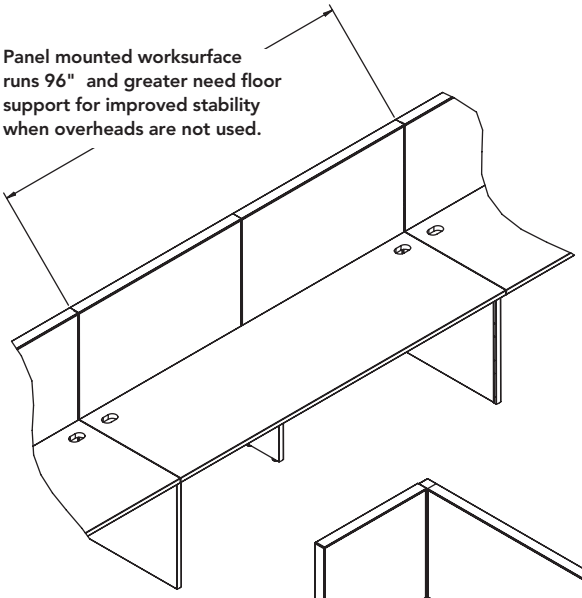
Concensys® — Working with Worksurfaces and Supports

Reference Page

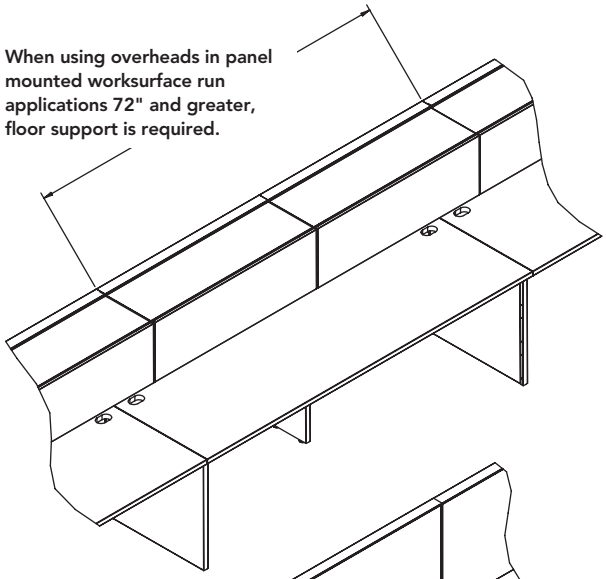
Support Guidelines — See Drawings below

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support is required.
- When using overheads at the end of a panel run, floor supports are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.
- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Worksurface runs 60"W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 212 and 223.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72"W. See pages 213-221.

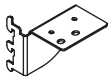
Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.

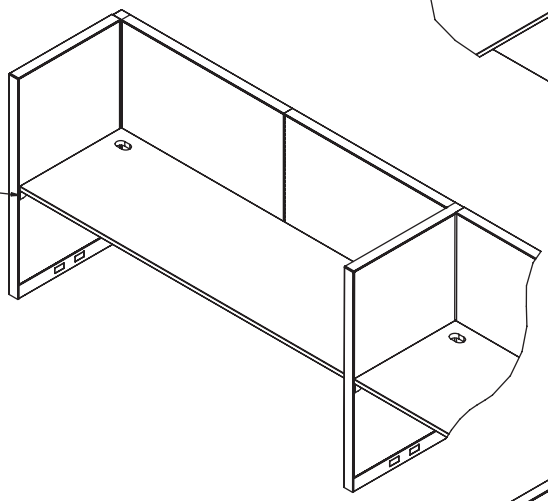


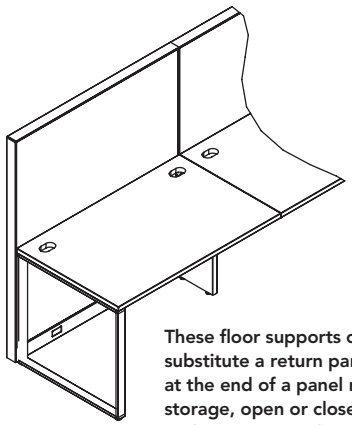
When using overheads in panel mounted worksurface run applications 72" and greater, floor support is required.



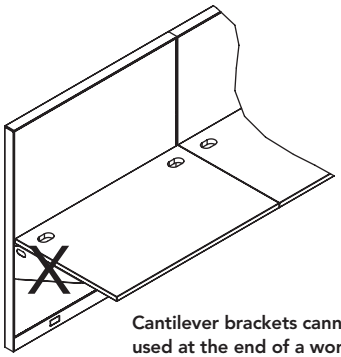
Worksurface bracket kit should be used to tie panels to worksurface for added stability



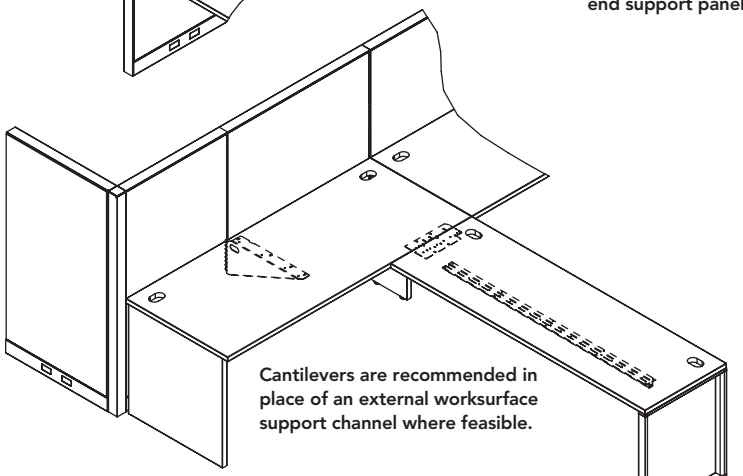




These floor supports can substitute a return panel at the end of a panel run: storage, open or closed end support panel, O-legs.



Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.



Cantilevers are recommended in place of an external worksurface support channel where feasible.

Worksurface runs 60"W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 212 and 223.

Worksurfaces

Flat Edge Worksurfaces

Worksurfaces (pages 222-230)
- Worksurfaces can be specified without grommets by adding suffix “N” to model number for no grommet, no upcharge.

Primary Worksurfaces (page 222)
- 24", 30", 36", and 42"W worksurfaces have one grommet, centered; two on widths 48"W and greater.
- Width must correspond with panel width(s). For worksurface to span a “T” or extended straight connection add “T” suffix and upcharge. (All T-span worksurfaces are available in Express Solutions™ except 72"W models.)
- Center support bracket included on 54"W-60"W. Other support hardware is ordered separately.
- Worksurfaces 60"W or greater require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 20"D and 24" cantilever on 24"D and 30"D worksurfaces.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence®, pages 213-221.

Bow-Front Worksurfaces (page 223)
- Standard with two wire management grommets.
- Wave and bow-front worksurfaces can be used with a modesty panel and supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.

Corner Worksurfaces (page 224)
- Panel-hung application requires two panels of corresponding width joined at 90°.
- Rear corner support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.
- Leading edge of radial leading edge units has an inside radius of 10⅝".
- With woodgrain laminate, grain direction is diagonal to grain of adjacent worksurface(s).
- Corner worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.
- One wire management grommet in corner standard.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Corner Shelves (page 224)
- Diagonal leading edge = 10½"
- Diagonal depth = 22½"
- Includes panel attachment brackets.
- Laminate with flat edge.

Corner Cove Worksurfaces (page 225)
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 24"D, and 24" cantilever on 30"D worksurfaces.
- Standard with two wire management grommets.
- Corner cove worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.
- Rear corner support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Altitude® Height-Adjustable (page 225)
- For freestanding applications, see height-adjustable tables in the Seating, Collaboration, and Tables Price List.

(continued on next page)

Flat Edge Worksurfaces *(continued)*

Peninsula, P-Shaped, and Jetty Worksurfaces (page 226)

- Standard with one wire management grommet.
- Support column ordered separately, column includes panel support brackets 831099.
- Peninsula worksurface must correspond to the width of its support panel.
- Peninsula and P-shaped worksurfaces can also be attached perpendicularly to a primary worksurface using flat brackets. Do not attach to a worksurface supported with cantilever brackets.
- Worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.

Quarter-Round Worksurfaces (page 227)

- Connects two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

D-Shaped Worksurfaces (page 227)

- Order support column and two 11"D end panels separately.
- Not recommended for use with cantilever brackets CCB24L or CCB24R for shared applications.
- Worksurface includes attachment brackets.
- Use only with other worksurfaces with matching edge.

Countertop Brackets (page 228)

- Countertop brackets must be ordered separately. Model 851500 contains one right-hand and one left-hand bracket.
- Specify paint color.
- Order two model 851500 for straight countertops. Order three model 851500 for corner countertops.

Countertops (page 228)

- Countertops cannot be used with 32"H panels.
- Corner countertops require two panels of corresponding width joined in an “L”.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Non-Standard Worksurface Sizes (pages 229-230)

- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

Worksurfaces

Supports

End-Panel Support (page 231)
- Non-handed for use at either end of worksurface.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel-hung applications.
- Can be converted to freestanding with removal of panel-mount bracket.
- Straight worksurfaces adjacent to 120° and 135° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.

Support Leg (page 231)
- Non-handed for use at either end of worksurface. Leg portion is 12¾"D.
- Use in a shared position or at 90° panel junctions to support adjoining worksurfaces or to support a worksurface adjacent to a dual-surface worksurface.
- Flat bracket included.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel-hung applications.
- Can be converted to freestanding with removal of panel-mount bracket.

Support Column (page 232)
- Used to support one end of curvilinear worksurfaces. (Includes panel support brackets.)
- Levelers provide 1½" vertical adjustment.

Permanent-Wall Hanger Kit (page 232)
- Mounts to permanent dry-wall to hang panel-hung components.
- Wall track has ⅛" x ½" slots on 1" centers.
- Customer to furnish connecting hardware. (Refer to Concensys Installation Instructions for appropriate hardware.)
- Worksurfaces should not be supported with cantilever brackets when using permanent-wall hanger kit.
- An integral channel is provided for vertically routing task light cords.
- Includes a cover for top of channel.

Cantilever Brackets (page 231)
- Use with runs less than 96". Floor support is required for runs 96" and longer.
- Where applicable, cantilevers are recommended over an external worksurface support channel. Worksurface runs over 60"W require an external worksurface support channel when a cantilever cannot be used.
- Do not use at the end of a worksurface where no 90° return panel is positioned.
- Includes tie bracket and attachment hardware.
- Avoid installation on only one side of a straight connection except to support corner worksurfaces.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.
- Do not use with wall track or to support a worksurface to which a return worksurface is attached.

Cantilever Bracket — Handed (page 231)
- Cantilever brackets are handed (left or right) and can be inserted into panel reveals in 1" vertical increments. No assembly required.
- Left- and right-hand brackets required in shared applications.
- 24"D cantilevers are required to be used for both 24"D or 30"D worksurfaces.
- 18"D cantilevers are required to be used for 20"D worksurfaces or center support for 24"D.
- 12"D cantilevers are required to be used for 12"D worksurfaces.

Cantilever Bracket — Non-Handed (page 231)
- Cantilever brackets are non-handed and can be inserted into panel reveals in 1" vertical increments. Assembly required.
- One bracket in shared applications — includes two angled brackets.
- Bracket accommodates 24"D or 30"D worksurfaces.

Worksurface-to-Panel Bracket (page 231)
- Model 831324 mounts to a 24"W panel to support a 24"D worksurface.
- Model 831330 mounts to a 30"W panel to support a 24"D or 30"D worksurface.

Worksurface Bracket Kit (page 231)
- Used to connect the end of a worksurface to a panel of the same width.

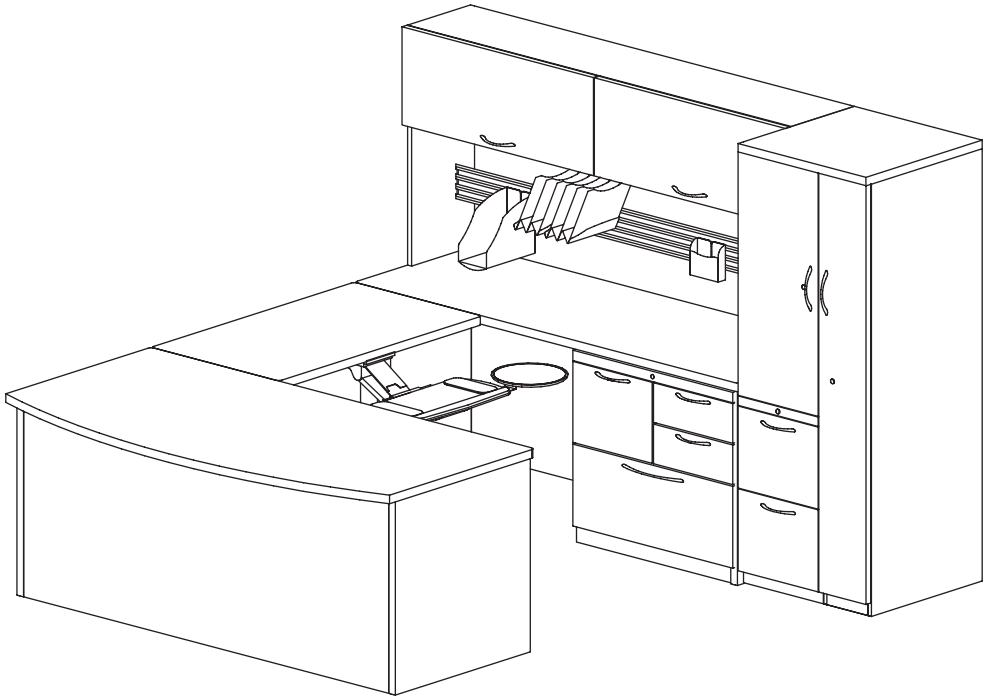
Flat Brackets (page 231)
- Flat Brackets can be used to connect one worksurface perpendicularly to another worksurface.

Pedestal-to-Panel Attachment Bracket (page 231)
- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Is compatible with Align™ and Essentials™ pedestals.

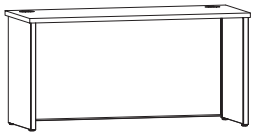
External Worksurface Support Channel (page 223)
- Is required on a systems worksurface for additional support for spans greater than 60"W. Width of worksurface span can be reduced by using support storage.
- Extends 1½" below the worksurface. Installs 7" from user's edge.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.

Cadence® Freestanding

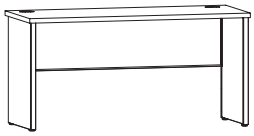
Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.



Configurations



Full Modesty



Half Modesty

Gussets

All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Optimize™, Terrace®, and Concensys, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel storage solutions and Extensions — work tools to provide personalized organization for every workstyle.

Systems integration — Cadence works in combination with Optimize, Terrace, or Concensys panels, extending the functionality of both product lines.

Highly adaptable — Make the most of building architecture by using an existing wall to create a semi-private workspace.

