

Attachment 1 - Pricing	
Contractor:	Enterprise People, Inc
Contract Number:	PB70678
Lots Awarded:	2
<p>Authorized Users Please Note the Following:</p> <p>A competitive Mini-Bid is required for every transaction under this Centralized Contract. (Section 1.3 of Attachment 16 - How to Use this Contract)</p> <p>The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the “maximum Not-To-Exceed price” shall be rejected by the Authorized User. (Sections 7.9 of the Contract - Reasonableness of Price)</p> <p>Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User. (Section 8.5 of the Contract - Pricelist Adjustments)</p> <p>When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at http://osc.state.ny.us/agencies/travel/travel.htm. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached. (Section 7.12 of the Contract - Travel, Meals and Lodging)</p>	

Enterprise People, Inc Approved Price List			Number of Approved Titles:	10	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	EP001	Business Analyst_1/Business Analyst II	<ul style="list-style-type: none"> •Coordinate Testing of application •Develop test cases and acceptance criteria •Coordinate QA testing and acceptance between QA staff, developers, and stakeholders. •Implement information technology quality assurance standards. •Develop business and technical requirements •Identify user stories and translate them into technical requirements as required •Develop user stories and break down requirements into deliverable functionality. •Review the requirements with the stakeholders for their approval. •Provide Management Reporting and Information dissemination •Analyze and document current systems and processes as currently implemented •Make recommendations for Improvements based on client feedback. •Work directly with business stakeholders, clients, designers, developers, and engineers to coordinate the building of applications to spec and on time. 	BS	6	\$119.50
2	EP002	Scrum Master_1/Business Analyst III	<ul style="list-style-type: none"> • Perform Planning and implementation • Lead planning and/or implementation of applications & participate in the design and/or testing phases • Facilitate the definition of project missions, goals, tasks, and resource requirements • Assist in the resolution of conflicts within and between projects or functional areas • Provide Management Reporting and Information dissemination • Develop methods to monitor project or area progress; and provide corrective supervision if necessary • Prioritize and organize the user stories into weekly sprints and conduct daily scrums to track progress • Provide weekly status to the PMO and all relevant stakeholders 	BS	8	\$128.75
3	EP003	Senior Business Analyst/Business Analyst IV	<ul style="list-style-type: none"> •Develop business and technical requirements •Identify user stories and translate them into technical requirements as required •Develop user stories and break down requirements into deliverable functionality. •Review the requirements with the stakeholders for their approval. •Provide Management Reporting and Information dissemination •Analyze and document current systems and processes as currently implemented. •Make recommendations for improvements based on client feedback. •Work directly with business stakeholders, clients, designers, developers, and engineers to coordinate the building of applications to spec and on time. 	BS	10	\$148.50
4	EP004	Application Developer_1/System Developer V	<ul style="list-style-type: none"> •Develop System Design •Develop and prepares documents for the general design of solutions that meet system and security requirements, including the selection of alternative approaches. •Develop specifications for databases, communication systems, hardware, network, security, storage and software configurations. •Develop structured diagrams for the specifications of databases, communication systems, computer or storage area networks, security or network programs. •Develop, compile, maintains and documents configurations of the following: databases, servers, computers, security and network monitor systems, packaged programs, macros, utilities, and communication systems. •Develop system documentation •Develop operational and installation procedures for communication systems, hardware, network, security, storage and software •Develop guidelines and upgrade techniques of new operational procedures for the support of databases, hardware systems, operating systems software, network systems software, security and client server systems. •Develop detailed systems operations designs •Perform co-ordination and Management •Provide general programming assistance to other MIS programmers/projects as may be needed. •Design reports that track the project progress as well as create audit trails/logs, security mechanisms in order to provide status to all stakeholders •Provide assistance to MIS technical support staff when they are unable to resolve a program, database, or IT issue by themselves •Perform considerable amounts of Project Management. SCRUM delivery and Agile Development Methodologies with knowledge in Functional Business Analysis and Planning sprint delivery •Perform System Coding •Create the program code in .NET environment •Provide general programming assistance to other MIS programmers/projects as may be needed. •Test and maintain the program code to make sure it meets all the functional requirements 	BS	8	\$128.50

5	EP005	Business Strategist/Program Manager IV	<ul style="list-style-type: none"> •Design and Execute Project Management and Execution Plans •Develop and manage high-level road maps of project portfolios aligned with overall ITS strategy, business needs and strategies •Partner with appropriate Business stakeholders to facilitate the creation of business cases and value plans •Drive specific deliverables and ensure their conception, delivery, and effective implementation to meet a business need •Partner with appropriate ITS business stakeholders to develop Operational Support plans that ensure service reliability and availability •Perform Management Reporting and Information Dissemination •Provide responsive and clear communications to all stakeholders within ITS, the Business, and Suppliers •Continuously track and execute ITS roadmaps, business plans and forecasts from across the Agency Portfolios •Present reports defining project progress, problems and solutions 	BS	10	\$178.85
6	EP006	Senior Data Analyst_2/System/Data Network Admin. V	<ul style="list-style-type: none"> •Create and maintains all databases required for development, QA, Staging and production usage. •Involved in implementing all the Data model changes. •Perform the capacity planning required to create and maintain the databases. •Work closely with system administration staff because Computers often have applications or tools on them in addition to the Oracle /SQL Databases. •Perform ongoing tuning of the dalabase instances. Install new versions of the Oracle ROBMS and its tools and any other tools that access the Oracle database. 	BS	8	\$138.50
7	EP007	Senior Scrum Manager/Program Manager_V	<ul style="list-style-type: none"> •Perform Planning and implementation •Lead planning and/or implementation of applications & participate in the design and/or testing phases •Facilitate the definition of project missions, goals, tasks, and resource requirements •Assist in the resolution of conflicts within and between projects or functional areas •Provide Management Reporting and Information dissemination •Develop methods to monitor project or area progress; and provide corrective supervision if necessary 	BS	8	\$173.60
8	EP008	Senior Business Process Specialist/Business Analyst V	<ul style="list-style-type: none"> •Design and develop technical project plans •Assist the teams to identify issues and develop appropriate technical solutions/procedures for workflow requirements/processes to be used with existing applications or new business requirements. •Develop business project requirements, plans, schedules, and recommend both short-term and long-term automation solutions •Design and construct automated administrative workflow processes using software applications. •Evaluate and track progress to perform necessary enhancements •Track development progress, including appropriately managing resources across projects, and ensure that departmental and institution-wide standards are being met and Recommend improvements to development process. •Design and develop test scenarios, to include testing documentation, and form test groups, to ensure that all automated processes are formally tested and vetted prior to being released. •Develop related training materials and provide presentations and workshops to end users pertaining to related systems and services 	BS	8	\$182.60
9	EP009	System Developer - V	Provides program and system development and code integration services by choosing and applying existing programming techniques. Provides installation configuration support and quality assurance services. Creates, modifies, and maintains computer software programs. Provides plans and planning expertise, reporting and technical guidance for programming projects, when required. (Levels I, II, III, IV and V)	BS	8	\$156.50
10	EP0010	Subject Matter Expert	Provides advanced specialized scientific and engineering and other necessary related functional support required to complete IT/telecommunication tasks. Specifically, provides high-level advice, planning, troubleshooting, integration, research, design, development, testing, modeling, simulation and training on the most complex work requirements. Participates as needed in all phases of software development with emphasis on the planning, analysis, testing, integration, documentation, training and presentation phases. Applies principles, methods, and knowledge of specific functional areas of expertise to specific task order requirements.	BS	8	\$280.60
