.

Plastic Armcaps
Armcap tops and bottoms are 1/8" thick UL-HB rated ABS plastic. Tops are fastened to the bottom halves with screws and anchored to steel arm tubes.

Steel Armcap Support
Supporting either wood or plastic armcaps is 11-gauge steel tubing, 1-1/8" O.D., inserted over 7/8" O.D. 12-gauge steel tubing. The tubing is fastened to the lounge frame using steel 1/4-20 bolts into steel inserts. The arm tube is also supported with the backrest tubes by a steel 12-gauge plate with welded support tubes of 1" O.D. 18-gauge steel.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Overall Dimensions			
Width	13"	26"	20" dia.
Depth	26"	26"	
Height	17"	17"	25-1/2"

Docking Table (H25DT)
The docking tablet top is .035 thick high-pressure laminate over 1-1/8" thick particle board and 10mm x 20" O.D. phenolic paper tube with .04 thick phenolic backer underside. Steel base is 20" O.D. formed "disk" 1/16" thick with 1/4" thick steel plate counter weight. Table column is 6" O.D. 14-gauge steel welded to 12-gauge spider plate for mounting.

Gangers
UL HB rated nylon hooks and glass filled nylon pegs are mounted to 14-gauge steel plates with thread locking screws and steel inserts. The ganging plate assemblies are mounted to the wood frame using 1-1/2" #10 wood screws.

Electrical Wire Routing Conduit
Polypropylene extrusion 1-5/8" x 1" cut to length is fastened to the underside of any lounge product with wood screws.

Tablet Support
The worksurface is supported from the chair frame by formed, welded 1-1/8" O.D. 12-gauge steel tubing with a die cast aluminum gusset, black powder-coat paint finish applied. A drilled and tapped 1/2" thick steel plug is welded into the pivot end of the 1.125" dia. support tubing. The die cast gusset is fastened to the tube plug with a Grade 5, 3/8-16 steel bolt with epoxy patch. The die cast gusset and pivot joint provides 154° of free rotation for the tablet.

Tablet Surface Mechanism
The gusset die casting rotates about the steel support tube by means of plastic bushing connection. The worksurface slides back and forth a total of 6" of straight motion. The sliding motion is accomplished with an aluminum extruded rail and plastic bushing mechanism.

Laminate - Tablet
The laminate worksurface is 18mm thick Baltic birch plywood core with .040" laminate face and .020 phenolic paper backing sheet. The edge of the worksurface is sealed with a clear coat lacquer finish.

Laminate - Table
Table panels and top are 15mm thick laminated plywood, .035 thick high-pressure laminate on all sides and top. Panels are secured together using glued joints, staples and wood screws.

Laminate - Lounge Transom
.035 thick high-pressure laminate over 15mm thick plywood. All joints are glued and stapled or nailed for strength.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base and upright finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select ganging option.

HNG	- No gangers
HWG	- Ganging; add $75

Two ganging assemblies shipped per unit.

Ⓕ Select privacy screen attachments.

NPSA	- No privacy screen attachments
WPSA	- Privacy screen attachments (privacy screen ordered separately)

Ⓖ Select glide option.

NGL	- No glides
GNY	- Nylon glides (black); add $6

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

OPTIONS

Sled Glide Option
To order sled glides (polycarbonate), add /SG to the end of the model number and add $6.

NOTE

Units with privacy screens are unable to be ganged in a back-to-back configuration.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base, upright, and arm tube finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

PAC	- Poly armcaps

Ⓕ Select armcap top color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select arm bottom poly color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select ganging option.

HNG	- No gangers
HWG	- Ganging; add $75

Two ganging assemblies shipped per unit.

Ⓘ Select tablet arm color.
Refer to the **Product Color Options** page in this price list.

Ⓙ Select privacy screen attachments.

NPSA	- No privacy screen attachments
WPSA	- Privacy screen attachments (privacy screen ordered separately)

Ⓚ Select glide option.

NGL	- No glides
GNY	- Nylon glides (black); add $6

OPTIONS

Sled Glide Option
To order sled glides (polycarbonate), add /SG to the end of the model number and add $6.

MOISTURE BARRIER UPCHARGE

To order with moisture barrier add /MB to the model number and add upcharge.

NOTE

Privacy Screens
Units with privacy screens are unable to be ganged in a back-to-back configuration.

Tablet Arms
Left-facing and right-facing tablet arms cannot be ganged tablet side to tablet side because the tablet arms will interfere with each other.