Space utilization — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

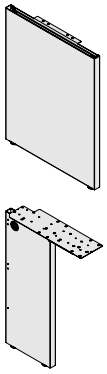
Team interaction — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

The Cadence Choice

It works in the open plan, the private office, or in combination with Optimize, Terrace, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

Cadence® Freestanding

Configurations



End Panels Ⓔ and Support Legs Ⓛ

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

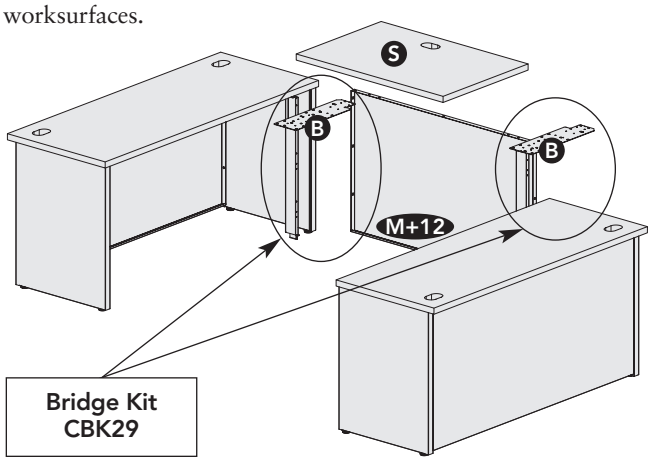
The 11"D end panel is used to freestand peninsulas, curvilinear shapes, and D-tops in panel applications.

Corner Desk Legs Ⓒ

Corner desk legs have a 90-degree bend and welded construction. The strong construction, allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits Ⓑ

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.



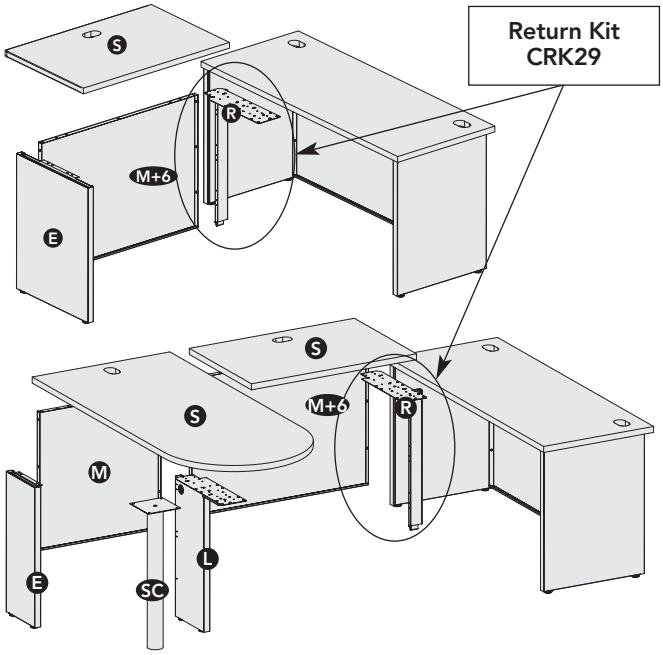
There are some bridge instances where only half of a bridge kit is needed (e.g., using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

Surface Ⓢ

Support Column Ⓢⓒ

Return Kits Ⓡ

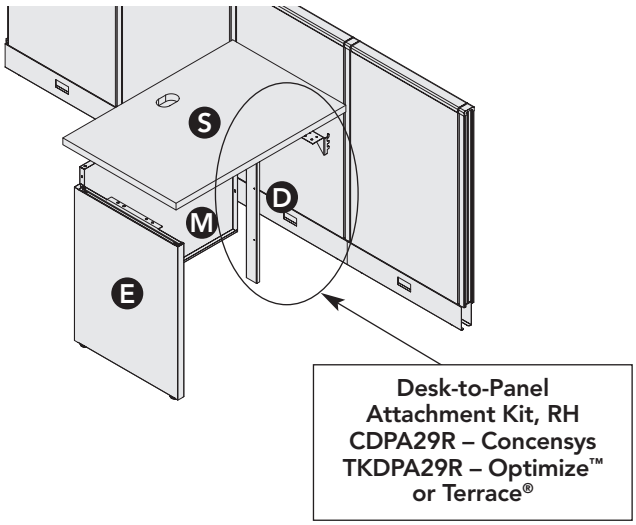
Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.



Desk-to-Panel Attachment Kits Ⓓ

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.

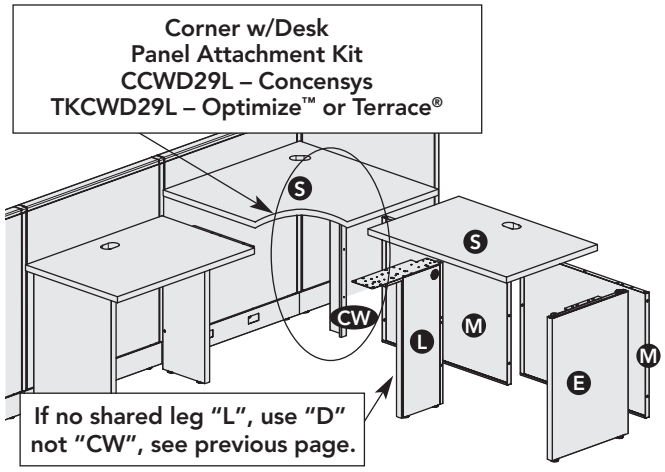
When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk attachment kit. "Hand" of unit is determined from the user's side of the desk (right hand unit attaches to right side of modesty).



Cadence® Freestanding

Corner w/Desk Panel Attachment Kit CW

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. "Hand" of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

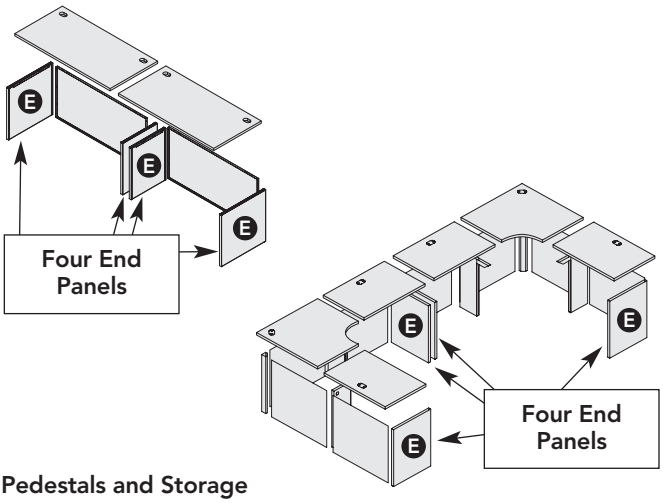


Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24"D full end panels may be used at the in-line junction on 30"D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.



Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 18"D or 20"D peds should be used with 24"D worksurfaces. 18"D, 20"D, or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional pull style and storage options under 24"D worksurfaces.

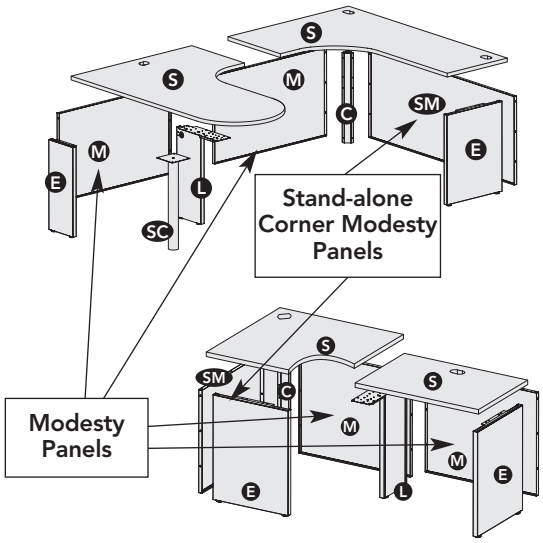
Modesty Panels M

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels SM

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.



Gussets G

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

Cadence® Freestanding

Cadence Supports

End-Panel Support (page 232)
- End panels are non-handed.
- Freestanding end panel is the same as the Concensys panel-mount end panel except removable panel-mount bracketry not included.
- End panels include attaching hardware and leveling glides.
- Leveling glides provide 2¼" of adjustment.
- End panels are universal, shipped with a left and right-hand attachment bracket.
- End panels cannot be used for in-line junctions and are only used at the end of a panel run.

Support Leg (page 232)
- Support legs are non-handed.
- Freestanding support leg is the same as the Concensys panel-mount support leg except removable panel-mount bracketry not included. Leg portion is 12¾"D.
- Supports junctions of two worksurfaces.
- Includes a flat bracket.
- Concensys in-line support legs are used to support 24"D worksurfaces only in a shared position.

Panel-mount Bracketry (page 232)
- Includes hardware to convert freestanding end panels and support legs to panel-mount.
- Non-handed.

Support Column (page 232)
- Used to support one end of curvilinear worksurfaces.
- Includes panel support brackets.

Permanent-Wall Hanger Kit (page 232)
- Mounts to permanent dry-wall to hang panel-hung components.
- Wall track has ⅛" x ½" slots on 1" centers.
- Customer to furnish connecting hardware. (Refer to Concensys Installation Instructions for appropriate hardware.)
- Worksurfaces should not be supported with cantilever brackets when using permanent-wall hanger kit.
- An integral channel is provided for vertically routing task light cords.
- Includes a cover for top of channel.

Corner Desk Leg (page 232)
- Attaches two modesty panels at rear of corner desk.
- Leveler provides 1½" vertical adjustment.

Bridge Kit (page 232)
- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.

Return Kit (page 232)
- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat bracket and one modesty panel-to-end-panel bracket.

Desk-To-Panel Attachment Kit (page 232)
- Used to connect a worksurface and modesty panel perpendicularly to a Concensys panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit
- "Hand" of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

Corner w/Desk Panel Attachment Kit (page 232)
- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Concensys panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- "Hand" of unit is determined from the user's side of the desk.

Flat Brackets (page 232)
- Flat brackets can be used to connect one worksurface perpendicularly to another worksurface.

(continued on next page)

Cadence Supports and Modesty Panels *(continued)*

Modesty Panel (page 233)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel and corner w/desk panel attachment kits.
- 29½"H units provide ¾" of space between bottom of modesty panel and floor.
- Actual width of 29½"H modesty panel is 3¾" less than the nominal dimension listed in the Systems Price List.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels or gussets can now be used with corner or corner cove worksurfaces.
- Refer to pages 213-221 to select proper width.

Stand-alone Corner Modesty Panel (page 233)

- Use only when freestanding one or both sides of a corner or corner cove worksurface.
- Specify width the same as width of worksurface.
- See examples on page 218 on how to specify.
- 29½"H units provide ¾" of spacing between bottom of panel and floor.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Actual width of modesty panel is 6$^{3}/_{16}$" less than the nominal dimension listed below.
- Modesty panels are inset 2⅞"; when adding pedestals, consult the chart below.

Gussets (page 233)

- Can be used in place of a modesty panel with desks 36"W to 60"W.
- Provides easy access to wall outlets.
- Can be used with corner desks.
- Cannot be used with suspended pedestals.
- Modesty panels are inset 2⅞"; when adding pedestals, consult the chart below.
- Gussets can be used on corner and corner cove worksurfaces.

Universal Modesty Panel (page 234)

- Mounts under peninsula, p-shape, jetty, and boomerang worksurfaces.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8½" of privacy and is non-handed.
- Constructed of steel. No upcharge for P2 paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1½" thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

Worksurfaces

ORDERING

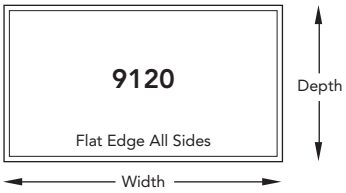
The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number**
   Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)
   See grommet specification instructions on this page.
3. **Grommet Type:**
   P Plastic
   M Metal (add $11 per grommet for laminate)
4. **Grommet Color:**
   (Metal only)
   EL Matte Silver
   NOTE: Plastic grommet will match flat edge.
5. **Laminate Choices**
   See page 176.
6. **Flat Edge Color Choices**
   See EDGE COLORS page 176 for laminates.
7. **Exact Size**
   Specify the **EXACT Width** and **EXACT Depth** you require. Width and depth is specified in ⅛" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

⅛"	= 1	⅝"	= 5
¼"	= 2	¾"	= 6
⅜"	= 3	⅞"	= 7
½"	= 4	no extra increment	= 0

For example, when ordering a worksurface that is 34⅜"W x 20½"D, specification should be 345Wx204D.
Example: **9120R3624.G0.TM33.EU.345Wx204D**.



PRODUCT SPECIFICATIONS

- Flat Edge on all sides
- 45 lb. particle board
- 1⅛" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

Note: 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

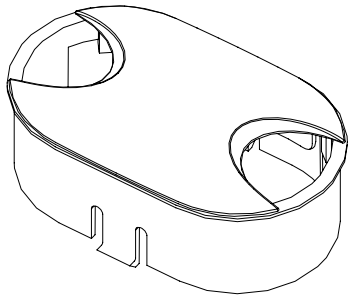
When spanning multiple freestanding storage units with one worksurface, add ⅛" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + ⅛" + ⅛" = 90¼" worksurface. Do NOT follow this rule if panel wrapping storage units.

CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program Worksurfaces.

GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate.



PRICING

One Grommet – GC, GL, or GR Position $17.00
Two Grommets – G3 or G4 Position..... $34.00
NOTE: Add $11 per grommet for Metal grommets with laminate.

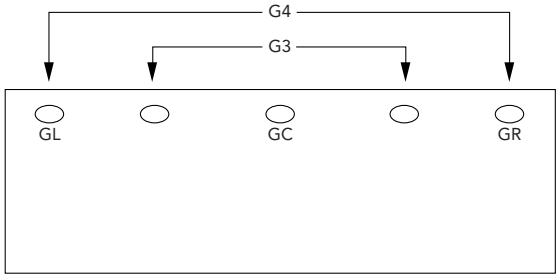
ORDERING

Specify grommet location and color.
Example: **9120R10836.GCP.TM33.EU.1022Wx326D**

Code Grommet Position

- GC Centered side-to-side – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- GL 6⁵⁄₁₆" from left side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- GR 6⁵⁄₁₆" from right side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- G3 Pair of grommets each 18" from side edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center (Position G3 not available on tops 60"W or less.)
- G4 Pair of grommets each 6⁵⁄₁₆" from side edge to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- G0 No grommets

Dimensions are from grommet center line to top edge.



Rectangular Top

Grommet positions other than those shown above are considered non-standard.

Worksurfaces

For specification information see page 229.

