Customer's Own Material ■

Specifications Form
January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

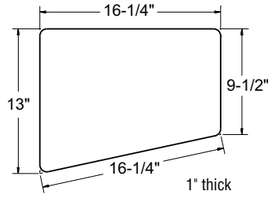
Tablet depth (side 2)					9-1/2"	
Tablet thickness					1"	



Sela Tablet

Table (Open on 2 Sides with Septum Down Middle)

Cube Table (Fully Enclosed)

Frame
Seat frames are constructed of 3/4" laminated hardwood plywood that is CNC cut with 5/4 maple cross rails. Ottomans are constructed of 3/4" laminated hardwood plywood. All mainframe joints are doubled doweled and glued. Stress points are further reinforced with the use of glue blocks that are stapled or screwed in place. The arms are constructed of 1/2", 3/4", and 1" laminated hardwood plywood.

Sled Base
Legs are constructed of 1' O.D. x 16-gauge round steel tubing welded to a 14-gauge steel mounting plate and secured to the frame with 16 #10 x 1.5" steel pan head wood screws.

Wood Frame
Wood base is 12/4 kiln dried beech hardwood with a moisture content of 6% - 8%. Wood base joints are mortise and tenon and dowel construction. Oversized corner blocks are glued and attached with screws and staples to secure.

Wood Armcap
Wood armcaps are 12/4 kiln dried beech hardwood with a moisture content of 6% - 8%. Wood armcaps are attached with compression dowel construction.

Tablet Arm
Left-facing tablet is standard. Right facing (left-handed) tablet is available if specified.

Seat and Back Suspension
The seat is constrctued with stretch strap webbing, inner woven and stapled into position. Both seats and backs are covered with a layer of FLW (reinforced non-woven fiber) on top.

Foam
The back foam is 3" thick and contour cut for consistency. The seat foam is 6" thick. A .5" super soft wrap covers the front and top of the seat. The arm foam varies from from 1.25" thick to .5" thick.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

SPECIFICATIONS

Conference Table Top

Table tops are constructed of 1-1/8" thick, 45 lb density particleboard core, with a 1/32" veneer finished top surface and 1/32" thick phenolic backing. Serenade is available in four top shapes - rectangle, racetrack, boat and sight line. The top shape can be specified with one of six different styles of wood edging. Edging is present on all sides, with several selected edge styles providing radius or square corners.

Tops specified at 144" or longer require two piece construction using steel joinery for vertical and lateral joint strength along the entire width of the top. The veneer pattern is reverse slip matched. All joinery is hidden on the underside of the top. A flush mounted Vault power module is available.

Conference Table Base

Table bases are constructed of 5/8" thick particle board. The veneer one-sided finish width is 41/64".

Bases are offered in five styles:
- Panel base - 4" wide
- Column base - 12" wide, base is wide enough to cover a 4 receptacle floor outlet for power wiring
- Veneer drum - 18", 20", 23" and 33" diameter
- Veneer half drum - 18", 20", 23" and 33" diameter
- Metal drum - 18", 24" and 28" diameter; available in all KI standard powdercoats

All bases feature adjustable glides 1" in diameter, 5/16-18 threaded for level setup within 2" of adjustable height. Tables sized 168" or longer are configured with three bases; all other table sizes are configured with two bases. All enclosed bases are available with an access door for easy power source access.

Conference Table Modesty Panel

Modesty panel (base "stringer") is constructed of 5/8" thick particle board. The veneer one-sided finish width is 41/64". Modesty panel height is 12" x 10" wide. Power/data options and cables are routed and hidden within the modesty panel for an organized and clean appearance.

Conference Credenza

Credenza is offered in two heights: conference height (29") and buffet height (36"). Both heights feature standard adjustable shelves. The buffet height credenza offers two adjustable shelves per cabinet; conference height offers one adjustable shelf per cabinet.

The credenza top is constructed of 1-1/8" thick particle board, with 1/32" veneer finished, solid wood front edge and veneer finish on three sides. All credenza components are constructed of 5/8" thick particle board. The entire back of the credenza is finished in veneer. The veneer finish width is 21/32" for all 2-sided finished sides, doors, shelves and trim.

Door hinges are constructed of steel, spring loaded for soft-close, fully adjustable for gap and flush closure, hidden and flush mounted. Door pulls are offered in three styles: square bar, curved and straight. Curved pulls are available in black and silver, Straight and Square pulls are available in silver. Adjustable 1" diameter 5/16-18 threaded floor glides provide level setup within 1-1/2" total adjustability.

Vault Module

Available on conference table tops only. The optional Vault Module is a power and data module constructed of stained aluminum, flush with the surface of the table top. Surface cutout needs to be 14.5" x 4.0125", overall size of the module is 15.875" x 4.375" x 4.375".

Standard configuration includes three power outlets, two data ports, one VGA connection, and one HDMI connection. The module is opened and closed by touching the red and green arrows on the surface of the module. The module also contains a photo-electronic eye that prevents closure when power, VGA, or HDMI cords are plugged in.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select species/stain color
Refer to the **Product Color Options** page in this price list.

Ⓒ Select edge style

14R	- 1-1/4” Wood bullnose, radius corner
14S	- 1-1/4” Wood bullnose, square corner
15W	- 1-3/4” Wood bullnose
36R	- 1-3/4” Square wood, radius corner
36S	- 1-3/4” Square wood, square corner
24R	- 1-1/4” Square wood , radius corner
24S	- 1-1/4” Square wood, square corner
44R	- 1-1/4” Beveled wood, radius corner
44S	- 1-1/4” Beveled wood, square corner
CR	- Reed edge

Ⓓ Select power module.

NP	- No module
P1	- Single vault power module; add $2521
P2	- Double vault power module; add $5043

One vault power module available on 120” or less, two vault power modules on 144” or larger

Ⓔ Select wood inlay.

NWI	- No Wood Inlay
CWI	- Wood Inlay

See pricing column for Inlay Upcharge.

Ⓕ Select access panel.

NAP	- No access panel
WAP	- With access panel; add $181

Ⓖ Select base finish.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select stain color
Refer to the **Product Color Options** page in this price list.

Ⓒ Select edge style

14R	- 1-1/4” Wood bullnose, radius corner
14S	- 1-1/4” Wood bullnose, square corner
15W	- 1-3/4” Wood bullnose
36R	- 1-3/4” Square wood, radius corner
36S	- 1-3/4” Square wood, square corner
24R	- 1-1/4” Square wood , radius corner
24S	- 1-1/4” Square wood, square corner
44R	- 1-1/4” Beveled wood, radius corner
44S	- 1-1/4” Beveled wood, square corner
CR	- Reed edge

Ⓓ Select power module.

NP	- No Module
P1	- Single vault power module; add $2521
P2	- Double vault power module; add $5043

One vault power module available on 120” or less, two vault power modules on 144” or larger

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select access panel.

NAP	- No access panel
WAP	- With access panel; add $181

Ⓖ Select base finish.
Refer to the **Product Color Options** page in this price list.

PRODUCT SPECIFICATIONS

Serenade™ Gathering Table

April 2020

TECHNICAL SPECIFICATIONS

Tabletop
Tabletops are constructed of 2" thick, 45 lb density particle board core with 1/32" laminate finished top surface and 1/32" thick phenolic backing.

End Panels
End panels are constructed of 2" thick, 45 lb density particle board core finished with 1/32" laminate on both the front and back surface. The ends are finished with 1/32" Self Edge or matching laminate. The bottom is finished with black laminate. Tables 108"-144" wide come with an inset support leg constructed of 2" thick, 45 lb density particle board core finished with 1/32" laminate on both the front and back surface. 24" deep tables contain a 12" wide inset leg which is centered at the rear of the table to allow more leg clearance on the user side of the table. 30"-48" deep tables contain an 18" wide leg that is placed directly in the middle of the table construction to allow user clearance on both sides of the table. Adjustable glides are 1" diameter, 5/16-18 threaded floor glides and offer 1 1/2" of adjustability. These panel structures are secured to the tabletop with hardware and 9-gauge steel mounting plates.

Stringers and Modesty Panels
Tables are fitted with either 7 3/4" tall (on 29"H models) or 11 3/4" tall (on 42"H models) stringers or full-height modesty panels. These stringers and modesty panels are constructed of 1" thick, 45 lb density particle board core finished with 1/32" laminate on both the front and back surface. Power and data options and cables are routed and hidden within the stringers when specified. These panel structures are secured to the tabletop with hardware and 9-gauge steel mounting plates. On 18"-24" deep tables, the stringer or modesty panel is located to the rear of the tabletop allowing user seating or standing access from only one side of the table. On 30"-48" deep tables, the stringer or modesty panel is located along the center line of the tabletop, allowing user seating or standing access from both sides of the table.

Electrical (power module placement when specified)
Tables 60"-96" wide receive one power module, or grommet centered along the length of the tabletop. Tables 108"-144" wide receive two power modules, or grommets each centered between the center and end legs. Tables 18"-24" deep have the power module or modules to be 6" from the rear edge of the tabletop to the center of the module cutout. Tables 30"-48" deep have the power module or modules to be centered from the front edge to back on the tabletop.

PowerUp® Module with 3-Prong Plug
Tables are available with one or two PowerUp modules per table. Tables with widths of 84" or less always get one module while tables with widths of 96" or more always get two modules. The PowerUp module is a UL listed relocatable power tap, which is a surface-mounted power module with a plastic cover. When open, two simplex power receptacles and two data jack openings are exposed. The module is 3 1/4" wide x 7" long and 2 1/4" tall when opened and fits securely into a 6 1/4" x 3" cutout, still allowing removal without tools. It is provided with a 15 ft cord and 3-prong plug, rated 120VAC, 15A. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two simplex receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. Data connectors are not supplied with the module and are purchased separately.

TECHNICAL SPECIFICATIONS

Villa™ Power Module with 3-Prong Plug
Tables are available with one or two Villa power modules per table. Tables with widths of 84" or less always get one module while tables with widths of 96" or more always get two modules.

The Villa power module is an Interek ETL Listed Furniture Power Distribution Unit surface module that mounts below a 6 1/4" x 3" grommet cutout in the tabletop. The module is 3 1/2" wide x 6 3/4" long and 2" tall when opened. It is provided with a 15 ft cord and 3-prong plug, rated 120VAC, 15A. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. An additional simplex receptacle is located at the underside. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included.

4-Port Module
The USB/AC power module houses two 125 volt, 15-amp AC outlet and four 5V DC, USB (type 2.0 and type 3.0 compatible) charging plug-in receptacles with 2.1 amp DC total power (no data). The power cord is a 14 AWG, 15-amp NEMA rated three conductor SJT, cord 15 ft in length with a 3-prong grounded plug. The circuitry is contained in an extruded aluminum housing. The entire electrical power module assembly is UL listed and passes a UL spill test rating for protection against liquids. Both USB ports can power and charge separate tablets, simultaneously.

Integrated Leg Wireway
When power is specified, each end panel and middle leg comes standard with a vertical integrated wireway cavity that measures 1 3/8" x 3 1/4". This is designed for passing cords and cables through the leg. Access is through a 2 1/2" hole near the top, at the inside of the leg and a 2 1/2" hole near the bottom of the leg. Chrome finished covers are provided to cover the bottom access holes. Where center table legs are needed with power specifications the grommet access is on both sides of the leg at the top and bottom.

Velcro® Wire Management
The Velcro® wire manager is constructed of 2" x 4 1/2" Velcro® hook and loop material. Wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are not pre-drilled for locating wire manager, so the manager may be applied in any convenient location. One wire manager is included for each power module ordered. Field installed.

Accessories

Bag Hook
The hook is constructed of 1/4" steel rod with a Chrome finish. It is attached to the underside of the top with two screws (provided). On 18"-24" deep tabletops, coat hooks may only be used on the front, user side of the table. On 30"-48" deep tabletops, coat hooks may be used on both sides of the table. 60" & 72" wide tables may use up to two hooks per side. 84" & 96" wide tables may use up to three hooks per side. 108", 120" & 144" wide tables may use up to four hooks per side.

Footrest
The optional footrest is constructed of a 1 1/2" diameter, 12-gauge DOM steel tube, milled at each end, containing welded-in inserts with a tapered slot. #12 x 1" Phillips screws, installed into end leg panels at 6" from the edge of the leg panel and 6 1/2" up from the bottom of the panel capture the tapered slot in the insert at the outside ends of the footrest tubes and hold the footrest in place. In specific width conference tables (see below), a two-piece footrest design is required, utilizing a center foot support which connects the two outer footrest halves together using #10-24 x 1/2" Torque thread cutting screws. The foot support also mounts to the conference table's middle leg panel using a #12 x 1" Phillips screw with tapered insert design. The center foot support is of milled and welded construction and contains a 1" diameter, 5/16-18 threaded floor glide offering 1 1/2" of adjustability. 60"-90" wide tables use the one-piece footrest. 108"-144" wide tables use the two-piece footrest construction, with the center foot support. On 18"-24" deep tabletops, the footrest may only be used on the front, user side of the table. On 30"-48" deep tables, footrests may be used on both sides of the table. The footrest and center foot support may be specified as bright nickel-chrome plated, or finished in either Starlight Silver, Black or Flannel powder-coat paint.

Ordering C.O.M., C.O.L., and C.O.V.

Bonduel, Green Bay, Ontario, Tupelo and Shipping Locations 3

Sift®

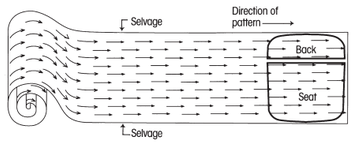
General Information 4
Product Color Options 5
Task and Guest Chairs 6

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

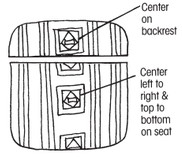

Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Purchasing Agent (Dealer or buying organization)

Guest Chair

SPECIFICATIONS

TASK CHAIR

Backrest and Mesh Seat
Reinforced nylon frame with mesh material. *So-Soft* mesh material is made from 65% polyester and 35% nylon. Integral polypropylene lumbar support mechanism is easily adjusted by the user within a 3" range.

Mechanism
Stamped steel mechanism provides for sturdy seat and back mounting. Height-adjustable pneumatic cylinder is actuated by a control lever beneath the seat. Seat height adjusts from 18-1/4" to 22-1/4". Back lock mechanism provides five back positions. Tension control knob adjusts the tension recline force. Spring-loaded seat slide mechanism controls seat depth adjustment in five positions through a distance of 1-1/2" and is side mounted for easy use. Synchronized 2:1 seat/back tilt mechanism has movement of 8 degrees on seat and 16 degrees on back.

Base
Standard 26" diameter, five-blade reinforced nylon base, black only. Optional 26" diameter polished aluminum five-blade base.

Casters
Double 65mm diameter black wheels are molded of reinforced plastic. Hard floor or carpet casters available.

Adjustable T-Arm
Black molded urethane armcap. Armcaps move forward/backward in five positions through 1-1/2". Armcap width adjusts in five positions through 1". Arm support width can be set between 18-1/2" - 19-1/2" at assembly. Armrest height adjusts to 11 positions through 2-3/4". Armcaps rotate in three positions (+/- 20 degrees).

Weight Capacity
Passes all BIFMA x 5.1-2011 and KI's internal standard for 300 pound capacity.

GUEST CHAIR

Backrest and Mesh Seat
Reinforced nylon frame with mesh material. *So-Soft* mesh material is made from 65% polyester and 35% nylon. Backrest and seat secured to frame with four bolts each.

Upholstered Seat
Plywood seat structure with two layers of polyurethane foam with a fabric cover held in place with staples.

Frame
Tubular steel frame made with .08" thick x 1.32" x .88" oval steel tubing.

Arms
Arms are integral to the frame with a black molded reinforced nylon armcap.

Glides
Four nylon glides.

Weight Capacity
Passes all BIFMA x 5.1-2011 and KI's internal standard for 300 pound capacity.

TASK STOOL

In addition to the standard height unit described under the Task Chair, a stool height version is available. Stools are equipped with a pneumatic cylinder allowing adjustment of seat height from 21-1/2" - 29". The 18" diameter adjustable footring is made of die-cast aluminum with a chrome-plated tubular steel ring and black "spokes." Stools are available with plastic or polished bases.

Smart Lift®
General Information

Smart Lift

Features	
Standard size cutout area	21"W x 6"D
Maximum monitor size	21"W x 19"H x 3.6"D

SMART LIFT CONSTRUCTION

Worksurfaces
Horizontal worksurfaces are constructed of 1-1/8" thick 45# density particleboard with .030 thick high-pressure laminate and .030 thick high-pressure backing sheet. Post-formed (PL) edge worksurfaces have elliptical front edge. Rear and side edges are covered in matching flat .024" edge banding. Urethane (ME) edge worksurfaces have elliptical molded front edge. Rear and side edges molded in 1/4" flat urethane. 74P (74P) edge is 2mm thick and bonded to all 4 sides of the surface. Worksurfaces have one or two 6" x 21" cutouts which accept Smart Lift unit(s). Smart Lift price is included in the price shown for worksurface. Smart Lift cutouts in the worksurface are sealed and painted black. A single grommet or PowerUp module may be placed in most worksurfaces. Grommets are standard 5-3/4" x 2-1/4" and have a flip-up receding door. Grommets are the same size as PowerUp modules to allow for retrofitting. The grommet or PowerUp will be placed in the upper right corner for worksurface widths of 48" and 54" or centered between the doors for the 66" and 72" double units. The door is fabricated from 5/8" thick 45# density with .030" high-pressure laminate on both faces. The door edges are sealed and painted black.

Smart Lift Beam Assembly
Beam door is constructed of a .06" thick dual-durometer extrusion joined to the steel lower rail by a tongue and groove fit. The door has a continuous flexible hinge allowing it to pivot at the bottom. The beam allows all cords to be stored within. The front side of the beam is partially covered by the garage and its components with minimum accessibility from the user side. Beams for the Smart Lift must be specified as "standalone," "end-of-run left," "middle," or "end-of-run right." Standalone beams will be shipped with two end caps; end-of-run beams will be shipped with either a left or right end cap; middle beams will not include any end caps.

Smart Lift Legs
Vertical leg tube measures 2" x 5" and is constructed of 14-gauge formed steel. All legs have vertical wire management capabilities. A reversible vertical wireway is standard with each leg. Steel trim and liquid-tight fittings are available for power infeeds at the bottom of any leg. All "C" legs can be used as either end legs or shared legs. Nylon glide can be adjusted vertically up to 1-1/4".

Smart Lift Unit
The garage housing and front panel is fabricated from 16-gauge steel with matching powder-coated finishes. Internal components and wiring for the monitor, keyboard, and mouse can be accessed by removal of seven screws attaching the front panel. The lift bar is fabricated from 11-gauge steel with a 14-gauge steel keyboard/mouse tray and is available in black powder-coat finish. The lift bar and rising door is guided by four, maintenance-free V-groove roller bearings attached to an 11-gauge roller bracket also available in black powder-coat finish. The lift bar is raised pneumatically via a cable/pulley mechanism that is mounted inside the unit. The keyboard/mouse tray features a 3/16" diameter wire rod to hold the keyboard vertically in place for storage and provides for an area under the monitor for mouse storage. The garage unit can be specified with a keyed lock that allows every cover to be locked individually or a remote locking option that allows multiple-unit locking via control of 1- 5 remote key fobs. Wire management within the unit is accomplished with a corrugated polyethylene hose and grommet/clamp arrangement. The hose is split lengthwise to allow for easier insertion of cords with large plugs. An optional monitor tilt kit can be specified to allow up to 10 degrees of tilt and reduce glare. Smart Lift units without monitor tilt can accommodate a VESA compliant monitor with a maximum size of 3.6" deep x 19.0" high x 21.0" wide and maximum weight of 15#. The combined keyboard and monitor thickness must be less than 4.8" thick. The maximum depth of monitor with the monitor tilt option is reduced by .6" to 3.0".

Smart Lift Operation
Monitor and peripherals can be accessed by lightly depressing the center, front of door and releasing. The unit will automatically raise fully allowing access to the monitor, keyboard and mouse. Internally stored keyboard and mouse may be removed manually for use. After use, the keyboard, mouse, and associated wiring can be restowed below the monitor. Storage of monitor and peripherals is accomplished by pushing down firmly on the top, center of door until slightly below worksurface height and releasing.

Remote Control Unit
Sends locking and unlocking signals to receivers. Remote must be specified separately if electric lock option (ELK) is selected.

PowerUp
PowerUp is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed. PowerUp is UL Listed (UL1363) as a Temporary Power Tap. The PowerUp module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-VO minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with a 22" cord and a 3-prong plug.

