HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

SPECIFICATIONS

Tops
1-1/8" thick high-density particleboard core with a .030 thick high-pressure laminate top and .028 thick phenolic backing sheet. Round vinyl T-mold edge. Generous 2" corner radius helps prevent sharp projections. Tops are pre-drilled.

Adjustable-Height Legs
1.04" x 1.79" OD 15-gauge elliptical steel tube welded to a heavy 11-guage steel plate. Top section of leg powder coat finish. Hybrid powder coating is electro-statically applied. Finish is chemical-resistant, hard, tough and mar-resistant. Telescoping lower section of 0.85" x 1.60" OD 15-gauge elliptical steel tube in bright chrome finish; locks with 1/4" screw in 1" increments in a 22"-32" height range. Legs fasten to top with #12-1" long Phillips head screws.

Glides
Swivel type adjustable glide with non-marring floor contact insert. Glide has 3/4" adjustment range.

Book Box
Optional solid, molded thermoplastic polypropylene book box installs quickly to underside of the top with #12-1" Phillips head screws. Translucent finish helps provide safe environment while allowing for some degree of personal privacy. Molded-in pencil tray keeps items conveniently inside book box within easy reach, not on the floor or in the back of the book box. Measures 15" wide, 14" deep, and 4" high.

Book Bag Hook
Optional book bag hook formed from 1/4" solid wire rod quickly installs to underside of the top with #12-1" Phillips head screws. Chrome finish provides long lasting wear resistance.

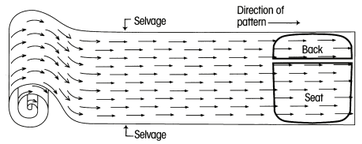
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to uphol ster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

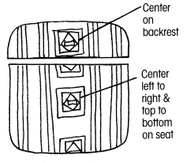


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Shell
One-piece contoured shell made of static-free, high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength. Textured front and back. Wide, ergonomic handle molded into chair back for ease of mobility. Fastens to frame with six screws. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the back and seat and fastened to an inner shell with screws.

Frames

Cantilever Chair, 4-Leg Chair, 4-Leg w/Casters, Music Chair, and Cafe Stool
.75" x 1.5" O.D. x 15-gauge elliptical steel tubing welded to a 14-gauge steel plate. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete.

Task Chair and Stool
The frame is constructed of a 12-gauge base plate powder coated black with a lever-activated pneumatic cylinder for seat height adjustment. Availble with a seat tilt mechanism on armless chairs only. Tilt mechanism includes a tension adjustment knob and a tilt lock on the seat height adjustment lever.

Book Rack (under seat)
External framework of 5/16" diameter solid wire rod attached to the chair frame with 4 screws. Cross braces of 5/16" diameter solid wire rod welded between the external framework. Book racks offered assembled at factory (cartoned "CTN" only). Chairs with book racks cannot stack and do not include stacking bumpers. Chrome only.

Glides
Swivel type polished zinc-plated steel, nylon, or felt Solo glides available. (Note: Felt Solo glides will increase the height of the product by 1/4".) Refer to the Glide Selection Guidelines for recommendations by floor type.

Glides - Task Chair and Stool
Adjustable molded, high-impact plastic glides.

Casters - Task Chair, Task Stool, and 4-Leg Chair w/Casters

Carpet Casters
Double wheels of high-impact thermoplastic. High-impact plastic frame. Black finish only.

Hard Floor Casters
Double wheels of soft plastic. High-impact plastic frame. Black finish only.

Pneumatic Height Adjustment - Task Chair and Stool
Lever-activated pneumatic cylinder enables seat height adjustment from 16-1/2" to 21-1/2" (large chair), 14" to 16-1/2" (medium chair), and 20-1/4" to 30-3/4" (stool).

Base

Task Chair
24" injection-molded, glass-reinforced nylon 5-blade base.

Task Stool
26" injection-molded, glass-reinforced nylon 5-blade base.

Armrest - Task Chair and Stool
A tubular steel frame supports self-skinning urethane armrests. The support is bolted to the seat underside. Armrest paint color and top pad are always black. (Field installable)

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Product Modification Request.

Book Box and Book Rack Disclaimer
Book boxes or book racks on desks reduce leg clearance. The next larger size desk or an adjustable leg desk may be a better solution.
Prior to ordering, KI recommends reviewing a sample of the desk with students in the appropriate demographic.

Chair Handle Hole Dimensions		
	Width	Height
Small	3.0"	1.0"
Medium	3.5"	1.1"
Large	3.7"	1.2"

Package Code Explanation
PLT:Pallet – Product is protected, banded to pallet and stretch wrapped.
RCK:Racked – Product is protected, banded to wooden rack and stretch wrapped.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

Whatever you imagine, whatever you require. KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating information can be found here.

Fabric is upholstered over 9/16" foam on the back and seat and fastened to an inner shell with screws.

Frames

Double Entry Desk
0.75" x 1.5" O.D. x 15-gauge elliptical steel tubing welded to a 14-gauge steel plate. Frame shall be powder coated after all welding processes are complete.

Fixed Height - 4-Leg Desk and Trapezoid Desk
0.75" x 1.5" O.D. 15-gauge elliptical steel tubing welded to a heavy 11-gauge steel plate. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete. Legs fasten to top with K50 2.24 x 13mm Torx head screws.

Fixed Height - Cantilever Desk and Two Student Desk
0.75" x 1.5" O.D. 15-gauge elliptical steel tubing welded to a heavy 11-gauge mounting bracket. Frame shall be duplex nickel chrome plated or powder coated after all welding processes are complete. Frames fasten to top with K50 2.24 x 13mm Torx head screws.

Adjustable Height - 4-Leg Desk, Trapezoid Desk, Tripod Desk, and ADA 4-Leg Desk
1.68" x 0.99" OD 17-gauge elliptical steel tube welded to a heavy 11-gauge steel plate. Top section of leg powder coat finish after all welding processes are complete. Telescoping lower section of 0.75" x 1.5" OD 15-gauge elliptical steel tube in bright chrome finish; locks with 1/4" screw in 1" increments in a 22"-34" height range. Legs fasten to top with K50 2.24 x 13mm Torx head screws. Tripod desks have a 7/16" diameter steel wire crossbrace welded to the 3 legs.

Adjustable Height - Cantilever Desk, Sit/Stand Desk and ADA Cantilever Desk
0.75" x 1.5" OD 15-gauge elliptical steel tube welded to a heavy 11-gauge steel mounting bracket. Telescoping lower section in bright chrome finish; locks with 1/4" screw in 1" increments. Adjustable height range is 24"-30", Sit/Stand height range is 29"-41"and ADA height range is 28"-34". Legs fasten to top with K50 2.24 x 13mm Torx head screws.

Book Basket (under desk)
Chrome plated 7mm dia. solid steel wire attached to underside of top with eight K50 2.24 x 13mm Torx head screws.

Book Box (under desk)
Molded thermoplastic polypropylene installs quickly to underside of the top with six K50 2.24 x 13mm Torx head screws. Translucent finish helps provide a safe environment while allowing for some degree of personal privacy. Molded-in pencil tray keeps items conveniently inside book box within easy reach, not on the floor or in the back of the book box.

Book box for Cantilever and Two-Student desks measures 16"Dx x 19-1/2"W x 3-1/2"H and is available in 5 standard poly colors plus translucent. The book box for 4-Leg desks measures 14'D x 16"W x 4"H and is available in translucent only.

Book Bag Hook
1/4" solid wire rod quickly installs to underside of top with two K50 2.24 x 13mm Torx head screws. Chrome finish provides long lasting wear resistance.

Glides
Swivel type polished zinc-plated steel, nylon, or felt Solo glides available. (Note: Felt Solo glides will increase the height of the product by 1/4".) Refer to the Glide Selection Guidelines for recommendations by floor type.

Top

Cantilever Desk, 4-Leg Desk, Tripod Desk, and Double Entry Desk
Solid, molded thermoset plastic with pencil groove or high-density particleboard core covered with .03" high-pressure laminate top and .02" phenolic backing sheet and 73P polypropylene edge. Worksurfaces shall have comfort curve on user side and 2-3/8" radius corners. Hard plastic top is 5/8" thick and the laminate top is 3/4" thick. Rectangle tops measure 19" x 26" and the trapezoid tops measure 20-1/2" x 32". Linear Tripod tops measure 27-2/5" x 27-2/5" x 36-5/8".

ADA tops measure 36-1/2" x 20" and the hard plastic ADA tops do not have a comfort curve or pencil groove.

Two Student Desk top measures 19" x 60" and is only available in 3/4" laminate. Two Student Desk has two comfort curves.

Contour Tripod Desk top measures 30-1/2" x 31-3/8" x 37-1/5" and is only available in 3/4" laminate.

Cantilever and 4-Leg Desks have choice of curved or straight front hard plastic top. Straight front tops are recommended when desks are back to back or when stacking flat on the desk is a requirement.

Intellect Wave® Classroom Furniture
General Information

General Guideline for Glide Selection

The following information is based on a combination of testing and experience. Due to factors beyond our control, KI is presenting this information strictly as a general guideline to assist our customers in selecting the best glide for their situation. It is up to the customer to determine which glide will perform best for their application based upon their site conditions, requirements, and the direction of the flooring manufacturer. Sample glides are available upon request to aid the customer in their selection (contact Customer Service).

Price list glide choice of: Nylon, Steel or Felt

Nylon

Steel

Felt - Solo Glide®

PERFORMANCE GUIDE (clean and properly finished floors)

GLIDE MATERIAL	CARPET	RESILIENT FLOORING			HARD FLOORING		
		Vinyl Sheet	VCT	Rubber	Ceramic Tile	Concrete	Hardwood
Nylon	★★	★★	★★	★★	★★	★★	NR
Steel	★★	★	★	★	NR	NR	NR
Felt	NR	★	NR	NR	NR	NR	★★

★★ = Best Performance ★ = Acceptable Performance NR = Not Recommended
Steel glides are not recommended for light colored floors.

The following factors affect the performance of any glide:

- Floor Quality – Materials and manufacturing processes for a specific floor type can vary considerably depending upon the manufacturer and product grade. Floor grades with higher stain and abrasion resistance will typically perform better.
- Floor Preparation – The quality and frequency of application of the floor finish will significantly affect the amount of wear. A high quality finish will act as a lubricant between the chair and floor to minimize wear.
- Floor Maintenance – Any glide material will leave marks if the floor is not properly cleaned. The use of walk-off rugs near entrances, along with frequent cleaning of the floors, will significantly reduce damage to floors. Steel glides should not be exposed to wet or damp floors.
- Damaged Glides – Periodic inspection of glides is critical to preventing floor damage. Glides that are damaged, worn or have embedded debris should be replaced immediately. Felt caps wear faster and should be replaced frequently.

