

Attachment 1 - Pricing	
Contractor:	Glitra Inc dba Glitra Corporation
Contract Number:	PB70542
Lots Awarded:	1A, 1B, 2
<p>Authorized Users Please Note the Following:</p> <p>A competitive Mini-Bid is required for every transaction under this Centralized Contract. (Section 1.3 of Attachment 16 - How to Use this Contract)</p> <p>The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the “maximum Not-To-Exceed price” shall be rejected by the Authorized User. (Sections 7.9 of the Contract - Reasonableness of Price)</p> <p>Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User. (Section 8.5 of the Contract - Pricelist Adjustments)</p> <p>When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at http://osc.state.ny.us/agencies/travel/travel.htm. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached. (Section 7.12 of the Contract - Travel, Meals and Lodging)</p>	

Glitra Inc dba Glitra Corporation Approved Price List			Number of Approved Titles:	39	Last Updated:	10/10/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	GLT001	BUSINESS INTELLIGENCE REPORTING ANALYST I DEVELOPER	Create and manage BI dashboards, reports, and cubes for business and IT needs. Manage system data migrations, follow software development standards, and create high-quality products that match organization and performance needs. Help create business and testing requirements, unit, system, and performance testing, and continuous improvement. Creates status reports, uses advanced reporting tools to inform business clients, and constructs Data Warehouse components for performance, scalability, and flexibility. Develop data processing jobs, manage logical and physical BI data warehouses, and are proficient in SQL Server, SSAS, SSRS, SSIS, Business Objects, Tableau, data visualisation, and the Software Development Lifecycle.	Bachelor's degree in Computer Science or related field.	5	\$82.40
2	GLT002	ENTERPRISE SYSTEM ENGINEER - JUNIOR LEVEL	Installs, configures, and maintains Windows Servers in the organization. Fix performance issues and schedule patches with vendors. Building and implementing system automation scripts, supporting OS software security and stability, and contributing to architectural and disaster recovery decisions. Work on projects, coordinate system testing, and assist with acceptance testing. Technology solution design, research, and process documentation are their duties. Strong Windows OS, virtual server, scripting, project management, and communication abilities are needed.	Bachelor's degree in Computer Science, Information Technology, or related field. Microsoft Certified: Azure Administrator Associate or CCNA.	2	\$66.95
3	GLT003	Enterprise System Engineer - Senior Level	Responsible for installing, configuring, and maintaining Windows Servers in the organization's environment. Collaborate with vendors to address performance issues and schedule updates and patches. Developing and implementing scripts for system automation, supporting OS software levels for security and stability, and participating in architectural decisions and disaster recovery planning. Engages in project work, coordinates system testing, and assists with acceptance testing. Design and support technology solutions, research new technologies, and document work processes. Strong knowledge of Microsoft Windows OS, virtual servers, scripting, project management, and communication skills is required.	Bachelor's degree in Computer Science or related field, plus 6 years of experience in enterprise system implementations, operations, and maintenance, including 4 years with COTS software integration.	6	\$82.40
4	GLT004	Jr. Field Network Technician	Install, configure, and manage networks in the field for the organization. Work with the organization's technical team and its clients to install, configure, maintain, and fix all LAN/WAN and other equipment issues, ensuring efficient network functionality. Maintain computer equipment, mobile devices, phones, cabling, routers, switches, and printers, among others, to address all of the client's networking requirements either remotely or at the client's premises Provide support over the phone, through emails, or in person for Tier 1 and Tier 2 issues of their organizations or clients. Must be prepared to do physical work like lifting and relocating equipment, climbing heights to carry out cabling work, and working in enclosed spaces when required	Diploma Degree in IT, Networking or Computer Science. Certifications: Network 5 Certification, CompTIA Network+, Certified Network Computer Technician (CNCT)	2	\$41.20
