The wire trough is a cord management accessory that is provided with the Pillar table if Pattern electrical components are specified with the order. If the Pillar table is specified with any 3-prong plug module unit, then a wire trough must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish in all KI standard finishes. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides multiple access holes to feed wires, and includes cutouts for installation of additional Pattern snap-in RPT power modules.

Vertical Leg Wire Management
A color matched extrusion made of aluminum "snaps" to the Pillar leg, managing cables and wires exiting power modules or standard grommets installed on the tabletop. The extrusion is 12" long. Vertical wire managers are included when powered Pillar tables are ordered.

Furnishing Knowledge®

TECHNICAL SPECIFICATIONS

Wire Management (cont.)

Velcro® Wire Management
The Velcro wire manager is constructed of 2" x 4 1/2" Velcro hook and loop material with a looped pull tab. The wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are pre-drilled for locating wire manager, but the manager may be applied in any convenient location. One or two Velcro wire managers are included when Pattern power modules are ordered, and wire clips are provided when power modules with 3-prong plugs are ordered. Field installed.

Grommets

Grommets for Villa™
The grommet for Villa is a surface mounted cover constructed of ABS plastic or 18-gauge steel. On tables with one grommet, it is located centered within the width. Grommets are spaced 3" from the back edge on 24" and 30" deep tops, and centered (front to back) on 36", 42" & 48" deep tops. 36" deep large rectangular tables are available with two grommets. They are located along the centerline depth of the top (front to back) and approximately 23" to 35" from the edge of the top, depending on the top's width.

Grommets have a flip-up receding door and are identical in size to the PowerUp Module to allow for retrofitting of PowerUp at a later date. When the flip-up door is closed, the available opening for power or data cords is 1/2" wide by 5 3/4" long. Open door available space is 2 1/4" x 5 3/4". Grommets are available in a variety of colors. Field installed.

Flip-Top Grommets for Dean® & Nacre® Power Modules
Flip-top grommets are surface-mounted covers, constructed of 18-gauge steel. Grommets have a flip-up receding door and are identical in cutout size to the Nacre or Dean power modules listed below, which allows for retrofitting corresponding power modules at a later date. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. The flip-up door is designed to allow cords to remain routed through the opening while it is closed and allows for more cord routing space when the flip-up door is opened. Field installed.

Circular Grommet for Node® Power Module
The Node circular grommet is an open top, surface-mounted grommet constructed of aluminum. The overall diameter of 3.15" fits into a 3" diameter cutout in the surface. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. Not available in chrome. Field installed.

Power Modules

Dean In-Surface Power Module
Dean In-Surface power module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Dean in-surface power modules. Data connectors are not supplied with the module and are purchased by the customer. The Dean in-surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. Module is mechanically attached to the worksurface with screws from the underside. The module has a molded plastic faceplate with steel trim and an aluminum housing. Modules comes standard with either 9' or 15' cord with a 3-prong plug, or a 20" cord with a Pattern™ connector. A 40" cord option is available for larger conference tables with two power modules. Dean power module is rated at 15 amps/120 volts and is UL listed.

Pillar™ Tables
General Information

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Dean Clamp-On Power Module
Dean clamp-on power module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A and one USB-C port, 2 amps per port. Dean clamp-on module Is 5.50" long by 3.06" wide by 3.38" high. The module has a smooth molded plastic faceplate with an anodized aluminum housing. Clamp-on mounting style positions the module at a right angle to the worksurface and uses two thumb screws for attachment, without the need for table cutouts. Clamp is 3" wide, extends $1^{3}/_{4}$" onto edge of surface and can accommodate a maximum surface thickness of $1^{1}/_{2}$". Modules come standard with either 3', 9' or 15' cord with a 3-prong plug, or a 40" cord with a Pattern connector. Dean power module is rated at 15 amps/120 volts and is UL listed.

Dubbel™ Undersurface Power Module
Dubbel undersurface module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 1.75" tall by 5.25" deep. The module is made of molded plastic and secures under the worksurface with two $^{5}/_{16}$ x 2" Phillips round-head screws. Modules come standard with either 3', 9' or 15' cord with a 3-prong plug, or a 40" cord with a Pattern connector. Dubbel power module is rated at 15 amps/120 volts and is UL listed.

Nacre Pop-Up In-Surface Module
Nacre Pop-Up In-Surface consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Nacre power modules. Data connectors are not supplied with the module and are purchased by the customer. Nacre is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout with .38" radius corners. The module is made of molded plastic. The module is a pop-up design with a dampened spring-loaded mechanism to allow the unit to smoothly open for use and close smoothly when not in use. Modules come standard with either 9' or 15' cord with a 3-prong plug, or a 20" cord with a Pattern connector. A 40" cord option is available for larger conference tables with two power modules. Nacre power module is rated at 15 amps/120 volts and is UL listed.

Node® In-Surface Power Module
Node In-Surface power module consists of one simplex receptacle (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall fits and securely into a 3" diameter cutout. The module housing is made of plastic with a powder-coat painted aluminum faceplate. Modules come standard with either 9' or 15' cord with a 3-prong plug, or a 20" or 40" cord with a Pattern connector. Node power module is rated at 15 amps/120 volts and is UL listed.

PowerUp® Module
Several tables are available with one or two PowerUp power modules with 3-prong plug per table. Modules are spaced 3" from the back edge on 24" and 30" deep tops, and centered (front to back) on 36", 42" & 48" deep tops. Some larger conference style tables are available with two modules. They are located along the centerline of the table depth (front to back) and approximately 23" to 35" from the side edge of the top depending on the top width.

The PowerUp Module is a UL listed relocatable power tap which is a surface mounted power module with a plastic cover. When open, two simplex power receptacles and two data jack openings are exposed. The module is $3^{1}/_{4}$" wide by 7" long and $2^{1}/_{4}$" tall when opened and fits securely into a $6^{1}/_{4}$" x 3" cutout, still allowing removal without tools. It is provided with either a 9 ft or 15 ft cord and 3-prong plug, rated 120VAC, 15A. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two simplex receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Villa™ Power Module with 3-Prong Plug
Select tables are available with one or two Villa power modules with 3-prong plug per table. Modules are spaced 3" from the back edge on 24" and 30" deep tops, and centered (front to back) on 36", 42" & 48" deep tops. Some larger conference style tables are available with two modules. They are located along the centerline depth of the top (front to back) and approximately 23" to 35" from the edge of the top, depending on the top's width.

The Villa power module with 3-prong plug is an Intertek ETL Listed Furniture Power Distribution Unit surface module that mounts below a $6^{1}/_{4}$" x 3" grommet cutout in the tabletop. The module is $3^{1}/_{2}$" wide by $6^{3}/_{4}$" long and 2" tall when opened. It is provided with either a 9 ft or 15 ft cord and 3-prong plug, rated 120VAC, 15A. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. An additional simplex receptacle is located at the underside. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included.

Snap-In RPT Power Module
Snap-In RPT module is only available for use with Pattern™ electrical system. Snap-in module consists of two simplex receptacles (rated at 15 amps/125 volts). Snap-in RPT fits securely in user facing cutouts located on the wire trough, mounted under the table. Modules comes standard with a 20" or 40" pattern connector, rated at 15 amps/120 volts and is UL listed.

Pattern Electrical System
Select Pillar table models can be configured with Pattern electrical system. The Pattern electrical system is ETL Listed, evaluated to safety standard UL 962A (USA) and CAN/CSA-C22.2 No. 308 (Canada). It allows for a maximum up to ten distribution blocks and up to 50' of power jumpers from the power infeed (in either direction), whichever comes first. Pattern allows up to eighteen power modules depending on table width, and connects to one 15-amp power supply cord (power infeed with 3-prong plug). Pattern is a non-sequential system and the infeed is compatible with ground fault interrupter (GFI/GFCI) outlets. Power modules for Pattern are specified as an option on Pillar tables.

Pattern Power Distribution Blocks
Pattern power distributions blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, grey and white.

Pattern Table-to-Table Power Jumper Kits
Pattern table-to-table jumper power kits come with one grey distribution block and an appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to connect between distribution blocks. Table-to-table power jumper kits are ordered separately, according to layout configuration.

Pattern Power Infeed Kits
The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run.

Kit comes with one grey Pattern power distribution block, one 12" power jumper, one white Pattern power distribution block and Pattern power infeed cord. Power infeed consists of a 15-amp 3-prong plug on one end of the 108" cord and a keyed connector at the opposite end of the cord.

Pillar™ Tables
General Information

TECHNICAL SPECIFICATIONS

Modesty Panels

Optional 10" modesty panels are available on select Pillar models and available in perforated steel or laminate.

Laminated Modesty Panel

Laminated modesty panels have a .685" overall thickness with .30" thick high-pressure laminate on front and back surfaces. The density of the core inside the panel is 45 lb/cu ft particleboard, M3 grade. Modesty panels are 10" tall and vary in shape depending on the table it is paired with. On 48" wide rectangle tables, the modesty panel is 47 3/4" wide. On 90° inside curve tables, the modesty panel has a 54" radius, with an arc length of 85", so it can follow the curve of the back edge of the table. On 90° outside curve tables, the modesty panel has a 27 1/2" radius, with an arc length of 38". The laminate is color matched to the tabletop. The modesty panel mounts to the table using 14-gauge (.075" thick) formed steel brackets, secured to the underside of the table.

Perforated Steel Modesty Panel

Panels are constructed of 14-gauge (.075" thick) by 10" tall perforated steel with powder-coated paint matched to the leg color. On 48" wide rectangular tables, the modesty panel is 47 3/4" wide. On 90° inside curve tables, the modesty panel has a 54" radius, with an arc length of 85", so it can follow the curve of the back edge of the table. On 90° outside curve tables, the modesty panel has a 27 1/2" radius, with an arc length of 38". The modesty panel mounts to the table using 14-gauge (.075" thick) formed steel brackets, secured to the underside of the table.

Note: When specifying a perforated steel modesty panel on a table with chrome legs, the modesty panel will be flannel.

Polyester Felt Modesty Panel

Polyester felt modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft^2 and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A-Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high on 29" high tables, or 15" high on 36" and 42" high tables by 29", 35", 41", 47", 53", 59" and 65" wide.

Mounting Hooks

The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 29", 35", 41" and 47" wide use two hooks per panel. Panels 53", 59" and 65" wide use three hooks per panel.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge

Ⓒ Select power option.

NNN	- No grommets, PowerUp or wire management/No cutouts
WMO	- Wire management only-no cutouts; add $66
2PG	- Two plastic grommets; add $420
2PU	- Two PowerUp modules; add $669
2VG	- Two grommets for Villa; add $543
2VM	- Two Villa modules w/dual USB-A; add $1185
MA2	- Modules, Nacre in-surface w/USB-A/C (2); add $839
MB2	- Modules, Dubbel under-surface w/ dual USB-A (2); add $528
MD2	- Modules, Dean in-surface w/USB-A/C (2) ; add $707
MO2	- Modules, Node in-surface w/USB-A/C (2); add $528
GA2	- Grommets, Nacre (2); add $408
GD2	- Grommets, Dean (2); add $408
GO2	- Grommets, Node (2); add $276

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.

NMP	- No modesty panel
LMP	- Laminate modesty panel
SMP	- Perforated steel modesty panel

See pricing column for full modesty panel upcharge.

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select paint finish.
Refer to the **Product Color Options** page in this price list.
If chrome is specified with a steel modesty panel, modesty panel will be flannel.

Ⓗ Select base.

CST	- Casters
GLD	- Glides

Casters=2 locking/2 non-locking, black wheel, silver hub

- **GLD** - Glides

Casters=2 locking/2 non-locking, black wheel, silver hub

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

INFORMATION
Contact KI Customer Service for specific models that are UL listed.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropyleene, or wood stain through Product Modification Requests. Contact Customer Service for details.

MyWay™ Lobby and Lounge Seating
General Information

Frame Construction - Frames and Arms
Frames and Arms are constructed of 6/4 lumber kiln dried to a moisture content of six to eight percent and laminated hardwood plywood ¾" in thickness. All mainframe joints are doweled or interlocked and glued. Stress points are further reinforced with the use of glued and screwed corner blocks.

Suspension - Seat and Back
The seat and back are sprung with stretch webbing stapled into position and covered with a layer of FLW (reinforced non-woven fiber sheet)

Foam Specifications
Seats and Backs
Tight seats and backs are filled with a layer of 4" polyurethane foam with a density of 2.5 and a compression of 35 pounds. This foam is covered with a layer of ¼" super soft foam.

Arms
Arm tops are 1½" thick polyurethane foam with a density of 4.6 and compression of 150 lb. ¼" polyurethane foam is around the entire arm and has a 1.5 density and 45 pound compression.

Other Surfaces
Other top surfaces are 1½" thick polyurethane foam with a density of 4.6 and compression of 150 lb. ¼" polyurethane foam covers these surfaces with a 1.5 density and 45 pound compression.

Optional Cup Holder
Cup holder is made of machined aluminum, finished with a clear anodized protective coating. It has an inside diameter of 2¾" and a 1½" depth. Outside diameter is 3" with a 3¾" diameter top rim.

Optional Ganger
UL HB rated nylon hooks and glass filled nylon pegs are mounted to 14-gauge steel plates with thread locking screws and steel inserts. The ganging plate assemblies are mounted to the wood frame using #10 x 1½" wood screws. Gangers are limited to No Arm or Low Arm side-to-side ganging only.

Base Construction
Sled bases are 1" O.D. x 16-gauge round steel tubing welded to a 14-gauge steel mounting plate. Bases are secured to the lounge frame with #10 x 1½" steel pan head wood screws. Chrome is an optional finish. Powder-coat paint is standard.

Post legs are solid machined aluminum, bolted to a 10-gauge steel plate. Post legs are then secured to the lounge frame with #10 x 1½" steel pan head wood screws. The aluminum leg posts are polished to a "mirror" finish.

Work Arm Tablet
The work arm functional tablet is constructed with a 15 mm thick Baltic Birch plywood core, with a .030" thick phenolic paper backer. The edges are shaped, sanded and coated with a clear lacquer finish. The top surface is .040" thick high pressure laminate, available in standard KI color and pattern choices. See Color Addendum for details. The work arm tablet is field-replaceable.

Optional AC Power and USB Charger (available on Work Arm, High Arm, Low Arm)
The USB/AC power module houses one 125-volt, 15-amp AC outlet and two 5V DC, USB (type 2.0 and type 3.0 compatible) charging plug-in receptacles with 2.1-amp DC total power (no data). The power cord is a 14-AWG 15-amp NEMA rated three conductor SJT, with a three-prong grounded plug. 54" of exposed cord extends from the bottom (back corner, work arm side) of the chair. The circuitry is contained in an extruded aluminum housing. The power cord is strain-relief mounted to the rear of the housing. The entire electrical power module assembly is UL listed and passes a UL spill test rating for protection against liquids. Both USB ports can power and charge separate electrical devices, simultaneously. The Optional Power Module is available in three powder-coat colors: Black, White, and Silver.

Model/Family Numbers
* Table Families—MYTB

Base Construction
Table bases are ¾" O.D. 16-gauge round steel tubing, welded to a 12-gauge steel spider. The legs are fastened to the table top with #10 x ¾" long wood screws. The bases are finished in optional chrome. Powder-coat paint is available in standard KI paint colors. See Color Addendum.

Table Top Construction
Table tops consist of .035" thick plastic laminate top surface glued over 45lb density particle board. A 1/32" phenolic backer is laminated on the underside for balanced laminate construction and helps prevent moisture absorption in the core material. Finished table top thickness is 1¼". The table edge band is KI 2mm polypropylene (74P) and is available in a variety of colors. Laminate colors are per KI Color Addendum.

Optional AC Power and USB Charger - MyWay Table
The USB/AC power module houses two 125-volt, 15-amp AC outlets and four 5V DC, USB (type 2.0 and type 3.0 compatible) charging plug-in receptacles with 2.1-amp DC total power (no data). The power cord is a 10ft long, 14AWG, 15amp NEMA rated three conductor SJT, with a three prong grounded plug. The circuitry is contained in an extruded aluminum housing. The power cord is strain relief mounted to the rear of the housing. The entire electrical power module assembly is UL listed, having a UL spill test rating for protection against liquids.

All USB ports can power and charge separate tablet or mobile devices simultaneously.

The Optional Power Module is available in three powder-coat colors (Black, White, Silver) and is only available on the 24" x 42" x 16" size table.

Floor Glides
Floor glides are natural nylon, friction-fitted into the steel tube frame.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select ganging option.

HNG	- No gangers
HWG	- Ganging; add $71

Two ganging assemblies shipped per unit.

Ⓔ Select glide option.

NGL	- No glides
GNY	- Nylon glides (black); add $6

Ⓕ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

Model	
MYNN	$277
MYNN4L	$277

OPTIONS

Sled Glide Option
To order sled glides (polycarbonate), add /SG to the end of the model number and add upcharge.

Model	
All Sled Base Models	$6

NOTE

Ganging
Only Low Arm to Low Arm, No Arm to No Arm, and No Arm to Low Arm sides will gang together. Work Arm and High Arm sides cannot gang.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select cup holder option.

MNCH	- No cup holder
MWLC	- Left facing cup holder; add $226
MWRC	- Right facing cup holder; add $226

Cup holder is available on Low Arm only.

Ⓔ Select power option.

NP	- No power
MPB	- Black power module; add $335
MPS	- Silver power module; add $335
MPW	- White power module; add $335

Ⓕ Select location of power.

LFP	- Left facing power
RFP	- Right facing power

No location selection is needed if No Power (NP) is selected.

Ⓖ Select ganging option.

HNG	- No gangers
HWG	- Ganging; add $71

Two ganging assemblies shipped per unit.

Ⓗ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select cup holder option.

MNCH	- No cup holder
MWLC	- Left facing cup holder; add $226
MWRC	- Right facing cup holder; add $226

Cup holder is available on Low Arm only.

Ⓕ Select glide option.

NGL	- No glides
GNY	- Nylon glides (black); add $6

Ⓖ Select power option.

NP	- No power
MPB	- Black power module; add $335
MPS	- Silver power module; add $335
MPW	- White power module; add $335

Ⓗ Select location of power.

LFP	- Left facing power
RFP	- Right facing power

No location selection is needed if No Power (NP) is selected.

Ⓘ Select ganging option.

HNG	- No gangers
HWG	- Ganging; add $71

Two ganging assemblies shipped per unit.

Ⓙ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select cup holder option.

MNCH	- No cup holder
MWLC	- Left facing cup holder; add $226
MWRC	- Right facing cup holder; add $226

Cup holder is available on Low Arm only.

Ⓔ Select laminate color.
Refer to the **Product Color Options** page in this price list.
Tablet edge finish is always Natural on beech.

Ⓕ Select power option.

NP	- No power
MPB	- Black power module; add $335
MPS	- Silver power module; add $335
MPW	- White power module; add $335

Ⓖ Select location of power.

LFP	- Left facing power
RFP	- Right facing power

No location selection is needed if No Power (NP) is selected.

Ⓗ Select ganging option.

HNG	- No gangers
HWG	- Ganging; add $71

Two ganging assemblies shipped per unit.

Ⓘ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

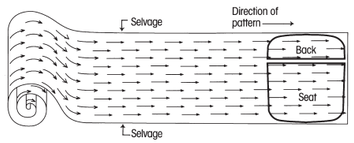
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

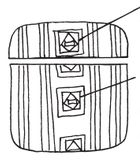


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test sample must be sent to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Oath™
General Information

TECHNICAL SPECIFICATIONS

Mechanism
A weight-activated mechanism passively adjusts backrest tilt tension based on occupant weight. The mechanism is made of stamped steel with a black plastic trim cover. One lever operates the height-adjust cylinder and a second lever allows the backrest tilt mechanism to move freely, or locks it in one of four positions.

Seat
Plywood seat board with molded urethane foam is upholstered using a drawstring method and finished with a black plastic under-shroud.

Backrest
Reinforced black nylon frame with mesh insert.

Base
Available in an injection-molded, glass-reinforced black nylon 5-blade base or a polished die-cast aluminum 5-blade base.

Casters
Casters are 50mm O.D., double-wheel high-impact thermoplastic, available with hard or soft wheel surface. Only available in black.

Arms
Optional height-adjustable arms are molded in black reinforced plastic with molded black polyurethane arm caps. Armrests mount directly to the seat board.

Foot Ring
Task stools are equipped with an adjustable-height foot ring with black, die-cast aluminum hub and spokes, with an 18" diameter chrome-plated tubular steel ring.

