

Appendix D : Pricing Schedule

**Agreement between the New York State Office of General Services and
MVP Consulting Plus, Inc.
for Project Based Information Technology Consulting Services**

Contract Number: PB137AA

Table of Contents

Sheet #1: Pricing Schedule

Authorized Users please note the following:

A competitive Mini-Bid is required for every transaction under this Centralized Contract.
(Section 5.1 of the Contract)

The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the "maximum Not-To-Exceed price" shall be rejected by the Authorized User.
(Sections 4.4 and 6.9 of the Contract)

Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User.
(Section 4.22 of the Contract)

When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at <http://osc.state.ny.us/agencies/travel/travel.htm>. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached.
(Section 6.10 of the Contract)

PRICING SCHEDULE

CONTRACTOR NAME:	MVP Consulting Plus, Inc.
FEDERAL ID:	020600234
NYS VENDOR ID:	1000000022
CONTRACT NUMBER:	PB137AA
DATE PRICELIST APPROVED BY OGS:	9/21/2016

Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	MVP1	Program Manager	<p>Enterprise level experience in policy, governance and strategy Requirements/Job Duties: Program Manager will assist in the development of the following: a governance model for the ITS organization; an outreach methodology including but not limited to an outreach methodology to local NYS governments ; and strategies supporting an enterprise initiative for shared services including but not limited to supporting shared services at the local jurisdictional level.</p> <p>Specific activities to be performed include, but are not limited to: Work with NYS Chief Portfolio Officer, cluster Chief Information Officers and other key stakeholders within ITS in the development of the governance model; Work closely with the ITS Public Information Officer and the ITS Marketing and Communications Office in the development of an effective executive outreach approach; Engage with key ITS stakeholders involved in IT shared services and consolidation activities along with local government IT officials and organizations to outline goals and develop strategy recommendations to further cost savings and governmental efficiency initiatives.</p>	Experience	10+	\$160.00

2	MVP2	Senior Security Solutions Architect	<p>Provide support, troubleshooting, fault tolerance design, backup and disaster recovery strategies, upgrade planning and installation, and performance tuning for Security-based applications and platforms, LDAP servers, as well as provide custom application</p> <p>Requirements/Job Duties: To Provide support, troubleshooting, fault tolerance design, backup and disaster recovery strategies, upgrade planning and installation, and performance tuning for Security-based applications and platforms, LDAP servers, as well as provide custom application development and knowledge transfer to OSC support and programming staff.</p> <p>Communicate complex security architectures to a non-technical audience; document security and network architectures, procedures, and reports for a non-technical audience; and mentoring and knowledge transfer through hands-on and classroom style training.</p> <p>Work with multiple vendors simultaneously and coordinate vendor presentations and onsite professional services engagements</p>	Experience	5+	\$135.00
3	MVP3	Java Developer	<p>Analyst business requirements, design applications, and implement business rules</p> <p>Requirements/Job Duties: The Java Developer shall provide Java application design and development consultant services to NYCERS for the completion of NYCERS' ongoing business process improvement program. The following descriptions and deliverables shall apply:</p> <p>Role: Develop custom web applications and web services.</p> <p>Objective: To analyze and improve existing business processes with application automation where possible.</p> <p>Deliverables: The Java Developer is responsible for the following:</p> <ul style="list-style-type: none"> o Analyze business requirements and design applications. o Develop custom applications improving the existing business processes. o Implement business rules using the best fitting architecture supporting automation of business processes. 	Experience	7+	\$85.00