Square Flipper Door

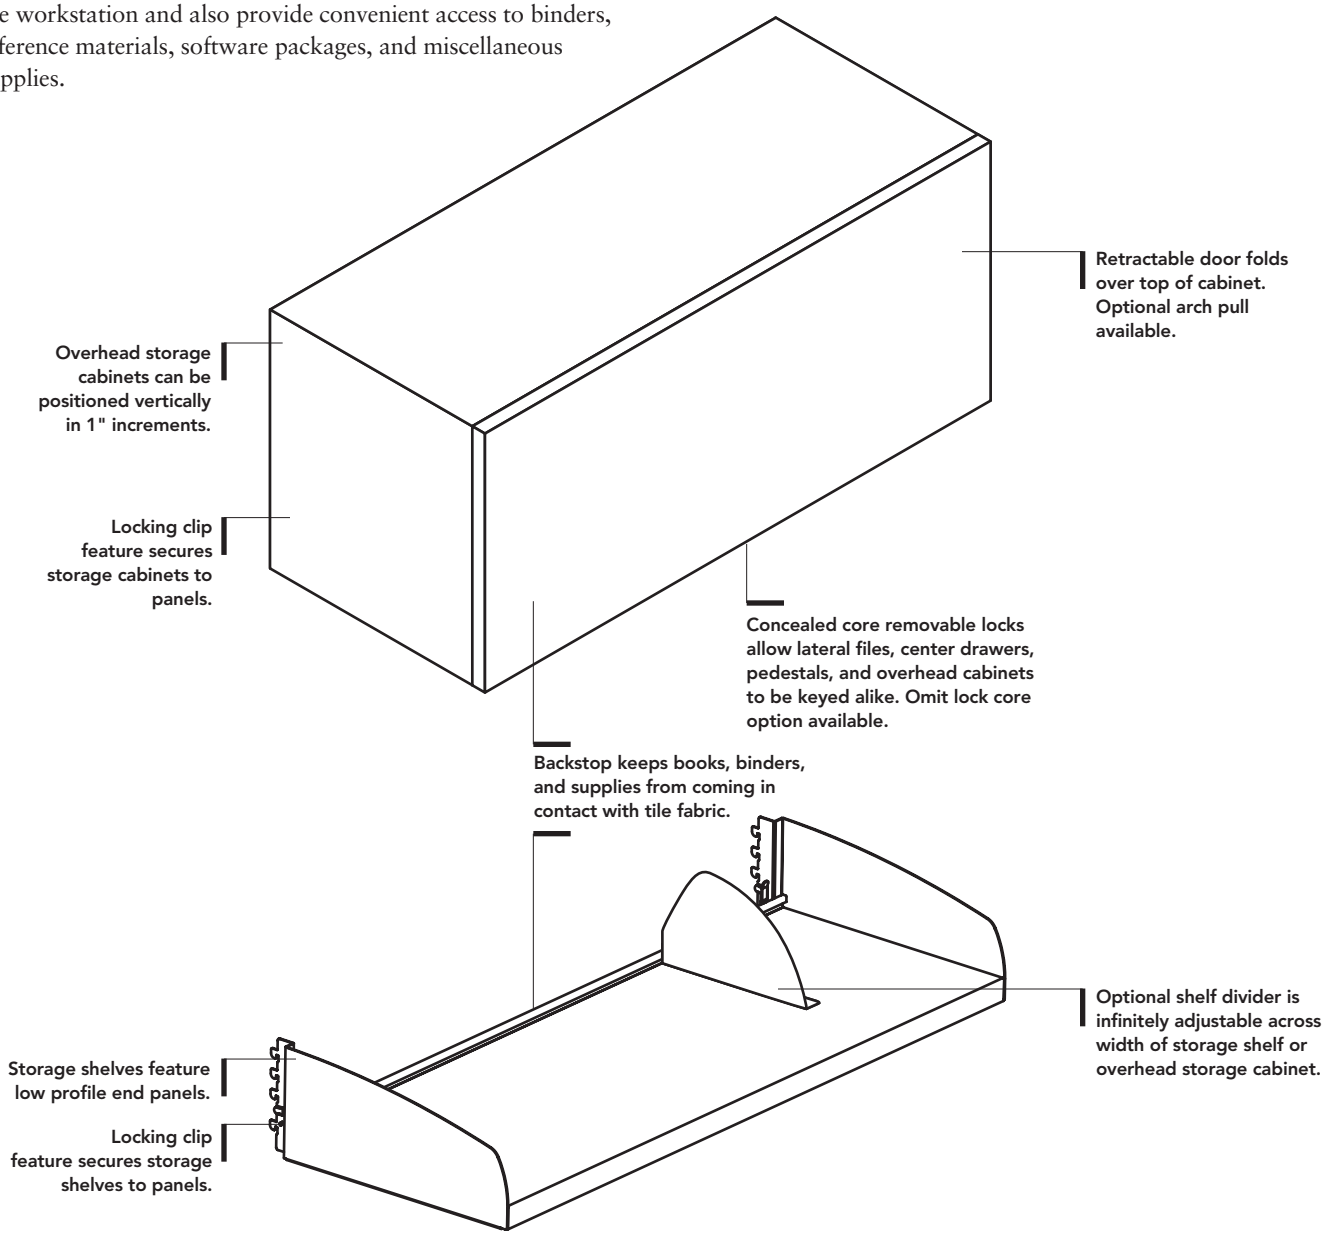
Overheads & Shelves

Reference Page

Overhead storage components maximize the use of space in the workstation and also provide convenient access to binders, reference materials, software packages, and miscellaneous supplies.



Product dimensions

Overhead Storage Cabinet

Width 24" (except receding door), 30", 36", 42", 48", 60" (with 2 doors)

Inside width ⅜" less than width

Depth 14¼" (Receding Door is 13¼"D)

Inside depth 12⅞" (Receding Door is 12⅛"D)

Height 15" (Receding Door is 15"H)

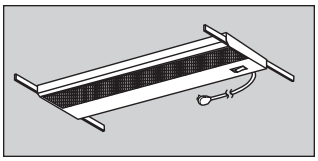
Inside height 12¾" (Receding Door is 11⅝"H)

Bookshelf

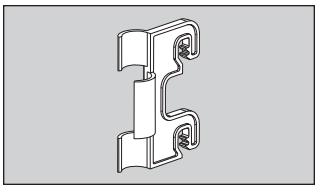
Width 24", 30", 36", 42", 48", 60"

Depth 14¼"

Height 6"



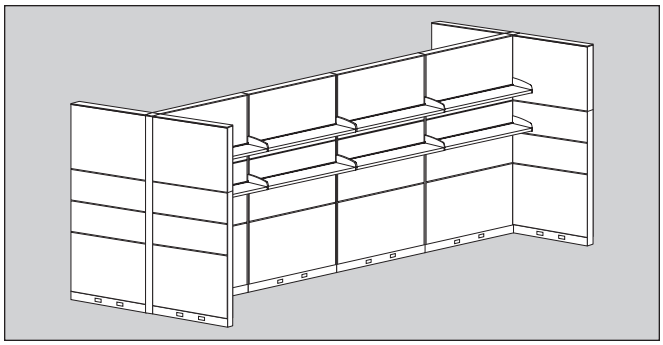
Task lights can be mounted beneath storage shelves and overhead storage cabinets. Additional panel hung and freestanding lighting options are available.



Cord retainer clips fasten into panel slots to anchor power cords. Available in black only. Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately. Painted or fabric covered cord covers are available for Concensys.

Overheads & Shelves

Specification Guidelines



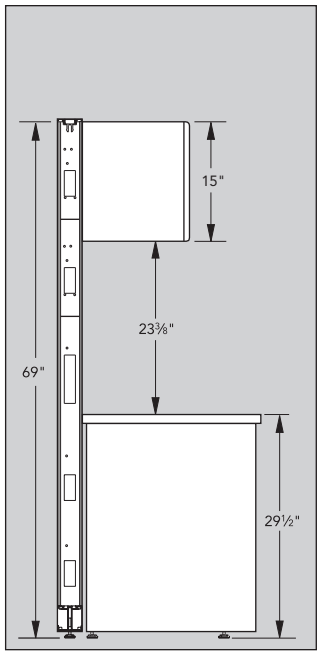
In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.

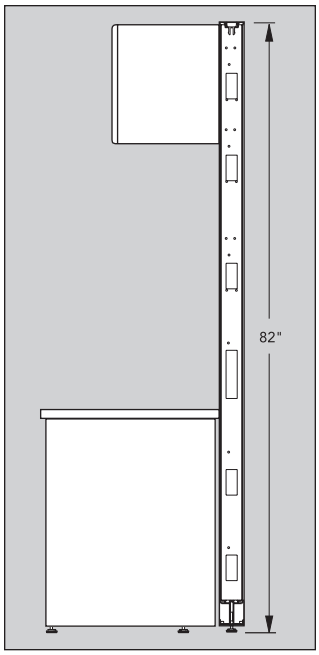
When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

Stacking frames should be added to all the parent run panels, and to each return-panel run. Stacking panels added to return panel must match the parent run configuration.

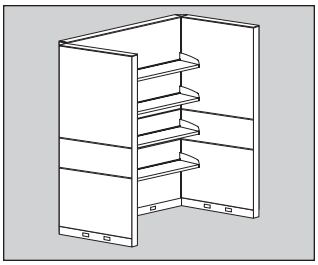
A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.

With Concensys, a full height panel end cover is required for adequate stability when using overhead storage on the end of a run, or on a return panel.

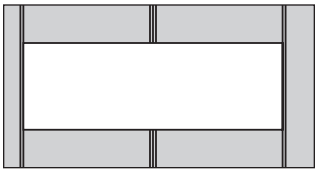




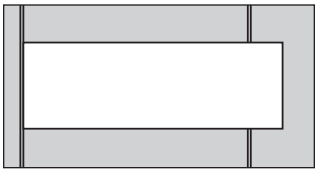
Overhead storage cabinets and open storage shelves can be mounted on Concensys structural and stacking panels to a maximum height of 69" (above left). They may be placed up to the top level of 82"H Concensys structural panels.



No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.



Storage shelf and receding door overhead width must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.



Overhead cabinets can be mounted on a panel equal to or up to 18" narrower than cabinet, or on panels wider than the overhead cabinet when using off-module kit. One side of overhead must be held on module.

Overheads & Shelves

Overhead Cabinets, Upmount Kit, Bookshelves, and Tackboards

Overhead Cabinets with Flat Doors for Concensys (page 240)

- Storage cabinets have flat flipper doors with square horizontal edges.
- Standard with a factory-installed core removable lock located on the underside of the cabinet.
- Width must correspond with width of panel or 2 panels joined with a straight connector.
- Cabinet has backstop.
- When mounted at an outside "T" connection or at an Extended Straight connection, there will be 2¼" between storage units.
- All units feature an anti-dislodgement device.
- 60" units are one-piece cabinet with two doors and locks.
- Accommodates recessed task lighting (specified separately).
- Storage cabinets are shipped pre-assembled.
- For locking specification, see pages 322-324.
- Cabinets are 14⅜"D x 15"H with inside dimensions of 12⅞"D x 14⅛"H.
- Concensys Essentials overhead cabinets can be mounted on a panel up to 18" narrower than the cabinet by using off-module overhead mounting kit COMBKT. Requires removal of existing vertical bracketry. (For units produced after 2/1/2004.)

Horizontal Wall Track (page 240)

- Allows for mounting Essentials™ overheads on permanent wall structures ONLY.
- NOT for mounting old style Essentials overheads or for receding door units.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- Available in black only.
- Attachment hardware is not included.

Upmount Overhead Conversion Kit (page 240)

- Consists of two upmount brackets, full back panel and required installation hardware.
- Available in P1 and P2 colors.
- Allows mounting of overhead case up to 13" above height of panel.
- Brackets require a clearance of 6½" below bottom of overhead cabinet.
- Width must correspond with width of panel, or 2 panels joined without a connector.
- Full back panel adds ½" to depth of overhead case.
- Full back panel only used when upmounting cabinet.
- For use with overhead cabinets (except RTA and receding door units) produced after February 1, 2004.

Receding Door Overhead Storage Cabinet (page 240)

- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or square pull optional.
- 60"W cabinet has 2 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 322-324.
- Cabinets are 13¼"D x 15"H. When door is recessed, interior dimensions are 12⅛"D x 11⅝"H.
- Weight Limits:
  30"W ..... 70 lbs.
  36"W ..... 85 lbs.
  42"W ..... 100 lbs.
  48"W ..... 110 lbs.
  60"W ..... 138 lbs.

Receding Door Overhead Back (page 240)

- Optional for use with receding door overhead.
- Order width to match overhead cabinet.

Open Bookshelves (page 241)

- Width must correspond with width of panel or 2 panels joined with a straight connector.
- When mounted at an outside "T" connection or at an extended straight connection, there will be 2¼" between shelves.
- All units feature an anti-dislodgement device.
- Accommodates recessed task lighting (specified separately).
- Weight Limits:
  24"W .....61 lbs.
  30"W .....77 lbs.
  36"W .....93 lbs.
  42"W .....108 lbs.
  48"W .....124 lbs.
  60"W .....155 lbs.

Tackboards (page 241)

- Use 13"H with half-height shelves hung on 56"H panels.
- Use 18"H with 69"H and 82"H panels.
- Task light cords can be concealed behind tackboards.
- Can only be used on one panel in a 90° junction.
- Brackets come attached for mounting.

Hutches

Hutches, Dividers, and Tackboards

Stack-on Hutches for Cadence (page 242)

- Stack-on hutches have flipper doors with square horizontal edges. Universal model can be converted to an open hutch.
- Stack-on hutches with doors are standard with a core removable lock (60"W, 66"W, and 72"W have two doors and two locks).
- Hutches mounted on a 29½"H x 1¼" thick worksurface corresponds with the height and look of Essentials overhead cabinets mounted on 69"H Concensys panels.
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Stack-on hutches have a height clearance of 19¾" for computers, etc.
- Depth dimensions 14½" includes thickness of door, inside binder depth 12¾.
- Stack-on hutches are shipped easy-to-assemble.
- Accommodates recessed task lighting (specified separately).
- Chicago task light cords cannot be routed through the hutch end panels, due to the large size of the fused plugs.
- For locking specifications, see pages 322-324.

Dividers (page 242)

- Shelf dividers for use with stack-on hutches.

Tackboards (page 242)

- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 72"W tackboards are available in railroad cut only.
- Tackboards for use with stack-on hutches.

Range Adjustment **Base Only, Without Work Surface**	26¼" – 43½"H + Adjustable Glide	2-Stage 26½" to 45¼" + ½" Adjustable Glide 3-Stage 21¾" to 47½" + ½" Adjustable Glide	2-Stage 26⅜" to 46" + ¼" Adjustable Glide	2-Stage 26⅜" to 46" + ¼" Adjustable Glide
Range Adjustment **Includes Standard Allsteel 1⅛" Work Surface**	27⅜" to 44⅝"H + Adjustable Glide	2-Stage 27⅞" to 46⅞" + ½" Adjustable Glide 3-Stage 22⅞" to 48⅝" + ½" Adjustable Glide	2-Stage 27½" to 47⅛" + ¼" Adjustable Glide	2-Stage 27½" to 47⅛" + ¼" Adjustable Glide
Foot Configuration	• T Foot • Standard leveling glide	• T Foot or C Foot • Standard options include leveling glide, slide glides, and casters • Foot Control	• C Foot • Standard options include leveling glide, slide glides, and casters	• C Foot • Standard leveling glide. Casters available as a special
Leg Options	2 leg	2 and 3 leg	2 leg	2 and 3 leg
Weight Rating	180 lbs	• 250 lbs for 2 leg • 375 lbs for 3 leg • 350 lbs for Max models	300 lbs	• 300 lbs for 2 leg • 450 lbs for 3 leg
Cross Bar Design	Yes	A6 models ordered prior to 4/5/2021 have cross bar understructure, A6 models ordered after 4/5/2021 do not	No, however wire management Utility bay is standard	No
Colors	Silver Only	20 Allsteel Paint Finishes offered, see Altitude Tables Finishes page	Black, Designer White, Silver	Black, Designer White, Silver
Control Pad	Up/down only	Basic up/down, memory preset, paddle, rotating, foot pedal	• Up/Down user intuitive paddle standard • 4 programmable position paddle with Bluetooth, LED readout, Autodrive, and Reminder feature optional	• Up/Down user intuitive paddle standard • 4 programmable position paddle with Bluetooth, LED readout, Autodrive, and Reminder feature optional
Wire Management	Allsteel standard options available Hinged trough not recommended	Allsteel standard options available	Unique Utility Bay is integrated with the height adjustable table to provide a clean aesthetic and ample wire management capabilities	Allsteel standard options available
Power Access	Desktop power modules available	Desktop power modules available	Concealed power module sits within the Utility Bay and provides access to ample power outlets and USB chargers at the users fingertips.	Desktop power modules available
Warranty	5 years	If Purchased Before 3/1/2021: 10 Years Metal Base, 7 Years Electronics If Purchased After 3/1/2021: 10 Years for Entire Product	7 Years	7 Years

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 261-262)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¾". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A6 Load capacity is 250 lbs for 2-leg models, 375 lbs for 3-leg models, and 350 lbs for Max models. This includes weight of worksurface.

