

<b>Attachment 1 - Pricing</b>	
<b>Contractor:</b>	Accelare, Inc.
<b>Contract Number:</b>	PB70517
<b>Lots:</b>	2
<p><b>Authorized Users Please Note the Following:</b></p> <p>A competitive Mini-Bid is required for every transaction under this Centralized Contract. (Section 1.3 of Attachment 16 - How to Use this Contract)</p> <p>The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the “maximum Not-To-Exceed price” shall be rejected by the Authorized User. (Sections 7.9 of the Contract - Reasonableness of Price)</p> <p>Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User. (Section 8.5 of the Contract - Pricelist Adjustments)</p> <p>When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at <a href="http://osc.state.ny.us/agencies/travel/travel.htm">http://osc.state.ny.us/agencies/travel/travel.htm</a>. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached. (Section 7.12 of the Contract - Travel, Meals and Lodging)</p>	

Accelare, Inc. Approved Price List			Number of Approved Titles:	22	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	SSA	Sr. Solutions Architect	Responsible for the translation and construction of complex business problems into sound technical solutions; provide technical and architectural direction to the solution integration team / implementation team; ensure that integration / implementation efforts are adhering to established standards; provide insight and guidance on overall system interoperability; Responsible for implementation / integration technical plan; document and communicate architectural requirements.	BA	8	\$250.00
2	SA	Solutions Architect	Responsible for the translation and construction of complex business problems into sound technical solutions; provide technical and architectural direction to the solution integration team / implementation team; ensure that integration / implementation efforts are adhering to established standards; provide insight and guidance on overall system interoperability; Responsible for implementation / integration technical plan; document and communicate architectural requirements.	BA	5	\$225.00
3	SDA	Sr. Data Architect	Works in all phases of data architecture; designs / configures databases for recovery, high availability, performance and maintenance; monitors the standards, procedures, integrity and integration of data; defines the overall warehouse architecture and standards; analyzes data needs and requirements of existing and proposed systems and develops technical, structural and organizational designs and specifications; evaluates technology and products; develops work plans for assigned projects; serves as project lead for software implementations and integrations associated with data.	BA	5	\$250.00
4	DA	Data Architect	Works in all phases of data architecture; designs / configures databases for recovery, high availability, performance and maintenance; monitors the standards, procedures, integrity and integration of data; defines the overall warehouse architecture and standards; analyzes data needs and requirements of existing and proposed systems and develops technical, structural and organizational designs and specifications; evaluates technology and products; develops work plans for assigned projects; serves as project lead for software implementations and integrations associated with data.	BA	1	\$225.00
5	SDBA	Sr. Database Analyst	Evaluates, designs and manages database systems in a client/server or mainframe environment. Works with user to analyze requirements and defines specifications for database access, structure, functional capabilities, documentation, security, backup and recovery. Performs validation checks, maintains database dictionaries and coordinates installation of new and revised database systems. Requires thorough knowledge of relational database systems, Structured Query Language (SQL) and a working knowledge of referential integrity, triggers and stored procedures.	BA	5	\$205.00
6	DBA	Database Analyst	Evaluates, designs and manages database systems in a client/server or mainframe environment. Works with user to analyze requirements and defines specifications for database access, structure, functional capabilities, documentation, security, backup and recovery. Performs validation checks, maintains database dictionaries and coordinates installation of new and revised database systems. Requires thorough knowledge of relational database systems, Structured Query Language (SQL) and a working knowledge of referential integrity, triggers and stored procedures.	BA	1	\$180.00
7	SRA	Sr. Reporting Analyst	Utilizes program development series or other technical tools (SAS; SQL; business objects) for agency reporting purposes. Duties include: develop reports and cubes according to analyst-defined specifications; assume independent responsibility for specific subject area within the reporting and analysis arena; provide expertise within the warehouse framework; conduct technical training; work the architect and technical lead to improve performance and extend functionality; maintain and document operational environment; install and upgrade the application.	BA	5	\$140.00
8	RA	Reporting Analyst	Utilizes program development series or other technical tools (SAS; SQL; business objects) for agency reporting purposes. Duties include: develop reports and cubes according to analyst-defined specifications; assume independent responsibility for specific subject area within the reporting and analysis arena; provide expertise within the warehouse framework; conduct technical training; work the architect and technical lead to improve performance and extend functionality; maintain and document operational environment; install and upgrade the application.	BA	1	\$125.00
9	SNE	Sr. Network Engineer	Determines network requirements for meeting network infrastructure and services needs related to software integrations and implementations. Recommends environmental changes in support of same. Provides expert level problem resolution, review and troubleshooting of the installation and implementation of layered software solutions and products. Assesses bandwidth requirements to ensure network capacity and processing speed. Ensures that the solution meets the company or customer/client requirements	BA	5	\$120.00
10	NE	Network Engineer	Determines network requirements for meeting network infrastructure and services needs related to software integrations and implementations. Recommends environmental changes in support of same. Provides expert level problem resolution, review and troubleshooting of the installation and implementation of layered software solutions and products. Assesses bandwidth requirements to ensure network capacity and processing speed. Ensures that the solution meets the company or customer/client requirements	BA	1	\$80.00
11	SPM	Sr. Project Manager	Manages, plans, organizes and controls all operations and activities of IT implementation and integration projects at varying levels of size and complexity. Duties include: manage projects of varying size and complexity; ensure that users and project team members roles and responsibilities are defined; coordinate and monitor activities to ensure project is completed on time and within budget; ensures that user requirements, deliverables and approvals are defined and documented; communicate project status; promote use of PMI best practices; ensure the delivery of a product that meets user requirements.	BA, PMP	8	\$200.00
12	PM	Project Manager	Manages, plans, organizes and controls all operations and activities of IT implementation and integration projects at varying levels of size and complexity. Duties include: manage projects of varying size and complexity; ensure that users and project team members roles and responsibilities are defined; coordinate and monitor activities to ensure project is completed on time and within budget; ensures that user requirements, deliverables and approvals are defined and documented; communicate project status; promote use of PMI best practices; ensure the delivery of a product that meets user requirements.	BA	2	\$160.00