10-Wire Pre-wired Harness
UL listed the wiring configurations of the 810-wire systems are as follows: 622-Six hot conductors (12-gauge), two neutral conductors (10-gauge) and two grounds (12-gauge). System provides four 20 amp, 125 volt capacity circuits. All receptacles are rated at 15 amps, 125 volt capacity. Connection diagrams are available. Pre-wired harness plugs into the adjacent table harness for table reconfiguration.

Communications Circuitry
Data connectors and wiring must be ordered separately by the customer.

Note
New York City and Chicago installations will require a Product Modification Request. Contact KI customer service for details.

Smart Lift®
Worksurfaces - Poly Grommet/PowerUp

ISMT

Single Unit

- Legs are attached to the worksurface through threaded steel inserts
- Beams and legs must be specified separately
- One PowerUp module or grommet is available in the upper right corner for 48” and 54” widths
- 30” depth provides 17” leg clearance
- Remote must be specified separately if electric lock option (ELK) is selected
- 22” PowerUp is recommended when the beam is powered
- 108” PowerUp is recommended when the beam is not powered
- The lift, without the tilt option, can accommodate a VESA compliant monitor with a maximum size of 3.6” deep x 19” high x 21” wide and maximum weight of 15 lbs
- The combined keyboard and monitor thickness must be less than 4.8” thick
- The maximum depth of monitor with the optional tilt bracket (specified separately) is reduced by .6” to 3.0”
- A single SmartLift will receive one 5 lb kit: includes two 2-1/2 lb weights, carriage bolt and locking nut

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.

74P	- 74P edge
PL	- Postformed edge
ME	- Urethane edge

C Select top feed/power option.

N	- No top feed
L	- Left hand top feed
R	- Right hand top feed

D Select PowerUp or grommet location.

G	- Grommet only (Rectangular)
P	- PowerUp only; add $164
S	- No PowerUp modules,no grommets (solid surface top)

E Select locking option.
Remote must be specified separately if ‘Electric lock’ option (ELK) is selected.

NLK	- No lock
ELK	- Electric lock; add $303
MLA	- Manual lock, keyed alike; add $46
MLS	- Manual lock, keyed standard; add $46

F Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

G Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

H Select grommet/module color.
Refer to the **Product Color Options** page in this price list.

I Select enclosure color.
Refer to the **Product Color Options** page in this price list.

J Select cord length (feet).

108	- 108” (inches)
22	- 22” (inches)

INFORMATION

Shipping

Worksurfaces with cutouts are shipped separately from garage units. Garage units are shipped assembled with lids pre-attached.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

INFORMATION

Infrared Receiver
Works with, and must be ordered with an Infrared Remote Control Unit to lock down or unlock a room of tables featuring flatscreen garage units. One receiver is attached to each table and can receive a signal for up to two garage units.

Infrared Remote Control
Sends locking and unlocking signals to receivers and can also be used to raise and lower multiple units at once.

Floor Infeed (10-Wire)
Two 90° connectors. Flexible steel conduit with eight 12-gauge conductors in the leg. Includes steel trim plate with dual holes for electrical and data entry and six feet of liquid-tight flexible conduit .8315 diameter.

Overhead Infeed Circuit Pre-wired
Aluminum pole is 10ft. in length. Flexible steel conduit with ten 12-gauge conductors. Includes ceiling trim plate.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.

Customer's Own Material ■

Specifications Form
January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:
KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

Ordering COM, COL and COV
Information

Customer's Own Material ■
Specifications Form
January 2017

ADDITIONAL NOTES:
- Orders cannot go into production without the information listed at right.
- Attach memo sample to this approval sheet.
- If your order has been placed, list PO# _____
- The cost of the COM sample will be paid by the client.
- Even after preliminary approval, KI reserves the right to reject COM/COL if necessary when the quality is not satisfactory for the product to be upholstered. KI assumes no responsibility for its overall appearance, flammability, durability, color fastness or any other quality after upholstered on a KI product.

ALL COM MUST BE APPROVED.
Photocopy this form and submit with COM fabric for approval:

(This fabric approval is for the purpose of advising how to apply your COM fabric, verify yardage required, and suitability.)

Complimentary Furniture
The following lounge collections offer complimentary furniture that creates continuity and a cohesive look throughout a facility. These complimentary pieces can be found in other sections of the KI price list.

SOLTICE HEALTHCARE SEATING - Soltice® Multiple Seating, Soltice® Guest Seating, Soltice® Lounge Seating, LaResta® Day Bed (FSD/SL)

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Service for detials.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam. Not available with TB133.

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

Construction
Seat and back frame constructed of welded structural steel. Arms constructed from kiln-dried hardwood. Arms are not field replaceable. Cushions constructed of multiple densities of polyurethane foam. Storage box constructed of laminated plywood, black paint standard.

Options
SLS - comes standard with casters. Casters, front (locking/swivel) and rear (swivel).

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam. Not available with TB133.

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

Construction
Seat and back frame constructed of welded structural steel. Arms constructed from kiln-dried hardwood. Arms are not field replaceable. Cushions constructed of multiple densities of polyurethane foam. Storage box constructed of laminated plywood, black paint standard.

Option
Casters Are NOT available on SLSS loveseat sleeper. Wood legs are standard.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select I.V. pole (facing).

NS	- No pole
LFFIV	- Left facing front; add $417
LRFIV	- Left facing rear; add $417
RFFIV	- Right facing front; add $417
RRFIV	- Right facing rear; add $417

If top articulating table is specified, table, I.V. pole and/or catheter bag attachment must all be specified in unique locations.

Ⓔ Select catheter bag attachment.
(specified facing chair)

NCA	- No catheter attachment
LFCA	- Left facing front; add $67
LRCA	- Left facing rear; add $67
RFCA	- Right facing front; add $67
RRCA	- Right facing rear; add $67

If top articulating table is specified, table, I.V. pole and/or catheter bag attachment must all be specified in unique locations.

Ⓕ Select magazine rack.

NMR	- No rack
LFM	- Left side rack; add $279
RFM	- Right side rack; add $279

Magazine rack fabric will match arm fabric selection

Ⓖ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $243

Ⓗ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓘ Select laminate color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Moisture Barrier $201
TB133 $424

Options
Additional options may be ordered.
Add /xx to the end of the model number and upcharge.

Trendelenberg
/TM and $233

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.
Model: Soltice® Recliners $15

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

Construction
Frame constructed of kiln-dried lumber and laminated hardwood plywood. Exposed wood components finished with catalyzed varnish (specify finish when ordering). Tight seat constructed with universal 7.5-gauge sinuous wire springs. Tight back sprung with stretch strap webbing stapled into position. Multiple densities of polyurethane foam covered with a layer of .75 super soft foam. Seats, backs and arms are field replaceable. Mechanism chassis is of 2" x 1" 14-gauge rectangular steel tube frame welded at all member connection and powder coated to seal frame.

Options
SR cannot be manufactured without casters and pushbar.

Pushbar standard.

SRMCA/(RF/LF)	$14 (each)

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Moisture Barrier
Moisture barrier is applied underneath the fabric cover as a means of protecting the foam. Not available with TB133

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request in required. Contact Customer Service for details.

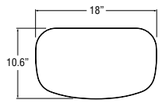
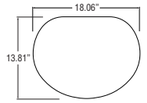
Overall height	47"
Seat width	24"
Seat depth	20"
Seat height from floor	20"
Arm height at front of arm (highest point)	27-1/2"

Tablet Arm Options



Top-Mounted Articulating Revolving Tablet



Side-Mounted Articulating Fold-Down Tablet

Caster - Locked Position

Chair Testing and Loading
The Affina II Recliners have passed all standard ANSI BIFMA tests for seating products, and in addition, the chairs also passed KI's bariatric test battery (see document KI-98829) which allows the chairs to safely accommodate weights of up to 750 pounds.

Field Replaceable Seat, Back, Ottoman and Armcaps
Replacement seats include new foam and upholstery and are Velcro Fastened to the seat. Backs are attached to the frame mechanism with a metal-to-metal hinge connection that allows for easy replacement. Removing two screws at the bottom of the back will allow lifting the entire back off the mechanism. Replacement backs come with complete wood frame, foam and upholstery. Footrest Ottoman replacements are fully upholstered and bolt on to the frame. Armcaps are attached to the arms using compression dowels for easy replacement. For full arm replacement, contact a factory representative.

Wood Arm Caps
Wood arm caps are constructed of 12/4 select hardwood kiln dried to a moisture content of 5% to 7%, fastened to hardwood plywood panels. Joinery utilizes three (3) 1/2" x 1" spring steel dowels, screwed into position on the arm cap. Plywood arm panels are 1/2" thick plywood skins, inside and out. glued and stapled using mortise, butt, and lap joints throughout. Craftboard (.09 thick) is stapled over edges and bottom beneath 1/4" thick soft polyurethane foam padding.

Mechanism and Chair Frame
Rectangular steel tube frame ranging from 14 to 10 guage, is welded, or riveted, at all member connections and fully powder coated to seal frame. Steel frame arm and footrest mounting plates are 14 guage thickness. Frame is bolted to wood arms at 12 locations using 1/4"-20 machine bolts. Back frame is constructed of 1" laminated plywood with solid wood cross rails. Dowel and lap joints are utilized. Seat frame is 5/4 solid maple wood. Mechanism is all steel ranging in guage from 14-11 guage.

Recliner Back and Seat
Back is 1" hardwood plywood (7 ply) utilixing dowel and lap joints. Six (6) 3" woven web straps are stretched and interwoven across the seat and stapled. Sea Board mounts to steel seat frame using two (2) 1/4"-20 machne bolts. Propex woven polypropylene fabric covers the back surface openings. A layer of 1/4" thick soft polyurethane foam padding covers all non-cushioned surfaces.

Polyurethane Foam Cushions
Seat cushion is composed of 2.5 lb. 35 density high resilient polyurethane foam measuring 4" in thickness. A 1" thick slab of 1.5 lb. 14 density foam is laminated to the top and front edge. Back cushion is composed of 2.5 lb. 35 density high resilient polyurethane foam measuring 2" in thickness. A 1" thick slab of 1.5 lb. 14 density foam is laminated to the foam surface.

Upholstery Covers
Traditional upholstery methods are used throughout.

Casters
Four 3" individual locking, swiveling casters are fastened to the four corner of the chair.

Central Locking Caster System
5" sealed, locking casters are activated using a foot lever, and are controlled by a series of steel and cast aluminum linkages inside the chair.

Optional Heat & Massage
Heat & Massage units are installed into the backrest and the seat of the unit. Control functions are performed at a built-in control unit in the right-facing arm. Three temperature levels are available for the heat option: low (37C/99F), medium (38C/101F), and high (39C/102F), with an automatic shut-off after four hours of operation. The vibrating massage modules are built into the backrest of the unit, with the controller managing four modes of operation: low location low vibration, low location high vibration, high location low vibration, and high location high vibration, also with an automatic shut-off after 15 minutes of operation. The entire assembly meets TUVRheinland and IEC 60601-1 ratings. The powercoard is a 14 AWG, 15-Amp NEMA rated three conducted SJT, with a three-prong grounded plug. A 72" length of exposed power cord extends from the back of the unit and is strain releaf mounted to the rear of the unit. Use of this product is not intended to offer any medical benefits, but rather supports relaxation, comfort, and convenience to the user.

Optional USB Charger (requires Heat & Massage selection)
The USB power module houses one 5V DC USB (type 2.0 and type 3.0 compatible) charging plug-in receptacle with 1-AMP DC total power (no data). The module is installed in the front of the right-side facing arm.

SPECIFICATIONS

Complimentary Furniture
The following lounge collections offer complimentary furniture that creates continuity and a cohesive look throughout a facility. These complimentary pieces can be found in other sections of the KI price list.

SOLTICE HEATLHCARE SEATING - Soltice Multiple Seating, Soltice Guest Seating, Soltice Lounge Seating, LaResta Day Bed (FDS/SL).

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirement. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Service for detials.

Soltice 1.5 Recliner $14

INFORMATION

Moisture Barrier $203

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Construction
Wood arms and armcaps (field replaceable) constructed of kiln-dried hardwood. Recliner mechanism constructed of flat and tubular steel bolted to wood arms at 16 locations. Ottoman mechanism constructed of 14-gauge steel mounted to chair frame. Back shell is 1" hardwood plywood (7 ply), glued and stapled. Seat shell is 1" hardwood plywood (7 ply). Cushioning of multiple densities of polyurethane foam. Seat and back are field replaceable. Ottoman is field replaceable. Soft touch ottoman release and push/pull handles.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select Heat and Massage option.

NHM	- No heat and massage
WHM	- With heat and massage; add $1441

Ⓔ Select USB Power option.

NUSB	- No USB Power
WUSB	- With USB power; add $275

Only available if Heat and Massage option is selected.

Ⓕ Select I.V. pole (facing).

NS	- No pole
LRFIV	- Left facing rear; add $439
RFFIV	- Right facing front; add $439
RRFIV	- Right facing rear; add $439

If top articulating table is specified, table, I.V. pole and/or catheter bag attachment must all be specified in unique locations.
If optional magazine pouch is specified, only Left-facing-rear (LRFIV) or No pole (NS) can be specified.

Left facing = right-handed when seated
Right facing = left-handed when seated

Ⓖ Select catheter bag attachment hook (facing).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $73
RFCA	- Right facing front; add $73
RRCA	- Right facing rear; add $73

If top articulating table is specified, table, I.V. pole and/or catheter bag attachment must all be specified in unique locations.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $279

Magazine pouch fabric will match arm fabric selection

Ⓘ Select arm option.

PAC	- Black poly (pair); add $223
WAC	- Wood (standard)

Ⓙ Select wood finish color.*
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓚ Select laminate color.
Refer to the **Product Color Options** page in this price list.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.
Model
Soltice 1.5 Recliner $14

INFORMATION

Moisture Barrier $203

C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery

When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity

Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Construction

Wood arms and armcaps (field replaceable) constructed of kiln-dried hardwood. Recliner mechanism constructed of flat and tubular steel bolted to wood arms at 16 locations. Ottoman mechanism constructed of 14-gauge steel mounted to chair frame. Back shell is 1" hardwood plywood (7 ply), glued and stapled. Seat shell is 1" hardwood plywood (7 ply). Cushioning of multiple densities of polyurethane foam. Seat and back are field replaceable. Ottoman is field replaceable. Soft touch ottoman release and push/pull handles.

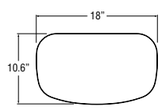
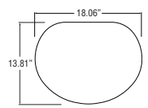
Tablet Arm Options



Top-Mounted Articulating Revolving Tablet



Side-Mounted Articulating Fold-Down Tablet

Field Replaceable Seat, Back, Ottoman and Armcaps
Replacement seats include new foam and upholstery and are Velcro Fastened to the seat. Backs are attached to the frame mechanism with a metal-to-metal hinge connection that allows for easy replacement. Removing two screws at the bottom of the back will allow lifting the entire back off the mechanism. Replacement backs come with complete wood frame, foam and upholstery. Footrest Ottoman replacements are fully upholstered and bolt on to the frame. Armcaps are attached to the arms using compression dowels for easy replacement. For full arm replacement. contact a factory representative.

Chair Testing and Loading
The Soltice II Recliners have passed all standard ANSI BIFMA tests for seating products, and in addition, the chairs also passed KI's bariatric test battery (see document KI-98829) which allows the chairs to safely accommodate weights of up to 750 pounds.

Soltice® II Healthcare
General Information

Wood Arm Caps
Wood arm caps are constructed of 12/4 select hardwood kiln dried to a moisture content of 5% to 7%, fastened to hardwood plywood panels. Joinery utilizes three (3) $^1/_2$" x 1" spring steel dowels, screwed into position on the arm cap. Plywood arm panels are $^1/_2$" thick plywood skins, inside and out. glued and stapled using mortise, butt, and lap joints throughout. Craftboard (.09 thick) is stapled over edges and bottom beneath $^1/_4$" thick soft polyurethane foam padding.

Mechanism and Chair Frame
Rectangular steel tube frame ranging from 14 to 10 guage, is welded, or riveted, at all member connections and fully powder coated to seal frame. Steel frame arm and footrest mounting plates are 14 guage thickness. Frame is bolted to wood arms at 12 locations using $^1/_4$"-20 machine bolts. Back frame is constructed of 1" laminated plywood with solid wood cross rails. Dowel and lap joints are utilized. Seat frame is 5/4 solid maple wood. Mechanism is all steel ranging in guage from 14-11 guage.

Recliner Back and Seat
Back is 1" hardwood plywood (7 ply) utilixing dowel and lap joints. Six (6) 3" woven web straps are stretched and interwoven across the seat and stapled. Sea Board mounts to steel seat frame using two (2) $^1/_4$"-20 machne bolts. Propex woven polypropylene fabric covers the back surface openings. A layer of $^1/_4$" thick soft polyurethane foam padding covers all non-cushioned surfaces.

Polyurethane Foam Cushions
Seat cushion is composed of 2.5 lb. 35 density high resilient polyurethane foam measuring 4" in thickness. A 1" thick slab of 1.5 lb. 14 density foam is laminated to the top and front edge. Back cushion is composed of 2.5 lb. 35 density high resilient polyurethane foam measuring 2" in thickness. A 1" thick slab of 1.5 lb. 14 density foam is laminated to the foam surface.

Upholstery Covers
Traditional upholstery methods are used throughout.

Central Locking Caster System
5" sealed, locking casters are activated using a foot lever, and are controlled by a series of steel and cast aluminum linkages inside the chair.

Optional Heat & Massage
Heat & Massage units are installed into the backrest and the seat of the unit. Control functions are performed at a built-in control unit in the right-facing arm. Three temperature levels are available for the heat option: low (37C/99F), medium (38C/101F), and high (39C/102F), with an automatic shut-off after four hours of operation. The vibrating massage modules are built into the backrest of the unit, with the controller managing four modes of operation: low location low vibration, low location high vibration, high location low vibration, and high location high vibration, also with an automatic shut-off after 15 minutes of operation. The entire assembly meets TUVRheinland and IEC 60601-1 ratings. The powercoard is a 14 AWG, 15-Amp NEMA rated three conducted SJT, with a three-prong grounded plug. A 72" length of exposed power cord extends from the back of the unit and is strain releaf mounted to the rear of the unit. Use of this product is not intended to offer any medical benefits, but rather supports relaxation, comfort, and convenience to the user.

Optional USB Charger (requires Heat & Massage selection)
The USB power module houses one 5V DC USB (type 2.0 and type 3.0 compatible) charging plug-in receptacle with 1-AMP DC total power (no data). The module is installed in the front of the right-side facing arm.

SPECIFICATIONS

Complimentary Furniture
The following lounge collections offer complimentary furniture that creates continuity and a cohesive look throughout a facility. These complimentary pieces can be found in other sections of the price list.

SOLTICE HEALTHCARE SEATING - Soltice Multiple Seating, Soltice Guest Seating, Soltice Lounge Seating, LaResta Day Bed (FDS/SL)

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirement. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Service for detials.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select Heat and Massage option.

NHM	- No heat and massage
WHM	- With heat and massage; add $1441

Ⓔ Select USB Power option.

NUSB	- No USB Power
WUSB	- With USB power; add $275

Only available if Heat and Massage option is selected.

Ⓕ Select I.V. pole (facing).

NS	- No pole
LRFIV	- Left facing rear; add $439
RFFIV	- Right facing front; add $439
RRFIV	- Right facing rear; add $439

If optional magazine pouch is specified, only Left-facing-rear (LRFIV) or No pole (NS) can be specified.

Ⓖ Select catheter bag attachment hook (facing).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $73
RFCA	- Right facing front; add $73
RRCA	- Right facing rear; add $73

If optional I.V. pole is specified, catheter attachment can not be specified in the same location.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $279

Magazine pouch fabric will match arm fabric selection

Ⓘ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $223

Ⓙ Select wood finish color.*

C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery

When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity

Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Construction

Wood arms and armcaps (field replaceable) constructed of kiln-dried hardwood. Recliner mechanism constructed of flat and tubular steel bolted to wood arms at 16 locations. Ottoman mechanism constructed of 14-gauge steel mounted to chair frame. Back shell is 1" hardwood plywood (7 ply), glued and stapled. Seat shell is 1" hardwood plywood (7 ply). Cushioning of multiple densities of polyurethane foam. Seat and back are field replaceable. Ottoman is field replaceable. Soft touch ottoman release and push/pull handles. 5" sealed casters engaged with a foot-actuated central locking/braking caster system.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select Heat and Massage option.