Height-Adjustable Bases (page 258-259)

- Electronic height-adjustable base units are available in six styles: A6-T Base with 2 legs, A6-C Base with 2 legs, A6-T Base with 3 legs, A6-C Base with 3 legs, A6-T Max Base with 2 legs, and A6-C Max Base with 2 legs.
- A5 models travel at 1.5" per second, A6 2-stage 1.2"/sec, A6 3-stage 1.4"/sec, A6 Max .8"/sec. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 255.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- Slide glides offered as a .option and model level. Only available on 2-leg bases.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 72"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.
- Casters available on model level for retrofitting on 2-Leg Bases ONLY.
- Altitude A6 tables feature anti-collision, a feature designed to stop table travel when the table detects an obstacle. A5 & A8 tables do not have anti-collision technology.
- Altitude A5 and A6 bases specified with a work surface 60"W and greater require the use of an external stiffener. An external stiffener is included in Altitude work surface models 60"W and greater (all models ending with letter -D). If a non-Altitude work surface is being used, an external stiffener may need to be specified separately.

A6 Control Options (page 296)

- Memory Controls are now a .option.
- Up/Down: Basic Up/Down control.
- Memory Control: 4 memory pre-set options allow the user to adjust their height to their preferred heights.
- Paddle: Simple, aesthetic control with 1 memory pre-set option and reminder mode.
- Rotating: 3 memory pre-set options and a rotating, dial-like control.
- Foot Control: Basic up/down wireless, hands free control. Can be paired with hand controls for multi-control option.
- Bluetooth Capability: A6 optional Bluetooth capability is sold as accessory model A6BLUETOOTH. Bluetooth is enabled through smartphone app AiDesk. Bluetooth control will only work with 2-leg A6 tables. Bluetooth control will **not** work with 3-leg A6 tables.

Altitude Basic (page 260)

- Altitude Basic can accommodate either 24"D or 30"D work surfaces
- Altitude Basic can accommodate work surfaces ranging from 48"W to 60"W, 60"W is the maximum work surface size for the Altitude Basic
- Supports weight capacity of 180 lbs.
- Control Box: 100-240V, 3.6A, 50/60Hz, 400W
- 9' grounded power cord
- 1⅔"/second travel speed
- Available in silver only
- Available with up/down control only
- Features "easy-to-assemble" installation

Foot Controls

- Available as a .option on A6 and as model.
- Wireless, hands free control.
- Can be paired with hand control for multi-control option.
- Compatible with A6 and A3 tables.
- 2 AAA batteries needed. Batteries not included.

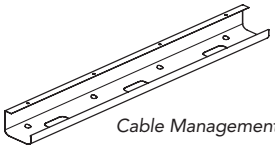
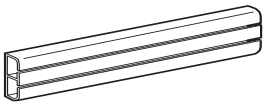
Cable & Wire Management



Cable Management Tray



Wire Management Channel

Cable Management Tray (page 263)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 263)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 263)
- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 263)
- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Quad Tap (page 263)
- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Edge of foot to outside of screen, wing	Edge of foot to outside of screen, no wing	Privacy height and modesty height	Space between table and screen	Back of worksurface to grommet
3"	2"	21¾" and 10"	2"	5¾"

Table 4: Utility Bay Dimensions/Specifications

Table Width	# Compart-ments	Wire tray height	Width of center compart-ment	Width of outer compart-ment	Center cavity load capacity	Outer cavity load capacity
48" Rectangle	1	3"	36½"	—	15 lbs	—
54"Rectangle	1	3"	42½"	—	18 lbs	—
60" Rectangle	3	3"	19¾"	14"	8 lbs	6 lbs
66" Rectangle	3	3"	19¾	17"	8 lbs	7 lbs
72" Rectangle	3	3"	19¾	20"	8 lbs	8 lbs

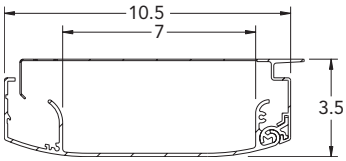
- Height-adjustable worksurfaces are available in laminate with square corners, laminate with round corners, and laminate eased edge with square corners.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) to accommodate screens and height adjustable motion. Actual depths are reduced by 0.75".
- Worksurfaces have pre-drilled alignment holes for bases, utility bay and screen brackets.
- The A8 utility bay acts as an external worksurface support; therefore, no A8 models require external supports.
- Grommet location is limited to center and 5¾" from back due to mounting of utility bay and power module under the worksurface.
- A8 load capacity is 300 pounds, including the weight of the worksurface, utility bay, power module, and screen.
- Electric height-adjustable base units are available in 2-Stage C-Leg.
- Height-adjustable legs travel at 1.5" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is <0.1 Watts. Power cords on models are 10'.
- Pedestals taller than 24½" when placed under table will interfere with utility bay in lowest position.

- Mobile peds can span over A8 foot.
- Mobile peds may extend past the worksurface; see Table 1 for dimensions.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- Tables with standard glides or slide-glides have ⅛" of adjustment. Tables with casters will sit 1.3" higher than glided versions.
- All models come standard with up-down height adjustable control. Optional control pad is available to provide app connectivity, Bluetooth, and memory set user heights (page 296)

Caster Option

- See Table 2 for caster-dependent dimensions.
- 24" deep worksurfaces with screens and casters must include surface mounted storage.
- See Storage Specification and Price List for A8 mounting specifications and applications.

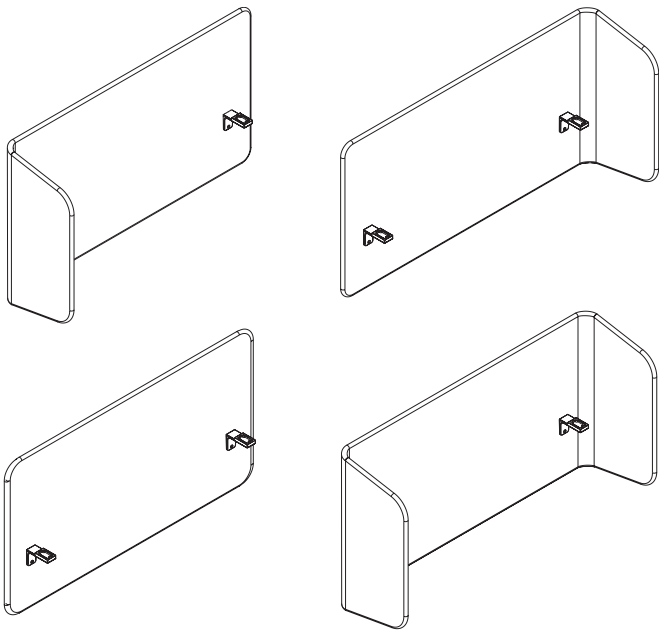
Utility Bay



Utility bay cross-section

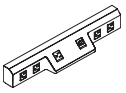
- Utility bay comes standard and attaches under the worksurface to contain cables, control box, and power module.
- See Table 4 for load and size specifications.
- Cord management chain comes standard with each table.
- Wire snake houses 3 cables at 0.300" diameter.
- Wire snake made of plastic links. Color options available are Black, Designer White, and Titanium.

Screens



- See Table 1 for overall table width and depth for each screen shape.
- Adding a screen adds 3" to depth of the table.
- Adding a screen adds 1" to the width of the table per return wing.
- A8 worksurfaces are 2" under nominal width to accommodate screens.
- RH L-screens have return wing on user's right; LH opposite.
- A3 and A5 worksurfaces are sized to accept A8 screens.

Power Module



- Contains 5 simplex outlets and 1 dual USB.
- Available in plastic or metal. Metal power module is required for Chicago code.
- Cord options include straight and curly.
  - Straight cord is 144"
  - Curly cord is 120"

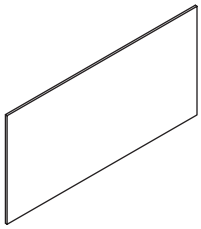
Altitude — Metal Screens (page 288)
- Powder coated magnetic metal privacy screen.
- Metal surfaces can be easily disinfected with cleaners. See cleaning guide for more details at AllsteelOffice.com.
- Available in all standard paint colors.
- Provides 1" gap along the back for accessory mount and cord drop.
- Available in 48"W, 54"W, 60"W, 66"W and 72"W.
- 66"W and 72"W screens include 3rd center bracket.
- Available in Straight, L- and U-shape configurations. Above and Above/Below desk applications.
- L- and U-Shape screens are not compatible with shrouded Height Adjustable Table legs.
- Optional tackable accessories specified separately.
- 66"W tackable accessory comes as a set of (2) 24"W.
- 72"W tackable accessory comes as a set of (2) 20"W.
- Available in standard and extended wings.
- Wings mount flush to the edge of the surface with an L-Bracket.
- 20"W tackable accessory must only be applied to both standard and extended wings without accessory slots.
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.
- Do not hang more than 5lbs of weight on wings.
- Screens are compatible with Radii undermount storage.
- Not compatible with standard 120-worksrufaces. Contact Allsteel TPG for custom sizes.

Size Reference Matrix

Tackboards	Wing	48"W	54"W	60"W	66"W	72"W
Actual Dimensions	20"W	30"W	36"W	42"W	20"W	24"W
Set of Tackboards	1	1	1	1	2	2



Accessories — Tackboard (page 289)
- Tackable accessories come with metal frame available in standard paint colors and fabric options.
- Attach to the screen using a dual lock tape (included in hardware).

Accessories — Radii (page 289)
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.

Accessories — Further Worksurface Rail Mount (page 301)
- Accessory rail must be field cut to fit between the screen brackets.
- The following accessories are not compatible with screens: U9WTC and U9TM.

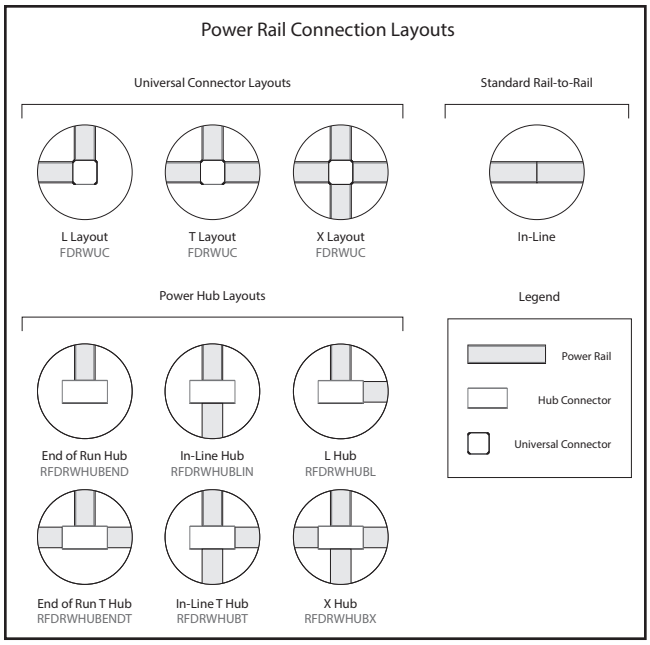
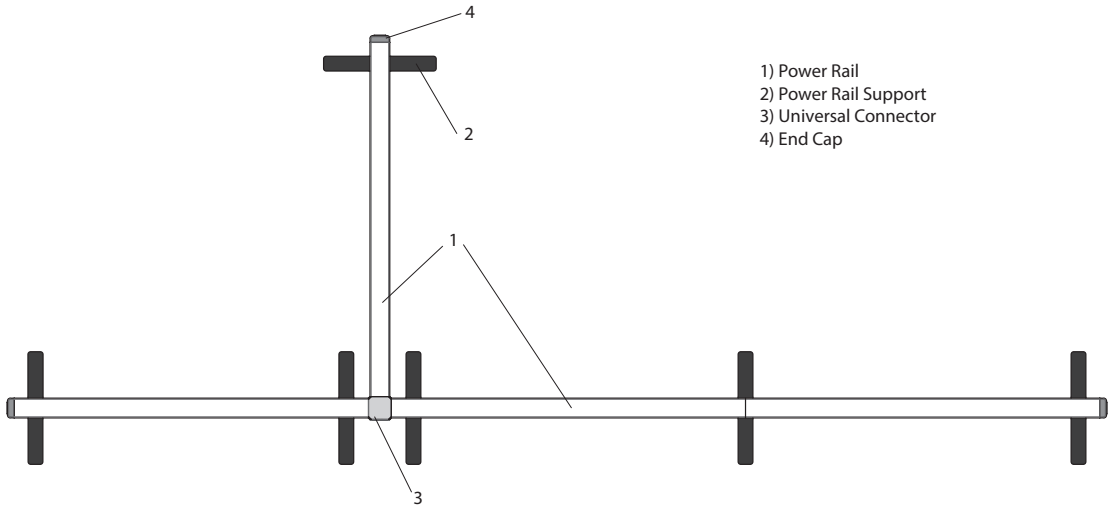
Working with Power Rail Electricals 274
General Notes about Electrical and Circuitry 274
Electrical Infeeds 274
Routing Power 275



GENERAL OVERVIEW

- Accommodates power and lay-in capacity for data cables.
- Available in 48", 54", 60", 66", and 72" lengths.
- Maximum of 2 duplexes and 2 data ports per side of rail.
- Models come equipped with hardware for in-line connections.
- Fiber optic cables can follow 90 degree turns at the intersection of the power rails.
- Power harnesses snap into electrical brackets within the power rail and accept duplex receptacles.
- Electrical power harness accepts up to 2 duplex receptacles per side of rail.
- End caps are required at an end-of-run, unless connected to an end-of-run power pole or a hub.
- Power rail can be set low to the floor using the floor legs or raised off the floor at 20½"H with elevated legs.



1) Power Rail
2) Power Rail Support
3) Universal Connector
4) End Cap

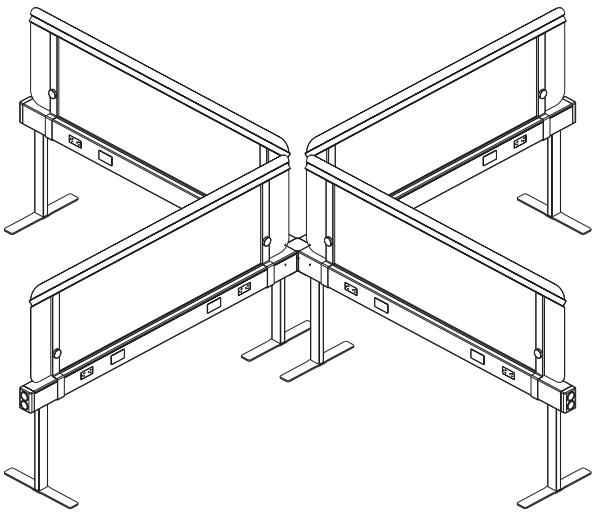
X-Configuration with Screens



WORKING WITH ALTITUDE POWER RAILS

Low Rail with Floor Legs:

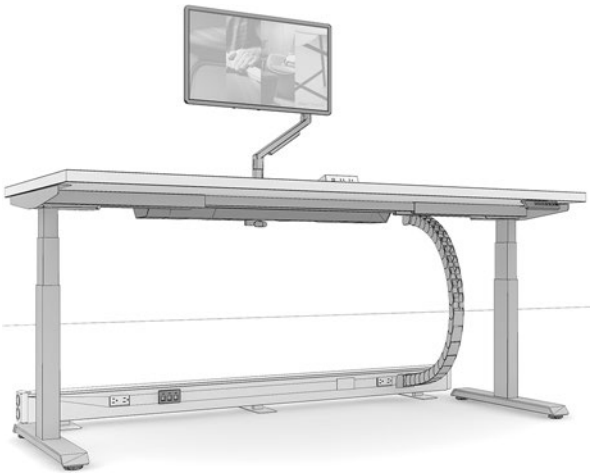
- Each power rail is supported by (2) floor legs.
- Floor legs have a leveling mechanism that can adjust up to 1¼"H.
- Legs are specified separately and come in qty of 1. Each leg is 7¼"D x 2¼"W.
- Leg is inset 2.8" from end of the power rail.
- Universal connector allows “L”, “T” and “X” configurations.
- Can connect directly to another power rail in linear applications without use of the universal connector.
- Cannot mount screens on the low rail.
- Power infeed can access the power rail in multiple ways:
  - through a receptacle position on the power rail (side infeed).
  - through the end cap on to the first power block.
  - through power pole using a power pole connector kit.