Ordering COM, COL and COV
Information

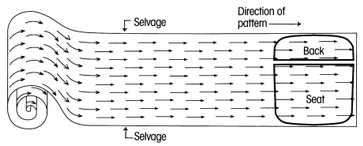
Ordering COM, COL and COV
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

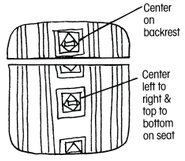


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Opt4® 4-Leg Armchair or Armless Chair with Glides or Casters

March 2020

TECHNICAL SPECIFICATIONS

4-Leg Glide & Caster Frames
Frame is fabricated from 7/8" O.D. by 17-guage tubular steel. All joint are welded.

Optional Upholstered Seat
Upholstered seat pad consist of an injection molded polypropylene liner board, 1/2" thick urethane slab foam and an upholstery covering, all held together with a draw-string process. Upholstered seat pad is attached to the seat with eight screws that extend through the seat and are screwed into poly bosses that are molded in the liner board.

Seat and Back
Seat and back are available in six combinations of mesh or polypropylene backrests and mesh, polypropylene or upholstered seats. Polypropylene frame and mesh are monochromatic. Poly backrest models have an integral handle. Mesh material is made from 100% post-consumer PET bottles. All resin parts (backrest, seat, and glides) are 100% recycled polypropylene.

Arms
Optional armrests are available. When equipped with arms, a formed steel tube 7/8" OD by 17-guage tubular steel is welded directly to the chair frame. Arm caps are polypropylene material.

Casters/Glides
Glides are molded from nylon with glass fill. Glides are Stone Grey or Black in color. 4-Leg chairs may be ordered with casters instead of glides. Casters are 50 mm diameter, double-wheel high-impact thermoplastic, available with hard or soft wheel surface, in Black only.

Frame Finishes
Frames are finished in either baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint, or bright nickel-chrome plating.

Transport Dolly
Frame construction is welded tubular steel with black powder-coated finish and 5" wheels (two swivel and two fixed).

Opt4® High-Density Sled Base Stack Chair & Stool

November 2020

TECHNICAL SPECIFICATIONS

Sled Base Frame
Frame and cross members are fabricated from 1/2" O.D. by 16-gauge tubular steel. All joints are welded. Stools are available in two heights (24" and 30"), and have footrest made of 1/2" O.D. by 16-gauge tubular steel.

Optional Upholstered Seat
Upholstered seat pad consist of an injection molded polypropylene liner board, 1/2" thick urethane slab foam and an upholstery covering, all held together with a draw-string process. Upholstered seat pad is attached to the seat with eight screws that extend through the seat and are screwed into poly bosses that are molded in the liner board.

Seat and Back
Seat and back are available in six combinations of mesh or polypropylene backrests and mesh, polypropylene or upholstered seats. Mesh material is made from 100% post-consumer PET bottles. All resin parts (backrest and seat) are 100% recycled polypropylene.

Glides
Frames are available with either nylon, steel, felt or PVC/non-skid glides. Nylon glides are available with or without integral ganging clips. Nylon glides are Stone Grey. PVC/non-skid glides are Black. Steel glides have a stainless steel cap that fits over a non-ganging nylon glide. Felt glides have a replaceable (snap-fit) felt cap that is black nylon with a neutral-colored felt. All glides are attached with one screw.

Frames and Finishes
Frames are finished in either baked-on electrostatically-applied powder-coat paint or bright nickel-chrome plating.

Transport Dolly
Powder-coated tubular steel frame. Two swivel casters and two fixed casters.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select seat height.

24	- 24" Seat Height
30	- 30" Seat Height

Ⓒ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fire code. (Available on mesh seat/mesh back model only).

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

Ⓔ Select poly and/or mesh seat and back color.
Refer to **ki.com/fabrics**

Ⓕ Select upholstery grade/color.
Refer to **ki.com/fabrics**

Ⓖ Select glide option.

G	- Nylon glides, ganging
NG	- Nylon glides, non-ganging
F	- Replaceable Felt Glides
S	- Steel glides, non-ganging
NS	- PVC/Non-skid glides, non-ganging

Pillar™ Tables
General Information

PRODUCT SPECIFICATIONS

Pillar® Tables

June 2022

TECHNICAL SPECIFICATIONS

Tabletops

Standard Tabletops
Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft particleboard, M3 grade. The Pillar Table is available with the 2 mm (74P) edge.

90° Outside Curve Tabletops
Outside curve tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in outside curve tops is 45 lb/cu ft particleboard, M3 grade. The tabletop is available with the 2 mm (74P) edge. This outside curve is supported at the underside, between two tables of equal depth by four 11-gauge (.125" thick) splice plates. While secured between two tables, no leg is required to support the tabletop.

Leg Assembly

Leg assemblies come in three variations to accommodate three overall table heights: 29" standard, 36" standard and 42" standing height depending on the table shape. The leg construction consist of a 2 1/4" O.D., 14-gauge steel tubing welded to a 1/4" thick 8" x 8" steel plate. A 1/4" thick steel insert is welded in the bottom of each leg tube with a 1/2-13 UNC threaded hole where the casters or glides attach. The legs are attached to the tabletop using #12 x 1" screws. Casters and glides are shipped in separate cartons and must to be installed upon assembly of the table.

Casters & Glides

Each table includes either casters or glides. Each caster table includes a set of locking and non-locking wheel casters. Casters are made of molded nylon and come in two colors. Glides are black nylon, overmolded on a steel insert for strength. Glides and casters are not interchangeable without changing the table height. Caster wheels are a minimum of 2 7/16" (63 mm) diameter. Caster wheel treads are a medium hard (75 max Shore A) for easy mobility on carpet or hard floors. Glides have a smooth bottom surface for mobility. Glides have a height adjustment range of 1" to allow for uneven surfaces.

Ganging Mechanism

Molded of black, high-strength nylon, the hook and peg combination draws tables together back-to-back or side-by-side. Once the ganging mechanism is installed, no tools are required when joining tables. Gangers are self-storing under the table when not in use. Tops are pre-drilled for placement of ganging pegs. Two gangers, four pegs and all mounting screws are included in the kit. One kit per table joint is required. Field installed.

Wire Management

Wire Trough
The wire trough is a cord management accessory that is provided with the Pillar table if Pattern electrical components are specified with the order. If the Pillar table is specified with any 3-prong plug module unit, then a wire trough must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish in all KI standard finishes. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides multiple access holes to feed wires, and includes cutouts for installation of additional Pattern snap-in RPT power modules.

Vertical Leg Wire Management
A color matched extrusion made of aluminum "snaps" to the Pillar leg, managing cables and wires exiting power modules or standard grommets installed on the tabletop. The extrusion is 12" long. Vertical wire managers are included when powered Pillar tables are ordered.

Furnishing Knowledge®

TECHNICAL SPECIFICATIONS

Wire Management (cont.)

Velcro® Wire Management
The Velcro wire manager is constructed of 2" x 4 1/2" Velcro hook and loop material with a looped pull tab. The wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are pre-drilled for locating wire manager, but the manager may be applied in any convenient location. One or two Velcro wire managers are included when Pattern power modules are ordered, and wire clips are provided when power modules with 3-prong plugs are ordered. Field installed.

Grommets

Grommets for Villa™
The grommet for Villa is a surface mounted cover constructed of ABS plastic or 18-gauge steel. On tables with one grommet, it is located centered within the width. Grommets are spaced 3" from the back edge on 24" and 30" deep tops, and centered (front to back) on 36", 42" & 48" deep tops. 36" deep large rectangular tables are available with two grommets. They are located along the centerline depth of the top (front to back) and approximately 23" to 35" from the edge of the top, depending on the top's width.

Grommets have a flip-up receding door and are identical in size to the PowerUp Module to allow for retrofitting of PowerUp at a later date. When the flip-up door is closed, the available opening for power or data cords is 1/2" wide by 5 3/4" long. Open door available space is 2 1/4" x 5 3/4". Grommets are available in a variety of colors. Field installed.

Flip-Top Grommets for Dean® & Nacre® Power Modules
Flip-top grommets are surface-mounted covers, constructed of 18-gauge steel. Grommets have a flip-up receding door and are identical in cutout size to the Nacre or Dean power modules listed below, which allows for retrofitting corresponding power modules at a later date. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. The flip-up door is designed to allow cords to remain routed through the opening while it is closed and allows for more cord routing space when the flip-up door is opened. Field installed.

Circular Grommet for Node® Power Module
The Node circular grommet is an open top, surface-mounted grommet constructed of aluminum. The overall diameter of 3.15" fits into a 3" diameter cutout in the surface. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. Not available in chrome. Field installed.

Power Modules

Dean In-Surface Power Module
Dean In-Surface power module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Dean in-surface power modules. Data connectors are not supplied with the module and are purchased by the customer. The Dean in-surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. Module is mechanically attached to the worksurface with screws from the underside. The module has a molded plastic faceplate with steel trim and an aluminum housing. Modules comes standard with either 9' or 15' cord with a 3-prong plug, or a 20" cord with a Pattern™ connector. A 40" cord option is available for larger conference tables with two power modules. Dean power module is rated at 15 amps/120 volts and is UL listed.

Pillar™ Tables
General Information

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Dean Clamp-On Power Module
Dean clamp-on power module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A and one USB-C port, 2 amps per port. Dean clamp-on module Is 5.50" long by 3.06" wide by 3.38" high. The module has a smooth molded plastic faceplate with an anodized aluminum housing. Clamp-on mounting style positions the module at a right angle to the worksurface and uses two thumb screws for attachment, without the need for table cutouts. Clamp is 3" wide, extends $1^{3}/_{4}$" onto edge of surface and can accommodate a maximum surface thickness of $1^{1}/_{2}$". Modules come standard with either 3', 9' or 15' cord with a 3-prong plug, or a 40" cord with a Pattern connector. Dean power module is rated at 15 amps/120 volts and is UL listed.

Dubbel™ Undersurface Power Module
Dubbel undersurface module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 1.75" tall by 5.25" deep. The module is made of molded plastic and secures under the worksurface with two $^{5}/_{16}$ x 2" Phillips round-head screws. Modules come standard with either 3', 9' or 15' cord with a 3-prong plug, or a 40" cord with a Pattern connector. Dubbel power module is rated at 15 amps/120 volts and is UL listed.

Nacre Pop-Up In-Surface Module
Nacre Pop-Up In-Surface consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Nacre power modules. Data connectors are not supplied with the module and are purchased by the customer. Nacre is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout with .38" radius corners. The module is made of molded plastic. The module is a pop-up design with a dampened spring-loaded mechanism to allow the unit to smoothly open for use and close smoothly when not in use. Modules come standard with either 9' or 15' cord with a 3-prong plug, or a 20" cord with a Pattern connector. A 40" cord option is available for larger conference tables with two power modules. Nacre power module is rated at 15 amps/120 volts and is UL listed.

Node® In-Surface Power Module
Node In-Surface power module consists of one simplex receptacle (rated at 15 amps/125 volts), includes one USB-A port, and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall fits and securely into a 3" diameter cutout. The module housing is made of plastic with a powder-coat painted aluminum faceplate. Modules come standard with either 9' or 15' cord with a 3-prong plug, or a 20" or 40" cord with a Pattern connector. Node power module is rated at 15 amps/120 volts and is UL listed.

PowerUp® Module
Several tables are available with one or two PowerUp power modules with 3-prong plug per table. Modules are spaced 3" from the back edge on 24" and 30" deep tops, and centered (front to back) on 36", 42" & 48" deep tops. Some larger conference style tables are available with two modules. They are located along the centerline of the table depth (front to back) and approximately 23" to 35" from the side edge of the top depending on the top width.

The PowerUp Module is a UL listed relocatable power tap which is a surface mounted power module with a plastic cover. When open, two simplex power receptacles and two data jack openings are exposed. The module is $3^{1}/_{4}$" wide by 7" long and $2^{1}/_{4}$" tall when opened and fits securely into a $6^{1}/_{4}$" x 3" cutout, still allowing removal without tools. It is provided with either a 9 ft or 15 ft cord and 3-prong plug, rated 120VAC, 15A. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two simplex receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Villa™ Power Module with 3-Prong Plug
Select tables are available with one or two Villa power modules with 3-prong plug per table. Modules are spaced 3" from the back edge on 24" and 30" deep tops, and centered (front to back) on 36", 42" & 48" deep tops. Some larger conference style tables are available with two modules. They are located along the centerline depth of the top (front to back) and approximately 23" to 35" from the edge of the top, depending on the top's width.

The Villa power module with 3-prong plug is an Intertek ETL Listed Furniture Power Distribution Unit surface module that mounts below a $6^{1}/_{4}$" x 3" grommet cutout in the tabletop. The module is $3^{1}/_{2}$" wide by $6^{3}/_{4}$" long and 2" tall when opened. It is provided with either a 9 ft or 15 ft cord and 3-prong plug, rated 120VAC, 15A. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. An additional simplex receptacle is located at the underside. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included.

Snap-In RPT Power Module
Snap-In RPT module is only available for use with Pattern™ electrical system. Snap-in module consists of two simplex receptacles (rated at 15 amps/125 volts). Snap-in RPT fits securely in user facing cutouts located on the wire trough, mounted under the table. Modules comes standard with a 20" or 40" pattern connector, rated at 15 amps/120 volts and is UL listed.

Pattern Electrical System
Select Pillar table models can be configured with Pattern electrical system. The Pattern electrical system is ETL Listed, evaluated to safety standard UL 962A (USA) and CAN/CSA-C22.2 No. 308 (Canada). It allows for a maximum up to ten distribution blocks and up to 50' of power jumpers from the power infeed (in either direction), whichever comes first. Pattern allows up to eighteen power modules depending on table width, and connects to one 15-amp power supply cord (power infeed with 3-prong plug). Pattern is a non-sequential system and the infeed is compatible with ground fault interrupter (GFI/GFCI) outlets. Power modules for Pattern are specified as an option on Pillar tables.

Pattern Power Distribution Blocks
Pattern power distributions blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, grey and white.

Pattern Table-to-Table Power Jumper Kits
Pattern table-to-table jumper power kits come with one grey distribution block and an appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to connect between distribution blocks. Table-to-table power jumper kits are ordered separately, according to layout configuration.

Pattern Power Infeed Kits
The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run.

Kit comes with one grey Pattern power distribution block, one 12" power jumper, one white Pattern power distribution block and Pattern power infeed cord. Power infeed consists of a 15-amp 3-prong plug on one end of the 108" cord and a keyed connector at the opposite end of the cord.

Pillar™ Tables
General Information

TECHNICAL SPECIFICATIONS

Modesty Panels

Optional 10" modesty panels are available on select Pillar models and available in perforated steel or laminate.

Laminated Modesty Panel

Laminated modesty panels have a .685" overall thickness with .30" thick high-pressure laminate on front and back surfaces. The density of the core inside the panel is 45 lb/cu ft particleboard, M3 grade. Modesty panels are 10" tall and vary in shape depending on the table it is paired with. On 48" wide rectangle tables, the modesty panel is 47 3/4" wide. On 90° inside curve tables, the modesty panel has a 54" radius, with an arc length of 85", so it can follow the curve of the back edge of the table. On 90° outside curve tables, the modesty panel has a 27 1/2" radius, with an arc length of 38". The laminate is color matched to the tabletop. The modesty panel mounts to the table using 14-gauge (.075" thick) formed steel brackets, secured to the underside of the table.

Perforated Steel Modesty Panel

Panels are constructed of 14-gauge (.075" thick) by 10" tall perforated steel with powder-coated paint matched to the leg color. On 48" wide rectangular tables, the modesty panel is 47 3/4" wide. On 90° inside curve tables, the modesty panel has a 54" radius, with an arc length of 85", so it can follow the curve of the back edge of the table. On 90° outside curve tables, the modesty panel has a 27 1/2" radius, with an arc length of 38". The modesty panel mounts to the table using 14-gauge (.075" thick) formed steel brackets, secured to the underside of the table.

Note: When specifying a perforated steel modesty panel on a table with chrome legs, the modesty panel will be flannel.

Polyester Felt Modesty Panel

Polyester felt modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft^2 and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A-Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high on 29" high tables, or 15" high on 36" and 42" high tables by 29", 35", 41", 47", 53", 59" and 65" wide.

Mounting Hooks

The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 29", 35", 41" and 47" wide use two hooks per panel. Panels 53", 59" and 65" wide use three hooks per panel.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are avail-able.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
- **74P** - 74P edge

Ⓒ Select power option.
- **NNN** - No grommets, PowerUp or wire management/No cutouts
- **WMO** - Wire management only-no cutouts; add $66
- **1PG** - One plastic grommet w/wire management; add $209
- **1PU** - One PowerUp w/wire manage-ment; add $334
- **1VG** - One grommet for Villa w/wire management; add $271
- **1VM** - One Villa module with USB w/wire management; add $592
- **MD1** - Module, Dean in-surface w/USB-A/C (1) ; add $354
- **MB1** - Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
- **MA1** - Module, Nacre in-surface w/USB-A/C (1); add $420
- **MO1** - Module, Node in-surface w/USB-A/C (1) ; add $264
- **GA1** - Grommet, Nacre (1); add $209
- **GD1** - Grommet, Dean (1); add $209
- **GO1** - Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.
- **NMP** - No modesty panel
- **PMP** - Polyester felt modesty panel; add $182

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select modesty panel color.
Refer to the **Product Color Options** page in this price list.

Ⓙ Select base.
- **CST** - Casters
- **GLD** - Glides

Casters=2 locking/2 non-locking, black wheel, silver hub

Ⓚ Select Cord Length (feet).
- **15** - 15' cord length
- **9** - 9' cord length

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designa-tors followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are avail-able.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
- **74P** - 74P edge

Ⓒ Select power option.
- **NNN** - No grommets, PowerUp or wire management/No cutouts
- **WMO** - Wire management only-no cutouts; add $66
- **1PG** - One plastic grommet w/wire management; add $209
- **1PU** - One PowerUp w/wire manage-ment; add $334
- **1VG** - One grommet for Villa w/wire management; add $271
- **1VM** - One Villa module with USB w/wire management; add $592
- **MD1** - Module, Dean in-surface w/USB-A/C (1) ; add $354
- **MB1** - Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
- **MA1** - Module, Nacre in-surface w/USB-A/C (1); add $420
- **MO1** - Module, Node in-surface w/USB-A/C (1) ; add $264
- **GA1** - Grommet, Nacre (1); add $209
- **GD1** - Grommet, Dean (1); add $209
- **GO1** - Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.
- **NMP** - No modesty panel
- **PMP** - Polyester felt modesty panel; add $265

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are avail-able.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
- **74P** - 74P edge

Ⓒ Select power option.
- **NNN** - No grommets, PowerUp or wire management/No cutouts
- **WMO** - Wire management only-no cutouts; add $66
- **2PG** - Two plastic grommets; add $420
- **2PU** - Two PowerUp modules; add $669
- **2VG** - Two grommets for Villa; add $543
- **2VM** - Two Villa modules w/dual USB-A; add $1185
- **MA2** - Modules, Nacre in-surface w/USB-A/C (2); add $839
- **MB2** - Modules, Dubbel under-surface w/ dual USB-A/C (2); add $528
- **MD2** - Modules, Dean in-surface w/USB-A/C (2) ; add $707
- **MO2** - Modules, Node in-surface w/USB-A/C (2); add $528
- **GA2** - Grommets, Nacre (2); add $408
- **GD2** - Grommets, Dean (2); add $408
- **GO2** - Grommets, Node (2); add $276

CORD LENGTH: 9’ or 15’ is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.
- **NMP** - No modesty panel

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select base.
- **CST** - Casters
- **GLD** - Glides

Casters=2 locking/4 non-locking, black wheel, silver hub

Ⓙ Select Cord Length (feet).
- **15** - 15’ cord length
- **9** - 9’ cord length

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designa-tors followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

INFORMATION

Contact KI Customer Service for specific models that are UL listed.

SPECIAL SERVICES

Special Carton Marking

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
- **74P** - 74P edge

Ⓒ Select power option.
- **NNN** - No grommets, PowerUp or wire management/No cutouts
- **WMO** - Wire management only-no cutouts; add $66
- **1PG** - One plastic grommet w/wire management; add $209
- **1PU** - One PowerUp w/wire management; add $334
- **1VG** - One grommet for Villa w/wire management; add $271
- **1VM** - One Villa module with USB w/wire management; add $592
- **MD1** - Module, Dean in-surface w/USB-A/C (1) ; add $354
- **MB1** - Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
- **MA1** - Module, Nacre in-surface w/USB-A/C (1); add $420
- **MO1** - Module, Node in-surface w/USB-A/C (1) ; add $264
- **GA1** - Grommet, Nacre (1); add $209
- **GD1** - Grommet, Dean (1); add $209
- **GO1** - Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.
- **NMP** - No modesty panel
- **LMP** - Laminate modesty panel
- **SMP** - Perforated steel modesty panel

See pricing column for full modesty panel upcharge.