5	GLT005	Sr. Field Network Technician	Support and maintain both administrative and instructional computers, software, and networks Repair of all technology-related equipment. Provide on-site assistance to install, maintain, test, and repair systems and networks. Design and prepare documents for network and ensure appropriate labeling of all equipment, perform maintenance work on networks, initiate tests, and perform troubleshooting on all outages, manage work according to diagrams and specifications for the network, and ensure compliance to all safety standards and codes and manage work according to regulations.	Bachelor's Degree in Engineering, Technical Science, Technology, Telecommunications, Electrical Engineering, Computer Science. Network 5 Certification, CompTIA Network+, (CNCT), (CCNA), (CCENT)	5	\$56.65
6	GLT006	System Architect	Responsible for designing, developing, and maintaining enterprise systems using Microsoft SharePoint. Expertise in architecting and implementing complex designs. Developing data access solutions, creating custom solutions using various programming languages and frameworks, maintaining WCAG 2.0 Level AA standards, and participating in the software development process following agile methodologies. Extensive Experience in IT infrastructure, including significant experience with Microsoft SharePoint and related technologies.	Graduation from an accredited college or university with a bachelor's degree.	10	\$114.33
7	GLT007	Application Developer - Full Stack	Responsible for developing and maintaining custom web-based applications and systems using .NET technologies, including C#, VB, REST API, JavaScript, JSON, and XML. They also develop and maintain data access layers using .NET framework libraries and SQL Server, ensuring compliance with WCAG 2.0 Level AA standards. Responsibilities include developing responsive user interfaces, employing test-driven development practices, contributing to architecture and design discussions, and participating in agile software development methodologies. Experience in web-based application development, including at least two years of experience with .NET, C#, VB, JavaScript, HTML, CSS, and SQL. One year of experience conforming to and testing for Web Content Accessibility Guidelines 2.0 Level AA (WCAG).	Graduation from an accredited college or university with a bachelor's degree.	4	\$105.06
8	GLT008	SQL Database Administrator	Responsible for designing, developing, operating, safeguarding, and maintaining integrated SQL Server databases. Manage and monitor production SQL servers and environments, author custom stored procedures, SQL jobs, and reports, and deploy SQL Server Integration Services (SSIS) packages and SQL Server Reporting Services (SSRS) reports. Responsibilities also include managing system resources for optimal performance, testing database backups and restores, contributing to architecture and design discussions, reviewing database designs, and creating disaster backup and recovery procedures.	Graduation from an accredited college or university with a bachelor's degree.	5	\$93.73
9	GLT009	IT Project Manager	Coordinates and guides projects throughout their lifecycle, including systems and process design. Responsibilities include ensuring projects adhere to scope, deadlines, budgets, and technical standards, preparing project documentation, managing risks and issues, building relationships with stakeholders, and driving business requirements formulation. Participate in continuous improvement activities, produce status reports, and manage vendor implementations while adhering to technical specifications.	Bachelor's degree in Project Management, Business or Public Administration, Computer Science, Communications, or a related field.	8	\$92.70
10	GLT010	Quality Assurance Analyst	Responsible for reviewing business requirements, developing test plans, and executing test scripts to ensure all requirements are met. Generate test data, implement build definitions, and identify issues with web applications based on WCAG 2.0 Level AA standards and ADA compliance. Responsibilities also include conducting QA evaluations, organizing and conducting testing of applications, analyzing end-user issues, and providing recommendations for improvement. Creating and maintaining automated test scripts, providing technical support, and contributing to technical documentation.	Graduation from an accredited college or university with a bachelor's degree.	6	\$66.95
11	GLT011	Cognos Developer	Responsible for developing and maintaining Cognos dashboards, reports, and cubes based on business and technology requirements. They plan and coordinate data migrations between systems, ensure compliance with software development standards and security requirements, and participate in testing activities. The role involves working both independently and as part of a cross-functional team to build relationships with stakeholders and users. Continuous improvement and effective communication are essential aspects of the role.	Bachelor's degree in a related field. Relevant software development experience	5	\$85.49
