FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
KN is not recommended in L-Shaped configurations.

74P	- 74P edge
KN	- Knife edge
34S	- 3/8" Wood band edge
VN	- Wood edge veneer

With 74P, KN and 34S edges, select from laminates for surface finish (Lxx). For edge color, 74P and KN, select from Exx colors and for 34S, select Mxx colors. For VN, select from Mxx for surface finish and do not select an edge color.

Ⓒ Select transition end panels.

B	- Two transitional end panels
L	- Left transitional end panel; add $75
R	- Right transitional end panel; add $75
S	- Two full end panels; add $146

Ⓓ Select desk center grommet option.

NCG	- No center grommet
YCG	- Yes center grommet

"YCG" option only available on 66" and 72" wide desks. "YCG" is needed to mount overheads, transaction surfaces or stanchion mounted privacy screens.

Ⓔ Select surface grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select frame grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select desk color.
Refer to the **Product Color Options** page in this price list.

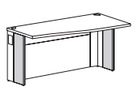
FINISH INFORMATION

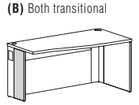
Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

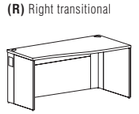


(B) Both transitional



(L) Left transitional

(R) Right transitional



(S) Two full end panels

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

SPECIFICATIONS

Lift Mechanism
Tables fold and open in one fluid motion, assisted by a combination of pneumatic cylinders and a torsional energy storage system. This combination ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling. Torsion-bar-only assists or spring assists are not to be used.

Tops and Benches
Table tops and benches are of solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high pressure laminate backer for the bottom surface. Table tops and benches are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Benches
Bench supports are robotically welded steel construction of 14-gauge tubular frame steel with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Benches are secured to steel plates with deep thread screws. Each split bench requires two plates. Full benches for 8' tables require two plates; full benches for 10' and 12' tables require three plates. No field assembly required.

Stools
Stool supports are robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Poly stools are attached to the steel plate with deep thread screws. Thermoset hard plastic stools are attached with carriage bolts. No field assembly required.

Stools are one of the following:
A. Poly: High-impact polypropylene stools of heavy-duty construction with ribs to reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter.

B. Thermoset Hard Plastic: Highly durable thermoset hard plastic stool seats of molded melamine and wood flour mixture are available. Seats are scratch resistant with color permeating through seat. Stool is 13" diameter.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.
B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.
C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. Horizontal and vertical tubing is 1-1/4" o.d. 14-gauge steel. Hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is gravity operated for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of nylon plastic material are standard. Set of eight per table.

Casters
Large 4" diameter heavy-duty hard rubber swivel casters provide easy and safe maneuverability. When the table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the outer edge of the table top when in the open position. Tamper-resistant caster covers are used to prevent the trapping of dirt, dust or food. Casters are self-lubricating.

General
Tables ship fully assembled. Tables are listed to applicable UL standards and requirements by Underwriters Laboratories, Inc.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.
Basic model includes base no. of table with codes for length of table, edge treatment and frame finish.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
73P	- 3/4" 73P edge
PR	- Perfect edge

Ⓒ Select height.

27	- 27" high
29	- 29" high

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select surface edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select bench surface.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select bench edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓗ Select frame color.
Refer to the **Product Color Options** page in this price list.
(BL) Std-no upcharge, all other colors have $14 upcharge, see price column for Chrome upcharge

FINISH INFORMATION

Additional Laminate Offering

Additional laminates are available with two weeks extended leadtime and a $70 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. When additional laminates are specified, top surface and bench surface are the same (bench edge color will match surface edge color).

INFORMATION

Polypropylene Stool

High-impact polypropylene stools of heavy-duty construction, with ribs, reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter and fastens with screws.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.
Basic model includes base no. of table with codes for length of table, edge treatment, frame finish and stool material.

B Select edge style.

C Select height.

27	- 27" high
29	- 29" high

D Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

E Select surface edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

F Select stool color - Polypropylene (PY).
Refer to the **Product Color Options** page in this price list.

G Select frame color.
Refer to the **Product Color Options** page in this price list.
(BL) Std-no upcharge, all other colors have $17 upcharge, see price column for Chrome upcharge

FINISH INFORMATION

Additional Laminate Offering

Additional laminates are available with two weeks extended leadtime and a $83 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

INFORMATION

Polypropylene Stool

High-impact polypropylene stools of heavy-duty construction, with ribs, reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter and fastens with screws.

UFRD58	8	8	8	8

SPECIFICATIONS

Lift Mechanism
Tables fold and open in one fluid motion, assisted by a combination of pneumatic cylinders and a torsional energy storage system. This combination ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling. Torsion-bar-only assists or spring assists are not to be used.

Tops and Benches
Table tops and benches are solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops and benches are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Split Benches
Bench supports shall be robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to the uprights. Benches are secured to the steel plates with deep thread screws. There shall be two plates for each split bench. No field assembly required.

Stools
Stool supports are robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Poly stools are attached to the steel plate with deep thread screws. Thermoset hard plastic stools are attached with carriage bolts. No field assembly required.

Stools are one of the following:
A. Poly: High-impact polypropylene stools of heavy-duty construction with ribs to reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter.

B. Thermoset Hard Plastic: Highly durable thermoset hard plastic stool seats of molded melamine and wood flour mixture are available. Seats are scratch resistant with color permeating through seat. Stool is 13" diameter.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. Horizontal and vertical tubing is 1-1/4" o.d. 14-gauge steel. Hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:
A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.
B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is spring loaded for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of nylon plastic material are standard. Set of four per table.

Casters
Large 4" diameter heavy duty hard rubber swivel casters provide easy and safe maneuverability. When the table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the end of the bench unit or outermost stool when in the open position. Tamper-resistant caster covers are used to prevent the trapping of dirt, dust or food. Casters are self-lubricating.

General
Tables ship fully assembled. Tables are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

FINISH INFORMATION

Additional Laminate Offering

Additional laminates are available with two weeks extended leadtime and a $83 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

INFORMATION

Polypropylene Stool

High-impact polypropylene stools of heavy-duty construction, with ribs, reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter and fastens with screws.

SPECIFICATIONS

Lift Mechanism
Rectangular tables fold and open in one fluid motion, assisted by a torsional energy storage system. This ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling.

Shaped tables fold in one fluid motion without pneumatic or torsional energy assistance. Safety lock engages in the semi-open position to halt downward movement. Safety lock can be released from either side of the table.

Tops
Table tops are of solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames for Rectangular Tables without Seating
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. End leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" x 2" 14-gauge bottom tube. Center leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" round 14-gauge bottom tube. Center hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frames for Shaped Tables without Seating
Table frame is fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge angle steel, pierced to securely anchor the tops. Leg weldments are robotically wire-welded. Leg consists of 1" x 2" 14-gauge vertical tube and bottom tube, 1" round 14-gauge top tube and two support gussets for added strength. Center hinge plates are 7-gauge steel. Stretcher bars are 1" 7-gauge steel. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks for Rectangular Tables
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is spring loaded for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Locks for Shaped Tables
Gravity lock with spring assist constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. Safety lock engages in a semi-open position to halt downward opening movement. Release of gravity lock is possible from either side of the table.

Casters
Large 4" diameter heavy duty hard rubber swivel casters provide easy and safe maneuverability. When table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the outer edge of table top when table is in the open position. Casters are self-lubricating.

General
Tables ship fully assembled. Rectangular tables without seating are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.
Basic model includes base no. of table with codes for length of table, edge treatment and frame finish.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
73P	- 3/4" 73P edge
PR	- Perfect edge

Ⓒ Select height.

27	- 27" high
29	- 29" high

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select surface edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓕ Select frame color.
Refer to the **Product Color Options** page in this price list.
(BL) Std-no upcharge, all other colors have $14 upcharge, see price column for Chrome upcharge

FINISH INFORMATION

Additional Laminate Offering

Additional laminates are available with two weeks extended leadtime and a $70 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates are available with two weeks extended leadtime and a $83 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Perfect Edge

SPECIFICATIONS

Lift Mechanism
Tables fold and open in one fluid motion, assisted by a combination of pneumatic cylinders and a torsional energy storage system. This combination ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling. Torsion-bar-only assists or spring assists are not to be used.

Tops and Benches
Table tops and benches are solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Benches
Bench supports are robotically welded steel construction of 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Benches are secured to steel plates with deep thread screws. There shall be three plates for each full bench. No field assembly required.

Stools
Stool supports are robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Poly stools are attached to the steel plate with deep thread screws. Thermoset hard plastic stools are attached with carriage bolts. No field assembly required.

Stools are one of the following:
A. Poly: High-impact polypropylene stools of heavy-duty construction with ribs to reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter.

B. Thermoset Hard Plastic: Highly durable thermoset hard plastic stool seats of molded melamine and wood flour mixture are available. Seats are scratch resistant with color permeating through seat. Stool is 13" diameter.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. Horizontal and vertical tubing is 1-1/4" OD 14-gauge steel. Hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is gravity operated for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Casters
Large 4" diameter heavy-duty hard rubber swivel casters provide easy and safe maneuverability. When the table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the end of the bench unit or outermost stool when in the open position. Tamper-resistant caster covers are used to prevent the trapping of dirt, dust or food. Casters are self-lubricating.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of nylon plastic material are standard. Set of four per table.

General
Tables ship fully assembled. Tables are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

Perfect Edge	•	•	•
31-3/4" height	•	•	•

SPECIFICATIONS

Lift Mechanism
Rectangular tables fold and open in one fluid motion, assisted by a torsional energy storage system. This ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling.

Shaped tables fold in one fluid motion without pneumatic or torsional energy assistance. Safety lock engages in the semi-open position to halt downward movement. Safety lock can be released from either side of the table.

Tops
Table tops are of solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames for Rectangular Tables without Seating
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. End leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" x 2" 14-gauge bottom tube. Center leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" round 14-gauge bottom tube. Center hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frames for Shaped Tables without Seating
Table frame is fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge angle steel, pierced to securely anchor the tops. Leg weldments are robotically wire-welded. Leg consists of 1" x 2" 14-gauge vertical tube and bottom tube, 1" round 14-gauge top tube and two support gussets for added strength. Center hinge plates are 7-gauge steel. Stretcher bars are 1" 7-gauge steel. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks for Rectangular Tables
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is spring loaded for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Locks for Shaped Tables
Gravity lock with spring assist constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. Safety lock engages in a semi-open position to halt downward opening movement. Release of gravity lock is possible from either side of the table.

Casters
Large 4" diameter heavy duty hard rubber swivel casters provide easy and safe maneuverability. When table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the outer edge of table top when table is in the open position. Casters are self-lubricating.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of ABS plastic material are standard. Set of four per table.

General
Tables ship fully assembled. Rectangular tables without seating are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

SPECIFICATIONS

Tops/Backs and Benches
Tops/backs and benches are of solid core 3/4" thick warp-resistant construction. Center core is 45 PCF high-density particleboard. A .030 high-pressure laminate face is used for the top surface with a .030 high-pressure laminate backer for the bottom surface. Table tops and benches are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 2-1/2" radius. Tops measure 14-3/4" wide by 3/4" thick by the length of the bench.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members and the ganging mechanism into a self-supporting unit. The top/back support apron is 18-gauge bent and welded steel tubing, using double tube construction for leg support vertical and leg support bottom cross tube. The main pivot folding action is heavy-duty 14-gauge steel tubing coupled with thick 11-gauge saddles. The lower leg base shall be welded to the leg assembly.

Frame Finish
Painted frame finish is non-chipping electrostatically applied and baked. Finish is black only.

Ganging Mechanism
Steel ganging mechanism is provided on all tables as standard, allowing two tables to be locked together into a common unit. Mechanism is located on end of foot for ease of operation.

Bench Support Foot Caps
Bench support foot caps are non-marring rubber.

Casters
Large 4" diameter hard rubber swivel casters, two locking and two non-locking, provide easy and safe maneuverability.

General
Convertible benches ship knocked down in two boxes for customer assembly (unassembled). Benches are listed with Underwriters Laboratories in compliance with testing for public safety (Folding Rollaway Tables).

Uniframe® Tables from KI

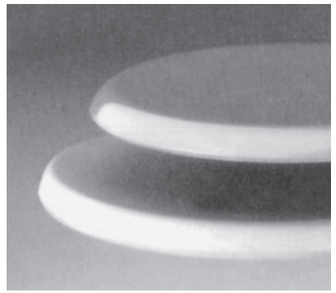
General Features and Benefits

Uniframe® Tables from KI

General Features and Benefits

Uniframe tables have ample doorway clearance and can be moved in the safe, closed and locked position through standard door openings.

For safety and convenience, the storage lock engages automatically when the table is folded and can't move out of correct alignment like competitor' tables can. The lock release is easily accessible from either side of the table without a long reach under the unit.



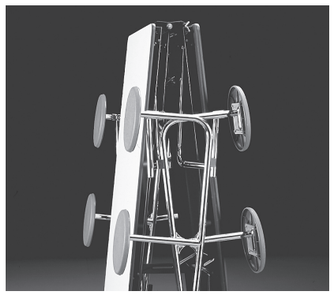
Textured polypropylene stool seats are standard or choose the Thermoset Hard Plastic option. Thermoset Hard Plastic provides the ultimate seat for lasting appearance and cleaning simplicity.

T-legs increase knee room and seating capacity around the table and eliminate the need to straddle table leg uprights.

KI's exclusive combination pneumatic lift assist and torsional energy storage system results in a controlled, effortless folding operation. So much so, these tables are the easiest to operate...bar none!

Uniframe rectangular tables automatically stay in a teepee (semi-folded) position for safe, fast and easy floor cleaning. Just lift slightly, clean and push back down.

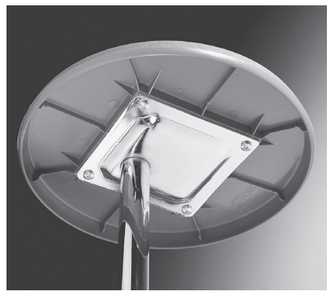
Uniframe rectangular tables provide sufficient clearance between top halves to prevent fingers from being caught or pinched. Pinch-free center hinges also assure safe operation.



KI's unique design stores stool seats parallel to the tabletop, discouraging children from climbing and minimizing dust build-up during storage.

Split benches have a generous 4-1/2" clearance between seats for greater comfort and easy access.

For non-rectangular units the semi-open safety lock prevents injury from downward opening by keeping the table in a semi-open position until fingers are out of the way.



KI attaches stools to a heavy, 11-gauge, metal plate before shipping. This provides greater strength, durability and stability than the competitors' plastic sleeve and pin style stools that require field installation. With polypropylene stools, white marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool.