NHM	- No heat and massage
WHM	- With heat and massage; add $1441

Ⓔ Select USB Power option.

NUSB	- No USB Power
WUSB	- With USB power; add $275

Only available if Heat and Massage option is selected.

Ⓕ Select I.V. pole (facing).

NS	- No pole
LRFIV	- Left facing rear; add $439
RFFIV	- Right facing front; add $439
RRFIV	- Right facing rear; add $439

If top articulating table is specified, table, I.V. pole and/or catheter bag attachment must all be specified in unique locations.
If optional magazine pouch is specified, only Left-facing-rear (LRFIV) or No pole (NS) can be specified.

Left facing = right-handed when seated
Right facing = left-handed when seated

Ⓖ Select catheter bag attachment hook (facing).

NCA	- No catheter attachment
LRCA	- Left facing rear; add $73
RFCA	- Right facing front; add $73
RRCA	- Right facing rear; add $73

If top articulating table is specified, table, I.V. pole and/or catheter bag attachment must all be specified in unique locations.

Ⓗ Select magazine pouch.

NMR	- No magazine pouch
RFP	- Right side pouch (requires add'l fabric; matches arm); add $279

Magazine pouch fabric will match arm fabric selection

Ⓘ Select arm option.

WAC	- Wood armcaps (pair)
PAC	- Black poly (pair); add $223

Ⓙ Select wood finish color.*
Refer to the **Product Color Options** page in this price list.
*For Kensington Maple add upcharge.

Ⓚ Select veneer color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Moisture Barrier $203

Kensington Maple Upcharge
Kensington Maple requires extended leadtimes.
Model
Soltice II Recliner $14

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for addtional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Construction
Wood arms and armcaps (field replaceable) constructed of kiln-dried hardwood. Recliner mechanism constructed of flat and tubular steel bolted to wood arms at 16 locations. Ottoman mechanism constructed of 14-gauge steel mounted to chair frame. Back shell is 1" hardwood plywood (7 ply), glued and stapled. Seat shell is 1" hardwood plywood (7 ply). Cushioning of multiple densities of polyurethane foam. Seat and back are field replaceable. Ottoman is field replaceable. Soft touch ottoman release and push/pull handles. 5" sealed casters engaged with a foot-actuated central locking/braking caster system.

Complimentary Furniture

The following lounge collections offer complimentary furniture that creates continuity and a cohesive look throughout a facility. These complimentary pieces can be found in other sections of the KI price list.

SOLTICE - Soltice® Healthcare Seating, Soltice® Multiple Seating, Soltice® Guest Chairs, LaResta® Day Bed

UPHOLSTERY INFORMATION

C.O.M. Fabric

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match

KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

C Select fabric contrast 2.
Refer to **ki.com/fabrics**

D Select wood finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

E Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See pricing column for TB133 upcharge.

F Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

Ⓔ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See pricing column for TB133 upcharge.

Ⓕ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

Model	
SP923/NC	$24
SP933/NC	$24
SP943/NC	$24
SP923/FC	$24
SP933/FC	$24
SP943/FC	$24

INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

LARESTA FREESTANDING - LaResta® Day Bed

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

UPHOLSTERY INFORMATION

C.O.M. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix for additional yardage needed. For C.O.M. fabric sent to KI-High Point on mulitple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e, 4.75 x 18 = 85.5 sq. ft).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

Californina TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

Construction
Frames are constructed of kiln-dried lumber and laminated hardwood plywood. Express wood components finished with catalyzed varnish (specify finish when ordering). Tight seats and backs sprung with stretch strap webbing stapled into position. Multiple densities of polyurethane foam covered with a layer of .75 super soft foam. Seats, backs and arms are field-replaceable.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select table connection.

NT	- No connecting table
LT	- Left facing table connectors
RT	- Right facing table connectors
LTRT	- Left and Right table connectors

Left connector = right side when seated.
Right connector = left side when seated.

Ⓒ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓓ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓔ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

Ⓕ Select armcaps.

WAC	- Wood armcaps (pair)
PAC	- Black poly; add $202

Upcharge for two armcaps.

Ⓖ Select fire code.

NFR	- Compliance to TB 117-2013
FR	- Compliance to TB 133

See pricing column for TB133 upcharge.

Ⓗ Select moisture barrier.

NMB	- No moisture barrier
MB	- Moisture barrier

See pricing column for moisture barrier upcharge.

INFORMATION

C.O.M. and C.O.L. Requirements
C.O.M. yardage requirements listed above are based on plain goods 54” wide. If less than 54” wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

C.O.L. Requirements
Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq ft).

Contrasting Upholstery
When contrasting fabric is chosen, price at highest in-grade.

Minimum Fabric/Leather Quantity
Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

Construction
Frame constructed of kiln-dried lumber and laminated hardwood plywood. Exposed wood components finished with catalyzed varnish (specify finish when ordering). Tight seats and backs sprung with stretch strap webbing stapled into position. Multiple densities of polyurethane foam covered with a layer of .75 super soft foam. Seats, backs and arms are field replaceable.

Note:
For replacement components on Multiple Seating, use Guest Chair replacement parts.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

KENSINGTON MAPLE UPCHARGE

Kensington Maple requires extended leadtimes.

Model	
8501	$197
8502	$163
8503	$146
8504	$163
8505	$178
8506	$146
8507	$137
8508	$146

INFORMATION

Construction
Wood base of solid Beech hardwood with top of wood veneers, or solid wood edge with plastic laminate top.

SPECIAL SERVICES

Special Carton Marking

With specially marked information	N/C

Shipping
Ships **assembled, FOB High Point, NC 27263, freight prepaid.** Freight class 175

Specifications and prices are subject to change without prior notice.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $652
PACBL	- Black poly; add $86
PACSA	- Sand poly; add $86
PACWG	- Warm Grey poly; add $86

Upcharge for two armcaps.
Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
Wood finish selection is for wood armcaps.
For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

California TB133 Fire Safety Code

For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $941
PACBL	- Black poly; add $130
PACSA	- Sand poly; add $130
PACWG	- Warm Grey poly; add $130

Upcharge for three armcaps.
Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
Wood finish selection is for wood armcaps. For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $652
PACBL	- Black poly; add $86
PACSA	- Sand poly; add $86
PACWG	- Warm Grey poly; add $86

Upcharge for four armcaps.
Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
Wood finish selection is for wood armcaps. For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

California TB133 Fire Safety Code

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $652
PACBL	- Black poly; add $86
PACSA	- Sand poly; add $86
PACWG	- Warm Grey poly; add $86

Upcharge for four armcaps.
Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
Wood finish selection is for wood armcaps. For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $652
PACBL	- Black poly; add $86
PACSA	- Sand poly; add $86
PACWG	- Warm Grey poly; add $86

Upcharge for two armcaps.
Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
Wood finish selection is for wood armcaps. For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcaps.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $941
PACBL	- Black poly; add $130
PACSA	- Sand poly; add $130
PACWG	- Warm Grey poly; add $130

Upcharge for three armcaps.
Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
Wood finish selection is for wood armcaps. For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select non-contrast or fabric contrast 1.
Refer to **ki.com/fabrics**

Ⓒ Select fabric contrast 2.
Refer to **ki.com/fabrics**

Ⓓ Select base finish color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select armcap option.

WAC	- Wood armcaps (pair)
SAC	- Solid surface; add $774
PACBL	- Black poly; add $127
PACSA	- Sand poly; add $127
PACWG	- Warm Grey poly; add $127

Solid surface armcap color is always Corian™ white.

Ⓕ Select wood finish color.
Refer to the **Product Color Options** page in this price list.
For Kensington Maple add upcharge.

Ⓖ Select nylon glide color.

NGFN	- Flannel (Dark Grey)
NGNT	- Natural (Cream)

Ⓗ Select moisture barrier.

MB	- Moisture barrier
NMB	- No moisture barrier

See pricing column for moisture barrier upcharge.

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Color Match
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

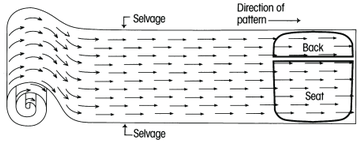
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

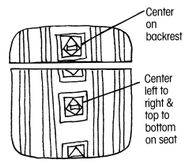


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

Design
Designed by Giancarlo Piretti and manufac-tured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Strive® Stack Seating
General Information

TECHNICAL SPECIFICATIONS

Backrest
Injection-molded polypropylene with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5 mm diameter chrome silicon valve spring wire.

Seat and Shroud
Injection-molded polypropylene.

Optional Upholstered Seat
Molded urethane foam is attached to an injection-molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners. Note: upholstered seat is required with translucent poly backs.

Optional Upholstered Back
A 1/2" thick urethane foam is attached to an injection-molded polypropylene back board, then upholstered using a draw-string process. The assembled back pad is attached to the back by means of fasteners which are exposed and are color matched to the polypropylene.

Frames
Legs are 7/8" O.D. by 13-gauge tubular steel. Cross members are 1" O.D. by 14-gauge tubular steel and 7/16" diameter solid steel. All joints are welded. Frames are available in 4-leg or sled base configurations. Standard 4-leg rear legs angle 14° from vertical. Wallsaver rear legs angle 23° from vertical.

Frame Finishes
Frames are finished in either baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint, or bright nickel-chrome plating.

Arms
Optional cantilever arms or loop arms are available. When equipped with arms, the supporting structure is a continuation of the rear leg finished to match the frame color. The armcaps are injection-molded glass filled polypropylene matching the frame finish (when frame finish is Chrome, hammertones, or Starlight Silver metallic, armcaps match the seat and back color; when back is Diamond translucent, armcaps are Light Tone; when back is Pewter translucent, armcaps are Flannel; when back is Bronze translucent, armcaps are Chocolate). The armcaps are attached to the steel structure by means of screws.

Glides
Upper and lower ends of leg tubes are capped with polypropylene end caps matching leg color (chrome frames and hammertone frames match the seat and back color). Three optional glide types are available for leg chairs: swivel poly/nylon, swivel steel and swivel felt glides. The swivel function allows the bottom of the glide to correctly match un-even floor conditions, resulting in less wear. Poly/nylon and felt glides are interchangeable and have easy-on/easy-off replaceable glide caps, which makes field replacement easy and efficient. Swivel poly glides are available in Stone color only. Optional glides for the sled base are co-extruded to provide a softer (non-skid) surface to protect the floor, but do not glide. Sled base chairs are also available with black nylon (plastic) glides and stainless steel glides.

Casters
4-leg chairs may be ordered with carpet casters instead of glides (does not apply to café stools). Casters are double-wheel (60 mm) high-impact thermoplastic and are available in black only.

Tablet Arm
Tablet support loop is a continuation of the rear leg and is available in left- or right-handed models. A formed steel hinge is welded to the top of the support structure, and secured with screws to the underside of the writing surface. Writing surface is 9 1/2" x 20 3/4" x 12 1/2" plywood care of 5/8" thick, 11-ply hardwood, surfaced with .030" high-pressure laminate top and plain backer undersurface. Edges are lacquered and sealed.

4-Leg Café Stool
4-leg models on glides are available in 24" and 30" seat heights. Stool-height units are equipped with a reinforcing foot ring made of a 1/2" diameter wire ring, which is open in the back to allow stacking of armless and cantilever arm stools.

Transport Dolly
Frame construction is welded tubular steel with a black powder-coated finish and 5" wheels (two swivel and two fixed). The dolly fits 4-leg or sled base chairs and has a capacity of fifteen poly chairs or eight upholstered chairs.

ChangeUp™ Tablet Arm
ChangeUp tablet support is integral to the chair frame and consists of a 7/8" diameter solid steel rod welded to the front and rear support tubes. A three-piece molded plastic armrest is included and attached to the chair frame using a #10 x 2 1/2" Phillips pan head tapping screw.

The tablet mechanism consists a die-cast aluminum housing, upper and lower plastic bearings, and 11-gauge steel clamp and tablet board support plates. The tablet mechanism is clamped onto the chair frame over two plastic bushing halves and a 5/16" diameter by 1 3/4" hardened steel pin with a die-cast aluminum cap secured with two 1/4-20 x 3/4" button socket head cap screws. The pin creates a solid 90° up/down pivot stop and the bushings provide a smooth, quiet operation. In the use position, the tablet mechanism rotates outward from the chair back an additional 20° and permits approximately 3 1/2" of adjustment for ingress/egress without stowing the tablet.

The tablet worksurface is 21" wide by 13 1/2" deep (235 square inches) is secured to the tablet board support plate with twelve #12 x 5/8" Phillips flat head tapping screws. The tablet board is made of 18 mm Baltic Birch plywood with .040" high-pressure laminate top surface and .02" thick phenolic backer surface for an overall board thickness of approximately 3/4". Edges are lacquered with a clear finish and sealed. The factory installed tablet assembly is not field installable and may not be removed.

Compliance
Support frame, mechanism and worksurface passes KI's internal testing for 250-pound weight capacity.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

Design
Designed by Giancarlo Piretti and manufac-tured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

Transport Dolly for Chairs (CSD.BL)

Transport Dolly for Stools (WSSD.BL)

Overall Dimensions		
Width	22-3/8"	21"
Depth	25-5/8"	26-1/2"

TECHNICAL SPECIFICATIONS

Seat
Injection-molded polypropylene seat.

Backrest
Injection molded polypropylene with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5 mm diameter chrome silicon valve spring wire. Top of backrest has an integral handle for ease of lifting and stacking.

Chair & Stool Frames & Finishes
$^{7}/_{16}$" solid steel rod, all joints welded. Finished in bright nickel-chrome or with electrostatically-applied epoxy powder-coat paint.

Optional Upholstered Seat
Molded urethane foam (soy based) is attached to an injection-molded polypropylene seat board, the upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners. Note: upholstered seat is required with translucent poly backs.

Transport Dolly
Tubular and plate steel welded together. 5" casters: two fixed, two swivel. Powder-coated finish.

Tablet Arm
$^{7}/_{16}$" solid steel rod frame, hinged tablet for easy access. Tablet has plywood core; high-pressure laminate surface. Round tablet edge with clear lacquer finish. Bright chrome frame only. Chairs are nonstacking when attached, not available for use with powder-coated frame chairs. Tablet fits chairs only; does not fit stools. Tablet flips up for easy access. Ganging with tablet is not recommended.

STATEMENT OF LINE

All models are available in polypropylene seat/backrest or upholstered seat/polypropylene backrest.

TECHNICAL SPECIFICATIONS

Seat and Backrest
Seat is two-piece construction of injection-molded polypropylene, reinforced with internal steel channels, and assembled using hidden fasteners. The seat is available in a poly version or upholstered. For the upholstered version, molded urethane foam (1" depth) is applied to the seat board. Fabric is then upholstered over the foam using a drawstring process. Note: upholstered seat is required with translucent poly backs.

Backrest is injection-molded polypropylene with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5 mm diameter chrome silicon valve spring wire. Backrest is available poly only. Backrest has an integral, molded "handle".

Seat flips up to allow chairs to nest for storage and transport.

Seat assembly and backrest are field replaceable.

Frame
The legs are 1", 13-gauge high-strength steel tubing. All frame joints are welded.

Frame Finishes
Frames are finished in either baked-on electrostatically-applied 30 gloss epoxy powder-coat paint, or bright nickel chrome plating.

Casters/Glides
Double wheels (60 mm) of high-impact thermoplastic. High-impact plastic frame. Casters are always black. Carpet or hard floor. Bell glide (2" high) made of high-impact plastic also available, black only.

Arms
Optional fixed-position T-arms are available. Arm supports are a continuation of the frame crossmember tube, with injection-molded polypropylene arm caps attached by screws. The armcaps are injection-molded glass filled polypropylene matching the frame finish (when frame finish is Chrome, hammertones, or Starlight Silver metallic, armcaps match the seat and back color; when back is Diamond trnaslucent, armcaps are Light Tone; when back is Pewter translucent, armcaps are Flannel).

Tablet Arm
An optional tablet arm is available on either the right or left-hand side. When so equipped, the tablet arm support structure is a continuation of the frame crossmember tube. A formed steel hinge is welded to the top of the support structure and secured with screws to the underside of the writing surface. Writing surface for standard tablet is $9^{1}/_{2}$" x $20^{3}/_{4}$" x $12^{1}/_{2}$" and oversize tablet is $15^{1}/_{2}$" x $22^{1}/_{2}$" x 14" plywood core of $^{5}/_{8}$" thick, 11-ply hardwood surfaced with .030" high-pressure laminate top and plain backer undersurface. Tablet arm flips up for easy access. Edges are lacquered and sealed.

INFORMATION

C.O.M Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Modified Product Request written specifying the direction the fabric is to be applied.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

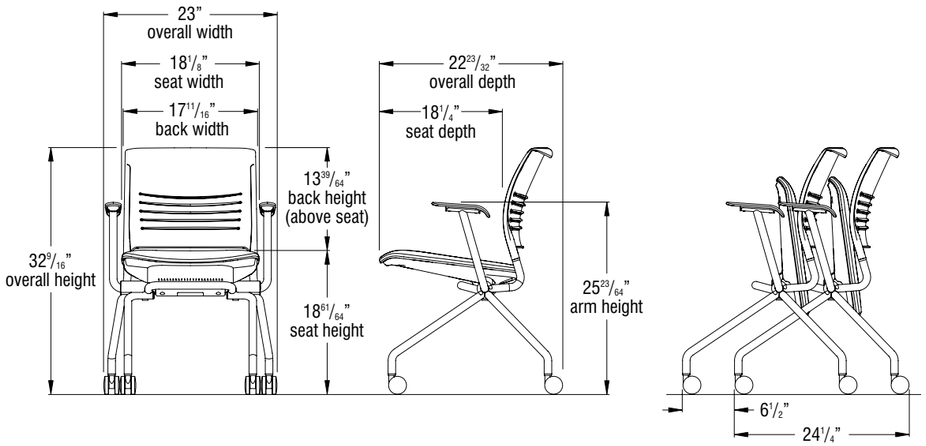
Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

DIMENSIONS



Nesting Footprint Calculation: Overall Length of a Row = 24.25" (1 chair) + 6.5" (additional chairs)

Examples: 2 Chairs: 24.25" (1 chair) + 6.5" (1 chair) = 30.75"

16 Chairs: 24.25" (1 chair) + 6.5" (15 chairs) = 121.75"

SPECIFICATIONS

Tandem Base
Cast aluminum alloy leg section. 14-gauge 1x2" seamless steel column. Upright and base are painted monochromatic with beam and yoke. Columns are welded to a plate which clamps onto beam.

Frame Finish
Baked-on, electrostatically-applied 45 gloss epoxy powder coating.

Seat
Injection-molded polypropylene seat attached directly to the structure.

Underseat Structure
Support structure is die-formed 13-gauge steel welded to a 1" OD x 14-gauge tubular steel cross member.

Backrest
Injection molded polypropylene with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire.

Tandem Arm
Oval tubular steel arm support with self-skinning urethane armrests measuring 10¼" long x 4" wide. The tubular arm support is welded to a yoke and then fastened to the beam via a coverplate.

Optional Upholstered Seat or Seat & Back
Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

In-Line Table
Solid core top is 20" x 20" x 7/8" with a vinyl bullnose edge.

Corner Table
Solid core top is 30" x 30" x 7/8" with a vinyl bullnose edge.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select fire code.

FR	- Compliance to TB 133
NFR	- Compliance to TB 117-2013

See pricing column for TB133 upcharge.

Ⓓ Select seat/back color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish for table.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select table edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

OPTIONS

California TB133 Fire Safety Code
For California Technical Bulletin 133 compliant models, a Product Modification Request is required. Contact Customer Service for details.

Strive® Task Seating
General Information

Task Cantilever Armchair

Armless Task Stool

ChangeUp Tablet Arm Task Chair

Features			
Comfort Tilt Mechanism option	•		
Poly, upholstered seat, or upholstered seat/back	•	•	•
Flex back	•	•	
General Dimensions			
Seat width	18"	18"	18"
Seat depth	18"	18"	18"
Seat height (upholstered - add 1")	17-1/4" - 22-1/4"	22-1/4" - 32-1/2"	17-1/4" - 22-1/4"
Overall Dimensions			
Width	27-1/2"	27-1/2"	29-1/2"
Depth	27-1/2"	27-1/2"	31" - 35-1/4"
Height	32-3/4" - 37-3/4"	37-3/4" - 48"	32-3/4" - 37-3/4"
Arms to floor	26" - 31"		27" - 33"

Backrest
Injection-molded polypropylene with integral steel cantilever springs. The combination of the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5 mm diameter chrome silicon valve spring wire.