Information

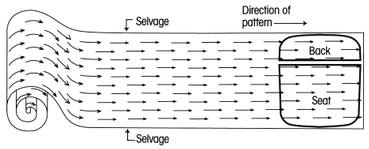
Ordering COM, COL and COV
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

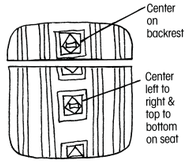


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Please see information below and check the appropriate box.

General Information

Task Chair (KI62/JR39)

Sled Base Chair (KI60S)

Stool (KI63)

Features			
Free-floating back	•		•
Seat slide	•		•
Back height adjustable	•		•
3 position back lock	•		•
2-1/2" thick foam cushioned seat	•	•	•
General Dimensions			
Seat width	20-1/2"	20-1/2"	20-1/2"
Seat depth	18"	18"	18"
Seat height	17-3/4" - 22-1/4"	18"	22-1/4" - 30"
Back width	20"	20"	20"
Back height (above seat)	19-1/2" - 22-1/2"	21"	19-1/2" - 22-1/2"
Overall Dimensions			
Width	26"	24"	26"
Height	37" - 45""	38-1/2"	43-1/2" - 56-1/2"

4D T-Arm (JR69)

Adjustable T-Arm (JR39)

Fixed Loop Arm (KR48)

Adjustable Loop Arm (KR72)

SPECIFICATIONS

Mechanism (KI62 and KI63)
A stamped steel dual housing forms a sturdy cradle for the seat. There are two control levers. One lever actuates the pneumatic cylinder, which adjusts the seat height with infinite selection within the range (KI62). One lever locks the chair in several positions or actuates the free-floating mode. The synchronized 2:1 free floating mode has adjustments of 8° on seat and 16° on back.

Backrest (KI62 and KI63)
The injection molded plastic board has embedded inserts for mounting. The board is covered with contoured molded high-resilient foam and upholstered with fabric. A textured black shroud covers the rear side. An easy-to-operate mechanism is installed on the back board for adjusting the back height (3").

Backrest (KI60S)
The injection molded plastic board has embedded inserts for mounting. The board is covered with contour molded foam and upholstered with fabric. A textured black shroud covers the rear side.

Seat (KI62 and KI63)
Constructed of a 1/2" thick, saddle shape plywood with 2-1/2" molded high-resilient foam and upholstered with fabric. The entire seat assembly is mounted to the mechanism by four screws.

Seat (KI60S)
Constructed of a 1/2" thick, saddle shape plywood with 2-1/2" contour molded high-resilient foam, and covered with upholstered fabric.

Seat Slide (KI62 and KI63)
Double spring-loaded: side-mounted, easy-to-use control. Adjustment range of 3.1" (18" - 21.1")

Seat Height (KI62)
In addition to the standard height cylinder whose dimensions are shown above, there are two optional cylinders:
Low Height: 16-3/4" - 19-1/2"
Tall Height: 20-1/2" - 26-3/4"
To select these optional cylinders, please see the "Options" section on the following page.

Memory Foam
Double layer of foam. Molded memory foam is layered over molded, high-resiliency foam. Seat only.

Pedestal Base (KI62 and KI63)
The 26" diameter, five-blade base is made of reinforced nylon. Black only.

Sled Base (KI60S)
The sled base is formed from 1-1/8" diameter, 13-gauge thickness steel tubing. Black only.

Carpet Casters (KI62 and KI63)
The double 55mm diameter black wheels are molded of high-impact thermoplastic and are housed in a high impact frame. Hard floor casters are available.

Fixed Loop Arm (KR48)
Arm is black plastic.

Adjustable Loop Arm Option (KR72)
Black molded urethane armcap. Height adjustment of 2-1/2".

Adjustable T-Arm Option (JR39)
Height adjustment of 4-1/4" and width adjustment of 1-1/2" per side. Arm ships KD (same box as the chair) and must be installed on the chair (no tools required). With arm fully extended out, it's 22" from inside of arm frame to inside of arm frame. (20" from inside of arm pad to inside of arm pad)

4D T-Arm (JR69)
Two-way adjustable width/height. Forward-slanting T-arms with ergonomic, maximum-mobility arm top (button-activated arm pad; 1" lateral, 2" forward and back, and diagonal adjustability.) Adjustable height range of 4.25". Adjustable width range of 1.75" each side. With arms extended all the way out from inside of arm pad to inside of arm pad, it's 20.75".

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1-1/2 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Impress
Attn: C.O.M. Department
1110 S. Mildred Ave
Ontario, CA 91761

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select memory foam.

NF	- No memory foam
MF	- Memory foam (for seat only); add $140

Memory foam for seat only.

Ⓒ Select seat option.

SLD	- Sliding seat

Ⓓ Select back panel.