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select paint finish.
Refer to the **Product Color Options** page in this price list.
If chrome is specified with a steel modesty panel, modesty panel will be flannel.

Ⓗ Select base.
- **CST** - Casters
- **GLD** - Glides

Casters=2 locking/2 non-locking, black wheel, silver hub

Ⓘ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓙ Select Cord Length (feet).
- **15** - 15' cord length
- **9** - 9' cord length

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact customer service for details.

INFORMATION

Contact KI Customer Service for specific models that are UL listed.

General Information 4

Task Chairs 5

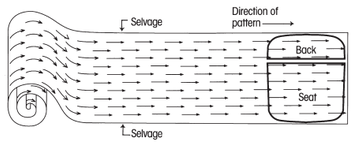
Ordering COM, COL and COV
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

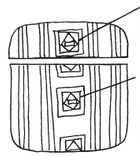


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Height	43" - 52"	43" - 52"	43" - 52"

SPECIFICATIONS

Seat
Seat is constructed of 5/8" thick, 10-ply plywood with one solid steel reinforcement plate that spans from seat edge to seat edge and 3.75" thick molded foam. The steel reinforcement plate has welded steel t-nuts for arms and mechanism. The contoured molded foam-covered board is upholstered with fabric. The front edge of the seat has a waterfall design. The seat is attached to a seat mechanism with four 5/16" screws into steel welded t-nuts.

An integral seat slide is attached to the under side of the seat board which allows the seat depth to be adjusted from 17" to 19-1/2". A black dust cover fabric shrouds the seat slide. The seat slide assembly is mounted to steel attachment brackets in the mechanism and seat plate that allow the seat to slide in and out.

Seat Mechanism
Chair features infinitely locking back angle, and tilt rocking.

Pneumatic Height Adjustment
Chair features pneumatic seat height adjustment from 18" to 23".

Backrest (vertically adjustable)
Backrest is constructed of 1/2" thick 9-ply plywood and 2-1/2" body-contoured molded foam. The outer back shell is upholstered ply-wood. The backrest is attached to a five-position ratcheting mechanism that provides 4" of vertical adjustment along a 1/4" thick x 4" wide high-strength steel J-bar. The J-bar is fastened directly to the seat mechanism with three 5/16" bolts.

T-Arms
Adjustable, heavy-duty arms have 2-3/4" vertical travel (from approximately 10" - 12-3/4" above the seat). There is 1-1/4" of width adjustment per side or 2-1/2" width adjustment total.

Loop Armrests
Main armrest support is made of 1/4" thick by 2-1/4" wide bent steel constructions. Armrests are attached to a solid steel reinforcement plate that spans from side to side and which is mounted to the seat board for increased arm strength. Armrest pads are self-skinning soft urethane material with steel inner structures. Loop arms are fixed height.

Base
Extra-wide 27" five-blade base constructed of heavy-duty composite. The center of the base has a patented non-slip ring where the pneumatic cylinder is mounted. A telescoping cylinder shroud conceals the heavy-duty pneumatic cylinder.

Casters
Heavy-duty 55mm diameter double wheels are molded of high-impact plastic with steel stud.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 2-1/2 yd x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage maybe requested.

Test samples must be sent to:

Pilot
Attn: C.O.M. Department
1110 S. Mildred Ave.
Ontario, CA 91761

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Assembly
Ship knocked-down (KD). Minimal assembly required.

Pirouette® Tables

Tables with Activ8 Electrical, Power Modules with 3-Prong Plug or No Power

October 2021

TECHNICAL SPECIFICATIONS

Tabletops
Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft. particleboard. Pirouette table is available with the 2 mm (74P) edge.

Flipping/Nesting Table Frame
The framework for table support and flipping/nesting operation consists of 30 mm x 50 mm x 3 mm thick wall steel tubing, with 4 mm thick formed steel support hubs welded to the tubes for mounting the legs. A 3 mm formed steel table support bracket is attached to the beam and hub structure using a 10 mm diameter steel pivot pin. #12 x 1 3/4" Phillips wood screws attach the framework brackets to the tabletop. A 9.9 mm steel hex rod connects the latch mechanism and is connected to a nylon release paddle on either end of the table base. The table latch release handle is actuated by squeezing the paddle on either end to the underside of the tabletop. Pulling upward raises the tabletop for nesting storage.

To lower the table, grasp the top center of the tabletop edge and lower the surface to allow the latches to engage once the surface is down. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spacers are molded nylon. The framework is shipped separately, ready to be assembled to the tabletop and legs.

Leg Assembly - Flipping/Nesting Table
The leg assembly consists of one right-hand leg and one left-hand leg. There are three leg depths. One depth fits 18" deep tables; one fits 24" and 30" deep tables; the other fits 36" deep tables. Leg height is fixed to provide 29" high tabletop height. An ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Café height of 36" and standing height of 42" are also available. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 4 mm thick steel pivot plate welded to it. The feet consist of two 4 mm thick blades welded to the leg tube. The blade covers are aluminum die cast, attached with self-tapping metal screws. The leg assemblies are bolted to the table frame structure using two M12 x 25 mm flat head bolts. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly. A hardware kit is shipped with the base that consists of a cover that must be installed after the leg assembly to prevent access to the pivot mechanism.

Leg Assembly - Fixed T-Base Table
Three T-Base leg depths are available. One depth fits 18" deep tables; one fits 24" and 30" deep tables; the other fits 36" deep tables. Leg height is fixed to provide 29" high tabletop height. An ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Café height of 36" and standing height of 42" are also available. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The feet consist of two 4 mm thick blades welded to the leg tube. The blade covers are aluminum die cast, attached with self-tapping metal screws. The leg assemblies are attached to the tabletops using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly.

Leg Assembly - Fixed TT-Base Table
Some larger fixed leg tables use a T or TT-base style leg. Available standard in one depth of 38" to fit 42" and 48" deep tables. Leg height is fixed to provide only 29" high tabletop height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The feet consist of two 4 mm thick blades welded to two leg tubes separated by a 1" x 2" welded steel cross tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly.

Furnishing Knowledge®

Pirouette® Tables
General Information

TECHNICAL SPECIFICATIONS

Leg Assembly - Fixed C-Base
Some shaped tables use three or four C-Base style legs. Available standard in one length of 14". Leg height is fixed to provide only 29" high tabletop height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The foot consist of one 4 mm thick blade welded to the leg tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The Leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly.

Leg Assembly - Fixed X-Base
Some Round and Square Shaped tables use X-Base style legs. Available in a standard 28" x 28" style foot configuration. 29", 36" and 42" tabletop height configurations are available on various sizes. Leg construction consists of 3" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The foot consist of one 4 mm thick blade welded to the leg tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly.

Casters and Glides
Each table includes either glides or casters. Each table with casters will include two wheel locking casters. Casters are made of molded nylon and are two-tone Starlight Silver and black. Glides are made of molded nylon and are two-tone black and white. Glides and casters are interchangeable without changing table height. Caster wheels are a minimum of 2.44" (62 mm) diameter. Caster wheel treads are medium hard (75 max Shore A) for easy mobility on carpet or hard floors. Glides have a smooth convex bottom surface for mobility. 2 3/4" diameter black nylon glides are optional. Glides have 1" of telescoping height adjustment that adjusts table height from 28 1/2" to 29 1/2". Steel 1/2" threaded stems attach the glides to legs. Casters and glides ship unassembled.

Ganging Mechanism
After installation of pegs, no tools are required to join tables together. Tabletops are pre-drilled for placement of ganging pegs. Two gangers and six pegs are included in the kit. If table is specified with power modules for Activ8, two gangers, eight pegs and all mounting screws are included in the kit. One kit per table joint is required. All ganging accessories are included for tables with Activ8 electrical. Field installed. Gangers are self-storing under the table when not in use. Ganging kits are ordered separately for all other table models.

Vertical Leg Wire Management
A color matched extrusion made of aluminum "snaps" to the Pirouette leg, managing cables and wires exiting power modules or through standard grommets installed on the tabletop. The extrusion is 12" long. Vertical wire managers are included when power options are ordered.

Wire Trough
If Activ8 components are included with the Pirouette Table, under table wire trough is provided. If Pirouette Tables come with PowerUp, Villa, or if a power module for Activ8 is ordered separately, then wire trough must be ordered separately. Constructed of 22-gauge steel with black powder-coated finish. Screws are provided for attachment to the underside of the top. Tops are pre-drilled for wire trough location.

Velcro® Wire Management
The Velcro® wire manager is constructed of 2" x 4 1/2" Velcro hook and loop material. The wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are pre-drilled for locating wire manager, but the manager may be applied in any convenient location. Two or four wire managers are included when power options are ordered. Field installed.

PowerUp® Module with 3-Prong Plug
Tables are available with one or two PowerUp modules with 3-prong plug per table. On tables with one module, it is located centered within the top width. Modules are spaced 2 7/8" from the tabletop back edge on 18", 24" and 30" deep tops. They are also spaced 2 7/8" from the tabletop back edge on 36" deep tops up to 72" in width. For tops that are 36" in depth and 84" or more in width, and for all 42" and 48" deep tops, the modules are located along the centerline of the top (front-to-back) and approximately 23" to 35" from the edge of the top depending on the top width. Tables with widths of 72" or less always receive one module, while tables with widths of 84" or more always receive two modules.

TECHNICAL SPECIFICATIONS

The PowerUp module is a UL listed, relocatable power tap, which is a surface mounted power module with a plastic cover. When open, one duplex power receptacle and two data jack openings are exposed. The module is 3 1/4" wide by 7" long and 2 1/4" tall when opened and fits securely into a 6 1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with either a 9 ft or 15 ft cord and 3-prong plug.

Villa™ Power Module with 3-Prong Plug

Tables are available with one or two Villa power modules with 3-prong plug. On tables with one module, it is located centered within the top width. Modules are spaced 3" from the back edge on 18", 24" and 30" deep tops. They are also spaced 3" from the back edge on 36" deep tops up to 72" in width. For tops that are 36" in depth and 84" or more in width, and for all 42" and 48" deep tops, the modules are located along the centerline of the top (front-to-back) and approximately 23" to 35" from the edge of the top depending on the top width. Tables with widths of 72" or less always receive one module, while tables with widths of 84" or more always receive two modules.

The Villa power module with 3-prong plug is an Intertek ETL Listed Furniture Power Distribution Unit surface module that mounts below a 6 1/4" x 3" grommet cutout in the tabletop. The module is 3 1/2" wide by 6 3/4" long and 2" tall when opened. The module comes standard with either a 9 ft or 15 ft cord and 3-prong plug, rated 120VAC, 15A. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included.

Activ8® Electrical

The Activ8 electrical system is a UL 962 recognized component that allows up to eight duplex power modules to be connected to one standard 15-amp power cord. Activ8 electrical system does not require modules to be connected in a certain order. The number of power modules connected is automatically limited to the maximum allowed under UL standard 962. If too many modules are connected, the Activ8 control box disconnects all power to the system and illuminates a red LED. Power is resumed automatically to the system once the extra power module or modules are disconnected, which is indicated by a green LED. The fuse on the power entry box can be reset as it is used to limit the number of devices on the chain. If the system receives a voltage spike, it would likely destroy the infeed box and would need to be replaced. Activ8 will not work with GFI/GFCI outlets or backup systems such as uninterrupted power supplies.

Activ8® Power Infeed

Series includes a standard NEMA 5-15P 15-amp plug on one end of the 108" cord and a non-sequentially keyed connector at the opposite end of the cord. Control box is located 12" from the table connection.

Built-in diagnostics LED shows system status:
- Green=power is on and system is working properly.
- Red=power has been stopped because too many modules are connected.
- LED off=input power is not available; check that power cord is plugged into an outlet, and that power is available to that outlet.

NOTE: The Activ8 Power infeed unit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number of tables in each ganging configuration, as well as the number of receptacles per table will determine the number of power infeed units required at any given installation.

Pirouette® Tables
General Information

TECHNICAL SPECIFICATIONS

PowerUp® Module for Activ8®

Tables are available with one or two PowerUp modules for Activ8 per table. On tables with one module, it is located centered within the top width. Modules are spaced 2 7/8" from the tabletop back edge on 18", 24" and 30" deep tops. They are also spaced 2 7/8" from the tabletop back edge on 36" deep tops up to 72" in width. For tops that are 36" in depth and 84"-96" or more in width, the modules are located along the centerline of the top (front-to-back) and approximately 18" from the edge. Tables with widths of 72" or less always receive one module, while tables with widths of 84" or more always receive two modules.

The PowerUp module for Activ8 is a surface mounted power module with a plastic cover. The module is 3 1/4" wide by 7" long and 2 1/4" tall when opened. The module has a dampened spring-loaded mechanism to allow the wait to open for use and close when not in use.When open, two simplex power receptacle and two data jack openings are exposed. A connector with three ports is located at the opposite end of the 12" cord. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Up to eight modules may be connected per infeed.

Villa™ Power Module for Activ8®

Tables are available with one or two Villa power modules for Activ8 per table. On tables with one module, it is located centered within the top width. Modules are spaced 3" from the back edge on 18", 24" and 30" deep tops. They are also spaced 3" from the back edge on 36" deep tops up to 72" in width. For tops that are 36" in depth and 84" or more in width, the modules are located along the centerline of the top (front-to-back) and approximately 23" to 35" from the edge of the top depending on the top width. Tables with widths of 72" or less always receive one module, while tables with widths of 84" or more always receive two modules.

The Villa power module for Activ8 is a surface module that mounts below a 6 1/4" x 3" grommet cutout in the tabletop. The module is 3 1/2" wide by 6 3/4" long and 2" tall when opened. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. A connector with three ports is located at the opposite end of the 12" cord. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included. Up to eight modules may be connected per infeed.

Flip Top Grommet

The flip top grommet is a surface mounted cover constructed of ABS plastic. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. They are available in four standard KI colors: Warm Grey, Sand, Black, and Blue Grey. Grommets have a flip-up receding door and are identical in size to the PowerUp module to allow for retrofitting of PowerUp at a later date. When the flip-up door is closed, the available opening for power or data cords is 1/2" wide by 5 3/4" long. Open door available space is 2 1/4" x 5 3/4". Field installed.

Fabric Wrapped Modesty Panel/Wire Management

The modesty panel is constructed of a heat-set, non-woven PET material, pressed into a flexible, durable and dent resistant panel. The panel is fabric wrapped, black only. The panel is hung by plastic clips that mount to the underside of the tabletop using wood screws. The modesty panel hangs freely when in use or when the tabletop is in its nested, upright position. The panel has a Velcro fastened pouch on the user side to route and hide cables or wires from electronic equipment to the optional vertical leg wire manager. The modesty panel measures 10 1/8" high (measured down from underside of the tabletop) by the width of the table by 3/4" thick.

Polyester Felt Modesty Panel

Modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft^2 and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high by 28 1/2", 34 1/2", 40 1/2", 46 1/2", 52 1/2", 58 1/2", 64 1/2", and 70 1/2" wide.

Mounting Hooks

The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 28 1/2", 34 1/2", 40 1/2" and 46 1/2" wide use two hooks per panel. Panels 52 1/2", 58 1/2", 64 1/2" and 70 1/2" wide use three hooks per panel.

STATEMENT OF LINE - Activ8 Electrical Options

NOTE: The Activ8 Power infeed unit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number of tables in each ganging configuration, as well as the number of receptacles per table will determine the number of power infeed units required at any given installation.

PRODUCT SPECIFICATIONS

Pirouette® Tables

Tables with Pattern™ Electrical, Power Modules with 3-Prong Plug or No Power

June 2022

TECHNICAL SPECIFICATIONS

Tabletops

Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft. particleboard. Pirouette table is available with the 2 mm (74P) edge.

Flipping/Nesting Table Frame

The framework for table support and flipping/nesting operation consists of 30 mm x 50 mm x 3 mm thick wall steel tubing, with 4 mm thick formed steel support hubs welded to the tubes for mounting the legs. A 3 mm formed steel table support bracket is attached to the beam and hub structure using a 10 mm diameter steel pivot pin. #12 x 1 3/4" Phillips wood screws attach the framework brackets to the tabletop. A 9.9 mm steel hex rod connects the latch mechanism and is connected to a nylon release paddle on either end of the table base. The table latch release handle is actuated by squeezing the paddle on either end to the underside of the tabletop. Pulling upward raises the tabletop for nesting storage.

To lower the table, grasp the top center of the tabletop edge and lower the surface to allow the latches to engage once the surface is down. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spacers are molded nylon. The framework is shipped separately, ready to be assembled to the tabletop and legs.

Leg Assemblies

Flipping/Nesting Table

The leg assembly consists of one right-hand leg and one left-hand leg, with three leg depth options. One depth fits 18" deep tables; one fits 24" and 30" deep tables; the other fits 36" deep tables. Leg height is fixed to provide 29" high tabletop height. An ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Café height of 36" and standing height of 42" are also available. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 4 mm thick steel pivot plate welded to it. The feet consist of two 4 mm thick blades welded to the leg tube. The blade covers are aluminum die cast, attached with self-tapping metal screws. The leg assemblies are bolted to the table frame structure using two M12 x 25 mm flat head bolts. Leg assemblies ship with blade covers installed but casters or glides must be installed upon assembly. A hardware kit is shipped with the base that consists of a cover that must be installed after the leg assembly to prevent access to the pivot mechanism.

Fixed T-Base Table

Three T-base leg depths are available. One depth fits 18" deep tables; one fits 24" and 30" deep tables; the other fits 36" deep tables. Leg height is fixed to provide 29" high tabletop height. An ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Café height of 36" and standing height of 42" are also available. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The feet consist of two 4 mm thick blades welded to the leg tube. The blade covers are aluminum die cast, attached with self-tapping metal screws. The leg assemblies are attached to the tabletops using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides must be installed upon assembly.

Fixed TT-Base Table

Some larger fixed leg tables use a T or TT-base style leg. Available standard in one depth of 38" to fit 42" and 48" deep tables. Leg height is fixed to provide only 29" high tabletop height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The feet consist of two 4 mm thick blades welded to two leg tubes separated by a 1" x 2" welded steel cross tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides must be installed upon assembly.

Furnishing Knowledge®

TECHNICAL SPECIFICATIONS

Fixed C-Base

Some shaped tables use three or four C-base style legs. Available standard in one length of 14". Leg height is fixed to provide only 29" high tabletop height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The foot consist of one 4 mm thick blade welded to the leg tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly.

Fixed X-Base

Some round and square shaped tables use X-base style legs. Available in a standard 28" x 28" style foot configuration. 29", 36" and 42" tabletop height configurations are available on various sizes. Leg construction consists of 3" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The foot consist of one 4 mm thick blade welded to the leg tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides need to be installed upon assembly.

Casters and Glides

Each table includes either glides or casters. Each table with casters will include two-wheel locking casters. Casters are made of molded nylon and are two-tone Starlight Silver and black. Glides are made of molded nylon and are two-tone black and white. Glides and casters are interchangeable without changing table height. Caster wheels are a minimum of 2.44" (62 mm) diameter. Caster wheel treads are medium hard (75 max Shore A) for easy mobility on carpet or hard floors. Glides have a smooth convex bottom surface for mobility. 2 3/4" diameter black nylon glides are optional. Glides have 1" of telescoping height adjustment that adjusts table height from 28 1/2" to 29 1/2". Steel 1/2" threaded stems attach the glides to legs. Casters and glides ship unassembled.

Ganging Mechanism

After installation of pegs, no tools are required to join tables together. Tabletops are pre-drilled for placement of ganging pegs. Two gangers and six pegs are included in each kit. If table is specified with power modules for Pattern™, two gangers, eight pegs and all mounting screws are included in the kit. One kit per table joint is required. All ganging accessories are included for tables with Pattern electrical. Field installed. Gangers are self-storing under the table when not in use. Ganging kits are ordered separately for all other table models.

Vertical Leg Wire Management

A color matched extrusion made of aluminum "snaps" to the Pirouette leg, managing cables and wires exiting power modules or through standard grommets installed on the tabletop. The extrusion is 12" long. Vertical wire managers are included when power options are ordered.

Wire Trough

The wire trough is a cord management accessory that is provided with the Pirouette table if Pattern components are specified with the order. If the Pirouette table is specified with any 3-prong plug module unit, then a wire trough must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish in all KI standard finishes. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides multiple access holes to feed wires, and includes cutouts for installation of additional Pattern snap-in RPT power modules.

Velcro® Wire Management

The Velcro wire manager is constructed of 2" x 4 1/2" Velcro hook and loop material. The wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are pre-drilled for locating wire managers, but a wire manager may be applied in any convenient location. Two or five Velcro wire managers are included when Pattern power modules are ordered, and wire clips are provided when power modules with 3-prong plugs are ordered. Field installed.