12	GLT012	Data Warehouse Developer - ETL	Responsible for developing and maintaining the data warehouse based on business and technology requirements using industry-standard best practices. Design stable, reliable, effective, and optimized databases. Planning and coordinating data migrations between systems, assisting in the formulation of business and testing requirements, and ensuring high-quality deliverables that meet organization and performance standards. The developer participates in testing activities, and continuous improvement initiatives, and communicates effectively with project stakeholders and team members.	Bachelor's degree in Computer Science, or a related field. Relevant software development experience.	6	\$87.55

Glitra Inc dba Glitra Corporation Approved Price List			Number of Approved Titles:	39	Last Updated:	10/10/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
13	GLT013	Data Warehouse Developer - Systems Architect	The Data Warehouse Developer - Systems Architect is responsible for developing and maintaining an architecture plan based on business and technology requirements. They collaborate with SQL Server DBAs, network engineers, and application developers to implement the architecture plan effectively. The role involves building relationships with project stakeholders, formulating business and testing requirements, producing high-quality design deliverables, and ensuring adherence to software development standards, change control procedures, and security requirements. The developer participates in testing activities, continuous improvement initiatives, and communicates effectively with all levels of users and team members.	Bachelor's degree in Computer Science, a related field. Relevant software development experience.	8	\$125.66
14	GLT014	Application Developer (Visual Basic)	Responsible for leading the design and development of solutions using Visual Basic based on defined requirements. Continuous improvement initiatives, status reporting, and effective communication with all levels of users and team members are integral parts of the role. Experience in software development using Visual Basic, with expertise in developing Visual Basic software solutions using Visual Studio.net. Experience working with SQL Server 2016+ and knowledge of programming concepts and the Software Development Lifecycle (SDLC) are essential.	Bachelor's degree in Computer Science, or a related field. Relevant software development experience may be substituted for the degree requirement.	5	\$78.28
15	GLT015	Telecommunications Analyst	Responsible for managing telecommunications processes and systems within the organization. Interact with various telecom providers, participate in status meetings, review invoices for accuracy, and initiate service order requests. Maintain inventories, databases, and spreadsheets related to telecommunications equipment and services. The analyst resolves discrepancies, assists in budget preparation, and performs specialized clerical duties within the IT Business Management Office. Possess proficiency in Microsoft Office Suite, including Word, Excel, PowerPoint, and Access. Demonstrate skills in analyzing telecommunications documents, operating personal computers and peripheral office equipment, providing routine information to callers, and effective verbal and written communication.	High school diploma or equivalent.	10	\$72.10
16	GLT016	IT E-Rate and Telecommunications Utility Billing Supervisor	The IT E-Rate and Telecommunications Utility Billing Supervisor oversees the E-Rate program for telecommunications reimbursement in managing revenue annually. They input and maintain the required forms of Organizations, ensuring compliance with FCC regulations and deadlines. Facilitate vendor meetings, create RFPs, review contracts and billing for accuracy, and manage telecommunications vendors. The supervisor streamlines products, identifies contracts for E-Rate eligibility, and files reimbursement requests annually. Strong communication skills, proficiency in Microsoft Office Suite, knowledge of telecommunications billing, and experience in project management are essential for this role.	Bachelor's degree in Business or Public Administration, Project Management, Communications, or related field. Certifications in ITIL (IT Service Support) and Project/Program Management are preferred.	5	\$49.44
17	GLT017	ERP Systems Operator	The ERP Systems Operator is responsible for performing comprehensive production control duties related to Enterprise Resource Planning (ERP) batch processing, including payroll, finance check processing, benefit processing, and data warehouse processing. They provide level-one support to customers by troubleshooting issues with ERP batch processing and resolving processing exceptions. The operator performs electronic uploads of payroll and finance checks, monitors forms, and maintains ERP printer and sealer hardware. They escalate system failures to higher-level support personnel and update daily production control logs. Experience with computer or technical operations, along with training in information technology or related fields, is preferred.	High school diploma or appropriate equivalent	4	\$74.16