The exclusive caster support has a sleek tamper-resistant cover that won't trap dust, dirt or food and won't scuff shoes.

60	64	64 x 69	1.777		1.917	1.917

Yardage requirements are "per tile" (multiply by the number of tiles per panel for total yardage per panel).
8" Height is for slat rail (tool rail) or some segmented tiles.
Subtract 6" from panel size for the base raceway, unless specifying "tile to floor," segmented tile, or stacker.
72" wide panels consist of qty. 2 - 36" wide tile on each side (qty 4 tiles total).

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

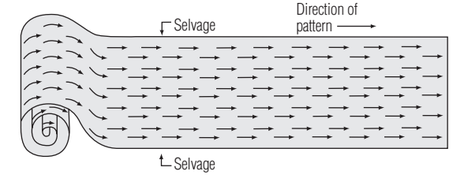

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

C.O.M. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

In all instances, send this form to the C.O.M. Specialist.

Unite® System
General Information

TECHNICAL SPECIFICATIONS

Panels
Unite panels are offered in monolithic and segmented styles. All panels ship knockdown with panel frame, tiles, base components, top caps, adjustable glides, and panel-to-panel connection hardware. Panels may be specified without top caps to allow for attachment of spanning top caps or divider screens. All Unite panels meet the flammability requirements as defined in the ANSI/UL 1286 safety standard for Office Furnishings. Class A rated standard finishes are available.

Preconfigured panels are 3 1/2" thick to facilitate integration with KI Genius walls, and are available in the following dimensions:
- Panel Widths: 24", 30", 36", 42", 48", 54", 60", 72" (72" features split tiles).
- Panel Heights: 32", 40", 48", 56", 64".

Three base styles are available:
- Standard base raceway
- Elevated base
- Tile-to-floor one side/standard base raceway other side

Insert tiles are interchangeable among standard, elevated, and the tile-to-floor one side/standard base raceway other side panels. Tile height of the tile-to-floor tile is unique, and can only be interchanged with a similar sized tile-to-floor tile. All tiles are hand-placed, requiring no tools for attachment to frames. All base styles support reconfiguration.

Standard base raceway panel frames allow distribution of power and data at the base of the panel, on both sides. Tile-to-floor one side/standard base raceway panel frames feature a base raceway on the user side only. Above worksurface beltline power is available on all base styles.

Frame Construction
Frames are welded, and consist of the following:
- Top & bottom horizontal rail – formed of 16-gauge galvanized steel by 1 7/8" tubing.
- Vertical Post – roll-formed 16-gauge steel with powder-coat finish (black), measuring 1 3/4" x 2 1/16", featuring slots at 1" increments to allow for tile and component hanging.
- Top cap mounting clip – formed of 20-gauge spring steel by 1 1/4" x 1 7/8" x 2" with channel to route data cables. Fastened with #12 x 3/4" screw to all top horizontal rails.
- Glide housing – Molded plastic rated HB minimum. Overall dimensions are 1 1/8" x 24" x 1 1/2" height. Glides provide a 3" range of adjustment.
- Glide – 1" diameter plastic.
- Glide stem – 3/8-16 thread, 3.5" long.
- Wireway mounting bracket – used on bottom and beltway height raceway in powered assemblies. Formed of 16-gauge steel. Overall dimensions are 1 3/8" x 1 13/16" x 2 1/2" with mounting holes for attaching 10-wire rigid wireways.

Stacking Sections
Stacking sections are constructed in one of two styles:
- Three-sided steel-construction stacking sections (steel frame) utilize exterior-mounted tiles of either fabric, markerboard, or slat wall. Steel frame stacking sections are attached with 1/4" x 1" x 7 1/2" steel post "forks."
- Four-sided stacking sections are constructed of an extruded aluminum frame and contain either glass, steel or perforated steel, inserts. Frames measure 1 11/32" x 3 9/32", consistent with panel size. Frames capture a single 3/8" tempered glass panel or perforated steel insert, and are attached with 1/4" x 1" x 7 1/2" steel posts with "forks."

Light Shield
90° – Formed of a 1/16" thick extruded black plastic rated HB minimum. Angle is 90° for 90° panel intersections. Lengths range for 48", 64" and 80". Other lengths must be field cut from the three listed. Plastic light shields snap to connector blocks at 90° intersection and serve only to block light.
Dimensions: 9/16" x 9/16"

120° – Formed of 18-gauge, pre-painted black steel. Length ranges from 8" to 80" x 8" increments. Angle is 60° for 120° panel intersections. Steel light shields hang on connector block bolts at 120° intersections. 120° light blocks block light and serve as a spacer for proper floor planning.
Dimensions: 2 11/16" x 2 11/16".

Base Raceway Hinge Clip
Base raceway hinge clip is molded plastic, rated HB minimum
Dimensions: 1 13/16" x 2 1/8" x 3 1/4".

Connector Block
90° – Formed by an extruded aluminum square block 1/8" minimum wall thickness includes one threaded steel insert on each face. Block contains two "U" shaped, 18-gauge galvanized steel spacer plates fastened to the block with one 1/4-20 bolt.
Dimensions: 2 1/2" x 3 3/8" wide

120° – Formed of extruded aluminum triangular block 1/8" minimum wall thickness. Includes three threaded inserts and no spacer plates.
Dimensions: 2 1/2" x 2 15/16" wide

Tile/Inserts
<u>Monolithic</u>
Preconfigured monolithic panels feature either fabric or steel tiles.

<u>Segmented</u>
Preconfigured segmented panels are available in a variety of substrates and surface finish options. Segmented panels universally feature a 32" segmentation height, with specified bottom and upper, and front and back tiles. Glass, perforated steel or solid steel on preconfigured segmented panels are only available as stacking sections on the upper locations of the panel frame. Preconfigured substrates vary by configuration and may include:
- Fabric – bottom and upper tile
- Powder-coated Solid Steel – bottom and upper tile
- Steel Laminate Markerboard – upper tile
- Single Pane Tempered Glass (1/4" thick) – stacking section
  - clear or satin etch one side
- Laminated Safety Glass (1/4" thick) – stacking section
  - white interlayer (.030" thick) between two 1/8" thick clear panels
- Powder-coated Perforated Steel – stacking section
- High-Pressure Laminate – bottom and upper tile
- Slat Wall – upper tile (upper slat wall tiles feature extruded slat wall on the lowest 8" of the tile, with fabric covering any area above the extrusion)

Fabric Tiles
Fabric tiles feature one of two cores:
- Fiberglass – 1/2" thick molded fiberglass board in dimensions from 24" - 60" wide and 8" - 64" tall; may feature up to two electrical receptacle cutouts with overall dimensions 2 1/16" x 7 5/8" for receptacles.
- Wood Fiberboard – 1/2" thick wood fiberboard, in dimensions from 24" - 48" wide and 8" - 48" tall; may feature up to two cutouts, overall dimensions 2 1/16" x 7 5/8" for receptacles. Available upon request.

Fabric tiles feature 2" stiffener rails of 1/16" formed steel. Rails are secured to the core with adhesive, and are located on left and right vertical edge of tile. Similar rails are adhered horizontally as required for additional rigidity. Fabric is secured to tile edges and back of tile with adhesive. Standard panels with fabric, fiberglass core and raceway have a .50 NRC rating. Standard panels with fabric, fiberglass core and a lifted base have a .55 NRC rating. Both core options feature a class-A flame rated face coating. Fabric tiles are fully tackable and available in monolithic, segmented, and stacking sections.

Unite® System
General Information

Solid Steel Tiles/Inserts
Steel tiles are constructed of 22-gauge formed steel with two rubber dampener pads adhered to the back of the tile to dampen sound. Two $^{1}/_{16}$" x $^{1}/_{4}$" x 1" rare earth magnets are adhered with double-sided tape to the back of the tile to aid in assembly without tools. Magnets are nickel coated Neodymium (NdFeB), Grade N52 with a 4.45 lb pull force each.

Steel Markerboard Tiles
Steel markerboard tiles are constructed of 22-gauge formed steel with honeycomb corrugated board adhered to the back of the tile to dampen sounds. Two $^{1}/_{16}$" x $^{1}/_{4}$" x 1" rare earth magnets are adhered with double-sided to the back of the tile to aid in assembly without tools. Magnets are nickel coated Neodymium (NdFeB), Grade N52 with a 4.45 lb pull force each. A magnetic tray, markers and eraser can be specified separately. Steel markerboards are available as segmented tiles and stacking sections.

Slat Wall Stacking Section Tiles
Slat wall stacking section tiles are constructed of powder-coated extruded aluminum on the lower 8" portion, which functions as a tool rail, with fabric tiles on the remaining upper portion of the segment. Tile includes integral mounting hardware. Slat walls are available in segmented tiles and stacking sections.

Glass Stacking Section Inserts
Glass inserts are captured in an aluminum extruded frame. Glass is $^{1}/_{4}$" thick tempered, and is available clear or satin etch. Satin etch is non-transparent and is on one side of the glass while the other side is shiny. Glass stacking sections are available on the upper location of a panel.

Solid Steel Stacking Section Inserts
Solid steel inserts are constructed of 18-gauge, powder-coat painted steel. Solid steel stacking sections are available on the upper location of a panel.

Perforated Steel Stacking Section Inserts
Perforated steel inserts are constructed of 18-gauge, powder-coat painted steel with $^{3}/_{32}$" diameter holes on $^{1}/_{4}$" staggered centers (NO. RS041). Perforated steel stacking sections are available on the upper location of a panel.

Acoustic Septum Kits – UNRC.size
Acoustic septa are rigid 2" thick composite fiberglass sheets designed to be inserted into standard Unite panel frames. When installed, the septum increases the NRC of the Unite raceway fabric panel from .50 NRC to .70 NRC per ASTM C423-09a. Septa fit inside and fill the interior of the Unite metal frame without the use of tools. When 10-wire rigid wireways are included at beltway height, the septa must be cut in the field to allow space for the wireway.

- Acoustic septa are 2" thick and are available in seven widths and five heights designed to fit into all standard Unite frame sizes.
- Acoustic septa are constructed of three cured (ie. molded) fiberglass layers that are bonded together. The two outer layers are 3 lb (pcf) x $^{3}/_{4}$" thick fiberglass. The center core is 12 lb (pcf) x $^{1}/_{2}$" fiberglass.
- The fibrous glass wool (fiberglass) is manufactured using a minimum of 30% post-consumer recovered materials and a minimum of 5% post-industrial (pre-consumer) recovered materials. Fiberglass bats are subsequently cured using heat to compress the fiberglass into desired densities. The ingredients of the fiberglass are listed:
    - Fibrous glass
    - Urea extended phenol-formaldehyde resin
    - Formaldehyde
    - Non-woven facings

Panel Trim

Base Raceway Trim
Base raceway trim consists of 22-gauge roll-form steel with a powder-coat finish. Base raceway trim is hinged to an injection-molded clip and snap onto brackets attached to the bottom horizontal rail when closed. All base raceways accept rigid wireways and data cables. Base raceways are specified with or without $2^{1}/_{16}$" x $7^{5}/_{8}$" knockouts, which are easily removed to accommodate electrical receptacles and/or data jacks. No tools are required for installation. 24" panels feature one knockout per side; all other sizes feature two.
Dimensions: $5^{5}/_{16}$" high by width of panel.

Panel-to-Panel Connectors
Panel-to-panel connectors are universal. Full welded panel frames attach in-line using $^{3}/_{8}$-16 hex head bolts with washers and star lock nuts. Frames attach at intersections using aluminum extruded connection blocks. Intersections can be reconfigured without disturbing the existing workstation. Components for each intersection condition, including change of height conditions, are available in kit form. Each kit includes all hardware and associated trim to complete the intersection condition. $^{9}/_{16}$" socket drivers are required to complete all panel connections.

Intersection kits include all necessary light blocks. Light blocks for 90° intersections are black plastic and serve only to block light. Light blocks for 120° intersections are pre-painted black steel that block light and serve as a spacer for proper floor planning.

Split Tile Light Shield
"C" shaped split tile light shield is formed of $^{1}/_{16}$" black pre-painted steel.
Dimensions: $1^{1}/_{4}$" x $3^{7}/_{16}$" by height of panel.

Top Cap
All pre-configured Unite panel frames include a top cap of appropriate size. Top caps are formed of $^{1}/_{16}$" thick extruded aluminum, with powder-coat finish. Top caps used with top power infeed feature a cutout for the infeed. Installation of top cap is a snap fit and requires no tools. Top cap snaps to spring steel clips which are fastened to the top of all panel frames.
Dimensions: $^{3}/_{8}$" x $3^{1}/_{2}$" by width of panel.

End-of-Run Trim
All exposed ends of a panel run are covered with an end-of-run trim, formed from 18-gauge steel with powder-coat finish. Installation of end of run trim is a snap fit and requires no tools. Panel end trim lengths correspond to panel heights.

Intersection caps are formed of machined aluminum, cast aluminum, or cast zinc.
Dimensions: $^{3}/_{8}$" x $3^{1}/_{2}$" by height of panel.

End-of-run trim clips are formed of $^{1}/_{16}$" black spring steel.
Dimensions: $^{9}/_{16}$" x 2" x $3^{5}/_{16}$".

3-way, change-of-height, or "C" shaped trim is formed of $^{1}/_{16}$" powder-coated steel.
Dimensions: $3^{1}/_{2}$" x $3^{1}/_{2}$" by height of tallest panel.

90° dead-end trim features 18-gauge welded steel plate.
Dimensions: $^{1}/_{2}$" x $3^{3}/_{16}$".

120° dead-end trim is formed to a 60° angle of $^{1}/_{16}$" powder-coated steel.
Dimensions: $3^{1}/_{2}$" x $3^{1}/_{2}$" by height of panel.

Corner Trim and Change-of-Height Trim
All exposed corners of a panel run must be covered with either corner trim or change-of-height trim. Corner condition "L" shaped trim is formed of $^{1}/_{16}$" thick powder-coated steel. Installation utilizes a snap fit and requires no tools.
Dimensions: $3^{1}/_{2}$" x $3^{1}/_{2}$" by height of highest panel.

Segmented Trim Channel
"H" shaped segmented trim channel is formed of $^{1}/_{16}$" extruded powder-coated extruded aluminum. Channel connects two segmented tiles along the horizontal connection. No tools are required for installation.
Dimensions: $^{11}/_{16}$" x $1^{1}/_{4}$" by width of panel.

Bottom Trim Channel
Standard base raceway and elevated base require a bottom trim channel to locate and hold tiles horizontally. Channel is roll-formed of 1/16" steel with a powder-coat finish.
Dimensions: 1" x 2 1/4" by width of panel.

Tile-to-floor trim channel is extruded aluminum with a powder-coat finish.
Dimensions: 3/4" x 1 1/2" by width of panel.