Pirouette® Tables
General Information-Pattern Electrical

TECHNICAL SPECIFICATIONS

Grommets

Flip-Top Grommets for Dean® & Nacre® Power Modules
Flip-top grommets are surface-mounted covers, constructed of 18-gauge steel. Grommets have a flip-up receding door and are identical in cutout size to the Nacre or Dean power modules listed below, which allows for retrofitting corresponding power modules at a later date. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. The flip-up door is designed to allow cords to remain routed through the opening while it is closed and allows for more cord routing space when the flip-up door is opened. Field installed.

Circular Grommet for Node® Power Module
The Node circular grommet is an open top, surface-mounted grommet constructed of aluminum. The overall diameter of 3.15" fits into a 3" diameter cutout in the surface. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. Not available in chrome. Field installed.

Power Modules

Dean In-Surface Power Module
Dean In-Surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Dean in-surface power modules. Data connectors are not supplied with the module and are purchased by the customer. The Dean in-surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. Module is mechanically attached to the worksurface with screws from the underside. The module has a molded plastic faceplate with steel trim and an aluminum housing. Modules comes standard with either 9' or 15' cord with a 3-prong plug, or a 20" cord with a Pattern™ connector. A 40" cord option is available for larger conference tables with two power modules. Dean power module is rated at 15 amps/120 volts and is UL listed.

Dean Clamp-On Power Module
Dean clamp-on power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A and one USB-C port, 2 amps per port. Dean clamp-on module Is 5.50" long by 3.06" wide by 3.38" high. The module has a smooth molded plastic faceplate with an anodized aluminum housing. Clamp-on mounting style positions the module at a right angle to the worksurface and uses two thumb screws for attachment, without the need for table cutouts. Clamp is 3" wide, extends $1^{3}/_{4}$" onto edge of surface and can accommodate a maximum surface thickness of $1^{1}/_{2}$". Modules come standard with either 3', 9' or 15' cord with a 3-prong plug, or a 40" cord with a Pattern connector. Dean power module is rated at 15 amps/120 volts and is UL listed.

Nacre Pop-Up In-Surface Module
Nacre Pop-Up In-Surface consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Nacre power modules. Data connectors are not supplied with the module and are purchased by the customer. Nacre is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout with .38" radius corners. The module is made of molded plastic. The module is a pop-up design with a dampened spring-loaded mechanism to allow the unit to smoothly open for use and close smoothly when not in use. Modules come standard with either 9' or 15' cord with a 3-prong plug, or a 20" cord with a Pattern connector. A 40" cord option is available for larger conference tables with two power modules. Nacre power module is rated at 15 amps/120 volts and is UL listed.

Dubbel™ Undersurface Power Module
Dubbel undersurface module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 1.75" tall by 5.25" deep. The module is made of molded plastic and secures under the worksurface with two $^{5}/_{16}$ x 2" Phillips round-head screws. Modules come standard with either 3', 9' or 15' cord with a 3-prong plug, or a 40" cord with a Pattern connector. Dubbel power module is rated at 15 amps/120 volts and is UL listed.

TECHNICAL SPECIFICATIONS

Node® In-Surface Power Module
Node In-Surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port , and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall fits and securely into a 3" diameter cutout. The module housing is made of plastic with a powder-coat painted aluminum faceplate. Modules come standard with either 9' or 15' cord with a 3-prong plug, or a 20" or 40" cord with a Pattern connector. Node power module is rated at 15 amps/120 volts and is UL listed.

Snap-In RPT Power Module
Snap-In RPT module is only available for use with Pattern™ electrical system. Snap-in module consists of two simplex receptacle ports (rated at 15 amps/125 volts). Snap-in RPT fits securely in user facing cutouts located on the wire trough, mounted under the table. Modules comes standard with a 20" or 40" pattern connector, rated at 15 amps/120 volts and is UL listed.

Pattern Electrical System
Select Pirouette table models can be configured with Pattern electrical system. The Pattern electrical system is ETL Listed, evaluated to safety standard UL 962A (USA) and CAN/CSA-C22.2 No. 308 (Canada). It allows for a maximum up to ten distribution blocks and up to 50' of power jumpers from the power infeed (in either direction), whichever comes first. Pattern allows up to eighteen power modules depending on table width, and connects to one 15-amp power supply cord (power infeed). Pattern is a non-sequential system and the infeed is compatible with ground fault interrupter (GFI/GFCI) outlets. Power modules for Pattern are specified as an option on Pirouette tables.

Pattern Power Distribution Blocks
Pattern power distributions blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, grey and white.

Pattern Table-to-Table Power Jumper Kits
Pattern table-to-table jumper power kits come with one grey distribution block and an appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to connect between distribution blocks. Table-to-table power jumper kits are ordered separately, according to layout configuration.

Pattern Power Infeed Kits
The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run.

Kit comes with one grey Pattern power distribution block, one 12" power jumper, one white Pattern power distribution block and Pattern power infeed cord. Power infeed consists of a 15-amp plug on one end of the 108" cord and a keyed connector at the opposite end of the cord.

Fabric Wrapped Modesty Panel/Wire Management
The fabric wrapped modesty panel is constructed of a heat-set, non-woven PET material, pressed into a flexible, durable and dent resistant panel. The panel is fabric wrapped, available in black only. The panel is hung by plastic clips that mount to the underside of the tabletop using wood screws. The modesty panel hangs freely when in use or when the tabletop is in its nested, upright position. The panel has a Velcro fastened pouch on the user side to route and hide cables or wires from electronic equipment to the optional vertical leg wire manager. The modesty panel measures $10^{1}/_{8}$" high (measured down from underside of the tabletop) by the width of the table by $^{3}/_{4}$" thick.

Pirouette® Tables
General Information-Pattern Electrical

TECHNICAL SPECIFICATIONS

Polyester Felt Modesty Panel

Polyester felt modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft^2 and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high by 28 1/2", 34 1/2", 40 1/2", 46 1/2", 52 1/2", 58 1/2", 64 1/2", and 70 1/2" wide.

Mounting Hooks

The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 28 1/2", 34 1/2", 40 1/2" and 46 1/2" wide use two hooks per panel. Panels 52 1/2", 58 1/2", 64 1/2" and 70 1/2" wide use three hooks per panel.

PRODUCT SPECIFICATIONS

Pirouette® HA Tables

Screw-Adjustable & Pneumatic-Adjustable Height

June 2022

TECHNICAL SPECIFICATIONS

Tabletops

Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft. particleboard. Pirouette table is available with the 2 mm (74P) edge.

Table Frames

Flipping & Nesting Base
The framework for table support and flipping/nesting mechanism consists of a set of steel hinge mechanisms which allow the top to be flipped vertical, allowing the table to be nested with a mating table. A 4 mm thick formed steel lower table support hinged using a 10 mm steel pin with a 3 mm thick worksurface mounting plate. A 9.9 mm steel hex rod joins the latch mechanisms and is connected to a nylon release paddle on each end of the table base. The tabletop lock paddle is actuated by pulling the paddle up on either end of the tabletop. Pulling upward rotates the tabletop for nesting storage. To lower the table, grasp the top center of the tabletop edge and rotate the surface down until the latches engage when the surface is horizontal. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spacers are molded nylon. The framework is shipped separately, ready to be assembled to the tabletop and legs. #12 x 1 1/2" Phillips wood screws attach the framework to the to the tabletop.

Fixed-Top Base
The table support framework for the fixed-top, non-nesting table consists of a pair of 7-gauge formed steel enclosures. The steel enclosures are welded directly to the 1 3/4" diameter, 14-gauge upper leg tube for both the pneumatic and screw adjustable-height versions. Each plate is attached to the tabletop using four #12 x 1" screws.

Leg Assemblies

Pneumatic-Adjustable Height Leg (Nesting-Top Base)
An 11-gauge steel leg support bracket is welded to the 1 3/4" diameter, 14-gauge upper leg tube. The lower leg structure consists of 4 mm steel feet welded to a 2 1/4" diameter, 14-gauge steel vertical tube. The inner leg tube is supported in the lower leg tube by a set of Delrin glide bushings. Housed inside each leg tube is a pneumatic cylinder which includes a locking feature to prevent vertical movement when any force is applied to the worksurface and the cylinder is not actuated. Each leg assembly is attached to the mechanism using four total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. The legs are joined by a 1 1/4" by 2", 14-gauge rectangular steel tube cross-brace bar that is secured in place with six total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. Leg assemblies ship with foot covers installed, but casters or glides must be installed upon assembly.

On Pneumatic-adjustable height tables, the tabletop adjusts up and down between 29" and 44" from the floor by activating a pneumatic cylinder using a lever located under the user side of the worksurface.

Screw-Adjustable Height Leg (Nesting-Top Base)
An 11-gauge steel leg support bracket is welded to the 1 3/4" diameter, 14-gauge upper leg tube. The lower leg structure consists of 4 mm steel feet welded to a 2 1/4" diameter, 14-gauge steel outer vertical tube. The inner leg tube is supported in the lower, outer leg tube by a set of Delrin glide bushings. The inner tube contains a set of threaded adjustment holes spaced 1" apart which mate up with two holes on the outer leg. By removing the 1/4-20 x 1/2" locking screws, the tabletop height may be adjusted in 1" increments. Each leg assembly is attached to the mechanism using four total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. The legs are joined by a 1 1/4" by 2", 14-gauge rectangular steel tube cross-brace bar that is secured in place with six total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. Leg assemblies ship with foot covers installed, but casters or glides must be installed upon assembly.

On screw-adjustable height tables, the top of the tabletop adjusts up and down between 29" and 44" from the floor by manually removing the two locking set screws located on the inside of each leg below the lower cross-brace, and adjusting the top up or down in 1" increments, then replacing the locking set screws.

Leg Assemblies (cont.)

Pneumatic-Adjustable Height Leg (Fixed-Top Base)
An 11-gauge steel leg support bracket is welded to the 1 3/4" diameter, 14-gauge upper leg tube. The lower leg structure consists of 4 mm steel feet welded to a 2 1/4" diameter, 14-gauge steel outer vertical tube. The inner leg tube is supported in the lower leg tube by a set of Delrin glide bushings. Housed inside each leg tube is a pneumatic cylinder which includes a locking feature to prevent vertical movement when any force is applied to the worksurface and the cylinder is not actuated. Each leg assembly is attached to the mechanism using four total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. The legs are joined by a 1 1/4" by 2", 14-gauge rectangular steel tube cross-brace bar that is secured in place with six total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. Leg assemblies ship with foot covers installed, but casters or glides must be installed upon assembly.

On Pneumatic-adjustable height tables, the tabletop adjusts up and down between 29" and 44" from the floor by activating a pneumatic cylinder using a lever located under the user side of the worksurface.

Screw-Adjustable Height Leg (Fixed-Top Base)
An 11-gauge steel leg support bracket is welded to the 1 3/4" diameter, 14-gauge upper leg tube. The lower leg structure consists of 4 mm steel feet welded to a 2 1/4" diameter, 14-gauge steel outer vertical tube. The inner leg tube is supported in the lower, outer leg tube by a set of Delrin glide bushings. The inner tube contains a set of threaded adjustment holes spaced 1" apart which mate up with two holes on the outer leg. By removing the 1/4-20 x 1/2" locking screws, the tabletop height may be adjusted in 1" increments. Each leg assembly is attached to the mechanism using four total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. The legs are joined by a 1 1/4" by 2", 14-gauge rectangular steel tube cross-brace bar that is secured in place with six total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. Leg assemblies ship with foot covers installed, but casters or glides must be installed upon assembly.

On screw-adjustable height tables, the top of the tabletop adjusts up and down between 29" and 44" from the floor by manually removing the two locking set screws located on the inside of each leg below the lower cross-brace, and adjusting the top up or down in 1" increments, then replacing the locking set screws.

Casters and Glides

Each table includes either glides or casters. Tables with casters will include two-wheel locking casters, made of molded nylon and are two-tone Starlight Silver and black. Glides are made of molded nylon and are two-tone black and white. Glides and casters are interchangeable without changing table height. Caster wheels are a minimum of 2.44" (62 mm) diameter. Caster wheel treads are medium hard (75 max Shore A) for easy mobility on carpet or hard floors. Glides have a smooth convex bottom surface for mobility. 2 3/4" diameter black nylon glides are optional. Glides have 1" of telescoping height adjustment to level the table height. Steel 1/2" threaded stems attach the glides to legs. Casters and glides ship unassembled.

Wire Management

Cable Trough
The cable trough is a cable and cord management accessory that is provided on all versions of the table. Constructed of 18-gauge steel with a black powder-coated finish. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for cable trough locations. Provides multiple access holes to feed wires, and cables.

Vertical Leg Wire Management
A color matched extrusion made of aluminum "snaps" to the Pirouette leg, managing cables and wires exiting power modules or through standard grommets installed on the tabletop. The extrusion is 12" long. Vertical wire managers are included when power options are ordered.

Velcro® Wire Management
The Velcro wire manager is constructed of 2" x 4 1/2" Velcro hook and loop material. The wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are pre-drilled for locating wire managers, but a wire manager may be applied in any convenient location. Wire clips are provided when power modules with 3-prong plugs are ordered. Field installed.

Grommets

Flip-Top Grommets for Dean® & Nacre® Power Modules
Flip-top grommets are surface-mounted covers, constructed of 18-gauge steel. Grommets have a flip-up receding door and are identical in cutout size to the Nacre or Dean power modules listed below, which allows for retrofitting corresponding power modules at a later date. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. The flip-up door is designed to allow cords to remain routed through the opening while it is closed and allows for more cord routing space when the flip-up door is opened. Field installed.

Circular Grommet for Node® Power Module
The Node circular grommet is an open top, surface-mounted grommet constructed of aluminum. The overall diameter of 3.15" fits into a 3" diameter cutout in the surface. One grommet ships per table, which is located in the center of the tops. Two grommets ship per conference table, which are located near the center of the tops. Grommets are finished with powder-coat paint and available in all KI paint colors. Not available in chrome. Field installed.

Power Modules

Dean In-Surface Power Module with 3-Prong Plug
Dean In-Surface power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Dean in-surface power modules. Data connectors are not supplied with the module and are purchased by the customer. The Dean in-surface module is 8.12" long by 2.31" wide by 2.5" high and fits securely into a 7.81" x 1.93" cutout. Module is mechanically attached to the worksurface with screws from the underside. The module has a molded plastic faceplate with steel trim and an aluminum housing. Modules comes standard with either 9' or 15' cord with a 3-prong plug. Dean power module is rated at 15 amps/120 volts, and is UL listed.

Dean Clamp-On Power Module with 3-Prong Plug
Dean clamp-on power module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A and one USB-C port, 2 amps per port. Dean clamp-on module Is 5.50" long by 3.06" wide by 3.38" high. The module has a smooth molded plastic faceplate with an anodized aluminum housing. Clamp-on mounting style positions the module at a right angle to the worksurface and uses two thumb screws for attachment, without the need for table cutouts. Clamp is 3" wide, extends $1^{3}/_{4}$" onto edge of surface and can accommodate a maximum surface thickness of $1^{1}/_{2}$". Modules come standard with either 3', 9' or 15' cord with a 3-prong plug. Dean power module is rated at 15 amps/120 volts, and is UL listed.

Nacre Pop-Up In-Surface Module with 3-Prong Plug
Nacre Pop-Up In-Surface consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Nacre power modules. Data connectors are not supplied with the module and are purchased by the customer. Nacre is 7.25" long by 3.31" wide by 2.92" high and fits securely into a 6.94" x 3" cutout with .38" radius corners. The module is made of molded plastic. The module is a pop-up design with a dampened spring-loaded mechanism to allow the unit to smoothly open for use and close smoothly when not in use. Modules come standard with either 9' or 15' cord with a 3-prong plug. Nacre power module is rated at 15 amps/120 volts, and is UL listed.

Dubbel™ Undersurface Power Module with 3-Prong Plug
Dubbel undersurface module consists of two simplex receptacle ports (rated at 15 amps/125 volts), one USB-A port and one USB-C port, 2 amps per port. Dubbel is 7.63" wide by 1.75" tall by 5.25" deep. The module is made of molded plastic and secures under the worksurface with two $^{5}/_{16}$ x 2" Phillips round-head screws. Modules come standard with either 3', 9' or 15' cord with a 3-prong plug. Dubbel power module is rated at 15 amps/120 volts, and is UL listed.

TECHNICAL SPECIFICATIONS

Power Modules (cont.)

Node® In-Surface Power Module with 3-Prong Plug
Node In-Surface power module consists of one simplex receptacle port (rated at 15 amps/125 volts), includes one USB-A port , and one USB-C port, 2 amps per port. Node is 3.38" in diameter by 3.30" tall fits and securely into a 3" diameter cutout. The module housing is made of plastic with a powder-coat painted aluminum faceplate. Modules come standard with either 9' or 15' cord with a 3-prong plug. Node power module is rated at 15 amps/120 volts, and is UL listed.

PowerUp® Module with 3-Prong Plug
The PowerUp module is a UL listed, relocatable power tap, which is a surface mounted power module with a plastic cover. When open, one duplex power receptacle and two data jack openings are exposed. The module is $3^{1}/_{4}$" wide by 7" long and $2^{1}/_{4}$" tall when opened and fits securely into a $6^{1}/_{4}$" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with either a 9 ft or 15 ft cord and 3-prong plug.

Villa™ Power Module with 3-Prong Plug
The Villa power module with 3-prong plug is an Intertek ETL Listed Furniture Power Distribution Unit surface module that mounts below a $6^{1}/_{4}$" x 3" grommet cutout in the tabletop. The module is $3^{1}/_{2}$" wide by $6^{3}/_{4}$" long and 2" tall when opened. The module comes standard with either a 9 ft or 15 ft cord and 3-prong plug, rated 120VAC, 15A. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included.

Fabric Wrapped Modesty Panel/Wire Management
The fabric wrapped modesty panel is constructed of a heat-set, non-woven PET material, pressed into a flexible, durable and dent resistant panel. The fabric wrapped panel is available in black only. The panel is hung by plastic clips that mount to the underside of the tabletop using wood screws. The modesty panel hangs freely when in use or when the tabletop is in its nested, upright position. The panel has a Velcro fastened pouch on the user side to route and hide cables or wires from electronic equipment to the optional vertical leg wire manager. The modesty panel measures $10^{1}/_{8}$" high (measured down from underside of the tabletop) by the width of the table by $^{3}/_{4}$" thick.

Polyester Felt Modesty Panel
Polyester felt modesty panels are constructed from a sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft^2 and are sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A-Mount testing method) and an NRC rating of .81 with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are $9^{1}/_{4}$" high by $28^{1}/_{2}$", $34^{1}/_{2}$", $40^{1}/_{2}$", $46^{1}/_{2}$", $52^{1}/_{2}$", $58^{1}/_{2}$", $64^{1}/_{2}$", and $70^{1}/_{2}$" wide.

Mounting Hooks
The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels $28^{1}/_{2}$", $34^{1}/_{2}$", $40^{1}/_{2}$" and $46^{1}/_{2}$" wide use two hooks per panel. Panels $52^{1}/_{2}$", $58^{1}/_{2}$", $64^{1}/_{2}$" and $70^{1}/_{2}$" wide use three hooks per panel.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.

74P	- 74P edge

C Select power option.

NNN	- No grommets, PowerUp, wire management/No cutouts
WMO	- Wire management only-no cutouts; add $64
1VG	- One grommet for Villa; add $271
1PG	- One plastic grommet; add $209
1PU	- One PowerUp module; add $334
1VM	- One Villa module w/dual USB-A; add $592
MA1	- Module, Nacre in-surface w/USB-A/C (1); add $420
MB1	- Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
MD1	- Module, Dean in-surface w/USB-A/C (1) ; add $354
MO1	- Module, Node in-surface w/USB-A/C (1) ; add $264

D Select modesty panel.

FMP	- Fabric modesty panel; add $364
NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $182

E Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

F Select surface finish.
Refer to the **Product Color Options** page in this price list.

GA1	- Grommet, Nacre (1); add $209
GD1	- Grommet, Dean (1); add $209
GO1	- Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

G Select leg finish.
Refer to the **Product Color Options** page in this price list.

H Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

I Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

J Select base.

4EC	- 4 casters
4GB	- 4 black glides

Casters=2 locking/2 non-locking, black wheel, silver hub

K Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge

Ⓒ Select power option.