Seat and Shroud
Injection-molded polypropylene, attached directly to the structure.

Optional Upholstered Seat
Molded urethane foam is attached to an injection-molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners. Note: Upholstered seat is required with translucent poly backs.

Optional Upholstered Back
A $^{1}/_{2}$" thick urethane foam is attached to an injection-molded polypropylene back board, then upholstered using a draw-string process. The assembled back pad is attached to the back by means of fasteners, which are exposed and are color-matched to the polypropylene.

Underseat Structure
Support structure is 13-gauge steel die-formed, welded to a 1" O.D. by 14-gauge tubular steel cross member.

Frame Finishes
Baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint.

Base
Injection-molded, glass-reinforced nylon 5-blade base (black or warm grey for task chair and stool). Casters have high-impact thermoplastic double-wheels. A single control paddle under the seat operates the height-adjusting pneumatic cylinder.

Casters
Casters are double-wheel (60 mm) high-impact thermoplastic. High-impact plastic frame. Casters are monochromatic with base. Carpet or hard floor casters are offered. Hard floor casters are black only.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Task chairs and task stools ship knock-down. Minimal assembly is required.

KI Color Match Program
KI offers the additional option of color matching paint, polypropylene, or wood stain through Product Modification Requests. Contact Customer Service for details.

Whatever you imagine, whatever you require, KI's Color Match program lets you pick your color!

Color Match Process - Poly Seating Information can be found here.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

Strive® Task Seating
General Information

Arms
When equipped with optional cantilever arms, the supporting structure is 7/8" O.D. by 13-gauge tubular steel, welded directly to the seat support structure, and matching the seat and back color. The armcaps are injection-molded glass filled polypropylene, matching the seat and back color (when back is Diamond translucent, armcaps are Light Tone; when back is Pewter translucent, armcaps are Flannel; when back is Bronze translucent, armcaps are Chocolate). The armcaps are attached to the steel structure by means of screws.

Task Stool
In addition to the standard-height task chair, a stool-height version is available. Task stools are equipped with a pneumatic cylinder, allowing adjustment of seat heights from 22" to 32 1/2". The 18" diameter, adjustable-height foot ring is made of die-cast aluminum with a chrome-plated tubular steel ring and black "spokes". Stools are only offered with black or warm grey bases. The cylinders are available in black only.

Comfort-Tilt Mechanism
Optional comfort-tilt mechanism is comprised of a die-cast aluminum main housing and a steel mounting plate, with four internal steel coil compression springs. The mechanism provides 7-degrees of rearward tilt and 4-degrees of forward tilt. The tilt resistance is not adjustable. A single lever allows for seat-height adjustment.

ChangeUp™ Tablet Arm
ChangeUp tablet support is integral to the chair frame and consists of a 7/8" diameter solid steel rod welded to the front and rear support tubes. A three-piece molded plastic armrest is included and attached to the chair frame using a #10 x 2 1/2" Phillips pan head tapping screw.

The tablet mechanism consists a die-cast aluminum housing, upper and lower plastic bearings, and 11-gauge steel clamp and tablet board support plates. The tablet mechanism is clamped onto the chair frame over two plastic bushing halves and a 5/16" diameter by 1 3/4" hardened steel pin with a die-cast aluminum cap secured with two 1/4-20 x 3/4" button socket head cap screws. The pin creates a solid 90° up/down pivot stop and the bushings provide a smooth, quiet operation. In the use position, the tablet mechanism rotates outward from the chair back an additional 20° and permits approximately 3 1/2" of adjustment for ingress/egress without stowing the tablet.

The tablet worksurface is 21" wide by 13 1/2" deep (235 square inches) is secured to the tablet board support plate with twelve #12 x 5/8" Phillips flat head tapping screws. The tablet board is made of 18 mm Baltic Birch plywood with .040" high-pressure laminate top surface and .02" thick phenolic backer surface for an overall board thickness of approximately 3/4". Edges are lacquered with a clear finish and sealed. The factory installed tablet assembly is not field installable and may not be removed.

Compliance
Support frame, mechanism and worksurface passes KI's internal testing for 250-pound weight capacity.

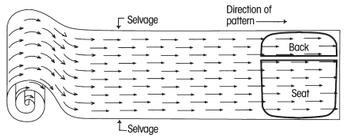
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

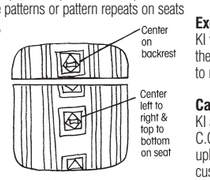


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Information

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

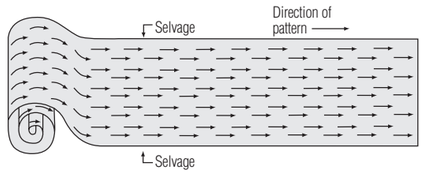

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

C.O.M. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

In all instances, send this form to the C.O.M. Specialist.

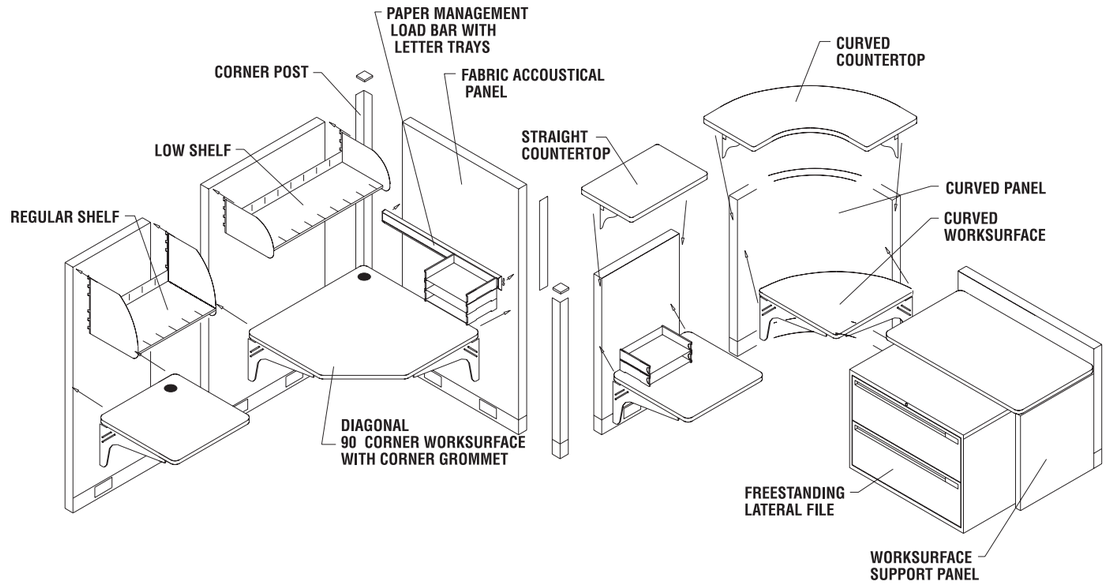
Standard Product Overview



System 3000®
General Information

SYSTEM 3000 GENERAL INFORMATION

System 3000 is a comprehensive modular panel system offering featuring fully assembled panels, worksurfaces, storage, doors, electrical components, and accessories. Full technical specifications are available on ki.com.
All system 3000 modular panel system components originate from ISO 9000, ISO 9001, or ISO 9002 registered facilities. KI SYSTEM 3000 MEETS OR EXCEEDS CURRENT ANSI/BIFMA PANEL SYSTEMS TEST STANDARDS.

UL LISTED
System 3000 panels are Listed to applicable US and Canadian safety standards and requirements by Underwriters Laboratories Inc.

Panels
Fabric-Covered Acoustical, Half Open Frame-Half Fabric, Full Glazed, and Curved Fabric Covered panels are offered in a variety of sizes. See specific sections for available sizes by style.
Widths: 12", 18", 24", 30", 36" 42", 48"
Heights: 32", 42", 48", 54", 62", 66", 72", 80"

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Wall Mounts
The panel system allows for fastening a panel run to a wall by the use of an aluminum extrusion and panel hinge. Method of attachment will vary by existing wall construction. Adjustable mounts are available.

Doors
Hinged doors are offered in 36" or 42" sizes, in locking and non-locking styles. Hinged doors are 80" tall with an opening of 77.5". A sliding door is offered for 66" panels and are for use in a 42" opening.

Connectors and Trim
Trim is offered in upholstered and unupholstered styles. Conditions include 90 degree, variable height corners, 60 degree, 45 degree, and T-post trims, and caps. See pricelist or technical specifications for style options by trim piece.

Electrical
System 3000 utilizes factory-installed universal 10-wire electrical components that support either 4-4-2 or 6-2-2 planning. Base and top infeeds, rigid wireways, receptacles, jumpers, and accessories are offered.

Worksurfaces and Accessories
Worksurfaces are offered in a variety of sizes and shapes, including:
Rectangular
P and D shaped
Peninsula/Piano
Square Shoe
Conference End
Curvilinear corner
Diagonal and 90 Degree Corner
Semi-circle
Quarter-round
Countertop

Worksurface Support panels are also available.

Storage
System 3000 is designed to support all KI Storage lines, including shelves, overhead cabinets, pedestals and lateral files.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select base power.
TN - No Power

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing
If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———
Combined list price

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIAL SERVICES

Special Carton Marking
With specially marked information N/C

Shipping
Ships **knocked down, FOB Manitowoc, WI 54220, freight prepaid.** Freight class 70.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select base power.

TN	- No Power
T4	- 442 - 10 Wire Power
T6	- 622 - 10 Wire Power; add $225

Refer to upcharge column "Base Power add to list price" for pricing of T4 and T6, when selecting a powered panel.

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing
If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select base power.

TN	- No Power
T4	- 442 - 10 Wire Power
T6	- 622 - 10 Wire Power; add $202

Refer to upcharge column “Base Power add to list price” for pricing of T4 and T6, when selecting a powered panel.

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing
If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———
Combined list price

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Spine Screens
Spine Screens allow for a mechanical connection between screen frames and include optional 10-wire power. Screens are available with the monolithic core style only, made of magnetic dry-erasable steel or thermally-fused laminate, and include adjustable-height feet to accommodate installation (accommodate uneven floor heights). Screens ship partially assembled.

Spine Screens are available in the following dimensions:

•Widths: 48”, 54”, 60”, 66”, 72”, 78”, 84”, 90”, 96”
•Heights: 48”, 54”

Flex Screens
Flex Screens offer freestanding, user-controlled, space dividing screens in a variety of sizes and finishes, and are non-powered only. Flex Screens are offered in monolithic and segmented styles and can be specified with adjustable feet or flat/bridge style feet. The flat/bridge style feet allow for 90° intersections and can also nest with adjustable height feet. Screens ship fully assembled, except when a horizontal Topper is specified.

Flex Screens are available in the following dimensions:

• Widths: 42”, 48”, 54”, 60”, 66”, 72”, 78”, 84”, 90”, 96”
• Heights: 42”, 48”, 54”, 60”

Note: 48”-54” height Flex Screens have optional segmentation available at 29” from floor. 42” screens are always monolithic. 60” high screens are always segmented.

All Screens may be specified with horizontal Toppers, which attach to the top of the screen when a top cap is not specified.

Frame Construction
All Tattoo Spine & Flex Screen frames are constructed of 2 1/2” by 1 1/4” aluminum extrusions finished with powder-coat paint. Frames are assembled in the factory (feet and Base Raceway Trim are not installed on Spine Screens) and may consist of the following:

- Base Raceway Trim (for Spine Screens) – Aluminum extrusions finished in powder-coat paint, measuring 6” tall by screen length, with receptacle and data cutouts per specification. Optional data cutouts are sized 2.88” width by 1.82” height with two holes to accommodate a #6-32 screw.
- Wireway Mounting Bracket (for Spine Screens) – 16-gauge formed steel, connects the 10-wire rigid wireway into the frame extrusion at the top of the base raceway area.
- Floor Channel (for Spine Screens) – 14-gauge formed steel finished in powder-coat paint, measuring 2 1/2” wide by 1 1/4” tall, spanning the length of the screen and making up the bottom of the base raceway area.
- Bridge & Flat Plate foot (for Flex Screens) – 1/4” thick steel with a footprint of 2 1/4” x 15” finished in powder-coat paint. Each foot includes a pair of 1” diameter non-adjustable nylon glides, adhered into counter-bores in the bottom of the foot. Each Flex Screen as specified ships with one Flat and one Bridge foot. Not available on Spine Screens.
- Adjustable Glide Feet – Constructed of cast aluminum with a footprint of 2 1/4” x 15” finished in powder-coat paint. Feet pair is standard on Spine Screens and may be ordered on Flex Screens.
- Adjustable Glide (for Spine & Flex Screen adjustable glide feet) – 1 1/2” diameter nylon base glides are threaded into the foot and allow for 1” of adjustability.

Trim Kits
All Spine Screens require a trim kit which is specified by size of screen, finish selection and power infeed location, if applicable. Trim kits include vertical caps, corner caps, attachment clips and electrical infeed conditions. Horizontal top caps are also included standard with Spine Screens and factory installed. When a Topper is desired on a specific screen “no top cap” is specified. Trim caps are formed of extruded aluminum and are finished with powder-coat paint. Installation of horizontal and vertical trim caps require no tools. Removal of trim caps require a flat prybar. Flex Screens come fully trimmed and do not require specification of additional trim kits.

Core Materials
Monolithic
Monolithic panels are dual-sided and available in a variety of substrates and finish options. Spine Screens are always monolithic. 42” high Flex Screens are always monolithic.

Segmented
Segmented screens are available in a variety of substrates and finish options. Segmented screens feature a 29” segmentation height, with specified upper and lower cores. Core inserts are dual sided. 48” and 54” high Flex Screens have the option of being segmented. 60” high Flex Screens are always segmented.

Fabric Cores
Fabric panel cores are constructed of LDF (low density fiberboard), upholstered and glued on both sides using water-based spray adhesive. Nominal thickness is 1/2”. Fabric cores are fully tackable.

Fluted Polycarbonate Cores
Fluted polycarbonate cores are 10 mm multiwall polycarbonate and are available with a clear finish. Clear extruded PVC gaskets are used between the core and supporting frame.

Magnetic Dry-Erasable Steel Cores
Magnetic dry-erasable steel cores are constructed of 28-gauge steel panels, laminated on both sides of a Fibrex core material. The steel panels include a polyester outer film creating a writable and dry-eraseable surface. Overall thickness is nominal 1/4”. Clear extruded PVC gaskets are used between core and supporting frame.

Thermally-Fused Laminate Cores
Thermally-fused laminate cores are constructed of laminate, adhered by thermally-fusing both sides to particleboard. Overall thickness is nominal 1/2”.

Acrylic Cores
Acrylic cores are constructed of 1/4“ thick, Acrylite Satinice material with a velvet texture, a very fine satin surface on both sides and are available in a variety of colors. Clear extruded PVC gaskets are used between core and the supporting frame.

Polyester Felt Cores
Polyester Felt cores are constructed from 1/2” thick tackable, 100% polyester felt and are available in a variety of colors. The cores have a density of 0.5 lb/ft^2 and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81” with 2” air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread.

Horizontal Toppers
Toppers are available for use on Spine & Flex Screens and take the place of the horizontal top cap. Specify “no top cap” on screens when a horizontal topper is to be used. Horizontal toppers are 12” in height and are specified to match the length of a corresponding screen. Extruded aluminum top caps hold the toppers in place without the use of fasteners.

Acrylic Horizontal Topper
Acrylic toppers are 1/4“ thick Acrylite Satinice material with satin surface on both sides, and are offered in a variety of colors. Acrylic toppers have a slight bull-nosed edge and a 1/4“ radius on the top corner. The length of acrylic topper is consistent with the length of the screen. Cork gaskets are used between the acrylic and aluminum top cap.

Tattoo™ Screens
General Information

Polyester Felt Horizontal Topper
Polyester felt toppers are constructed from 1/2" thick, 100% polyester felt and are available in a variety of colors. The felt cores have a density of 0.5 lb/ft² and is sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81" with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread. Felt toppers have square edges and corners. The length of felt dividers is consistent with the length of the screen.

Electrical
Refer to the Planning Guide for information on product specification.

Optional Power - 810 Electrical
Optional power is offered on the Tattoo Powered Spine Screens only. Power is 810 Electrical System, for the US standard electrical system. 10-Wire Rigid wireways are factory mounted to powered screens.

Power is supplied through a 6-2-2 configuration:
- (6) hot wires
- (2) shared oversized neutral wires
- (2) ground wires - one isolated ground and one building ground

Compliance
Tattoo Spine Screen system is a UL Listed Office Furnishing per standard UL 1286. Non-powered Flex Screens are not included in this listing. Spine Screens meet all applicable ANSI/BIFMA x5.6-2016.

Base Infeeds (Power and/or Data)
The Spine Screen's electrical system allows for base infeed to enter in-line, at end-of-run, or at a receptacle opening on the screen's base raceway trim. End-of-run base infeed kits utilize either a Base Infeed Spacer or a Base Infeed Vertical Trim. In-line base infeed kits use a Base Infeed Spacer where power and/or data enters from the side. Base infeed power enters into the bottom of the screen system through a cutout in the appropriate end or side trim. Receptacle infeed enters along the side of the screen and occupies the space of one receptacle cutout. Power for base infeed utilizes an 8' long, 1/2" liquid-tight flexible conduit, containing ten wires and having a modular connector end for the 810 Electrical System. Data Wires can enter the base of the screen through the cutout in the bottom of the trim, or through an opening in the bottom of the screen's floor channel. Data cabling, mounting plates and accessories are not provided by KI. **Note:** Data Mounting plates must have ports oriented at 45°.

Top Infeeds (Power and/or Data)
Top infeed includes a 3" square, 120" long extruded aluminum power and data pole to bring power and/or data in from at, or above, ceiling level. A 5' long extension pole with splice plate is available for taller ceilings. Top infeed kits may be specified as end-of-run, or in-line. Power for top infeed utilizes a 12' long (18' long with extension option) 1/2" liquid-tight flexible metal conduit containing ten wires and having a modular connector end for the 810 Electrical System. Data wires enter the pole the in the same manner as power. Data cabling, mounting plates and accessories are not provided by KI.
Note: Data mounting plates must have ports oriented at 45°.

10-Wire Rigid Wireways
Each powered screen requires the use of 10-wire rigid wireways to provide power to receptacles. 10-wire rigid wireways are factory installed onto the bottom frame of the screen. Each screen includes two wireways, one at each end with a 10-wire jumper in between. On both sides of each wireway, at each end of a powered screen, is a receptacle (ordered separately), plugged into the rigid wireway. The centerline of each receptacle is 12 inches from the end of each screen. The rigid wireway design allows for snap-connection of one screen's wireway to that of another screen using common 10-wire screen-to-screen jumpers (ordered separately).

10-Wire Pass-Through Screen-to-Screen Jumpers
The electrical system provides a method of passing power from one powered screen through a non-powered screen to the powered 10-wire rigid wireway of the next screen. The pass-through screen does not include wireways and receptacles. 10-Wire pass-through screen-to-screen jumpers (ordered separately) are required to connect adjacent in-line screen wireways.

10-Wire Screen-to-Screen Jumpers
10-wire screen-to-screen jumpers feature modular connector ends with nylon mesh casing over wires and are specified separate from the screens.

10-Wire Duplex Receptacles
10-wire duplex receptacles for the modular electrical system feature injection molded components, which snap fit into the 10-wire rigid wireways of the screens. The rated capacity of the duplex receptacles is 15 amps in a 6-2-2 circuit configuration.

Bezels & Filler Plates
Bezels and filler plates are molded in nylon and are available in a variety of colors. Bezels and filler plates are included with Tattoo Spine Screen base covers when power is specified and are field-installed.

Data Cover Plates
Data cover plates are 2 1/4" x 4 1/2" steel plates finished in powder-coat paint. Each plate includes attachment hardware and are field installed. Data cover plates are specified separate from the screens.

Electrical Infeed - New York City
The City of New York, 10-wire power infeed consists a service entry box sized for the 10-wire power distribution system. Building source power wires enter the box and are hard wired to the 10-wire ends in the box. Power exits the box through flexible conduit with a 10-wire modular connector end. The connector end feeds to the factory-installed 10-wire power distribution system. All wiring, connections, accessories and installation are to be performed by a licensed electrician.