Lounge Seating 7

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:
KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

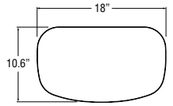
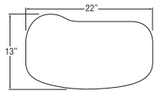
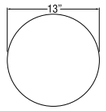
Tablet Arm Options



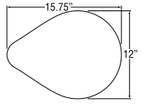
Bowfront Tablet



Standard Jessa Tablet



Standard Teacup Tablet



Teardrop Tablet

Tablet Arm
Tablets are available in left-facing (right-handed) LFT, or right-facing (left-handed) RFT as specified in the product model number. Chairs will be produced as standard left-facing, unless specifications and model specified on purchase order calls for right-facing. For tablet options and specifications, refer to table specifications. Tablets are removeable as standard. See product color page for specific finish selections avaliable on each tablet type.

Tablet Arm Options
All tablets can be done on any tablet chair except RELAX.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood armcaps.

NWA	- No wood armcaps
WA	- Wood armcaps (per pair); add $291

Ⓔ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

Ⓕ Select casters.

NCST	- No casters
FCST	- Front casters; add $146
RCST	- Rear casters; add $146
FRCST	- Front and rear casters; add $291

Available on chairs only.

Ⓖ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See pricing column for TB133 upcharge.

Ⓗ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

Construction
Frame constructed of kiln-dried hardwood and laminated wood veneer. Cushioning of multiple densities of polyurethane foam and Dacron fiber. Attached back, loose seat reversible in fabric.

Semi-Attached Cushions
Seat cushions may be permanently attached but require a Product Modification Request. Upcharges and/or additional lead time may apply. Contact Customer Service.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood armcaps.

NWA	- No wood armcaps
WA	- Wood armcaps (per pair); add $291

Ⓔ Select wood feet/armcap finish.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

Ⓕ Select casters.

NCST	- No casters
FCST	- Front casters; add $146
RCST	- Rear casters; add $146
FRCST	- Front and rear casters; add $291

Ⓖ Select tablet type.

RA	- Removable arm (standard)
NR	- Non-removable arm; add $30
AT	- Articulating arm; add $50

Ⓗ Select tablet connection hole cover.

NTP	- No tablet hole cover
TP	- Tablet hole cover; add $70

NTP is automatically selected if Non-removable Arm (NR) is chosen.

Ⓘ Select veneer color.
Refer to the **Product Color Options** page in this price list.
Tablet edge color matches veneer top.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

5643/FC	$71
5613T/FC	$71

INFORMATION

Moisture Barrier	$196
TB133	$555

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

Tablet Arm
Tablet is left facing (right-handed) - standard. Tablet is figured laminated wood veneer bowfront - standard. Available in all standard KI wood finishes - specify. For tablet options/specifications, refer to table specifications. Talent is removable - standard. Chair will be produced with left facing/right handed tablet unless reverse is specified.

Construction
Frames of kiln-dried hardwood and laminated wood veneer. Cushioning of multiple densities of polyurethane foam and Dacron fiber. Attached back, loose seat reversible in fabric.

Semi-Attached Cushions
Seat cushions may be permanently attached but require a Product Modification Request. Upcharges and/or additional lead time may apply. Contact Customer Service.

Customer's Own Material ■

Specifications Form
September 2021

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
Attn: COM Fabrics
6892 Marlin Circle
La Palma, CA 90623

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC REPEAT	INCREASE COM REQUIREMENT BY:
4.75" and under	0%
5" - 10.75"	12%
11" - 15.75"	18%
16" - 20.75"	25%
21" and over	40%

For upholstery fabrics that are less than 54" wide, please contact customer service for additional yardage(s) requirements. Specific models and quantities will determine final yardage amounts.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

Seat Width	22.5”	46”
Seat Depth	18”	18”
Seat Height	18”	18”

TECHNICAL SPECIFICATIONS

Interior Frame Construction

Interior frame and arms are constructed of $^{3}/_{4}$” thick, engineered hardwood. All inner frame components are CNC-machined (computer numerical control) to maintain accuracy of part dimensions and also to ensure that all connection joints are engineered to interlink with the other hardwood components. All joints are glued with poly vinyl acetate adhesive and further secured with $1^{3}/_{4}$” adhesive staples and 3” long #10 wood screws. The corner sections of the frame are reinforced with corner braces that are glued and screwed into position.

Seat Construction

The seat utilizes upholstery springs that are affixed to the seat’s machined-frame. A decking material is stapled over the springs to provide a barrier between the foam cushion and the structural components. The seat cushion is 5” thick high resilient (HR-36) and comprised of a 2.1 lb density, high-resilient polyurethane foam.

Back Construction

The inside back of the lounge unit utilizes upholstery straps that provide the contour of the inside back as well as supporting product comfort. Straps are covered with a webbing which allows separation from the foam cushion. The back foam is 2” thick high-resilient (180-24) polyurethane and comprised of 1.88 lb weight density that is shaped to the contour of the frame.

The outside portion of the unit utilizes the same webbing to maintain a smooth consistent shape around the perimeter. A 2” thick piece of polyurethane foam is glued to the webbing to form the padded interior.

Upholstery

Upholstery is available in non-contrasting or contrasting options on all models. When contrasting is chosen, the contrasting fabric will be applied to the seat cushion(s) as standard. A variety of KI In-Grades, Pallas, and COM/KOM materials have been approved for use on the Jubilee product line.

Legs

Legs are custom fabricated steel and are affixed to the plywood frame with hardened bolts (2 per leg) and threaded inserts. Steel legs are available in chrome, or a variety of KI standard paint colors.

Glides

All glides are adjustable with $^{1}/_{2}$” of adjustment. Glides can be selected in plastic, non-skid, or felt. The hardness of plastic glides with high-density polyethylene glide surface is 90-95 durometer, while the hardness of the non-skid, PVC glide surface is 85 durometer. Reference Jubilee Lounge Seating - Glide Selection Guidelines (KI-PG-000027) for information on glide selection.

Jubilee™
General Information

Electrical System Options

Byrne Mini-Tap® Power Module with 3-Prong Plug
Gladly lounge seating can be configured with optional Byrne Mini-Tap® power modules with 3-prong plug (a self-contained, UL listed single relocatable power tap). One 15-amp, 125 volt AC simplex receptacle and two 2.1-amp, 5 volt DC USB Type A connector ports (2.0 and 3.0 compatible, no data), provide connection for device charging or direct AC power. Byrne Mini-Tap power module is standard with 72" long, 14 AWG, 15-amp NEMA rated 3-conductor SJT cord with a three-prong grounded plug. Power modules available in black or white. Cord is black.

One Byrne Mini-Tap® power module with 3-prong plug is available per model, and may be configurable for front power outlets. Power is routed at the back of the lounge unit with plastic cord managers that mount directly into the wooden frame.

Compliance

This product has been tested according to the Business & Institutional Furniture Manufacturers Association (BIFMA) voluntary standards known as ANSI/BIFMA X5.4-2020 for Public and Lounge Seating, meeting or exceeding all applicable testing requirements of the standard.

This product meets third party certification for Indoor Air Quality as certified by SCS Global Services. The product meets all qualifications for Indoor Advantage Gold, the highest standard which conforms to the ANSI/BIFMA Furniture Emissions Standard (M7.1/X7.1-2011 R2016) and ANSI/BIFMA e3-2019 (Credits 7.6.1, 7.6.2) for seating parameters.

Information

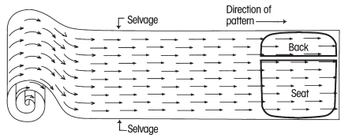
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

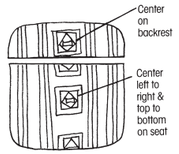


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test sample must be sent to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Katera™
General Information

subtle curves and sophisticated style

A. Backrest and seat are designed to follow the curves of the human body, creating built-in contours that fit the user.
B. Seat and back available in polypropylene, wood or upholstered.
C. Waterfall front seat edge eliminates pressure points for a long-term sit.
D. Frame is powdercoated steel or chrome for high strength.
E. Arms are polypropylene/glass-reinforced material with a steel insert for maximum strength and support for the user.
F. Arm design provides an open feel and additional room for users of all size.
G. Polypropylene glide is level with the floor to reduce wear. Available in black to complement any design.
H. Retractable ganger mounts to underside of chair frame. Gangs with arms or armless. Field installable.
I. Cafe stools available in 24" and 30" seat heights.

Chair stacks 12-high on dolly and 6-high on floor for easy storage and quick access. Stacks with arms or armless. *Stools do not stack.*

Tested to 350 pound weight rating. 15-year warranty.

Poly Seat & Backrest
The seat and backrest are injected in polypropylene copolymer with 15% foam. The seat and back each include four locations for attachment to the chair frame.

Wood Seat & Backrest
Wood seat and backrest are molded Beech plywood. The seat and back are stained to KI standard specification, then varnished with a UV polyurethane containing and color fading protectant. The seat and back each include four locations for attachment to the chair frame.

Optional Upholstered Seat & Back
Seat foam is molded to a nominal 15 mm thickness, attached to an injection-molded polypropylene liner board, then upholstered using a draw string process. Back foam is a nominal 5 mm thickness and is attached to an injection-molded polypropylene liner. The liner and foam are then inserted into an upholstered cover and secured with heat activated glue. The upholstered backs are finished on the lower edge with a black zipper. Attachment method for the upholstered seat and back is the same for poly seats and backs.

4-Leg Frames
Legs frames are made from 1.9 mm thick tubular D-shaped ($^{3}/_{4}$" x 1") steel. Steel wire and U-channels form the crossmembers. All joints are welded. Aluminum support brackets are inserted in the rear legs and allow the backrest of the chair to be secured. The support bracket hardware is concealed by a polypropylene cap, color matched to the frame paint. When chrome is selected, the caps will be chromed metal.

Café Stool Frames
Café Stool models are available in 4-leg frames, and in 24" and 30" seat heights. Frames are equipped with a reinforcing footring made of 17 mm diameter tube, which is welded to the tubular frame and open in the back. Stool models do not stack.

Frame Finishes
Frames are finished in either powder-coat paint, or bright nickel-chrome plating. The aluminum back supports are painted to match the frame color and will be polished when chrome plating is chosen.

Arms
Optional armrests are available. The armrests are injection-molded glass-reinforced polypropylene matching the frame finish (when frame finish is Chrome, arm color will need to be specified). The front of the arms include a steel insert for greater strength and method of attachment. The front part of the arms are inserted into the front legs of the chair and secured with screws. The rear part of the arms are inserted into the aluminum backrest support and secured with screws.

Glides
The leg tubes are capped with D-shaped ($^{7}/_{8}$" x $1\,^{1}/_{8}$") polypropylene end cap glides where legs meet the floor. The four caps are different, depending on the leg in which they are inserted, due to the different shape of each leg. Each cap is numbered and includes notches to differentiate their placement. Cap color is always black. Optional felt glides are the same construction as the polypropylene end caps, but include felt plugs where the cap meets the floor. Polypropylene and felt glides are available on both 4-leg and café stool frames.

Gangers
Optional gangers are available. Gangers are retractable, made of chrome-plated steel wire and are mounted to the underside of the chair frame. Gangers are not available on stool frames.

Transport Dolly
Frame construction is welded tubular steel with black powder-coated finish and 5" wheels (two swivel and two fixed). All chair styles stack twelve high on a dolly and six high on the floor. Stool models do not stack.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

UPHOLSTERY INFORMATION

C.O.M. Fabric

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select leg/back support finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select ganging option.