Vertical Trim Clips
Stamped spring steel clips allow attachment of vertical trim at the end-of-run and change-of-height trim. Clips attach to the vertical posts with 3/8-16 hex head bolts.

Intersection Caps
All top cap intersection conditions are joined with separate intersection caps. Caps are injection-molded zinc with a powder-coat finish, and are required for all end-of-run, 2-way, 3-way, and 4-way connections, regardless of intersection angle.

Elevated Panel Foot Shroud
Foot shroud is formed of 16-gauge formed steel with powder-coat finish, and is used in elevated base conditions only.
Dimensions: 1 1/8" x 3 1/2" x 5 7/16".

Attachment Conditions

Wall Track
Wall track is available to allow for hanging of components onto an existing structural wall in the identical method as if the components were hung on Unite panels. The wall track consists of slotted 16-gauge steel with powder-coat finish in panel trim colors.

Adjustable Wall Mount
Adjustable wall mounts consist of a formed steel channel and 7/8" thick cork/rubber washers enclosed in a steel "U" channel to allow panels to be attached to existing building walls. Each unit features an adjustable depth of 1" to 1 11/16" in 1/16" increments (steel washer shims). Method of attachment to the existing building is dependent upon the existing wall construction.

Universal Connector, Unite to Genius Wall
The universal Unite to Genius wall connector enables a Unite panel connection at Genius wall corners, 3-way and end conditions. Unite panels attach to Genius trim with self-drilling screws.

Perpendicular Connector, Unite to Genius Wall
The perpendicular Unite to Genius wall connector enables a Unite panel connection at a Genius in-line connection seam. The Unite panel attaches perpendicular to the Genius wall at the seam using 3/8" pem studs and nuts. The perpendicular connector is an aluminum extrusion and is fully hidden.

Gallery Panels

Laminate Gallery Panel
Unite gallery panels are offered in high-pressure laminate (HPL) and thermally-fused laminate (TFL) surface options. HPL has a vertical grain pattern and TFL has a horizontal grain.

Laminate surfaces are applied to both sides of the 1 1/8" thick particle board core for a balanced construction. Gallery panels ship partially assembled with glides pre-installed at both bottom ends. The two-piece glide model includes steel ganger cleat sets. All four edges of the gallery panel receive 1 1/8" wide by 2.0 mm thick polypropylene edge banding.

HPL and TFL gallery panels are part of the Unite Panel System, which is a UL Listed Office Furnishing evaluated to ANSI/UL 1286. When tested to UL 723, the gallery panels have a flame-spread index of 200 or less and smoke-developed index of 450 or less which equates to Class C, per the International Building Code® for Interior wall finishes.

Unite® System
General Information

Gallery panels support a standard Unite panel run, and are installed at either the end of a panel run, or perpendicular along a run. Four gallery panel styles are offered.

End-of-Run Dual-Sided Gallery Panel
A single gallery panel that attaches to a Unite panel end-of-run and extends equally on both sides of the Unite panel run.

High-Pressure Laminate
- Heights: 32", 40", 48", 56" & 64"
- Widths (includes 3 1/2" overlap): 52"

Thermally-Fused Laminate
- Heights: 29 1/4" & 48"
- Widths (includes 3 1/2" overlap): 52", 64" & 76"

End-of-Run Single-Sided Gallery Panel
A single gallery panel that attaches to the end of a run and extends to one side of the Unite panel run. Right- and left-hand models are offered.

High-Pressure Laminate
- Heights: 32", 40", 48", 56" & 64"
- Widths (includes 3 1/2" overlap): 27 3/4", 33 3/4", 39 3/4", 45 3/4", 51 3/4" & 57 3/4"

Thermally-Fused Laminate
- Heights: 29 1/4" & 48"
- Widths (includes 3 1/2" overlap): 51 3/4", 63 3/4" & 75 3/4"

End-of-Run Dual-Sided Two-Piece Gallery Panels
Two separate gallery panels that butt together at the end of a Unite panel run. Each panel extends equally on both sides of the panel run.

High-Pressure Laminate
- Heights: 32", 40", 48", 56" & 64"
- Widths (includes 3 1/2" overlap): 60 1/2", 72 1/2", 84 1/2", 96 1/2" & 108 1/2"

Thermally-Fused Laminate
- Heights: 29 1/4" & 48"
- Widths (includes 3 1/2" overlap): 96 1/2", 120 1/2" & 144 1/2"

Divider Panel
A single Gallery panel that attaches perpendicular along a Unite panel run at any intersection.

High-Pressure Laminate
- Heights: 32", 40", 48", 56" & 64"
- Widths (includes 1" for attachment): 25 1/4", 31 1/4", 36 1/4", 42 1/4", 49 1/4" & 55 1/4"

Thermally-Fused Laminate
- Heights: 29 1/4" & 48"
- Widths (includes 1" for attachment): 49 1/4", 61 1/4" & 73 1/4"

Attachment Plate
Required for all end-of-run gallery panels. Attaches the gallery panel to the vertical post of a Unite panel frame. Plate is 11-gauge (.120" thick) steel with a powder-coat finish. Plate size is 3 1/2" wide and heights match all end-of-run gallery panel heights. Plates fasten to the gallery panel with #12 flat head screws, and to the Unite panel frame vertical post with 3/8-16 x 1" G5 short neck carriage bolts with steel washers and 3/8-16 KEPs nuts.

Gallery Panels Intersections & Trim

Divider Intersection Post
Required for installation of divider gallery panels. "H" shaped is formed of extruded aluminum, with a powder-coat finish. The post dimension is 1.4" x 3.36" with 1.20" wide channels to accept the divider gallery panel. Divider intersection post contains 3.0" x .90" milled passages at beltway and base heights to allow 15 1/2" 10-wire jumpers to pass from panel to panel. Attaches using 3/8-16 x 2 3/4" hex head bolts, 1 1/4" O.D. steel washers and 3/8-16 KEPS locknuts. The divider intersection post connects two adjacent Unite panel frames and adds 1.4" space between the two frames.

- Heights: 32", 40", 48", 56", 64", 72" & 80"

In-Line Divider Intersection Cap
Used at a divider gallery panel intersection. The cap is milled aluminum with a powder-coat finish. Divider intersection cap contains tabs which insert into the aluminum top caps to join in-line, adjacent Unite panels.

End-of-Run Change-of-Height Trim
Required at a height change between the end-of-run gallery panel and the Unite panel run end. Covers the exposed side of Unite panel. Formed from 18-gauge steel with powder-coat finish. Trim includes a milled, aluminum cap which is powder-coat painted, and includes spring steel clips which are installed at the end of a panel frame. Clips are common to what is used with standard Unite trim and attach to the vertical post with 3/8-16 hex head bolts and KEPs nuts. Trim is a snap-fit to the clips and requires no tools.

- Heights: 8", 16" 24", 32" & 40"
- Heights for 29 1/4" High Gallery Panels: 3", 11", 19" 27", 35", 43" & 51"

Dead-End Change-of-Height Trim
Required at a change-of-height along the Unite panel run, and where a divider gallery panel is included at the same intersection. Formed from 18-gauge steel with powder-coat finish. Trim includes a milled, aluminum cap which is powder-coat painted, and includes spring steel clips which are installed at the end of a panel frame. Clips are common to what is used with standard Unite trim and attach to the vertical post with 3/8-16 hex head bolts and KEPs nuts. Trim is a snap-fit to the clips and requires no tools.

- Heights: 8", 16", 24", 32", 40" & 48"

In-Line Change-of-Height Trim
Required when a divider gallery panel is used along a Unite panel run with a change-of-height between the panel run and the gallery panel. A "U" shape aluminum extrusion with powder-coat finish. The trim snaps into the divider intersection post with no tools required.

- Heights: 8", 16", 24", 32", 40" & 48"
- Heights for 29 1/4" High Gallery Panels: 3", 11", 19", 27", 35", 43" & 51"

Electrical

Power Options
The US standard electrical system supplied for Unite is an 810 electrical system. 10-wire rigid wireway can be mounted to any panel frame. Power is available at the following heights:
- Base Height Power – found in the 6" base raceway of the panel.
- Beltway (worksurface) Height Power – The powered tiles allow for installation of worksurface height receptacles. Two duplex receptacles can be mounted in a tile (one in a 24" tile). Receptacles are approximately 32" high.

Power is supplied through one of two available means:
6-2-2
- (6) hot wires
- (2) shared oversized neutral wires
- (2) ground wires – 1 isolated ground and 1 building ground

4-4-2
- (4) hot wires
- (4) independent neutral wires
- (2) ground wires – 1 isolated ground and 1 building ground

10-Wire Rigid Wireways
Each powered panel requires the use of 10-wire rigid wireways to pass power to receptacles. Wireways may be mounted at the base of panels or at beltway height. Wireways are specified by panel width. The wireway design allows for snap connection of one panel's rigid wireway to another panel's wireway through the use of 10-wire panel-to-panel jumpers. All panels 24" and wider accept electrical components.

There are four port locations on each end of every rigid wireway 30" and larger. 24" wireways feature two ports on one end only.

Wireways mount by screws to attached brackets on the underside of the lower frame for base power. For beltway power, rigid wireways attach with screws to brackets that are hooked into the vertical posts at each end.

10-Wire Base Power Infeeds
The electrical system permits power 10-wire infeed at the base raceway of the panel. Base infeeds are constructed of a 6' long, 1/2" liquid-tight flexible metal conduit containing ten wires with a receptacle type design allowing for quick installation and removal. Infeeds rotate 180° to allow for left or right configuration.

10-Wire Top Power Infeeds (Data and/or Power)
Power and data may be brought into a Unite panel through the use of a 10-wire top infeed power pole. Top infeed assembly consists of a 7' or 10' extruded aluminum data and/or power pole, top infeed panel trim cap and ceiling trim cap. The interior of the power pole features a septum to separate power and data cable management. Power infeed wiring consists of ten wires in flexible conduit, exposed at the ceiling end to connect to the building's source power. At the opposite end, the infeed conduit contains a modular connector end to snap into the panel's rigid wireway. Infeed cable must be specified separately.

10-Wire Power Pass-Through Jumpers
The electrical system provides a method of passing power from one powered panel through a non-powered panel to the powered 10-wire rigid wireway of the next panel. The pass-through consists of a standard rigid wireway without receptacles using in-line 10-wire panel-to-panel jumpers. Panel-to-panel jumpers are required to connect adjacent wireways.

10-Wire Panel-to-Panel Jumpers
In-line 10-wire panel-to-panel jumpers are 12" in length and connect between panel rigid wireways at in-line panel intersections. Intersection 10-wire panel-to-panel jumpers are 15 1/2" in length and connect between rigid wireways at various panel intersection conditions. Jumpers feature modular connector ends and nylon mesh casing.

Unite® System
General Information

System Jumpers
Designed for interconnection of Manufactured Wiring Systems (such as Genius Wall) to Office Furnishings (such as Unite). Two lengths are available for in-line and 90° connections. Jumpers are constructed with steel corrugated sheathing and steel shielded connectors. KI products are listed below, along with OEI and UNICOR name correlations.

10-Wire Vertical Jumpers
Vertical jumpers are 30" in length and jump power from a rigid wireway at the base raceway, up to the rigid wireway at the beltway height. Jumpers feature modular connector ends and steel corrugated casing.

10-Wire Duplex Receptacles
The duplex receptacles for the modular electrical system feature injection molded components which snap fit into the 10-wire rigid wireways of the panels. The rated capacity of the duplex receptacles is 15 or 20 amps in either 4-4-2 or 6-2-2 circuit configurations. Beltway receptacles come with bezel plate.

Bezels/Filler Plates
Bezels and filler plates are molded in nylon molded in a variety of colors.

Raceway Cable Trough
A formed 22-gauge black steel trough manages cables in raceway. The optional trough installs with a snap fit into raceway clips at each end of a panel without the use of tools.

Electrical System Test Requirements
The Unite Panel System, including the modular US electrical components, meets applicable UL standards and requirements as identified by Underwriters Laboratories, Inc.

Unite Freestanding Table

Tabletops
Tabletops feature balanced construction of 45-pound density particleboard core, with a 1/16" high-pressure laminate face sheet and a 1/16" phenolic backer. Edges are evenly adhered to the worksurface. All worksurfaces are pre-drilled for support legs. Rectangular shapes are available in 24" and 30" depths and 48", 60" and 72" lengths.

Table Supports
Supports are welded and consist of the following:
- Bottom, vertical and horizontal tubes – 14-gauge measuring 1 1/2" x 3/4".
- Top mounting bracket – formed 14-gauge steel.
- Glide – 3/8"-16 x 1" diameter.
- Leg insert (optional) – 18-gauge perforated steel.

Worksurfaces and Accessories

Worksurfaces
Worksurfaces feature balanced construction of 45-pound density particleboard core, with a 1/16" high-pressure laminate face sheet and a 1/16" phenolic backer. Edges are evenly adhered to the worksurface. All worksurfaces are pre-drilled for support brackets and support legs. Worksurface widths of 60" or greater feature integrated steel reinforcement for added strength. Grommet locations are specified.

Rectangular Worksurfaces
The standard rectangular worksurface are available in widths of 6" increments from 24" - 96", and in depths of 18", 22", 24" and 30". Rectangular conference ends are also available.

90° Corner Worksurfaces
90° symmetrical corner worksurfaces are available in 36", 42", and 48" widths, and in 18", 20", and 22" depths.

Shaped Worksurfaces
Peninsula, extended corner (shoe), extended corner reduction (shoe), tapered, 120°, and 60° shaped surfaces are available in a variety of widths and depths. Grommet locations are specified.

Transaction Countertops
Transaction countertops are available from 24" - 84" wide in 6" increments, with a countertop depth of 16". Countertops are also available for 90° corners. Support brackets feature steel locking clips to prevent dislodgment. Optional brackets are available for use on a 32" high panel, appropriate for ADA applications. Transaction countertop add 1 1/4" to finished panel heights. Countertops overhang 2 3/4" on the outside of the cubicle and 9 3/4" on the inside of the cubicle. Countertops accommodate task lighting.

Underhead Worksurfaces
Surfaces are available to hang underhead U-Series storage units. A 15" deep surface sits flush with underhead unit, with 22", 24", and 30" depths also available.

Worksurface Grommets
Worksurface grommets are available to fit a 3" hole in most work surfaces. Grommet is aluminum injection-molded with powder-coat finish.

Worksurface Wire Manager
Wire manager is constructed of black hook-and-loop ribbon, 7 1/2" long by 2" wide. The harness is fastened to the underside of the worksurface with pressure-sensitive adhesive. This wire manager supports cords and communication cables under the worksurface.