Electrical - Hardwired
Hardwired electrical components may be specified for use in installations where required by local code (such as Chicago). Tattoo Screens so specified are shipped only with receptacle enclosures, are absent of other electrical components, but are ready to receive field-added electrical components to the receptacle enclosure by the customer's licensed electrician. Receptacle enclosures are constructed of 14-gauge galvanized metal in accordance with the National Electrical Code. 4.31" width by 2.44" height openings are located asymmetrical on both sides of the screen for dual-sided applications. Left-hand openings (when facing screen) are located 16" on center from left edge of screen. Right-hand opening (when facing screen) is located 6" on center from right-hand edge of screen. Infeeds, wiring, connections and all other electrical accessories are provided and connected by a licensed electrician.

Accessories
Polyester Felt Magnetic Inserts
Polyester felt magnetic inserts are constructed from 1/2" thick tackable, 100% polyester felt and are available in a variety of colors. The inserts have a density of 0.5lb/ft² and are sound absorbing with an acoustic rating of 0.45-0.90 NRC (acoustic range varies due to size and space relation). The panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Magnetic strips are applied to one side using adhesive. Nominal thickness is 1/2". Not offered on 42" height screens and can only be used on screens with a dry-erasable steel core.

Widths: 40", 46", 52", 58", 64", 69", 75", 81", 87" & 93"
Heights: 39" & 45"

Patterned Polyester Felt Magnetic Inserts
Patterned Polyester Felt magnetic inserts are constructed from two layers of 100% polyester felt and are available in a variety of colors. The inserts have a density of 0.12lb/ft² are sound absorbing with an acoustic rating of 0.35-0.90 NRC (acoustic range varies due to size and space relation). Magnetic strips are applied to one side using adhesive. Nominal thickness is 5/8". Not offered on 42" height screens and can only be used on screens with a dry-erasable steel core.

Widths: 40", 46", 52", 58", 64", 69", 75", 81", 87" & 93"
Heights: 39" & 45"

Magnetic Tackboard Tiles
Magnetic tackboard tiles are constructed of a multilayer fiberglass core upholstered on one side using adhesive. Magnetic strips are applied to the non-upholstered side using adhesive and can only be used on screens with a dry-erasable steel core. Nominal thickness is 1/2".

Sizes Offered: 18" x 18", 18" x 24" & 24" x 24".

Tattoo™ Screens
General Information

Coat Hook
Formed 11-gauge bent steel powder-coat painted in a variety of colors. Coat hook comes with a nylon glide and is attached to the glide using a ½" cap screw. The nylon glide fits into an access opening in top frame of Spine & Flex Screens allowing the coat hook to slide into location.

Sliding Dual-Purpose Board
The sliding boards are constructed of a fiberglass core, upholstered on one side and adhered to a 28-gauge steel pan on the other. The steel includes a polyester film creating a writable and dry-eraseable surface. The core is framed two sides by extruded aluminum frames. Attached nylon glide fits into access opening in top frame of Spine & Flex Screens allowing Slide Panel to slide into location.

Dimensions: 24" width by 39" height by $^{1}/_{2}$" depth.

Magnetic Storage & Shelving
ABS plastic bins provide storage for a range of office and personal items. All plastic bin accessories include vinyl magnets, powder-coated steel mounts and work on almost any magnetic surface. Magnetic storage is available in slate or white. Magnetic shelving is available in white.

Binder Bin
Holds up to 10 lb.
10" width by 13" height by 3" depth*.

File Bin
Holds up to 10 lb.
$9^{1}/_{2}$" width by $9^{1}/_{2}$" height by $3^{1}/_{2}$" depth*.

Low Bin
Holds up to 5 lb.
$9^{3}/_{8}$" width by $4^{1}/_{4}$" height by $3^{5}/_{8}$" depth*.

Pencil Cup
Holds up to $1^{1}/_{2}$ lb.
3" width by 4" height by 3" depth*.

Shelf
Holds up to 10 lb.
10" width by 5" height by 4" depth*.

* = depth is the distance the storage protrudes from the surface it is on.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge

Ⓒ Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)

Ⓓ Select frame/trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select lower laminate color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select upper acrylic finish.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge

Ⓒ Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)

Ⓓ Select frame/trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select lower polyester felt color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select upper fabric color.
Refer to **ki.com/fabrics**

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select foot option.

FADJ	- Adjustable
FFLB	- Flat/Bridge

Ⓒ Select top cap style.

F	- Flat aluminum top cap (standard)
N	- No top cap (specify for use with toppers)

Ⓓ Select frame/trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select lower fabric color.
Refer to **ki.com/fabrics**

Ⓕ Select upper laminate.
Refer to the **Product Color Options** page in this price list.

Locks
Locks are standard on all units. Locks are a high-security double-bit design. Two KI break-away keys are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order).

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "no lock core (NLC)" when configuring. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Tattoo™ Storage
General Information

TECHNICAL SPECIFICATIONS

Construction & Standard Features
All Tattoo storage units are constructed primarily of steel, which is powder-coat painted in standard KI colors. Drawers feature smooth rolling, steel ball-bearing extension slides. Chest, Low Cupboard, Vanity and Tower units are supported off the floor by leg posts of 16-gauge steel which are welded to ¼" thick steel mounting plates and include either a caster or glide option. Leg post lengths are different for either casters or glides to accomplish a uniform 7" distance from the underside of the unit to the floor. Optional 1 1/8" diameter nylon leveling glides allow for height-adjustability of approximately ¾". Optional 1 1/2" diameter twin-wheel swiveling casters are constructed of soft non-marking plastic, in a set of two locking and two non-locking wheels. Mobile Pedestal is standard with casters only, two locking and two non-locking with one additional non-locking caster at the bottom of the lower drawer front for stability. All storage units are stand-alone units.

Tattoo Storage Finish
Tattoo storage is offered in all standard KI powder-coat finishes. Powder-coat application is a hybrid epoxy, baked on to provide a scratch and stain resistant finish. Door, drawer fronts and steel lids may be specified in different colors than the shell at no up charge. Locking filler rail is painted the same color as the door and drawer fronts. Mechanical components are nickel-chrome plated or finished with other protective coatings. Legs are powder-coated the same finish as the shells.

Tattoo Pulls
All Tattoo storage drawers and doors can be ordered to receive either cast metal Square, Connection Zone, Arc or Beveled style pulls in select metallic finishes. Woven nylon Strap pulls are available as well, and come in black or silver tone.

Tattoo Locks
Tattoo storage ships standard with high security double-bit locks, with master key-able P-Series lock cores. The locks are randomly keyed and can be specified with or without lock cores. Wardrobe and Vanity units contain multiple locks but will be keyed alike for each entire unit. Locks are available in black chromate and satin chrome finishes.

Optional Seat Pads & Padded Topper
The Mobile Pedestal and Low Cupboard are offered with optional loose seat pads. The Chest ships with a standard fixed padded topper. Pads are upholstered in a selection of fabrics. Total pad thickness is 1¼", consisting of ¾" polyurethane foam of 2.0 average density, 100 average IFD, and glued to ½" particle board. Loose seat pad bottoms have rubberized non-skid strips to protect surface finishes. Fixed padded toppers are fastened to the steel storage tops using steel machine screws into inserts in the particle board base.

Storage Door/Lid Hinges
Cupboard, Wardrobe, Vanity doors and lid each use two Euro-style "hidden hinges" for a seamless finish. The Chest utilizes a piano-style hinge for maximum durability as a seating surface. Vanity and Chest lids also feature two soft close lid stays for ease of use and silent operation.

Compliance
Tattoo Storage is designed and manufactured to meet or exceed required ANSI/BIFMA x5.9-2012.

Mobile Pedestal
Mobile Pedestal outer upper shell construction is of 20-gauge steel with an 18-gauge steel bottom pan. The primary drawer is constructed of 22-gauge steel and comes standard with side-to-side filing for letter and legal-sized folders. Primary drawer front features an internal pencil drawer behind the drawer front. The hidden drawer is constructed of 20-gauge steel.

Chest
Chest top and sides construction is of 20-gauge steel. Folder rails, bottom pan and its reinforcements are made from 18-gauge steel. Chest allows for side-to-side filing of legal size paper, with folder bars included for front-to-back filing of letter and legal sized paper. An additional pair of folder bars may be ordered separately to file a second set of letter or legal sized paper front-to-back. Chest lid features two soft-closing hinges for ease of use and silent operation of the lid. All chest units are standard with an upholstered padded topper to act as a sitting surface.

Low Cupboard
Low Cupboard case construction is of 20-gauge steel. The shell's top reinforcement, bottom pan and its reinforcements are made from 18-gauge steel. Unit is available with a steel top, or with optional ¾" thick raised worktop of HPL laminated particleboard, with a 2mm (73P) edge. Raised Worktop is supported by .060" thick wall aluminum tubing, allowing for 4½" of clearance between the worktop underside and the top of the unit shell. Raised Worktop Low Cupboard units are also available with a height-adjustable, ½" thick polyester felt screen. These screens have an acoustic rating of 0.45-0.90 NRC (acoustic range varies due to size and space relation). Screen is raised/lowered by hand and is 44 1/2" high when fully raised. Felt Screen mechanism lowers the screen top to be flush with the worktop surface.

Vanity
Vanity case construction is of 20-gauge steel. The bottom pan and its reinforcements are made from 18-gauge steel. Drawer fronts are constructed of 20-gauge steel, with 18-gauge steel reinforcements. The primary drawer back is constructed of 18-gauge steel. The cupboard door and shelf are constructed of 22-gauge steel.

The Vanity has a flip-up lid to provide additional privacy. The hinged lid has two soft closing hinges for ease of use and silent operation. Lids are available in 18-gauge steel, or laminated particleboard construction. The lid includes a white markerboard surface at the underside. The ¾" laminated particleboard lid has HPL laminate on top, a white markerboard backer surface underneath, a 2mm (73P) edge and a standard nylon strap pull. A storage space is located below either lid type, with a full-size felt pad to help gently store items.

The vanity cupboard door is either right- or left-hand and determines the hand of the unit. A right-hand unit features a cupboard door on right side of the unit. Inside the vanity cupboard is a removable shelf. The main drawer body is constructed with side access oriented towards the cupboard door. The drawer incorporates a stow-able folder bar, which can be moved out of the way for improved drawer access, or be used to allow front-to-back filing of letter sized paper. A pencil drawer is hidden behind the main drawer front for improved utility and aesthetics. Unit can be ordered with grommets in the upper lid shelf, 1 7/8" overall clearance diameter with a ¾" diameter cord pass through and the rear cupboard grommet with 1 5/8" overall clearance through to route wires. Grommet will be located on the cupboard side.

Tower
Tower case construction is of 20-gauge steel. The bottom pan and its reinforcements are made from 18-gauge steel. Drawer fronts and wardrobe door are constructed of 22-gauge steel. The drawer bodies and backs are constructed of 18-gauge steel. Unit features a pedestal in file/file or box/box/file configuration. File drawers may be filled with letter sized paper front-to-back, or letter or legal sized paper side-to-side. A front- and side-accessible storage shelf is located above the pedestal. The location of the full vertical-height wardrobe, with coat rod bracket and boot tray determine the hand of the unit. A right-hand unit features the wardrobe on the right side of the unit.

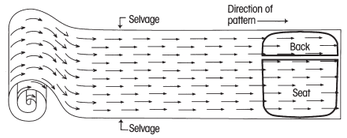
Ordering C.O.M., C.O.L., and C.O.V. - Bonduel

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

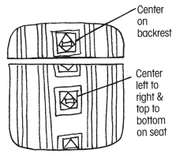


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Tattoo™ Seating
General Information

TECHNICAL SPECIFICATIONS

Seat/Backrest & Table Frames
All seat/backrest and table frames are constructed of 3/4" CNC machined, laminated hardwood plywood. Main frame joints are nailed and glued in addition to interlocking joinery across all stress points. Frames have 1/4" thick, 2.5 density 45 lb compression "soft feel" foam covering all exposed frame areas under the upholstery.

Seat & Backrest Foam
Seat and backrest foam is 2.5 density 45 lb compression, with 2 1/2" thickness on seat surface and 1 1/2" thick at the backrest front. Both seat and backrest have an additional 1/2" layer of 2.6 density, 80 lb compression "topper" foam for tight seat and back upholstery fit. Other exposed surfaces have 1/4" thick, 2.5 density 45 lb compression "soft feel" foam under the upholstery.

Base Leg Options
Leg assemblies are specified differently for glides or casters. Legs are constructed of 1 1/4" O.D. by 16-gauge round steel tubing, welded to a 7-gauge steel spider plate at one end and are fitted with 5/16-18 threaded inserts at the opposite end to accept glides or casters. Overall distance from floor to bottom of seat is 7" for both caster and glide. Length of leg varies to accommodate either caster or glide. Leg assemblies are powder-coat painted in select KI colors and attach to the base structure using 1/4-20 x 1" flat head screws.

Glides
Adjustable glides have 1 1/4" diameter feet in black nylon with 5/16-18 threaded steel stems which twist in and secure to steel legs. Allows for 3/4" of adjustability.

Casters
Fully swiveling and locking casters have 1 1/2" diameter dual-wheels, constructed with soft, non-marring rubber, and are individually rated at 85 lb static loading. Caster stems are 5/16-18 and thread into optional caster legs. Casters are 2" tall overall when installed and four caster assemblies are used per seat or table unit.

Tabletop
Table top structure is machined from 45 lb medium density fiberboard core material. The top is finished with .025" to .030" thick high-pressure plastic laminate on five sides, glued in place. Two opposite edges are "waterfall" profile with 5/8" radius post formed laminate, and two edges are "self-edge" laminate profile. The overall thickness of the finished table top structure is 3 3/4" and it is secured to the upholstered frame structure below.

Optional AC Power & USB Charger
The optional USB/AC power module houses one 125 volt, 15-amp AC outlet and two 5V DC, USB (type 2.0 & type 3.0 compatible) charging, plug-in receptacles with 2.1-amp DC total power (no data). The module's aluminum housing contains the power & USB circuitry. The 72" exposed power cord is 14 AWG, 15-amp NEMA rated, three-conductor SJT, with a three-prong grounded plug. The power cord is strain-relief mounted to the rear of the module's aluminum housing and as it exits the lounge.

The entire electrical power and USB module is UL listed and passes UL spill test rating for protection against liquids. Both USB ports can power and charge two separate mobile devices simultaneously. The power module's optional faceplate/power & USB color combinations are: black/black, white/white and silver/white. Faceplates are finished with powder-coat paint.

Compliance
Tattoo Seating is designed and manufactured to meet or exceed required ANSI/BIFMA x5.4-2012.

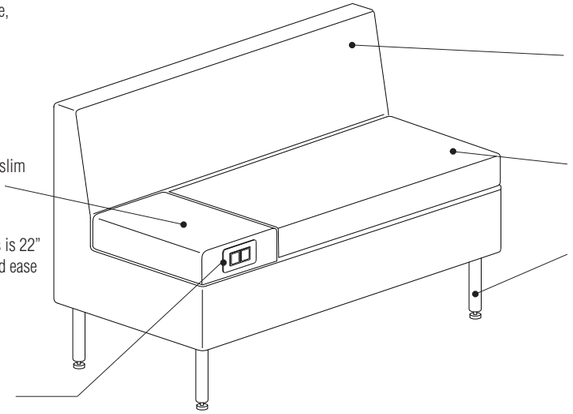
Tattoo
Slim Seat w/ Left Facing table

Unique design is space saving to maximize a limited footprint. Created for user control of elements relating to placement, purpose, accessibility and power.

Laminate tables are available in the slim seat, or as larger stand alone products.

Overall depth on all seating products is 22" allowing for modular configurations and ease of rearrangement.

Optional power on all seating products available (except ottoman) accepts USB and 120V.



Back height on seating product is 29" at the highest point, creating consistent sightlines with Tattoo storage components.

Seating is constructed using multiple layers of 2.6 density, 80 lb and 2.5 density, 45 lb foam.

Steel legs are available with either adjustable glides, or locking and full swiveling casters.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

ADDITIONAL NOTES:
- Orders cannot go into production without the information listed at right.
- Attach memo sample to this approval sheet.
- If your order has been placed, list PO# _____
- The cost of the COM sample will be paid by the client.
- Even after preliminary approval, KI reserves the right to reject COM/COL if necessary when the quality is not satisfactory for the product to be upholstered. KI assumes no responsibility for its overall appearance, flammability, durability, color fastness or any other quality after upholstered on a KI product.

ALL COM MUST BE APPROVED.
Photocopy this form and submit with COM fabric for approval:

(This fabric approval is for the purpose of advising how to apply your COM fabric, verify yardage required, and suitability.)

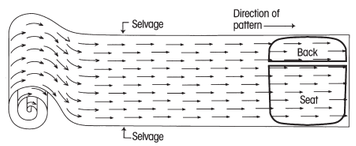
Tattoo™ Seating
Ordering C.O.M., C.O.L., and C.O.V. - High Point

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

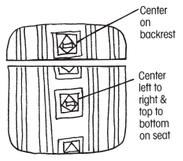


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Please see information below and check the appropriate box.

Tattoo™ Tables
General Information

TECHNICAL SPECIFICATIONS

Base
The table base assembly consists of a column upright with a base plate at the floor and a table support plate attached at the top, both attach to the column using $^{5}/_{16}$ -18 cap head screws. The column is 3" in diameter and is constructed of 14-gauge steel, with threaded straps welded in each end for base and table support plate attachment. The square base plate is constructed of $^{1}/_{4}$" thick steel plate with $^{1}/_{2}$" radiused corners and has $^{3}/_{4}$" steel glide bushings welded near each corner for adjustable glides. All 30" x 44" rectangular tops receive a $23^{3}/_{4}$" x $23^{3}/_{4}$" base plate and 30" x 30" tops use a 20" x 20" base plate. The table support plate is of 7-gauge steel and attaches to the underside of the table using #12 x $^{3}/_{4}$" Phillips pan head screws.

Glides
Adjustable glides are 1" diameter, nickel plated with $^{5}/_{16}$" stems and offer $^{1}/_{2}$" of adjustability.

Laminate Table Surfaces
Laminate tops feature a $^{3}/_{4}$" high-density particleboard core with a .030" thick high-pressure laminate top and a .028" thick phenolic backer (bottom). The table edge is 2mm polypropylene (73P) edge. Tops are pre-drilled for the table bases.

Base Finishes
The base components are finished in electrostatically applied hybrid powdercoating. The coating is then fused and cured in a baking oven to form a smooth, continuous finish that is chemical-resistant, hard, tough and mar-resistant. Powder-coated paint is available in all standard KI paint colors except for chrome.

Compliance
Tattoo Table is designed and manufactured to meet or exceed required ANSI/BIFMA x5.5-2014.

TECHNICAL SPECIFICATIONS

Toggle Dual & Triple Motor Electric-Base (Model EL, ELC & SS)

General
The Model EL table consists of two adjustable height T-bases (centered column on a horizontal foot). The Model ELC table consists of two adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to a tabletop support that spans the two bases. The Model SS table consists of three adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to the tabletop support that spans the three bases. All tabletops adjusts between 25" and 51" from the floor by means of electric controls that can be located at either end of the table.

Base
The base consists of a column assembly and foot both finished with baked-on 30-sheen powder-coat paint. The column assembly consists of an outer member, an intermediate member and an inner member. The outer member consists of a 2 3/8" x 4 3/8" rectangular 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The intermediate member consists of a 2" x 4" rectangular 14-gauge steel tubing. The inner member consists of a 1 1/2" x 3 1/2" rectangular 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. A 6-gauge formed steel motor housing is welded to each outer leg member for strength. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Tabletop Support
The tabletop support consists of a 14-gauge 1" x 1" steel tubing attached to each leg column with 6 mm bolts. An 11-gauge U-shaped cross member connects each leg assembly for stability.

Tabletop
Tabletops are constructed with 1 1/8" thick 45 lb density particleboard core. The top surface is covered with high-pressure laminate. The bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high-impact plastic edging. Model EL and ELC tabletops are pre-drilled and attached to the bases using eight M5.5 x 22 pan head screws. Model SS tabletops are pre-drilled and attached to the bases using sixteen M5.5 x 22 pan head screws.

Control Box
The control box comes standard with an integrated two button controller. Tables also ship standard with a more compact corded two-button remote control switch. This allows two switch options for every customer. All table controllers come standard with programmable container/shelf stop, and ISP (Intelligent System Protection). The stand-by power consumption is 0.3 watts. Refer to "Toggle Control Unit Product Specifications" (KI-62686) for more details.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

Polyester Felt Modesty Panel
Modesty panels are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The panel is 1/2" thick with a density of .05 lb/ft. Panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high by 46 1/2", 52 1/2", 58 1/2", 64 1/2", 70 1/2" and 82 1/2" wide.