Raised Rail

- Power rails can be raised up to 20½"H using Elevated Legs and/or Hubs.
- Elevated Legs and Hubs can be used in conjunction to create the desired capability and aesthetic.
- Can be in Linear, L-, T- or X-configurations using Elevated Legs, Hubs or Universal Connector.
- Supports screens. See screens section for more details.
- Elevated Legs
  - Inset 2.8" from end of the power rail.
  - Can be shared in between the two rails in linear configuration.
  - Cannot route power and/or data.
  - Specified separately and come in qty of 1. Foot is included.
  - Leg is 15¼"D x 2¼"W x 17¾"H.
  - Order RFDRWAB separately to anchor to floor. Appropriate fasteners per floor type sourced locally.
- Support Hubs
  - Connect directly to the power rail.
  - Can be shared in between the two rails.
  - L-, T- and X-hubs can be shared in between power rails.
  - End of Run hub is only specified at end condition.
  - Can route power and/or data.
  - Can integrate power pole. Power Pole connector kit is specified separately and come in qty of 1. Foot is included.

Screens

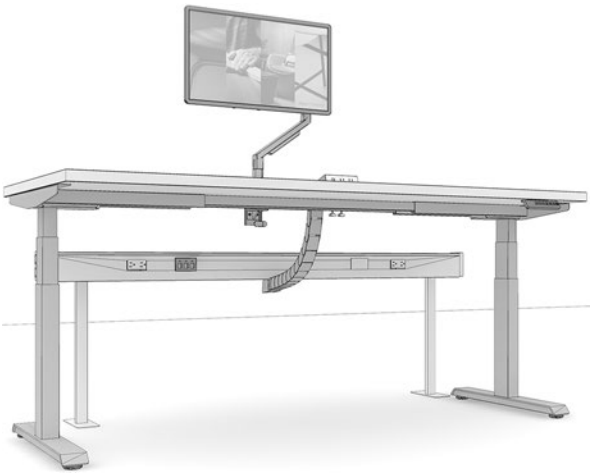
- Constructed of painted steel material.
- Standard Allsteel paint options can be applied.
- Screen height is 20"H, provides overall height of 42"H above fixed floor.
- Painted steel is magnetic and cleanable. Refer to cleaning solutions page at Allsteel Office website.
- Attachment hardware included.



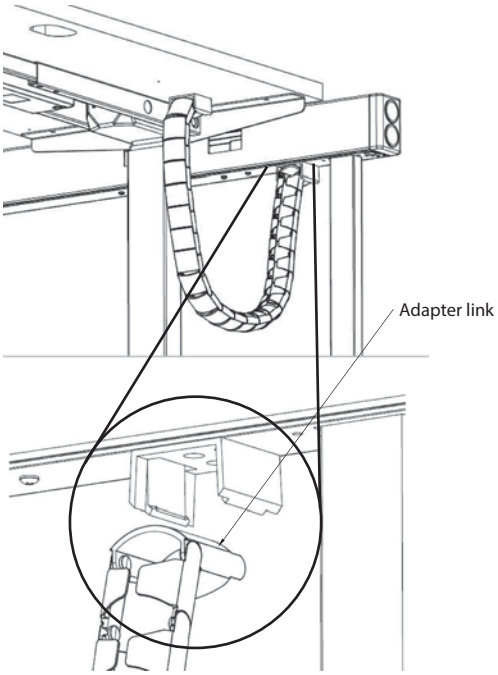
Altitude Desk + 60"W Low Rail + WKSWMC

WORKING WITH CABLE MANAGEMENT

- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware.
- Houses 6 cables @ 0.300" diameter.
- Specify WKSWMC for 58" chain. Only comes in Black Finish. Recommended for use with Low Rail.
- Specify A9CLWMC for 36" chain. Comes in Black, White and Silver. Recommended for use with Raised Rail.
- Links the power rail to a height adjustable desk.
- Has two connecting points: Top section connects underneath the Height Adjustable Desk and the bottom section connects underneath the power rail using a double-sided tape. Hardware included.
- When mounting the chain to underneath the rail, an adapter link is required. Included in the hardware.



Altitude Desk + 60"W Raised Rail + A9CLWMC



WORKING WITH POWER RAIL ELECTRICALS

General Notes about Electrical and Circuitry:

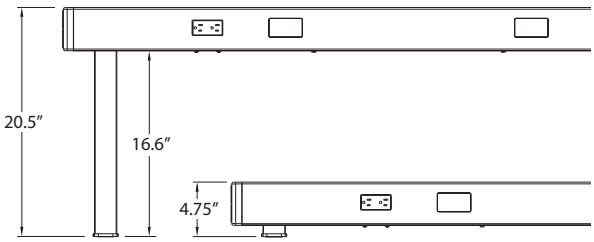
- Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
  - See Altitude Pricer section “Working with Electrical” for a detailed explanation of each electrical system.
  - All four systems utilize an 8-wire electrical system, rated at 20 amps.
- Per circuit (15 amps Canadian) — 16 amps plannable in U.S.
  - A8 Power Rail and electrical components are UL Listed. Electrical
- Components are also CSA certified.
  - Installation and use of the electrical system, the number of receptacles.
- Used on a given circuit and connections to the building power supply.
- Should follow all local and national electrical codes.

Electrical Infeeds

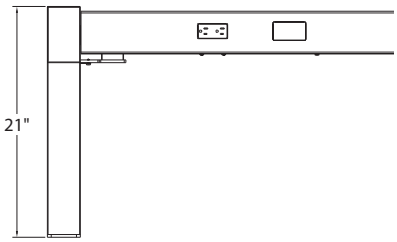
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.
- Refer to rail supports for infeed access points.

Routing Power

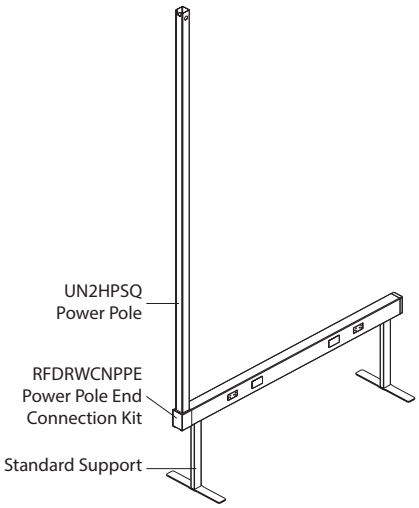
- Power infeed can access the raised power rail in multiple ways:
  - Through power pole using a power pole connector kit.
  - Through Support Hubs.
  - Through the infeed vertebrae.



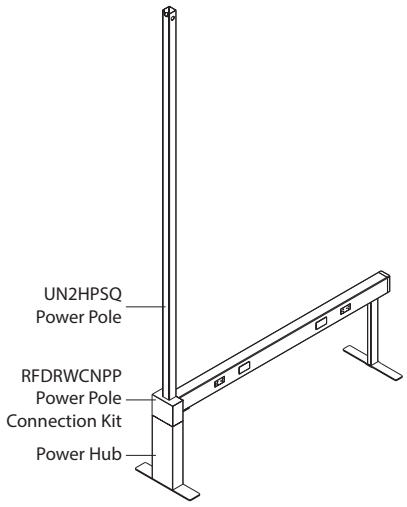
Raised Rail & Low Rail



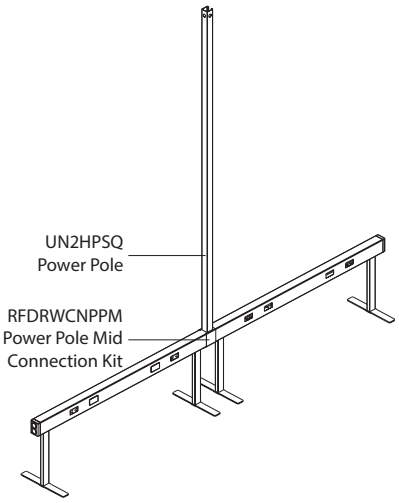
End of Run Hub



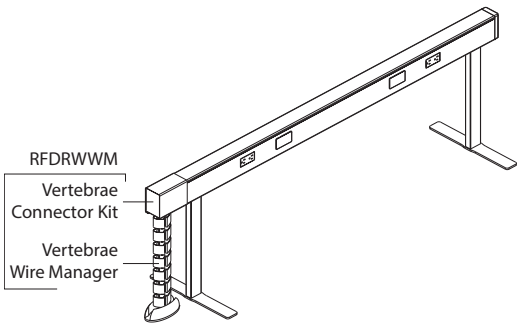
RFDRWCNPPE + UN2HPSQ
Connected to 60"W Rail



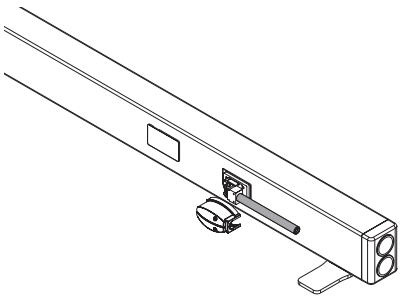
RFDRWHUBEND + RFDRWCNPP
UN2HPSQ connected to 60"W Rail



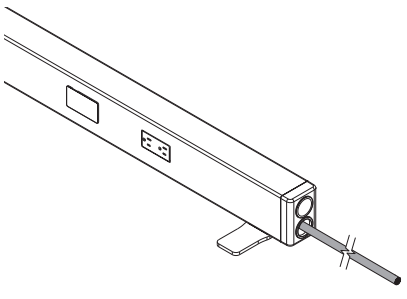
UN2HPSQ + RFDRWCNPPM
Connected to 60"W Rail



RFDRWWM
Connected to 60"W Rail



A876072 Infeed
Connected to 60"W Rail through End Cap



A877012 Infeed
Connected to 60"W Rail through End Cap

Electrical Systems

General Notes about Electric, Circuitry, and Chicago Code:

- A8 Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
- See pages 277-278 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian) — 16 amps plannable in U.S.
- A8 Power Rail and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

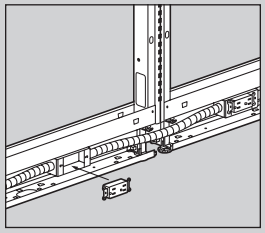
Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal at beltline. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Hardwire New York Code (page 282)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 48"W to 72"W.
- Unit must connect to a power harness.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.
- For NY infeed through the end cap:
  - Order 24" pass-thru harness with power block A871124.
  - Will not have power at first cut-out from infeed.
- For NY infeed through a power rail cut-out:
  - Order 48"-72" pass-thru harness with power block. *Harness width must match power rail width.*
  - Will not have power at cut-out location used for infeed.
- For any power rail not used for infeed, order standard electrical power harness.

Hardwire Chicago Code (page 284)

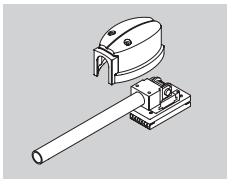
- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- The base pathway, junction box (model 873600) clips directly into receptacle locations and can be used both single- and double-sided.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.
- Power entry can be routed from the floor into a junction box (model 873600).



Electrical Infeeds

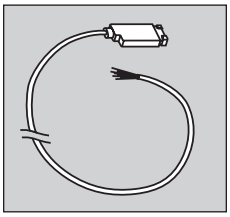
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

Base Infeed (page 283)



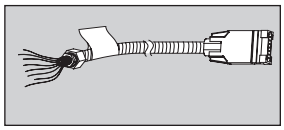
- Sealtight base pathway power infeed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.
- A jumper is required to connect base pathway power to beltline.

Sealtight Electrical Infeed (page 283)



- Sealtight electrical infeed cable is used with footed panels.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that infeed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

Power Infeed (page 283)



- Power infeed connects to a prewired electrical harness in the power rail.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power infeed needed.

Reference Page

* Select power harness models (A8712XX), with the last two digits corresponding with the panel width into which the component is to be positioned.
  The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

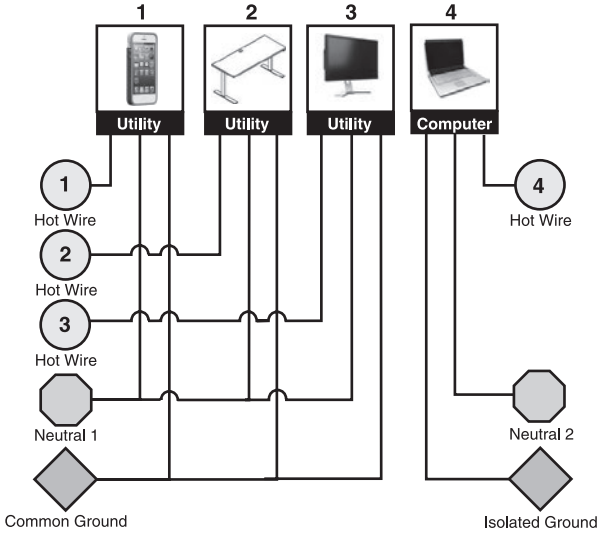
Flexconnect™ Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

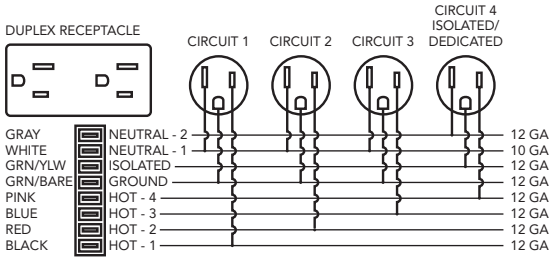
You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an “A” suffix and appear in a gray box in this pricer.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

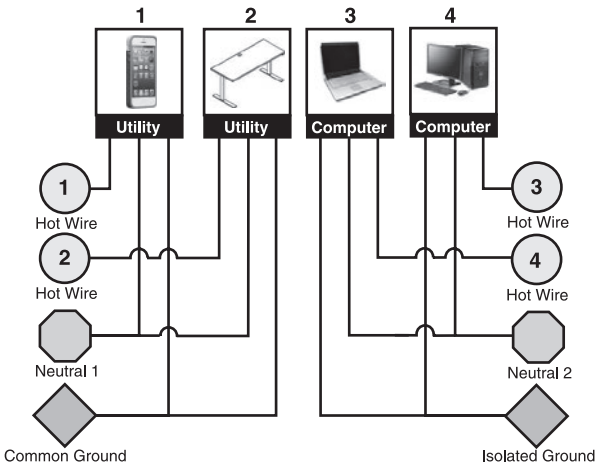
Four-circuit, 3 + 1 Receptacle Option



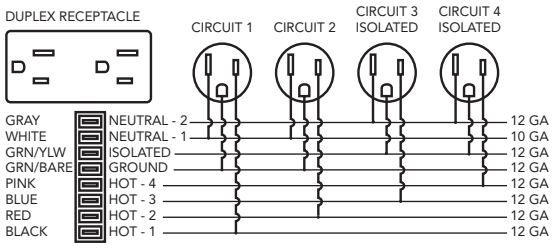
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



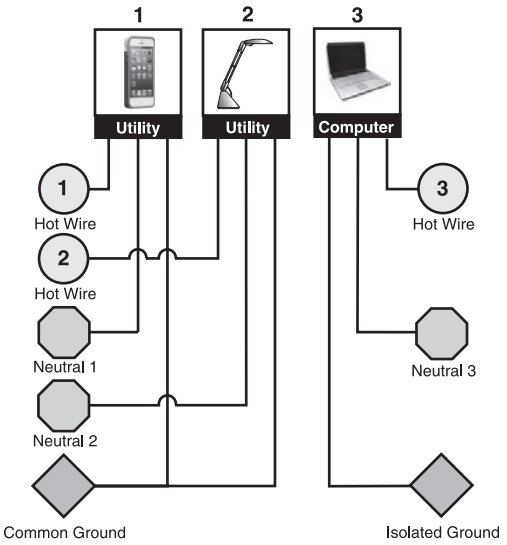
Four-circuit, 2 + 2 Receptacle Option



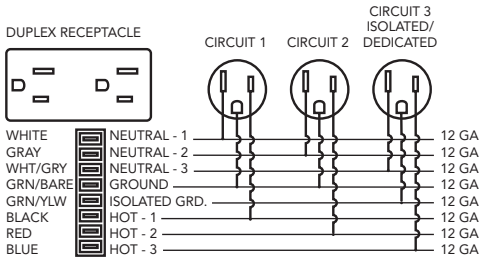
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Altitude System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A873501**	Common Circuit-2 (1) **A873502**	Common C ircuit-3 **A873503**	Iso/Dedicated Circuit-4 **A873504**
	2 + 2	Common Circuit-1 **A873501**	Common Cir- cuit-2 **A873502**	Isolated Circuit-3 **A873506**	Isolated Circuit-4 **A873504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust-colored.