POLY	- Poly back (standard)
DUB2	- Upholstered back panel; add $105

Ⓔ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

Ⓕ Select upholstery grade/color.
Refer to **ki.com/fabrics**

Ⓖ Select base option.

C	- Carpet casters
S	- Hard floor casters

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for 10 chairs or less with poly back is 1 yard (1-1/2 yds with memory foam) of 54" wide nondirectional fabric; upholstered or FR back, 1-1/2" yards of 54" wide nondirectional fabric. For orders of 11 or more chairs and for complete information on ordering C.O.M., see "Ordering C.O.M., C.O.V. and C.O.L." section.

OPTIONS

Optional Seat Height
The Task chair has 2 additional seat height options.

To select Low Height (16-3/4" - 19-1/2"), add CYL4 to the end of the model number.

To select Tall Height (20-1/2" - 26-3/4"), add IPCYL6SHD to the end of the model number.

Note: No additional leadtime or upcharge required.

OPTIONS

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, add the following upcharge:

Model=No Arm
Added List Price=$178

FR is also available on models with the Adjustable T-arm (JR39 arm). See Models KI62/FR39 and KI63/FR39 for pricing.

When FR version is ordered, the plastic back panel is upholstered (add upcharge). For C.O.M. yardage, see "C.O.M. Upholstery" note.

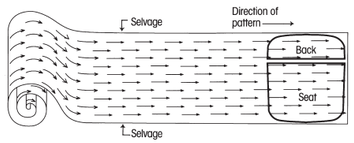
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months, if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

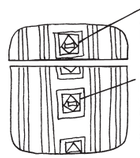

Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

4D T-Arm (JR69)

Adjustable T-Arm (JR39)

Fixed Loop Arm (KR48)

Adjustable Loop Arm (KR72)

SPECIFICATIONS

Mechanism (KI74, KI75 and KI78)
Stamped steel dual housing forms a sturdy cradle for the seat. There are two control levers. One lever actuates the pneumatic cylinder. One lever locks the chair at several positions or actuates the free-floating mode. The synchronized 2:1 free-floating mode has adjustments of 8° on seat and 16° on back.

Backrest (KI74, KI75, KI78 and KI71S)
Nylon with fiberglass reinforced frame. Back mesh material is polyethylene elastomeric with polyester.

Back Height (KI74 and KI75)
An easy-to-operate mechanism is installed on the back board for adjusting back height 3".

Headrest (High Back)
Headrest is black leather with adjustable height and angle.

Seat Slide (KI74, KI75 and KI78)
Double spring-loaded: side-mounted, easy-to-use control. Adjustment range of 3.1" (18" - 21.1").

Seat (KI74, KI75 KI78 and KI71S)
Constructed of a 1/2" thick, saddle-shaped plywood with 2-1/2" thick, molded, high-resilient foam and upholstered. The entire seat assembly is mounted to the mechanism by 4 screws.

Seat Height (KI74 and KI78)
In addition to the standard height cylinder whose dimensions are shown above, there are two optional cylinders:
Low Height: 16-3/4" - 19-1/2"
Tall Height: 20-1/2" - 26-3/4"
To select these optional cylinders, please see the "Options" section on the following page.

Memory Foam
Double layer of foam. Molded memory foam is layered over molded, high-resiliency foam. Seat only.

Base (KI74, KI75, and KI78)
26" diameter, five-blade reinforced nylon base. Black only.

Sled Base (KI71S)
Sled shape, 1-1/8" diameter steel tube of 13-gauge steel. Black only.

Carpet Casters (KI74, KI75 and KI78)
The double 55mm diameter black wheels are molded of high-impact thermoplastic and are housed in a high-impact frame. Hard floor casters are available.

Adjustable T-Arm (JR39)
Black molded urethane armcap. 4-1/4" of height adjustment and 3" of total width adjustment. Arm ships KD (same box as the chair) and must be installed on the chair (no tools required). With arm fully extended out, it's 22" from inside of arm frame to inside of arm frame. (20" from inside of arm pad to inside of arm pad)

Adjustable Loop Arm (KR72)
Black molded urethane armcap. Height adjustment of 2-1/2".

4D T-Arm (JR69)
Two-way adjustable width/height. Forward-slanting T-arms with ergonomic, maximum-mobility arm top (button-activated arm pad; 1" lateral, 2" forward and back, and diagonal adjustability.) Adjustable height range of 4.25". Adjustable width range of 1.75" each side. With arms extended all the way out from inside of arm pad to inside of arm pad, it's 20.75".