NGG	- Non-ganging
GDV	- Ganging; add $37

Ganging upcharge is per connection.

Ⓖ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See pricing column for TB133 upcharge.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

Construction
Seat and back are 9 ply cross-laminated curved veneer. Cushioning of high density polyurethane foam. Legs and back supports are silver powder coat - standard. Glides are adjustable, brushed aluminum - standard. Attached cushions.

Gangers
Ganging device is 11-gauge steel powder coated black. 3-3/8" wide x 5/8" deep x 1/16" thick. Ganging device is connected to both units by screwing the device into the underside of the bench's wood shell. The screws are included with the ganging device.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select wood finish color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select ganging option.

NGG	- Non-ganging
GDV	- Ganging; add $37

Ganging upcharge is per connection.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
Tufted models are not TB133 compliant.

Construction
Seat and back are 9 ply cross-laminated curved veneer. Cushioning of high density polyurethane foam. Legs and back supports are silver powder coat - standard. Glides are adjustable, brushed aluminum - standard. Attached cushions.

Gangers
Ganging device is 11-gauge steel powder coated black. 3-3/8" wide x 5/8" deep x 1/16" thick. Ganging device is connected to both units by screwing the device into the underside of the bench's wood shell. The screws are included with the ganging device.

Information

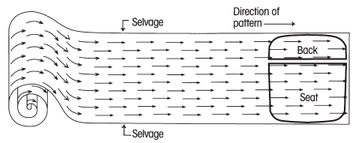
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

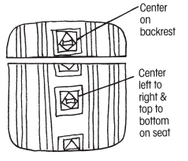


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Frame
Frame shall consist of 14-gauge, 1" O.D. steel tubing bent and welded to a 13-gauge steel stamped seat plate and finished with baked-on powder coated paint. The chair frame shall be topped by two aluminum die castings with a baked-on black powder coated paint finish. Castings support the chair seat and provide a means of rotation of the tablet about the seat.

Shell
Shell swivels a total fo 55º (27.5º each way from center) for ease of entry and exist.

Doni Seat Shell and Backrest Articulation Mechanism
Backrest, seat, and shroud are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers, and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to move through 17 degrees of movement, about an axis through the hips of the occupant.

Doni Optional Upholstered Seat
Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness.

Intellect Wave Shell
One-piece contoured shell made of high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability shall be assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Rolled edges for comfort and strength, textured front and back with a wide, ergonomic handle molded into chair back for ease of mobility. Fastens to frame by a 12-gauge formed steel plate with six torx head screws. Optional upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the seat and fastened to an inner shell with screws.

Strive Shell
Injection molded polypropylene back with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire. Injection molded polypropylene seat shall be secured to the chair by a 12-gauge formed steel plate.

Optional upholstered seats have molded urethane foam attached to an injection molded polypropylene seat board, then upholstered using a drawstring process. The assembled seat pad is attached to the seat by means of hidden fasteners.

With optional cantilever arms, the supporting structure is 7/8" O.D. x 13-gauge tubular steel welded directly to the seat support structure and matching the seat and back color. The armcaps are injection molded glass filled polypropylene matching the seat and back color. The armcaps are attached to the steel structure by means of screws.

Strive Optional Upholstered Seat
Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

Surface Support
The worksurface shall be supported from the chair frame by a formed and welded support tube made from 1.125 O.D. 14-gauge steel. The worksurface shall be supported from the support tube by an aluminum gusset die casting with a black powder coated paint finish. The support tube rotates around the chair seat a total of 220º (110º each way from front center). A 1/2" thick steel plug shall be drilled, tapped, and welded into the end of the support tube. The worksurface shall be structurally secured to the support tube with Grade 5, 3/8-16 bolt, held in place with an epoxy patch.

Surface Mechanism
The gusset die casting shall rotate about the support tube by means of a plastic bushing connection, rotating a total of 154º around the support tube. The worksurface shall slide back and forth for a total of 6" of straight in and out movement. The sliding motion shall be accomplished with an aluminum extruded rail and plastic bushing mechanism.

Surface
Plastic
The writing surface of the plastic worksurface shall be injection molded polycarbonate. The understructure of the plastic worksurface shall be black injection molded nylon with fiberglass reinforcement filling.

Laminate
The laminate worksurface shall be 18mm thick Baltic Birch plywood core with .040" laminate face and .020" paper backing sheet. The edge of the wood surface is shaped and sanded with a sealed and clear-coat lacquered finish.

Accessory Rack
Optional accessory rack is constructed of 14-gauge perforated steel wrapped with .25" O.D. steel wire and welded to the frame. Optional cup holder is made of a .25" O.D. steel wire welded with an 11-gauge flat metal round trim plate to the steel racks. Accessory racks (with or without cup holder) are not field-installable or retrofittable.

Casters
Double wheels (60mm) of high-impact thermoplastic with high-impact plastic frame. Carpet or hard floor casters are black only. Optional Bell glides (2" high) made of high-impact plastic also available, black only.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1441 Ontario Street
Green Bay, WI 54311

Design
Strive is designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

Whatever you imagine, whatever you require. KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating information can be found here.

Frame
Frame consists of 14-gauge, 1" diameter steel tubing bent and welded to a 13-gauge steel stamped seat plate and is finished with baked-on powder-coat paint. The chair frame is topped by two aluminum die castings with a baked-on black powder-coated finish. Castings support the chair seat and provide a means of rotation of the tablet about the seat.

Shell

Dōni®
The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Optional upholstered seat is available. Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness.

Under-seat structure is a die-drawn 12-gauge steel plate. Structure is finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint.

The Doni shell is designed by Giancarlo Piretti.

Intellect Wave®
One-piece contoured shell is made of high-impact polypropylene. Colorfastness ensured through complete color impregnation throughout the molded part. Strength and durability is assured through an engineered internal structural cavity which eliminates the need for unsightly ribs on the back of the shell. Shells have rolled edges for comfort and strength, textured front and back, with a wide, ergonomic handle molded into the chair back. Shell fastens to the chair by a 12-gauge formed steel plate with six Torx screws.

Optional upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over $^{9}/_{16}$" foam on the seat and fastened to an inner shell with screws.

Strive®
Injection molded polypropylene back with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5 mm diameter chrome silicon valve spring wire. Injection molded polypropylene seat is secured to the chair by a 12-gauge formed steel plate.

Optional Upholstered Seat
Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

Optional Arms
When equipped with optional cantilever arms, the supporting structure is $^{7}/_{8}$" diameter by 13-gauge tubular steel, welded directly to the seat support structure, and matching the seat and back color. The armcaps are injection-molded glass filled polypropylene matching the seat and back color. The armcaps are attached to the steel structure by means of screws.

The Strive shell is designed by Giancarlo Piretti.

The chair shell (either option) swivels a total of 55 degrees (27.5 degrees each way from center) for ease of entry and exit.

Learn2® Classroom Furniture
General Information

Surface Support
The worksurface is supported from the chair frame by a formed and welded support tube made from $1^{1}/_{8}$" diameter, 14-gauge steel. The worksurface is supported from the support tube by an aluminum gusset die casting with a black powder-coated paint finish. The support tube rotates around the chair seat a total of 220 degrees (110 degrees each way from front-center). A $^{1}/_{2}$" thick steel plug is drilled, tapped, and welded into the end of the support tube. The worksurface is structurally secured to the support tube with Grade 5, $^{3}/_{8}$-16 bolt, held in place with an epoxy patch.

Surface Mechanism
The gusset die casting rotates about the support tube by means of a plastic bushing connection, rotating a total of 154 degrees around the support tube (77 degrees each way from center). The worksurface slides back and forth for a total of 6" of straight in and out movement. The sliding motion is accomplished with an aluminum extruded rail and plastic bushing mechanism.

Surface
The worksurface measures 13" x $21^{1}/_{2}$" for a writing surface area of 280 square inches.

Plastic
The writing surface of the plastic worksurface is injection molded ABS and includes two pencil grooves and a thumb guide. The understructure of the plastic worksurface is injection molded nylon with fiberglass reinforcement filling. Top surface available in Black, Flannel, or Warm Grey; bottom understructure is black only.

Laminate
The laminate worksurface is 18 mm thick Baltic Birch plywood core with .040" laminate face and .020" paper backing sheet. The edge of the wood surface is shaped and sanded with a sealed and clear coat lacquered finish. KI standard laminates available (see Color Addendum).

Optional Accessory Racks

Accessory Rack (with or without cupholder)
Racks are constructed of 14-gauge perforated steel wrapped with $^{1}/_{4}$" diameter steel wire and welded to the frame. Optional cup holders are made of a $^{1}/_{4}$" diameter steel wire welded with an 11-gauge flat metal round trim plate to the steel racks. Accessory racks (with or without cupholder) are not field installable or retrofittable.

Flat Accessory Rack
Rack is constructed of 16-gauge perforated steel wrapped with $^{1}/_{4}$" diameter steel wire welded to the frame. The rack is reinforced with stiffener channels that are constructed of 14-gauge CRS that are welded to the perforated steel rack assembly. The rack is fastened to weldments on the chair frame using #10-24 x $^{1}/_{2}$" PEM studs, #10-24 hex nuts and lock washers. The flat accessory rack is not field installable or retrofitable.

Poly Bookbag Rack
Rack is constructed of injection molded polypropylene and has a textured finish. It fastens to the chair using four #12 x $^{3}/_{8}$" Truss head screws and has a molded in cupholder and two accessory slots.

Casters and Glides
Casters are double wheels (60 mm) of high-impact thermoplastic with high impact plastic frame. Carpet or hard floor casters, Black only.

Optional Bell glides (2" high) made of high-impact plastic also available, Black only.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface type.

LW	- Laminate worksurface; add $60
PW	- Plastic worksurface

Ⓒ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

Ⓔ Select solid poly color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select outside/inside poly color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select caster/glide option.

C	- Carpet casters
S	- Hard floor casters
GL	- Glides
SCG	- Front hard floor casters, rear glides
CCG	- Front carpet casters, rear glides

Ⓘ Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery

C.O.M. requirement for 10 chairs or less with upholstered seat or upholstered seat and back is 3/4 yard per chair of 54" wide nondirectional fabric. For orders of 11 or more with upholstered seat and back and for complete information on ordering C.O.M. see "Ordering C.O.M., C.O.V. and C.O.L." section.

California TB133 Fire Safety Code

For California Technical Bulletin 133 compliant models, add the following upcharge:
Model=Solid Color, Polypropylene
Added List Price=$13
Model=Solid Color, Upholstered Seat
Added List Price=$81

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface type.

LW	- Laminate worksurface; add $60
PW	- Plastic worksurface

Ⓒ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See Upholstery Information for TB133 upcharge.

Ⓔ Select shell color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select caster/glide option.

C	- Carpet casters
S	- Hard floor casters
GL	- Glides
SCG	- Front hard floor casters, rear glides
CCG	- Front carpet casters, rear glides

Ⓗ Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery

C.O.M. requirement is 5/8 yard per chair for seat of 54” wide nondirectional fabric. For complete information on ordering C.O.M. see “Ordering C.O.M., C.O.V. and C.O.L.” section.