NNN	- No grommets, PowerUp, wire management/No cutouts
WMO	- Wire management only-no cutouts; add $64
1VG	- One grommet for Villa; add $271
1PG	- One plastic grommet; add $209
1PU	- One PowerUp module; add $334
1VM	- One Villa module w/dual USB-A; add $592
MD1	- Module, Dean in-surface w/USB-A/C (1) ; add $354
MB1	- Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
MA1	- Module, Nacre in-surface w/USB-A/C (1); add $420
MO1	- Module, Node in-surface w/USB-A/C (1) ; add $264
GA1	- Grommet, Nacre (1); add $209
GD1	- Grommet, Dean (1); add $209
GO1	- Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.

NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $265

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

Ⓙ Select base.

4EC	- 4 casters
4GB	- 4 black glides

Casters=2 locking/2 non-locking, black wheel, silver hub

Ⓚ Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.

74P	- 74P edge

C Select power option.

NNN	- No grommets, PowerUp, wire management/No cutouts
WM0	- Wire management only-no cutouts; add $64
1VG	- One grommet for Villa; add $271
1PG	- One plastic grommet; add $209
1PU	- One PowerUp module; add $334
1VM	- One Villa module w/dual USB-A; add $592
MD1	- Module, Dean in-surface w/USB-A/C (1) ; add $354
MB1	- Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
MA1	- Module, Nacre in-surface w/USB-A/C (1); add $420
MO1	- Module, Node in-surface w/USB-A/C (1) ; add $264
GA1	- Grommet, Nacre (1); add $209
GD1	- Grommet, Dean (1); add $209
GO1	- Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

D Select modesty panel.

NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $265

E Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

F Select surface finish.
Refer to the **Product Color Options** page in this price list.

G Select leg finish.
Refer to the **Product Color Options** page in this price list.

H Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

I Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

J Select base.

4EC	- 4 casters
4GB	- 4 black glides

Casters=2 locking/2 non-locking, black wheel, silver hub

K Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
- **74P** - 74P edge

Ⓒ Select power option.
- **NNN** - No grommets, PowerUp, wire management/No cutouts
- **WMO** - Wire management only-no cutouts; add $64
- **1VG** - One grommet for Villa; add $271
- **1PG** - One plastic grommet; add $209
- **1PU** - One PowerUp module; add $334
- **1VM** - One Villa module w/dual USB-A; add $592
- **MD1** - Module, Dean in-surface w/USB-A/C (1) ; add $354
- **MB1** - Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
- **MA1** - Module, Nacre in-surface w/USB-A/C (1); add $420
- **MO1** - Module, Node in-surface w/USB-A/C (1) ; add $264

Ⓓ Select modesty panel.
- **NMP** - No modesty panel
- **PMP** - Polyester felt modesty panel; add $265

On 30"D tables, modesty panels only available if no power (NNN) is selected.

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

- **GA1** - Grommet, Nacre (1); add $209
- **GD1** - Grommet, Dean (1); add $209
- **GO1** - Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓘ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

Ⓙ Select base.
- **4EC** - 4 casters
- **4GB** - 4 black glides

Casters=2 locking/2 non-locking, black wheel, silver hub

Ⓚ Select cord length (feet).
- **15** - 15' cord length
- **9** - 9' cord length

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge

Ⓒ Select power option.

NNN	- No grommets, PowerUp, wire management/No cutouts
WMO	- Wire management only-no cutouts; add $64
1VG	- One grommet for Villa; add $271
1PG	- One plastic grommet; add $209
1PU	- One PowerUp module; add $334
1VM	- One Villa module w/dual USB-A; add $592
MA1	- Module, Nacre in-surface w/USB-A/C (1); add $420
MB1	- Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
MD1	- Module, Dean in-surface w/USB-A/C (1) ; add $354
MO1	- Module, Node in-surface w/USB-A/C (1) ; add $264
GA1	- Grommet, Nacre (1); add $209
GD1	- Grommet, Dean (1); add $209
GO1	- Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.

FMP	- Fabric modesty panel; add $364
NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $182

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

Ⓙ Select base.

4EC	- 4 casters
4GB	- 4 black glides

Casters=2 locking/2 non-locking, black wheel, silver hub

Ⓚ Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge

Ⓒ Select power option.

NNN	- No grommets, PowerUp, wire management/No cutouts
WMO	- Wire management only-no cutouts; add $64
1VG	- One grommet for Villa; add $271
1PG	- One plastic grommet; add $209
1PU	- One PowerUp module; add $334
1VM	- One Villa module w/dual USB-A; add $592
MA1	- Module, Nacre in-surface w/USB-A/C (1); add $420
MB1	- Module, Dubbel under-surface w/ dual USB-A/C (1); add $264
MD1	- Module, Dean in-surface w/USB-A/C (1) ; add $354
MO1	- Module, Node in-surface w/USB-A/C (1) ; add $264
GA1	- Grommet, Nacre (1); add $209
GD1	- Grommet, Dean (1); add $209
GO1	- Grommet, Node (1); add $144

CORD LENGTH: 9' or 15' is optional on all module options.

WIRE MANAGEMENT: All options except NNN include vertical and horizontal wire management.

Ⓓ Select modesty panel.

NMP	- No modesty panel
FMP	- Fabric modesty panel; add $364
PMP	- Polyester felt modesty panel; add $182

On 30"D tables, modesty panels only available if no power (NNN) is selected.

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select leg finish.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

Ⓙ Select base.

4EC	- 4 casters
4GB	- 4 black glides

Casters=2 locking/2 non-locking, black wheel, silver hub

Ⓚ Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

SPECIFICATIONS

Bases
The Portico double pedestal base table employs 14-gauge, 1-3/4" round steel upright columns and 16-gauge, 1-3/4" x 7/8" elliptical steel foot tubes in fixed, folding or flip-top models.

Portico includes T, TT, LX and cantilevered T base combinations. LX bases consist of 14-gauge, 3" round steel upright columns and 16-gauge, 1-3/4" x 7/8" elliptical steel foot tubes. Fixed table columns are welded to an 8" x 8" formedsteel plate.

Portico bases are available in powder coat or bright chrome finish with plastic trim pieces (end caps and column caps) that can be color-matched to the vinyl table edge colors. Plastic end caps are secured via a "forcefit." The column cap is secured via a #8 x 3/4" tap screw.

Adjustable glides are secured to the foot tubes by threaded inserts. Self-leveling glides are available by Product Modification Request only.

Portico Table's Folding Mechanism
Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit between leg and mechanism. Built-in nylon bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces
1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled. A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top
Standard flip-top table does not have a detachable top.

Portico Plus Ganging Mechanism
Built of black high-strength nylon, userfriendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table.

CAUTION: Gangers are not retrofittable to earlier purchased tables.

Folding Modesty Panels
.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Mounting brackets are black and packed with the base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. Panel ships k.d.

Bright Chrome Finish
Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Powder-Coated Finish
Hybrid powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

Quick-Release Modesty Panels
.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge of modesty panel extends 7-1/4" from underside of table.

Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Modesty panel is shipped k.d.

Portico Table Truck
Black powder-coated finish. Two swivel and two rigid 6" diameter casters with heavy-duty roller bearings. Rectangular or square table storage. Truck measures 60" long by 30" wide. Felt is standard on top edges. Six-table capacity is standard. Four-table capacity for short fold.

Portico Lightweight Table
Top is 5-ply construction consisting of .050" thick laminate, 5.2mm 3-ply plywood, .75" thick high-density particleboard frame with honeycomb core, 5.2mm 3-ply plywood and .040" HPL backer.

Portico with PowerUp
Portico tables are available with one or two power/data modules, centrally located 4-1/4" from the front edge of table top.

PowerUp is a UL Listed, Relocatable Power Tap, which mounts flush into the table top. When flipped up, cover open, one (1) duplex receptacle and two (2) data ports are exposed. The underside of the table is provided with a hinged plastic channel (cord management trough) which covers the bottom of the power supply cords and data lines.

The PowerUp module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15 ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks.

Cords are further managed by the vertical leg wire manager of PowerUp.

Under-Table Wire Management
Constructed of high quality black velcro. Harness is fastened to table bottom with screws. Shipped assembled. Wire management options HO, HW and WO are only available on rectangle tables 96" and smaller (not available on any cantilever, flip-top or folding tables).

Leg Wireways
Scuff-resistant, high-impact rigid plastic. Two separate wire channels per leg. Fastened to legs with full length adhesive bond. Black only. One wireway per leg. Shipped assembled. Two leg wireways per top. Not available on 18" x 60" fixed base tables, 18" x 60" and 24" x 60" cantilevered base and folding tables.

Grommets
Plastic grommets are 3" diameter and recessed into table top. Cap is removable and has retractable slot cover. Two grommets per top. Grommets not available on 18" x 60" fixed base tables, 18" x 60" and 24" x 60" cantilevered base and folding tables. Grommet location for tables that are 36" deep and smaller will be on the corners of the table. Grommet location for the tables 42" deep and larger will be the centerline of the table. See graphics above.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
15W	- 1-3/4" Wood bullnose

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select plastic end cap color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available. Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select plastic end cap color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available. Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select plastic end cap color.
Refer to the **Product Color Options** page in this price list.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

INFORMATION

Overall Thickness
The overall thickness of a folded Portico® table will vary depending on the table size. If the table requires a short fold base, the folded thickness will be 6-3/4". If the table uses a standard folding base, the folded thickness will be 4-1/4".

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select plastic end cap color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

Ⓗ Select module color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Base Options
Casters:
Black only. Add a "/C" to end of model number for casters. Casters are factory installed, not field installable. Casters are all locking.
Upcharge is list $73 per table.

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The maximum height is 42".

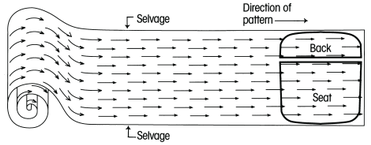
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

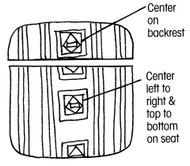


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrir To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications to be processed and shipped early, KI will ent the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material a the time of shipment unless expressly request to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M. C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

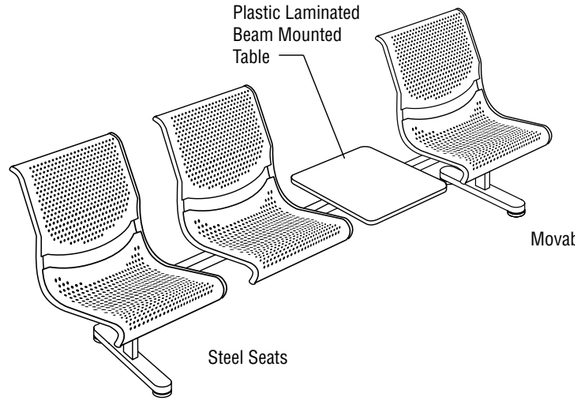
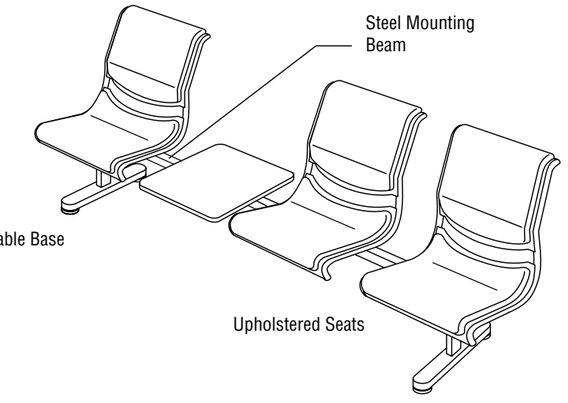
Overall Dimensions				
Seat height w/fixed bases	30"*			
Seat height w/embedded bases	30"*			
Seat height w/movable bases	30 3/4"* (w/glides fully inserted)			

***** For units with upholstery, add additional 7/8" **Note:** Tables are the same height as benches. Glides could add 1/2" when fully extended.





SPECIFICATIONS

Seat, Benches, or Metal Tables with Perforated Steel Exteriors
14-ga. Sheet steel, die formed and welded to a 1" x 14 ga. Seam welded tubular steel frame. Perforations are 3/8" diameter.

Arms
Constructed of 1" x 14-ga. Tubular steel, die formed and welded to mounting yoke. Textured plastic arm cap is permanently attached.

Mounting
Seats, benches and tables have steel spiders and yokes welded into an integral unit. The yoke is placed over the steel beam and secured with bolts.

Beams
Beams 11-ga. 1-1/2" x 2" seamless steel. Plastic end caps.

Freestanding Base
14-ga., 1.5 x 4 rectangular seam welded tubular steel column. Cast aluminum base is bolted to the column. Either a yoke or yoke cover are welded to the top for securing to the beam with bolts. Adjustable glides.

Wallsaver Extension
Attaches to base with rear glide. Contacts the wall at the floor to prevent seat back from touching the wall. Black only.

Anchored Base
The base may be drilled for anchoring with 3/8" diameter bolts. Anchoring bolts not provided.

Embedded Base
14-ga., 1.5 x 4 rectangular seam welded tubular steel column. 16" length for embedding in concrete. Either a yoke or yoke cover are welded to the top for securing to the beam with bolts.

Metal Finsh
Indoor finishes are nonchipping epoxy powder, electrostatically applied, then baked on. Outdoor finishes are nonchipping poiyester powder, electrostatically applied, then baked on over a rust-inhibiting sealer.

"L" Corner Table Assembly
For mounting modular units at a 90 degree angle. Corners are formed by mounting beam extensions joined by a table top and supported by a leg for each beam. A 2-5/8" o.d. leg with a leveling glide supports the back corner of the table top. Corner table surfaces match in-line tables.

Plastic Laminate In-line Tables
May be used in place of seats on the beam, or for corner table applications. Solid core top 7/8" thick consisting of high-density particle board with plastic laminate surface and vinyl bullnose edge. Rounded corners. For interior use only.

FIRE RETARDANTS

Upholstered Seating items:
Fire retardant treatment (FR) allows seating products to be manufactured using the appropriate flame retardant materials and fabric selections for compliance to California Technical Bulletin 133.

Order Review/Design Service
It is KI's policy with this product to check all incoming orders for accuracy. When ordering, please provide a plan-view sketch and identify desired components.

KI will provide a design and engineering service, upon request, to tailor this product to your needs. This includes a comprehensive proposal. Contact KI for further information.

INFORMATION

Design
Designed by the KI Design Team.

C.O.M. and C.O.V. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 12" x 12" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Leather must be free of imperfections.

Test samples must be sent to:
KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

INFORMATION

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

RoomScape® Furniture
General Information

SPECIFICATIONS

Bed
The bed is composed of: 1) bed frame ends, 2) caps, glides and stacking devices, 3) bed deck assembly, 4) lower horizontal reinforcing member (lofting applications only). See dimensions page for combination of components and dimensions.

Bed Frame Ends
Bed frame ends are fabricated of two heavy 14-gauge steel tubular uprights. A vertical slotted pattern on 1" centers is located on the front and back of each to accept and provide height adjustment of bed deck and hang-on components. Two 14-gauge uprights are joined by three horizontal 1- 1/4" round steel tubes which are welded to the tubular uprights to create a ladder effect. Electrostatically applied epoxy powder finishes applied for maximum durability.

Top Caps, Base Glides and Stacking Devices
Caps and glides are black molded nylon for maximum strength and are inserted into the ends of the vertical tubes of the bed frame ends. They utilize a friction fit so as to eliminate accidental dislodgement yet be capable of removal or installation when lofting or delofting beds.

Stacking devices are molded of black glass reinforced nylon for maximum torsional strength. They insert with friction fit into top and bottom of the bed frame ends to provide structural joinery for bunked or lofted beds.

Deck Assembly
The board deck frame assembly is composed of two 11-gauge steel rails with a series of hooks on each end that fasten into the vertical slots of the bed frame end. They are height adjustable from top to bottom anywhere along the vertical slot pattern of the upright. A side rail of 5/8" thick, 45-lb. density particle board with .030 high-pressure laminate face, .028 backer sheet and Polypropylene edge band is attached to the outside surface of the steel bed rails for a finished appearance. Four 16-gauge formed steel deck stringers drop into belt loop style embosses that are equally spaced on the bed rails. These deck stringers span between the two rails and support the solid bed deck. Electrostatically applied epoxy powder is applied for maximum durability.

The bed deck is composed of three 3/4" thick 45-lb. density particle board deck boards which have white melamine top and bottom surface to resist stains and to provide a light, finished appearance to the underside. They are edged banded with white Polypropylene. The deck boards lay in from above on top of the steel deck stringers and are captured at the ends of the bed to prevent sliding. The deck boards are 36-1/4W x 26-3/8"L and are universal end-to-end and top-to-bottom.

Spring Bed Deck Assembly
The spring bed assembly consists of an all steel riveted construction. Primarily, the perimeter frame is made with 1-1/2" x 2" x 5/32" thick angles and includes 4 – 1" x 11ga. corner gussets, 2 – 1" dia. cross tubes. The internal portion of the frame is designed for comfort; it consists of action arc z-hooks, (6) 8ga. and (10) 9ga. wire and is connected together by (36) 12ga. helical springs and (160) 12ga. wire links. Electrostatically applied epoxy powder is applied to the complete assembly for maximum durability. A side rail of 5/8" thick, 45-lb. density particle board with .030 high-pressure laminate face, .028 backer sheet and Polypropylene edge band is attached to the outside surface of the steel bed rails for a finished appearance, the11-gauge steel bed rails have a series of hooks on each end to fasten into the vertical slots of the bed frame end.

Sleeping Surfaces
Sleeping surface (or mattress size) is 36" x 80". 13-gauge contract unit, boric acid felt each side, insulator pad each side, 7" thick, foam corners with black polyester tape. Cover is flanged and hog ringed to unit coils to hold insulation in proper place. Mattresses are wrapped in 4mm plastic film. Meets Federal Government Flammability Standards DOC FF4-72. Covering-210 Denier nylon Oxford/urethane coating. Bed bug resistant.

Lower Reinforcing Member
The lower reinforcing member is positioned at the lower back side of a loft bed assembly to provide structural integrity. It is a 1" thick x 7-9/16"H x 80"L fabricated box section comprised of 18-gauge and 11-gauge steel with a series of hooks on each end for attachment to the bed frame ends. It is not required for single or bunk bed configurations. It is coated with electrostatically applied epoxy powder for maximum durability.

Anti-racking Bar
The Universal Anti-racking Bar is made from 16 Gage round steel tube and 14 gage bracketry to lock it into the patterned slots of the bed ends. Each end of the anti-racking bar has brackets with teeth that mount it into the bend end slots and locks that secure it from being dislodged. The lock is secured with tightening of a hand wheel screw.

Hang-on Worksurfaces
Worksurfaces are constructed of 45-lb. high density particle board laminated with .030 face sheet and .028 backer sheet of high-pressure laminate. Polypropylene edges provide optimal durability.

Worksurfaces are supported by two 14- gauge drawn steel cantilever brackets which hook into the slotted channels of the bed uprights. This provides height adjustability to suit the comfort of the student. Brackets are designed to prevent accidental dislodgement. A 1-1/8"H x 2-1/8"W cutout is located in the upper rear corner of each bracket to allow cables from the worksurface to drop over the edge and pass through the bracket.

PowerUp® option provides two grounded power outlets and voice and data terminal connections locations. Standard with 9" grounded cord. One PowerUp® module centered left to right at the rear of the surface.

Hang-on Tack boards
The tackboard is constructed of fabric upholstered 3/4" thick industrial grade micore. It is attached to an 11-gauge powder-coated steel back which incorporates hooks for hanging on the bed frame end.

Hang-on Megasurface
Megasurfaces are constructed the same as regular hang-on worksurfaces but are composed of two 15" x 37" x 40" x 18" corner surfaces to provide maximum worksurface ideal for computers. The surfaces span the full length under the loft and have a concave edge on the user side creating a wrap around effect. A full-length tackboard 80"L x 16"H is included providing tackable space and worksurface support.

PowerUp® option provides two grounded power outlets and voice and data terminal connections locations. Standard with 9" grounded cord. Two PowerUp® modules provided, one in each rear corner.

Hang-on Shelf Unit
End panels of the shelf are particle board covered by .030 high-pressure laminate with the edge banded by matching Polypropylene edge banding. The steel bottom shelf is 16-gauge steel, powder-coat paint. The steel back is 11-gauge and incorporates hooks to hang the shell at the desired height from the bed frame. Hook design prevents accidental dislodging.

Task Light
UL Listed task light attaches to the flange on the underside of shelf or flipper door cabinet. Includes a 15 watt cool white lamp and 8" cord with grounded plug. Included 16" cord manager attaches to slotted channel in bed frame and manages cables above or below worksurface. Black only.

Mobile and Freestanding Pedestal
One piece 20-gauge steel shell with enclosed 20-gauge top. 22-gauge, 3-piece welded drawers with multiple offsets providing maximum strength and moisture resistance. Heavy-duty steel ball-bearing drawer suspensions. Lock options: no lock, "Top drawer only" lock which provides security to the top drawer via user supplied padlock, or double bitted/removable core key lock (on steel front units only). Freestanding units supplied with counterbalance weight. Mobile units have caster located in bottom of lower drawer front to prevent forward tipping. Painted with high-quality baking enamel. Four heavy-duty casters (2 locking) provide mobility for mobile pedestals.

