

Attachment 1 - Pricing	
Contractor:	WisEngineering, LLC
Contract Number:	PB70785
Lots Awarded:	Lot 1A, Lot 1B, Lot 2
<p>Authorized Users Please Note the Following:</p> <p>A competitive Mini-Bid is required for every transaction under this Centralized Contract. (Section 1.3 of Attachment 16 - How to Use this Contract)</p> <p>The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the “maximum Not-To-Exceed price” shall be rejected by the Authorized User. (Sections 7.9 of the Contract - Reasonableness of Price)</p> <p>Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User. (Section 8.5 of the Contract - Pricelist Adjustments)</p> <p>When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at http://osc.state.ny.us/agencies/travel/travel.htm. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached. (Section 7.12 of the Contract - Travel, Meals and Lodging)</p>	

WisEngineering, LLC Approved Price List			Number of Approved Titles:	27	Last Updated:	6/16/2025
Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	P00001	Administrative Assistant I	The Administrative Assistant I will perform a variety of general office functions, such as scheduling appointments, giving information to callers, and transcribing meeting notes in support of IT projects. They will research and create presentations, generate reports, and prepare and monitor invoices. They will execute activities independently, under the guidance of office leadership.	Associate's Degree	0 years	\$46.31
2	P00002	Administrative Assistant II	The Administrative Assistant II will possess expert knowledge of advanced administrative skills and techniques in support of complex IT projects. They will provide the full range of office management functions, such as maintaining personnel records, accessing complex databases, and managing correspondence activities by exercising independent decision-making authority. They will create presentations, reports, and invoices to be delivered to management. The Administrative Assistant II will direct the other administrative team members through routine clerical tasks.	Associate's Degree	3 years	\$72.69
3	P00003	Computer Network Engineer	The Computer Network Engineer will develop solutions to meet the criteria given for computer network issues, and actively initiate the process to implement these solutions. They will work with other team members, vendors, and outside technical support to accomplish team goals. They will research all aspects of a new technology or process and develop risk assessment of each plan. This will include a workable Disaster Recovery Plan. They will also administer, install, support, and troubleshoot local and remote network infrastructure systems.	Bachelor's Degree	5 years	\$102.35
4	P00004	PC Support Specialist	The PC Support Specialist will solve technical problems related to hardware and software issues with networks, systems, desktops, and laptops. Responsibilities will include meeting customer demands on a daily basis. They will maintain a knowledge of standard system software such as Microsoft operating systems, Microsoft Office, and large scale PC deployments such as moves, adds, and changes.	Associate's Degree	1 year	\$64.70
5	P00005	Program Manager I	Under direct supervision, the Program Manager I oversees the operational planning, establishment, execution, and evaluation of a multifaceted IT program/project typically consisting of a small set of closely related subprograms or associated activities or a subset of activities related with a larger program. Oversees fiscal, operational, administrative, and human resources management of the program to ensure program progresses on schedule and within prescribed budget; seeks and develops outside funding sources, serves as principal point of contact with external constituencies on operational matters, and provides day-to-day technical/professional guidance as appropriate to the area of expertise as well as coordination across program efforts and issue resolution. May also serve in a support role for more senior Program Managers.	Bachelor's Degree	3 years	\$111.66
6	P00006	Program Manager II	Under general direction, the Program Manager II oversees the operational planning, establishment, execution, and evaluation of a multifaceted IT program/project typically consisting of a set of closely related subprograms or associated activities. Oversees fiscal, operational, administrative, and human resources management of the program to ensure program progresses on schedule and within prescribed budget; seeks and develops outside funding sources, serves as principal point of contact with external constituencies on operational matters, and provides day-to-day technical/professional guidance and direction as appropriate to the area of expertise as well as coordination across program efforts and issue resolution.	Bachelor's Degree	5 years	\$125.76
7	P00007	Program Manager III	The Program Manager III is highly involved in the operational planning, establishment, execution, and evaluation of a multifaceted IT program/project typically consisting of a large set of closely related subprograms or associated activities. Oversees fiscal, operational, administrative, and human resources management of the program to ensure program progresses on schedule and within prescribed budget; seeks and develops outside funding sources, serves as principal point of contact and liaison with external constituencies on operational matters, and provides day-to-day technical/professional guidance and leadership on moderately complex issues, as well as coordination across program efforts and issue resolution.	Bachelor's Degree	7 years	\$146.92