California TB133 Fire Safety Code

For California Technical Bulletin 133 compliant models, add the following upcharge:
Model=Polypropylene
Added List Price=$26
Model=Upholstered Seat
Added List Price=$76

Likha®
General Information

TECHNICAL SPECIFICATIONS

General Information
Likha high-design laminate casegoods create a stylish environment for any workspace. Warm wood grain offers a classic, timeless appeal with the ability to combine metal accents for a uniquely styled workspace. The Likha line includes fixed- and adjustable-height desks, bridges, returns, credenzas, storage, bookcases, and conference room elements.

Construction
Likha Casegoods feature a TFL chassis with a choice of either thermally-fused laminate (TFL) or high-pressure laminate (HPL) top. Units ship assembled unless otherwise noted.

Exposed surfaces are wood grain or solid color laminates fused to a particle-board core. Each laminate offers lasting beauty, superior resistance to normal wear, and easy maintenance.

Tops
Worksurfaces are 1" thick TFL or HPL material with 3 mm matching PVC rims on profiled edges, and 1 mm PVC rims on self-edges. Grain direction runs left to right unless otherwise noted.

Chassis
TFL chassis are fastened by screws and heavy-duty metal fasteners, assuring maximum strength. All desks, non-lateral credenzas, and return units have wire management access from pedestal to kneespace. All units ship with heavy-duty, adjustable leveling glides to ensure proper leveling and compensation for uneven floors.

Drawers
Drawers feature 5-sided construction, allowing for easy removal of drawer fronts. Drawer fronts are 3-ply construction, 3/4" thick with matched grain. Drawer sides, back, and front are wood grain vinyl-wrapped, 1/2" thick. Box and file drawers have 1/8" thick hardboard bottoms, while lateral file drawers feature 1/4" thick bottoms. All drawers feature full extension, progressive-action slides with precision steel ball bearings. Box and file drawers are tested for 100 lb capacity. Lateral files are tested for 200 lb capacity.

Filing
All file drawers are standard with filing systems, designed to accommodate a variety of filing requirements. Letter-width file drawers provide letter filing front-to-back, and legal filing side-to-side. Lateral file draws provide legal or letter filing front-to-back or side-to-side.

Storage
All hinged doors include soft close hinges, unless noted. Constructed of a one-piece hinge and base plate combination. Soft close hinges reduce stress placed on the cabinet when the door is closed and offers a quiet closure. Storage with hinged doors are available with laminate, metallic-framed frosted acrylic, dry-erase and high-gloss acrylic.

Pull Options
Storage with drawers or filing drawers are available with one of five pull options: alcove 5 7/8", arc 5", beam 10 1/4", flair 5 3/8", and quadra 4". Lock core will match silver or black pull color (if applicable, otherwise specify).

Locking
All units with file drawers feature a locking mechanism. Removable lock cylinders allow for units to be re-keyed at a later date, if required. Units are shipped randomly keyed as standard. Keyed alike units are offered at no additional charge and should be specified prior to order submittal. Lock core will match silver or black pull color (if applicable, otherwise specify).

TECHNICAL SPECIFICATIONS

Cable Management
Grommets may be ordered in the tops of all assembled desks, returns, bridges, credenzas, and component worksurfaces. All desks, returns, and credenzas (except lateral pedestals) have standard wire openings from inside the pedestal to the kneespace, allowing quick access to technology below. Additionally, returns, bridge units, kneespace credenzas, and hutch units have standard grommets in back panels. Grommets are also standard in the tops of corner units and extended corner units. Standard grommets are round with a 60.4 mm diameter. Grommets will be black or silver based on pull color selected; for units without pulls, specify black or silver.

Adjustable-Height Cable Management
Adjustable-height single & double pedestal desks, bridges and credenzas are available with a mesh wire management sleeve or box cable manager.

Mesh Cable Management
Mesh wire management sleeve with round worksurface grommet with a 60.4 mm diameter.

Box Cable Management
Rectangular worksurface cutout to accept duo bezel grommet. Cutout size is 154.6 mm x 55.8 mm.

Link 360 Cable Management
Includes fifty sections, one quad connector, one dumbell connector, one foot assembly and two magnetic clips. For use on adjustable-height units up to 51" tall or fixed tables/desks.

Adjustable-Height Mechanisms
Electric-powered adjustable-height mechanisms are offered on select units, come factory installed and must be specified at the time of order. Optional center drawer not available on double pedestal adjustable-height mechanisms. Adjustable-height units come with a standard switch, the memory switch is an option upcharge.

Memory Switch
Memory switch (MSWCH) is an option upcharge offering Bluetooth capability, three stand-up reminder intervals, and four memory height positions.

Media Peninsula
Media peninsula consists of either an anodized aluminum rectangular leg, or arctic silver finish on steel leg. Screen mount may be adjusted by setting rotation limits at 15°, 30°, 45° or 90°. Fits most screen sizes 32"-52"; mounting pattern range: VESA® 100 x 100 mm - 600 x 400 mm with a monitor weight capacity of 125 lb.

Visual Board
Intended for wall installation, includes flip chart, dry-erase markers with eraser and hardware. Tackboard is standard in black fabric. Display rail includes adjustable hooks for flip chart. Writing surface is dry-erase non-glare magnetic porcelain. Optional projection screen adjusts to reveal the dry erase surface.

Freestanding Tables & Bases
Disk-bases available in aluminum or black. X-base available in aluminum only.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface option.
- **TFL** - Thermally fused laminate
- **HPL** - High pressure laminate

Ⓒ Select control switch.
- **SWCH** - Standard switch
- **MSWCH** - Memory switch; add $126

Ⓓ Select worksurface laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select pull option.
- **AAV** - Aluminum Alcove
- **AAC** - Aluminum Arc
- **ABM** - Aluminum Beam
- **AFL** - Aluminum Flair
- **AQD** - Aluminum Quadra
- **BAC** - Black Arc
- **BBM** - Black Beam
- **BQD** - Black Quadra
- **CAV** - Chrome Alcove
- **CFL** - Chrome Flair

Ⓖ Select edge style.
- **Y** - Flat edge

Ⓗ Select worksurface grommet option.
- **NGRM** - No grommet
- **GWS** - Grommet with mesh wire management sleeve; add $121
- **GDUO** - Box with rectangular worksurface cutout to accept Duo bezel, specified separately; add $457
- **GBOX** - Box with center round worksurface grommet; add $457

Ⓘ Select worksurface grommet location.
- **GR** - Grommet right-over pedestal
- **CKS** - Grommet centered between height-adjustable legs

GWS locations are noted above. GRDUO and GMTBOX are located in the center but do not require a location selection.

Ⓙ Select back panel grommet.
- **NBGRM** - No back grommet
- **BGRM** - Back grommet; add $63

Ⓚ Select grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓛ Select key option.
- **NLC** - No lock core
- **KS** - Key standard

Height-Adjustable - Full Modesty

- Full back panel only, optional back grommet
- Side grommet provides cord management
- Grain direction runs front to back on worksurface
- Height adjustment mechanism is pre-installed
- MSWCH upgrade control switch features Bluetooth capability, three stand-up reminder intervals and four memory height positions; field installed
- Height range is 30" to 45"
- Load capacity is 180 pounds at even weight distribution
- Safety stop at 2" above base to prevent pinching
- 9-1/2" kneespace depth on 20"D tops; 13-1/2" kneespace on 24"D tops
- Duo bezel specified separately

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface option.
- **TFL** - Thermally fused laminate
- **HPL** - High pressure laminate

Ⓒ Select control switch.
- **SWCH** - Standard switch
- **MSWCH** - Memory switch; add $126

Ⓓ Select worksurface laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select edge style.
- **Y** - Flat edge

Ⓖ Select worksurface grommet option.
- **NGRM** - No grommet
- **GWS** - Grommet with mesh wire management sleeve; add $121
- **GDUO** - Box with rectangular worksurface cutout to accept Duo bezel, specified separately; add $457
- **GBOX** - Box with center round worksurface grommet; add $457

Ⓗ Select grommet location.
- **CGC** - Cutout/grommet center

GWS locations are noted above. GRDUO and GMTBOX are located in the center but do not require a location selection.

Ⓘ Select back panel grommet.
- **NBGRM** - No back grommet
- **BGRM** - Back grommet; add $63

Ⓙ Select grommet color.
Refer to the **Product Color Options** page in this price list.

LHDSH

Height-Adjustable - Full Modesty - End Panel Left

- Full back panel only, optional back grommet
- Side grommet provides cord management
- Grain direction runs front to back on worksurface
- Height adjustment mechanism is pre-installed
- MSWCH upgrade control switch features Bluetooth capability, three stand-up reminder intervals and four memory height positions; field installed
- Height range is 30" to 45"
- Load capacity is 180 pounds at even weight distribution
- Safety stop at 2" above base to prevent pinching
- 13-1/2" kneespace
- Duo bezel specified separately
- Unit does not support monitor arms

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:
- The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select worksurface option.
- **TFL** - Thermally fused laminate
- **HPL** - High pressure laminate

C Select control switch.
- **SWCH** - Standard switch
- **MSWCH** - Memory switch; add $126

D Select worksurface laminate color.
Refer to the **Product Color Options** page in this price list.

E Select base laminate color.
Refer to the **Product Color Options** page in this price list.

F Select edge style.
- **Y** - Flat edge

G Select worksurface grommet option.
- **NGRM** - No grommet
- **GWS** - Grommet with mesh wire management sleeve; add $121
- **GDUO** - Box with rectangular worksurface cutout to accept Duo bezel, specified separately; add $457
- **GBOX** - Box with center round worksurface grommet; add $457

H Select grommet location.
- **CKS** - Grommet centered between height-adjustable legs

GWS locations are noted above. GRDUO and GMTBOX are located in the center but do not require a location selection.

I Select back panel grommet.
- **NBGRM** - No back grommet
- **BGRM** - Back grommet; add $63

J Select grommet color.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface option.

TFL	- Thermally fused laminate
HPL	- High pressure laminate

Ⓒ Select worksurface laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select base laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select edge style.

Y	- Flat edge

Ⓕ Select shell worksurface grommet option.

NGRM	- No grommet
GL	- Grommet left; add $61
GR	- Grommet right; add $61
GC	- Grommet center; add $61
GLR	- Grommet left and right; add $120
PDCL	- Left Cutout for Duo-Module spec'd separately
PDCR	- Right Cutout for Duo-Module spec'd separately
PDCC	- Center Cutout for Duo- Module spec'd separately

Ⓖ Select back grommet.

NBGRM	- No back grommet
BGRM	- Back grommet

Ⓗ Select grommet color.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface option.

TFL	- Thermally fused laminate
HPL	- High pressure laminate

Ⓒ Select cabinet top power access.

STD	- Top grommet

Ⓓ Select grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select power cutout for Duo location.

PDCN	- No cutout for Duo
PDCL	- Left Cutout for Duo-Module spec'd separately
PDCR	- Right Cutout for Duo-Module spec'd separately
PDCC	- Center Cutout for Duo- Module spec'd separately

Ⓕ Select edge style.