Steel front pedestals have 20-gauge, double wall fronts with integral drawer pull. Front painted to match the pedestal shell.

Pedestals with woodgrain laminate front & top have 3/4" thick fronts and top constructed of particle board core with high-pressure laminate surface. Edges of top, and drawer front sides are banded with matching Polypropylene for added durability. Bottom and top edges of drawer fronts are banded with matching 1mm Polypropylene for a tight, clean fit between drawers. Drawer pull is 8"W, 16-gauge steel, waterfall design painted to match the pedestal shell. Grain direction on top is side-to-side, on drawer fronts is vertical.

Hang-on Drawer Unit
Construction is same as hang-on flipper door unit except two drawer fronts are attached to powder-coated steel drawer bodies. Drawer operates on heavy-duty multistage steel ball-bearing suspension. Double bitted removable core lock.

Freestanding Wardrobe Unit
Shell is constructed of 20-gauge steel. Uprights and top and bottom reinforcements are welded into a rigid "box frame." Two 18- gauge reinforcements located along the bottom front and back of cabinet house four threaded weldnuts to accept adjustable leveling glides. 18-gauge top reinforcement. Lock options: no-lock, "Top Drawer only" lock which provides security to the top. Drawer of combination wardrobes via user supplied padlock, or double bitted/removable core key lock. Drawers are 20-gauge steel with slotted bottoms for ventilation. Heavy-duty steel ball-bearing drawer suspensions. Painted with high-quality baking enamel.

Steel fronts units have 20-gauge drawer fronts and doors (double wall) with integral pulls. Fronts painted to match the wardrobe shell.

Wardrobes with woodgrain laminate front have 3/4" thick doors and drawer fronts constructed of particle board core with high-pressure laminate surface. All horizontal edges are banded with matching 1mm Polypropylene for a tight clean fit, with all vertical edges banded with matching Polypropylene for added durability. Drawer pull is 8"W, 16-gauge steel, waterfall design painted to match the wardrobe shell. Door pulls are located at top of doors and are same design as on drawer but with half located on each door. Grain direction is vertical.

Stack-on Wardrobe
Construction of case and doors is same as wardrobe unit. This unit is intended to stack on top of wardrobe unit to provide additional storage and is reversible to face forward or backward. Power cord exits are located on each side. Thumb screw attachment method provides easy yet positive attachment to top of wardrobe unit. Locking is optional. Painted with high-quality baking enamel. Door pull on woodgrain laminate door is at bottom and inverted.

Freestanding Dressers
Shell is constructed of 20-gauge steel with seamless back and top with reinforced corners. Heavy-duty steel ball-bearing drawer suspensions. Lock options: no-lock, "Top Drawer Only" lock which provides security to the top drawer via user supplied padlock, or double bitted/removable core key lock which locks all drawers (on steel drawer front units only). Painted with high-quality baking enamel.

Steel front dressers have drawer fronts of 20-gauge steel with integral pulls. Front painted to match the dresser case.

Wardrobes with woodgrain laminate front and top have 3/4" thick front and top constructed of particle board core with high-pressure laminate surface. Edges of top and drawer front sides are banded with matching Polypropylene for added durability. Bottom and top edges of drawer fronts are banded with 1mm matching Polypropylene for a tight clean fit. Drawer pull is 8"W, 16-gauge steel waterfall design painted to match the pedestal shell. Grain direction on top is left to right, on drawer fronts is vertical.

Keyboard Tray
Mounts under hang-on worksurface to provide access and storage for computer keyboards. Molded black plastic surface with molded palm rest operates on steel ball-bearing telescopic suspensions.

CPU Sling
Mounts under hang-on worksurface to provide access and storage for CPU, freeing up worksurface space. Straps have positive locking clamps. Provides 5-1/2" of travel and 359° swivel. Accommodates CPU with maximum circumference of 65". Maximum weight capacity is 75-lbs. Available in black only.

Center Drawer
Mounts under hang-on worksurface or mega-surface. Formed of molded plastic with compartment for pencils, paper clips etc. Non-locking. Operates on a formed suspension with ball bearing glides for smooth operation.

Pedestal and Freestanding Dresser Tops For Steel Front Units
Constructed of particle board core with .030 face sheet and .028 backer sheet of high-pressure laminate. Polypropylene edges for optimal durability. Tops are installed on pedestals or freestanding dressers in the field by use of factory applied double-sided tape.

Ladder Assembly
Construction consists of 16ga. steel support bracket which hooks over the top edge of the beds with side rail or under and around spring bed side frame. The ladder assembly is constructed of two 75" upright 1" x 2" x 16ga. seamless rectangular tubes with five 3/4" x 1-1/2" x 14ga. seamless flat oval tubes, which form the rungs. Rungs are inserted into the rectangular uprights and a #10 threaded rod is inserted through the rungs and drawn up from each end via stay-fast Allen head joint nuts. A RH and LH bottom-mounting bracket is supplied to secure bottom of ladder when used without a lower bed. The brackets are made of 11ga. steel and attached to the ladder with a 1/4"-20 thumb screw. The bracket hooks into the bed frame ends via adjustable notches. Ladder and support brackets are coated with electrostatically applied powder-coated for maximum durability.

Bed Safety Bar
Constructed of 14-gauge steel plate which mounts to the inside of the bed deck side rail, and 1"o.d.-14-gauge seamless steel tube which extends above the bed deck to provide additional safety for the sleep area. Epoxy powder coated for maximum durability.

INFORMATION

Warranty
See"Terms" for general information.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Product Modification Request.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select lock option.

NL	- No lock (standard)
WL	- Lock (key locks all drawers); add $64
TL	- Top drawer only lock; add $95

Top drawer only lock - (combination wardrobe only) - (locks only the top drawer via user supplied padlock)

Ⓒ Select lock color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select mirror option.

NM	- No mirror - standard
1M	- One mirror (RH door); add $123
2M	- Two mirrors; add $244

Ⓔ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select laminate color.
Refer to the **Product Color Options** page in this price list.

OPTIONS

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

Ricochet™ Stools
General Information

TECHNICAL SPECIFICATIONS

Stool
Stool seat support, base and column spacers (stool heights 14" and taller) are constructed of polypropylene specified in select KI colors. Seat, base and spacers are separated by polypropylene spacer rings standard in KI's Blue Grey. Polypropylene parts are held together using appropriately sized M10 through bolt. Stools feature convex base permitting an active-sit with 12 degrees of stable rocking motion.

Seating Surface Pad
Seating surface pad is constructed of plastic polymer and is standard in KI's Blue Grey. The pad is adhered to the seat support using a round double-sided tape pad.

Non-Slip Bottom
Stool bottom is constructed of a textured, non-slip thermoplastic rubber padding that is suitable for carpeted and hard floors.

Compliance
Seating exceeds BIFMA's X5.1-2017 seating durability test and drop test; and passes KI's internal standard testing for 400-pound capacity. Meets CA 01350.

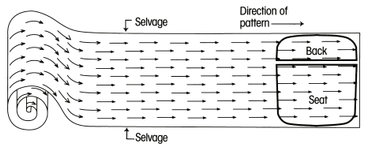
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

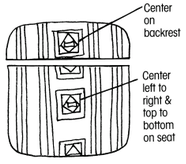


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

RUCKUS 4-LEG AND STACK CHAIR FEATURES

A. Handle
Integrated back handle for easy movement and stacking.

B. Field Replaceable
Seat and back are mechanically fastened to allow easy field-replacement.

C. Stacking
Unique frame design allows the stack chair to stack with or without book bag rack.

D. Optional Steel Book Bag Rack
Accommodates book bags of any size and is available in monochromatic or contrasting finish.

E. Glides
Swivel glides available in nylon, steel or felt to accommodate a variety of floor materials.

F. Optional Casters
Dual-wheel hard casters allow easy movement on carpet.
Soft casters available for hard floors.

G. Armrests
Integral armrest also functions as a work surface or a place to perch.

H. Optional Upholstered Seat
Upholstered seat pad offers added comfort.

Ruckus® Seating
General Information

General Guideline for Glide Selection

The following information is based on a combination of testing and experience. Due to factors beyond our control, KI is presenting this information strictly as a general guideline to assist our customers in selecting the best glide for their situation. It is up to the customer to determine which glide will perform best for their application based upon their site conditions, requirements, and the direction of the flooring manufacturer. Sample glides are available upon request to aid the customer in their selection (contact Customer Service).

Price list glide choice of: Nylon, Steel or Felt

Nylon

Steel

Felt - Solo Glide®

PERFORMANCE GUIDE (clean and properly finished floors)

GLIDE MATERIAL	CARPET	RESILIENT FLOORING			HARD FLOORING		
		Vinyl Sheet	VCT	Rubber	Ceramic Tile	Concrete	Hardwood
Nylon	★★	★★	★★	★★	★★	★★	NR
Steel	★★	★	★	★	NR	NR	NR
Felt	NR	★	NR	NR	NR	NR	★★

★★ = Best Performance ★ = Acceptable Performance NR = Not Recommended

Steel glides are not recommended for light colored floors.

The following factors affect the performance of any glide:

- Floor Quality – Materials and manufacturing processes for a specific floor type can vary considerably depending upon the manufacturer and product grade. Floor grades with higher stain and abrasion resistance will typically perform better.
- Floor Preparation – The quality and frequency of application of the floor finish will significantly affect the amount of wear. A high quality finish will act as a lubricant between the chair and floor to minimize wear.
- Floor Maintenance – Any glide material will leave marks if the floor is not properly cleaned. The use of walk-off rugs near entrances, along with frequent cleaning of the floors, will significantly reduce damage to floors. Steel glides should not be exposed to wet or damp floors.
- Damaged Glides – Periodic inspection of glides is critical to preventing floor damage. Glides that are damaged, worn or have embedded debris should be replaced immediately. Felt caps wear faster and should be replaced frequently.

RUCKUS SEATING

Description
Ruckus promotes student movement through its unique design. Its generously sized seating encourages an "as you like it" sitting experience. The chair back shape includes integral armrests, which are also engineered to function as a support surface.

Seat and Backrest
Both the seat and backrest shell shall be made of static-free high-impact 7% fiberglass reinforced polypropylene. Colorfastness is ensured through complete color impregnation throughout the molded part. Textured on both sides with a contrasting texture pattern on the seat. Ergonomic handle molded into the chair backrest for ease of mobility. Seat and backrest fasten to the frame with six 1/4-20 x 3/4" Hi-Lo screws.

Optional Upholstered Seat
Upholstered seats have partially exposed polypropylene surfaces. Molded Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process and fastened to an inner shell with screws. Seat foam is molded nominal 1" thickness.

Frames
Four Leg, Stack, Stool and Task frames are constructed with 1" outside diameter 13-gauge steel tubing, welded to 13-gauge steel plates and 1/4" wire. Frame shall be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete.

Glides
Stack, Stool & Four Leg Chairs - Swivel-type polished zinc-plated steel, nylon plastic, or felt glides. KI recommends consulting with the floor manufacturer for specific glide recommendations. **Note**: Felt glides add 1/4" to the overall height range.

Task Chair - Optional Bell glides (2" high) made of high impact plastic also available. Black only. **Note**: Bell glides add 1/4" to the overall height range.

Casters
Carpet Casters Option - 50mm double wheels of high-impact thermoplastic. High-impact plastic frame. Black finish only.

Hard Floor Casters Option - 50mm double wheels of soft plastic. High-impact plastic frame. Black finish only.

Task Chair
Pneumatic Height Adjustment
Lever-activated pneumatic cylinder enables seat-height adjustment from 16-1/2" to 21-1/4".

Five Blade Base
28" injection molded, 30% fiberglass reinforced nylon 5-blade base. Available in Black or Warm Gray.

Bookbag rack
Stack Chair Frame - Optional bookbag rack is a welded framework of 1/4" diameter solid wire welded to eight 1/8" thick plates. Fastened to stackable chair frame with eight #10 screws. Bookbag rack will be nickel-chrome plated or finished in powdercoat paint after all welding processes are complete

Testing
Ruckus chair components shall originate from ISO 9000, ISO 9001 or ISO 9002 registered facilities. Ruckus chairs are designed and manufactured to meet or exceed required ANSI/BIFMA X6.1-2012 Education Seating and ANSI/BIFMA X5.1-2011 General Purpose Office Chairs.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests, contact Customer Service for details.

Whatever you imagine, whatever you require. KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating information can be found here.

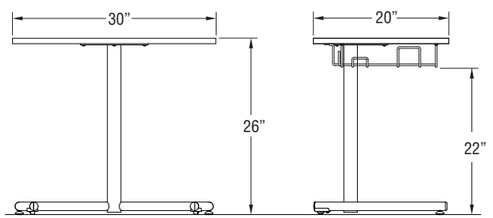
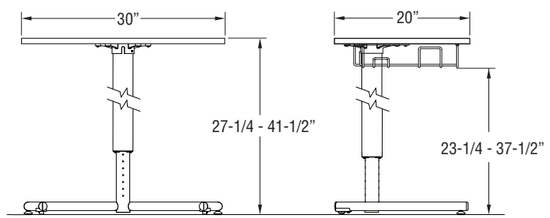
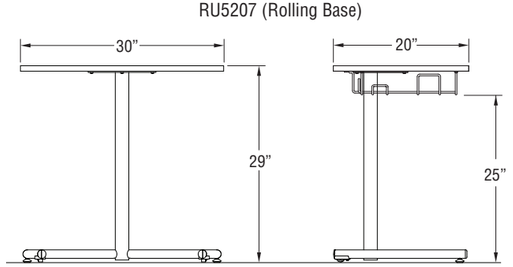
Ruckus® Cantilever Desk & Mobile Lectern
General Information



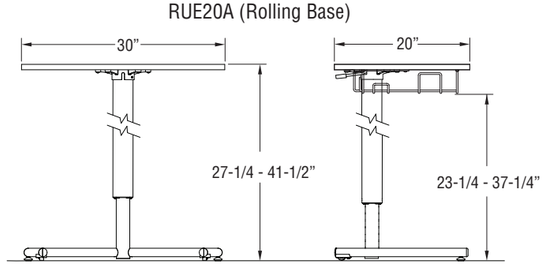
Fixed Height Desk - 26”
RU5207 (Rolling Base)



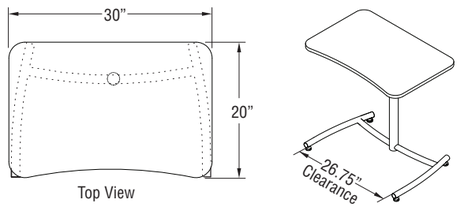
Set Screw Adjustable Desk
RUE20A (Rolling Base)



Fixed Height Desk - 29”
RU5201 (Rolling Base)



Pneumatic Adjustable Desk
RUZ20E (Rolling Base)



RUCKUS CANTILEVER DESK FEATURES

A. **Curved Worksurface**
Generously sized worksurfaces with a curved edge provide additional belly room and enhanced comfort.

B. **Durable Edges**
73P bonded poly edge banding provides moisture and tamper resistance (available in numerous standard colors).

C. **Fixed or Sit/Stand Adjustable Height**
Desks are available in 29" fixed heights as well as pneumatic or set screw sit/stand adjustable heights.

D. **Single Post**
Unique single post cantilever base maximizes leg clearance and improves ingress/egress.

E. **Optional Front Rollers**
Front rollers (with rear glides) provide mobility with a wheelbarrow motion.

F. **Optional Book Bag Hooks**
Available on both sides, unless a cupholder is specified.

G. **Optional Book Basket**
Basket frame includes two integrated book bag hooks, one on each side.

H. **Optional Cup Holder**
Swiveling cup holder is available on either the left or right side.

RUCKUS DESK

Fixed-Height Desk – Single-Post Cantilever
Frames are constructed with 2” and 1-1/4” by 14-gauge steel tubing welded to a 7-gauge steel plate. Frame shall be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete. The 1-1/4” horizontal tubing is capped with a plastic plug (offered in black only).

Pneumatic Adjustable-Height Desk – Single-Post Cantilever
The top of the worksurface adjusts between 27-1/4” and 41-1/2” from the floor by activating a pneumatic cylinder using a lever located on the non-user side of the worksurface.

The desk base consists of a lower frame weldment and adjustable upper column assembly. The lower frame is constructed with 2” and 1-1/4” by 14-gauge steel tubing and can be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete. The 1-1/4” horizontal tubing is capped with a plastic plug (offered in black only).

The adjustable upper column assembly is constructed of a 3” diameter aluminum extrusion and is capped using a black cast zinc flange attached by six, 1/4”-20 x 1-1/2” screws. The upper column assembly is finished in powder-coat paint. Nickel-chrome plating is not available on the upper column assembly. Upper assembly will be painted Starlight Silver when nickel-chrome plating is specified for the lower frame.

The worksurface is attached to the flange using five, #12 x 7/8” wood screws. Product is shipped fully assembled, one unit per carton.

The pneumatic cylinder includes a locking feature to prevent vertical movement when any force is applied to the worksurface and the cylinder is not actuated.

The weight capacity is less than 15 lbs. Capacity represents the total amount of weight the cylinder can lift without assistance from the user.

Set Screw Adjustable-Height Desk and ADA Desk– Single-Post Cantilever
The top of the worksurface adjusts between 27-1/4” and 41-1/4” from the floor by locking with a 1/4”-20 x 1/2” dog point set screw in 1” increments. (ADA Desk adjusts between 27-1/4” and 31-1/4”)

The desk base consists of a lower frame weldment and adjustable upper column assembly. The lower frame is constructed with 2” and 1-1/4” by 14-gauge steel tubing and can be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete.1-1/4” horizontal tubing is capped with a plastic plug (offered in black only).

The adjustable upper column assembly is constructed of a 3” diameter aluminum extrusion and is capped using a black cast zinc flange attached by six, 1/4”x 20 x 1-1/2” screws. The upper column assembly is finished in powder-coat paint. Nickel-chrome plating is not available on the upper column assembly. Upper assembly will be painted Starlight Silver when nickel-chrome plating is specified for the lower frame.

The worksurface is attached to the flange using five, #12 x 7/8” wood screws. (For the ADA Desk, a steel plate is attached to the bottom of the worksurface using fourteen, #12 x 3/4” wood screws. The steel plate and worksurface is then attached to the support flange using eight, #12 x 5/8” wood screws.) Product is shipped fully assembled, one unit per carton.

Rolling Base Model (wheelbarrow)
Rolling base model includes two rollers located on the non-user side of the frame, with two swivel glides located on the user side for ease of mobility. Roller will be constructed of a two-piece molded polycarbonate housing with steel axle, supporting a 1-1/4” diameter wheel constructed of high impact styrene and secured to base frame with a 1/4-20 x 5/8” screw. Cantilever frame will include cutouts to encapsulate roller assembly. Roller assembly is offered in black only. Swivel-type glides are polished zinc-plated steel with nylon plastic, or felt feet surfaces. KI recommends consulting with the floor manufacturer for specific glide recommendations. **Note:** Felt glides increase product height by 1/4”. **Note:** Glides cannot be swapped with rollers or rollers with glides.

Top
Worksurface top consists of high-density particleboard core covered with .030” high-pressure laminate top and a .020” phenolic backing sheet and 73P polypropylene edge with a finished top thickness of 13/16”. Worksurface includes a curved front comfort curve on user side and 2-3/8” radius corners. Worksurface measures 20” x 30”. (ADA worksurface measures 25”x36”)

Glides
Swivel-type glides are polished zinc-plated steel with nylon plastic, or felt feet surfaces. KI recommends consulting with the floor manufacturer for specific glide recommendations.
Note: Felt glides increase product height by 1/4”. (See Seating General Information for General Guideline for Glide Selection.)

Book Bag Hook
Optional book bag hook is formed from 1/4” solid wire rod. Chrome finish provides long lasting wear resistance. Hook fastens to underside of laminate top with two #12 x 3/4” Phillips pan-head screws. Book bag hook is fully assembled to both sides of desk prior to shipment.

Book Basket
Optional book basket with integrated book bag hooks is formed from 1/4” solid wire rod. Book basket can be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete. Measures 24-1/2” wide x 13” deep x 3-1/4” high. Fastens to underside of worksurface top with six #12 x 3/4” Phillips pan-head screws. Book basket is fully assembled to desk prior to shipment.

Swiveling Cup Holder
Optional cup holder is made of 11-guage steel and includes a 3” diameter cutout for drinks. Offered in Starlight Silver only. Cup holder is fully assembled to desk prior to shipment. Designate left or right hand location when selecting swiveling cup holder option.