Modesty Panel
Modesty panel is constructed with a frameless 1/4" thick sheet of extruded acrylic in cloud or white color. Panels range from 24" to 72" wide in 6" increments. All panels are 10" high. The panel is fastened to a 14-gauge steel rail with a series of 14-gauge "L" shaped steel clips. The rail and clip feature a powder-coat finish available in colors to match the panel trim. Steel screws fasten the acrylic panel to the rail and underside of the worksurface.

Worksurface Support

Worksurface Support Legs
Support legs can provide both worksurface support and panel support in certain configurations. Brackets on the support leg prevent dislodgment from the vertical post of the panel. Worksurface support legs are specified by worksurface depth or width, depending upon configuration. See "Unite Panel System Planning Guide (KI-62226)" for additional planning rules.

Worksurface End Support Legs
End support legs are available for use at the ends of perpendicular, or peninsula worksurfaces. These legs do not have brackets. See "Unite Panel System Planning Guide (KI-62226)" for additional planning rules.

Worksurface Support Brackets
Two types of worksurface support brackets are available for Unite:
- Standard cantilever brackets.
- Design brackets.

Worksurface Vertical Fillers
3" worksurface vertical filler spans the gap when one worksurface drops from the standard 29" down to an adjacent 26" worksurface. Worksurface vertical fillers are available in 24" and 30" widths to match worksurface depths and are attached to worksurfaces with wood screws. Filler is constructed of 15-gauge powder-coated steel.

Unite® System
General Information

Storage and Accessories

U-Series Underhead Storage
Underhead dimensions and specifications match those of overhead units. Underhead may be mounted on any approved panel run (provided one end of the underhead is adjacent to a return). Underhead accommodates standard binders. Storage units include holes in top and bottom for cord drop in conjunction with grommets. Brackets are included for attachment. Legs may be specified separately if desired.

Overhead Cabinet Task Lights
Task lights are available which suspend from the shelf and overhead cabinet. Task light mounts on the underside of the shelf and overhead cabinet, and feature a 9' cord. Cords can be concealed by tucking between the reveal along tiles.

Countertop Task Lights
Task lights are available which suspend from the underside of the countertop. Task lights are offered in standard panel trim colors. The task lights feature an 8' cord which can be concealed by tucking between the reveal along tiles.

Shelf Dividers
Shelf dividers are compatible with Universal and Balance overheads, cabinets, and shelves only. Shelf dividers are powder-coated steel, and may be installed or removed with no tools.

Frameless Markerboards
Frameless steel markerboards are constructed of 22-gauge steel with an erasable white coating and a honeycomb backer to dampen sound. Markerboard surfaces are magnetic and include a 16" x 1 1/2" magnetic removable tray with markers and eraser. Markerboards mount in vertical post rail slots of a panel or wall track. Frameless markerboards mount on module only.

Framed Markerboards
Framed markerboards are constructed of white powder-coated aluminum frame with a white porcelain erasable surface. Markerboard surfaces are magnetic and include a 16" by 2 1/2" magnetic removable tray with markers and eraser. Markerboards mount in vertical post rail slots of a panel or wall track. Framed markerboards mount on module only.

Glass Divider Screens
Glass divider screens are constructed of 3/8" tempered glass mounted in two injection-molded plastic clamps. Glass divider available in clear and satin etch (one side). Three visible edges are polished with two corner radii. Aluminum split top caps trim each side of the glass.

Glass dimensions: 12" above top cap (13" actual) by panel width.

Wall Track
Wall track allows for hanging of components onto an existing structural wall in the identical method as if the components were hung on Unite panels. Wall track is constructed of slotted 16-gauge steel with powder-coat finish.

Tackboards
Tackboards are constructed of 3/4" wood fiber board covered with fabric. The mounting brackets are steel powder-coated and attached to the core with T-nuts and machine screws. Fabric is attached to the core with staples. Tackboards mount in the vertical post rail slots of a panel or wall track. Tackboards mount on module only.

Paper Management Accessories

Tool Rail
Tool rails are fabricated of a powder-coated aluminum extrusion. Tool rails are attached to the panel through the use of steel brackets, and support most paper management accessories. Available for standard panel sizes. Tool rails mount in vertical post rail slots of panel of wall track. Tool rails mount on module only.

Paper Tray Unit
Legal and letter sized paper trays are constructed of injection molded plastic. Trays are supported by the tool rail.

Dimensions: 2" high by 9 1/2" wide by 14" deep.

Dimensions: 2 1/2" high by 7" wide by 12 1/2" deep.

Dimensions: 9" high by 5" wide by 10 1/2" deep.

Diagonal Storage Unit
Diagonal storage units are constructed of injection molded plastic. Three ABS dividers may be used in left or right positions. Units are supported by the tool rail.

Dimensions: 2 1/2" high by 7" wide by 12 1/2" deep.

Accessory Tray
Plastic accessory trays include three hooks for mounting. Trays feature compartments to hold pencils, paper clips and miscellaneous items, and are suspended from tool rail or used freestanding on worksurfaces and shelves.

Dimensions: 2" high by 9 1/2" wide by 10" deep.

Pencil Cup
Injection molded plastic cups provide for storage of pens, pencils and highlighters. One hook is provided for mounting on tool rail.

Dimensions: 4" high by 4" wide by 3 1/2" deep.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select electrical code.

CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
DP	- Domestic - with cutouts
C1	- Chicago, 1 side w/cutouts
D1	- Domestic, 1 side w/cutouts

Ⓓ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓕ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
_____
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
_____
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIAL SERVICES

Special Carton Marking

With specially marked information	N/C

Shipping

Ships **knocked down, FOB Manitowoc, WI 54220, freight prepaid.** Freight class 70.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIAL SERVICES

Special Carton Marking

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select electrical code.

DP	- Domestic - with cutouts
D1	- Domestic, 1 side w/cutouts

Ⓓ Select bezel color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓖ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.
F - Flat trim (std)
N - No topcap

Ⓒ Select electrical code.
DP - Domestic - with cutouts

Ⓓ Select bezel color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓖ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing
If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIAL SERVICES

Special Carton Marking

With specially marked information N/C

Shipping

Ships **knocked down, FOB Manitowoc, WI 54220, freight prepaid.** Freight class 70.

Specifications and prices are subject to change without prior notice.

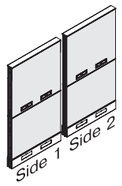
Preconfigured Segmented Fabric Panel w/Beltway Power

Standard Base Raceway

Preconfigured Segmented Fabric Panel w/Beltway Power

Standard Base Raceway



USFR

- Includes fabric tiles for both sides
- Upper and lower segments must be identically specified
- Standard base raceway on both sides accepts power and data cable distribution
- Above worksurface beltway accepts power and data cable distribution
- Panel assembly includes frame, trim, and panel-to-panel connectors
- Trim is metal and includes top cap, bottom trim channel, base raceway, and segment channel
- Side 1/side 2 finishes specified separately
- 30-72" wide panels each feature two power knockouts at base and two knockouts with bezels at beltway per side
- 24" wide panels each feature one power knockout and one knockout with bezel at beltway per side
- 72" wide panels feature split tiles
- Electrical components are specified separately

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select electrical code.

DP	- Domestic - with cutouts
D1	- Domestic, 1 side w/cutouts

Ⓓ Select bezel color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓖ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIAL SERVICES

Special Carton Marking

With specially marked information N/C

Shipping

Ships **knocked down, FOB Manitowoc, WI 54220, freight prepaid.** Freight class 70.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select electrical code.

DP	- Domestic - with cutouts

Ⓓ Select bezel color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓖ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————-
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————-
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

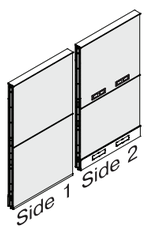
Preconfigured Segmented Fabric Panel w/Beltway Power

Tile-to-Floor One Side; Standard Base Raceway One Side

Preconfigured Segmented Fabric Panel w/Beltway Power

Tile-to-Floor One Side; Standard Base Raceway One Side



USFT

Segmented Fabric Panel - 64"H

- Side 1: tile-to-floor base does not accept cable distribution at base or beltway
- Side 2: standard base raceway and above-worksurface beltway accept cable distribution
- Includes segmented fabric tiles for both sides
- Upper and lower segments must be identically specified
- Panel assembly includes frame, trim, and panel-to-panel connectors
- Trim is metal and includes top cap, bottom trim channel, base raceway, and segment channel
- Side 1 and side 2 finishes are specified separately
- Side 2: 30-72" wide tiles feature two base power knockouts and two beltway power knockouts with bezels
- Side 2: 24" wide tiles feature one base and one beltway power knockout with bezel
- 72" wide panels feature split tiles
- Electrical components are specified separately

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select steel bottom color side 1.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓕ Select steel bottom color side 2.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————-
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————-
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

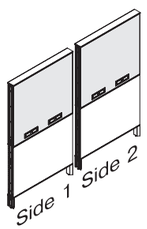
Preconfigured Segmented Steel Panels w/Fabric Top Tiles Beltway/Power

Elevated Base

Preconfigured Segmented Steel Panels w/Fabric Top Tiles Beltway/Power

Elevated Base



USFL

Segmented Steel Panel - 40"H

- Includes segmented tiles with steel lower and fabric upper segments for both sides
- 30-72" wide tiles each feature two power knockouts with bezels at above-worksurface beltway
- 24" wide tiles each feature one power knockout with bezel at above-worksurface beltway
- Elevated base does not accept cable distribution
- Panel assembly includes frame, trim, and panel-to-panel connectors
- Trim is metal and includes top cap, bottom trim channel, segment channel and foot shroud
- Side 1 and side 2 finishes are specified separately
- 72" wide panels feature split tiles

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
_____-
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
_____-
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select glass color.

GLA	- Clear (std)
GLC	- White laminate
GLV	- Satin etch one side

See pricing column for glass upcharge.

Ⓔ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓕ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

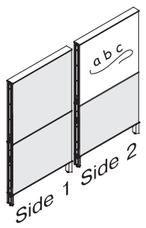
Elevated Base

Preconfigured Segmented Fabric Panel w/Markerboard on One Side

Elevated Base



USFL

- Side 1: includes segmented tiles with identically specified fabric lower and upper segments
- Side 2: includes segmented tiles with fabric lower segments and steel markerboard upper segments
- Elevated base does not accept cable distribution
- Panel assembly includes frame, trim, and panel-to-panel connectors
- Trim is metal and includes top cap, bottom trim channel, segment channel, and foot shroud
- Side 1 and side 2 finishes are specified separately
- 72" wide panels feature split tiles

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:
- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

SPECIAL SERVICES

Special Carton Marking

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:
- The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓔ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————-
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————-
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select trim and frame color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select perforated steel paint color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓕ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select top cap style.

F	- Flat trim (std)
N	- No topcap

Ⓒ Select electrical code.

CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
DP	- Domestic - with cutouts
C1	- Chicago, 1 side w/cutouts
D1	- Domestic, 1 side w/cutouts

Ⓓ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select paint finish for slat wall section.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓖ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select top cap style.

F	- Flat trim (std)
N	- No topcap

C Select trim color.
Refer to the **Product Color Options** page in this price list.

D Select paint finish for slat wall section side 1.
Refer to the **Product Color Options** page in this price list.

E Select fabric side 1.
Refer to **ki.com/fabrics**

F Select paint finish for slat wall section side 2.
Refer to the **Product Color Options** page in this price list.

G Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

UPHOLSTERY INFORMATION

Fabric Mixing
If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Unite® Rolling Door
General Information

Plan View of Rolling Door Applications

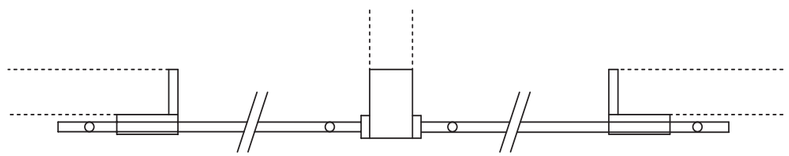
No Jamb Condition (URDNJ)

180° Inline Condition (URD180)

90° Intersection Condition (URD90)

Plan View of Rolling Door Applications

Dead End Condition (URDDE)



Double Dead End Condition (URDDDE)

Building Wall Condition (URDBW)

GENERAL INFORMATION
Unite Rolling Doors allow for simple privacy in workstation, and are offered with or without a jamb closure. Doors without a closing jamb simply over-lap the external corner of the closing panel intersection condition. Doors with jambs are shipped with a jamb post and a jamb rail (a receiver where the door can nest there by providing additional privacy).

Sizes
Rolling Doors are offered in the following sizes:
36"w X 64"h (monolithic door core)
36"w X 80"h (segmented door core)
42"w X 64"h (monolithic door core)
42"w X 80"h (segmented door core)
The width dimension provided indicates the nominal opening width that the door will span, and the actual door is oversized to allow for panel overlap. 64" high doors are constructed with a single aluminum frame. 80" high doors have a 16" high segmented top section to correspond to a 16" high Unite® stacking section.

Panel Attachment and Specification
The panel to which a Rolling Door is attached must be specified the same width or wider than the nominal Rolling Door model (i.e. 36"w door with 36" or wider attach panel). The "No Jamb" model (URDNJ) must be specified with a 6" or wider attaching panel (i.e. 36"w model with 42"w or wider attaching panel). This prevents the door from extending open into an adjacent walkway. This rule is not required if the attaching panel is a member of a panel run.

Door Height Options
80" high Rolling Doors feature a 16" segmented top frame. The top segment of the door is consistent with a 16" panel stacking section on the Unite® panel. 64" Rolling Door models are monolithic and do not feature any segmentation.

Cores
Rolling doors are available with two optional core inserts that are designated as "clear" and "opal". The insert material is the same and complements KI All Terrain® screens. The insert material is a horizontally fluted
Polycarbonate sheet. Both cores are semi-transparent and provide basic privacy while allowing light to penetrate into the office space. The opal core is less transparent than the clear.

Handedness of Models
All Rolling Door models are "non-handed". Wheel assemblies are packaged separately from the door for unilateral application. Jamb post assemblies are reversible for right or left side assembly.

Planning Options
Rolling doors can be ordered after a job site has been installed (reconfiguration) or space planned in advance of job site installation. If planned in advance, standard Unite® intersections will be replaced with jamb post intersections. If a job site is reconfigured after installation, standard intersections must be removed and replaced with the appropriate jamb post assembly. The exception is with the "no-jamb" condition which does not require a closing jamb intersection.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Cabinet is fully assembled
Door stores above top of cabinet
Will accept hanging tool rail and tackboards
(Attachment bar ordered separately)

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

TECHNICAL SPECIFICATIONS

Screens

Polyester Felt Screens
The polyester felt screen panels are constructed from $^1/_2$" thick tackable, 100% polyester felt and are available in a variety of colors. The panels have a density of 0.5 lb/ft^2 and are sound absorbing with an acoustic rating of 0.45-0.90 NRC. The panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Universal Screens are offered as both privacy screens at the back of a tabletop and as divider screens, mounted to the side. Standard adjustable screens are 24" and 31" high by 23", 29", 35", 46", 52", 58", 64", 70" and 82" wide. Standard fixed-height privacy screens are 24" and 31" high, and a fixed-height privacy screen & modesty panel is 29" high by 23", 29", 35", 46", 52", 58", 64", 70" and 82" wide.