Mounting Hooks
The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 46 1/2" wide use two hooks per panel. Panels 52 1/2", 58 1/2", 64 1/2", 70 1/2" and 82 1/2" wide use three hooks per panel.

Toggle Fixed-Base (Model FX)

General
The table consists of two T-bases (centered column on a horizontal foot) supporting a tabletop. The top of the tabletop is 29" from the floor. See page 11 for top sizes.

Base
The base consists of a top plate, column and foot all finished with baked-on 30-sheen powder-coat paint. The top plate is 6-gauge thick steel. The column consists of a $2^3/_8$" x $4^3/_8$" rectangular 14-gauge steel tubing with a $^1/_4$" thick steel plate welded on the bottom and top end. The top plate is attached to the column with four 6 mm bolts. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two $1^1/_2$" diameter nylon base leveling glides are threaded into the foot.

Tabletop
Tabletops are constructed with $1^1/_8$" thick 45 lb density particleboard core. The top surface is covered with high-pressure laminate. The bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The tabletop is pre-drilled and attached to each mounting plate using seven #10 x 1" tapping screws.

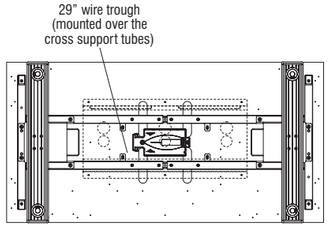
Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations.

Polyester Felt Modesty Panel
Modesty panels are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The panel is $^1/_2$" thick with a density of .05 lb/ft. Panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are $9^1/_4$" high by $46^1/_2$", $52^1/_2$", $58^1/_2$", $64^1/_2$", $70^1/_2$" and $82^1/_2$" wide.

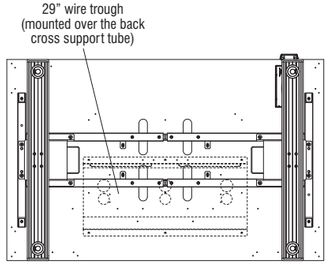
Mounting Hooks
The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels $46^1/_2$" wide use two hooks per panel. Panels $52^1/_2$", $58^1/_2$", $64^1/_2$", $70^1/_2$" and $82^1/_2$" wide use three hooks per panel.

TECHNICAL SPECIFICATIONS

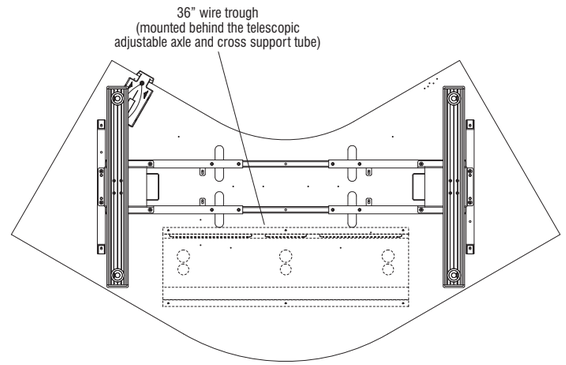
Wire Trough Placement on Dual Motor Electric-Base Tables (Model EL & ELC)
For Dual Motor Electric-Base Tables, an optional wire trough can be mounted directly over the cross support tubes. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted behind the cross support tubes if desired.



Rectangular Dual Motor Electric-Base Tables, 24"-36" Deep (24" x 48" Model EL shown)



Rectangular Dual Motor Electric-Base Tables, 30"-36" Deep (30" x 48" Model EL shown)



120° Dual Motor Electric-Base Tables, 30" Deep (30" x 48" Model CELC shown)

TECHNICAL SPECIFICATIONS

Wire Trough Placement on Fixed-Base Tables (Model FX)

For 60" and 72" wide Fixed-Base Tables, an optional wire trough can be mounted centered or along the rear edge of the tabletop. The optional wire troughs are not available for 48" wide rectangular tables due to insufficient clearance between the leg mounting plates.

TECHNICAL SPECIFICATIONS

Wire Trough Placement on Triple Motor Electric-Base Tables (Model SS)

For Triple Motor Electric-Base Tables, an optional wire trough can be mounted directly over the cross support tubes on the left- and right-hand side of the table. Reference the chart below to specify wire troughs for all applicable Triple Motor Electric-Base Table models. The tabletops below will have appropriate pre-drilled holes to accept the wire trough listed.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
PL	- Postformed edge
KN	- Knife edge

Knife edge (KN) and Postformed edge (PL) on user side only

Ⓒ Select modesty panel.

NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $186

Ⓓ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

WorkUp® Tables
General Information

TECHNICAL SPECIFICATIONS

WorkUp Crank-Base (Model CR)

General
The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface will adjust between 27.11" and 44.83" from the floor by means of a front crank that can be located at either end of the table. A 3/4" diameter steel connecting rod spans from column to column to enable simultaneous adjustment of both columns.

Base
The base consists of a column assembly and foot, both finished with baked on 30 sheen powder-coat paint. The column assembly consists of an outer member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The inner member is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The foot is made of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot. The base adjusts at a rate of 6 1/3 turns per inch.

Worksurface Support
The worksurface support is formed 11-gauge steel support members with 1/4" steel attachment plates. The worksurface support is attached to the column with 8mm bolts.

Worksurface
Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x 1" tapping screws.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp Fixed-Base (Model FX)

General
The table consists of two T-bases (centered column on a horizontal foot) supporting a worksurface. The top of the worksurface will be 29" from the floor. See pages 8 & 9 for top sizes.

Base
The base consists of a top plate, welded to a column and a foot, all finished with baked on 30 sheen powder-coat paint. The top plate is 1/4" thick steel. The column is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The foot is made of two formed and welded 11-gauge steel components. The top plate and foot is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface
Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x 1" tapping screws.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp ANSI/HFES Electric-Base (Model HF)

General
The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface will adjust between 22.35" and 48.33" from the floor by means of electric controls that can be located at either end of the table. The leg moves up or down at a speed of 50mm/sec (2"/sec). Maximum amps per table is 4 amps.

Base
The base consists of a column assembly and foot, both finished with baked on 30 sheen powder-coat paint. The column assembly consists of an outer member, an intermediate member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The intermediate member is 2 1/2" square, 14-gauge steel tubing. The inner member is 2 1/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The foot consists of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface Support
The worksurface support is formed 11-gauge steel support members with 1/4" steel attachment plates. The worksurface support is attached to the column with 8mm bolts.

Worksurface
Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x1" tapping screws.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp Ratchet-Base (Model RT)

General
The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface adjusts to thirteen positions between 27.11" and 36.56" from the floor by manually lifting the worksurface.

Base
The base consists of a column assembly and foot, both finished with baked on 30 sheen powder-coat paint. The column assembly consists of an outer member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The inner member is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The foot consists of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface Support
The worksurface support is formed 11-gauge steel support members with 1/4" steel attachment plates. The worksurface support is attached to the column with 8mm bolts.

WorkUp® Tables
General Information

Worksurface
Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the bases using sixteen #12 x1" tapping screws.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

WorkUp Counterbalance-Base (Model CB)

General
The table consists of two adjustable height T-bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface will adjust between 28 1/4" and 46 3/4" from the floor by activating a release lever and manually lifting or lowering the worksurface. The worksurface weight is counterbalanced by pneumatic springs to minimize the manual force required to move the worksurface. The two bases are synchronized with steel bands to maintain a level worksurface. The column uses a roller bearing system to minimize friction in the column.

Base
The base consists of a column assembly and foot finished with baked-on 30 sheen powder-coat paint. The column assembly consists of an outer member and an inner member. The outer member is 2 3/4" square, 14-gauge steel tubing. The inner member is 2 1/2" square, 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. The foot consists of two formed and welded 11-gauge steel components and is attached to the column with 8mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Worksurface Support
The worksurface support consists of two steel end supports and two steel cross supports welded together using rectangular steel tubing, 50mm x 25mm x 2mm wall thickness. The worksurface support is attached to the column with 8mm bolts.

Worksurface
Worksurfaces are constructed of 1 1/8" thick 45 lb. density particle board core. The top surface is covered with high-pressure laminate and the bottom surface is covered with phenolic backing sheet. The perimeter is finished using high impact plastic edging. The worksurface is pre-drilled and attached to the base using M5 x 70mm tapping screws.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

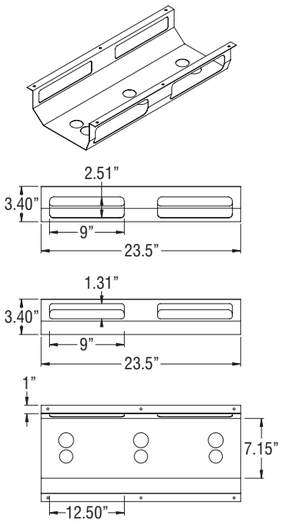
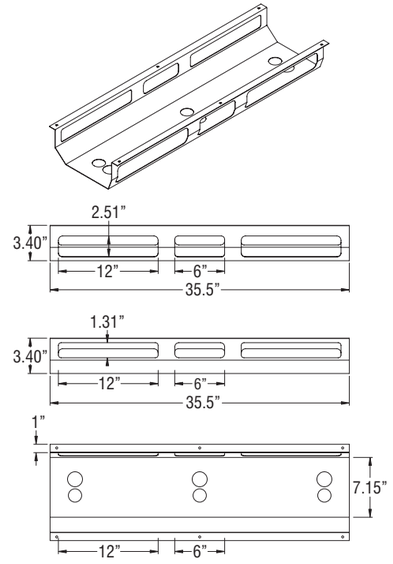
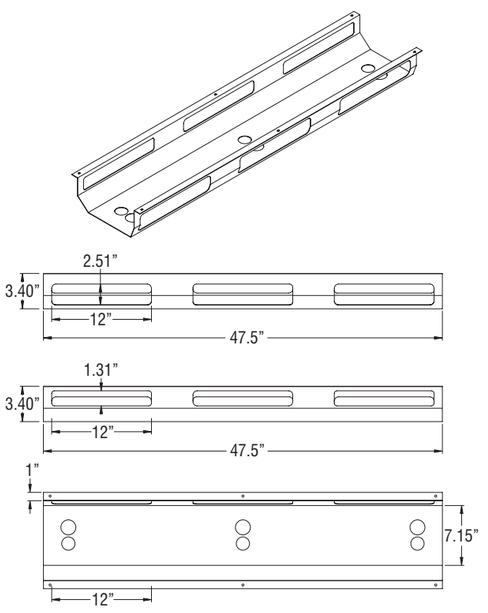
36"	60" & 66"
48"	72"



24" Wire Trough



36" Wire Trough



48" Wire Trough

Wire Trough Placement (Fixed-Base Tables)

For Fixed-Base Tables (excluding the 36" and 42" wide rectangular models), an optional wire trough can be mounted in the center of the tabletop, under the leg mounting plates. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted along the rear edge of the tabletops, behind the leg mounting plates, if desired. The optional wire troughs are not available for 36" and 42" wide rectangular tables due to insufficient clearance between the legs.

Universal Height Adjustable Screens
General Information

Universal Height Adjustable Screen

Features	
Height adjustable by user	•
Material is 100% polyester felt	•
Only standard on select Pirouette fixed leg tables, WorkUp, and Toggle tables. Applications may be possible on other tables through Product Modification Requests. Contact Customer Service for details.	•
Field-installed	•

Adjustable Privacy Screens attach to the back length of a table or to the side depth of a table.

Screen Size (W x H)	Recommended for:
23 x 24	24" deep tops
29 x 24	30" deep tops
35 x 24	36" deep tops
46 x 24	48" long tops
52 x 24	54" long tops
58 x 24	60" long tops
64 x 24	66" long tops
70 x 24	72" long tops
82 x 24	84" long tops

The screens are standard for a variety of models on Pirouette, Toggle and WorkUp tables. These particular tables include pilot holes for mounting the screens to the undersides of the worksurfaces. Reference the following for table models within these products that include and exclude the screen pilot holes:

YES	NO
Toggle Rectangles and Square Shoe	Toggle 120 Degree
WorkUp Rectangles	WorkUp 120 Degree
Pirouette Fixed Training Rectangles	Pirouette Collaborative Rectangles
Pirouette Fixed Chevrons (Straight Side Only)	Pirouette 42" & 48" Deep Rectangles
	Pirouette Nesting Tables
	Pirouette Scale Up Tables
	Pirouette Half Rounds
	Pirouette Trapezoids
	Pirouette Double Chevrons
	Pirouette Guitar Picks
	Pirouette Squares
	Pirouette Rounds

SPECIFICATIONS

Screen
Screens are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The screen is 1/2" thick with a density of .05 lb/ft and is 100% tackable. Screens are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard screens are 23.75" high by 23", 29", 35", 46", 52", 58", 64", 70" and 82" wide.

Brackets
The mounting brackets are 14-gauge cold rolled steel and the glide plates are injected molded Delrin. The rack is made from cast aluminum and a nylon pinion gear is synchronized between the brackets with a steel connecting rod. The mounting brackets and rack are powder coated for durability. The PET screens are fastened to the brackets using stainless steel thumb screws (two per bracket). Screen sizes 23", 29", 35", and 46" wide are assembled with two adjustable brackets while screens 52", 58", 64", 70" and 82" have three adjustable brackets.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select felt color.
Refer to the **Product Color Options** page in this price list.

Toggle™ Tables

Models EL, ELC, SS & FX

June 2020

TECHNICAL SPECIFICATIONS

Toggle Dual & Triple Motor Electric-Base (Model EL, ELC & SS)

General
The Model EL table consists of two adjustable height T-bases (centered column on a horizontal foot). The Model ELC table consists of two adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to a tabletop support that spans the two bases. The Model SS table consists of three adjustable height C-Bases (off centered column on a horizontal foot). Bases attach to the tabletop support that spans the three bases. All tabletops adjusts between 25" and 51" from the floor by means of electric controls that can be located at either end of the table.

Base
The base consists of a column assembly and foot both finished with baked-on 30-sheen powder-coat paint. The column assembly consists of an outer member, an intermediate member and an inner member. The outer member consists of a 2 3/8" x 4 3/8" rectangular 14-gauge steel tubing with a 1/4" steel plate welded on the top end. The intermediate member consists of a 2" x 4" rectangular 14-gauge steel tubing. The inner member consists of a 1 1/2" x 3 1/2" rectangular 14-gauge steel tubing with a 1/4" steel plate welded on the bottom end. A 6-gauge formed steel motor housing is welded to each outer leg member for strength. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two 1 1/2" diameter nylon base leveling glides are threaded into the foot.

Tabletop Support
The tabletop support consists of a 14-gauge 1" x 1" steel tubing attached to each leg column with 6 mm bolts. An 11-gauge U-shaped cross member connects each leg assembly for stability.

Tabletop
Tabletops are constructed with 1 1/8" thick 45 lb density particleboard core. The top surface is covered with high-pressure laminate. The bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high-impact plastic edging. Model EL and ELC tabletops are pre-drilled and attached to the bases using eight M5.5 x 22 pan head screws. Model SS tabletops are pre-drilled and attached to the bases using sixteen M5.5 x 22 pan head screws.

Control Box
The control box comes standard with an integrated two button controller. Tables also ship standard with a more compact corded two-button remote control switch. This allows two switch options for every customer. All table controllers come standard with programmable container/shelf stop, and ISP (Intelligent System Protection). The stand-by power consumption is 0.3 watts. Refer to "Toggle Control Unit Product Specifications" (KI-62686) for more details.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Provides six access holes to feed wires or install cable management systems.

Polyester Felt Modesty Panel
Modesty panels are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The panel is 1/2" thick with a density of .05 lb/ft. Panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9 1/4" high by 46 1/2", 52 1/2", 58 1/2", 64 1/2", 70 1/2" and 82 1/2" wide.

Mounting Hooks
The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels 46 1/2" wide use two hooks per panel. Panels 52 1/2", 58 1/2", 64 1/2", 70 1/2" and 82 1/2" wide use three hooks per panel.

Toggle® Tables
General Information

TECHNICAL SPECIFICATIONS

Toggle Fixed-Base (Model FX)

General
The table consists of two T-bases (centered column on a horizontal foot) supporting a tabletop. The top of the tabletop is 29" from the floor. See page 11 for top sizes.

Base
The base consists of a top plate, column and foot all finished with baked-on 30-sheen powder-coat paint. The top plate is 6-gauge thick steel. The column consists of a $2^3/_8$" x $4^3/_8$" rectangular 14-gauge steel tubing with a $^1/_4$" thick steel plate welded on the bottom and top end. The top plate is attached to the column with four 6 mm bolts. The foot consists of an extruded aluminum component with a nylon toe cap inserted into each end. The foot is attached to the column with four 6 mm bolts. Two $1^1/_2$" diameter nylon base leveling glides are threaded into the foot.

Tabletop
Tabletops are constructed with $1^1/_8$" thick 45 lb density particleboard core. The top surface is covered with high-pressure laminate. The bottom surface is covered with a phenolic backing sheet. The perimeter is finished using high impact plastic edging. The tabletop is pre-drilled and attached to each mounting plate using seven #10 x 1" tapping screws.

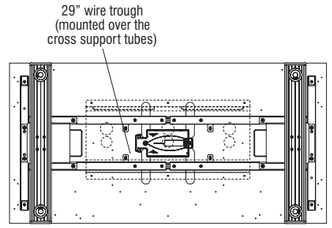
Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations.

Polyester Felt Modesty Panel
Modesty panels are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The panel is $^1/_2$" thick with a density of .05 lb/ft. Panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are $9^1/_4$" high by $46^1/_2$", $52^1/_2$", $58^1/_2$", $64^1/_2$", $70^1/_2$" and $82^1/_2$" wide.

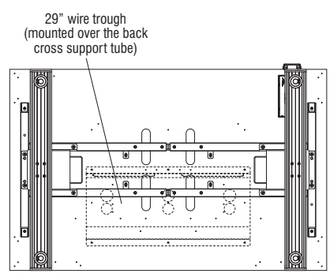
Mounting Hooks
The mounting hooks are 18-gauge steel and attach underneath the tabletop using two steel screws. Panels $46^1/_2$" wide use two hooks per panel. Panels $52^1/_2$", $58^1/_2$", $64^1/_2$", $70^1/_2$" and $82^1/_2$" wide use three hooks per panel.

TECHNICAL SPECIFICATIONS

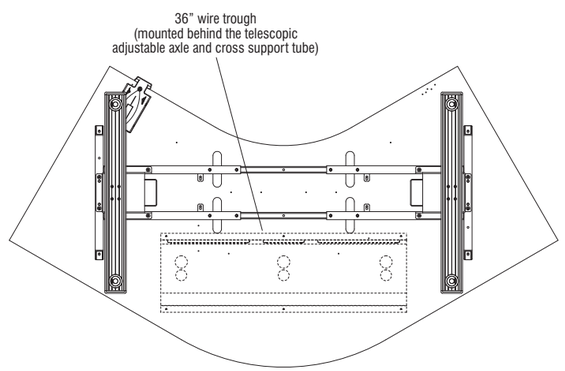
Wire Trough Placement on Dual Motor Electric-Base Tables (Model EL & ELC)
For Dual Motor Electric-Base Tables, an optional wire trough can be mounted directly over the cross support tubes. For 36" deep rectangular tables and 120-degree tables, the optional wire trough may also be mounted behind the cross support tubes if desired.



Rectangular Dual Motor Electric-Base Tables, 24"-36" Deep (24" x 48" Model EL shown)



Rectangular Dual Motor Electric-Base Tables, 30"-36" Deep (30" x 48" Model EL shown)



120° Dual Motor Electric-Base Tables, 30" Deep (30" x 48" Model CELC shown)

TECHNICAL SPECIFICATIONS

Wire Trough Placement on Fixed-Base Tables (Model FX)

For 60" and 72" wide Fixed-Base Tables, an optional wire trough can be mounted centered or along the rear edge of the tabletop. The optional wire troughs are not available for 48" wide rectangular tables due to insufficient clearance between the leg mounting plates.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
PL	- Postformed edge
KN	- Knife edge

Knife edge (KN) and Postformed edge (PL) on user side only

Ⓒ Select modesty panel.

NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $186

Ⓓ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
KN	- Knife edge

Knife edge (KN) on user side only

Ⓒ Select modesty panel.

NMP	- No modesty panel
PMP	- Polyester felt modesty panel; add $370

Ⓓ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select modesty panel color (only if polyester felt panel is chosen).
Refer to the **Product Color Options** page in this price list.