18	GLT018	Application Developer (Microsoft SQL Server)	The Application Developer (Microsoft SQL Server) is responsible for assisting in the design and development of SQL queries and stored procedures for interfaces and reports, participate in continuous improvement activities to enhance existing processes. The developer produces status reports and communications regularly. Experience with Microsoft SQL Server is preferred, and expertise in developing SQL-based interfaces using queries and stored procedures is required. Knowledge of application and system programming, programming concepts, and the Software Development Lifecycle (SDLC) is necessary. Experience in developing solutions for ERP applications and interfaces is preferred.	Bachelor's degree in Computer Science, Engineering, Project Management, Business, Public Administration, Communications, or related field; or relevant software development	5	\$88.58
19	GLT019	Application Developer (with COBOL and SQL)	Responsible for assisting in the design and development of SQL queries and stored procedures to replace legacy COBOL interfaces. Regular production of status reports and communications is part of their duties. Proficiency in developing SQL-based interfaces using queries and stored procedures, preferably with Microsoft SQL Server, is required. They must also possess the ability to read and interpret COBOL code to generate program logic specifications. Knowledge of application and system programming, programming concepts, and the Software Development Lifecycle (SDLC) is necessary. Experience in developing solutions for ERP applications and interfaces is preferred. software development using SQL queries and stored procedures to replace legacy COBOL interfaces	Bachelor's degree in Computer Science, Engineering, Project Management, Business, Public Administration, Communications, or related field.	8	\$89.61
20	GLT020	Application Developer (with VB.NET and Web Services)	Proficiency in developing web services software solutions using VB.NET is required, along with skill in designing and documenting automated processes. Knowledge of application and system programming, programming concepts, and the Software Development Lifecycle (SDLC) is necessary. Experience in developing solutions for ERP applications and interfaces is preferred.	Bachelor's degree in Computer Science, Engineering, Project Management, Business, Public Administration, Communications, or related field; or relevant software development	6	\$88.58
21	GLT021	Business Analyst	Responsible for analyzing business processes, procedures, and organizational structures to identify problems and propose solutions that enhance organizational effectiveness and efficiency. Interact with business partners, and internal and external stakeholders, including executive staff, to understand organizational needs. Conducting detailed gap analysis to identify discrepancies between system functionality and organizational requirements is a key responsibility. Collaborate with stakeholders to define project scope, objectives, success criteria, and deliverables. Additionally, work with technical teams to elicit and document requirements, presenting solutions to stakeholders and refining requirements iteratively. The Business Analyst also assists in creating test cases, verifying system functionality, and documenting and tracking project issues and risks.	Bachelor's degree in Business or Public Administration, Computer Science, Information Technology, Information Systems, or related field.	8	\$81.37
22	GLT022	Technical Trainer	The Technical Trainer is responsible for planning, designing, and developing resources to support enterprise applications, including One Learning Management System, Student Information System, and Scheduling software. They assess and identify application training needs, develop training materials and modalities, and provide professional development, support, and training to staff. The Technical Trainer also provides expertise in the inter-connectivity of applications, updates support materials, and coordinates communication with teachers and relevant offices. They utilize various technologies to facilitate training, including computer-based tools, video, online learning management systems, and simulations.	Bachelor's degree in Computer Science, Information Technology, Education, or related field.	6	\$72.10

Glitra Inc dba Glitra Corporation Approved Price List			Number of Approved Titles:	39	Last Updated:	10/10/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