Upholstered Screens
The upholstered screen panels are constructed from $^1/_2$" thick tackable, low density fiberboard and are available in a variety of colors. The panels have a density of 21.84 lb/ft^3. The panels meet a FSC Mix Credit Certification (FSC-C081621) for Sustainability. Universal Screens are offered as both privacy screens at the back of a tabletop and as divider screens, mounted to the side. Standard adjustable screens are 24" and 31" high by 23", 29", 35", 46", 52", 58", 64", 70" and 82" wide. Standard fixed-height privacy screens are 24" and 31" high, and a fixed-height privacy screen & modesty panel is 29" high by 23", 29", 35", 46", 52", 58", 64", 70" and 82" wide.

Brackets

Adjustable Mechanisms
Screen sizes from 23" to 46" wide will assemble with two adjustable mechanisms per screen, while the 52" to 82" screen sizes will have three adjustable mechanisms per screen assembly. The mounting brackets of the mechanisms, made of 14-gauge cold rolled steel, and the vertical rail made of cast aluminum, have powder-coated finishes. Glide plates made from molded Derlin smoothly guide the vertical rails up and down. Nylon pinion gears are housed within each mechanism and ride along the vertical rails. All gears per screen assembly are synchronized with one another using steel connecting rods to keep all mechanisms aligned. Each mechanism includes a constant force spring to counterbalance the screen panel at infinite positions with the allowed up and down travel of the mechanisms. Screen panels are fastened to the adjustable mechanisms by two stainless steel knurled thumb screws per mechanism.

Fixed-Height Brackets
Screen sizes from 23" to 46"" wide will assemble with two fixed-height brackets per screen, while the 52" to 82" screen sizes will have three fixed-height brackets per screen assembly. The mounting brackets are made of 11-gauge cold rolled steel with pressed steel inserts for fastening. Brackets are finished with a powder-coat finish for durability. Screens are fastened to the fixed-height brackets using two stainless steel knurled thumb screws per bracket.

PRIVACY & DIVIDER SCREEN SELECTION TABLES

Universal Screens may be ordered as privacy screens or as divider screens. Reference the following tables to specify the privacy screen and/or divider screen for all applicable Pirouette, WorkUp, and Toggle table models. The tabletops, per each "table model" below will have appropriate pre-drilled holes to accept the Universal Privacy Screen and/or Divider Screen Model listed across from the table model. Height-adjustable screen models (USPFXXXX and USFAXXXX) are available with 24 and 31" high screens, while fixed-height models (USPFXXXXF and USFAXXXXF) are available with 24" and 31" privacy and 29" high privacy screen & modesty panel.

U-Series®
General Information

GENERAL INFORMATION

U-Series® is an active and accessible storage collection designed to augment KI Systems offerings and provide more relevant and cost-effective workstations for applications within each of KI's vertical markets.

The U-Series® collection includes lateral files, freestanding, mobile and worksurface-supporting pedestals, double pedestals, credenzas, wardrobe tower cabinet units, wardrobe tower side-access bookcase units, overheads, and related accessories. Nominal and actual dimensions are listed with each item to the nearest 1/16 inch.

All U-Series storage models meet or exceed ANSI/BIFMA X5.9-2004 standards.

CONSTRUCTION AND STANDARD FEATURES

All U-Series® storage units are constructed of steel. Box and file drawers feature smooth riding, ball-bearing slides. Box drawers feature a three-quarter travel. File drawers feature a full extension. Units feature ADA-compliant nickel-plated loop pulls.

Glides
Freestanding pedestals feature non-adjustable glides which allow units to match the height of mobile units. Credenzas feature 1-1/2"glides with 1" adjustment range. Worksurface-supporting pedestals, double pedestals, and wardrobe towers feature 2-1/2" glides with a 1" adjustment range.

Locks
Locks are standard on all storage units except for certain binder tower units (see binder tower general information). Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers are available to order). Note that units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:
- Lock Core/Keys - Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key - Single key which opens any P-Series lock.
- Extractor Key - Single key which extracts any P-Series lock core.
- Blank Key - Single uncut P-Series key to be cut as required by locksmith.
- Cut Key - 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs
3 keyed alike
10 keyed alike
17 keyed alike

Paint
All inside and outside shell and front surfaces are electrostatically powder coated.

Lateral Files
Lateral files are offered with 12" drawers and receding doors, in three widths: 30", 36", and 42". Refer to pricelist for standard configurations. Uprights and top and bottom reinforcements are welded into rigid boxframe. Seamless back and top feature reinforced corners.

Optional laminate tops are available.

Pedestals
Mobile, freestanding and worksurface supporting units are offered in box/box/file and file/file drawer configurations. Mobile units are also available in a box/file configuration. Pedestals are shipped for front-to-back letter-sized filing. Pencil tray, if desired, is specified separately. Worksurface-supporting pedestals are used to support worksurfaces in panel-wrapped applications. Cantilevers or other supports are not required at the end of a worksurface supported by a pedestal, but finishing brackets may be specified to fill the space between the back of the pedestal and a panel if desired.

A counterbalance weight is included in file/file mobile and freestanding units for stability. A counterbalance weight may be required in worksurface supporting file/file pedestals depending on the desk configuration.

Optional laminate tops are available.

Double-Wide Pedestals
Worksurface-supporting double wide pedestals are used to support worksurfaces in panel-wrapped applications. Units feature two 12" drawers with side-to-side hanging folder bars. Double wide pedestals may be specified at return conditions but not be specified in place of panel returns.

Credenzas
Each freestanding credenza features a single sliding door with lock that spans approximately half of the width of the credenza. Bottom shelf is sufficiently sized to hold binders. Top shelf is non-adjustable. Bottom of unit features adjustable glides.

Wardrobe Towers
Wardrobe towers are stand-alone storage units. Wardrobe/cabinet units feature a pedestal in file/file or box/box/file configuration, a full vertical height wardrobe with coat hook, and a storage cabinet with an adjustable shelf.

Wardrobe/side-access bookcase units feature a pedestal in file/file or box/box/file configuration, a full vertical height wardrobe with coat hook, and an open bookcase with one adjustable shelf. Pedestal aesthetic matches wardrobe pedestal.

The handedness of a wardrobe tower is determined by the location of the wardrobe unit. A right unit features the wardrobe on the right side of the unit.

Sliding Door Overhead and Underhead Storage
Overhead and underhead units each feature a single sliding door with lock. Door spans approximately half the width of the unit. Slide mechanism uses four wheeled rollers. Units are sufficiently sized to house upright standard binders.

Information

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

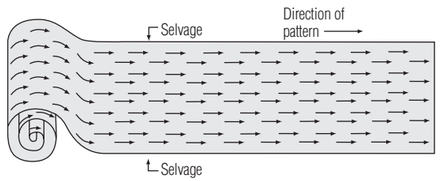

Diagram A

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

C.O.M. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Fabric Panel - Tackable Acoustic - 3/4” Thick Tiles

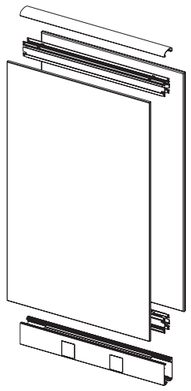
Face Styles

Fabric Panel - Tackable Acoustic - 3/4” Thick Tiles

Face Styles

Face Style: Monolithic

Basic Model: PMMA



Monolithic panels consist of a single tile. Base is 6". Panel thickness: 3½".

The ¾" Tackable/Acoustic tile consists of a ½" thick mineral board core with a ¼" thick fiberglass overlay.
Each tile is framed on all four sides with steel. Fabric is glued to the steel frame on the back of the tile.

STANDARD PANEL SIZES (Fabric–Acoustic)

	12" W	18" W	24" W	30" W	36" W	42" W	48" W	54" W	60" W	Side 1 Number of 12" Fabric Tiles	Side 2 Number of 12" Fabric Tiles

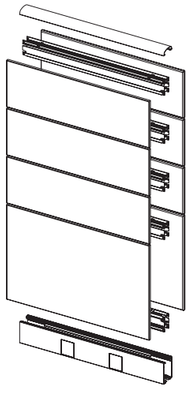
84" H	•	•	•	•	•	•	•	•	•	N/A	N/A

Face Style: Half Segmented

Basic Model: PHHA



Half Segmented panels consist of the following: 24" fabric tile on bottom, 12" segmented tiles on top.
Quantity of 12" tiles is dependent upon panel height. Base is 6". Panel thickness: 3½".
*84" high panels include one 18" tile on top.

The ¾" Tackable/Acoustic tile consists of a ½" thick mineral board core with a ¼" thick fiberglass overlay.
Each tile is framed on all four sides with steel. Fabric is glued to the steel frame on the back of the tile.

STANDARD PANEL SIZES (Fabric–Acoustic)

	12" W	18" W	24" W	30" W	36" W	42" W	48" W	54" W	60" W	Side 1 Number of 12" Fabric Tiles	Side 2 Number of 12" Fabric Tiles

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

Ⓒ Select horizontal rail.

E	- Enhanced
S	- Standard

Ⓓ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓔ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓕ Select fabric side 2.
Refer to **ki.com/fabrics**

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

Ⓒ Select horizontal rail.

E	- Enhanced
S	- Standard

Ⓓ Select numbers of raceway tiles side 1

R0	- Side 1 w/no raceway tile

Ⓔ Select numbers of raceway tiles side 2

R20	- Side 2 w/no raceway tile
R21	- Side 2 w/1-12" raceway tile; add $43
R22	- Side 2 w/2-12" raceway tiles; add $87

Ⓕ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓖ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓗ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

Ⓒ Select horizontal rail.

S	- Standard
E	- Enhanced

Ⓓ Select numbers of raceway tiles side 1

R0	- Side 1 w/no raceway tile
R1	- Side 1 w/1-12" raceway tile; add $43
R2	- Side 1 w/2-12" raceway tiles; add $87

Ⓔ Select numbers of raceway tiles side 2

R20	- Side 2 w/no raceway tile
R21	- Side 2 w/1-12" raceway tile; add $43
R22	- Side 2 w/2-12" raceway tiles; add $87

Ⓕ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓖ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓗ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

INFORMATION

Maximum Raceway Tile Possibilities

Panel Height	Side 1	Side 2
42"H	1	1
54"H	2	2
66"H	2	2
84"H	2	2

SPECIAL SERVICES

Special Carton Marking

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

Ⓒ Select horizontal rail.

E	- Enhanced
S	- Standard

Ⓓ Select numbers of raceway tiles side 1

R0	- Side 1 w/no raceway tile
R1	- Side 1 w/1-12" raceway tile; add $43
R2	- Side 1 w/2-12" raceway tiles; add $87

Ⓔ Select numbers of raceway tiles side 2

R20	- Side 2 w/no raceway tile
R21	- Side 2 w/1-12" raceway tile; add $43
R22	- Side 2 w/2-12" raceway tiles; add $87
R23	- Side 2 w/3-12" raceway tiles; add $129

Ⓕ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓖ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓗ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

Ⓒ Select horizontal rail.

E	- Enhanced
S	- Standard

Ⓓ Select glass color.

BRZ	- Tinted/Bronze
GLA	- Clear
GLC	- White Laminate

Ⓔ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

Ⓒ Select horizontal rail.

E	- Enhanced
S	- Standard

Ⓓ Select numbers of raceway tiles side 1

R0	- Side 1 w/no raceway tile

Ⓔ Select numbers of raceway tiles side 2

R20	- Side 2 w/no raceway tile
R21	- Side 2 w/1-12" raceway tile; add $43

Ⓕ Select glass color.

GLA	- Clear
BRZ	- Tinted/Bronze
GLC	- White laminate

See pricing columns for glass upcharge.

Ⓖ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓗ Select fabric side 1.
Refer to **ki.com/fabrics**

Ⓘ Select fabric side 2.
Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select electrical code for base raceway.

CN	- Chicago, no cutouts
C1	- Chicago, 1 side w/cutouts
CP	- Chicago, 2 sides w/cutouts
DN	- Domestic, no cutouts
D1	- Domestic, 1 side w/cutouts
D	- Domestic, 2 sides w/cutouts

C Select horizontal rail.

E	- Enhanced
S	- Standard

D Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

SPECIAL SERVICES

Special Carton Marking

With specially marked information N/C

Shipping

Ships **knocked down, FOB Pembroke, ON K8A 0E1, freight prepaid.** Freight class 70.

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————-
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————-
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Refer to **ki.com/fabrics**

UPHOLSTERY INFORMATION

Fabric Mixing

If fabric is ordered from one group on side 1 and another group on side 2, calculate list price using the following method:

Example:
-Grade 2 Fabric
-Grade 1 Fabric
———————
Upcharge

Upcharge/2 = Cost for one side

Grade 1 Fabric
+Cost for one side
———————
Combined list price

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select assembly.

F	- Fully Assembled; add $102
U	- Unassembled

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓓ Select fabric color.
Refer to **ki.com/fabrics**

SPECIAL SERVICES

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓒ Select fabric color.
Refer to **ki.com/fabrics**

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
KN	- Knife edge
PL	- Postformed edge
WL	- Wood edge, laminate surface
WV	- Wood edge, veneer surface

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓓ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select grommet location.

N	- No grommet
L	- Grommet : left; add $57
C	- Grommet : Center; add $57
R	- Grommet : right; add $57
LR	- Grommet : left/right; add $120
LC	- Grommet: left/center; add $120
CR	- Grommet: center/right; add $120
LCR	- Grommet : left/center/right; add $174

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select surface direction.

DL	- Direction left
DR	- Direction right

Direction is determined by the side of the worksurface that adjoins an adjacent worksurface.

Ⓒ Select notch type.

S	- Notch for standard trim
F	- Notch for flat aluminum trim

Ⓓ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
KN	- Knife edge
WL	- Wood edge, laminate surface
WV	- Wood edge, veneer surface

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet color.
Refer to the **Product Color Options** page in this price list.
Grommet color for 'Conference End Worksurfaces' is for "Notch for standard trim**" only.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select notch location.

