

Group 32100 – Snow & Ice Control Agents (Statewide)

#	Solicitation Document Name	Document Section (Name or No.)	Page Number	Comment / Question / Bid Deviation	Response
1	Attachment 9 – <i>Snow & Ice Control Agents Specifications</i>	Section 2.1.g – <i>Lot I – Liquid Calcium Chloride – Corrosion Inhibited</i>	4	In the solicitation section, it states that bidders need to obtain an independent certified analysis ONLY if they do not currently have an award for the product in question. In Attachment 9, section 2, it states that the 3rd party lab certification is required. If we already have an award for Lots I -IV, do we need to be certified by an independent lab again? We are bidding the same materials and still have all of the documentation.	An independent certified analysis is ONLY needed if Bidder does not currently hold a contract <u>for the same product</u> on Award 22882. Please see revised Attachment 9, Section 2.