4	MVP4	ETL Developer	<p>Assist with enhancements to OSC's FirstNY data warehouse</p> <p>Requirements/Job Duties: Under the direction of the Manager of FirstNY. the ETL Developer will: Collaborate with coworkers, system users, business analysts and other CIO teams to gather requirements for system changes and enhancements; Perform analysis necessary to understand the requirements for system changes and enhancements and any factors related to fulfilling these requirements; Design solutions to satisfy requirements for system changes and enhancements; Identify, analyze and resolve production issues; Develop, re mediate, enhance program code and Oracle Warehouse Builder objects to implement design solutions and to enhance code readability, efficiency and maintainability; Design test plans to confirm that the requirements of system changes and enhancements are being met; Regression, unit and integration testing should be included in the design as required; Create and maintain documentation. as needed, Documentation will be required for Program units, Environment setup and configuration, Solutions identified to resolve problems, Test plans, Business requirements, and Design documents. Report to the Manager of FirstNY on the status of tasks and any issues encountered in applications.</p>	Experience	5+	\$105.00
5	MVP5	Project Manager jr	<p>Duties: Candidate will report to Sr. Project Manager. Use Microsoft Office (Word, Excel, PowerPoint); Microsoft SharePoint, and VISIO to write status reports, flow charts and presentations. Coordinate and manage tasks. Review deliverables and perform quality reviews; manage and participate in testing activities.</p>	Experience	1+	\$45.62
6	MVP6	Project Manager mid	<p>Duties: Create and manage project schedules; Perform scope and change management; Coordinate and manage tasks and activities; Write and review status reports, present status to senior management; Identify, document and track action items; Identify, document and perform risk management; Identify, document and perform issue management; Identify, document and perform decision management; Review deliverables & perform quality reviews; Manage and participate in testing activities; Lead lesson learned sessions; Leading meetings and document meeting notes.</p>	Experience	3+	\$57.39

7	MVP7	Project Manager sr	<p>Duties: Develops detailed scope statements, and documents project requirements for complex projects by eliciting business goals, information needs, and relative priorities from end users, subject experts and others; balances resource alternatives and potential solutions; develops a project schedule including identifying and scheduling project deliverables, milestones and required tasks using project scheduling software; documents and presents resource needs to agency management and coordinates project activities with those of program areas; designs and implements quality metrics to analyze project performance; develops project communication plan and provides detail project status reports to stakeholders; communicates project information to internal and external stakeholders; directs or coordinates the activities of project or technical staff; identifies risks and their potential impact on the project; manages contract relationships; provides recommendations or makes decisions on changes in project schedule; plans and conducts project analysis sessions, such as Focus Group and project close-outs sessions.</p>	Experience	5+	\$77.99
8	MVP8	Project Manager ex	<p>Duties: The Contractor will be responsible for the creation and maintenance of all project management deliverables with the input of both contract and State project team members. Project management activities and responsibilities that will be required of the Contractor in this project include but are not limited to: Coordinate the activities of the project teams; Create, monitor and manage project plans, schedules, scope, risks, issues, costs, changes, and other project management artifacts; Report project status; Provide a focal point for issues and concerns raised by the Contractor team or State Staff; Manage Contractor system development tasks and project resources per priorities; Identify risks and develop strategies to control them; Document lessons learned.; PMI PMP Certification. Working with senior management on resource allocations, project responsibilities and tasking, as well as mentoring and training resources as necessary; Functioning as a facilitator to clarify business and technical requirements which cross project team boundaries in within a matrix organization.</p>	Experience	8+	\$110.54