Fixed Loop Arm (KR48)
Arm is black plastic.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1-1/2 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test sample must be sent to:

Impress®Ultra
Attn: C.O.M. Department
1110 S. Mildred Ave
Ontario, CA 91761

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select memory foam.
- **NF** - No memory foam
- **MF** - Memory foam (for seat only); add $147

Memory foam for seat only.

Ⓒ Select seat option.
- **SLD** - Sliding seat

Ⓓ Select headrest.
- **NH** - No headrest (standard)
- **HR** - Headrest; add $215

Ⓔ Select back panel.
- **BL** - Black

Ⓕ Select upholstery grade/color.
Refer to **ki.com/fabrics**

Ⓖ Select base option.
- **C** - Carpet casters
- **S** - Hard floor casters

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for less than five chairs is 1 yard (1-1/2 yds with memory foam) of 54" wide nondirectional fabric. For five or more chairs, it is 3/4 yard of 54" wide nondirectional fabric. For complete information on ordering C.O.M., see "Ordering C.O.M., C.O.V. and C.O.L." section.

OPTIONS

Optional Seat Height
The Task chair has 2 additional seat height options.

To select Low Height (16-3/4" - 19-1/2"), add CYL4 to the end of the model number.

To select Tall Height (20-1/2" - 26-3/4"), add IPCYL6SHD to the end of the model number.

Note: No additional leadtime or upcharge required.

Instruct® Classroom Furniture
Specifications

All Terrain® Instructor's Desk
Unit is based on a 22" deep x 22" wide and 35-1/2" high storage tower. The tower has three adjustable metal shelves and one laminate rollout shelf at the bottom of the storage unit. At the top of the storage tower is a bowed front, flat landing pad that is made of 3/4" laminate with 74P edge, this surface is raised 3-3/4" above the top of the storage tower with aluminum side grommets with the bow on the user side.

A 1-1/4" thick laminate covered surface with a 74P edge is attached to the side of the storage tower on one end and supported by a 3" diameter support leg on the other end of the unit. There is a perforated partial modesty panel that is suspended from the underside of the surface. This modesty panel covers the area from the storage unit to the support leg.

There are three open grommets and one covered grommet for wire management on the storage tower. One grommet is on the top of the storage unit directly below the one covered grommet on the landing pad. The other two grommets are above and below the worksurface on the inside of the desk unit.

All Terrain® Mobile Instructor's Desk
This unit has an All Terrain® Binder Tower with a bowed radius lectern option. The bow is on the non-user side with the user side being straight with a paper retainer. Also there are four open grommets at the top and bottom of each of the binder's sides. There is a surface that is attached to the side of the Binder Tower and supported on the other end by an All Terrain® Table leg with casters. There is a perforated partial modesty panel that attaches to the leg and the binder tower.

Locks are standard on the Mobile Instructors' Desk with steel doors. Locks are not available on doors with acrylic doors. Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock.

700 Series Instructor's Desk
This unit is identical to the standard 700 Series Desk with the following changes. The desk has a peninsula shaped top that overhangs the desks frame to allow for collaboration with students. The frame of the desk has a 12" deep bookcase that is the end panel opposite the peninsula overhang. The bookcase is 30" or 36" wide, which is the depth of the desktop. This unit is non-handed, there is no left or right, the side with the bookcase can be reconfigured after install should the need arise.

WorkZone Instructor's Desk
The WorkZone Instructors' desk is based on a standard WorkZone square shoe unit that has a worksurface supporting pedestal (BBF configuration) to support the extended side of the square shoe and a cantilevered frame on the other end. The surface is 1-1/4" thick with a high-pressure laminate.

Instruct Teachers Desk with AV Racks

Stand Alone Unit
Unit is based on 22" deep x 22" wide unit with height 44.875". The unit has 1 fixed shelf with 6" of clearance above. The back of the shelf is shortened to allow for wire passage. The landing pad has a ¾" laminate with 74P edge. When specified with a flat landing pad, the arc points towards the user. When a lectern is selected, the arc points away from the user and has a paper retainer on the user side. Units are available with either 3" casters or 3" AT glides. Outriggers are standard on all units.

There are four covered grommets on the shell. 2 per side. All units have a lockable, removable, vented back panel for access to the computer equipment if the rack option is installed.

Locks are standard on all versions and door types. Two break away keys are provided with each lock. Locks are a high security double-bit design.

SPECIFICATIONS

Worksurfaces
Horizontal worksurfaces are constructed of 1-1/8" thick 45# density particleboard with .030 thick high-pressure laminate and .030 thick high-pressure backing sheet. Overall thickness is 1-1/4".

There are three choices of edges offered for InTandem: (74P); Urethane (ME); and Postformed (PL).