8	P00008	Program Manager IV	The Program Manager IV is responsible for the operational planning, establishment, execution, and evaluation of a multifaceted IT program/project typically consisting of a large set of closely related subprograms or associated activities. Oversees fiscal, operational, administrative, and human resources management of the program to ensure program progresses on schedule and within prescribed budget; seeks and develops outside funding sources, serves as principal point of contact and liaison with external constituencies on operational matters, and provides day-to-day technical/professional guidance and leadership as appropriate to the area of expertise as well as coordination across program efforts and issue resolution.	Bachelor's Degree	10 years	\$171.40
9	P00009	Programmer	The Programmer will have the IT knowledge to assist in the development and maintenance of software code modules. They will contribute to delivery of the software requirements, code, and verification testing as needed to support technical work product, guided by team leadership. They will collaborate with other team members as needed to understand and support the development and testing of individual software elements.	Bachelor's Degree	0 years	\$65.62
10	P00010	Project Manager I	Under direct supervision, the Project Manager I is responsible for assigned aspects of the development and implementation of assigned IT projects and provides a single point of contact for those aspects. Interfaces with all areas affected by the project including end users, computer services, and other stakeholders Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Recommends action to direct the analysis and solutions of problems.	Bachelor's Degree	3 years	\$83.25
11	P00011	Project Manager II	Under general direction, the Project Manager II is responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact and leadership for those projects. Takes IT projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, computer services, and key stakeholders. Defines and communicates project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project and status meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems. May serve as the sole project manager on small to medium complexity projects or as an adjunct to a Project Manager III on larger efforts.	Bachelor's Degree	5 years	\$109.04

12	P00012	Project Manager III	The Project Manager III is responsible for all aspects of the development and implementation of assigned IT projects and provides a single point of contact and overall leadership for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, computer services, and key stakeholders. Defines and communicates project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and status reviews and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems.	Bachelor's Degree	7 years	\$131.64
13	P00013	Project Manager IV	The Project Manager IV is responsible for all aspects of the development and implementation of assigned IT projects and provides a single point of contact and overall leadership for those projects. Takes large, complex projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, computer services, senior leadership, and key stakeholders. Defines and communicates project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and status reviews and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables. Provides technical and analytical guidance to project team. Leads and takes action to direct the analysis and solutions of problems.	Bachelor's Degree	10 years	\$154.07
14	P00014	Senior Systems Analyst/Engineer	The Senior Systems Analyst/Engineer will possess expert level domain knowledge in the design and development of complex IT systems and/or solutions. They will use their knowledge of the entire end-to-end system/solution to support overall design, develop requirements, and guide technical work product development and quality. The Senior Systems Analyst/Engineer will manage functional areas as designated by the team leadership and oversee the hardware and software qualification process.	Bachelor's Degree	15 years	\$167.87
15	P00015	Software Analyst/Engineer I	The Software Analyst/Engineer I will have IT knowledge and expertise to assist in the phases of the software lifecycle. They will contribute to delivery of the software requirements, code, and verification testing as needed to support technical work product, as guided by team leadership. They will collaborate with other team members as needed to understand and support the design, development, and testing of individual software elements.	Bachelor's Degree	3 years	\$92.18
16	P00016	Software Analyst/Engineer II	The Software Analyst/Engineer II will have IT knowledge and expertise in some phases of the software lifecycle. They will deliver elements of the software design, requirements, code, and verification testing as needed to support technical work product, as assigned by team leadership. They will have the breadth of knowledge and expertise to represent some elements of the software product in team meetings. They will collaborate with other team members as needed to design, develop, and test individual software elements.	Bachelor's Degree	5 years	\$105.51
17	P00017	Software Analyst/Engineer III	The Software Analyst/Engineer III will have specialized IT knowledge and expertise in most phases of the software lifecycle. They will deliver elements of the software design, requirements, code, and verification testing as needed to support technical work product. They will have the breadth of knowledge and expertise to represent the core elements of the software product in team meetings, leadership meetings, and demonstrations. They will provide technical guidance and input to other team members as needed.	Bachelor's Degree	7 years	\$120.11
