

The New York State Police version of SJS (Spectrum Justice System) is comprised of 191 tables in a single Oracle schema. The 191 tables are linked using standard Oracle declarative referential integrity. In addition to the NYSP version, the general distribution version is somewhat different. Both contain a number of tables unique to that particular distribution. Those are also linked using standard Oracle declarative referential integrity. However, the amount of data in each SJS installation is dependent on the linked spreadsheet provides the following meta-data for use in estimating the conversion cost.

- Table-Column directory that provides a detailed breakdown of each NYSP SJS table and all its
- Database differences at the table level between the two SJS distributions.

<b>SJS Distributions</b>	<b>Object Type</b>	<b>Count</b>
SJS - NYSP	TABLE	191
SJS - General Distribution	TABLE	237
