

<b>Attachment 1 - Pricing</b>	
<b>Contractor:</b>	I & I Software, Inc.
<b>Contract Number:</b>	PB70587
<b>Lots Awarded:</b>	Lot 1A, Lot 1B, Lot 2
<p><b>Authorized Users Please Note the Following:</b></p> <p>A competitive Mini-Bid is required for every transaction under this Centralized Contract. (Section 1.3 of Attachment 16 - How to Use this Contract)</p> <p>The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the “maximum Not-To-Exceed price” shall be rejected by the Authorized User. (Sections 7.9 of the Contract - Reasonableness of Price)</p> <p>Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User. (Section 8.5 of the Contract - Pricelist Adjustments)</p> <p>When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at <a href="http://osc.state.ny.us/agencies/travel/travel.htm">http://osc.state.ny.us/agencies/travel/travel.htm</a>. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached. (Section 7.12 of the Contract - Travel, Meals and Lodging)</p>	

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	P00001	Project Principal	A Project Principal has executive responsibility and management accountability for the execution of client projects and typically oversees multiple projects. A Project Principal sets overall policy and direction for the engagement, communicates with clients and consulting teams to resolve issues, provide Subject Matter Expertise (SME) in one or more areas of their expertise to projects in their functional areas, act as senior client liaison, oversee contract and financial management for one or more engagements.	Bachelor's degree	12	\$147.00
2	P00002	Project Manager	Provides management and technical guidance to contract personnel on the performance of all task orders issued under this contract. Expertise will be in advanced or highly complex IT systems. Shall be able to evaluate and manage the work performed in all phases of software development and implementation, with a special emphasis on study, analysis, and testing and acceptance phases. Areas of IT specialization may include telecommunications, interactive processing, real-time programming, software/ interaction, source data automation, software validation and verification, micro/mini computers, teleprocessing monitors, and operating system software. Participates in hardware/software evaluations. Coordinates with Government personnel to ensure that the solution will satisfy the customer's requirements. Provides highly technical expertise and guidance in IT specialties not covered by other specialties.	Bachelor's degree	2	\$65.00
3	P00003	Senior Project Manager	Must demonstrate proven leadership and management skills. Requires comprehensive engineering project development experience from start through deployment, a demonstrated ability to provide guidance and direction for multiple tasks across several functional areas, including the use of different technologies. Proven expertise in understanding program requirements of the types of tasks to be performed, reviewing and evaluating all work performed, management and control of funds and resources, and providing direction to ensure compliance with all management policies.	Bachelor's degree	5	\$68.00
4	P00004	IT Project Manager	Serves as the project manager for a project, task order or a group of task orders affecting the same common/standard/migration system and shall assist the Program Manager in working with the Government Contracting Officer (CO), the task order-level Task Managers (TMs), Government management personnel and customer agency representatives. Under the guidance of the Program Manager, responsible for the overall management of the specific task order(s) and insuring that the technical solutions and schedules in the task order are implemented in a timely manner. Performs enterprise wide horizontal integration planning and interfaces to other functional systems. Has broad experience and background in the execution and delivery of IT projects.	Bachelor's degree	8	\$132.00
5	P00005	IT Consultant	Leads major portions of large or medium projects and leads small projects autonomously. Provides highly technical and specialized solutions to complex IT problems. Performs analyses and studies and prepares reports; Gathers facts through research, interviewing, surveys, etc. analyzes the client's business, draws conclusions, prepares final reports and gives presentations. Uses in-depth consultative skills and business knowledge to practice business transformation objectives and processes.	Bachelor's degree	4	\$103.00
6	P00006	Oracle Consultant	Hands on experience in Oracle deployment, configuration, integration, and performance tuning. Analyze, design, develop and troubleshoot enterprise integrations built using Oracle Integrations. Participate in system integration planning and recommends alternative technologies that will enhance current or anticipated technology platforms that support overall business goals. Develop technical solutions for business requirement. Hands on Service Oriented Architecture experience including development of custom provisioning and approval workflows. Experience in developing/configuring custom Admin Roles. Experience in analyzing functional/business requirements and developing and communicating technical requirements and processes.	Bachelor's degree	5	\$117.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
7	P00007	PeopleSoft Consultant	Participating in business process analysis, systems analysis, systems design, development, testing, deployment, and support. Performs (full lifecycle) software development. Responsible for planning and deployment activities, including providing analysis and recommending strategies to ensure smooth systems transitions. Support technical and functional aspects of code deployment to production environments. Providing technical-functional services through the entire systems development lifecycle. Identify, implement and maintain custom application. Providing recommendations regarding proposed system architectures to ensure successful enterprise deployments. Configuring the PeopleSoft systems to meet client's unique business requirements.	Bachelor's degree	5	\$127.00