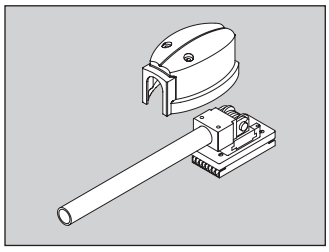
Duplex Receptacle

15 amp receptacle

ALTITUDE

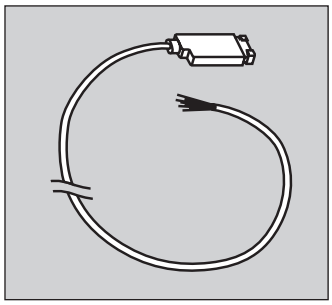
Infeeds

- Power infeed cables deliver power from building to A8 Power Rail's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of infeed cables depending on individual power requirements.



Base Infeed:

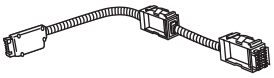
- Sealtight base pathway power infeed mounts into any receptacle position in the power rail housing.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.



Sealtight Electrical Infeed:

- Sealtight electrical infeed is used for power entering through the end cap.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of the power rail out to be connected to power.

Power Harness



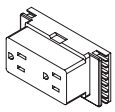
Electrical power harnesses are used to distribute power in the power rail. **Power blocks** on electrical power harness accept duplex receptacles.

- Electrical power harnesses are used to distribute power in A8 Power Rails. Harnesses must be installed in each power rail housing.
- Specify harness length to match rail housing length. Each power harness accepts four duplex receptacles (two on each side of power rail housing).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in power rail housing.

Power Blocks

- Power blocks snap directly onto brackets in the power rail and accept receptacles (sold separately) on each side of harness.

Duplexes



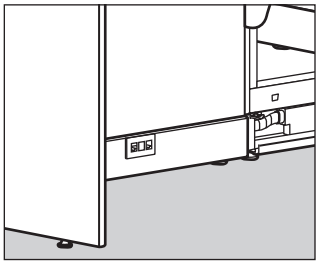
Duplex Receptacles

Receptacle Color Recommended to Coordinate with Paint Color

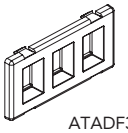
Paint Color	Receptacle Color
Bungalow — P7C	Muslin — EU
Champagne Metallic — PR5	Muslin — EU
Cinder — P7Q	Brownstone — EY
Fossil — P28	Flint — E9
Gunmetal Metallic — PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Pebble — P8R	Loft — EV
Pewter — P8D	Flint — E9
Platinum — PR2	Loft — EV
Platinum Metallic — P42	Silver — E5
Salt — P8C	Silver — E5
Titanium — P8T	Silver — E5

- Duplex receptacles snap into power blocks of power harnesses.
- Duplexes are available in multiple colors. See inside front cover for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3 or 4.
- Duplexes are model specific to support either 3 + 1 and 2 + 2 electrical infeed; or have an "A" suffix and are designed to support a three-circuit separate neutral electrical infeed.
- At least one duplex must be installed in upper housing side of rail housing assembly (see page 281, "Working with Electrical and Data").

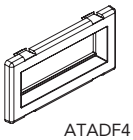
Data



Voice/Data Receptacle



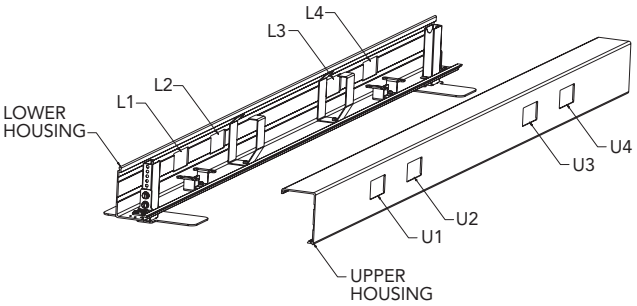
ATADF3



ATADF4

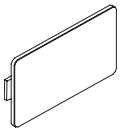
Data Faceplates:

- Fit into data port openings in Power Rail Housing.
- Due to rail housing depth, data modules should not be used back-to-back.



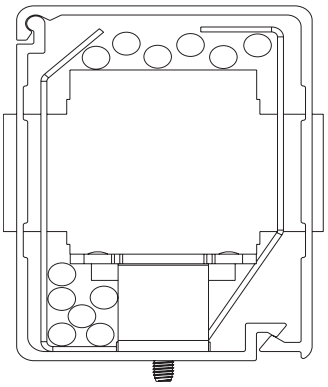
- Ports 1 and 4 accept duplexes, port covers and base infeeds.
- Ports 2 and 3 accept data and port covers.
- Either U1 or U4 must always contain a duplex.
- Data cannot be back-to-back (data in L2 + U2 or L3 + U3 combinations are not permitted).

Port Cover



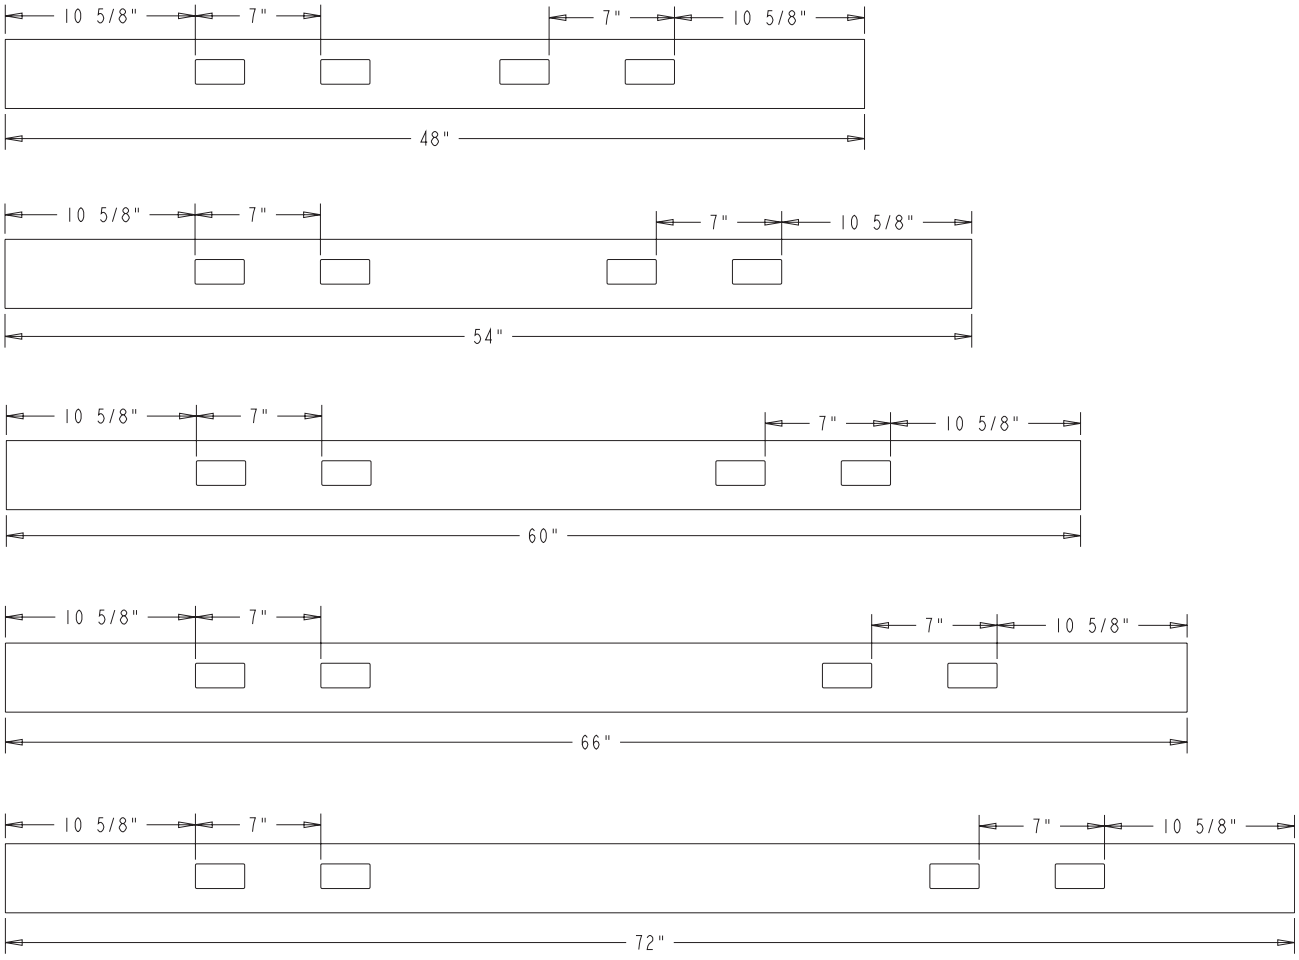
- Port covers must be used where no duplex or data faceplate is present.
- Fits into A8 Power Rail port locations in place of duplex receptacles and data faceplates.
- Does not fit into port sizes of other product lines.

Cable Capacity



- The power rail housing allows continuous voice and data lines to run without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Lower cavity allows 6 voice/data cables (¼" dia).
- Upper cavity lay-in allows 6 voice/data cables (¼" dia).

Power Rail Receptacle Locations



- For example, in a four-circuit system:
  Circuit 1 — calculators, fans, etc.
  Circuit 2 — task lights (could be wired to wall switch)
  Circuit 3 — CRT or flat screen monitors
  Circuit 4 — CPUs
- Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

For specification information see page 279.

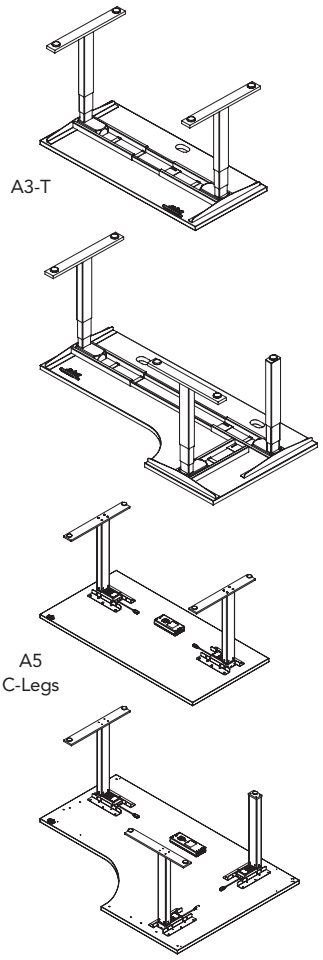
Bottom Views



Note: A3 height adjustable tables discontinued 12/31/20. See Allsteel's new A6 Height-Adjustable table for an updated, comprehensive offering.

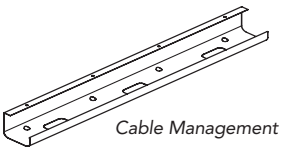
Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 255)
- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¾". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Any open span 60" and greater requires an external support channel. Altitude corner cove and 66"-72"W rectangular worksurfaces include an external support channel.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A5 load capacity is 300 pounds for 2-leg models and 450 pounds for 3-leg model, including weight of worksurface. A3-T load capacity is 250 pounds for 2-leg models and 400 pounds for 3-leg models, including weight of worksurface.

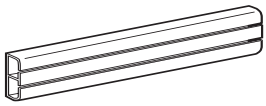
Height-Adjustable Bases (page 294-296)
- Electric height-adjustable base units are available in four styles: A3-T Base with two legs, A3-T Base with three legs, A5 C-Legs with two legs, or A5 C-Legs with three legs.
- A3-T models travel at 1.4" per second. A5 models travel at 1.5" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A5 and A3-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 294.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ⅛" adjustment on A5 and ½" adjustment on A3-T.
- The no crossbar design of the A5 exceeds knee clearance recommendations and provides optimal undersurface mounting capability.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 84"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.

Memory Controls (page 296)
- A3-T models come standard with control box with 4 memory set user heights.
- Optional control paddle allows for 4 memory presets, Bluetooth conductivity, and reminder functionality with A5 model.
- ATBCMC is not compatible with A3 tables.

Cable & Wire Management



Cable Management Tray



Wire Management Channel

Cable Management Tray (page 263)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 263)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 263)
- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 263)
- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Hinged Trough (page 263)
- Mounts beneath a worksurface. Used to conceal control box kit and extra cord slack.
- May be used in conjunction with quad tap unit UNQTMP to reduce the number of cords routed from a worksurface to a beam.
- Must specify at least 24" shorter than worksurface.
- Trough is user accessible, but may be fastened to worksurface if desired.

Quad Tap (page 263)
- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Note: A3 height adjustable tables discontinued 12/31/20. See Allsteel's new A6 Height-Adjustable table for an updated, comprehensive offering.

