PROCUREMENT PROCEDURES

The following guidelines will assist State Agencies in procuring large purchases resulting from the use of this contract. State Agencies should carefully consider all alternatives to determine which provides the best products and cost.

Agencies are required to have a procurement record for purchases for software above \$50,000. This record should detail the procurement procedure used and why the product purchased has been determined to be the most cost-effective for current and future needs, and will be subject to a post audit by OSC.

In accordance with the Guidelines for use of the technology contracts, it is recommended that the agency aggregate its requirements and make as few purchases a year as possible. Each purchase of product should be acquired in accordance with the agency's established policy.

No approval by the Office of General Services is required.

Although not under OGS purchasing authority, political subdivisions should exercise similar judgment when making large purchases from OGS centralized contracts.

These procedures may be modified in the future as needed to reflect changes in procurement law.