S	- Standard
LS	- Left notch for std trim
RS	- Right notch for std trim
BS	- Both notches for std trim
LF	- Left notch for flat trim
RF	- Right notch for flat trim
BF	- Both notches for flat trim

For notch location of “LS, RS, BS”, the notch has a grommet and will require a separate grommet color selection

Ⓒ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
PL	- Postformed edge
KN	- Knife edge
WL	- Wood edge, laminate surface
WV	- Wood edge, veneer surface

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select trim color.
Refer to the **Product Color Options** page in this price list.
Metallic finish not available.

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select grommet color.
For notch location of “LS, RS, BS”, the notch has a grommet and will require a separate grommet color selection, otherwise there is no grommet color selection
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge

Ⓒ Select height.

9	- 29" high

Ⓓ Select trim color (edge/grommet/support bracket).
Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓕ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

True® Desking	•	•	•

SPECIFICATIONS

Cabinet Construction
The overhead cabinet shall be assembled complete and powder-coated in widths of 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 17" high and 16-1/2" deep. The shelf depth shall be 13-1/2". Inside height shall allow for oversize binders, such as Folscap and A4, to be stored vertically. The cabinet top, bottom, and shelf shall be fabricated from 18-gauge steel. Side panels shall be fabricated from 14-gauge steel and attached via resistance welding. Cabinet top, bottom, and shelf shall contain reinforcements fabricated from 18-gauge steel and attached via resistance welding. Pins for door and shroud attachement shall be fabricated from 3/8" diameter steel and attached via resistance welding. Shroud will be black only. All accessible or visible edges shall be smooth and rounded.

Door Construction
The upper door shall be available in colored or translucent extruded rigid polypropylene with spattercoat finish, fabric or laminate applied. The overall door thickness shall be 3/8" with a .075 wall thickness. The door shall be capped with polycarbonate endcaps and attached to the case with polycarbonate arms. A center lock mechanism will be utilized between the upper and lower doors for security. The lower door shall be an aluminum extrusion with a powder-coat finish. The lower door shall have a .075 thickness and be ergonomic in design. The door shall be capped and attached to the case with polycarbonate arms.

Door Operation
The overhead cabinet doors shall be effortlessly operated from either a seated or standing position through use of the upper door or lower door. The upper door and lower door shall be synchronized in motion through the use of two 10-guage linkages. The doors shall be assisted with two extension springs and require less than 5 pounds of force to operate. Either door shall be opened or closed with a closed fist. The upper door shall open over the outside of case.

Cabinet Installation
The overhead cabinet shall include separate mounting brackets that allow for assembly to panels or desk systems. The brackets shall be attached to the back of the overhead via a hook and groove system and two screw fasteners. The hook and groove system shall allow the installer to assemble brackets to a panel before attaching to overhead. The desk supports shall attach to the bottom of overhead via four screw fasteners.

Task Lights
Task lights shall be available which suspend from the underside of the cabinet. The task light shall mount flush with the underside of the overhead cabinet via two cantilever brackets. Task light shall be offered fully assembled in black only. The task light shall have an 8' long cord with three-prong grounded plug, and be available in three versions; standard high-power factor ballast, variable (high/low) high-power factor ballast, and electronic ballast. All three options shall include a cool white lamp. Chords shall be routed into and through wire trough located at rear underside of cabinet shelf. Installation and removal shall be accomplished without the use of tools or fasteners.

Shelf Dividers
Shelf dividers shall be powder-coated, 18-gauge steel and offered in the same color as the overhead case. Installation and removal shall be accomplished without the use of tools or fasteners.

Tackboard/Tool Rail Mounting Bar
A powder-coated, 14-gauge bracket shall be available for the attachment of a hanging tool rail or tackboard to the underside of the overhead. The bracket shall be specified in the same widths as the overhead and is offered in the same colors as the overhead case.

Overhead Hanging Tackboard
Tackboards shall be available in 12" height and in 24", 30", 36", 42", 48", 54", and 60" widths. The tackboard shall be constructed of 3/4" industrial insulation board covered with fabric. The mounting brackets shall be steel powder-coated and attached to the coreboard with T-nuts and machine screws. Fabric shall be attached to the coreboard with staples. A mounting bracket bar is required to attach the tackboard to the overhead cabinet.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select cabinet paint color.
Refer to the **Product Color Options** page in this price list.

Ⓒ Select upper door color.
Refer to the **Product Color Options** page in this price list.

Ⓓ Select lock option.

KA	- Key alike
KS	- Key standard
NLC	- No lock core

Ⓔ Select lock color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Painted cabinet and lower door
Shelf dividers available separately
Cabinet is fully assembled
Door stores above top of cabinet
Will accept hanging tool rail and tackboards
(Attachment bar ordered separately)

SPECIAL SERVICES

Special Carton Marking

With specially marked information N/C

Shipping

Ships **assembled, FOB Manitowoc, WI 54220, freight prepaid.** Freight class 77.5.

Specifications and prices are subject to change without prior notice.

Ⓔ Select lock option.

KA	- Key alike
KS	- Key standard
NLC	- No lock core

Ⓕ Select lock color.
Refer to the **Product Color Options** page in this price list.

INFORMATION

Painted cabinet and lower door
Shelf dividers available separately
Cabinet is fully assembled
Door stores above top of cabinet
Will accept hanging tool rail and tackboards
(Attachment bar ordered separately)

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

74P	- 74P edge
KN	- Knife edge
WL	- Wood edge, laminate surface
WV	- Wood edge, veneer surface

Ⓒ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓓ Select trim color.
Refer to the **Product Color Options** page in this price list.

Ⓔ Select wood edge color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select wood veneer color.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓒ Select fabric color.
Refer to **ki.com/fabrics**

INFORMATION

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select assembly.

F	- Fully Assembled; add $124
U	- Unassembled

Ⓒ Select trim color.
Refer to the **Product Color Options** page in this price list.
SX Starlight Silver finish is only offered on flat aluminum trim.

Ⓓ Select fabric color.
Refer to **ki.com/fabrics**

INFORMATION

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

WorkUp® Tables
General Information

CRANK TABLE

General
The table shall consist of two adjustable height T bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface shall adjust between 27.11" and 44.83" from the floor by means of a horizontal crank that can be located at either end of the table. Adjusts at a rate of 6-1/3 turns per inch. A ¾" diameter steel connecting rod shall span from column to column to enable simultaneous adjustment of both columns.

Base
The base shall consist of a column assembly and foot both finished with baked on 30 sheen powder coat paint. The column assembly shall consist of an outer member and an inner member. The outer member shall be 2-3/4" square 14-gauge steel tubing with a ¼" steel plate welded on the bottom end. The inner member shall be 2-1/2" square 14 gauge steel tubing with a ¼" steel plate welded on the top end. The foot shall consist of two formed and welded 11-gauge steel components. The foot shall be attached to the column with 8mm bolts. Two 1-1/2" diameter nylon base leveling glides shall
be threaded into the foot.

Worksurface Support
The worksurface support shall be formed 11-gauge steel support members with ¼" steel attachment plates. The worksurface support shall be attached to the column with 8mm bolts.

Worksurface
Worksurfaces shall be constructed with 1-1/8" thick 45 lb. density particle board core. The top surface shall be covered with high-pressure laminate. The bottom surface shall be covered with a phenolic backing sheet. The perimeter shall be finished using high impact plastic edging. The worksurface shall be pre-drilled and attached to the bases using (16) #12 X 1" tapping screws. All Knife (KN) edge styles will use an M3 particle board composition. The undersurface edge is sanded, stained and sealed. Knife (KN) edge and Postformed (PL) edge options will only get these edges on the user side of the table.

FIXED TABLE

General
The table shall consist of two T bases (centered column on a horizontal foot) supporting a worksurface. The top of the worksurface shall be 29" from the floor. See back page for top sizes.

Base
The base shall consist of a top plate, column and foot all finished with baked on 30 sheen powder coat paint. The top plate shall be ¼" thick steel. The column shall be 2-3/4" square 14-gauge steel tubing with ¼" steel plates welded on each end. The foot shall consist of two formed and welded 11-gauge steel components. The top plate and foot shall be attached to the column with 8mm bolts. Two 1-1/2" diameter nylon base leveling glides shall be threaded into the foot.

Worksurface
Worksurfaces shall be constructed with 1-1/8" thick 45 lb. density particle board core. The top surface shall be covered with high-pressure laminate. The bottom surface shall be covered with a phenolic backing sheet. The perimeter shall be finished using high impact plastic edging. The worksurface shall be pre-drilled and attached to the bases using (16) #12 X 1" tapping screws. All Knife (KN) edge styles will use an M3 particle board composition. The undersurface edge is sanded and sealed. Knife (KN) edge and Postformed (PL) edge options will only get these edges on the user side of the table.

ANSI HFES TABLE

General
The table shall consist of two adjustable height T bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface shall adjust between 22.35" and 48.33" from the floor by means of electric controls that can be located at either end of the table.

Base
The base shall consist of a column assembly and foot both finished with baked on 30 sheen powder coat paint. The column assembly shall consist of an outer member, an intermediate member and an inner member. The outer member shall be 2-3/4" square 14-gauge steel tubing with a ¼" steel plate welded on the bottom end. The intermediate member shall be 2-1/2" square 14-gauge steel tubing. The inner member shall be 2-1/4" square 14-gauge steel tubing with a ¼" steel plate welded on the top end. The foot shall consist of two formed and welded 11-gauge steel components. The foot shall be attached to the column with 8mm bolts. Two 1-1/2" diameter nylon base leveling glides shall be threaded into the foot.

Worksurface Support
The worksurface support shall be formed 11-gauge steel support members with ¼" steel attachment plates. The worksurface support shall be attached to the column with 8mm bolts.

Worksurface
Worksurfaces shall be constructed with 1-1/8" thick 45 lb. density particle board core. The top surface shall be covered with high-pressure laminate. The bottom surface shall be covered with a phenolic backing sheet. The perimeter shall be finished using high impact plastic edging. The worksurface shall be pre-drilled and attached to the bases using (16) #12 X 1" tapping screws. All Knife (KN) edge styles will use an M3 particle board composition. The undersurface edge is sanded and sealed. Knife (KN) edge and Postformed (PL) edge options will only get these edges on the user side of the table.

Wire Trough
The wire trough is an optional accessory which must be ordered separately. Constructed of 18-gauge steel with a powder-coated finish which may be coordinated to match the color of the table legs. Screws are provided for attachment to the underside of the tabletop, and tops are pre-drilled for wire trough locations. Wire troughs are available on all models.

Polyester Felt Modesty Panel
Modesty panels are constructed from a sound-absorbing, 100% polyester felt with an acoustic rating of 0.45-0.90 NRC. The panel is 1/2" thick with a density of .05 lb/ft. Panels are in accordance with ASTM-E84 and achieve a Class A Flame Spread. Standard sizes are 9.25" high by 34.5", 40.5", 46.5", 52.5", 58.5", 64.5", and 70.5" wide. The mounting brackets are 18-gauge steel and attached to the work surface by 2 steel screws. Panels 34.5", 40.5" and 46.5" wide all use 2 brackets per panel. Panels 52.5", 58.5", 64.5", and 70.5" wide all use 3 brackets per panel.

WorkZone® General Information
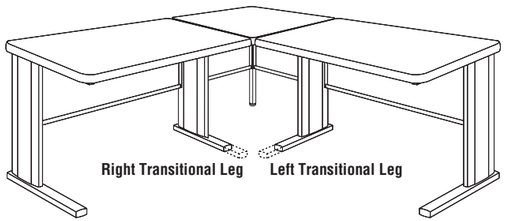
Basic Worksurfaces

Basic Worksurfaces (WBW)

Adjustable Keyboard Pad Worksurfaces (WAK)

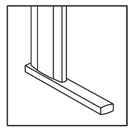
Transitional Worksurfaces (WCT)

Features			
Solid core top	•	•	•
Plastic laminate surface	•	•	•
Flat vinyl T-edge	•	•	•
Postformed edge	•		•
74P edge	•	•	•
Elliptical postformed edge	•		•
Powder-coated legs	•	•	•
Seam-welded tubular steel frame	•	•	•
Chrome plated glides	•	•	•

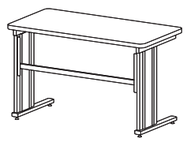


Right Transitional Leg Left Transitional Leg

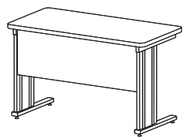
Transitional Leg
Transitional leg bases are 6 inches shorter than standard leg bases for greater leg room and chair clearance when two surfaces are joined. When seated at the worksurface, "right" or "left" refers to the individual worksurface, not the assembled workstation. Cannot be ordered for an individual, free-standing worksurface.



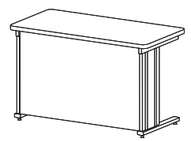
Streamline Leg



Beam Frame



Modesty Panel Frame



Full Modesty Panel Frame

SPECIFICATIONS

Worksurface Frames
Heavy-gauge seam-welded tubular steel. Horizontal tabletop support tube, 16-ga., 1"x 1" steel. Floor support member, 16-ga., 1-1/8'x 1-3/4' belly rectangular steel tube. Top and floor support tubes are welded with 2 steel tube vertical leg members. The rear vertical support is 16-ga., 1"X2" steel tube. The front vertical support is 16-ga., 1"X2-1/8" bullet oval steel tube. Leg inserts enclose the space between the (2) vertical leg members and provide concealed management of wire from floor to worksurface. Leg inserts are extruded Polypropylene with sprayed clear acrylic scuff-resistant coating. Adjustable chrome-plated glides. Powder-coat finish on legs. There are three frame style options. The receptacle clearance beam option (WB) is a 16-ga., 1/2"x 1-1/2" steel tube cross brace, welded to two 14-ga., L-brackets for support. The modesty panel (WM) is 19-ga. steel. It is located 1-1/2" from the rear of the worksurface. The modesty panel is 15.31" on the 29" tables and 13.31" on 27" tables. The full height modesty panel (WF) is 19-ga. steel It is located 1-1/2" from the rear of the worksurface. The full modesty panel spans the space between the underside of the worksurface and the floor. It is only available on 29" height desks.

Worksurface Top
1-1/4" thick top, .030" high-pressure laminate top surface with .028" phenolic backing sheet. Available with flat-vinyl T-edge, 74P edge or 180° postformed and elliptical postformed front edge with .030" high pressure laminate and .028 phenolic backing sheet. Side and rear edges of postformed tops are finished with either .024" Polypropylene or .030" high-pressure laminate.

Surface Splice Plates
Die-formed steel splice plates attach to underside of units with screws. Two splice plates are provided with all surfaces. Standard connector plate provided when surfaces are of common height. Worksurface height change connector provided for connecting 29" to 27" high surfaces. Specify worksurface height change connector for connecting non-transitional worksurfaces of two different heights except when using T6 option..

Adjustable Keyboard Pad Worksurface
Die-formed L-brackets attach to table and keyboard pad with screws. Threaded hand knobs lock keyboard pad in position. Available with flat vinyl T-edge and 74P edge.