8	P00008	Software Engineer	Work with peer developers, Scrum Masters, Product Owners to iteratively create technical solutions that meet business and technical requirements. Handle end-to-end development, including coding, testing, and debugging during each cycle, which adheres to the acceptance criteria. Create and maintain technical documentation, leveraging best practice source code management. Participate in code reviews. Identify defects and resolve collaboratively with colleagues. Building web applications. Professional experience with C# language, .Net technologies, Java, Full Stack and Angular. Solid understanding of multiple web frameworks and technologies. Experience building and deploying code on cloud-based platform services such as Azure, Amazon Web Services (AWS), or Google Cloud Platform (GCP).	Bachelor's degree	5	\$129.00
9	P00009	Personally Identifiable Information (PII) Privacy and Security Data	Provide personally identifiable information (PII) privacy and security architecture expertise Assist in establishing customer and employee data privacy and security programs Provide PII analysis of the identified PII data to include data use process mapping, data classification, data stewardship and data retention Assist development of integrated organization-wide policies, plans and procedures enabling the business use of PII data in a protected and secure data environment Assist systems administrators in implementing corrective actions required as a result of vulnerabilities uncovered during data discovery and analysis Assist with project planning and scope for improved privacy and security of customer and employee PII Assist in developing operational processes and controls to ensure the effective and safe use and storage of PII data across the enterprise.	Bachelor's degree	3	\$132.00
10	P00010	Software Architect	Serves as technical lead for large-scale software development efforts. Oversees teams of technical resources in the full development life-cycle for complex software systems. Has demonstrated technical and business management experience. Interacts with clients and technical resources to ensure on-time, within-budget delivery of system specifications. Defines, gathers and analyzes system requirements and specifications. Designs architecture and data flow of complex software systems. Programs software components to specifications. Integrates, tests, and debugs software components. Deploys and maintains software systems. Tunes system performance in both software and hardware. Provides technical database support including database design, development and management. Recommends and deploys long term database process and performance improvements. Develops database policies and procedures. Knowledgeable of data warehousing and data	Bachelor's degree	4	\$72.00
11	P00011	Data Architect	Defines and applies data policies in data discovery, data analysis and data architecture design across the enterprise. Works closely with subject matter experts to uncover, document, validate and model business requirements into specifications used to develop conceptual, logical and physical data structures. Ensures reuse and consistency of use of data across all applications. Monitors the implementation of business rules associated with data as reflected in the metadata.	Bachelor's degree	8	\$103.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
12	P00012	Systems Architect	Works independently to provide system design and engineering tasks which are concerned with design and implementation of enterprise systems development and integration, including hardware, software, and support personnel, facilities and/or equipment. Integrates design and engineering services into customer organization's Enterprise Architecture. Work encompasses all elements of the system, including the network, hardware, software, and services. Supervises team of engineers through project completion and is considered an expert in one or more specific areas of computer system design and networking. Responsible for complex technical/engineering projects, as the lead design authority on the project. Ensures conformance with system and network design, engineering, and customer specifications.	Bachelor's degree	3	\$108.00
13	P00013	Solution Architect	Participates in the design, creation, and maintenance of computerized applications and databases, based on a deep understanding of business transformation and enterprise architecture's role in it. Responsible for the quality control and auditing of databases to ensure accurate and appropriate use of data. Consults with and advises users on access, works directly with users to resolve data conflicts and inappropriate data usage, and directs the maintenance and use of the enterprise architecture encyclopedia. Consults with programming personnel to resolve system performance issues. Responsible for the installation, maintenance, configuration, and integrity of databases. Implements application enhancements that will improve the reliability and performance of the application. Works with network engineers to schedule installations and upgrades and maintains them in accordance with established IT policies and procedures. Responsible for file maintenance, control, and product support and facilitates change control, problem management, and communication among architects, engineers, and analysts. Establishes and enforces processes to ensure a consistent, well-managed, and well integrated application infrastructure. Develops appropriate application and process documentation. Expertise with multiple technology stacks, latest evolving technology trends and object modeling methodology.	Bachelor's degree	8	\$132.00