9	MVP9	Business Analyst jr	Duties: The Junior Business Analyst is an entry level position that works closely with the Senior Business Analyst team;leverages the individual's knowledge and analytical skills to support the team;Primary duties will include collecting, analyzing and documenting the required data, information and goals and transferring the same to the senior business analyst team. The candidate should understand the business process and requirements and elicit requirements from them using interviews, surveys, site visits, and business process descriptions.	Experience	1+	\$39.73
10	MVP10	Business Analyst mid	Duties: Create business requirement documentation development (ie, business requirements documents, use cases, flow charts, report mock-ups, swim lane diagrams, prototypes, screen designs); business and systems analysis, design and development including requirements gathering (ie, JAD sessions, client interviews, focus groups); Business Process Analysis; Workflow analysis.	Experience	3+	\$51.50
11	MVP11	Business Analyst sr	Duties: Analyzing business processes, developing business process flow charts and creating business use cases; documenting functional and/or operational requirements in a formal requirements document; providing clear, specific and respectful oral and written communications to business owners, IT program team members and management; developing well-constructed test scenarios and test cases against documented design use cases, performing testing, executing basic SQL as needed, reviewing results and documenting defects using a defect management tool.	Experience	5+	\$64.74
12	MVP12	Business Analyst ex	Duties: Performing business, systems and data analysis for large-scale projects: developing requirements and specifications according to standard templates; performing process and data analysis; and test plans creation, management and execution. Managing large-scale complex business process improvement/ re-engineering analysis projects; hands-on development of Business Case or Requests For Proposals documents: gather, organize, analyze, and quantify data about customer needs and requirements, costs/benefits, advantages/disadvantages, technical feasibility of implementing new or changed business solutions, and comparisons of optional solutions. And translate data into information used to make decisions and support the selection process. Leading or managing teams of 4 or more, in program or process improvement efforts.	Experience	8+	\$82.40

13	MVP13	Technical Writer jr	Duties: Candidate should be able to document procedures, and providing training guides and manuals; Proficiency in using Microsoft Office Suite applications, particularly Power Point and Word, and Adobe; Excellent verbal and written communication skills.	Experience	1+	\$35.32
14	MVP14	Technical Writer mid	Duties: Technical writer will be updating information system technical documentation, such as technical specifications for a multi-tier architecture application; documenting functional specifications, such as for a web-based reporting system; documenting new or updating existing standard operating procedures, such as for a web-based reporting system; developing or updating user manuals or training materials; creating flow documents, other diagrams, graphical representations, or charts using tools such as Microsoft Visio	Experience	3+	\$41.20
15	MVP15	Technical Writer sr	Duties: The consultant's daily tasks will include: Creation of new end-user manuals; Maintenance of existing documentation; -Development of Frequently Asked Questions text; Collaborate with programmers to fully document the system design and dependencies; Publish all finished product documentation files (both PDF and Word files) to internal Sharepoint site; Must be able to use word processing, desktop publishing and graphics, Visio diagramming software	Experience	5+	\$51.50
16	MVP16	Technical Writer ex	Duties: The consultant's daily tasks will include Documentation of as-is and to-be server and network infrastructure; Maintenance of existing documentation Collaborate with technical architects and system programmers to fully document the system design and dependencies; Work closely with the technical and developer teams (from initial assignment through closure); Publish all finished product documentation files (Visio, PDF and Word files) to internal Sharepoint site; Make recommendations and provide guidance to help strengthen the quality, accuracy, and ease of use of written materials; Analyze process flow and translate processes into diagrams and charts; Development of Frequently Asked Questions text	Experience	8+	\$55.92
17	MVP17	Tester jr	Duties: 12 months experience Manage all testing activities; Prepare test scripts; Keeping up to date with standards and requirements of software quality assurance as stipulated by software testing authorities	Experience	1+	\$39.73
18	MVP18	Tester mid	Duties: Manage all testing activities, including UI, integration testing, manual, performance and scalability testing; Prepare test scripts; Keeping up to date with standards and requirements of software quality assurance as stipulated by software testing authorities; using Client Load Runner and Quick Test Pro (QTP); writing test scripts, test cases and scenarios	Experience	3+	\$47.09