Testing
Ruckus desk components originate from ISO 9000, ISO 9001 or ISO 9002 registered facilities. Ruckus desk is designed and manufactured to meet or exceed required ANSI/BIFMA X5.5-2014 Desking.

RUCKUS MOBILE LECTERN FEATURES

A. **Curved Worksurface**
Generously sized worksurfaces with a curved front edge provide additional belly room and enhanced comfort.

B. **Durable Edges**
73P bonded poly edge banding provides moisture and tamper resistance (available in numerous standard colors).

C. **Adjustable Height**
Sit/Stand height pneumatically adjusts from 28¾" to 42¾".

D. **Mobility**
Casters provide mobility to promote flexibility.

E. **Optional Book Bag Hooks**
Available on both sides, unless a cupholder is specified.

F. **Optional Book Basket**
Basket frame includes two integrated book bag hooks, one on each side.

G. **Optional Cup Holder**
Swiveling cup holder is available on either left or right side.

H. **Optional Modesty Panel**
Seven acrylic colors to choose from.

MOBILE LECTERN

Mobile Lectern – Single-Post Cantilever

The top of the worksurface adjusts between 28-3/4" and 42-3/4" from the floor by activating a pneumatic cylinder using a lever located on the user side of the worksurface.

The lectern base consists of a lower frame weldment and adjustable upper column assembly. The lower frame is constructed with 2" and 1-1/4" by 14-gauge steel tubing and can be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete. The 1-1/4" horizontal tubing is capped with a plastic plug (offered in black only). Available with casters only.

The adjustable upper column assembly is constructed of a 3" diameter aluminum extrusion and is capped using a black cast zinc flange attached by six, 1/4"-20 x 1-1/2" screws. The upper column assembly is finished in powder-coat paint. Nickel-chrome plating is not available on the upper column assembly. Upper assembly will be painted Starlight Silver when nickel-chrome plating is specified for the lower frame.

The worksurface is attached to the flange using five, #12 x 7/8" wood screws. Product is shipped fully assembled, one unit per carton.

The pneumatic cylinder includes a locking feature to prevent vertical movement when any force is applied to the worksurface and the cylinder is not actuated.

The weight capacity of the Ruckus Mobile Lectern with accessories (modesty panel, book basket and cupholder) is less than 15 lbs. Weight capacity is 20lbs when accessories are not specified. Capacity represents the total amount of weight the cylinder can lift without assistance from the user.

Top

Worksurface top consists of high-density particleboard core covered with .030" high-pressure laminate top and a .020" phenolic backing sheet and 73P polypropylene edge with a finished top thickness of 13/16". Worksurface includes a curved front comfort curve on user side and 2-3/8" radius corners. Worksurface measures 20" x 30".

Casters

Casters are single wheel with a 40mm outside dimension and constructed from high-impact thermoplastic. Available with hard or soft wheel surface. Black only.

Modesty Panel

Modesty panels are 20" x 20" with 2.31" radius corners constructed of 1/4" thick Acrylite Satinice material with a velvet texture and a very fine satin surface on both sides. Modesty panels are located on the underside of the worksurface and held in place using six #10-24 x 3/4" knurled thumbscrews and two 14-gauge steel rackets. See Product Color Options for available finish options.

Book Bag Hook

Optional book bag hook is formed from 1/4" solid wire rod. Chrome finish provides long lasting wear resistance. Hook fastens to underside of laminate top with two #12 x 3/4" Phillips pan-head screws. Book bag hook is fully assembled to desk prior to shipment.

Book Basket

Optional book basket with integrated book bag hooks is formed from 1/4" solid wire rod. Book basket can be nickel-chrome plated or finished in powder-coat paint after all welding processes are complete. Measures 24-1/2" wide x 13" deep x 3-1/4" high. Fastens to underside of worksurface top with six #12 x 3/4" Phillips pan-head screws. Book basket is fully assembled to desk prior to shipment.

Swiveling Cup Holder

Optional cup holder is made of 11-guage steel and includes a 3" diameter cutout for drinks. Offered in Starlight Silver only. Cup holder is fully assembled to desk prior to shipment.

Testing

Ruckus lectern components originate from ISO 9000, ISO 9001 or ISO 9002 registered facilities. Ruckus lectern is designed and manufactured to meet or exceed required ANSI/BIFMA X5.5-2014 Desking.

Certain options referenced may not be available on GSA Schedule.

Post-Leg Desktops & Activity Tabletops

All tops are 1 1/4" or 3/4" nominal overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). All post-leg desks and kite and diamond activity tables are available with either top thickness. All remaining activity tables are only available with the 1 1/4" top thickness. The density of the core in standard tops is 45 lb/cu ft particleboard, M3 grade. All tops have a 2 mm bonded edge band for tamper and moisture resistance, specified as 74P for 1 1/4" tops and as 73P for 3/4" tops.

Post Leg Assembly

Leg assembly heights are achieved by accounting for 1 1/4" tabletop thickness. For tables or desks with 3/4" tops, height dimensions are 1/2" (nominal) less. Leg assemblies come in four variations, 29" fixed-height, 12-19" floor adjustable-height, 20-33" sit adjustable-height, & 29-42" sit-stand adjustable-height. All adjustable-height table legs adjust with screws in 1" increments.

Fixed-Height Post Leg Construction

Consists of a of a 1 3/4" O.D. 14-gauge steel tube welded to a 1/4" thick mounting plate. Leg bottom has a pressed-in steel insert with 5/16-18 UNC threaded hole for either caster or glide.

Screw Adjustable-Height Post Leg Construction (upper & lower leg members)

The upper (outer), leg member consists of a 1 3/4" O.D. 14-gauge steel tube welded to a 1/4" thick mounting plate. The lower (inner) leg member consists of a 1 1/2" O.D. 14-gauge steel tube containing fifteen 1/4-20 UNC holes in 1" increments to allow for error-free desk and table height adjustment, and has a pressed-in plastic insert at floor level with 5/16-18 UNC steel threaded hole for either caster or glide. Height adjustment of each leg assembly is locked using two 1/4-20 screws with lock washers at the outer leg member, threading into the inner leg member. Post-leg desks & kite or diamond activity tables use a 1/4" thick triangular mounting plate (5 x 6 1/2"). All other tables use a 1/4" thick square mounting plate (8" x 8"). Casters and glides are shipped assembled to the legs. Adjustable legs with a height range of 12-19" are shipped from the factory pre-set to 19" table height. Adjustable legs with a height range of 20-42" are shipped from the factory pre-set to 29" table height.

Casters & Glides

Each table includes either: all casters, all glides, or a caster and glide mix that includes casters for two legs and glides for all remaining legs. 12-19" post-leg assemblies are available with glides only and do not include spacers. Casters are 50 mm O.D. double-wheel, molded nylon, black, unhooded, with brake and use a 5/16-18 threaded steel stem for mounting. Glides are either: Black nylon with a 5/16-18 threaded steel stem or Black nylon with felt base with a 5/16-18 threaded steel stem. Glides are utilized with a Black nylon glide locking spacer (patent pending). The spacer has steel 5/16-18 threaded hole. The spacer and glide combination allows for interchangeability between glides and casters without a change in height of the desk or table surface.

Ruckus® Post-Leg Desk and Activity Table
General Information

TECHNICAL SPECIFICATIONS

Undersurface Accessories

Book Basket

Optional book basket is made of chrome plated 7 mm diameter solid steel wire. Fastens to underside of top with eight #12 x 3/4" Phillips pan head screws. Book basket is only available on the Ruckus Post-Leg Desk.

Small and Large Book Boxes

Optional solid molded thermoplastic polypropylene book box. Translucent finish helps provide safe environment while allowing for some degree of personal privacy. Molded-in pencil tray keeps items conveniently inside book box within easy reach, not on the floor or in the back of the book box. Fastens to underside of top with nine #12 x 3/4" Phillips pan head screws. Small and Large Book Boxes are only available on Ruckus Post-Leg Desks.

Removable Tote Storage

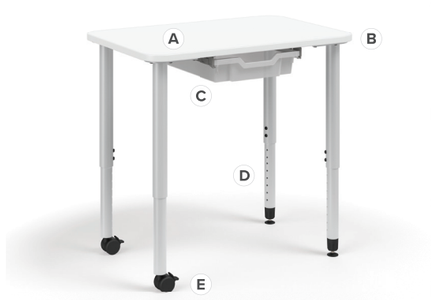
Totes are molded from talc filled Polypropylene giving strength and rigidity. The totes are completely translucent for visibility of the contents within. The Polypropylene contains an anti-static additive to reduce the attraction of dust. Polypropylene is chemically resistant to a majority of chemicals and cleaners used in schools. Removable tote storage is available on both the Ruckus Post-Leg Desks and Activity Tables.

Book Bag Hook

Optional book bag hook is formed from 1/4" solid wire rod and is chrome plated for long lasting wear resistance. Fastens to underside of top with two #12 x 3/4" Phillips pan head screws. Hook can be combined with any of the under storage options. Book bag hook must be ordered separately as an accessory.

Ruckus® Post-Leg Desk and Activity Table
General Information

RUCKUS POST-LEG DESK FEATURES



A. **Shapes**
Five shapes in various sizes for student engagement and reconfiguration – E-triangle, OddQuad (patented KI desk shape), R-triangle, Rectangle (shown) and Trapezoid.

B. **Durable Edges**
73P and 74P bonded poly edge banding provides moisture and tamper resistance (available in numerous standard colors).

C. **Optional Undersurface Storage**
Choose from: book basket, small book box, large book box or removable tote storage (shown). Desk tops are pre-drilled to accept all options.

D. **Fixed or Adjustable Height**
Fixed height is 29". Floor height adjustable 11½–18½". Sit height adjustable (shown) is 20–33". Sit-stand height adjustable is 29–42". Legs adjust in 1" increments with set screws.

E. **Bases**
Three base options: glides, casters or both casters and glides to allow wheelbarrow motion. Interchangeable same-height casters and glides can be changed quickly in the field while maintaining original surface height. Casters are dual-wheel locking. Glides are available in nylon or felt.

A. Worksurfaces
High-pressure laminate worksurface in 49 standard finishes, including markerboard (dark edge colors are recommended with markerboard laminate). Available in 10 dynamic shapes — D-Shape, Diamond, Horseshoe, Kidney, Kite, Rectangle (Note: Rectangle shaped tables are available with either rounded or square corners), Round, Sprocket, Square, Clover — in various sizes.

B. Durable Edges
73P and 74P bonded poly edge banding provides moisture and tamper resistance (available in numerous standard colors).

C. Heights
Four table height options: fixed height (29"), floor height adjustable (12–19"), sit height adjustable (20–33") or sit-stand height-adjustable (29–42"). Note: For Diamond and Kite tables specified with ¾" top and 73P edge, subtract ½" from the height. Legs adjust in 1" increments using two set screws for added strength and rigidity and are available in numerous color options including chrome.

D. Bases
Three base options: glides, casters or both casters and glides to allow wheelbarrow motion. Interchangeable same-height casters and glides can be changed quickly in the field while maintaining original surface height. Casters are dual-wheel locking. Glides are available in nylon or felt.

TECHNICAL SPECIFICATIONS

Steel Base Shell
Components consist of top, bottom, sides, back uprights, bottom and top reinforcements, spot welded and metal insert gas (MIG) welded together.

The top of the cabinet is 19-gauge cold-rolled steel (C.R.S.) with 1 1/8" flanges, on four sides. The front face has an additional flange formed inward to provide additional strength.

The back of the cabinet is 20-gauge C.R.S. and is formed on four sides to provide strength. The bottom is 20-gauge C.R.S. with a flush upper surface and flanged downward to provide a welding surface with the sides and back. The front face is formed down 1 1/8" and inward to provide additional strength.

Each shell has double wall sides from 20-gauge C.R.S.; the inner panels of tote units are pierced on approximately 3 3/4" centers to allow molded plastic slide rails to be attached for totes. The cubby units are punched to accept fixed shelves dividing the section in half. The front flange of the outer side panels are formed to fit inside the channel formation of the side panel; the rear edge is offset formed for maximum strength and a flush alignment with the back return. Each shell has 18-gauge front and back upright members spot welded to the sides providing vertical strength. Top reinforcements are spot welded to the top and MIG welded to the vertical upright members to provide resistance against racking. Center partitions are two piece 20-gauge steel fabricated panels spot welded together with apposing flanges to be screw mounted to the top and bottom panels of the shell, punches with a matching pattern to the side of the units.

The bottom is fitted with two 18-gauge MIG welded in place structurally formed reinforcements which are located along the front and back of the cabinet. The reinforcements have two U-channel inner reinforcements with extruded holes to accept the tri-lobe screws that affix the casters.

Double-faced units are created using two single-faced units placed back-to-back, joined by a 12-gauge drop-in ganging plate and secured by the worksurface top.

Worksurface
Worksurfaces are designed to overhang the storage units. See dimensions for available sizes.

Laminate Worksurface
The laminate worksurfaces are 1 1/4" thick and consist of a particleboard core with a HPL surface, featuring a 74P (2 mm polypropylene) bonded edge for tamper and moisture resistance. All tops are pre-drilled for dowels and thumb screws for attaching the top to the units, as well as optional power modules and bag hooks at the job site.

Phenolic Resin Worksurface
Solid phenolic worksurface is a 1" thick, self-supporting flat panel based on thermosetting resins, homogeneously reinforced with cellulose fibers and manufactured under high heat and pressure. The worksurface has a pigmented resin, decorative surface that is electron-beam cured. All tops are pre-drilled for dowels and thumb screws for attaching the top to the units, as well as optional power modules and bag hooks at the job site.

Butcher Block Wood Worksurface
Hard Rock Maple wood butcher block worksurface is 1 3/4" thick and flat edge grain construction. Blocks are finger jointed, randomly placed and finished with clear, semi-gloss Varnique finish. All tops are pre-drilled for dowels and thumb screws for attaching the top to the units, as well as optional power modules and bag hooks at the job site.

Ruckus® Worktable
General Information

TECHNICAL SPECIFICATIONS

Casters
Each unit has four industrial grade casters with 75 mm grey non-marking thermoplastic rubber wheels with a 25 mm tread. Casters are plate mounted with double ball bearing swivel head and a housing made of bright zinc plated pressed steel. The two front casters are total locking preventing swivel as well as rolling, the two rear casters are swivel and free rolling. The overall height of the casters are 100 mm.

Book Bag Hook (optional)
Optional book bag hook is formed from 1/4" solid wire rod. Chrome finish provides long lasting wear resistance. Hook fastens to the underside of top with two #12 x 3/4" Phillips pan-head screws. Book bag hook is field installed. Worktable overall size determines the number of book bag hooks included.

Power (optional)
All power modules have a 10 ft cord with 3-prong plug, and ship with wire management. Hook and ladder, screw-in wire management is provided to manage cords along the underside of the surface, as well as an adhesive-backed plastic channel to manage cords along the vertical surface of the storage. Modules and wire management are field installed. Modules are available in Black or KI's Cool Grey.

Dean Clamp-On Power Module
Dean clamp-on power module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port. Available on 30" x 54" Ruckus worktables.

Dean Clamp-On Power Module with Wireless Charging (for Qi-enabled devices)
Dean clamp-on power module with wireless charging consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one wireless charging lid (for Qi enabled devices). Available on 30" x 54" Ruckus worktables.

Dean Undersurface Power Module
Dean undersurface mounted power module consists of two simplex receptacles (rated at 15 amps/125 volts), one USB-A port and one USB-C port. Available on 48" x 54" & 60" x 54" Ruckus worktables.

Doors (optional)
The doors are single wall construction with a structural hinge channel running the length of the door. Self-closing European style hinges with 110-degree swing, provide 3-way adjustment of door to ensure consistent gapping and operation. Each steel door is standard with a key lock. All doors are inset.

Beveled Door Pull
Beveled door pull is made from cast zinc. It mounts using two machine screws to a steel door. It is available in a satin chrome or black finish.

Cubby Shelves
All fixed cubby shelves are 3/4" thick with flanges, front and back, constructed of 22-gauge material. Each shelf is screw mounted in four places with #10 screws into the outer panel and center panel to create separation between modules. Each section has one centered fixed shelf. Shelves are powder-coat painted.

Locks
Locks are included on every door:

Standard Key Lock
The standard lock is a high-security double-bit lock. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge (this information must be included with order). Locks can be master keyed. Available in satin chrome or black finishes.

TECHNICAL SPECIFICATIONS

Finish
Units are offered in numerous powder-coat colors. Powder-coat application is a hybrid epoxy, baked on to provide a scratch and stain resistant finish. Base and doors may be specified in separate colors for no upcharge. Mechanical components are plated or finished with other protective coatings.

Totes
Totes are translucent polypropylene and available 3" or 6" depths for use with Ruckus worktables.

Tote Storage Removable Shelf
Removable shelves are constructed of 22-gauge steel with $^{3}/_{4}$" thick with flanges front and back. Shelf is finished with powder-coat painted to color of choice. Each shelf will slide into place using the available tote rail set and locks into placed once fully recessed. Each shelf can be easily removed or relocated by lifting up on the back of shelf and pulling it toward user.

Tote Storage Configurations
Ruckus wortables with tote storage, in any tote configuration beyond the preconfigured option, must be quoted through a product modification request. Additional totes can be ordered in kits with a quantity of six totes (rail sets included) and can be placed into any empty Ruckus worktables with Single or Double-Face tote storage, without the use of tools.

An optional shelf can be ordered to replace a tote. This shelf will slide into place using the available rail sets. Steel shelf is finished with powder-coated paint steel. Does not require tools to install.

Compliance
Ruckus storage meets or exceeds ANSI/BIFMA X.5.9-2019 and X.5.5-2019 standards.

Ruckus® Worktable
General Information

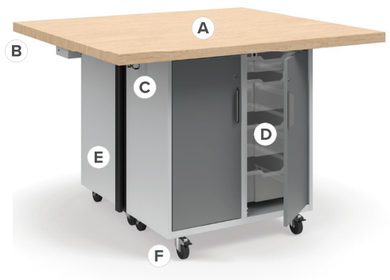
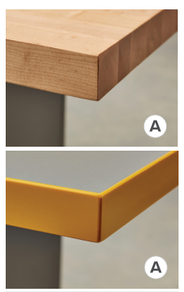
RUCKUS WORKTABLE FEATURES





A. **Surface**
Three distinct worksurfaces support active learning; butcher block wood, laminate or phenolic resin.

B. **Optional Power**
Above or under surface power modules support classroom technology and provide charging for devices.

C. **Hooks**
Worktable overall size determines the number of book bag hooks included (one per user).

D. **Storage**
Storage within the base keeps learning resources at hand and learning spaces neat: cubby and or tote storage available with or without locking doors. Contrasting door colors available.

E. **Fits Through Doorways**
Toolless removable worksurfaces and two-piece base design ease relocation.

F. **Casters**
Industrial-grade 3" casters meet the rigorous demand of hands-on learning spaces.

TECHNICAL SPECIFICATIONS

Shell
The shell is a common construction that consists of steel bottom, sides, back, uprights, with laminated wood top. Inside double-face units, a center divider is screw mounted in each section to separate the front and back sides. All panel bottoms are mounted on one common steel base.

Single-Face Units - Overall Size with Casters or Glides Included: Nominal vs. Actual
36w x 18d x 36h storage: 36 1/8" wide by 18 1/4" deep by 36" high
36w x 18d x 42h storage: 36 1/8" wide by 18 1/4" deep by 42" high
54w x 18d x 36h storage: 53 5/8" wide by 18 1/4" deep by 36" high
54w x 18d x 42h storage: 53 5/8" wide by 18 1/4" deep by 42" high

Double-Face Units - Overall Size with Casters or Glides Included: Nominal vs. Actual
36w x 24d x 36h storage: 36 1/8" wide by 24 1/4" deep by 36" high
36w x 24d x 42h storage: 36 1/8" wide by 24 1/4" deep by 42" high
54w x 24d x 36h storage: 53 5/8" wide by 24 1/4" deep by 36" high
54w x 24d x 42h storage: 53 5/8" wide by 24 1/4" deep by 42" high

Laminate Worksurface - Storage
The laminate worksurfaces are 1 1/4" thick and consist of a particleboard core with a HPL surface. 74P (2 mm PVC-free) banding is applied to the edges. All tops are pre-drilled for mounting of end panels, center panel(s), center dividers and are assembled in the factory.