14	P00014	Business Analyst	Analyze user needs to determine functional and cross-functional requirements. Handles test scripts and service requirements; works closely with end users on project development and implementation. Analysts should have a working knowledge of relational database environments, structured analysis, data modeling, information engineering, mathematical model building, sampling, and business processes to plan the system. They must be able to specify the inputs to be accessed by the system, design the processing steps, and format the output to meet the users' needs. They also may prepare cost-benefit and return-on-investment analyses to help management decide whether implementing the proposed system will be financially feasible.	Associate's degree	3	\$82.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
15	P00015	Sr. Business Analyst	Analyze user needs to determine functional and cross-functional requirements. Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task. Performs functional analysis to identify required tasks and their interrelationships. Possesses expert knowledge and experience in the requirements and integration. Works with end-users and developers on implementation and systems integration. Lead development of testing, Quality Assurance processes and requirements traceability. Provides daily supervision and direction to support staff and assist with development of plans and status reports.	Bachelor's degree	4	\$117.00
16	P00016	Business Systems Analyst	Under general direction, formulates/defines project scope and objectives based on user needs and thorough understanding of business problems. <ul style="list-style-type: none"> <li>o Devises or modifies procedures to solve complex problems considering existing system/application capacity and limitations, and form of desired results.</li> <li>o Analyze, develop and write business requirements, translate into functional design documents and participate in the technical design, test planning and user documentation processes for complex application systems.</li> <li>o Gather and analyze information / provide recommendations to address and resolve business issues for a specific business group.                             <ul style="list-style-type: none"> <li>o Analyze and re-engineer business processes.</li> <li>o Identify and address cross-project dependencies and impacts.</li> </ul> </li> <li>o Participate in software design, prototyping, construction and testing of new or enhanced applications.                             <ul style="list-style-type: none"> <li>o Support in training users on new or enhanced applications.</li> </ul> </li> <li>o Track problems and bugs; revise documentation of system revisions and modifications, as needed.</li> <li>o Require preparing requests for proposals, statement of work, presentations and reports for senior leadership.</li> <li>o Provide assistance to less experienced business and system analysts.</li> </ul>	Bachelor's degree	7	\$95.00
17	P00017	Quality Assurance Specialist	Assists in the implementation of Quality Assurance processes for correctness, adherence to the design concept and to user standards, review of program documentation to assure Government standards/requirements are adhered to, and for progress in accordance with schedules. Development of test plans, test scripts, testing processes and development of QA documentation. Coordinates with development teams to ensure bug fixes, problem solution and user satisfaction. Makes recommendations, if needed, for approval of major systems installations. Prepares milestone status reports and deliveries/presentations on the system concept to colleagues, subordinates and end user representatives.	Associates degree	3	\$54.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
18	P00018	Software Quality Analyst	<ul style="list-style-type: none"> <li>Develop publish and implement test plans</li> <li>o Write and maintain test cases and test scripts</li> <li>o Create and maintain test data</li> <li>o Clearly document and re-verify all defects</li> <li>o Document test results</li> <li>o Analyzing the requirements for multi-tier architected web-commerce applications from industry standard design documents.</li> <li>o Developing high-level test design and planning documentation.</li> <li>o Design, code, test, and execute test case scenarios</li> <li>o Analysis of test results leading to defect isolation and resolution.</li> <li>o Report and track defects in a bug tracking system.</li> <li>o Identify test automation opportunities</li> <li>o Identifying process improvements and take lead on ongoing initiatives.</li> <li>o Experience in implementing software solutions in a retail environment, including POS implementation</li> </ul>	Bachelor's degree	3	\$95.00
19	P00019	Quality Assurance (QA) Test Lead	<ul style="list-style-type: none"> <li>Define the Test Strategy for various projects.</li> <li>o Develop the test plan for the tasks, dependencies and participants required to mitigate the risks to system quality and obtain stakeholder support for this plan.</li> <li>o Estimate and obtain management support for the time, resources and budget required to perform the testing.</li> <li>o Ensure content and structure of all Testing documents / artifacts is documented and maintained.</li> <li>o Document, implement, monitor, and enforce all processes for testing as per standards defined by the organization and project.</li> <li>o Check / Review the Test Cases documents.</li> <li>o Keep track of the new requirements / change in requirements of the Project.</li> <li>o Escalate the issues about project requirements (Software, Hardware, Resources) to Project leadership.</li> <li>o Track and prepare the report of testing activities like test testing results, test case coverage, required resources, defects discovered and their status, performance baselines etc.</li> <li>o Review various reports prepared by BSAs/Testers</li> </ul>	Bachelor's degree	7	\$103.00
20	P00020	Web Applications Developer	<ul style="list-style-type: none"> <li>Provide support to develop Web based applications including on line customer service to transform government agencies to be able to deliver their services on line. Provide support in developing the site concept, interface design, and architecture of the web-site. Provide support for the implementation of interfaces to applications.</li> </ul>	Associates degree	3	\$63.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