19	MVP19	Tester sr	Duties: Develop test plans, scenarios, and test cases which will exercise the business, functional, and technical requirements of the system; Develop test data for use in executing the QA phase of the SDLC; Develop and execute test plans and scenarios, including regression and volume tests; Evaluate test results and performance of software; Identify technical and functional software defects; UAT and using Client Load Runner and Quick Test Pro (QTP)	Experience	5+	\$52.97
20	MVP20	Tester ex	Duties: Develop test plans, scenarios, and test cases which will exercise the business, functional, and technical requirements of the system; Develop test data for use in executing the QA phase of the SDLC; Develop and execute test plans and scenarios, including regression and volume tests; Evaluate test results and performance of software; Identify technical and functional software defects. Functional testing Performance and Stress testing using performance testing tools; Manual Testing; creating user test scripts and managing User Acceptance Testing; using defect management tools; Quality Center	Experience	8+	\$57.39
21	MVP21	Programmer jr	Duties - Application programming, unit and integration testing of developed programs and documentation of those efforts. Programming tasks may include complete unit routines or functional routines that make up discrete parts of functional units. Programming will utilize structured and /or Object Oriented Programming.	Experience	1+	\$39.73
22	MVP22	Programmer mid	Duties: Development and enhancement of applications based on established design specifications; Analysis, design, coding, component/assembly testing of all application code owned by the Application Team; Implementing configuration changes to software applications to meet both functional and technical requirements; Writing application software, data analysis, data access, data structures, data manipulation, databases, design, programming, testing and implementation, technical and user documentation, software conversions, maintenance (including production support) and Unit testing applications and developing system and user documentation.	Experience	3+	\$61.80

23	MVP23	Programmer sr	Duties: Design system architecture and develop system models specifying interactions between multiple systems; Development and enhancement of applications based on established design specifications; Analysis, design, coding, component/assembly testing of all application code owned by the Application Team; Develop and/or modify technical and/or design specifications, technical writing and documentation; Develop web pages and user interfaces; Software development, maintenance and implementation of web applications/client-server/database application programming.	Experience	5+	\$73.57
24	MVP24	Programmer ex	Duties: Design, Develop and test new programming, writing and executing unit test plans, researching, resolving, and testing reporting defects, and close collaboration with application technical owners; Document business requirements with technical project manager and application programmers to ensure clarity in implementation of technical design: Participate in business requirement and joint application development sessions to inform migration options; Creates appropriate documentation in work assignments such as program code and technical documentation; Ensure top notch programming through coding, testing, debugging, implementing, and documenting programs, and developing test plans to verify logic programs and output; Troubleshoots end user technical issues, identifying problems and leading solutions; Implements release management process including technical steps to promote, test and release through the development environment, coordinating with infrastructure staff and Uses iterative and agile software development life cycle methodologies.	Experience	8+	\$81.40
25	MVP28	Specialist ex	Duties: The individual will support mission critical on-going Data Center Consolidation Project initiatives; Lead network engineer in the orchestration of multi-discipline technologies for the resolution of complex problems; communicate with technology and business leaders for problem resolution and make recommendations for system enhancements as required; 24x7 on-call availability for trouble-shooting / ticket resolutions; Implement, configure and troubleshoot issues on Juniper Firewall system; Implement, configure and troubleshoot issues on Checkpoint firewall system; Implement, configure and troubleshoot Tandberg Gateway/Express system; Develop and implement network infrastructure solutions based on Cisco L2/L3 switches, Cisco QOS 802.1p; Design, implement, configure and troubleshoot Cisco wireless infrastructure; Support of Local and Wide Area Network (LAN/WAN) environments requiring extensive experience in the use of advanced routing protocols; Knowledge of connectivity requirements for a Websphere environment.	Experience	8+	\$95.15