Vertical Panels
Each 1" thick vertical panel features double-wall steel construction. The outer vertical panel consists of 20-gauge material with double flanges formed on both vertical edges and single flanges formed on the top and bottom. The vertical edges of the outer panel have an 18-gauge reinforcing member welded in place to provide structural integrity. The inner vertical panel is 18-gauge with double flanges formed on the vertical edges and single flanges formed on the top and bottom edges. Two keyhole pads of 16-gauge are welded into the top of the end vertical panel to interface with shoulder screws for mounting to the laminate top. The outer and inner panels are spot welded together, as well as fastened together at the bottom with the threaded inserts that accept the mounting bolt for the base. Bonded to both surfaces within the panel is a lightweight honeycomb core material to improve panel rigidity. All panels feature pre-punched holes for connecting the center dividers, shelves, coat hook, hinge mounts and slot for lock engagement.

Center Divider (Double-Face Units Only)
One center divider is screw mounted in each section to separate the front and back sides. This is constructed of 20-gauge material with 3/4" side flanges for mounting. The divider is a structural component, and has the security feature that it is not removable from any single storage component. This prevents unauthorized access when locking doors are used.

Base
The 1 1/8" thick base ties together the vertical panels creating the bottom and complete structure. Bases are 18-gauge steel. Each base also contains an 18-gauge reinforcement strip on the front and back side of the base bottom. Each reinforcement strip is spot welded in place. Each strip consists of two 1/2" weld nuts on each end to accept the caster or glide stem.

Ruckus® Cubby and Bookcase
General Information

TECHNICAL SPECIFICATIONS (cont.)

Casters or Glides
Each unit may be specified with either casters or glides. Casters or glides do not extend out from the side of the unit shell. Both caster and glides have a 1/2" diameter threaded stud to mount to the bottom of the base and are interchangeable.

Casters:
All caster bodies are twin-wheel hooded design with 2 3/4" diameter wheels. All four casters swivel and two casters will have a lock. Casters will be black.

Glides:
All glides are 2 3/4" telescoping adjustable glides. Glides shall be made of two-piece construction and both pieces are made of durable nylon. Each glide has a white base with a black body.

Hooks - Storage
Utility hooks are made of 11-gauge steel and have a grey powder-coat finish. Each hook is attached to the interior sides of the opening using two #10 tapping screws.

Doors
The doors are single wall construction with a structural hinge channel running the length of the door. Self-closing European style hinges with 110-degree swing, provide 3-way adjustment of door to ensure consistent gapping and operation. The steel door is standard with a lock and is specified with one of the lock options (see lock section below). If left or right designation is noted, left or right specifies which side it is hinged on. All doors are inset.

Door Pulls
A door pull is only available when the standard key lock is chosen. Refer to "Locks" specifications on the next page for full details. One pull type is available:

Beveled pull: Made from cast zinc. It mounts by use of two machine screws to a steel door. It is available in a satin chrome or painted black powder-coat finish.

Shelves
All fixed shelves are 3/4" thick with flanges, front and back, constructed of 22-gauge material. Each shelf is screw mounted in four places with #10 screws into the outer panel and center panel to create separation between modules.

Cubbies - Open Units
Each cubbie unit includes two fixed shelves per section.

Interior Clearance:
36" high unit: 16 1/2" wide by 10 7/8" deep by 9 5/8" high
42" high unit: 16 1/2" wide by 10 7/8" deep by 11 5/8" high

Cubbies - With Doors
Each cubbie with door includes one locking door and two fixed shelves per section.

Interior Clearance:
36" high unit: 16 1/2" wide by 10 7/8" deep by 9 5/8" high
42" high unit: 16 1/2" wide by 10 7/8" deep by 11 5/8" high

Bookshelves
Each bookshelf unit features two fixed shelves per section.

Interior Clearance:
36" high unit: 34" wide by 10 7/8" deep by 9 5/8" high
42" high unit: 34" wide by 10 7/8" deep by 11 5/8" high

General Information

TECHNICAL SPECIFICATIONS (cont.)

Locks

Locks are available anywhere a door is used, with four locking options for Ruckus Storage:

Standard Key Lock (comes with pull option only) - The standard lock is a high-security double-bit lock. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge (this information must be included with order). Locks can be master keyed.

Padlock - Robust zinc housing allows the end user to apply their own combination lock. Lock is backed with a stainless steel escutcheon plate to protect the paint finish.

Combination Lock - A 4-dial combination lock allows user to access cubby without the need of a key. All locks are shipped with a factory set code 3333, combination is set by the end user or facility manager. In the case of lost or forgotten codes, a master key override will unlock the unit and allow the lock to be recoded. Combination lock features solid zinc construction and a four digit combination allows up to 10,000 unique codes.

Digital Lock - Stand-alone battery operated lock allows user immediate and simple keypad access without the need of a key. All locks are shipped with a factory set code 2244, the new access code is set by the end user or facility manager. Users have the flexibility to set and change a personal entry code, while a preset master code ensures that supervisor access is always available, or in an emergency, the key code can be overridden.

Features:

- Up to 80,000 operating cycle's battery life
- Low battery warning
- Battery failure key override
- 8-digit master code and 6-digit sub-master codes
- 4-digit user code (10,000 unique codes)
- 6-digit technician code
- Code changeable
- Not suitable for chlorinated environments
- Can be programed for single use, set at time of use, or fixed combination mode

Finish

Units are offered in numerous powder-coat colors. Powder-coat application is a hybrid epoxy, baked on to provide a scratch and stain resistant finish. Shells and doors may be specified in separate colors for no upcharge. Mechanical components are plated or finished with other protective coatings.

TECHNICAL SPECIFICATIONS

Shell
Components consist of top, bottom, sides, back, uprights, bottom and top reinforcements, spot welded and MIG welded together.

The top is 19-gauge cold-rolled steel (C.R.S.) with 1 1/8" flanges, on four sides. The front face has an additional flange formed inward to provide additional strength.

The back is 20-gauge C.R.S. and is formed on three sides to provide a flush seamless back and top surface.

The bottom is 20-gauge C.R.S. with a flush upper surface and flanged downward to provide a welding surface with the sides and back. The front face is formed down 1 1/8" and inward to provide additional strength.

Each shell has double wall sides and center partition(s) fabricated from 20-gauge C.R.S.; the inner panels are pierced on approximately 3 3/4" centers to allow molded plastic slide rails to be attached for totes. The front flange of the outer panels is formed to fit inside the channel formation of the side panel; the rear edge is offset formed for maximum strength.

Each shell's front and back has 18-gauge upright members spot welded to the sides providing vertical strength. Top reinforcements are MIG welded to the vertical upright members to provide resistance against racking.

Center partitions are two piece 20-gauge steel fabricated panels spot welded together with apposing flanges to be screw mounted to the top and bottom panels of the shell.

The bottom is fitted with two 18-gauge MIG welded in place structurally formed reinforcements which are located along the front and back of the cabinet. The reinforcements have 2-cast aluminum plates mounted to their ends to distribute weight and accept the caster or glide stem.

Single-Face Tote Storage - Overall Size with Casters or Glides Included: Nominal vs. Actual
30w x 18d x 28h tote storage: 29 15/16" wide by 18 1/8" deep by 27 3/4" high
30w x 18d x 41h tote storage: 29 15/16" wide by 18 1/8" deep by 40 3/4" high
44w x 18d x 28h tote storage: 43 15/16" wide by 18 1/8" deep by 27 3/4" high
44w x 18d x 41h tote storage: 43 15/16" wide by 18 1/8" deep by 40 3/4" high

Laminate Worksurface (Optional)
The laminate worksurfaces are 1 1/4" thick and consist of a particleboard core with a HPL surface. 74P (2 mm PVC-free) banding is applied to the edges.

Single-Face Tote Storage - Overall Size with Casters, Glides and Worksurface Included: Nominal vs. Actual
30w x 18d x 29h tote storage: 30 1/4" wide by 18 1/4" deep by 29" high
30w x 18d x 42h tote storage: 30 1/4" wide by 18 1/4" deep by 42" high
44w x 18d x 29h tote storage: 44 1/16" wide by 18 1/4" deep by 29" high
44w x 18d x 42h tote storage: 44 1/16" wide by 18 1/4" deep by 42" high

Ruckus® Tote Storage
General Information

TECHNICAL SPECIFICATIONS (cont.)

Casters or Glides
Each unit may be specified with either casters or glides. Casters or glides do not extend out from the side of the unit shell. Both caster and glides have a 1/2" diameter threaded stud to mount to the bottom of the base and are interchangeable.

Casters:
All caster bodies are twin-wheel hooded design with 2 3/4" diameter wheels. All four casters swivel and two casters will have a lock. Casters will be black.

Glides:
All glides are 2 3/4" telescoping adjustable glides. Glides shall be made of two-piece construction and both pieces are made of durable nylon. Each glide has a white base with a black body.

Doors (Optional)
Tote cabinet doors feature double wall construction. 22-gauge cold-rolled steel (C.R.S.) outer and inner panels are sandwiched together, spot welded and TIG welded to form a rigid assembly. Standard Ruckus pulls (beveled pulls) are cast zinc and are installed on the top face of each door. Pulls mount by use of two machine screws to the steel door. Pulls are available in satin chrome or powder-coat painted black finish. 110° European hinges prevent the doors from contacting an adjacent cabinet door or drawer and provide 3-way adjustment.

Locks
Locks are included on every door:

Standard Key Lock (comes with pull option only) - The standard lock is a high-security double-bit lock core. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Standard locks are available with satin chrome or black powder-coat finishes. Specific keying combinations are available at no additional charge (this information must be included with order). Specific keyed locks are available only with black powder-coat finish. Locks can be master keyed.

Finish
Units are offered in numerous powder-coat colors. Powder-coat application is a hybrid epoxy, baked on to provide a scratch and stain resistant finish. Shells and doors may be specified in separate colors for no upcharge. Mechanical components are plated or finished with other protective coatings.

TECHNICAL SPECIFICATIONS (cont.)

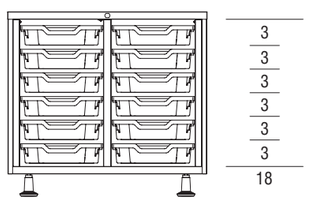
Tote Storage Configurations

Ruckus Tote Storage is comprised of four different size enclosures, on casters or glides, with or without doors. Each of these unit heights and look can be changed by including the optional $1^{1}/_{4}$" laminated wood worksurface. Three preconfigured options are available: All 3" totes, all 6" totes or a combination of 3" & 6" totes. Illustrated below are the 30" wide 2-column units, 44" wide, 3-column units are also available.

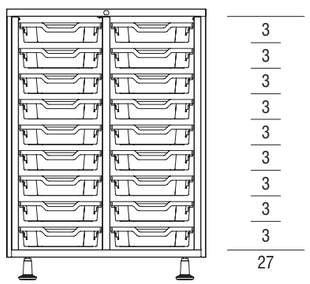
Tote storage is available in two heights, allowing configuration heights of either 18" or 27".

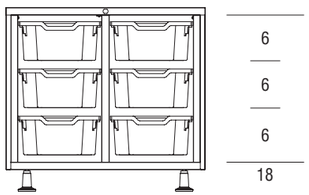
Preconfigured Options:

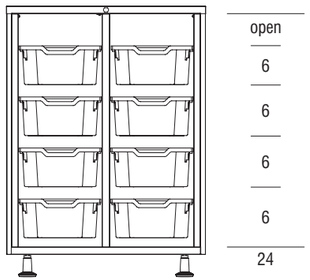
Short Storage Unit



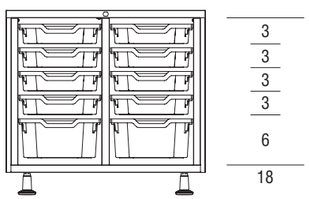
Tall Storage Unit

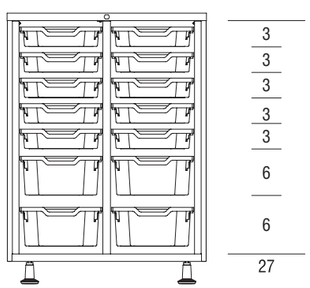






Note: There is 3" of tote storage space open at the top of each column of the tall storage unit (42" high) when pre-configured with 6" totes.





TECHNICAL SPECIFICATIONS (cont.)

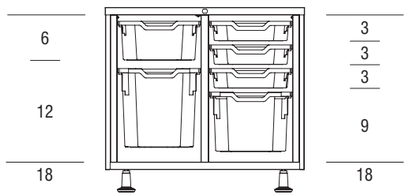
Tote Storage Configurations (cont.)

Ruckus Tote Storage, in any tote configuration beyond the preconfigured options, must be ordered separately and installed on site. The 3", 6", 9" and 12" high totes can be ordered in kits with a quantity of six totes (rail sets included), and can be programmed into any empty or pre-existing Ruckus tote storage units, without the use of tools.

Shown below are two examples of non-preconfigured layouts. Customers can specify any combination of totes as long as their accumulated heights do not exceed 18" per column for Short Tote Storage units, and do not exceed 27" per column for Tall Tote Storage units.

Build Your Own Examples:

Short Storage Unit



Tall Storage Unit

TECHNICAL SPECIFICATIONS

Ruckus Whiteboard

Dry-Erase Whiteboard (Side 1)
Dry-erase whiteboard surface is constructed of .08" thick opaque white polycarbonate resin with UV curing.

Polyester Felt (Side 2)
Polyster felt is constructed from 16 mm thick tackable, 100% post-consumer recycled polyester core felt in the color Flannel. The core material has a density of 2800 g/m^2 and is sound absorbing tested to ASTM C423 with an NRC rating of 0.55 when using no air gap (A-mount testing method) and an NRC rating of 0.60 with a 5 mm air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame spread.

Extra large whiteboards are constructed with two aluminum extruded stiffeners.

Magnetic Dots (Fasteners)
Securing the whiteboard to the polyester felt core material are metallic $^1/_4$-28 x $^5/_8$" socket flat head screws through custom nylon $^1/_4$" countersunk washers, threading into $^1/_4$-28 polycarbonate nuts at the backside of the felt core material. The flat heads of the metallic fasteners may be used to attach customer supplied magnetic accessories.

Leather Straps
Constructed of reconstituted (bonded) leather in matte black. Straps are 1.16" wide and permit hanging of Ruckus whiteboards on wall tracks and mobile display carts.

Pivoting Dock
Pivoting dock assembly consists of a table clamp and a whiteboard clamp, constructed of 14-gauge steel and secured with a rivet that allows for 360 degrees of rotation. Two thumb screw sizes are provided to clamp to different worksurface thicknesses. The $^3/_4$" thumb screw will accommodate worksurface thicknesses from $^3/_4$" to 1$^1/_4$". The 1$^1/_4$" thumb screw will accommodate thicknesses from $^1/_4$" to $^{11}/_{16}$". Steel pivoting dock is powder-coat painted in various standard KI finishes.

Wall Track
Wall track rail is formed of 16-gauge steel, powder-coat painted in various standard KI finishes. 48" wide and holds one to three white boards depending on size. Attachment hardware not included. Reference (KI-AI-000098) Ruckus Whiteboards - Wall Track - Assembly Instructions for more information.

Mobile Display Cart
Mobile display cart is constructed with 1" diameter, 14-gauge steel tubing, bent, cut, welded and secured with fasteners. The side panels and inner shelf are constructed of 14-gauge steel, stamped and formed. All steel is powder-coat painted in various standard KI finishes. Storage section on the cart contains a non-skid pad. Available with two optional polypropylene 6" tote storage drawers.

Casters
Mobile display cart ships with four locking casters with hard plastic wheels. Caster wheel height is 3", overall mounting height is 4", and caster unit is black. Caster bodies include a $^7/_{16}$" x $^7/_8$" grip-ring stem, which inserts into a grip-ring adapter in the legs of the mobile display cart. Casters are field replaceable.

Widget
Widget is constructed from 16 mm thick, 100% post-consumer recycled polyester felt in the color Flannel.

Undersurface Hook
Undersurface hook is formed from $^1/_4$" solid wire rod and is chrome plated, which provides long lasting wear resistance. Hook fastens to the underside of the worksurface with two #12 x $^3/_4$" Phillips pan-head screws. Hook is field installed.

VISUAL GUIDE

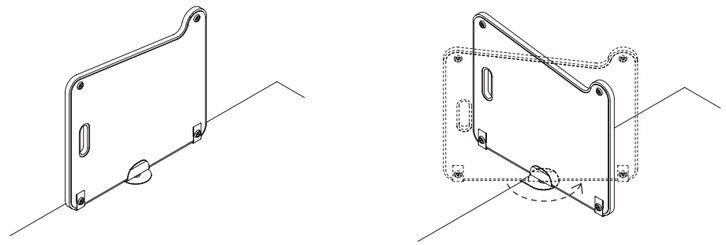
Ruckus Whiteboard & Pivoting Dock

Pivoting dock allows small, medium and large Ruckus whiteboard to rotate 360 degrees on the table or student desk.



Ruckus Whiteboard & Undersurface Hook

Small and Medium sized Ruckus whiteboards that are not in use can be stored on optional undersurface hooks. Ruckus post-leg desks and rectangle activity tables (excluding 20" deep) come with pre-drilled locations for installing unsurfaced hooks.

Note: Undersurface hooks cannot be installed on Ruckus cantilever desks and lecterns when book basket storage is specified, or on 20" deep rectangle activity tables. Contact KI customer service at 1-800-424-2432 for other undersurface hook solutions.

VISUAL GUIDE

Ruckus Whiteboard & Widget

Widgets are a multi-functional accessory that pair with Whiteboards to enhance use and support multiple configurations. Widgets can help to create a stand for display or drafting, and they are useful to create dividers or privacy screens. In addition, each Widget can hold one standard size dry-erase marker (approximately $^{11}/_{16}$" diameter) or two smaller sized dry-erase markers (approximately $^{3}/_{8}$" diameter).

Note: The graphics on this page illustrate markers being housed in the marker holder feature of the widgets. Dry-erase markers are customer supplied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/edge style.

73P	- 3/4" laminate top w/73P edge band

Ⓑ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base option.

CCC	- Casters
BCF	- Casters/felt glides
BCN	- Casters/nylon glides
GFT	- Felt glides
GNY	- Nylon glides

Ⓕ Select under table storage.

NB	- No book storage
BBS	- Small Book Box; add $28
BBL	- Large Book Box; add $30
BR	- Book basket; add $40
RT	- Removable Storage Tote; add $45

BBL option is not available on the small desk sizes.

Ⓖ Select book basket color.
Refer to the **Product Color Options** page in this price list.
Only if book basket storage is selected.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/edge style.

74P	- 1-1/4" laminate top w/74P edge band

Ⓑ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base option.

GFT	- Felt glides
GNY	- Nylon glides

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/edge style.

74P	- 1-1/4" laminate top w/74P edge band

Ⓑ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base option.

CCC	- Casters
BCF	- Casters/felt glides
BCN	- Casters/nylon glides
GFT	- Felt glides
GNY	- Nylon glides

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

GNY	- Nylon glides

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select door lock option.

SLCKL	- Standard lock hinged left
SLCKR	- Standard lock hinged right
PLCKL	- Padlock hinged left
PLCKR	- Padlock hinged right
CLCKL	- Combination lock hinged left
CLCKR	- Combination lock hinged right
DLCKL	- Digital lock hinged left
DLCKR	- Digital lock hinged right

Ⓒ Select pull option.

S6	- Beveled pull Black
S5	- Beveled pull Satin Chrome

Pull selection only when SLCKR or SLCKL key lock is selected.

Ⓓ Select base option.

4CW	- 4 black casters
4GB	- 4 black glides

Ⓔ Select top laminate surface.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select shell color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select front door color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select lock optiion.

KS	- Key standard
NLC	- No lock core
KA	- Key alike

Available ONLY when the standard lock is selected.

Ⓙ Select lock color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard finish is the supplier’s recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model/edge style.
- **73P** - 3/4" laminate top w/73P edge band

Ⓑ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select base option.
- **CCC** - Casters
- **BCF** - Casters/felt glides
- **BCN** - Casters/nylon glides
- **GFT** - Felt glides
- **GNY** - Nylon glides

Base options for Floor Height Adjustable are ONLY Felt glides - GFT and Nylon glides - GNY

Ⓕ Select under table storage.
- **NB** - No book storage
- **BBS** - Small Book Box; add $32
- **BBL** - Large Book Box; add $37
- **BR** - Book basket; add $48
- **RT** - Removable Storage Tote; add $49

BBL option is not available on the small desk sizes.

Ⓖ Select book basket color.
Refer to the **Product Color Options** page in this price list.
Only if book basket storage is selected.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

BCF	- Casters/felt glides
BCN	- Casters/nylon glides
GFT	- Felt glides
GNY	- Nylon glides

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

GFT	- Felt glides
GNY	- Nylon glides

Base options for Floor Activity Height are ONLY Felt glides - GFT and Nylon glides - GNY

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.