18	P00018	Software Analyst/Engineer IV	The Software Analyst/Engineer IV will have specialized IT knowledge and expertise in all phases of the software lifecycle. They will deliver the software design, requirements, code, and verification testing as needed to support technical work product. They will have the breadth of knowledge and expertise to represent the software product in team meetings, leadership meetings, and demonstrations. They will provide technical guidance and input to the documentation team, the training developers, the deployment team, and will mentor other software team members.	Bachelor's Degree	10 years	\$147.74
19	P00019	Subject Matter Expert	The Subject Matter Expert provides advanced knowledge of a specific IT subject area throughout the project lifecycle. They will provide technical support to management, perform research, advise other team members, and assist in the delivery of complex technical results and work product.	Bachelor's Degree	15 years	\$177.79
20	P00020	Systems Analyst/Engineer I	The Systems Analyst/Engineer I will have the knowledge and expertise to assist in the development and testing of individual aspects of a software system and/or integrated IT solution, as guided by project leaders. They will be responsible for contributing to the technical work product development and quality. They will provide specific deliverables as identified by the project leadership. They will collaborate with other team members as needed to understand and support the design, development, and testing of individual elements of the system/solution.	Bachelor's Degree	3 years	\$97.63
21	P00021	Systems Analyst/Engineer II	The Systems Analyst/Engineer II will have the knowledge and expertise to develop, analyze, and test some aspects of a software system and/or integrated IT solution. They will be responsible for contributing to the technical work product development and quality. They will have the breadth of knowledge and expertise to represent some of the system/solution elements in team meetings. They will provide specific deliverables as identified by the project leadership. They will collaborate with other team members as needed to design, develop, and test the full system/solution.	Bachelor's Degree	5 years	\$113.03
22	P00022	Systems Analyst/Engineer III	The Systems Analyst/Engineer III have the knowledge and expertise to develop, analyze, and test most aspects of a complex software system and/or integrated IT solution. They will be responsible for understanding and reviewing the technical work product development and quality. They will support the effort of evaluating and debugging the end-to-end technical system/solution. They will have the breadth of knowledge and expertise to represent some of the system/solution elements in team meetings, leadership meetings, and demonstrations. They will provide technical guidance and input to other team members as needed.	Bachelor's Degree	7 years	\$122.39

23	P00023	Systems Analyst/Engineer IV	The Systems Analyst/Engineer IV will have the knowledge and expertise to develop, analyze, and test all aspects of a complex software system and/or integrated IT solution. They will be responsible for understanding, reviewing, evaluating, and debugging technical work product development and quality. They will have the breadth of knowledge and expertise to represent the system/solution in team meetings, leadership meetings, and demonstrations. They will provide technical guidance and input to the documentation team, the training developers, the deployment team, and will mentor other technical team members.	Bachelor's Degree	10 years	\$154.24
24	P00024	Systems Tester	The Systems Tester will develop and execute test cases and plans for Functional, Performance, Stress, and Regression testing needs of complex IT systems. This includes communicating with management to ensure that all testing is being performed within the required project scope, and participating in all test planning activities. They will then effectively and accurately document all QA results and concerns as well as communicating status to the QA Manager and proactively work to resolve any issues.	Associate's Degree	3 years	\$69.30
25	P00025	Technical Writer I	The Technical Writer I will assist team members to write, edit, and proofread technical data for use in documents, and will write and edit sections of documents with guidance from senior writers. They will assist the technical team as needed to ensure documentation is accurate and complete and will assist document owners to ensure the result has been carefully checked for documentation errors. This Labor Category is intended for recent graduates from 4-year universities and requires no prior work experience.	Bachelor's Degree	0 years	\$50.24
26	P00026	Technical Writer II	The Technical Writer II will write, edit, and proofread technical data for use in technical documentations, and will support research and technical analysis as needed. They will work closely with the technical writing team to ensure documentation is accurate and complete and the result has been carefully checked for documentation errors. They will assist the Technical Writer III with final touches of documents to be delivered to management.	Bachelor's Degree	5 years	\$84.59
27	P00027	Technical Writer III	The Technical Writer III will research, analyze, write, edit, and proofread technical data for use in advanced technical documentations. They will direct the technical writing team to ensure documentation is accurate and complete and the result has been carefully checked for documentation errors. They will be directly responsible for delivering the final product to management.	Bachelor's Degree	7 years	\$110.19