Weight Capacity
All WorkZone tables meet or exceed BIFMA 5.5 Standards. Please contact KI Customer Service for additional information.

Horizontal Wire Management Trough
Horizontal wire management trough (WW) connects below the worksurface top and is constructed of rigid Polypropylene with 1" deep by 1-1/2" high openings for cables.

Guest Modesty Panel
The Guest Modesty Panel for P Shaped, Piano, and Square Shoe, peninsula worksurfaces is constructed of 19-ga. steel. It is located 4.5" from the guest side of the peninsula worksurface and is attached using 6, #10-1" screws. It is 9" high and comes in lengths to fit 60" through 84" peninsula tops. Not for use with peninsula end and side mount worksurfaces.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

INFORMATION

Warranty
Refer to KI Terms & Conditions document or visit ki.com

WorkZone® General Information
WorkZone® with power

SPECIFICATIONS

PowerUp® Power/Data Module
The power/data module is inserted into a rectangular hole in the worksurface. The module has a flip-up cover and is 6-1/4" long x 3" wide x 2-1/2" high. It has one duplex receptacle (110 volts), dual data access and a power cord with a 3-prong plug. The cord is 108" long when used without 10-wire (NP) system and 22" long when used with 10-wire (T6) tables. Connections for phones, modems, printers and networks can be incorporated into the system, but must be ordered separately by the customer through a third party source. Communications wiring is completed in the field by the customer. Each unit ships with a data plate tree which provides holders for common jacks produced by AT&T, Panduit, and others. Contact KI Customer Service for more information. The single module is located at the rear right, rear left or center position of the worksurface widths 30" through 54". Two modules are available on 60", 66" and 72" wide rectangular surfaces and are located at the rear left and rear right position of the worksurface.

Data Door
The data door (WT) is constructed of rigid Polypropylene .06 wall thickness with a radius of 2-1/2". The door is 8" deep and 4-1/2" high. It attaches to the underside of the table top. The hanging bracket uses the same hole as the modesty panel and can also be used with WB option. Power and data cables are separated from each other by a 24-gauge steel divider that is 2" high by 2-3/4" deep. There is also space allowed for cord management. Available in black only.

Table-To-Table Wireway
The table-to-table wireway trough is a 16-gauge steel trough that attaches to the underside of the adjoining worksurface. The wireway is 3-3/4" deep by 4-1/4" wide. The wireway routes the 10-wire table-to-table connector and data wires between tables. The wire management trough also includes a splice plate that attaches the front of the adjoining tops together to prevent separation.

10-Wire 6-Circuit Pre-Wired Harness
Single sided, rigid 10-wire harness that holds two duplex receptacles (60", 66" and 72" wide tables provide access for up to four duplex receptacles). Harness contains 6 hot wire, 2 neutral wires an 2 ground wires and is commonly referred to as (6-2-2). The harness has mounting brackets to attach to the underside of the worksurface top with screws. The harness is 2-1/2" wide and the length of the harness varies with the size of the top. Power is obtained by use of the 10-wire Power Infeed Kit. Duplex receptacles are located under the worksurface are specified separately.

10-Wire Table-To-Table Connector
10-wire table-to-table connector consists of flexible mesh conduit which provides power connections from adjoining tables. The jumper is 17-3/4" long and is routed through the table-to-table wireway.

10-Wire Power Infeed Kit
The 10-wire infeed kit provides power from fixed, floor, or wall sources to the 10-wire harness. It includes six feet of plastic covered flexible conduit, and 3/4" waterproof 90° connector. Also included are two steel covers which replace the existing plastic vertical wireway.

UL Listed
The WorkZone® with PowerUp® System is listed to applicable UL standards and requirements by Underwriters Laboratories, Inc.

Two of the standards used to evaluate WorkZone® are UL/286 Office Furnishings and UL/723 Standard for Test for Surface Burning Characteristics of Building Materials.

The standard used to evaluate PowerUp® is UL 1363 Relocatable Power Taps.

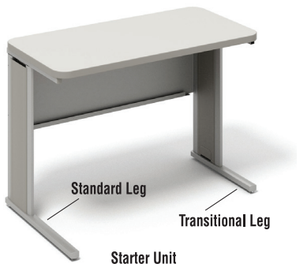
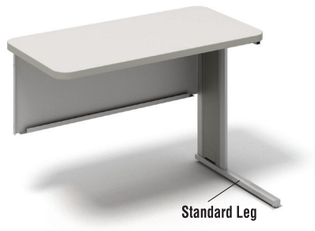
WorkZone® General Information
WorkZone® Shared Leg



Starter Unit

Adder Unit



Finisher Unit

Starter Unit - Each shared leg workplace requires a starter unite to be placed at one end of the table string. The starter unit is comprised of a worksurface, modesty panel, standard leg and transitional leg. Only one starter unit is required in a single table string.

All three units are joined together by the transitional legs, which are centered between the two worksurfaces and attach accordingly.

Adder Unit - When three or more tables make up a table string, an adder unit is used to make up the middle portion of the table string. The adder unit is comprised of a worksurface, modesty panel and transitional leg.

Finisher Unit - The final table specified in a table string is the finisher unit. This unit is comprised of a worksurface, modesty panel and a standard leg.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:
- The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select horizontal wireway.
Add upcharge to unit price for WW option.
- **NW** - No horizontal wireway
- **WW** - Wireway

C Select paint color.
Refer to the **Product Color Options** page in this price list.
Paint color includes pedestal.

D Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

E Select laminate surface.
Refer to the **Product Color Options** page in this price list.

F Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

G Select fabric for privacy screen.
Refer to **ki.com/fabrics**

H Select grommet option.
Grommets are required for overhead cabinet.
- **OGN** - No worksurface grommet
- **OGY** - Yes worksurface grommet

Grommets can be used for wire pass-through.

I Select pack option.
- **BP** - Blanket pack
- **CP** - Commercial pack

J Select grommet color.
Refer to the **Product Color Options** page in this price list.

K Select lock option.
- **KA** - Key alike
- **KS** - Key standard
- **NLC** - No lock core

The lock option is for the overhead. The pedestal is keyed as standard.

L Select lock color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
EP	- Elliptical postformed edge
PF	- Postformed edge

Ⓒ Select height.

7	- 27" high
9	- 29" High

Ⓓ Select horizontal wireway.
Add upcharge to unit price for WW option.

NW	- No horizontal wireway
WW	- Wireway

Ⓔ Select frame style.
Add upcharge to unit price for WF option.

WB	- w/Beam
WM	- w/Modesty panel
WF	- w/Full modesty panel

See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29" high only)

Ⓕ Select location and type of leg.

TS	- Standard legs
TL	- Transition leg (left)
TR	- Transition leg (right)
TB	- Transition leg (both)

Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "TB" option for both transitional legs is not available.

Ⓖ Select grommet option.
Grommets are required for overhead cabinet.

OGN	- No worksurface grommet
OGY	- Yes worksurface grommet

Grommets can be used for wire pass-through.

Ⓗ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

Ⓙ Select laminate surface.
Refer to the **Product Color Options** page in this price list.

Ⓚ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓛ Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Grommets are required for overhead cabinet.

OGN	- No worksurface grommet
OGY	- Yes worksurface grommet

Grommets can be used for wire pass-through.

H Select paint color.
Refer to the **Product Color Options** page in this price list.

I Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

J Select laminate surface.
Refer to the **Product Color Options** page in this price list.

K Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

L Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

- Not available with both (TB) transitional legs

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.
- **BN** - Flat vinyl T-edge
- **74P** - 74P edge

Ⓒ Select height.
- **7** - 27” high
- **9** - 29” High

Ⓓ Select horizontal wireway.
Add upcharge to unit price for WW option.
- **NW** - No horizontal wireway
- **WW** - Wireway

Ⓔ Select frame style.
Add upcharge to unit price for WF option.
- **WB** - w/ Beam
- **WM** - w/ Modesty panel
- **WF** - w/ Full modesty panel

See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29” high only)

Ⓕ Select location and type of leg.
- **TS** - Standard legs
- **TL** - Transition leg (left)
- **TR** - Transition leg (right)

Ⓖ Select grommet option.
Grommets are required for overhead cabinet.
- **OGN** - No worksurface grommet
- **OGY** - Yes worksurface grommet

Grommets can be used for wire pass-through.

Ⓗ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

Ⓙ Select laminate surface.
Refer to the **Product Color Options** page in this price list.

Ⓚ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓛ Select grommet color.

HOW TO BUILD A MODEL NUMBER

A Select basic model.

B Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge

C Select surface direction.

L	- Left
R	- Right

Direction is determined by the side of the worksurface that has the 3" diameter leg. Calculate side based on user's normal seated position.

D Select height.

9	- 29" high

E Select horizontal wireway.
Add upcharge to unit price for WW option.

NW	- No horizontal wireway
WW	- Wireway

F Select frame style.
Add upcharge to unit price for WF option.

WB	- w/ Beam
WM	- w/ Modesty panel
WF	- w/ Full modesty panel

See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29" high only)

G Select location and type of leg.

TS	- Standard legs
TL	- Transition leg (left)
TR	- Transition leg (right)
TB	- Transition leg (both)

Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "TB" option for both transitional legs is not available.

H Select grommet option.
Grommets are required for overhead cabinet.

OGN	- No worksurface grommet
OGY	- Yes worksurface grommet

Grommets can be used for wire pass-through.

I Select paint color.
Refer to the **Product Color Options** page in this price list.

J Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

K Select laminate surface.
Refer to the **Product Color Options** page in this price list.

L Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

M Select grommet color.
Refer to the **Product Color Options** page in this price list.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
• The absence of the □ indicates that no choice is required.
• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge

Ⓒ Select height.

9	- 29" high

Ⓓ Select frame style.
Add upcharge to unit price for WF option.

WB	- w/ Beam
WM	- w/ Modesty panel
WF	- w/ Full modesty panel

See pricing column for full modesty panel upcharge.

Ⓔ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓕ Select laminate surface.
Refer to the **Product Color Options** page in this price list.

Ⓖ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge

Ⓒ Select transition direction.

X	- None
L	- Left
R	- Right

Transition direction is determined from the originating 24" or 30" basic or keyboard pad worksurface. All square and rectangular transitional surfaces connected at the same height do not require Right (R) or Left (L) transition direction. Use "X" for transition direction. Transitional direction required for "97" transitional height.

Ⓓ Select transition height.

77	- 27" to 27" high
97	- 29" to 27" high
99	- 29" to 29" high

Ⓔ Select horizontal wireway.
Add upcharge to unit price for WW option.

NW	- No horizontal wireway
WW	- Wireway

Ⓕ Select frame style.
Add upcharge to unit price for WF option.

WM	- w/ Modesty panel
WF	- w/ Full modesty panel

See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29" high only)

Ⓖ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓗ Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

Ⓘ Select laminate surface.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
EP	- Elliptical postformed edge
PF	- Postformed edge

Ⓒ Select transition direction.

L	- Left
R	- Right

Transition direction is determined from the originating 24” or 30” basic or keyboard pad worksurface. When ordering an End-of-Run worksurface, the adjoining worksurface must have a transitional leg. Order a right or left transitional.

Ⓓ Select height.

7	- 27” high
9	- 29” High

Ⓔ Select horizontal wireway.
Add upcharge to unit price for WW option.

NW	- No horizontal wireway
WW	- Wireway

Ⓕ Select frame style.
Add upcharge to unit price for WF option.

WB	- w/ Beam
WM	- w/ Modesty panel
WF	- w/ Full modesty panel

See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29” high only)

Ⓖ Select grommet option.
Grommets are required for overhead cabinet.

OGN	- No worksurface grommet
OGY	- Yes worksurface grommet

Grommets can be used for wire pass-through.

Ⓗ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓘ Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes horizontal wireway (WW) if selected.

Ⓙ Select laminate surface.
Refer to the **Product Color Options** page in this price list.

Ⓚ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓛ Select grommet color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Overall height from worksurface to top of overhead is 36".
Overhead allows for 19 1/2" clearance from worksurface to underside fo shelf.

SPECIFICATIONS

Universal Overhead Cabinets
Overhead storage shall consist of overhead cabinet(s) and shelves. Overhead storage shall attach to worksurface with two overhead support stanchions for 30", 36", 42", 48", 54" and 60" sizes. Three overhead support stanchions for 66" and 72" sizes. 66"overheads shall consist of a 30" and 36" overhead combination. 72" overheads shall consist of a pair of 36" overheads.

Shelf dividers shall be powder-coated steel with installation and removal accomplished without the use of tools or fasteners.

Universal overheads and shelves shall be 17" high and shall have 19-1/2" clearance between the worksurface and the bottom of shelf. Overhead doors shall be available with painted steel, fabric, laminate, or veneer, with a Polypropylene extrusion handle. Locks shall be randomly assigned or keyed per customer requests. The end panels shall be constructed of 14-gauge steel and have self-locking mounting tabs formed into the back edge. The shelf, back, and top shall be constructed from 18-gauge steel.

Balance® Overhead Cabinets
Overhead storage shall consist of overhead cabinet. Overhead storage shall attach to worksurface with two overhead support stanchions for 30", 36", 42", 48", 54", 60", 66" and 72" sizes.

Shelf dividers shall be powder-coated steel with installation and removal accomplished without the use of tools or fasteners.

Balance® overheads shall be 17" high and have 19-1/2" clearance between the worksurface and the bottom of shelf. The upper door shall be available in colored or translucent extruded rigid Polypropylene with spatter-coat finish, fabric, or laminate applied. The overall door thickness shall be 3/8". The lower door shall be an aluminum extrusion and be ergonomic in design. A center lock mechanism shall be utilized between the upper and the lower doors for security. The overhead doors shall be effortlessly operated from either a seated or standing position through use of the upper or lower door. The upper door and lower door shall be synchronized in motion through the use of two 10-gauge linkages. The doors shall be assisted with two extension springs and require less than 5 pounds of force to operate. The upper door shall open over the outside of the case.

Privacy Screens (WZPR)
Two or three 1/8" cold rolled steel brackets, sandwiched between two 1/2" Gypsum boards joined together with industrial adhesive. The screens attach to the back of the worksurface with fasteners. Steel splice plates are used to align adjoining screens. Privacy screen is 19-1/2" high above worksurface.

Key Options
There are various key options available depending on the component model. The key alike option (KA) allows multiple components of a workstation to be keyed alike. The lock number can be specified. The key standard option (KS) allows each component to have its own randomly selected key number shipped with the individual component. The no lock core option (NLC) provides more flexibility in keying workstations alike. All locks and keys for the individual components specified with no lock core will be packaged separately from the components. The location of the lock core and corresponding numbered key will be determined upon installation.