13	SPC	Sr. Project Coordinator	Coordinates activities and resources in support of technical projects that impact multiple departments, systems, or work-flows with moderate to high risk and complexity or multiple projects simultaneously with lesser risk and complexity; develops and maintains a detailed project schedule which includes administrative tasks; coordinates meetings; maintains calendars; prepares presentations, meeting minutes; ensure project documents are filed appropriately	BA, CSM	5	\$115.00
14	PC	Project Coordinator	Coordinates activities and resources in support of technical projects that impact multiple departments, systems, or work-flows with moderate to high risk and complexity or multiple projects simultaneously with lesser risk and complexity; develops and maintains a detailed project schedule which includes administrative tasks; coordinates meetings; maintains calendars; prepares presentations, meeting minutes; ensure project documents are filed appropriately	BA	1	\$75.00
15	SBA	Sr. Business Analyst	Works with most phases of systems analysis while considering the business and technical implications of the application of technology to current and future business environments. Duties include: create process change through the integration of new processes with existing ones and communication of changes to business users; formulate and define systems scope and objectives; develop and modify moderately complex information; facilitate the delivery of technical business solutions; analyze business and user needs, document requirements and devise technical solutions; recommend and facilitate quality improvement efforts	BA	5	\$180.00
16	BA	Business Analyst	Works with most phases of systems analysis while considering the business and technical implications of the application of technology to current and future business environments. Duties include: create process change through the integration of new processes with existing ones and communication of changes to business users; formulate and define systems scope and objectives; develop and modify moderately complex information; facilitate the delivery of technical business solutions; analyze business and user needs, document requirements and devise technical solutions; recommend and facilitate quality improvement efforts	BA	1	\$120.00
17	SSCA	Sr. Security Analyst	Responsible for monitoring compliance with IT security policy and applicable law; and coordinating investigation and reporting of security incidents. Monitors and assesses business continuity and disaster recovery program, perform network penetration tests, application vulnerability assessment scans and risk assessment reviews.	BA	5	\$180.00
18	SCA	Security Analyst	Responsible for monitoring compliance with IT security policy and applicable law; and coordinating investigation and reporting of security incidents. Monitors and assesses business continuity and disaster recovery program, perform network penetration tests, application vulnerability assessment scans and risk assessment reviews.	BA	2	\$160.00
19	STL	Sr. Technical Lead	Responsible for management of technical projects in whole or in part. Can direct technical staff and manage the activities of all aspects of the project life cycle. Understands complex technical scenarios and requirements and can ferret out obstacles to progress and suggest alternative strategies and directions. Responsible for reporting status of a Project to Project Management Office, Senior IT and Business Management, including the articulation of impediments, risk analysis, risk mitigations, timeline and budget impacts.	BA	5	\$225.00
20	TL	Technical Lead	Responsible for management of technical projects in whole or in part. Can direct technical staff and manage the activities of all aspects of the project life cycle. Understands complex technical scenarios and requirements and can ferret out obstacles to progress and suggest alternative strategies and directions. Responsible for reporting status of a Project to Project Management Office, Senior IT and Business Management, including the articulation of impediments, risk analysis, risk mitigations, timeline and budget impacts.	BA	2	\$190.00
21	STW	Sr. Technical Writer	Responsible for writing and editing technical documentation related to this specific implementation; develop and maintain installation, configuration and how-to documentation, on-line help and troubleshooting and maintenance documentation for technical and non-technical staff. Work with technical and business staff to analyze documentation requirements.	BA	5	\$100.00
22	TW	Technical Writer	Responsible for writing and editing technical documentation related to this specific implementation; develop and maintain installation, configuration and how-to documentation, on-line help and troubleshooting and maintenance documentation for technical and non-technical staff. Work with technical and business staff to analyze documentation requirements.	BA	2	\$60.00