Y	- Flat edge

Ⓖ Select worksurface laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select base laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select leg color.
Refer to the **Product Color Options** page in this price list.

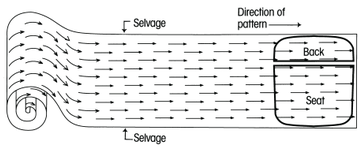
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

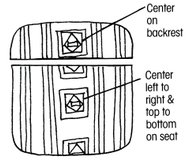


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54” sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

KI Color Match Program

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI’s Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

TECHNICAL SPECIFICATIONS

One-Piece Seat Shell

The seat and backrest are integrated into a single shell that is injection-molded in polypropylene, reinforced with glass fiber. The shell is ergonomically contoured and features a passive flex back movement for superior comfort.

Upholstered Seat (optional)

Molded urethane foam is attached to an injection-molded polypropylene seat board, then is upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners. Seat foam is nominal $^{3}/_{4}$” thickness.

Stack Chairs

Frames

Legs are made from $^{7}/_{8}$” O.D. by 13-gauge tubular steel. A single ring of $^{1}/_{2}$” diameter steel wire forms the crossmember. All joints are welded.

Frame Finishes

Frames are finished in either baked-on electrostatically-applied epoxy powder-coat paint, or bright nickel-chrome plating. Powder-coat paint may be specified in 30-degree gloss or select colors in a textured (matte) finish.

Armrests (optional)

When equiped with armrests, the support structure is a continuation of the rear leg, finished to match the frame color. The armrests are injection-molded glass-reinforced nylon with an internal structure of $^{3}/_{8}$” diameter steel wire and are press-fit into the support tube. Armrest color matches the frame finish, (except chrome, hammertone, and metallic finishes; which match the shell poly color).

Glides

4-Leg Chairs

Three glide options are available; felt, plastic, and steel. A black nylon swivel glide body is press-fit into the end of the leg tube. Glide caps (felt, plastic, or steel) are snap-fit onto the glide body. These are field-replaceable and interchangeable.

Tubular Sled Base Chairs

In addition to “no glide”, four glide options are available; non-skid, felt, plastic, and steel. A clear polycarbonate glide body is attached to the sled tube with a screw. Glide caps (non-skid, felt, plastic, or steel) have a black plastic structure and snap-fit onto the glide body. These are field-replaceable and interchangeable.

Casters

4-leg chairs may be ordered with dual surface casters, suitable for carpet or hard floors. Casters are 50 mm diameter, double-wheel, made of high-impact thermoplastic with softer elastomer over-molded on the wheel surfaces. Casters are available in Black, Warm Grey, or Cottonwood. (Cottonwood casters have Warm Grey elastomer on the surface that contacts the floor. All others are monochrome.)

Transport Dolly

Frame construction is welded tubular steel with black powder-coated finish and 5” wheels (two swivel and two fixed). The dolly fits 4-leg or sled base chairs and has a capacity of fifteen poly chairs or eight upholstered.

Stack Chairs (cont.)

Flip-Up Tablet Arm
The tablet support loop is a continuation of the rear leg and is available in left- or right-handed models. A formed steel hinge is welded to the top of the support structure and secured with screws to the underside of the writing surface. Writing surface is 9 1/2" x 20 3/4" x 12 1/2" plywood core of 5/8" thick, 11-ply hardwood, surfaced with .030" high-pressure laminate top and plain backer undersurface. Edges are lacquered and sealed.

Café Stools (non-stacking)

Frames
Legs are made from 3/4" O.D. by 13-gauge tubular steel. A single ring of 1/2" diameter steel wire forms the crossmember. The footring is formed of 1/2" diameter steel wire. All joints are welded. 4-leg cafe stools are available in 24" or 30" seat heights.

Frame Finishes
Frames are finished in either baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint, or bright nickel-chrome plating. Powder-coat paint may be specified in 30-degree gloss or select colors in a textured (matte) finish.

Glides (optional)
Three glide options are available; felt, plastic, and steel. A black nylon swivel glide body is press-fit into the end of the leg tube. Glide caps (felt, plastic, or steel) are snap-fit onto the glide body. These are field-replaceable and interchangeable.

Task Chairs & Stools

Under-Seat Structure
Support structure is a die-drawn 12-gauge steel plate. Structure is finished with baked-on electrostatically-applied epoxy powder-coat paint.

Armrests (optional)
When equipped with armrests, a support structure of 7/8" O.D. by 13-gauge tubular steel is welded directly to the seat structure plate. The armrests are injection-molded glass-reinforced nylon with an internal structure of 3/8" diameter steel wire and are press-fit into the support tube. Armrest color matches the structure's finish, (except hammertone and metallic finishes, which match the shell poly color).

Base
The base is a 27" injection-molded glass-reinforced nylon 5-blade base. A single paddle under the seat operates the height-adjusting pneumatic cylinder. An optional die-cast aluminum 5-blade base is also available on both chairs and stools. The aluminum base is available in polished aluminum or selected paint colors. Finish is baked-on elctrostatically-applied epoxy powder-coat paint and may be specified in 30-degree gloss or textured (matte) finish. Cylinders are available in Black, Warm Grey, or Cottonwood. Nominal seat height range is 16 1/2" to 21 1/2" for chairs, and 22" to 32" for stools.

Casters
Task chairs and stools are equipped with dual surface casters, suitable for carpet or hard floors. Casters are 60 mm diameter, double-wheel, made of high-impact thermoplastic with softer elastomer over-molded on the wheel surfaces. Casters are available in Black, Warm Grey, or Cottonwood. (Cottonwood casters have Warm Grey elastomer on the surface that contacts the floor. All others are monochrome.)

Foot Ring
Task stools are equipped with an adjustable-height foot ring. The foot ring has a die-cast aluminum hub and spokes (black with a polished top surface), and a 20" diameter chrome-plated tubular steel ring.

Task Chairs & Stools (cont.)

ChangeUp™ Tablet Arm
ChangeUp tablet support is integral to the chair frame and consists of a 7/8" diameter solid steel rod welded to the front and rear support tubes. A three-piece molded plastic armrest is included and attached to the chair frame using a #10 x 2 1/2" Phillips pan head tapping screw.

The tablet mechanism consists of a die-cast aluminum housing, upper and lower plastic bearings, and 11-gauge steel clamp and tablet board support plates. The tablet mechanism is clamped onto the chair frame over two plastic bushing halves and a 5/16" diameter by 1 3/4" hardened steel pin with a die-cast aluminum cap secured with two 1/4-20 x 3/4" button socket head cap screws. The pin creates a solid 90° up/down pivot stop and the bushings provide a smooth, quiet operation. In the use position, the tablet mechanism rotates outward from the chair back an additional 20° and permits approximately 3 1/2" of adjustment for ingress/egress without stowing the tablet.

The tablet worksurface is 21" wide by 13 1/2" deep (235 square inches) is secured to the tablet board support plate with twelve #12 x 5/8" Phillips flat head tapping screws. The tablet board is made of 18 mm Baltic Birch plywood with .040" high-pressure laminate top surface and .02" thick phenolic backer surface for an overall board thickness of approximately 3/4". Edges are lacquered with a clear finish and sealed. The factory installed tablet assembly is not field installable and may not be removed.

Compliance
Support frame, mechanism, and worksurface passes KI's internal testing for 250-pound weight capacity.

High-Density Stack Chairs & Stools

Sled-Base Wire Frames
Sled-base wire frames are made of 7/16" diameter solid steel rod with all joints welded. Stool frames also have a footrest made of 1/2" diameter solid steel rod. Stools are available in 24" or 30" seat heights.

Frame Finishes
Frames are finished in either bright nickel-chrome plating or baked-on electrostatically-applied gloss epoxy powder-coat paint. Powder-coat paint may be specified in 30-degree gloss or select colors in a textured (matte) finish.

Glides
In addition to "no glide", ganging glides and non-ganging glides are available. Four non-ganging glide options are available; non-skid, felt, plastic, and steel. A clear polycarbonate glide body snaps onto the wire frame and is held in location with ribs that nest into slots that are pressed into the wire frame. Glide caps (non-skid, felt, plastic, or steel) have a black plastic structure and snap-fit onto the glide body. These are field-replaceable and interchangeable.

Ganging glides snap onto the wire frame and are held in location with ribs that nest into slots that are pressed into the wire frame. Ganging glides (2-male and 2-female) slide together, allowing multiple chairs to be connected in a line. Ganging glides are either clear polycarbonate, or clear polycarbonate with a steel floor-contact insert.

Transport Dolly
Frame construction is welded tubular steel with black powder-coated finish and 5" wheels (two swivel and two fixed). The dolly has a capacity of twenty-five poly chairs, ten upholstered chairs, or fifteen poly stools.

Customer's Own Material ■

Specifications Form
January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:
KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

GENERAL INFORMATION

The Lyra Collection is a fresh, modern interpretation of a classic design inconography that, through the use of mixed materials, creates a powerful yet understated visual language. Available in 3 base styles: sled (Lounge), wood leg (Parlor), and pedestal (Club) and 3 wood shell configurations; design possibilities are endless.

Club chairs are standard with a swiveling pedestal base with an automatic return.

The Lyral Collection contains a full compliment of chairs, sofas, loveseats, and occasional tables featuring wood, metal, and upholstered elements.

WOOD INFORMATION

Wood Finish
Due to wood being a natural material, slight variations can occur in texture, color, grain configurations, and finish acceptance. Therefore, wood components may vary in tone or character from piece to piece, and no guarantee of exact matches can be made.

Exposed wood back shell is available in beech, maple (Kensington Maple), and walnut (Natural Walnut) on the Club and Lounge chairs only. Painted wood back shell is only available on Club chairs. An upholstered wood shell is available in any of the base type configurations--sled (Lounge), wood leg (Parlor), and pedestal (Club).

Plywood Edge color
The plys on the edge of wood-backed shells will vary in color from the surface of the wood shell. The plys of the plywood shell edge will be visible and may create a wood contrast. If a darker finish is selected, the plys will not be as visible and the edge will be similar in color as the outer shell.

Materials
Sled (Lounge) and pedestal (Club) bases are steel. Wood leg (Parlor) base is available in beech and maple (Kensington Maple on maple).

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

UPHOLSTERY INFORMATION

C.O.M. FABRIC
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Upholstery Finish
Some fabrics and leathers may show slight wrinkling in corners, around the seat, arms, or back, which is normal. With use, comfort wrinkles may occur in seats and backs and give the upholstery a loose appearance.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

GENERAL INFORMATION

The Lyra Table Collection is available in square (rounded corners) and obround shapes and 3 base styles: sled (Lounge), wood leg (Parlor), and pedestal (Club). Tables are available in veneer or laminated tops. Veneer table tops are available in beech core finishes, maple (Kensington Maple), and walnut (Natural Walnut). Wood legs (Parlor) are available in beech and maple (Kensington Maple) only.

See table price lists pages for overall table dimensions.

NGL	- No glides
GNY	- Nylon glides (black); add $6

Ⓖ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Construction
Frame constructed of kiln-dried hardwood and furniture-grade plywood. Cushioning of multiple densities of polyurethane foam and Dacron fiber.