23	GLT023	Web Accessibility Specialist	The Web Accessibility Specialist conducts quality assurance evaluations to ensure websites comply with Web Content Accessibility Guidelines (WCAG) 2.0 AA standards and Americans with Disabilities Act (ADA) requirements. They perform annual automated and manual audits of office and school websites to maintain WCAG 2.0 Level AA compliance, communicate audit findings, and implement corrective actions with school and office stakeholders. The specialist recommends support procedures, develops training documentation for web accessibility, and collaborates with web developers to ensure WCAG compliant designs. They also develop and maintain standard templates for testing applications for WCAG compliance, create and execute WCAG test plans and scenarios for new products and upgrades, and maintain updated resource materials for ongoing WCAG compliance efforts.	Bachelor's degree in Computer Science, Information Technology, Education, or related field.	5	\$80.34
24	GLT024	Application Support	The Application Support role involves analyzing and responding to enterprise application support requests, directing users to knowledgebase articles or appropriate support teams, understanding the interdependence of various enterprise applications, utilizing ticketing systems for support request management, providing tier one support to end users, tracking support requests, maintaining user rights within applications, collaborating with technical teams, gathering user feedback, reviewing and preparing documents related to student data, reconciling discrepancies in student information, and processing internal and external requests for student information.	High school diploma or equivalent.	4	\$52.53
25	GLT025	IT Engineer, Telecommunications/NOIP	The IT Engineer in Telecommunications/NOIP is responsible for developing, operating, and maintaining enterprise network phone systems. This role involves working closely with vendors and network analysts to identify performance issues, schedule updates, and patches. Additionally, the IT Engineer develops and implements scripts and utilities for system automation, reviews requests for network/phone system modifications, participates in disaster recovery planning, engages in project management, coordinates system testing, and provides support for technology solutions.	Bachelor's degree in computer science or related field.	6	\$85.49
26	GLT026	IT VOIP NETWORK TECHNICIAN	Installing, configuring, and managing Voice over Internet Protocol (VoIP) systems within company. Responsible for analyzing existing VoIP networks and computer systems, developing architecture plans for voice and data services, and installing network hardware modules including IP and PBX communication servers. Perform troubleshooting to system failures and identify bottlenecks to ensure long term efficiency of network	Bachelor's degree in information technology, computer science, or a similar field. Certifications: (CCNA), CompTIA Network, (CTNS), (CCNP), Juniper Networks Certified Internet Associate (JNCIA)-Junos	5	\$63.86
27	GLT027	IT ENGINEER - NETWORK SECURITY	Planning, designing, optimizing, implementing, auditing, and troubleshooting the network security system to improve the efficiency of the organization. Responsible for the design and implementation of network security solutions in an organization, not excluding network security testing and implementation of new products or improvements to existing and current products. Provide support to the production environment and ensure that the right security policies and practices are implemented and enforced, including conducting client penetration and vulnerability test and reports.	Bachelor's Degree in Engineering, Computer Science, and Engineering, Telecommunication Certifications: (CCNA), CompTIA Network+, (JNCIA-Junos), (CISSP), Security 5 Certification	5	\$119.48
28	GLT028	Help Desk Support Technician	The Help Desk Support Technician is responsible for providing technical assistance and support to users experiencing issues with hardware, software, and other technology-related problems. They communicate with customers at all levels, install and configure applications and software packages, and perform basic troubleshooting via remote computer access and phone. The technician resolves routine issues related to hardware and software, creates tickets for all problems reported to the Technology Helpdesk, and escalates unresolved issues as necessary. Additionally, they assist clients with device-related issues over the phone, determine the technical needs of supported systems, participate in team projects, and maintain accurate records of activities in the service desk software system. Experience with remote troubleshooting is preferred.	High school diploma or an appropriate equivalent.	5	\$42.23
29	GLT029	Help Desk Team Leader	Supervise and provide feedback to helpdesk technicians, overseeing the daily operations of the call center, and serving as "2nd Level" support for Help Desk technicians. They are tasked with maintaining documentation for processes and procedures, providing metrics reporting to the Technology Support Manager, and troubleshooting computers, peripheral equipment, and software. They install and configure applications and other supported software packages, perform basic troubleshooting and triage of computers via remote computer access and phone, and create tickets for all problems reported to the Technology Helpdesk. The Help Desk Team Leader also records activities in the service desk software system, creates and validates internal supported system documentation submissions, and attends trainings to gain knowledge that will benefit the team. Experience with remote troubleshooting is preferred.	Possession of a 2-year degree or an appropriate equivalent.	5	\$56.65