21	P00021	Applications Developer	Participates in design, implementation, and integration of software or independently performs complex software development tasks. Formulates /defines specifications for complex operating software programming applications or modifies/maintains complex existing applications using engineering releases and utilities from the manufacturer. Designs, codes, test, debugs, and document the programs. Provides overall operating system, such as sophisticated file maintenance routines, large Telecommunications networks, various middleware and software programs and applications. Assists all phases of software systems programming applications. Evaluates new and existing software products.	Bachelor's degree	4	\$68.00
22	P00022	Sr. Applications Developer	Leads a small team performing design, implementation, and integration of software or independently performs complex software development tasks. Formulates /defines specifications or complex operating software programming applications or modifies/maintains complex existing applications using engineering releases and utilities from the manufacturer. Also, Designs, codes, test, debugs, and documents those programs. Participate all phases of software systems programming applications. Assist in evaluating new and existing software products.	Bachelor's degree	4	\$83.00
23	P00023	Principal Application Developer	Leads a medium to large technical team performing design, implementation, and integration of software or independently performs complex software development tasks. Formulates /defines specifications for complex operating software programming applications or modifies/maintains complex existing applications using engineering releases and utilities from the manufacturer. Also, Designs, codes, test, debugs, and documents those programs. Provides overall guidance for operating systems, such as sophisticated file maintenance routines, large telecommunications networks, various middleware and software programs and applications. Assist all phases of software systems programming applications both custom as well as packaged software. Experienced in a broad range of technologies or specialized in one technology stack. Evaluates new and existing software products.	Bachelor's degree	4	\$98.00
24	P00024	Database Management Specialist	Work on the development of database and data related projects including business requirements, design of logical and physical data models, development of database objects and scripts, testing, deployment and operations. Provides highly technical expertise in the use of DBMS. Evaluates and recommends available DBMS products to support validated user requirements. Defines file organization, indexing methods and security procedures for specific user applications.	Bachelor's degree	4	\$68.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
25	P00025	Sr. Database Management Specialist	Supervises the development of database and data related projects including business requirements, design of logical and physical data models, development of database objects and scripts, testing, deployment and operations. Plans and budgets staff and data base resources. When necessary, reallocates resources to maximize benefits. Prepares and delivers presentations on database management systems (DBMS) concepts. Provides daily supervision and direction to support staff.	Bachelor's degree	4	\$83.00
26	P00026	Database Modeler I	Identifies and documents data requirements that support business needs. Create context level information flow diagrams. Perform data analysis and data profiling. Develop data models that support specific project needs as well as data sharing across systems. Design data interfaces and document source-to-target data transformation rules. Work with Database Base Administrator's and provide information needed for transferring logical models into physical model. Required Knowledge of enterprise architecture concepts and practices. Thorough understanding of different data integration methods and techniques. Ability to identify issues with information flows between systems and recommend improvements. Extensive data modeling and data design experience. Analyzes functional business applications and design, specifications for data and functional activities. Develops data models, block diagrams, and logic flow charts. Prepares required documentation, including both program-level and user-level documentation. Demonstrated ability to work independently with minimal supervision.	Bachelor's degree	4	\$76.00
27	P00027	Data Warehouse Specialist I	Performs as a Data Warehouse Developer/Administrator on large-scale database management systems, knowledge of system and database packages and ability to develop complex software to satisfy design objectives. Possesses ability to assume increasing responsibilities in enterprise data warehouse project information system design and management. Applies an enterprise-wide set of data warehouse disciplines for the planning, analysis, data refinement, design and construction of information systems on an enterprise-wide basis or across a major sector of the enterprise. Develops analytical and computational techniques and methodologies for problem solutions. Performs enterprise-wide strategic systems planning, business information planning, business and analysis. Provides daily supervision and direction to organization.	Bachelor's degree	4	\$108.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
28	P00028	Jr. Programmer Analyst	Assist with Joint Application Development (JAD) sessions with business users to gather and analyze requirements. Develop and document technical requirements from gathered business requirements. Assist with general design and detailed design including user interfaces to meet requirements. Develop code modules, data loading scripts, testing scripts and batch processes under supervision of senior staff. Assist with the development of detailed technical documentation, technical manuals, end-user training and tier 2 user support.	Associates degree	2	\$54.00