Note
The Lyra Lounge Collection is available in exposed wood back and upholstered back shell. The Lounge Collection sled base can be specified in powdercoat paint and chrome. See product color options page.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood leg finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

Ⓔ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

Model	
1423UW/NC	$98
1423UW/FC	$98
1433UW/NC	$133
1433UW/FC	$133
1443UW/NC	$206
1443UW/FC	$206
1420UW/NC	$75
1420UW/FC	$75

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Construction
Frame constructed of kiln-dried hardwood and furniture-grade plywood. Cushioning of multiple densities of polyurethane foam and Dacron fiber.

Note
The Lyra Parlor Collection is available in upholstered back with wood legs only. The wood leg base is available in beech and maple (Kensington Maple) only. See color addendum at ki.com for finish options.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select veneer color.
Refer to the **Product Color Options** page in this price list.
Wood leg finish always matches veneer finish.

Ⓒ Select base finish color.
Refer to the **Product Color Options** page in this price list.
Pedestal base Chrome frame; add $390.

Ⓓ Select glide option.

NGL	- No glides
GNY	- Nylon glides (black); add $6

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

Model	
1402W	$207
1404W	$241
1407W	$252
1408W	$277
1412W	$192
1414W	$234
1417W	$252
1418W	$267

Ordering COM, COL and COV
Information

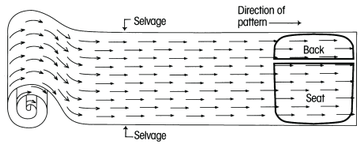
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

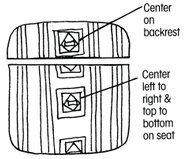


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

SPECIFICATIONS

Seat and Backrest
Injection-molded polypropylene seat and back. Back features a contoured handle for easy lifting and stacking.

Seat and Back Pads
Fixed seat and back pads consist of a 3/16" thick plywood board with threaded inserts for attachment. The boards are covered in 1/2" foam padding and wrapped with fabric. The pads are attached to the seat and back with screws into the threaded fasteners.

Chair Frame
7/16" solid steel rod in bright nickel-chrome or with electrostatically-applied epoxy.

Bright Chrome Finish
Surfaces are duplex nickel-chrome plated in a twenty-one step process.

Powder-Coated Finish
Electrostatically-applied epoxy, baked onto surface. Stacking powder-coated frames is not recommended.

Transport Dolly
Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Powder-coated finish.

Universal Dolly Handle
Tubular steel and plate steel construction. Handle is powder coated. Field-assembled to dolly.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. Upholstered chairs must be tested separately. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Customer's own vinyl and KI's 2V cannot be used on the MXU Matrix® model (upholstered seat/back, no cushion) but can be used on fixed cushion models.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

Ordering COM, COL and COV
Information

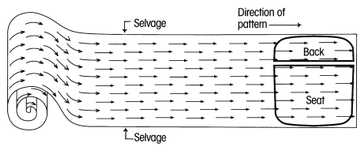
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

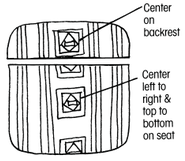


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

Tablet Arm

SPECIFICATIONS

Plastic Seats, Backrests and Armcaps
Injection-molded polypropylene.

Chair Frame
7/16" solid steel rod, bright duplex nickel chrome. Optional with electrostatically-applied epoxy (not recommended on tablet arm models).

Bright Chrome Finish
Surfaces are duplex nickel-chrome plated in a twenty-one step process.

Powder-Coated Finish
Electrostatically-applied epoxy, baked onto surface. Stacking and use of tablet arms on powder-coated frames not recommended.

Tablet Arm
7/16" solid steel rod frame, hinged tablet for easy access. Standard size has resin core; high-pressure laminate surface. Round tablet edge with clear lacquer finish. Oversized has plywood core with clear lacquered edges. Black has black painted edges. Bright chrome frame only. Chairs are nonstacking when attached, not available for use with powder-coated frame chairs. Tablet flips up for easy access. Seating clearance is 14" for standard and oversized tablet arms. Standard tablet is 20-1/2" long and 12" wide. Oversized tablet is 20-1/2" long and 17" wide. Ganging with tablet is not recommended.

Tablet Arm on Upholstered Chair
It is recommended that the tablet arm not be removed after it is affixed to the chair.

Upholstery
"Fixed Seat and/or Back Cushions" have padded fabric only on the seat and on the front of the back. Both the seat and front of the back have plastic exposed around the cushions.

Transport Dolly
Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Powder-coated finish.

Universal Dolly Handle
Tubular steel and plate steel construction. Handle is powder coated. Field-assembled to dolly.

Stacking Vinyl, Polyurethane, and Imitation Leather Upholstered Chairs
It is recommended that chairs to be stacked be covered in material other than vinyl, polyurethane, or imitation leather as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl, polyurethane, or imitation leather upholstery.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. Upholstered chairs must be tested separately. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Customer's own vinyl and KI's 2V cannot be used on the MXU Matrix® model (upholstered seat/back, no cushion) but can be used on fixed cushion models.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Ordering C.O.M., C.O.L., and C.O.V.

Bonduel, Green Bay, Ontario, and Shipping Locations 3

Medical and Laboratory

General Information 5

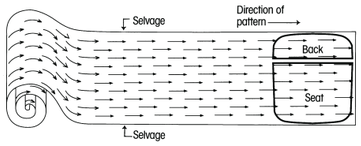
Stools 6

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

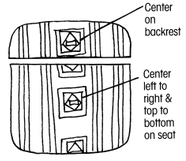


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Back size				13"W x 9"H
Overall width	19"	19"	19"	25"

SPECIFICATIONS

Medical & Laboratory Stools are shipped unassembled.

Upholstered Seat
The seat has a unibody molded 2-1/2" HR foam on plywood.

Pneumatic Ring
The KICL12 and KICL13 stools offer height adjustment with a pneumatic 360-degree, hand-activated ring. The KICL14 and KICL15 stools offer height adjustment with a pneumatic 360-degree, foot-activated ring.

Pneumatic Cylinder
Cylinders have a 5" range, except the KICL13 stool which has a 10" range.

Base
The KICL12, KICL13, and KICL14 have a 20" base. The KICL15 has a 24" base. All bases are die-cast aluminum with a chrome finish.

Casters
All stools have safety soft casters, which minimizes movement when chair is not in use.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:
KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

ADDITIONAL NOTES:
- Orders cannot go into production without the information listed at right.
- Attach memo sample to this approval sheet.
- If your order has been placed, list PO# _____
- The cost of the COM sample will be paid by the client.
- Even after preliminary approval, KI reserves the right to reject COM/COL if necessary when the quality is not satisfactory for the product to be upholstered. KI assumes no responsibility for its overall appearance, flammability, durability, color fastness or any other quality after upholstered on a KI product.

ALL COM MUST BE APPROVED.
Photocopy this form and submit with COM fabric for approval:

(This fabric approval is for the purpose of advising how to apply your COM fabric, verify yardage required, and suitability.)

Shapes Shown: Rectangle (1), Rectangular In-line Table (1), Lounge Chair (2), 45° Inside Curve w/ Back (2), Rectangle w/ Back (1), Corner w/ Back (1), 18" Round, 18" Cube (2), 26" Round Table (2)

A. 24 standard-scale and six junior-scale shapes create endless environments in any footprint.

B. Option for up to three contrasting fabrics when specified with a back, two fabrics when specified without a back.

C. Four base options include concealed glides (shown), wood feet (shown), poly feet or casters.

D. Lightweight modular construction allows for ease of reconfiguration.

E. Durably crafted to support a 400 pound weight rating.

F. Table options include: Round, Square or Rectangular In-line. Rectangular In-line Tables can be specified with or without an upholstered pad. However specified, Rectangular In-line Tables are 18" high to seamlessly integrate MyPlace seat heights.

G. Rectangular In-line Tables provide dual-sided storage to keep personal belongings off the floor and can be specified with contrasting laminate tops.

MyPlace™ Lounge Seating
General Information - Technical Specifications, Backless and 32" Low-Back

Frame
All seat and back frames are constructed of $^{3}/_{4}$" laminated hardwood plywood, CNC cut. All main frame joints are nailed and glued in addition to interlocking joinery across all stress points.

Foam
MyPlace Junior models use foam that is 2.6 density, 80 lb compression with 2" thick seat. $^{3}/_{4}$" thick foam covers all exposed sides.

The following MyPlace Standard sized models use a high-density foam for firm support: MP18R, MP26R, MPCRE, MP18H and MP18C. The foam is 2.6 density, 80 lb compression with 2" thick seat. $^{3}/_{4}$" thick foam covers all exposed sides. The MPTEDP uses a high-density foam that is $^{3}/_{4}$" thick, 2.6 density, 80 lb compression.

The following MyPlace Standard sized models use a soft sit high-density foam providing enhanced user comfort: MPSQR, MP5S, MPCRV, MPICB, MPOCB, MPRCT, MPRB, MPCRN, MPSQRL, MPC30, MPC45, MPC60, MPCI30, MPCI45, MPCI60, MPCO30, MPCO45 and MPCO60. The following models use foam that is 2.5 density, 45 lb compression with 2.5" thick seat, topped with .5" of 2.6 density 80 lb compression foam. The backs are 1.5" total thickness consisting of 1" thick 2.5 density - 45 lb and a .5" topper of 2.6 density - 80 lb compression foam. $^{3}/_{4}$" of 2.6 density, 80 lb compression foam covers all exposed sides.

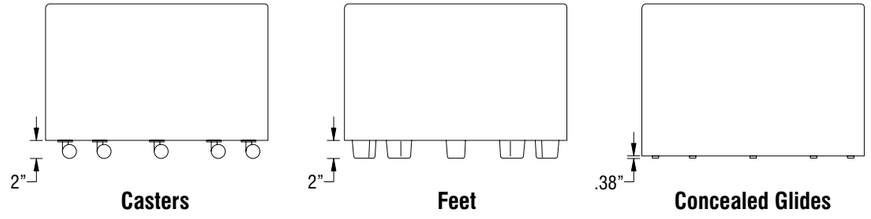
Sewing
All MyPlace Lounge units are double-needle stitched at all primary seams for lasting durability.

Base Options
- Poly Feet are 2" high polyurethane and made from impact resistant injection-molded nylon, mounted to the underside frame using $^{1}/_{4}$-20 x $1^{1}/_{2}$" hex lag screws. Feet are black in color with four or five feet used per lounge, depending upon model.

- Wood feet are 2" high and made from 2" x 2" x 2" beech hardwood, kiln dried to a moisture content of 6%. Exposed wood is sanded with 220 grit sand paper, then spray stained with KI standard colors, or custom matching color and placed in a burn-off oven for one hour at 140-150 degrees. The wood is then sealed to prevent moisture imbalance and finish sanded with 400 grit sand paper for fine detailing. The final step for wood feet is the application of a varnish topcoat, then feet are oven baked. Both the sealer and finish coats contain an anti-microbial protectant.

- Concealed Glides are .38" high, of nail-in molded white nylon. Four or five glides are used per lounge depending upon model. In-line table concealed glides are adjustable, screw-in as opposed to nail-in.