26	MVP29	Database Administrator jr	Duties: Work with the DBA team in supporting the Database Windows environment; implementations, upgrades, conversions and consolidation projects with databases; working with Premium Support troubleshooting database systems.	Experience	1+	\$41.20
27	MVP30	Database Administrator mid	Duties: Assist the Database team with various ongoing tasks, including but not limited to database installation, configuration and hardening, backup validation, performance tuning, replication setup, and general database monitoring, as well as recommend best practices and procedures; Install, upgrade and maintain databases on Servers, including backup and recovery; Allocating storage and planning future storage requirements for the database system; Work with teams of application programmers, system architects to create solutions to meet business goals; Perform off-hours (evening or weekend work) as needed for emergency or maintenance tasks; Provide support for internal users and external data exchange partners; Perform optimization and tuning activities, including capacity planning, tracking historical usage, trending future resource needs, and modifying resource allocations as needed; Provides recommendations on technical architecture; Provides hands-on training and mentoring for other database administrative staff.	Experience	3+	\$58.86
28	MVP31	Database Administrator sr	Duties: Architect, Install, Maintain and Support of the Oracle products/technologies; Capacity Planning, Performance Analysis and Performance Tuning for Oracle enterprise application architecture; implementing, administering and supporting including troubleshooting application integration and configuration issues.	Experience	5+	\$80.93
29	MVP32	Database Administrator ex	Duties: Define and implement strategy for DB backups, recovery; Create schema objects, define storage parameters, user privileges; Set up and review Oracle configuration parameters; Continuously and proactively monitor database performance and work with developers to improve the system performance; Coordinate with other DBAs, system administrators for the Software upgrades of DBMS or OS; Installation of Oracle patches as needed; Coordinate with system administrators for backups, storage and any system maintenance activities; Maintenance tasks including debugging, testing, and implementation; Develop and/or modify technical and/or design specifications, technical writing and documentation	Experience	8+	\$91.23

30	MVP33	System Administrator jr	Duties: Create and customize AIX logical partitions; Create, expand, and remove filesystems and logical volumes; Set up and monitor system backups; Create scripts to monitor performance and send email alerts; Patch and upgrade the operating system; Provide security; Work closely with other system administrators and system users.	Experience	1+	\$41.20
31	MVP34	System Administrator mid	Duties: Implementation of VMWare platform; Configuring physical servers; Provisioning VMware environments; Provisioning virtual environments; Implement and operate VMWare platform performance/availability monitoring and alerts; Patch and upgrade the operating system; Work closely with Sr. system administrators and system users.	Experience	3+	\$58.86
32	MVP35	System Administrator sr	Duties: Under the direction of the Distributed Servers Manager, the candidate will be responsible for Senior High level of System Administration technical Support on an enterprise Client-UX environment running Client-UX 11.11, 11.21, 11.31 on RP series, RX series and Client BladeSystem. The Client-UX environment uses Service Guard cluster, Enterprise EMC San and Client Virtualization including nPARs and vPars. The Candidate will work with the Agency's Migration Project Manager and application groups on formulating Migration Strategy for Client-UX Servers. The Candidate will see the final Migration plan through completion. The Candidate will give assistance to Agency's Application groups on application software installation, configuration, troubleshooting, performance analysis, and server/hardware recommendation. The candidate will function as a single point of contact between the customer, other support teams, and vendors. Provide on-call, third-level support for ITS Client-UX server environment.	Experience	5+	\$76.45

33	MVP36	System Administrator ex	<p>Duties: The candidate will be responsible for Expert level of System Administration technical Support on an enterprise Client-UX environment running Client-UX 11.11, 11.21, 11.31 on RP series, RX series and Client BladeSystem. The Client-UX environment uses Service Guard cluster, Enterprise EMC San and Client Virtualization including nPARs and vPars. The Candidate will work with the Agency's Migration Project Manager and application groups on formulating Migration Strategy for Client-UX Servers. The Candidate will see the final Migration plan through completion. The Client Infrastructure supports various State Agency's applications including Cognos, Oracle Databases, Sybase Databases and Informix Databases. The Candidate will give assistance to Agency's Application groups on application software installation, configuration, troubleshooting, performance analysis, and server/hardware recommendation. The candidate will function as a single point of contact between the customer, other support teams, and vendors. Provide on-call, third-level support for ITS Client-UX server environment.</p>	Experience	8+	\$88.55
34	MVP37	Technical Architect jr	<p>Duties: Support developers in migrating exiting application API calls; Support development team in the architecture, design and implementation of Oracle OIM/OAM/OUO/OVD modules; Authentication/Authorization design and implementation; Workflow design and development.</p>	Experience	1+	\$66.22
35	MVP38	Technical Architect mid	<p>Duties: Review Business Requirements and recommend technical solutions to solving them; Create formal Technical Architecture documentation and make presentations to Architecture Review committees; Use Microsoft Studio 2010 or higher and write code using VB6, C#.NET, XML, PL/SQL, WCF, Oracle, Client Quality Center; Use Team Foundation Server as a repository for the source code, for checking source code in and out, branching off new versions of the source code, and for tracking project work items and application defects; Perform unit testing on all code changes.</p>	Experience	3+	\$78.65

