

Attachment 1 - Pricing	
Contractor:	Unisys Corporation
Contract Number:	PB70554
Lots Awarded:	2, 3
<p>Authorized Users Please Note the Following:</p> <p>A competitive Mini-Bid is required for every transaction under this Centralized Contract. (Section 1.3 of Attachment 16 - How to Use this Contract)</p> <p>The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the “maximum Not-To-Exceed price” shall be rejected by the Authorized User. (Sections 7.9 of the Contract - Reasonableness of Price)</p> <p>Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User. (Section 8.5 of the Contract - Pricelist Adjustments)</p> <p>When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at http://osc.state.ny.us/agencies/travel/travel.htm. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached. (Section 7.12 of the Contract - Travel, Meals and Lodging)</p>

Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	UIS2024-CN1	Consultant 1	Responsible for one or more service delivery functional roles involved with the analysis, design, development, implementation, testing, documentation and support of systems, applications and / or processes. Key responsibilities may include: Designing and supporting configuration management process, such as source code management, workflow, issue tracking, deployment, provisioning and testing automation. Performing development, testing and implementation of code including for low code platforms and processes. May manage the integrity of pre-production environments, such as development, test, QA and staging environments. May lead efforts in specific process improvement, development, testing, documentation and technical automation and implementation areas.	Bachelor's Degree	7	\$245.14
2	UIS2024-CN2	Consultant 2	Responsible for one or more service delivery functional roles involved with the analysis, design, development, implementation, testing, documentation and support of systems, applications and / or processes. Key responsibilities may include: Designing and supporting configuration management process, such as source code management, workflow, issue tracking, deployment, provisioning and testing automation. Performing development, testing and implementation of code including for low code platforms and processes. May manage the integrity of pre-production environments, such as development, test, QA and staging environments. May lead efforts in specific process improvement, development, testing, documentation and technical automation and implementation areas.	Bachelor's Degree	5	\$188.23
3	UIS2024-CN3	Consultant 3	Responsible for one or more service delivery functional roles involved with the analysis, design, development, implementation, testing, documentation and support of systems, applications and / or processes. Key responsibilities may include: Designing and supporting configuration management process, such as source code management, workflow, issue tracking, deployment, provisioning and testing automation. Performing development, testing and implementation of code including for low code platforms and processes. May manage the integrity of pre-production environments, such as development, test, QA and staging environments. May lead efforts in specific process improvement, development, testing, documentation and technical automation and implementation areas.	Bachelor's Degree	4	\$157.59
4	UIS2024-CN4	Consultant 4	Responsible for one or more service delivery functional roles involved with the analysis, design, development, implementation, testing, documentation and support of systems, applications and / or processes. Key responsibilities may include: Designing and supporting configuration management process, such as source code management, workflow, issue tracking, deployment, provisioning and testing automation. Performing development, testing and implementation of code including for low code platforms and processes. May manage the integrity of pre-production environments, such as development, test, QA and staging environments. May lead efforts in specific process improvement, development, testing, documentation and technical automation and implementation areas.	Associate Degree	2	\$122.57
5	UIS2024-PRG	Programmer	Responsible for developing and maintaining applications and may provide technical support for developed applications. Key responsibilities may include: Ensures applications are integrated with other front-end applications, networks and databases. Develops program logic for new applications or analyzes and modifies logic in existing applications. Codes, tests, debugs, documents, implements and maintains software applications. Analyzes requirements and maintains, tests, and integrates application components. Ensures that system improvements are successfully implemented. Has in-depth knowledge in own discipline and basic knowledge of related disciplines. Applies a broad range of theories, concepts, principles, and methodologies to assignments involving complex features. Normally receives little instruction on day-to-day work, general instructions on new assignments. May lead projects or project steps within a broader project or have accountability for ongoing activities or objectives. Acts as a resource for colleagues with less experience.	Bachelor's Degree	4	\$157.59
6	UIS2024-SP	Senior Programmer	Responsible for developing and maintaining applications and may provide technical support for developed applications. Key responsibilities may include: Ensures applications are integrated with other front-end applications, networks and databases. Develops program logic for new applications or analyzes and modifies logic in existing applications. Codes, tests, debugs, documents, implements and maintains software applications. Analyzes requirements and maintains, tests, and integrates application components. Ensures that system improvements are successfully implemented. Has in-depth knowledge in own discipline and basic knowledge of related disciplines. Applies a broad range of theories, concepts, principles, and methodologies to assignments involving complex features. Normally receives little instruction on day-to-day work, general instructions on new assignments. May lead projects or project steps within a broader project or have accountability for ongoing activities or objectives. Acts as a resource for colleagues with less experience.	Bachelor's Degree	7	\$245.14
7	UIS2024-SAN	Systems Analyst	Designs or modifies business processes and the corresponding information technology solutions. Key responsibilities may include: Performs analysis of business and user needs, documenting requirements, researching gaps and providing process and/or development solutions. Acts as liaison between the business users and IT. Identify and develop use cases based on client requirements. Verify requirements through analysis, test, demonstration and inspection. Lead and analyze business processes/systems, identify inefficiencies and required controls, document procedures, and track KPI's. Makes recommendations to address specific business needs for information technology based solutions. Defines system scope and objectives as well as the content of required documentation. Evaluates new applications and identifies systems requirements. Evaluates new IT developments and evolving business requirements and recommends appropriate systems alternatives and/or enhancements to current systems.	Bachelor's Degree	4	\$188.23