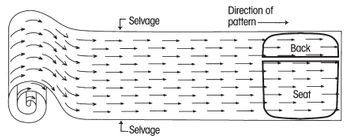
How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

T

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

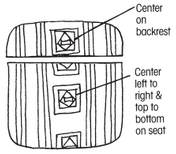


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Depth of each additional chair	7-1/2"	7-1/2"	7-1/2"	7-1/2"

SPECIFICATIONS

Frame
The frame is made up of four legs welded to a steel mechanism tube. The legs are 1"diameter, 13-gauge high-strength low alloy steel tubing.

Leg Finishes
Baked on electrostatically applied 45 sheen epoxy powder coating or bright nickel chrome plating.

Casters/Glides
Double wheels (60mm) of high-impact thermo-plastic. High-impact plastic frame. Carpet and hard floor casters are always black. Bell glide (2" high) made of high-impact plastic also available, black only.

Seat and Backrest
Seat is two-piece construction of molded plywood upholstery board with a molded compound curved polypropylene shroud with a textured finish. Seat is always upholstered. Foam (1-3/4") is applied to the molded plywood upholstery board. Fabric is then upholstered over the foam. Backrest is available in either a poly or upholstered version. Backrest frame is molded glass-reinforced nylon. Mesh fabric is 100% polyester. Backrest has an integral "handle."

Seat flips up to allow chairs to nest for storage and transport.

Seat and back are field replaceable.

Backrest Supports
Two welded steel backrest supports attach the backrest to the torsion mechanism.

Torsion Mechanism
The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

Arms
Armcaps are made of polypropylene. Armrests rotate with the back. Armcaps are field replaceable.

Flip-Up Tablet
Available on RH or LH side. The tablet arm support structure is 1-inch diameter, 13-gauge tubing, welded to the main chair frame. A formed steel hinge is welded to the top of the support structure and secured with screws to the underside of the writing surface. Writing surface is nominally 9-1/2" x 20-3/4" x 12-1/2" plywood core of 5/8" thick, 11-ply hardwood, surfaced with 0.030" high-pressure laminate top and plain backer undersurface. Edges are lacquered and sealed. When so equipped, and with the tablet flipped up, chairs will nest with other Torsion Air chairs with tablets, or without.

Piretti Tablet
Available on RH or LH side. The tablet support is 1-3/16"OD x 14-gauge round steel tubing. The support is welded to the chair frame. The tablet mechanism consists of two die cast aluminum housings and a stamped steel hinge assembly. The main housing is mounted inside the steel support tube and secured with a thread-forming screw. The mechanism has two through-bolted pivot axes with bushing that allow stowing. The mechanism permits 12 degrees of horizontal rotation for ingress/egress without stowing the tablet. With the tablet stowed, the chair will nest with other Torsion Air chairs with or without tablets. The tablet is made from blow-molded high-density polyethylene and is only available in black. The tablet is connected to the mechanism and supported by a 12-gauge steel plate. The tablet has an effective working surface 12" deep by 16" across (overall dimensions are 12" deep by 22" across).

INFORMATION

C.O.M Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIFICATIONS

Seat and Backrest
Seat is a two-piece construction with a molded polypropylene liner with a molded compound curved polypropylene shroud with a textured finish. Seat is always upholsted. Foam (1-1/2") is applied to the molded polypropylene liner. Fabric is then upholstered over the foam. Backrest frame is molded glass-reinforced nylon. Mesh fabric is 100% polyester. Seat and backrest are field-replaceable.

Back/Arm Supports
Two welded steel backrest supports attach the backrest to the torsion mechanism. If so equipped, optional armrest structure is integral to the backrest support. Armcaps are polypropylene and are field-replaceable.

Full Sled Base Frame (TAS)
The sled base frame consists of two segments of 3/4" 16-gauge seam welded tubular steel and two steel seat supports.

Four Leg Frame (TAL)
The four leg frame consists of two U-shaped sections, one front and one rear, welded together with two support brackets to form the four leg chair. The sections are formed of 15/16" 15-gauge seam welded tubular steel.

Leg Finishes
Baked-on, electrostatically-applied powder-coating, or bright nickel-chrome plating.

Standard Tablet Arms
5/8" 11-ply plywood tablet with high-pressure laminate surface and lacquered edge. Tablet arm support matches frame color. Seating clearance is 13 1/2". Standard tablet measures 19 1/2" long and 12 3/4" wide.

Torsion Mechanism
The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

Stacking Vinyl Upholstered Chairs
It is recommended that chairs to be stacked be covered in material other than vinyl as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl upholstery.

Stacking Vinyl, Polyurethane, and Imitation Leather Upholstered Chairs
It is recommended that chairs to be stacked be covered in material other than vinyl, polyurethane, or imitation leather as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl, polyurethane, or imitation leather upholstery.

Transport Dolly
Tubular and plate steel welded together. 5" casters; two fixed, two swivel. Powder coated finish. Two distinct dollies are available; one for full Sled Base, and one for Four Leg.

Universal Dolly Handle
Tubular steel and plate steel construction. Handle is powder coated. Field-assembled to dolly.

INFORMATION

C.O.M Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Ordering COM, COL and COV
Information

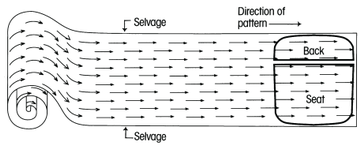
Ordering COM, COL and COV
Information

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in - yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing

For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility , ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

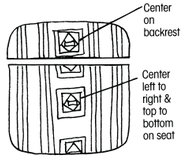


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Seat and Backrest
Seat is two-piece construction of molded plywood upholstery board with a molded compound curved nylon shroud with a textured finish. Seat is always upholstered. Foam (1-3/4") is applied to the molded plywood upholstery board. Fabric is then upholstered over the foam. Backrest is available in either a polypropylene or upholstered version. Backrest is molded compound curved polypropylene with a textured finish. Backrest has an integral, molded "handle."

Back upholstery liner is molded polypropylene with glued-on foam (1/2"). Fabric is upholstered over the foam. The liner is secured to the backrest by four #10 color-matched machine screws.

Seat flips up to allow chairs to nest for storage and transport.

Backrest Supports
Two welded steel backrest supports attach the backrest to the torsion mechanism.

Torsion® Mechanism
The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

Frame
The frame is made up of four legs welded to a steel mechanism tube. The legs are 1", 13-gauge steel tubing. Reinforcement plates are welded between front and back legs for added strength. Nylon covers fit over the plates.

Casters/Glides
Double wheels (60mm) of high-impact thermoplastic. High-impact plastic frame. Carpet and hard floor casters are always black. Bell glide (2" high) made of high-impact plastic also available, black only.

Leg Finishes
Baked-on electrostatically-applied epoxy powder coating or bright nickel-chrome plating.

Arms
Armrests are made of nylon and match the seat and back poly color. Armrests rotate with the back.

Tablet/Tablet Arm
The tablet is available in a plywood core (5/8" thick, 11-ply hardwood surfaced with .030" high-pressure laminate top and plain backer undersurface) or a black molded polyethylene. It is connected to the mechanism and supported by a 12-gauge steel plate. It has an effective working surface 12" deep by 22" across. The tablet arm is not field addable. The tablet arm is available in right-hand and left-hand versions. The tablet mechanism consists of aluminum die cast housings and through bolted pivots with bushings on two axis. The mechanism allows for horizontal rotation for ingress/egress without stowing the tablet. The mechanism stows the tablet so that the chair will nest with other Torsion® on the Go!® chairs with tablets and Torsion® on the Go!® chairs without tablet or arms.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive - Gate 3
Green Bay, WI 54302

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

Design
Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select worksurface type.

LW	- Laminate worksurface
PW	- Plastic worksurface

Ⓒ Select frame color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select seat and back color.
Refer to the **Product Color Options** page in this price list.
Armrest color will match seat/back poly color.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select base option.

G	- Bell glides (black only)
C	- Carpet casters (black only)
S	- Hard floor casters (black only)

Ⓖ Select upholstery grade/color.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

C.O.M. Upholstery
C.O.M. requirement for 10 chairs either poly or upholstered is 3/4 yard of 54” wide nondirectional fabric. For orders of 11 of more chairs and for complete information on ordering C.O.M., see “Ordering C.O.M., C.O.V. and C.O.L.” section.

SPECIFICATIONS

Trek Pedestal Table
This system employs heavy gauge tubular steel components in fixed, folding, or flip-top models. Trek includes T, TT and X base configurations. Fixed table column welded to 1/4" solid steel plate.

Bases
Built of 2-1/4", 14-gauge round tubular steel leg column with steel end cap and 16-gauge steel tapered legs elliptically swaged down to 1" diameter at end; highly durable, smooth powder-coated finish. Adjustable glides or casters are secured to the legs. Two casters in each set shall have wheel brakes (locking).

Trek Tables Plus Ganging Mechanism
Built of black high-strength nylon, userfriendly ganger with pegs draws tables together. No tools are required when joining tables. Ganger is self-storing under table top. Mounting screws are provided. Tops are predrilled for placement of ganging pegs. Two gangers per table.

CAUTION: Gangers are not retrofittable to earlier purchased tables.

Trek Tables Folding Mechanism
Built of 11-gauge, black zinc finish steel, the folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips. When opened, legs engage into place for a tight, rigid fit between leg and mechanism. Built-in rubber bumpers keep tables separated to prevent marring when tables are stacked on edge.

Table Surfaces
1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Tops are pre-drilled.

A "standard" table consists of a standard laminate worksurface and a 1-1/4" vinyl bullnose edge for any KI table base. All Knife(KN) edge styles will use an M3 particle board compostion. The undersurface edge is sanded, stained and sealed. KI tables can hold a maximum of 1.5 lbs for each inch of perimeter evenly distributed over the top.

Flip-Top
Standard flip-top table does not have a detachable top.

Folding Modesty Panels
.685" thick particleboard faced on both sides with laminate that matches table top. Modesty panels are 6-1/4" high by length of table. Mounting brackets are black and packed with the base. Table top and panel are pre-drilled. Lower edge of panel extends 8-1/4" from underside of table. The modesty panel is shipped k.d.

Bright Chrome Finish
Surfaces are duplex nickel-chrome plated in a twenty-two step process.

Powder-Coated Finish
Hybrid powder coating is electrostatically applied. The dry coating is then fused and cured in a baking oven to form a smooth continuous film. Finish is chemical-resistant, hard, tough and mar-resistant.

Trek Lightweight Table
Top is 5-ply construction consisting of .050" thick laminate, 5.2mm 3-ply plywood, .75" thick high-density particleboard frame with honeycomb core, 5.2mm 3-ply plywood and .040" HPL backer.

Quick-Release Modesty Panels
.685" thick particleboard faced on both sides with laminate that matches table top laminate. Lower edge of modesty panel extends 7-1/4" from underside of table. Panel is easily removed from the table without tools. It locks into two 11-gauge steel retaining brackets and is removed by pulling down on vinyl-coated stainless steel release levers. Modesty panel is shipped k.d.

Trek Table Truck
Black powder-coated finish. Two swivel and two rigid 6" diameter casters with heavy-duty roller bearings. Rectangular or square table storage. Truck measures 60" long by 30" wide by 55" high. Felt is standard on top edges. Six-table capacity.

Trek with PowerUp®
Tables are available with one or two power/data modules, PowerUp, centrally located 4-1/4" from the front edge of table top. PowerUp is a UL Listed, Relocatable Power Tap, which mounts flush into the table top. When flipped up, cover open, one (1) duplex receptacle and two (2) data ports are exposed. The underside of the table is provided with a hinged plastic channel (cord management trough) which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines.

The PowerUp module is 6-1/4" long by 3" wide by 2-1/2" high when opened. It is provided with a 9 ft. or 15ft., 3-conductor cord and is rated 120V a/c, 15A. The cover snaps into the upright position to allow cords to be unplugged without the cover closing. The data ports are molded to accept AT&T "M" Series, RJ45 jacks. The module can be modified to accept various brand jacks.

Cords are further managed by the vertical leg wire manager which comes standard with PowerUp.

Under-Table Wire Management
Constructed of high quality black velcro. Harness is fastened to table bottom with screws. Shipped assembled. Wire management options HO, HW and WO) are only available on rectangle tables 96" and smaller (not available on any cantilever, flip-top or folding tables).

Leg Wireways
Scuff-resistant, high-impact rigid plastic. Two separate wire channels per leg. Fastened to legs with full length adhesive bond. Black only. One wireway per leg. Shipped assembled. Two leg wireways per top. Not available on 18" x 60" fixed base tables, 18" x 60" and 24" x 60" cantilevered base and folding tables.

Grommets
Plastic grommets are 3" diameter and recessed into table top. Cap is removable and has retractable slot cover. Two grommets per top. Grommets not available on 18" x 60" fixed base tables, 18" x 60" and 24" x 60" cantilevered base and folding tables. Grommet location for tables that are 36" deep and smaller will be on the corners of the table. Grommet location for the tables 42" deep and larger will be the centerline of the table. See graphics above.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The minimum height for a Trek® fixed leg table is 25". The maximum height is 42"

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
KN	- Knife edge
15W	- 1-3/4" Wood bullnose

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select base option.

4GB	- 4 black glides
4CB	- 4 black casters w/black hub caps (2 locking)
4MB	- 2 black casters w/black hub caps, 2 black glides

Ⓖ Select cord length (feet).

15	- 15' cord length
9	- 9' cord length

Ⓗ Select module color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The minimum height for a Trek® fixed leg table is 25". The maximum height is 42"

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
KN	- Knife edge
15W	- 1-3/4" Wood bullnose

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select base option.

4GB	- 4 black glides
4CB	- 4 black casters w/black hub caps (2 locking)
4MB	- 2 black casters w/black hub caps, 2 black glides

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

54B	- 1-1/4" Vinyl bullnose
74P	- 74P edge
15W	- 1-3/4" Wood bullnose

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select base option.

4GB	- 4 black glides
4CB	- 4 black casters w/black hub caps (2 locking)
4MB	- 2 black casters w/black hub caps, 2 black glides

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available. Contact KI.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an up-charge and additional leadtime.
Contact KI.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The minimum height for a Trek® fixed leg table is 25". The maximum height is 42"

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
34S	- 3/8" Wood band edge
36S	- 1-3/4" Wood band edge

Ⓒ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select base finish.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select base option.

4GB	- 4 black glides
4CB	- 4 black casters w/black hub caps (2 locking)
4MB	- 2 black casters w/black hub caps, 2 black glides

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an up-charge and additional leadtime.
Contact KI.

Additional Stains
Specially stained edges beyond the KI standard offering (as shown under Edge Color column on Product Color Options page) are also available.
Contact KI.

OPTIONS

Table Heights Other Than 29"
Table heights other than 29" are available. Add the table height in inches to the end of the model number string.
Example: to specify 27-1/4" from the top of the table to the floor add "/27.25" to the end of the model number. The minimum height for a Trek® fixed leg table is 25". The maximum height is 42"

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

OPTIONS

Accessory Options

Under-Table Wire Management, Leg Wireways, and Grommets are Accessory Options. Add the following to the end of the model number:

Under-Table Wire Management and Leg Wireways selections are:
HO = Under-Table Wire Management; Upcharge is $72
WO = Leg Wireways; Upcharge is $28
HW = Under-Table Wire Management and Leg Wireways; Upcharge is $97
Wire Management options HO, HW and WO are ONLY available on rectangular tables 96" and smaller (NOT available on any cantilever, flip-top or folding tables).

Grommet Selections are:
Gxx=grommet with color designator; Upcharge is $27
Refer to Product Color Options page.
Grommet option is available on rectangle tables 96" and smaller, except for all 18"x 60" and 24"x60" cantilevered fixed and folding tables (24"x60" tables with standard fixed bases are okay).

No accessory options are available on PowerUp® tables or flip-top tables.

General Information

SPECIFICATIONS

Chase
Trellis ships knockdown with chase, feet components and chase-to-chase connection hardware. Preconfigured chases are 3.63" thick and are available in the follow dimensions:

- Widths: 24", 30", 36", 42", 48", 54", 60", 66" and 72"
- Heights: 24" and 30"

Trellis allows for distribution of power and data at the top of the chase. Trellis is capable of carrying 100 Cat 6 cables or (1) 2.5" diameter bundle of cables.

Trellis Construction
Adjoining chases share common feet, therefore chases are secured at the bottom. A locking clip is provided to align and secure the top of the chases. Chases can also be screwed together at the top if floor conditions require so (screws are incldued). Chases consist of the following:

- Top horizontal beam - formed of 22-gauge steel, 3.63" x 6", overall length 24" to 72"
- Vertical channels - formed of 20-gauge steel x .75" x 3.63", to allow for fit-up with feet
- Insert panel (Inserts provide lateral stability)

  Laminate - formed of 5/8" thick, 45 lb. density particle board with high pressure laminate and a 2mm 73P edge.

  Steel - (2) piece formed 22 ga. panels riveted together.

Corner Connector Construction
90° and 120° - formed of powdercoated 22-gauge steel, includes fasteners.

Top Cap
All preconfigured Trellis systems include a top cap of appropriate size. Top caps are formed of powdercoated 22-gauge cold rolled steel. Installation of top cap is a snap fit and requires no tools.

- Top cap dimensions: 0.4" x 3.62" x width of chase

End-of-Run Trim
All exposed ends of a chase are covered with an end-of-run trim formed from powdercoated 20-gauge steel. Installation of end-of-run trim is a slide fit. Chase end trim lengths correspond to Trellis height.

ELECTRICAL (10-Wire)

Power Options
The US standard electrical system supplied for Trellis is a 10-wire electrical system, UL183 listed. Rigid wireway is factory mounted to chase beam.

10 wire power system is 6-2-2 configuration:
6-2-2
- (6) hot wires
- (2) shared, oversized neutral wires
- (2) ground wires - one isolated ground, one building ground

Rigid Wireways
Each powered chase includes the rigid wireways to pass power to receptacles. Wireways are mounted within the horizontal beam. Wireways are specified by chase length. The wireway design allows for snap connection of one chase wireway to another through the use of common chase jumpers. All chases 30" and wider accept electrical receptacles.

There are two receptacle locations on each side of every rigid wireway (see planning guide for spacing locations).

Base Infeeds
The electrical system permits power infeed at either end of the chase. Base infeeds are constructed of an 8' long, 3/4" dia. liquid-tight, flexible medal conduit. The metal conduit contains ten wires with a snap fit design allowing for quick installation and removal. The ten wires must be connected to building electrical by a licensed electrician.

Top Infeeds (Data and/or Power)
Power and data may be brought into Trellis through the use of a top infeed. Top infeed assembly consists of a 10' extruded aluminum data and/or power pole, top cap and ceiling trim. The interior of the power pole features a septum for power and data cable management. Flexible metal conduits containing ten wires with a snap fit attachment for connection to the rigid wireway cable are included. Refer to the Planning Guide for additional tips on specifying top infeeds. The ten wires must be connected to building electrical by a licensed electrician.

Power Pass-Through
The electrical system provides a method of passing power from one powered chase through a non-powered 24" chase to the powered rigid wireway of the next chase. Chase-to-chase jumpers are required to connect adjacent wireways.

Chase-to-Chase Jumpers
18.5" chase-to-chase jumpers feature steel casing and are used for inline and corner connections.

Receptacles
The receptacles for the modular electrical system feature injection molded components which snap fit into the rigid wireways of the chase. The rated capacity of the duplex receptacles is 15 amp, 6-2-2 (6 circuits) configurations.

Bezels/Filler Plates
Bezels and filler plates are molded in nylon and are available in a variety of colors.

Electrical System Test Requirements
The modular US electrical components used within Trellis meet applicable UL183 standards and requirements as identified by Underwriters Laboratories, Inc

Electrical (Single-Circut)

Activ8 Overview
The Activ8 electrical system is a UL 962 recognized component that allows up to eight duplex power modules to be connected to one standard 15-amp power cord. This system uses patented technology that allows the power modules to be connected in any order, without the need for sequential keying. The number of power modules connected is limited to the maximum allowed under UL standard 962. If more than eight modules are connected, the Activ8 control box disconnects all power to the system and illuminates a red LED. Power is resumed automatically to the system once the additional power module or modules are disconnected, which is indicated by a green LED. The fuse on the power entry box can be reset as it is used to limit the number of devices on the chain.

Technical Applications
Activ8 is available as a standard power accessory on KI's Trellis Power Distribution solutions. To reduce the risk of electric shock, use only indoors.

Activ8 Components
Power Infeed: Series includes a standard NEMA 5-15P 15-amp plug on one end of the 108" cord and a non-sequentially keyed connector at the opposite end of the cord. Control box is located 12 inches from the table connection. Will not work with GFI/GCFI building outlets. Must specify the Trellis infeed cover separatly to route cord out from beam area.