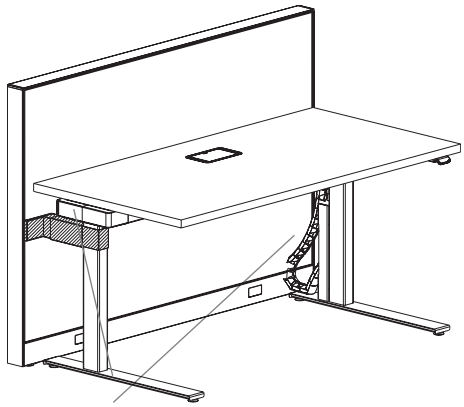
HAT to Panel Brackets

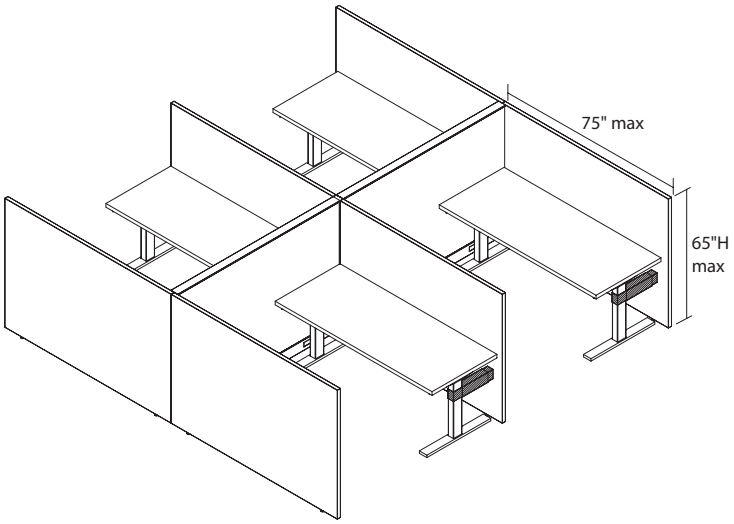
Height Adjustable Table Tie-In Brackets (Gallery Panels)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T leg HAT
- AGBKC to be specified for connection to a C leg HAT
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine.

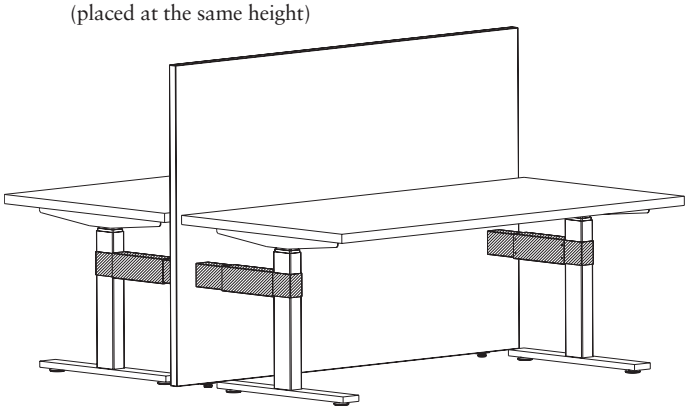


Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

SINGLE BRACKET
Gallery Panel Application:
Max Height (with Glass): 65"H
Max Width: 75"W; No top size restrictions



DUAL SIDED PANEL BENCH
Gallery Panel Application:
Max Height (with Glass): 65"H
Bracket Needed: Single Panel (75" max) with Brackets on each leg (placed at the same height)



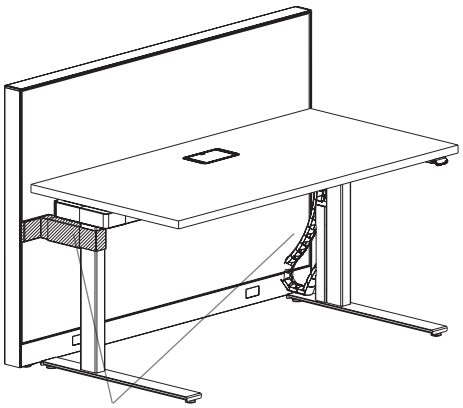
Freestanding Gallery Panel Application

ALTITUDE

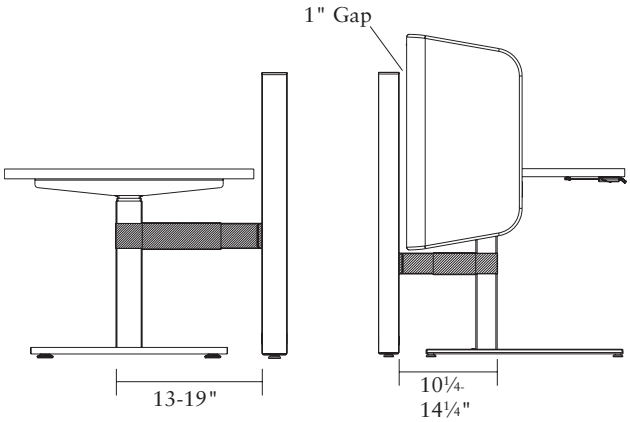
HAT to Panel Brackets

Height Adjustable Table Tie-In Brackets (Optimize, Stride, and Terrace)

- Improves panel rigidity.
- ABKTL to be specified for connection to a LH T-leg HAT
- ABKTR to be specified for connection to a RH T-leg HAT
- ABKCL to be specified for connection to a LH C-leg HAT
- ABKCR to be specified for connection to a RH C-let HAT
- Brackets mount into slotted standard.
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine for A8, A3, and A6.
- Dual sided A5 tables cannot support a freestanding panel. (A5 will be discontinued on 12/31/2020)



Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.



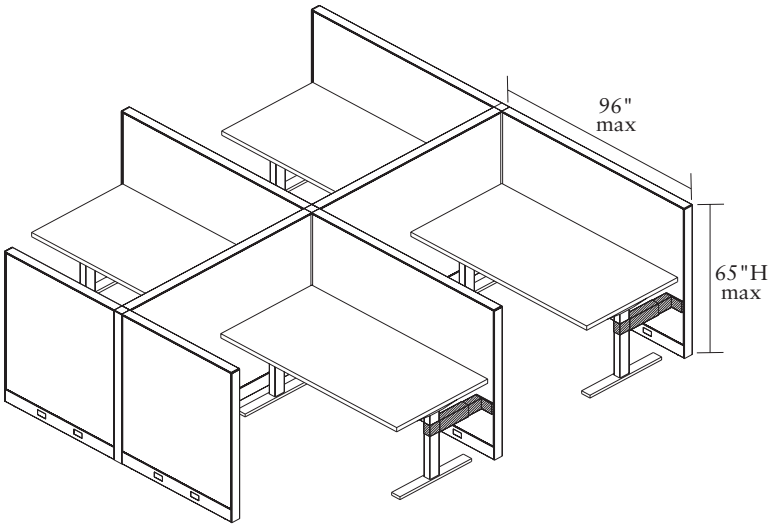
SINGLE BRACKET

Systems Application (not compatible with Concensys):

Max Height (with Glass): 65"H

Max Width: 96"W; Note: tops greater than 72"W will not align.

Overheads cannot be used without return panel



DUAL SIDED PANEL BENCH

Systems Application (not compatible with Concensys):

Max Height (with Glass): 65"H

Bracket Needed: Every 96" on both sides (placed at the same height). Note: tops greater than 72"W will not align.

Overheads cannot be used without return panel

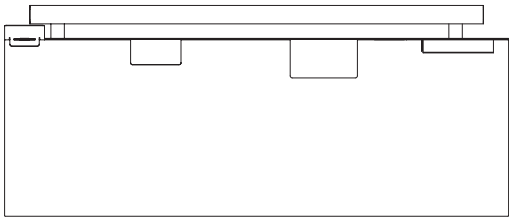
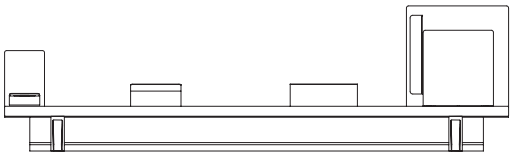
Rail Accessories

Side View

Top View



Phone/ Tablet Stand | Pencil Holder | Rail Mounted Shelf | Vertical Paper Tray



Front View

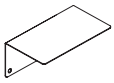
Worksurface Mounted Rail (page 301)
- Aluminum extrusion designed to mount to flat edge worksurfaces. Comes with rail and hardware for mounting.
- Mounted rail extends ¾" on underside of worksurface which may interfere with the mounting of storage and screens.
- Widths available for Altitude tables 12" through 66" in 6" increments. Can pass across seams of ganged worksurfaces in tethered applications.
- Passes behind worksurface bracket on tethered applications.
- For freestanding applications rail should be 6" shorter than worksurface (i.e. 54" rail for 60" worksurface).

Rail Mounted Accessories

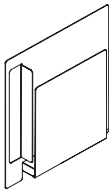
Not recommended for use on panel systems with attached worksurfaces due to fit up issues created with worksurface and panel. Adding accessory rail shifts worksurface — 3/16" away from panel along that edge. Forcing worksurface into place crushes fabric tile and with tiles of other material (steel, marker board, etc) is likely to scratch, dent, or otherwise damage tile during installation.

U9TM Phone/Tablet Stand (page 301)
- 6⅝"H x 4¾"W and angles back 1¾".
- Has a ¼" x 1" slot in bottom flange to allow for routing cables. Requires 1¾" space behind worksurface edge in order to be used.

U9TP Pencil Holder (page 301)
- 2⅝"H x 6"W x 3"D.
- Holds approximately twenty #2 pencils.



U9TS Rail Mounted Shelf (page 301)
- 8"W x 4½"D and sits 2⅝" higher than top of worksurface.
- Holds up to 8 pounds.



U9TF Vertical Paper Tray (page 301)
- Sits 12"H x 1½"W x 12"D from back of worksurface.
- Folder front stands 9" high from worksurface top, 1¼" space holds about 280 sheets of copy paper.

U9WTC Cord Organizer (page 301)
- Can attach to both bottom of worksurface or slides into rail.
- 4"W x ⅞"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

Universal Hook (page 301)
- Mounts to underside of worksurface and provides storage for bags, coats and purses. Can be used as a horizontal wire manager.

Notes

Extensions™

Extensions — Introduction

Extensions accessory line by Allsteel is designed to help you create your own space.

- **Create a unique space**

  Each person is unique, no one person works exactly like another, and different tasks require different tools. Extensions work tools allow each person the ability to create a unique environment that is all their own. Lots of paper to manage? Need active files within arm's reach? Want to maximize your worksurface space? Need light somewhere other than below a cabinet? Whatever the task, we have the tools to accommodate your workstyle.

- **Create a comfortable space**

  With a full line of organization, ergonomic, and illumination tools, Extensions allow you to create a comfortable, ergonomic work area. Organization tools keep important items visible and within your reach. Ergonomic tools help you stay comfortable while working. Illumination tools allow you to put your light where it suits you.

- **Create an organized space**

  Tired of all the piles of paper building up on your worksurface? Organization tools house your materials and keep them in an orderly fashion. With a combination of hanging or freestanding organizational accessories, Extensions let you manage everything from binders to paper clips.

- **Organization tools**

  Work tools are a durable metal construction. Extensions allow you to manage your workspace smartly with tools like the phone caddy to elevate the phone off the worksurface, landscaped mail box trays to minimize worksurface intrusion, folder holders and tool box pencil holders that hang off the slat rail and each other.

  Increase your efficiency with organization!

- **Ergonomic tools**

  Ergonomics is more than just comfort, it's flexibility and safety. The adjustable keyboard options allow users to maintain and vary comfortable wrist and arm positions throughout the day, whether typing or mousing. Monitor Arms offer versatile adjustability while providing optimum comfort for the eyes, neck, and shoulders.

- **Illumination tools**

  Sleek and flexible, our lighting components offer you several choices. Recessed task lights conserve space and feature electronic ballast for longer bulb life and cooler operating temperature. LED tasklights' slim design blends in with its surrounding while utilizing energy-efficient LED technology. The Link light offers award-winning style to a highly versatile and energy efficient light.

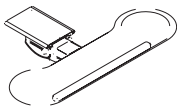
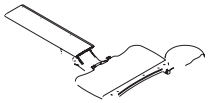
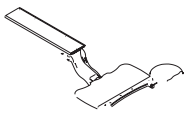
AKTSHORT Keyboard Support (page 305)



- Lift and lock intuitive height adjustment.
- Compatible with Altitude Height Adjustable Tables
- Positive and negative tilt for best ergonomic positioning.
- +10°/-20° tile adjustment and 360° rotation provides support of neutral position of shoulders, arms and wrists while accommodating multiple working postures.
- Surpasses ANSI/BIFMA standards.
- Black powder coat finish.
- Patented secondary slide and unique arm design provide minimal footprint.

AKTMID and AKTLONG Keyboard Support (page 305)





- Lift and lock intuitive height adjustment.
- Positive and negative tilt for the best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Non-handed mouse tray can be moved from right hand to left hand side.
- Surpasses ANSI/BIFMA standards.
- Black powder-coat finish.

Keyboard Spacer Kit (page 305)

- Keyboard Spacer Kit required for mounting under Altitude worksurfaces.
- Kit provides ten spacers and hardware for mounting keyboard supports beneath an external worksurface support channel.
- Spacers are 2⅛"H providing more room beneath surface for mounting.

CPU Hammock (page 305)

- Features 360-degree swivel with an 11" track.
- Load capacity is 75 lbs.
- CPU must be minimum of 3¼"W with maximum dimension of 64" in perimeter.
- Handy adjustment tool stores within unit.
- Safety feature prevents accidental release of straps and straps can be adjusted while CPU is installed.
- Can be used on Height Adjustable Tables as long as it is attached with spacer model AKMH. Take into account required leg room for users.

For specification information see page 304.

Reference Page

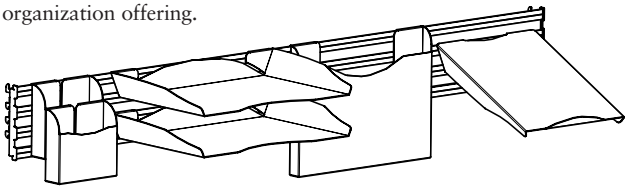
Allsteel's tool rail works in conjunction with a variety of accessories. Modular accessories free up worksurface space and provide orderly storage that is well within reach. Units can be arranged and rearranged to respond to changing workflow. The work tools that attach to the tool rail are:

- Mail Box
- Folder Holder
- Phone Caddy
- Binder Bin
- Tool Box
- Clip Caddy™
- Sidebar™ Personal Shelf
- Paper Wave™
- Gripper Clip

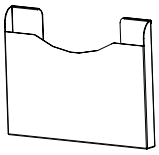
Additional accessories that work with the **tool rail work tools** aesthetically are:

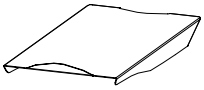
- Bookends
- Freestanding Mail Box

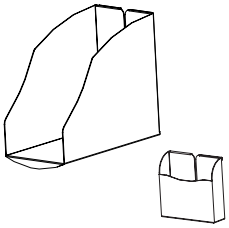
Coat hooks, marker boards and center drawers round out the organization offering.

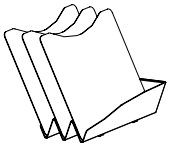


Tool rail, shown above, is height-adjustable in 1" increments using slots in panels or metal hutch. Tool rail shown with two tool boxes, two mail boxes, folder holder, and phone caddy. Folder holders and binder bins extend below a tool rail. Paper Wave and contents extend above a tool rail.









Tool Rails and Work Tools (page 309)
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.
- For use with Stride®, Terrace®, Concensys®, and Optimize™ systems.
- 5" high rail (widths coordinate with panels).
- Attachment via vertical reveals.
- Can be hung from wall track. Good solution for above copiers.
- Systems tool rail is off-modular — can be used on a panel of equal width or one size smaller.
- May span two panels of appropriate size, i.e., 60"W Tool Rail on two 30"W panels.

Tool Rail for Hutches (page 309)
- Will work on Universal, Terrace, Optimize, and Concensys system hutches produced after July 2, 2000 and Align™ metal hutches.
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.

Mail Box (page 310)
- Holds standard letter-size paper and inter-office envelopes.
- Minimal horizontal intrusion.

Folder Holder (page 310)
- Holds manila envelopes.
- Is capable of hanging on other folder holders to maximize space.
- Stores vertically for easy access to files.