8	UIS2024-SRA	Senior Systems Analyst	Designs or modifies business processes and the corresponding information technology solutions. Key responsibilities may include: Performs analysis of business and user needs, documenting requirements, researching gaps and providing process and/or development solutions. Acts as liaison between the business users and IT. Identify and develop use cases based on client requirements. Verify requirements through analysis, test, demonstration and inspection. Lead and analyze business processes/systems, identify inefficiencies and required controls, document procedures, and track KPI's. Makes recommendations to address specific business needs for information technology based solutions. Defines system scope and objectives as well as the content of required documentation. Evaluates new applications and identifies systems requirements. Evaluates new IT developments and evolving business requirements and recommends appropriate systems alternatives and/or enhancements to current systems.	Bachelor's Degree	7	\$245.14
9	UIS2024-SA	Systems Architect	Works within and across practices and organizations to design leading-edge technology or application solutions to meet client requirements. Conceptualizes, architects, designs, implements and supports integrated solutions for client engagements. May be considered an expert in a specific technology, application or solution platform. Interfaces with the client's highest technical executives for service delivery. Leads the technology or application solution for the project and architects a complete solution with design elements that allow integration into the client environment as required. May refine and optimize application and / or infrastructure architectural models and creates architectural prototypes as required. Develops and reviews the architectural artifacts and/or technology plans for client projects. Adheres to appropriate client processes, architectural artifact requirements and industry architectural best practices. May be responsible for the solution integrity within the assigned solution area for the engagement. Coordinates architect resources on all sized projects to develop the project architecture.	Bachelor's Degree	7	\$284.54
10	UIS2024-IA	Integration Architect	Works within and across practices and organizations to design leading-edge technology or application solutions to meet client requirements. Conceptualizes, architects, designs, implements and supports integrated solutions for client engagements. May be considered an expert in a specific technology, application or solution platform. Interfaces with the client's highest technical executives for service delivery. Develops the integrated technology requirements project plan. Designs and integrates complex, leading-edge, and business critical solutions for client engagements. Leads the technology or application solution for the project and architects a complete solution with design elements that allow integration into the client environment as required.	Bachelor's Degree	7	\$345.82
11	UIS2024-EM1	Engagement Manager 1	Manages the delivery of contracted services to clients to ensure time, quality and cost of delivery. Key responsibilities may include: Manages the project schedule, risks, scope of work, SLAs, KPIs and budget. Monitor or track project milestones and deliverables. Leads and/or supports the implementation of change management, business process redesign or information planning. Effectively manages engagement risks, identifying and promptly notifying senior management of the potential impact of such risks and alternative approaches to mitigating them. May manage the performance of internal and external service providers in order to ensure the implementation of deliverables and resulting client satisfaction. May apply business process methodologies to client business problems and provide technical advice and consultation on complex, critical issues and escalations.	Bachelor's Degree	7	\$345.82
12	UIS2024-EM2	Engagement Manager 2	Manages the delivery of contracted services to clients to ensure time, quality and cost of delivery. Key responsibilities may include: Manages the project schedule, risks, scope of work, SLAs, KPIs and budget. Monitor or track project milestones and deliverables. Leads and/or supports the implementation of change management, business process redesign or information planning. Effectively manages engagement risks, identifying and promptly notifying senior management of the potential impact of such risks and alternative approaches to mitigating them. May manage the performance of internal and external service providers in order to ensure the implementation of deliverables and resulting client satisfaction. May apply business process methodologies to client business problems and provide technical advice and consultation on complex, critical issues and escalations.	Bachelor's Degree	4	\$284.54