Built-in diagnostics LED shows system status:
• Green=power is on and system is working properly
• Red=power has been stopped because too many modules are connected or beyond 40'
• LED off=input power is not available; check that power cord is plugged into an outlet, and that power is available to that outlet

RPT power module and spacer plate for Trellis: Duplex power module provides two outlets per module. A connector with three ports is located at the opposite end of the 12" cord.

Jumper: Each jumper is equipped with a connector on each end that plugs into any connector on a given power module. Jumpers are non-sequential and are interchangeable to the extent that the jumper length is sufficient to reach the next module. Jumpers are available in four standard lengths - 29", 53", 77" and 101".

UL962 Requirements
- Single-circuit power
- 12-amp total system rating
- 15-amp power infeed cord (9' minimum length, 15' maximum)
- Over-current protection
- 40' maximum length (not including power infeed cord)
- Up to eight duplex power modules
- Locking clip between chases is required

Complete requirements for meeting UL Standard 962 are described in that Standard.

Hardwire Overview
The Hardwire option consists of a slightly modified chase manufactured of standard materials.

A single bezel trimmed opening per side is on 24" and 30" troughs (3-1/2" off center). There are two openings per side on 36" through 72" troughs (6" and 13" from their respected ends), with the other side being just the opposite.

KI provides a UL listed single gang metal outlet box, mounting bracket and screws per opening.

The same bezel and filler plates (standard KI colors) that are standard on our 10-wire troughs are standard here as well, with the top opening available for data. (1.38" x 2.70" standard opening).

The electrician is responsible for the décor receptacles, wiring, flexible conduit and fittings.

Specifications

Basic Worksurfaces
Worksurfaces shall define the shape of the workstation and provide support for overhead storage, hanging pedestals, electrical componentry, and privacy screens.

Rectangular Worksurfaces
Laminated worksurfaces shall be constructed from 1-1/8" medium density fiberboard with a .030 high-pressure laminate surface or veneer and a .030 phenolic backing sheet with a choice of three edge styles: 74P, 74P with knife edge along front, or 3/8" wood. polypropylene edge shall be available in multiple colors. The knife edge shall only be applied to the front edge of the worksurface and extend 2" beyond the desk frame. The wood edge shall be constructed from natural red oak and be available in a clear finish (standard) or in a maple wood band with additional stains. Worksurfaces shall be available in 24", 30", 36", 42", 48", 54", 60", 66", and 72" widths, 24" and 30" depths, and 29" height.

Rectangular worksurfaces up to 60" wide shall include two triangular worksurface grommets and covers, located in the back corners of each worksurface. 66" and 72" wide worksurfaces shall have an optional third triangular worksurface grommet and cover located near the back center of the desk. Grommets shall be molded from polycarbonate and available in colors or translucent. Worksurfaces that are 60", 66", and 72" wide shall have an integrated steel reinforcement to allow adequate support for load bearing. All worksurfaces shall have pre-drilled holes for attachment to the desk frame.

Two leg supports shall support the worksurface and be formed of 16-gauge steel, overall dimensions shall be 6.00 x 6.00 x 27.25, with 16-gauge internal reinforcements resistance welded for additional strength. The leg assemblies shall be attached to the underside of the worksurface from above by use of threaded inserts. A steel leg cover on inside of desk shall be standard and removable without tools. A glide shall be attached to the bottom of the leg for up to 1" of adjustability. Two 3.25" x 2.25" grommets and covers molded from polycarbonate shall be standard on the top of each leg side.

The modesty panel beam shall be formed of 18-gauge steel, overall dimensions are 3.00 x 9.00 x length determined by size of worksurface. The modesty panel beam shall be attached to leg supports and the underside of the worksurface, will provide support for the worksurface and allow electrical and data cable to be run along the width of the desk. Plastic worksurface spacers shall provide a 1/4" stand off distance between the worksurface and modesty panel beam and snap into place for easier assembly.

An optional lower modesty panel shall be formed of 18-gauge steel, overall dimensions are 1.00 x 18.00 x length determined by size of worksurface. The lower modesty panel shall be attached to the leg supports and provide full enclosure of the desk back from floor to the modesty panel beam.

Two end panels shall support the worksurface and be formed of 18-gauge steel with an 18-gauge steel reinforcement resistance welded for strength. The end panel shall have a honeycomb core for additional strength and noise reduction. Overall dimensions shall be 1.25 x 27.00 x depth determined by worksurface size or configuration. Standard depths shall be 9" for transitional depth, 18" for 24" worksurfaces and 24" for 30 worksurfaces. End panel assembly shall be attached to the underside of the worksurface and leg assembly. Plastic worksurface spacers shall provide a 1/4" stand off distance between the worksurface and end panel and snap into place for easier assembly. A glide shall be attached to the bottom of the end panel for up to 1" of adjustability.

All steel desk components shall be powder-coated or otherwise finished.

Rectangular Reduction Worksurface
Rectangular reduction worksurfaces shall have the same basic construction as the rectangular worksurfaces. Worksurfaces shall have two curving arcs along the front edge that transition from a depth of 30" on one end and 24" on the opposite end.

Bow Front Worksurface
Bow front worksurfaces shall have the same basic construction as the rectangular worksurfaces. These worksurfaces shall have a depth of 30" or 36" with a radius edge that extends 6" from the desk support structure on the visitor side. Worksurfaces shall only be available in 60", 66", and 72" widths, without the center grommet and cover.

Corner Worksurface
Corner worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional leg support, modesty panel beam, and optional lower modesty panel. Depths of 24" and 30" and widths of 42" and 48" shall be standard. Worksurfaces shall have three grommets and covers, one per corner, located in the back corners of each worksurface as standard.

P-Shaped and Piano Shaped Worksurfaces
P-shaped and piano shaped worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional round support leg and modesty panel. The round support leg shall be attached towards the rounded front end of the worksurface and be constructed from 4" diameter, 14-gauge steel, and be fitted with a glide for up to 1" of adjustability. The modesty panel shall be constructed from 18-gauge steel and extend 9" from the underside of the worksurface. Worksurfaces shall be available in 60", 66" and 72" depths and 48" widths.

D-Shaped Worksurfaces
D-shaped worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional round support leg and modesty panel. The round support leg shall be attached towards the rounded end of the worksurface and be constructed from 4" diameter, 14-gauge steel, and be fitted with a glide for up to 1" of adjustability. Worksurfaces shall be available in 24", 30" or 36" widths and 48", 54", 60", 66" and 72" depths.

Round Add-On Worksurface
Round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They shall be available in 36" diameter with a 24" flat and 42" diameter with a 30" flat. A round support leg shall support the worksurface and be constructed from 4" diameter, 14-gauge steel, and be fitted with a glide for 1" of adjustability. Two steel splice plates and hardware shall be included to attach the round add on worksurface to a rectangular worksurface.

Half Round and Quarter Round Add-On Worksurfaces
Half round and quarter round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They shall be available in 48" diameter and 60" diameter. A round support leg shall support the worksurface and be constructed from 4" diameter, 14-gauge steel, and be fitted with a glide for 1" of adjustability. Four steel splice plates and hardware shall be included to attach the half round add on worksurface to two back to back rectangular worksurfaces. Four steel splice plates and hardware shall be included to attach the quarter round add on worksurface to two rectangular worksurfaces that are perpendicular to each other.

Transaction Worksurface
Transaction worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. Worksurfaces shall attach via two support stanchions to rectangular worksurfaces and three support stanchions to corner worksurfaces. The worksurfaces shall be available in 16" depth with a 4" overhang in overall sizes that match the base rectangular and corner workstations. Worksurfaces shall be available in 31" wheelchair accessible height or 42" stand-up height.

Backpack Wire Trough Component Kit
Backpack wire trough components shall allow for lay-in wiring along the back of workstation. The kit shall consist of a pair of trough mounting brackets attached to the leg supports and constructed from 16-gauge steel, three 1.25" x .92" wire troughs constructed from 18-gauge steel that span the width of a desk, and a cover constructed from 18-gauge steel capable of being opened without the use of any tools. Applicable end trim, corner, and splice components shall also be available for the cover.

Electrical
Power shall be supplied through a UL listed 10-wire system available in two different configurations that are not interchangeable: 6 hot wires, 2 neutral wires, and 2 ground wires or 4 hot wires, 4 neutral wires, and 2 ground wires. The system shall have a rated capacity of 120 VAC@ 20 amps.

A rigid one-piece wireway shall be attached to the inside of the modesty panel beam by two 16-gauge steel brackets and hardware and be covered by an 18-gauge steel cover. The wireway design shall allow for easy connection of the wireway of one desk to another through the use of a jumper. All desks 30" and wider shall be ready to accept electrical components.

The receptacles for the system shall be snap fit into the wireways and be rated for 15 amps.

The electrical system shall allow for a method of passing power from one powered desk through the modesty panel beam of a non-powered desk and connected to the wireway of a third desk. This power pass through shall attach with snap fit connections.

The electrical system shall allow power to infeed from the top of the desk through the triangular grommet in the worksurface. The top infeed kit shall include 12' of flexible metal conduit with a snap fit attachment to the wireway on one end and open whip on the other, a 7' or 10' extruded aluminum power pole and cover, and ceiling trim. The interior of the power pole shall be divided into two cavities for power and communication cable management.

The electrical system shall allow for power to infeed from the base of the desk through the lower leg grommet or leg cover. The base infeed kit shall include 6' of plastic covered flexible conduit that transitions into flexible metal conduit with a snap fit attachment to the wireway on one end and open whip on the other. A relocatable power tap (RPT) shall provide above worksurface power to the support stanchions from an installed 10-wire electrical system or use of the building outlets. Two RPT's, each containing two 15 amp outlets, shall be mountable per stanchion. Cord lengths shall be available in 36" or 96".

A steel bracket shall be available to attach to the underside of the modesty panel beam near the worksurface. It shall have a 1.38" x 2.70" opening to accept several different manufacturers data faceplates and the RPT.

Pedestal Storage
Pedestal storage for True® shall be provided by KI's 700 Series, 700 Series Curve, and U-Series® Pedestals. 3 pedestals shall be available in 2 depths, 17-5/8" that may be used with any depth worksurface, 21- 5/8" for maximum storage under a 30" worksurface. Multiple drawer combinations shall be available.

The 12" file drawer sizes shall have full extension slide arm suspensions for full access to storage space. The 3" pencil drawers and 6" box drawers shall have 3/4" extension, steel ball-bearing suspension.

Locks shall be included in each pedestal. Specific keying combinations shall be available. See Key Options.

Center Drawer
The center drawer shall mount below a 24" or 30" deep worksurface which has an 18" wide clearance. The drawer pan shall be constructed of 22-gauge steel with a hem along the front edge for safety and strength. A deep rib shall form a pencil tray and provide additional strength and a double flange across the back shall prevent spillage of contents. The drawer sides shall be 20-gauge with a hem along the top edge for safety. The drawer shall run on a pair of full extension, ball-bearing suspensions and shall be available with or without a lock, keyed randomly as standard. Field drilling for installation shall be necessary.

Privacy Screens
Privacy screens shall be available to provide sit down or stand up privacy within the True® workstation. Screens shall be 3/4" or 1" thick, 18-1/4", 21" or 38" high and available in 24", 30", 36", 42", 48", 54", 60", 66" and 72" widths to fit all worksurfaces. The 66" and 72" widths shall consist of a pair of screens (1) 30" plus (1) 36" screen for 66" applications and (2) 36" screens for 72" applications. The screens shall include mounting brackets for attachment to either the overhead supports, the underside of the worksurface, the top of the worksurface, or with a combination of attachment to an overhead support and a worksurface top.

Two privacy screen construction methods shall be available: two 1/2" industrial insulation boards, covered with fabric and glued together or an exposed, powder-coated aluminum frame. The exposed frame construction shall allow for different core materials to be inserted.

Overhead Support Stanchions
The overhead support stanchions shall be formed of 16-gauge steel, with overall dimensions of 6.00" x 6.00" x 19.50". A reinforcement plate constructed of 16-gauge steel shall be welded in place to provide additional strength and have 4 cutouts to accommodate either commercially available data plates or two RPT's. Support stanchions shall be designed to hinge open to allow access to the inside of the overhead support stanchions. A flexible rubber trim piece shall allow power or data cables to be run from the worksurface into the overhead support stanchions with the covers closed.

Overhead Storage
Overhead storage shall consist of the Balance® overhead and Universal overhead and shelves. Overhead storage shall attach to worksurface with two overhead support stanchions. 24", 30", 36", 42", 48", 54", 60", 66" and 72" sizes shall be available. 66" and 72" overheads shall incorporate a single shelf with two doors

Shelf dividers shall be power-coated steel with installation and removal accomplished without the use of tools or fasteners.

Universal overheads and shelves shall be 17" high and shall have 19-1/2" clearance between the worksurface and the bottom of shelf. Overhead doors shall be available with painted steel, fabric, laminate, or veneer, with a polypropylene extrusion handle. Locks shall be randomly assigned or keyed per customer requests.

The end panels shall be constructed of 14-gauge steel and have self-locking mounting tabs formed into the back edge. The shelf, back, and top shall be constructed from 18-gauge steel. The front edge of the shelf shall be a polypropylene extrusion that also provides space for a concealed flush mount task light.

Balance® overheads shall be 17" high and have 19-1/2" clearance between the worksurface and the bottom of shelf. The upper door shall be available in colored or translucent extruded rigid polypropylene with spatter-coat finish, fabric, or laminate applied. The overall door thickness shall be 3/8". The lower door shall be an aluminum extrusion and be ergonomic in design. A center lock mechanism shall be utilized between the upper and lower doors for security.

The overhead doors shall be effortlessly operated from either a seated or standing position through use of the upper or lower door. The upper door and lower door shall be synchronized in motion through the use of two 10-gauge linkages. The doors shall be assisted with two extension springs and require less than 5 pounds of force to operate. The upper door shall open over the outside of the case.

Task Lights
Task lights shall be offered in one standard level of efficiency and cost. The standard light shall have a magnetic high power ballast with rapid start, cool white T-8 fluorescent lamp. Task lights shall attach to the underside of the shelf on overhead cabinets.

Paper Management System
The paper management system shall address the storage and movement of files, binders, and documents. Components shall be available with integrated hooks for attachment to the work bar.

Key Options
There are various key options available depending on the component model. The key alike option (KA) allows multiple components of a workstation to be keyed alike. The key standard option (KS) allows each component to have its own randomly selected key number shipped with the individual component. The No lock core (NLC) provides more flexibility in keying workstations alike. All locks and keys for the individual components specified with no lock core will be packaged separately from the components. The location of the lock core and corresponding numbered key will be determined upon installation.

ANSI/BIFMA
True® desking shall meet or exceed the required ANSI/BIFMA X5.5-2008 desk systems test.

Quality
All True® desking components shall originate from ISO 9000, ISO 9001 or ISO 9002 registered facilities.

UL Listed
True® desks shall be listed to applicable UL standards and requirements by Underwriters Laboratories Inc. Two of the standards used to evaluate True® desks are UL 1286 Office Furnishing and UL 723 Standard Test for Surface Burning Characteristics of Building Materials.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

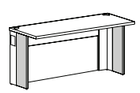
True® Desking System

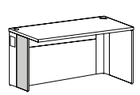
Rectangular Desk

True® Desking System

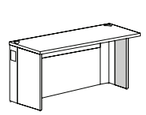
Rectangular Desk



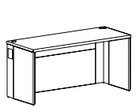
(B) Both transitional



(L) Left transitional



(R) Right transitional



(S) Two full end panels

Rectangular Desk with Full Modesty Panel

- Consists of top, two legs, modesty panel, filler panel (full modesty panel), two end panels (optional transitional size), ganging plates, and all required assembly hardware
- Each leg has two cable access grommet locations
- Top has two cable access grommets above the legs (66" and 72" wide have optional third middle grommet used for mounting stanchions and not intended for routing cables)
- Top grommets allow for attachment of overhead storage units or privacy screens
- Modesty panel allows for optional 10-wire electrical system (see Electrical section)
- Pricing is for two transitional end panels, see "HOW TO BUILD A MODEL NUMBER" below for more options
- NOTE: Rectangular worksurfaces specified with a knife (KN) edge cannot be ganged at 90 degree angles.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
KN is not recommended in L-Shaped configurations.

74P	- 74P edge
KN	- Knife edge
34S	- 3/8" Wood band edge
VN	- Wood edge veneer

With 74P, KN and 34S edges, select from laminates for surface finish (Lxx). For edge color, 74P and KN, select from Exx colors and for 34S, select Mxx colors. For VN, select from Mxx for surface finish and do not select an edge color.

Ⓒ Select end panel.

B	- Two transitional end panels
L	- Left transitional end panel; add $75
R	- Right transitional end panel; add $75
S	- Two full end panels; add $146

Ⓓ Select desk center grommet option.

NCG	- No center grommet
YCG	- Yes center grommet

"YCG" option only available on 66" and 72" wide desks. "YCG" is needed to mount overheads, transaction surfaces or stanchion mounted privacy screens.

Ⓔ Select leg and surface grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select frame grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select desk color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
KN is not recommended in L-Shaped configurations.

74P	- 74P edge
KN	- Knife edge
34S	- 3/8" Wood band edge
VN	- Wood edge veneer

With 74P, KN and 34S edges, select from laminates for surface finish (Lxx). For edge color, 74P and KN, select from Exx colors and for 34S, select Mxx colors. For VN, select from Mxx for surface finish and do not select an edge color.

Ⓒ Select end panel.

B	- Two transitional end panels
L	- Left transitional end panel; add $75
R	- Right transitional end panel; add $75
S	- Two full end panels; add $146

Ⓓ Select desk center grommet option.

NCG	- No center grommet
NCG	- No center grommet
YCG	- Yes center grommet

"YCG" option only available on 66" and 72" wide desks. "YCG" is needed to mount overheads, transaction surfaces or stanchion mounted privacy screens.

Ⓔ Select surface grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select frame grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select desk color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

- See images below
- Consists of top, three legs, two modesty panels, two filler panels (full modesty panel), two end panels (optional transitional size), ganging plates, and all required assembly hardware
- Each leg has two cable access grommet locations
- Top has three cable access grommets above the legs (66" and 72" wide have an optional fourth middle grommet used for mounting stanchions and not intended for routing cables)
- Top grommets allow for attachment of overhead storage units
- Modesty panel allows for optional 10-wire electrical system (see Electrical section)
- Pricing is for two transitional end panels, see "HOW TO BUILD A MODEL NUMBER" below for more options

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
Knife edge (KN) adds 2" to the depth of the desk on the user's side.

74P	- 74P edge
KN	- Knife edge
34S	- 3/8" Wood band edge
VN	- Wood edge veneer

With 74P, KN and 34S edges, select from laminates for surface finish (Lxx). For edge color, 74P and KN, select from Exx colors and for 34S, select Mxx colors. For VN, select from Mxx for surface finish and do not select an edge color.

Ⓒ Select transition end panels.

B	- Two transitional end panels
L	- Left transitional end panel; add $75
R	- Right transitional end panel; add $75
S	- Two full end panels; add $146

Ⓓ Select desk center grommet option.

NCG	- No center grommet
YCG	- Yes center grommet

"YCG" option only available on 66" and 72" wide desks. "YCG" is needed to mount overheads, transaction surfaces or stanchion mounted privacy screens.

Ⓔ Select surface grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select frame grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select desk color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
34S	- 3/8" Wood band edge
VN	- Wood edge veneer

Ⓒ Select surface grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. With 74P edge (74P) and wood band edge (34S), select from laminates. With wood edge veneer (VN), select from veneers.

Ⓔ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. With 74P edge (74P), select from 74P colors. With wood edge veneer (VN), no edge color selection required. With wood band edge (34S), select wood edge colors.

Ⓕ Select frame grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select desk color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
Knife edge (KN) adds 2" to the depth of the desk on the user's side.

74P	- 74P edge
KN	- Knife edge
34S	- 3/8" Wood band edge
VN	- Wood edge veneer

Ⓒ Select transition end panels.

B	- Both

Ⓓ Select surface grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections. With 74P edge (74P), knife edge (KN), and wood band edge (34S), select from laminates. With wood edge veneer (VN), select from veneers.

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections. With 74P edge (74P) and knife edge (KN), select from 74P/knife colors. With wood edge veneer (VN), no edge color selection required. With wood band edge (34S), select wood edge colors.

Ⓖ Select frame grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select desk color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.