30	GLT030	Support Technician	Responsible for effectively communicating with all levels of customers, including administrators, staff, and vendors. Install and support new devices, such as computers, tablets, projectors, and document cameras, along with accompanying software. Perform diagnostic repair procedures, and install and configure supported device operating systems. Routine diagnostics and maintenance with multiple operating systems are part of their responsibilities, along with testing new releases for supported systems and providing network support and troubleshooting.	Associate's Degree in a related technology area. Possession of certifications such as CompTIA, A+ certification, HP Certification, or other hardware vendor-specific certifications is desirable.	5	\$41.20
31	GLT031	FP&A Analyst	Managing statistical reports, financial data analysis, variance analysis, budgeting, expenditure planning, and financial packages. Collaboration with accounting for accurate financial reporting, automated reporting/forecasting tools, miscellaneous analysis, and special initiatives to support departmental goals. Oracle EBS, OBIEE, OBIA, and Microsoft BI expertise Database experience with Oracle, Kronos, and ADP Payroll Must be proficient in Outlook, Word, PowerPoint, and Excel.	Associate or Bachelor's degree in Business and Computer Science. Oracle and Kronos Certification Preferred	3.5	\$113.30
32	GLT032	Payroll Analyst and Manager	Kronos Timekeeping, ADP Payroll, and manual/Excel labour reporting reconciliation. Help process unionised labour group payrolls and benefits quickly. Report and handle labor/payroll records for outside organisations as needed. For timely payroll processing, update employee master payroll file garnishments, tax exemptions, bank account information, and deductions. Maintain timely electronic imaging for data retention per internal procedures and federal legislation. Help with internal and external audits. Expertise in Microsoft BI, Outlook, and Excel is required. UKG Pro Workforce experience	A Bachelor's degree in a relevant field is required for this position. Demonstrated proficiency in Kronos, ADP Payroll, Outlook and Excel.	3.5	\$113.30

Glitra Inc dba Glitra Corporation Approved Price List			Number of Approved Titles:	39	Last Updated:	10/10/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
33	GLT033	Accounting Manager/Controller	Manages all accounting department operations to ensure accurate financial reporting and regulatory compliance. Manage accounting staff daily tasks, accounts payable and receivable, reconcile financial statements, and prepare financial reports for top management. Establishes accounting policies, guarantees GAAP compliance, and manages audits and tax filings. Manage budgeting, forecasting, cash flow, and financial data analysis for strategic decision-making.	Bachelor's Degree in Accounting, proven experience as an Accounting Manager, Assistant Controller, or similar position. CPA preferred. Advanced proficiency with ERP systems (preferably Oracle, Workday, NetSuite or equivalent)	7,10	\$159.65
34	GLT034	Accounts Receivable Supervisor/Manager	Manages accounts receivable, including invoicing, collections, and payment processing. Establish and enforce financial regulations, manage accounts receivable clerks, and monitor customer accounts for unpaid balances. Collaborate with sales, customer support, and finance to resolve billing issues, update aging reports, and evaluate account balances. Finds trends, improves processes, and writes reports on receivables.	Bachelor's degree in Accounting, Finance, Business Administration, or related field preferred. Working knowledge of Oracle EBS Accounts Receivable module (not cloud-based) or equivalent.	5	\$159.65
35	GLT035	IT Systems Support Analyst	Software Support Analyst require a general knowledge of IT application support tools, being responsive to end user needs, effective and open communications, ability to learn new applications quickly, and work well with stakeholders. Duties include: Monitor applications to ensure they are ready for end-users. Identify and correct issues with the applications. Coordinate issue resolution with other support teams. Test software patches. Setup new application users and permissions. Application System Administration - update application configuration to address new business requirements. Fulfill ad-hoc requests from end-users. Track and report incidents and support requests.	Bachelor of Science degree in Computer Science or equivalent. Microsoft office enterprise software (Word, Excel, Outlook, OneNote, Visio, Teams, OneDrive) o Kronos 8.1, Oracle EBS 12.1.3, Ungerboeck 19.2 Oracle Data Integrator (ODI) version 11g or 12c, Microsoft Power Suite, Power BI Reporting Services: Microsoft SQL, Oracle SQL, Microsoft SharePoint	8	\$113.30