36	MVP39	Technical Architect sr	<p>Duties: Develop Application model in Oracle Policy Automation (OPA) including designing OPA model, authoring OPA rules, Interview screen etc. Integrate OPA with Siebel or other third party Application. Developing test cases corresponding to the rules within OPA for regression testing.</p> <p>Develop functional design for OPA. Participate in code reviews. Train/Mentor less experienced resources; Use recognized business analysis methodologies to elicit requirements from business users as the foundation for developing an online application for DMV that meets the organization's business needs; Focus is on the effective use of resources, both people and technology, in the execution of the Department's mission.</p>	Experience	5+	\$94.60
37	MVP40	Technical Architect ex	<p>Duties: Directs a development team to analyze, design and program complex projects; coordinating activities on multiple aspects of the project, assuring quality control and providing technical leadership to project teams, as well as interfacing with business owners and project management staff. Review business requirements documentation with project team to clarify for technical design</p> <p>Oversee systems and program design to meet highly complex business needs, preparation of detailed technical specifications from which programs are developed, and creation of appropriate documentation in work assignments such as program code and technical documentation.</p> <p>Prepare development time estimates and justifications for assigned tasks and provide recommendations to project managers.</p> <p>Coordinate development activities, design testing plans, assure quality control and effective change control and provide technical leadership to project teams</p> <p>Consult with the software development team in coding, testing, debugging, implementing, and documenting highly complex programs, and developing complex test plans to verify logic programs.</p> <p>Develop and maintain release management process including planning, tracking, communication and coordination of technical tasks associated with release.</p> <p>Support project personnel in resolving complex program problems. Work with partners to resolve issues and validate programming requirements.</p> <p>Serve as technical project lead, providing leadership and work guidance to less experienced technical personnel.</p> <p>Identify, track and resolve issues, recommend changes and provide supporting documentation.</p> <p>Develop work plans and work estimates for large scope projects.</p>	Experience	8+	\$103.40

38	MVP41	Technician V	<p>Duties: Duties include but are not limited to the following: Design, build, maintain and troubleshoot existing Microsoft Office 365 on premises Exchange environment in a resource forest model, and other disciplines such as Active Directory and desktop, web and mobile clients. Support existing Microsoft Office 365 compliance controls; Respond to trouble tickets, analyze and resolve complex technical problems as they arise, both in the on premises Exchange environment and in the Office 365 tenant; Install, configure, administer, report on and monitor Microsoft Exchange systems and objects within the system using Exchange tools, PowerShell and other scripting languages and monitoring tools including but not limited to MOM/SCOM.administer, maintain and troubleshoot the BlackBerry Enterprise Servers (BES) service. Install, configure, administer and monitor Exchange Active Sync services and provide assistance with mobile devices. Scheduling, planning, and performing system upgrades, including testing, rollback procedures and risk analysis for email and all related services. Provide technical support to users and technical specialists, including off hours and On-Call support.</p>	Experience	8+	\$88.00
39	MVP42	Principal Consultant	<p>Duties: System/Network administration, user on-boarding, and Active Directory management. Windows Server installation and maintenance; System backup of server OS and server applications including MS Exchange, MS SQL using Veritas Backup Exec. Creation and maintenance of virtual servers using VMWare; Performance monitoring of systems; Maintain and support SAN, NAS, and tape storage devices / servers; Data Center equipment monitoring and support. Contribute to review of customer tasks and development of MCS strategic approaches; Direct the activities of other Senior Consultants, Consultants and Associate Consultants; Lead role in delivering technical presentations to customer; Meet/interview customer to capture specific requirements in concise format; Participate in delivering technical presentations to customer staff; Participate in design of information systems Participate in project staffing decisions and Provide key personal link to Microsoft technology groups.</p>	Experience	5+	\$80.93
40	MVP43	Technical Specialist 3	<p>Duties: As a IBM software project team member, support existing IBM solutions and/or products. Install new products and assist in the migration to new releases or versions of products and provide related education. In addition modify, and manage Custom Shell scripting; Perform system performance tuning, monitoring, and analysis activities</p>	Experience	1+	\$48.96