- Casters are 2" high and use $1^{1}/_{2}$" diameter dual soft swivel wheels with a 150 lb weight rating per caster. They are black in color with four or five casters used per lounge depending upon model. Casters are only available non-locking. **Note:** Caster Lounges cannot be ganged.



MyPlace™ Lounge Seating
General Information - Technical Specifications, Backless and 32" Low-Back

Ganging
Gangers are made from 7-gauge steel (.179" thick), powder-coated black and mounted to the underside of any lounge using 1/4 x 1" wood screws. Only the feet and concealed glide base options are available to use gangers.

Tabletops
Tabletops are made up of a high-pressure laminate surface that is glued to a 45 lb density particleboard core. The underside of the top and core is a 1/32" phenolic backer laminated for balanced construction and to help prevent moisture absorption in the core material. A 74P flat polymer edge band is offered in select KI colors (see color addendum). The finished tabletop height is 1 1/4".

In-Line Table Construction
Tables are constructed using 3/4" thick medium density fiberboard core, high pressure laminate facing on visible surfaces, phenolic backing sheet on non-visible surfaces and 2 mm polypropylene (73P) edge banding. Each table includes a centrally located divider panel. Panels are secured together using dowels, wood screws and glued joints. In-Line tables can be ganged together with other in-line tables or with MyPlace lounge pieces having consistent base styles (feet or glides).

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood feet finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select brushed aluminum feet finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

SPECIAL SERVICES

A. Modular lounge in rectilinear and curvilinear shapes with high-backs to create endless environments in any footprint. Can be planned together, with backless units, or as standalone pieces.
B. Two back heights available (48" or 60").
C. Option for up to three contrasting fabrics per unit (seat, base, back), select from many approved fabrics and patterns.
D. Four base options include concealed glides, wood feet, black poly feet, or aluminum feet. Wood feet and aluminum feet can be specified in all applicable KI standard finish options. All base/foot options include leveling capability with an adjustment range of 3/4".
E. MyPlace High-Back lounge units can be specified with no power, single RPT module power, or with Interlink® IQ multi-unit single-circuit power. Interlink® IQ can power up to eight modules using one single in-feed, no hardwiring required. See the MyPlace Planning Guide and Technical Specifications for more information.
F. Removable seat design allows for easy cleaning and UL electrical inspections when using Interlink® IQ power.
G. Built in clean-out in seat design allows for debris to be guided towards the floor, and painted wood frames protect against liquid spills while allowing for floor access with open spaces.
H. Two-Sided Booth unit is designed to work within working lounge spaces, or to be used as traditional booth seating within café environments.
I. Products feature a superior 400 lb. weight rating per individual seat.
J. MyPlace high-back lounge can be ganged with other high-back units or MyPlace backless units. See the MyPlace Planning Guide for more information.

MyPlace™ Lounge Seating
General Information - Technical Specifications, High-Back

Frame
All seat and backrest frames are constructed of 3/4" laminated hardwood plywood, CNC cut. All main frame joints are nailed and glued, in addition to interlocking joinery across all stress points. Seats are removeable without tools for cleaning and electrical inspection. Frame bases are coated with a black stain and sealer to seal and protect wooden frames from liquid spills. The seat base contains multiple pass-through cutouts to allow liquid and debris to route to the floor. Seats feature a curved clean-out space to route liquid and debris towards floor.

Foam
All MyPlace High-Back models use seat foam that is 2.5" thick, 2.5 density - 45 lb compression, topped with 1/2" thick, 2.6 density - 80 lb compression foam. The backrest foam is 1 1/2" total thickness consisting of 1" thick, 2.5 density - 45 lb compression foam, and topped with a 1/2" thick, 2.6 density - 80 lb compression foam. The headrest topper has 1 3/8" thick, 2.5 density - 45 lb compression foam on the seating side. All non-seating sides have a 3/4" thick, 2.6 density - 80 lb compression foam covering.

Sewing
All MyPlace Lounge units are double-needle stitched at all primary seams for lasting durability.

Base Options

Poly Feet
Poly feet are 2" high polyurethane, and contain an adjustable glide. The height-adjustable steel 1/4-20 threaded, natural color, impact resistant nylon glide bottom allows for 3/4" of leveling. Poly feet are mounted to the underside frame using 5/16-18 x 1 1/2" set screws. Feet are black in color with four or five feet used per lounge, depending upon model.

Wood Feet
Wood feet are 2" high and made from 2" x 2" x 2" beech hardwood, kiln dried to a moisture content of 6%. Exposed wood is sanded with 220 grit sand paper, then spray stained with KI standard colors, or a custom matching color and placed in a burn-off oven for one hour at 140-150 degrees. The wood is then sealed to prevent moisture imbalance and finish sanded with 400 grit sand paper for fine detailing. The final step for wood feet is the application of a varnish topcoat, then feet are oven baked. Both the sealer and finish coats contain an anti-microbial protectant. A height-adjustable steel 1/4-20 threaded, natural color, impact resistant nylon glide bottom allows for 3/4" of leveling. Four to five wood feet are used per lounge depending upon model. See KI color addendum for stain color offering.

Cast Aluminum Feet
Cast aluminum feet are 2" high and mounted to the underside frame using 5/16-18 x 1 1/2" set screws. Feet are offered in brushed aluminum or painted in powder-coat paint with four or five feet used per lounge, depending upon model. A height-adjustable steel 1/4-20 threaded, natural color, impact resistant nylon glide bottom allows for 3/4" of leveling. See KI Color Addendum for paint color offering.

Concealed Glides
Concealed glides are height-adjustable steel, 1/4-20 threaded with a natural color nylon bottom allowing for 3/4" of leveling. Four to five adjustable glides are used per lounge depending upon model.

MyPlace™ Lounge Seating
General Information - Technical Specifications, High-Back

Ganging

Gangers are made from steel and are either, painted with a black finish and are mounted using #10 x 3/4" wood screws.

- 60" high-back gangers - formed of 12-gauge steel. Gangers included with 60" high-back lounge models.
- High-back base gangers - formed of 14-gauge steel. Gangers included with all 48" and 60" high-back models.
- 48" high-back catch & hook gangers - formed 10-gauge steel. Gangers included with all 48" high-back models.
- High-back to low-back, backless or inline table gangers - formed of 12-gauge steel. Gangers must be ordered separately. See MyPlace Lounge Furniture - Planning Guide (KI-PG-000020) for more information.

Electrical System Options

Byrne Mini-Tap® Power Module with 3-Prong Plug

MyPlace High-Back can be configured with optional Byrne Mini-Tap® power modules with 3-prong plug (a self-contained, UL listed single relocatable power tap). One 15-amp, 125 volt AC simplex receptacle and two 2.1-amp, 5 volt DC USB Type A connector ports (2.0 and 3.0 compatible, no data), provide connection for device charging or direct AC power. Byrne Mini-Tap® power module is standard with 72" long, 14 AWG, 15-amp NEMA rated 3-conductor SJT cord with a three-prong grounded plug. Faceplates are optionally either black in color with black outlet ports, white with white outlet ports, or silver with black outlet ports. Cord is black.

One Byrne Mini-Tap® power module with 3-prong plug is available per model, and may be configurable for front and rear power outlets. See MyPlace Lounge Furniture - Planning Guide (KI-PG-000020) for configurable power locations.

Byrne Interlink® IQ System

Optionally, MyPlace High-Back can be configured with Byrne Interlink® IQ system (an ETL-Listed, 120-volt single circuit electrical system). Interlink® IQ is a non-sequential power system that allows users to "daisy-chain" multiple power modules together powered by one infeed (ordered separately). The infeed cord is a 10' long, 14 AWG, 15-amp NEMA rated 3-conductor SJT cord with a three-prong grounded plug. Faceplates are optionally either black in color with black outlet ports, white with white outlet ports, or silver with black outlet ports. Cord is black.

Up to eight total power modules can be configured in a multi-lounge plan, and are configured as part of the lounge units. Modules contain one 15-amp, 125 volt AC simplex receptacle and two 2.1-amp, 5 volt DC USB Type A connector ports (2.0 and 3.0 compatible, no data), providing connection for device charging or direct AC power. The module to module cord connections are keyed and light indicated for proper hook up.

Up to four power modules per lounge are available, depending upon model, and may be configurable for front and rear power outlets. See the planning guide for configurable power locations.

INFORMATION

The removable seat design of MyPlace™ High-Back units allows for ease of installation and clean out, as well as inspection of electrical components. MyPlace™ High-Back offers power modules with a 3-prong plug (ETL Listed) or Byrne Interlink® IQ electrical system (an ETL Listed Furniture Power Distribution Unit, electrical system.) Because the system is ETL Listed, MyPlace™ Lounge has not been listed.
All 48" high-back models can be used as free-standing units or can be ganged to other 48" high-back or 60" high-back models. Gangers are included for traditional lineal ganging with 48" high-back models, however, please note installing concealed gangers on 48" high-back models will permanently alter upholstery. Please see Installation Guide for further information related to ganging.

INFORMATION
The removable seat design of MyPlace™ High-Back units allows for ease of installation and clean out, as well as inspection of electrical components. MyPlace™ High-Back offers power modules with a 3-prong plug (ETL Listed) or Byrne Interlink® IQ electrical system (an ETL Listed Furniture Power Distribution Unit, electrical system.) Because the system is ETL Listed, MyPlace™ Lounge has not been listed.
All 48" high-back models can be used as free-standing units or can be ganged to other 48" high-back or 60" high-back models. Gangers are included for traditional lineal ganging with 48" high-back models, however, please note installing concealed gangers on 48" high-back models will permanently alter upholstery. Please see Installation Guide for further information related to ganging.

The removable seat design of MyPlace™ High-Back units allows for ease of installation and clean out, as well as inspection of electrical components. MyPlace™ High-Back offers power modules with a 3-prong plug (ETL Listed) or Byrne Interlink® IQ electrical system (an ETL Listed Furniture Power Distribution Unit, electrical system.) Because the system is ETL Listed, MyPlace™ Lounge has not been listed.
All 48" high-back models can be used as free-standing units or can be ganged to other 48" high-back or 60" high-back models. Gangers are included for traditional lineal ganging with 48" high-back models, however, please note installing concealed gangers on 48" high-back models will permanently alter upholstery. Please see Installation Guide for further information related to ganging.

INFORMATION

The removable seat design of MyPlace™ High-Back units allows for ease of installation and clean out, as well as inspection of electrical components. MyPlace™ High-Back offers power modules with a 3-prong plug (ETL Listed) or Byrne Interlink® IQ electrical system (an ETL Listed Furniture Power Distribution Unit, electrical system.) Because the system is ETL Listed, MyPlace™ Lounge has not been listed.
All 48" high-back models can be used as free-standing units or can be ganged to other 48" high-back or 60" high-back models. Gangers are included for traditional lineal ganging with 48" high-back models, however, please note installing concealed gangers on 48" high-back models will permanently alter upholstery. Please see Installation Guide for further information related to ganging.