Grommets are standard 5-3/4" x 2-1/4" and have a flip-up receding door. Grommets are the same size as PowerUp modules to allow for retrofitting.

Dual-Door Beam
Lay-in access to data cables from the back side of the desk. Access to power and data cables is also available from the front. Beam doors are constructed of .06" thick dual durometer extrusion and pivot at the bottom. Electrical trough is constructed of 16-gauge formed steel. Openings on the back have a 16-gauge steel removable outlet cover. With hard-wire power, the top raceway is covered by a 20-gauge formed steel cover with holes for simplex receptacles. Wiring and connections are supplied by the electrician.

Data trough is constructed of 16-gauge steel. Terminated end of data cables snap into prepunched holes in the data trough. Multiple data plates also snap into the data trough. The customer provides data jacks and data plates. An optional data cover can be specified to cover the data trough. Data cover is constructed of 24-gauge steel. Standard ABS plastic beam end caps enclose the wires on end-of-run and stand-alone beams. Middle and corner middle beam assemblies do not include end caps.

Legs
All legs have vertical wire management capabilities. A reversible vertical wireway is standard on each leg. Steel trim with liquid-tight fittings are available for power infeeds at the bottom of any leg. All legs can be retrofitted in the field. All "C" legs can be used as either end legs or shared legs. "C" legs are used when connecting tables in a row. Vertical leg tube is 2" x 5", 14-gauge formed steel. Nylon glide under toe casting can be adjusted vertically 1/2".

Corner Worksurface Support Leg
Square-shaped leg for transitional corner surface is 2" x 2", 14-gauge steel. One leg is required per worksurface. Wire management is not available on this leg.

PowerUp
PowerUp is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed. PowerUp is UL Listed (UL1363) as a Temporary Power Tap.

The PowerUp module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-VO minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer.

The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with either a 22", 108", or 180" cord and 3-prong plug.

10-Wire Pre-wired Harness
The wiring configurations of the 810-wire systems are as follows: 622-Six hot conductors (12-gauge), two neutral conductors (10-gauge) and two grounds (12-gauge). System provides four 20 amp, 125 volt capacity circuits. All receptacles are rated at 15 amps, 125 volt capacity. Connection diagrams are available. Pre-wired harness plugs into the adjacent table harness for table reconfiguration.

10-Wire Harness - T-Shaped
10-Wire electrical harness of galvanized steel is available for T-shaped configurations. Available for 24", 30" deep worksurfaces.

10-Wire Harness - Back-To-Back
10-Wire electrical harness of galvanized steel is available for back-to-back configurations. Available for table widths 36" and wider.

End-of-Run Beam - NY 10-Wire Infeed
The City of New York 10-Wire Infeed uses a power infeed table beam supplied with a service entry box. Box is 2.25 cubic inches for each of the 10 wires entering from source and leaving to pre-wired harness system. Includes steel trim plate with dual holes for electrical and data entry and six feet of liquid-tight flexible conduit .83 diameter.

Communications Circuitry
Data connectors and wiring must be ordered separately by the customer.

Privacy Screens
Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with edging. Available in three heights with a straight top edge.

Divider Screens
Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with edging. Available in three heights with a curved top. Dividers are available only in conjunction with privacy screens.

Wheelchair Accessible Kit
Made of 11-gauge steel. Designed for easy retrofit of existing InTandem units. Available in widths of 42" through 72" and in 29" height to make the overall surface height 32". Standard to fit 30" deep worksurface and the support arms.

*Note: Wheelchair kits for 42" wide tables can only be used when at least one of the legs of the ADA table are in the shared position (one leg shared with an adjoining table).

UL Listing
The InTandem Table System is Listed to applicable UL Standards and requirements by Underwriters Laboratories, Inc. Two of the Standards used to evaluate InTandem Table Units are UL 1286, Office Furnishings and UL 723, Standard for Test for Surface Burning Characteristics of Building Materials.

Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
PL	- Postformed edge
ME	- Urethane edge

Ⓒ Select top power feed.

N	- No power
L	- Left power
R	- Right power

Ⓓ Select number of PowerUp modules.

0	- No PowerUp module
1	- One PowerUp module; add $134
2	- Two PowerUp modules; add $269

Ⓔ Select PowerUp module/grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Ⓓ Select number of power modules.

0V	- No power module (two metal Villa grommets only); add $177
1V	- One Villa module w/USB and grommet and one Villa grommet; add $514
2V	- Two Villa modules w/USB and grommets; add $851
0C	- Cutouts only-for single circuit use (grommet not included)

Ⓔ Select power module/grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.