36	GLT036	Reports Developer (Workday)	Collaborates with various stakeholders to identify needs for reporting. Design, build, test and generate reports utilizing information databases; reviews, revises format, and analyzes data to ensure information meets user needs. Create and modify queries, views, stored procedures and reports using SSRS, Workday Reporting, UKG Reporting, Salesforce and/or Tableau. Build and maintain calculated fields, where applicable within the specific application environment, in accordance with best practices and industry standards. Work with security team to build reports that are compliant with the security roles and privileges (specifically within Workday). Collaborates closely with technical support, database administrators, systems analyst, software developers and other business groups. Troubleshoot and resolve report related issues. Aides in data discovery or cleanup activities with users and project teams. Execute data and report validations to support ongoing quality assurance.	Bachelor's degree in related field: Computer Engineering, Data Engineering, Industrial Engineering Workday Report Certified	7	\$86.52
37	GLT037	Enterprise Applications Developer	Design, code and test application software using .NET as the front-end development tool and Oracle DB as a back-end database; provide additional technical assistance with custom development and support activities as directed by the designated MTA Project Manager. This includes knowledge transfer in the areas of .NET, Oracle SQL and PL-SQL programming and performance monitoring; assist MTA staff with learning how to develop and implement .NET. The consultant will be responsible for coding the user interface including data entry screens and operations screens for display, selection and creation of operational schedules derived from MTA provided schedules, creation of planned and unplanned messages for use with the operation schedule(s) in chronological order or displayed immediately when an exception or emergency occurs; Create and test applications with MTA staff for the various operating environments.	Bachelor's degree in Computer Science or relevant field1. Certifications: Software Engineering Master Certification (SEMC), Programming in C# Certification	8	\$85.75
38	GLT038	Enterprise System Architect	The Systems Architect will have responsibility to support the technical operational aspects of the Medicaid Data Warehouse (MDW) and the Medicaid Data Enterprise. This includes all hardware, software, and technical infrastructure in support of the design, development, and implementation of the MDW and the Medicaid Data Enterprise. Specific duties include: Create technical specifications. Review and evaluate technical specifications. Review and evaluate procurements from both a technical and financial perspective. Support and take responsibility for enterprise licensing, budget and forecasting efforts. Ensure compliance with business objectives and requirements. Assist NYS staff with project vendor(s) / system integrator(s). Ensure functionality is integrated with other applications. Create Logical and Physical Technology Models. Work with Vendor and NYS ITS to support existing infrastructure. Support Enterprise Architecture review and governance. Participate in Data Governance meetings. Fulfill research/review priority requests from management. Review new and existing data designs including database, SQL and ETL applications to ensure correctness. System and Vendor Quality Assurance.	Bachelor's and Master's Degree in Computer Science, Certifications include (CEA) Black Belt Program, FEAC Institute, ITIL Master, AXELOS, (RHCA), Red Hat, Google Professional Cloud Architect, Google Cloud Certification, AWS Certified Solutions Architect – Professional,	10	\$81.25
39	GLT039	Oracle IDAM Administrator	As a Senior resource specialize in identity governance solutions, overseeing access certification, role management, and policy enforcement. Design and implement identity governance frameworks to ensure compliance and reduce security risks. Provides technical expertise including application security, security architecture, policy enforcement, directory, platform security, Single Sign On(SSO), Multi-Factor Authentication (MFA), and security frameworks. Experienced in legacy and modern identity providers (Oracle IDM, Microsoft AD, Entra, Okta, ADFS, SailPoint, CyberArk, ForgeRock, Ping Identity, OpenID, SAML Azure AD, certificates and PKI, AWS SecurityAnd cloud-based identity management as a service (IDaaS).	Bachelor's Degree in Information Technology or related field, (CIGE), (CIST), (CIAM),(CIMP)3, (CAMS),(CIPA), (CRFS).□	10	\$132.87