Fabric
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

SPECIFICATIONS

Tool Rail
Aluminum extrusion tool rail, powder-coated finish. Attaches between overhead uprights. Consists of four slots to accept paper management components. To be used on WZUS,WZUF, WZUL, WUSS, BLCS, BLCL and BLCF models.

Paper Tray
Constructed of injection molded plastic. Tray measures 9-1/2" wide by 2" high by 14" deep and accomodates both letter and legal size documents. Includes three hooks to mount on tool rail.

Vertical Storage
Constructed of injection molded plastic. Holder measures 5" wide by 9" high and 10-1/2" deep. Includes two hooks to mount on tool rail.

Pencil Cup
Constructed of injection molded plastic. Cup measures 4" wide by 3" high by 3-1/2" deep for storage of pens, pencils and highlighters. Includes one hook to mount on tool rail.

Diagonal Storage
Constructed of injection molded plastic. Storage tray consists of three diagonal slats with black dividers to sort files or papers. Tray measures 7" wide by 2-1/2" high by 12-1/2" deep and includes three hooks to mount on tool rail.

Telephone Caddy
Constructed of injection molded plastic. Caddy measures 8-1/2" wide by 2" high by 9-1/2" deep. Includes adjustable rail to accomodate a phone up to 10-3/4" deep. Includes three hooks to mount on tool rail.

Accessory Tray
Constructed of injection molded plastic. Holder measures 9-1/2" wide by 2" high by 10" deep and includes three hooks to mount to tool rail. Tray includes six compartments for storage of supplies.

INFORMATION

ANSI Requirements
All fixed and adjustable tables meet or exceed ANSI/BIFMA 1998 requirements for desk products. The adjustable tables meet the ANSI/HFS 100-1988 standard for adjustability and knee clearance.

ADA Requirements
The tables meet the ADA specification for wheelchair access and height of surfaces.

SPECIFICATIONS

Letter Tray
20-ga. epoxy powder-coated steel, and plastic molded in color, then painted to assure color match. Steel and plastic joined permanently by sonic welding. Roll formed steel clip for component attachment to tool rail. ID clips included with tray.

Binder Bin
20-ga. epoxy powder-coated steel, and plastic molded in color, then painted to assure color match. Steel and plastic joined permanently by sonic welding. Roll formed steel clip for component attachment to tool rail. ID clips included with tray.

Slanted Storage
24-ga. epoxy powder-coated-steel, and plastic molded in color, then painted to assure color match. Steel and plastic joined permanently by sonic welding. Roll formed steel clip for component attachment to tool rail.

Key Options
There are various key options available depending on the component model. The key alike option (KA) allows multiple components of a workstation to be keyed alike. The lock number can be specified. The key standard option (KS) allows each component to have its own randomly selected key number shipped with the individual component. The no lock core option (NLC) provides more flexibility in keying workstations alike. All locks and keys for the individual components specified with no lock core will be packaged separately from the components. The location of the lock core and corresponding numbered key will be determined upon installation. Keys are P-Series.

INFORMATION

ANSI Requirements
All fixed and adjustable tables meet or exceed ANSI/BIFMA 1998 requirements for desk products. The adjustable tables meet the ANSI/HFS 100-1988 standard for adjustability and knee clearance.

ADA Requirements
The tables meet the ADA specification for wheelchair access and height of surfaces.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See “How To Build a Model Number”.
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
74P	- 74P edge
EP	- Elliptical postformed edge
PF	- Postformed edge

Ⓒ Select PowerUp® module location.

PUN	- No module
PUL	- Left module; add $148
PUR	- Right module; add $148
PUC	- Center module; add $148
PUB	- Both left and right modules; add $297

PUB option only available on 60”, 66” and 72” wide worksurfaces. PUC option: Overhead storage is not available on 66” or 72” basic WorkZone worksurfaces with center location PowerUp modules.

Ⓓ Select height.

7	- 27” high
9	- 29” High

Ⓔ Select wire trough.
Add upcharge to unit price for WT option.

NT	- No wire trough
WT	- Wire trough

Available in black only.

Ⓕ Select electrical option.
Add upcharge to unit price for T6 option.

NP	- No power
T6	- T6 power

If T6 power is specified, receptacles, jumpers and infeeds are to be specified separately

Ⓖ Select frame style.
Add upcharge to unit price for WF option.

WB	- w/ Beam
WM	- w/ Modesty panel
WF	- w/ Full modesty panel

See pricing column for full modesty panel upcharge.
w/ Full modesty panel (available on 29” high only)

Ⓗ Select location and type of leg.

TS	- Standard legs
TB	- Transition leg (both)
TL	- Transition leg (left)
TR	- Transition leg (right)

Ⓘ Select grommet option.
Grommets are required for overhead cabinet.

OGN	- No worksurface grommet
OGY	- Yes worksurface grommet

Grommets can be used for wire pass-through.

Ⓙ Select paint color.
Refer to the **Product Color Options** page in this price list.

Ⓚ Select insert color.
Refer to the **Product Color Options** page in this price list.
Insert color also includes wire trough (WT) if selected.

Ⓛ Select laminate surface.
Refer to the **Product Color Options** page in this price list.

Ⓜ Select edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

Ⓝ Select grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓞ Select PowerUp® module color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Edge color offerings are based on edge style selections.

Ⓛ Select grommet color.
Refer to the **Product Color Options** page in this price list.

Ⓜ Select PowerUp® module color.
Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime.
To specify additional laminates, use these designators followed by the supplier’s color/pattern code:

Formica - LF/supplier’s color pattern code
Nevamar - LN/supplier’s color pattern code
Wilsonart - LW/supplier’s color pattern code

KI’s standard laminate finish is the supplier’s recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request.
Contact customer service for details.

Customer's Own Material ■

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO:

KI
217 Feld Avenue
High Point, NC 27263

COM and COL must be identified as follows:
1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

Furnishing Knowledge®

General
The below specifications cover Zoetry guest seating, lounge seating, guest and lounge in-line tables, freestanding occasional tables, privacy screens and electrical components.

Base Frame with Legs
All seating and freestanding occasional table base frames are constructed of .10" thick extruded aluminum rails with die cast aluminum legs. The rails and legs are fastened together using concealed $^{1}/_{4}$-20 steel screws. Frame finish options are powder-coat paint over all components with colors per the KI color addendum, or high gloss hand polished legs coupled with bright anodize dipped (polished look) aluminum rails (aluminum finish only).

Adjustable Glides
Adjustable glides are available in non-marring natural color nylon or grey felt. Glides are 1" diameter and provide $^{7}/_{8}$" height adjustability with a $^{1}/_{4}$-20 steel threaded stem. A polished $^{5}/_{8}$" diameter stainless steel sleeve hides the threaded stem when the glide is adjusted to extended heights. The four glide assemblies are replaceable with no tools required.

Armcaps
Models can be configured with optional armcaps in stained and finished Beech hardwood, molded polyurethane, or upholstered arm only. Polyurethane armcaps are molded (in black only) with a light surface texture and are reinforced internally with a 10-gauge (.135" thick) steel bar, fastened to the arms with $^{7}/_{16}$" diameter spring steel compression dowels.

Wood armcaps are $^{3}/_{4}$ Beech hardwood, kiln dried to a moisture content of six percent, sanded and finished in stain (color per KI color addendum) and fastened to the arms with $^{7}/_{16}$" diameter spring steel compression dowels.

The wood armcap's finish include over-coating with a spray stain, then baking in a burn-off oven for one hour. The wood is then sealed to prevent moisture imbalance, and surfaces are lightly sanded using 400 grit paper. The final application of an oven-baked conversion polyacrylic topcoat seals and finishes all surfaces. Both the seal and finish coats contain an anti-microbial protectant. Armcaps are field replaceable.

Structural Internal Frames (arm, seat, backrest)
Arm, seat and backrest frames can be a unique combination of materials and processes. Some frame components are made of a 100% recycled post-consumer polymeric blend molded with structural design elements that give strength and durability. Steel structural supports and fasteners are added to attach these elements to the base and to each other.

Other noted frame materials are $^{3}/_{4}$" Birch plywood, CNC cut with all joints nailed and glued, using additional interlocking features across all stress points. The following sections below list where these structural materials are applied;

$^{3}/_{4}$" Birch Plywood
- All lounge, bench and guest seat frames - standard and heavy occupant widths
- All lounge and bench arms
- Lounge backrests - heavy occupant width
- Guest multi-seat "shared" middle arms

Molded Recycled Material
- Lounge and guest backrests - standard width
- Guest backrests - heavy occupant width
- Guest "outer" arms and models with in-line tables

Zoetry® Collection
General Technical Specifications

Upholstery Foam & Suspension
Zoetry guest and guest bariatric seats are constructed of 3.5" thick molded polyurethane foam, 3.5 density, 35 lb compression with stretch webbing suspension underneath, stapled to the frame.

Zoetry guest and guest bariatric backrests are contoured and constructed with a maximum of 2" thick molded polyurethane foam, 3.5 density, 45 lb compression.

Zoetry lounge seats are constructed of 6" thick molded polyurethane foam, 3.5 density, 35 lb compression with stretch webbing suspension underneath, stapled to the frame.

Zoetry lounge and lounge bariatric backrests are constructed of 3" thick molded polyurethane foam, 3.5 density, 35 lb compression with stretch webbing suspension underneath, stapled to the frame.

Lounge bariatric and bench seats use slab polyurethane foam in the same density and compression values as the molded foam components in the seat. Stretch webbing suspension is used underneath.

All models – arms are covered in foam $^{3}/_{4}$" thick 2.6 density, 80 R compression on the seating sides of the arms. Remaining outer arm surfaces are $^{1}/_{4}$" soft feel 2.5 density, 45 lb compression.

Upholstery & Sewing
Upholstery features on all models include double-needle stitching at all primary seams for lasting durability. Stitching is available in contrasting color choices per the KI thread finish card.

Tables (in-line and freestanding occasional)
Tables and tops with laminate are constructed using 45 lb density particleboard with .030" thick high-pressure laminate, .030" high-pressure backer and 2 mm pvc edge banding (KI "73P" edge banding in limited complimentary colors). The overall top thickness is $^{3}/_{4}$", available in colors per the KI color addendum. In-line "working-height table" and "raised table" have all exposed surfaces laminated and edge banded.

Flat tabletops specified with "solid surface" are constructed of $^{1}/_{2}$" thick Corian® material with $^{1}/_{4}$" plywood backer. The edge is a glued and polished Corian® band, 1" wide all around, creating a seamless continuous surface. The solid surface tops are colored "Glacier White" only.

All tables are configurable with optional power modules. See "Electrical System Options" specifications for additional information. Solid surface tabletops are fastened to frames using concealed $^{1}/_{4}$-20 steel screws into steel T-nuts in the table backer. Laminate tops are fastened to frames using #14 x $^{1}/_{2}$" wood screws.

Lounge Privacy Screens

Lounge privacy screen corners are pressure-formed, laminated #3 grade Gum veneer plywood, 10 mm nominal thickness. Lounge center extensions (loveseat and larger) are 1/2" nominal thick Birch plywood. Both are covered in 1/4" thick Volara® high-density foam on all surfaces and edges. Fabric is applied over the plywood and foam and sewn with seams along the outside edges. Overall finished thickness is 3/4". Privacy screens are mounted to the lounge using hidden or minimally visible die-cast aluminum hooks and receivers, painted black. The screen hooks are aligned to the lounge receivers and fixed in place using #8 steel screws.

Note: The privacy screen mounting components are permanently attached to the lounge and screen and cannot be repositioned for other uses.

The top screen alignment medallions are machined solid aluminum, and optionally polished to a mirror finish or powder-coated in KI colors. The two halves are fastened using a #8 steel screw. Hidden steel toothed "gripper" features strengthen the medallion retention when fully assembled between screen segments.

Electrical System Options

Byrne Mini-Tap® Power Module with 3-Prong Plug
Zoetry seating can be configured with optional Bryne Mini-Tap power modules (a self-contained, UL listed single relocatable power tap). One 15-amp, 125 volt AC simplex receptacle with one 2.1-amp, 5 volt DC USB Type A and one Type C outlet port (2.0 and 3.0 compatible, no data), provide device charging or direct AC power. The module is standard with a 72" long, 14 AWG, 15-amp NEMA rated 3-conductor black SJT cord with 3-prong grounded plug. Modules are optionally colored black with black outlet ports, or white with white outlet ports. Single modules can be configured to the right side or left side of the model frame. Outlets face the front of the single seat lounge or chair.

Byrne Mini-Tap Power Module for Sequence®
Seating can also be configured with optional 12 amp system rated Bryne Mini-Tap power modules for Sequence, to accommodate two modules per unit (loveseat or larger) with a single corded AC power in-feed. The NEMA rated 3-conductor black SJT infeed cord with 3-prong plug is rated for 15 amps with over-current protection. The Sequence system is ETL Listed. Dual modules are mounted right and left sides of the frame, facing the front of the seating. Single modules can be configured to the right side or left side of the model frame. The module-to-module cord connections are accomplished by a keyed Sequence power jumper, with light indication for proper connection. All modules and cabling are factory installed with cords, discretely dressed and hidden at the underside of the lounge, with the infeed ready to plug into the user location outlets.

Byrne Node® Power Module with 3-Prong Plug
In-line tables can be optionally configured with a Bryne Node power module with 3-prong plug (a self-contained, UL listed single relocatable power tap). One 15-amp, 125 volt AC simplex receptacle with one 2.1-amp, 5 volt DC USB Type A and one Type C connectors (2.0 and 3.0 compatible, no data), provide device charging or direct AC power. The module is standard with a 72" long, 14 AWG, 15-amp NEMA rated 3-conductor black SJT cord with 3-prong grounded plug. Node modules are optionally colored black with black outlet ports, white with white outlet ports or silver with black outlet ports. Node modules are top surface mounted in the tabletop. UL "spill proof" receptacles are standard.

General Construction

A sweep through clean out between the backrest and seat allows debris to be pushed through to the floor beneath all models.

Arms, armcaps, glides, privacy screens, seats and backrests are field replaceable.

General Upholstery

Contrasting fabric specification is not available.
Available fabrics only in approved Pallas/Ingrades or COM/KOM options.
Contrasting color stitching per KI thread color finish card.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.
- The absence of the □ indicates that no choice is required.
- Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select armcap type.

NAC	- No armcap
PACBL	- Black poly armcap; add $107
WAC	- Wood armcaps; add $139

Ⓒ Select power & location.

NP	- No power
M1L	- One Power Module, Left-Facing; add $257
M1R	- One Power Module, Right-Facing; add $257

Ⓓ Select glide.

GFT	- Felt glides
GPL	- Plastic glides

Glides adjust 7/8"

Ⓔ Select base/leg finish.