41	MVP44	Technical Specialist 4	Duties: Assists with technical support of existing solutions and/or products. Install, configure, and administer IBM products and solutions; Configure and Administer Storage Area Network (SAN); administer enterprise backup solutions such as Tivoli Storage Manager, configure/manage IBM San Volume Controller (SVC); Create, modify, and manage Custom Shell scripting; Perform system performance tuning, monitoring, and analysis activities	none	2+	\$58.86
42	MVP45	Technical Specialist 5	Duties: Design, develop, Install, configure, and administer IBM products and solutions; Configure and Administer Storage Area Network (SAN); administer enterprise backup solutions such as Tivoli Storage Manager, configure/manage IBM San Volume Controller (SVC); Create, modify, and manage Custom Shell scripting; Perform system performance tuning, monitoring, and analysis activities; Provide recommendations on technical architecture; Develop/provide documentation related to system management, configuration changes, etc. Troubleshoot and resolve issues in the server, backup, and storage areas	Experience	3+	\$70.95
43	MVP46	Software Architect #1	Duties: Design and implement IBM software solutions and assure current and new technologies are effectively integrated to fulfill the business needs; works closely with the IBM Software Group to plan, design, implement and integrate IBM software solutions. Act as the primary technical liaison with technical infrastructure teams to resolve problems and implement solutions to technical issues impacting application performance. Work with the Infrastructure team to execute activities such as performance test planning and execution failure failover planning and execution, endurance testing and deployment planning and testing. Provide the analysis, design development, and code review enterprise applications using the IBM Portal/WebSphere Application development software. Perform oversight of development activities which may include data analysis, data access, data structures, data manipulation, preparing logical database models, testing and implementation.	Experience	5+	\$81.40

44	MVP47	Software Architect #2	Duties: Design and implement IBM software solutions and assure current and new technologies are effectively integrated to fulfill the business needs; works closely with the IBM Software Group to plan, design, implement and integrate IBM software solutions; Planning, designing, implementing, integrating IBM Products and solutions. Lead the development activities which may include data analysis, data access, data structures, data manipulation, preparing logical database models, testing and implementation.	Experience	8+	\$92.96
45	MVP48	Architectural Specialist I	Duties: Provide expert knowledge on Unisys and/or third party architectures, platforms, applications, databases, networks, etc; guide and advise in identification, administration, and implementation of specific solutions. Develop, administer, implement and support specific technical or business application solutions from design specifications; may perform software upgrades and/or conversions, program coding, testing and/or debugging.	Experience	3+	\$80.30
46	MVP49	Architectural Specialist II	Duties: Design and develop Unisys architectures, platforms, applications, databases, networks, etc; Develop, administer, implement and support specific technical or business application solutions from design specifications; perform software upgrades and/or conversions, program coding, testing and/or debugging.	Experience	1.5+	\$71.50