29	P00029	Programmer I	Develops diagrammatic plans for solution to problems by means of IT hardware and software. Analyzes programs outlined by a system analyst for such factors as type and extent of information to be transferred from storage units, sorting, and format of final printed results. Confers with contractor technical and analyst personnel, and designs detailed computations and sequence of machine operations. Translates design into coded instructions. Verifies accuracy and validity of programs by preparing sample data and testing. Corrects program errors and modifies the program as required by revising instructions. As required, may supervise programmers in all phases of software development projects.	Associates degree	5	\$67.00
30	P00030	System Administrator I	Optimizes system operation and resource utilization, and performs system capacity analysis and planning. Ensures the security and resource access policies are implemented. Provides assistance to users in accessing and using business systems. Upgrades Operating Systems, applies patches and enhancements. Reconfigures the resources for new distribution requirements.	Bachelor's Degree	5	\$82.00
31	P00031	LAN Administrator Level I	Installs, maintains and monitors the operation of the organization's local area network. Evaluates vendor products in hardware, software, and telecommunications equipment and recommends purchases consistent with the organization's short and long term objectives. Recommends and implements LAN policies and standards and ensures adherence to security procedures. Maintains contact with outside organizations in the maintenance, service and/or purchase of the LAN. Trains users on LAN operations and procedures. Position may require certification.	Bachelor's degree	4	\$73.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
32	P00032	Database Administrator I	<p>Provides technical expertise in the design of the database structures. The Database Administrator shall be responsible for a group of databases. The Database Administrator shall have experience in the logical design of database structure. This includes record content and record to record (set) relationships to achieve a desired information processing goal. The individual shall have experience in the design and use of databases in the N-tier or client server and Operational Database Connectivity (ODBC) environment. The individual shall have experience in translation of the logical design into the schema view of the logical and physical aspects of the database.</p> <p>He/she shall be knowledgeable in the design and translation of schemas to partition the total view of the database into subset views of each distinct application, experience in maintenance of privacy locks and monitoring of subschemas validated against the schema and programs compiled against the subschema. The individual shall also be able to determine when and where problems exist in a database and be able to fix those problems. He/she will institute and implement database backup and recovery procedures. Setup Database security and performance standards.</p>	Bachelor's degree	7	\$86.00
33	P00033	Functional Analyst I	<p>Functional knowledge of task order specific requirements, or developing functional requirements for small to mid-size projects or specific tasks. Demonstrated ability to work independently or under only general direction of the Principal Functional Analyst. Leads a medium to large team performing tasking in area of discipline or related areas (Operations Analysis, T&amp;E/IV&amp;V, CM, QA, Technical Documentation, Information Security, Financial Management and Administration, Program Support, etc.), or independently performs highly complex tasks in area of discipline or related areas.</p> <p>Works with the Principal Functional Analyst to define and document task requirements. Performs systematic reviews of selected functions to determine application and design against defined requirements. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Provides functional guidance on assigned tasks. Skilled at the advanced word processing, spreadsheet, and general office tools.</p>	Bachelor's degree	3	\$54.00
34	P00034	System Analyst I	<p>Provide the analysis and design of business applications on complex, large-scale systems, including experience in database management. Knowledge of state-of-the-art storage and retrieval methods is required, as well as the ability to formulate specifications for computer programmers to use in coding, testing, and debugging of computer programs. Provide systems analysis and design, development, support implementation, and integration of micro, mainframe, distributed, and N-tier or client server systems.</p>	Bachelor's Degree	5	\$84.00

I & I Software, Inc. Approved Price List			Number of Approved Titles:	36	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
35	P00035	Graphical User Interface (GUI) Development Specialist Level I	Provides highly technical expertise and guidance for the development of N-tier or client server applications, which will operate in a GUI environment including but not limited to Microsoft Windows, OS/2 Presentation Manager, X-Windows, and UNIX. Provides recommendations and guidance to the Government and other contractors in the conversion of character-based applications to GUI based platforms. Participates in the evaluation of GUI/OOPS development environments to determine the most suitable platform to support the conversion, development and operation of applications	Bachelor's degree	4	\$60.00
36	P00036	Business Process Re-engineering Specialist	Applies process improvement and re-engineering methodologies and principles to conduct process improvement and modernization projects. Responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of project activities and objectives. Additional duties may include business process and data modeling, developing modern business methods, identifying best practices, and creating and assessing performance measurements. Provides group facilitation, interviewing, training, and provides additional forms of knowledge transfer. Key coordinator between multiple project teams to ensure enterprise-wide integration of reengineering efforts.	Bachelor's degree	4	\$88.00