INFORMATION

The removable seat design of MyPlace™ High-Back units allows for ease of installation and clean out, as well as inspection of electrical components. MyPlace™ High-Back offers power modules with a 3-prong plug (ETL Listed) or Byrne Interlink® IQ electrical system (an ETL Listed Furniture Power Distribution Unit, electrical system.) Because the system is ETL Listed, MyPlace™ Lounge has not been listed.
All 48" high-back models can be used as free-standing units or can be ganged to other 48" high-back or 60" high-back models. Gangers are included for traditional lineal ganging with 48" high-back models, however, please note installing concealed gangers on 48" high-back models will permanently alter upholstery. Please see Installation Guide for further information related to ganging.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

C Select power option.

NP	- No power
WP	- With power

D Select power type.

DCP	- Byrne Interlink®IQ System w/Mini-Tap® module OR jumper
RPT	- Mini-Tap® power module w/3-prong plug; add $304

E Select Mini-Tap® module w/3-prong plug location.

LFFP	- Left Front Facing Power
LRFP	- Left Rear Facing Power
RFFP	- Right Front Facing Power
RRFP	- Right Rear Facing Power

F Select Byrne Interlink®IQ System type.

DCJ	- Byrne Interlink®IQ System jumper only; add $120
DSMOD	- Byrne Interlink®IQ System w/Mini-Tap® module

G Select Byrne Interlink®IQ System w/Mini-Tap® module quantity.

MOD1	- One Module; add $392
MOD2	- Two Modules; add $783
MOD3	- Three Modules; add $1175
MOD4	- Four Modules; add $1566

H Select Byrne Interlink®IQ System w/Mini-Tap® module quantity.

LFFP	- Left Front Facing Power
LRFP	- Left Rear Facing Power
RFFP	- Right Front Facing Power
RRFP	- Right Rear Facing Power
LFLR	- Left Front, Left Rear Facing Power
LFRF	- Left Front, Right Front Facing Power
LFRR	- Left Front, Right Rear Facing Power
LRRF	- Left Rear, Right Front Facing Power
LRRR	- Left Rear, Right Rear Facing Power
RRRF	- Right Rear, Right Front Facing Power
LFLRRR	- Left Front, Left Rear, Right Rear Facing Power
LFRFLR	- Left Front, Right Front, Left Rear Facing Power
LFRFRR	- Left Front, Right Front, Right Rear Facing Power
RFLRRR	- Right Front, Left Rear, Right Rear Facing Power
LFRFLRRR	- Left Front, Right Front, Left Rear, Right Rear Facing Power

I Select module color.

MPB	- Black power module
MPS	- Silver power module
MPW	- White power module

J Select wood feet finish.
Refer to the **Product Color Options** page in this price list.

K Select brushed aluminum feet finish.
Refer to the **Product Color Options** page in this price list.

L Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

Compliance to TB133 Fire Safety Code

For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

C-Table™
General Information and Technical Specifications

C-Table Personal Worksurface (27" Fixed Height)

Dimensions	
Base diameter	15-1/2"
Tabletop diameter	18"
Overall height	27"

Tabletop

Tabletops are18" diameter and consist of 3/4" thick high-density 45 lb particleboard core with a .03" thick high-pressure laminate top and a .028" thick phenolic backer (bottom). The table edge is 2 mm polypropylene (73P) and is available in a variety of colors. See KI Color Addendum for laminate and edge finish options.

Base Frame

The table base frame is constructed of welded steel. The spider plate is 14-gauge, base is 3/8" thick and the vertical post is 1 1/2" diameter by .083" thick wall. The base frame is finished in electrostatically applied hybrid powdercoating. The coating is then fused and cured in a baking oven to form a smooth, continuous finish that is chemical-resistant, hard, tough and mar-resistant. Powder-coated paint is available in all standard KI paint colors except for chrome. See KI Color Addendum for complete options.

Glides

Six 1" diameter self-adhesive white polyurethane glides are recessed into machined pockets within the steel base.

Table Assembly

Tabletops are attached to the base frame using seven #12 x 3/4" Phillips truss head screws. Tables are shipped completely assembled with a packaged weight of 23 lbs. Assembled tables without packaging weigh 17 1/2" lbs.

C-Table™ Max
Technical Specifications

TECHNICAL SPECIFICATIONS

Fixed-Height Table - Dual-Post Cantilever

The fixed-height table is offered in 26" or 29" tabletop heights. The base frame is constructed of welded 1 1/2" diameter, 16-gauge steel tubing with a top mounting plate of 7-gauge (.179" thick) steel and a 3/8" (10 mm) thick C-shaped steel base. A 1/2" diameter welded steel cross brace member stabilizes the entire frame.

Adjustable-Height Table - Dual-Post Cantilever

The adjustable-height table raises and lowers in 1" locking increments, between 25" and 30" overall table height. Adjustability is controlled by a lever assembly that protrudes from the base, underneath the tabletop. When compressed, the lever assembly unlocks the upper frame weldment from the lower frame weldment, allowing height adjustment that is assisted by a pneumatic cylinder enclosed within one of the vertical leg tubes. When the tabletop is positioned at the desired height, the lever can be released, and the bottom of the lever assembly locks into one of six height positioning holes in one of the lower leg tubes. Delrin bushings are installed between the tubes of the upper and lower frames, allowing for smooth adjustment. The outer portion of the lever assembly ships loose and is secured to the inner portion of the lever with a hex jam nut during assembly of the table units.

The upper frame of the adjustable-height table is constructed with two 1 1/4" diameter, 14-gauge steel tubes and a 7-gauge (.179" thick) steel mounting plate, all welded together. The lower frame of the adjustable-height table is constructed with two 1 1/2" diameter, 16-gauge steel tubes, a 7-gauge (.179") steel mounting plate, and a 3/8" (10 mm) thick C-shaped steel base, all welded together. The height adjustment lever is 5/16" diameter welded steel. A 1/2" diameter welded steel cross brace member stabilizes the entire frame.

Base Finish

Base frames are powder-coat painted, and may be specified in all standard KI colors. Chrome-plated finish is not available. See KI Color Addendum for color options offered.

Table Surfaces

Table surfaces are 3/4" thick high-density 45 lb particle board core with .03" thick high pressure laminate and .028" thick phenolic backer (bottom). The table edge is 2 mm polypropylene (73P) and is available in a variety of colors. See KI Color Addendum for laminate and edge finish options.

Glides

Seven 1" diameter self-adhesive white polyurethane glides are recessed into machined pockets within the steel base.

Table Assembly

The tabletop is secured to the base using seven #12 x 3/4" Phillips truss head screws. All tabletops are shipped separately from bases.

FINISH INFORMATION

ADDITIONAL LAMINATE OFFERING
Additional laminates, beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

Tapered Base (ATH3)
Tapered round pedestal base is .07" thick steel. Tapered base is 26" in diameter for 36" square and 42" Round tops only. Tapered base is 22" diameter for all other top sizes. 3" diameter column is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface using eight #12 Phillips pan head screws. Adjustable glides are 1" diameter, nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Disc Base (ATH4)
Flat round pedestal base is a .07" thick steel cover over a $^{1}/_{4}$" thick steel plate. Base is 20" diameter for all 24" and 30" round table units and for all 24" square table units. Base is 24" diameter for all 36" round table units, for 42" round table units at 29" OTH (overall table height), and for all 30" square table units. Base is 32" diameter for 42" round table units at 42" OTH, and for all 36" and 42" square table units. 4" diameter column is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface using eight #12 Phillips pan head screws. Adjustable glides are 1" diameter nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Table Base ATH5
Flat round pedestal base is a .07" thick steel cover over a $^{1}/_{4}$" thick steel plate. Base is 32" diameter for all round and square table units. 5" diameter column is constructed of 14-gauge steel and is used for all 48" and 54" round table units and all square table units. 6" diameter column is used on 60" round table units and is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface with eight #12 Phillips pan head screws. Adjustable glides are 1" diameter nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Booth Table Base

Heavy Base (AHDAA & AHDAC)
Heavy round pedestal base consists of a 14-gauge spun steel cover adhered to two $^{1}/_{4}$" thick steel plates. Heavy base is 20" in diameter for all 24" and 26" booth table units, 24" in diameter for all 30" and 36" units and 32" in diameter for 42" and 48" units. 4" diameter column is constructed of 14-gauge steel. Table mounting plate is 7-gauge steel, and attaches to the underside of the worksurface using eight #12 Phillips pan head screws. Adjustable glides are 1" diameter nickel plated with $^{5}/_{16}$" stems. No tools are required for glide adjustment.

Base Finishes
Standard base finishes include electroplated chrome and powder-coated, oven-cured paint.

Laminate Table Surfaces
Laminate tops feature a $1\,^{1}/_{8}$" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Total thickness of table top is $1\,^{1}/_{4}$". Tops are pre-drilled.

Veneer Table Surfaces
Veneer tops feature a $1\,^{1}/_{8}$" thick high-density particleboard core with wood veneer and backing sheet, and finished with a catalyzed varnish finish. Total thickness of table top is $1\,^{1}/_{4}$". Tops are pre-drilled.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
34R	- 1-1/4" Wood band, radius corner

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

Pillar™ Tables
General Information

PRODUCT SPECIFICATIONS

Pillar® Tables

June 2022

TECHNICAL SPECIFICATIONS

Tabletops

Standard Tabletops
Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft particleboard, M3 grade. The Pillar Table is available with the 2 mm (74P) edge.

90° Outside Curve Tabletops
Outside curve tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in outside curve tops is 45 lb/cu ft particleboard, M3 grade. The tabletop is available with the 2 mm (74P) edge. This outside curve is supported at the underside, between two tables of equal depth by four 11-gauge (.125" thick) splice plates. While secured between two tables, no leg is required to support the tabletop.

Leg Assembly

Leg assemblies come in three variations to accommodate three overall table heights: 29" standard, 36" standard and 42" standing height depending on the table shape. The leg construction consist of a 2 1/4" O.D., 14-gauge steel tubing welded to a 1/4" thick 8" x 8" steel plate. A 1/4" thick steel insert is welded in the bottom of each leg tube with a 1/2-13 UNC threaded hole where the casters or glides attach. The legs are attached to the tabletop using #12 x 1" screws. Casters and glides are shipped in separate cartons and must to be installed upon assembly of the table.

Casters & Glides

Each table includes either casters or glides. Each caster table includes a set of locking and non-locking wheel casters. Casters are made of molded nylon and come in two colors. Glides are black nylon, overmolded on a steel insert for strength. Glides and casters are not interchangeable without changing the table height. Caster wheels are a minimum of 2 7/16" (63 mm) diameter. Caster wheel treads are a medium hard (75 max Shore A) for easy mobility on carpet or hard floors. Glides have a smooth bottom surface for mobility. Glides have a height adjustment range of 1" to allow for uneven surfaces.

Ganging Mechanism

Molded of black, high-strength nylon, the hook and peg combination draws tables together back-to-back or side-by-side. Once the ganging mechanism is installed, no tools are required when joining tables. Gangers are self-storing under the table when not in use. Tops are pre-drilled for placement of ganging pegs. Two gangers, four pegs and all mounting screws are included in the kit. One kit per table joint is required. Field installed.

Wire Management