Phone Caddy (page 310)
- Holds telephone at optimum ergonomic angle.
- Wire management cut-outs.
- Accommodates standard phone sizes.

Binder Bin (page 310)
- Holds folders, binders, and manuals.

Tool Box (page 310)
- Holds pencils and other writing utensils, large post-it notes, and other desk top accessories.

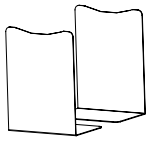
Clip Caddy™ (page 310)
- Holds paper clips and other small objects.

Sidebar™ Personal Shelf (page 310)
- Holds office supplies and personal effects.

Paper Wave™ (page 310)
- Provides 3 fully divided slots for organizing files.
- Keeps papers from "bowing" at bottom.

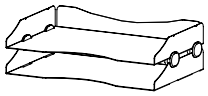
Reference Page

Gripper Clip (page 310)
- Binds project papers together.
- Mounts to tool rail or tool tile.



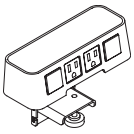
Bookends (page 310)
- Can be used on shelves or in cabinets.
- Used to hold books, binders, and catalogs upright.

Freestanding Mail Box (page 310)
- Incorporates similar aesthetic to mounted Mail Box.
- Mounting brackets allow for free access from front and back.
- Sold in pairs of two; will stack up to eight high.
- Individual mail box dimension = 1¾"H.
- Stacking brackets are black.

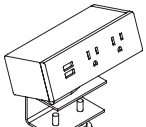


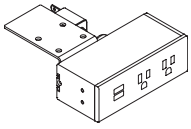
Coat Hook APMC6 (page 310)
- Hangs directly into slotted Stride®, Terrace®, Optimize™, or Concensys® panel frame.
- Use for coat or bag.
- Package of six.
- Available in black only.

Power/Data Modules — Clamp On Worksurface (page 316)
- On-surface mounting option, fits on any worksurface with a 4" overhang.
- 6' Power cord. UL Listed.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings. Many of the AMP, AT&T, Krone, Leviton and most commercial data terminals can be used.



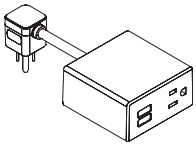
Power/Data Modules — Clamp On Worksurface (page 316)
- Worksurface clamp can be used on any surface with a 2½" overhang.
- Must be installed at time of initial worksurface installation if installing between a worksurface and panel.
- 6' Power cord. UL Listed.
- The USB hub allows simultaneous powering of 2 USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capacity is limited and may not charge all devices.
- Qi compatible wireless charging available on select models.





Power/Data Modules — Under Worksurface (page 316)
- Under surface mounting can be used on any surface with a 5" clearance.
- 6' Power cord. UL Listed.
- Hardware not included.

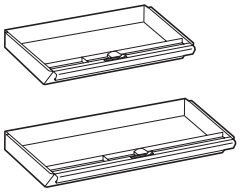
Worksurface Power/Data Module (page 316)
- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires ⅜" gap. Consider whether ⅜" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining ⅜" gap may not be possible with worksurfaces that are panel wrapped.



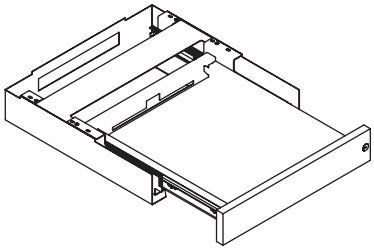
Miki Power Modules (page 316)
- Table top and undermount units.
- Hardware not included on undermount.
- 6' Power cord, UL Listed.
- 1 AC power and 1 dual USB configuration.

Vesta Mobile Power (page 316)
- 3 AC power simplex, 1 dual USB-A, 1 USB-C configuration.
- 10' Retractable power cord, UL Listed.
- Unit weighs 13 lbs.

Reference Page



Metal Center Drawers (page 311)
- All metal center drawers feature pencil trays with three compartments for storage.
- Center drawers will not fit in center of 24"D worksurfaces which are wider than 60" due to location of center support bracket.
- For locking specifications, see pages 322-324.
- Ball-bearing slide suspension.

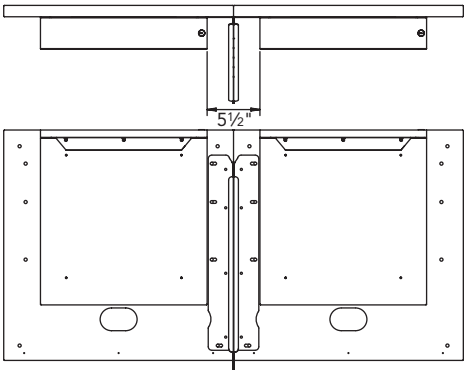


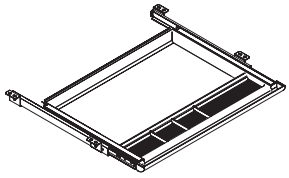
Laptop Drawer — U7WDA (page 311)
- Drawer body made of sheet metal.
- Drawer front made of ¾" particleboard with laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17⅝"W x 18"D x 3⅜"H Outside (interior 13"W x 16"D x 1⅞"H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/glides fully retracted is 24¾".
- Does not interfere with Further leg mounting plates so drawer can be placed directly next to either a system or table leg.
- When being placed next tower storage using the tower ell bracket (Z6LB) to support surface the drawer must be inset 3" to clear the ell bracket.
- Can be placed directly next to any support storage from any Allsteel product line (excluding towers).
- Flat brackets — drawer must be offset 3" from seam between surfaces to clear the bracket. See illustration at left.
- Can be used with rabbet edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

Flat Brackets

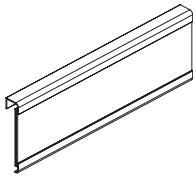
Front View

Top View





Polymer Center Drawer - ACD1 (page 311)
- 20½"W x 17"D x 2"H
- Available in black only
- Made from ABS.
- Minimum clearance for mounting: 23"W x 16¼"D x 2"H.
- Retracts on 16" ball-bearing slides.
- Can be used on worksurfaces with Height Adjustable Bases as long as it is attached with spacer model AKMH.
- Can store up to 25 lbs.



Name Plate (page 310)
- Comes in a 10-pack.
- Metal backer installs under a Terrace or Optimzie top cap, can be used with frameless glass.
- Cover is a transparent polycarbonate insert.
- Full plate is 8½"W x 2⅜"H.

For specification information see pages 306-307.

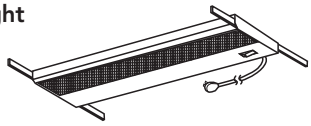
EXTENSIONS

Allsteel Extensions offers Illumination in three styles — Undercabinet LED Light, Wand Light, and Link Light.

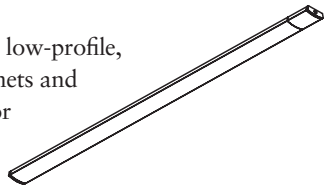
Recessed Undercabinet LED Light



Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with LED strips.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

Undercabinet LED Light

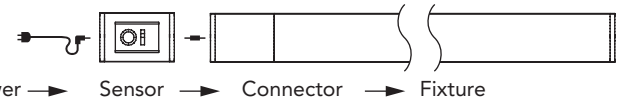


The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek ½" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

CONNECTION SEQUENCE*



*Cannot deviate from this sequence

Recessed Task Lights (page 314)

- Black Metal Construction with 9' long black cord attached to right rear corner of the fixture.
- LED strip comes installed within light.
  –50,000 hour life span
  –120V-277V
  –CCT 4000K
  –CRI 80+
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.

Undercabinet LED Lights (page 314)

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).
- 20W power supply for 20W 31" unit (.166 amps).
- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.

LED Light Combinations Must Not Exceed 60W in Combination	Power Usage
6X 17"	60W
3X 31"	60W
1X 31" + 4X 17"	60W
2X 31" + 2X 17"	60W

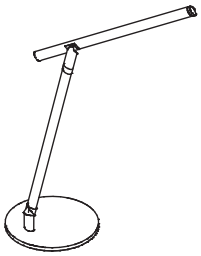
- The combinations that could max out 60W are featured above. *Daisy chained units have a power limit of 60W from one power entry. 17W units use 10W and 31W units use 20W.*
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).
  Example: Daisy-chain 4–17" undercabinet LED lights:
  Specify: 1 ALED17U60
  Specify: 3 ALED17UJMP30 with 10" jumper cord
- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).
- 3500K color temperature.
- 131 footcandles at 18" on ALED31U; 76 footcandles at 18" on ALED17U.
- Magnetic or screw-mount option — attachment hardware included.
- On 20 watt models, power drive is attached to plug: allow 1⅞"D space at outlet.
- On 60 watt models, power drive brick is in center of cord.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

Overhead Length	Suggested LED Sizes
24	17
30	17
36	17
42	31
48	17 + 17
60	31 + 17
72	31 + 31
Note: LED lights may need to be positioned along length properly to allow jumping to additional overheads. Suggested sizes above are recommendations for single overheads to provide as much light along length of overhead as possible.	

The suggested sizes factor in 4 inches of room for the power inlet and occupancy sensor (optional).

Reference Page

Wand™ Task Light



Wand freestanding task light offers a clean, simple design along with powerful LED technology to illuminate the workspace. The swivel base and arm tilt allow users to position the light just where they need it. The 7.7 watt LED light offers efficiency and long life, providing up to 25 years of daily use. The slim, sleek design makes it easy to integrate into any workspace. Wand task light is 97% recyclable. Occupancy sensor and/or charging models available.

Wand LED Freestanding Task Light (page 315)

- Available in Silver or White. 9'4" cord is Silver.
- Full range dimming from 100% – 10% with last state memory.
- Uses 5W at highest setting and as low as 1 watt at its lowest setting, providing 75 to 12.7 footcandles of light, respectively (16" above worksurface).
- 7½" round swivel base and 16½"H tilt arm allow versatile positioning of the 13" lampshade.
- Designed for 50,000 hours of life.
- Color Temperature: 3500K. Color Rendering Index (CRI): 80.
- Materials: aluminum arm and lampshade, steel base.
- Weight: 4.4 lbs. 97% recyclable, 76% post-consumer.
- Certifications: UL and CUL. TAA compliant.
- Occupancy sensor available with automatic shut-off after 15 minutes if no motion is detected.
- USB model features USB-A (1), USB-C (1) charging within base of unit.
- USB model also features occupancy sensor. 7.5W (A) & 18W (C) power consumption.

For specification information see pages 312-313.

Pivot Standard Weight Monitor Arms

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 18.75" extension, and 10" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Standard weight arms utilize a tension spring that allows for effortless adjustment of monitors to proper ergonomic positions.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6-17 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Pivot Clamp mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot or other monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Slider Mount

- Provides 11.8" of horizontal movement.
- Allows for wider monitors to be used on dual monitor arms and sit flush side by side.
- Not compatible with Pivot Heavy Duty Series.

Pivot Heavy Duty Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 20.75" extension, and 12" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 8-35 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 2 monitors weight 4-17.5 lbs each.
- Pivot Clamp mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot or other monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Post Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with 21" extension and 10.6" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6.5-17 lbs per arm.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞"–2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Silver color option with grey wire management only.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Single and dual models have a post height of 17.7"; Triple monitor model has a post height of 27.5".
- Monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot is compatible with 54"D Stride benching applications when worksurface grommets are specified and Pivot grommet mount is installed.
- Pivot Clamp or Grommet mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Counterweight Kit

- Counterweight Kit to be used with monitors weighing less than 6 lbs.
- Gray color only.
- Counterweight weighs 1 lb. 6 oz.

Pivot Conversion Kits

- Kit allows user to transform single monitor arm (Standard, Heavy Duty, or Post) into Dual Arm configuration
- Available in black and silver, Post arm only available in silver
- Required wire management included
- Once assembled, will aesthetically emulate dual configuration of chosen arm

Laterals, Pedestals and Storage, Painted Wood Storage

Standard Options

- Random Keying — The factory will assign key(s) arbitrarily using key numbers from chart below.
- Omit Lock Core — The factory will omit lock cores. Removable lock core kits with specific key number must be ordered to facilitate keying alike in the field.

Vertical Files

Standard Options

- Random Keying — The factory will assign key(s) arbitrarily (see below chart for key numbers).

Key Alike Process

- Order standard product which will be shipped with factory installed locks and random numbered cores.
- Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
- Simply replace the factory installed core with the replacement cores after product has been installed.

Replacing Lock Cores

- Lock must be in the unlocked position.
- Insert core removal key and pull core straight out. (Reach units require rotating key 90° clockwise past unlocked position.)
- Insert new core with core removable key, hold core into lock and withdraw core removal key.
- Retain original core for future use.

	Random Keying	Omit Lock Core	Key Numbers	Lock Core Kit	Master Key

Open Market	**Master Key***		
	(One key) Available to authorized dealers only on electronic orders.Will open ALKF23CN and LKF23CN locks numbered 101N-225N.	**AMF22** S	**$ 28**

N series lock cores (ALKF23CN) are a replacement part for legacy Allsteel products. N series lock cores were used in all Persona pedestals produced between January 1996 and August 2009 as well as Receding Door Overheads produced between January 1996 and August 2010. N series lock cores are NOT used in current product and should not be ordered for product produced after these dates. E series lock cores are used in current product, see above.

S *Shippable by small-package carrier.*

EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except Receding Door Overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — Random, Specified or Sequential.

Random Keying

The Random Keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

Example: *There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

Example: *There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

Example: *A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

The first 40 offices have 4 silver locks each that need to be keyed-alike.

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

SAMPLE ORDER FOR EXAMPLES GIVEN:

Model	Key Type	Quantity
LKFE5BLK.	X.	15
LKFE2SLV.	X202.	10
LKFE4SLV.	SEQ/101.	40
LKFE3SLV.	SEQ/141.	20

NOTE: Quantity required is last number in model.option string.

Description	Model / Color	List Price
Easy Lock Lock-Core		
Lock Core Kit — 1 core, 2 keys	**LKFE1** ⌊__⌋	$ 27
Lock Core Kit — 2 cores, 2 keys	**LKFE2** ⌊__⌋	$ 56
Lock Core Kit — 3 cores, 2 keys	**LKFE3** ⌊__⌋	$ 83
Lock Core Kit — 4 cores, 2 keys	**LKFE4** ⌊__⌋	$ 111
Lock Core Kit — 5 cores, 2 keys	**LKFE5** ⌊__⌋	$ 139
Lock Core Kit — 6 cores, 2 keys	**LKFE6** ⌊__⌋	$ 167
Lock Core Kit — 7 cores, 2 keys	**LKFE7** ⌊__⌋	$ 195
Lock Core Kit — 8 cores, 2 keys	**LKFE8** ⌊__⌋	$ 223

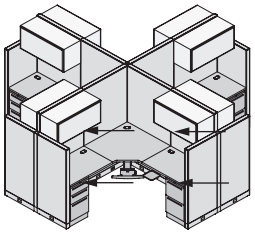
Add color suffix to model: **SLV** Silver, **BLK** Black, **MTS** Matte Silver

Note: One core removal key minimum per order. One additional core removal key per 25 lock-cores will be shipped.

Master Key		
(One key) Available to authorized dealers only on faxed orders.	**AMKF22**	$ 28

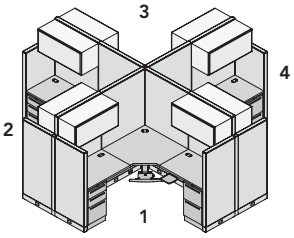
How to specify using Easy Lock Program:

Step 1 — Count the number of lock cores and color required in each workstation that need to be keyed alike.



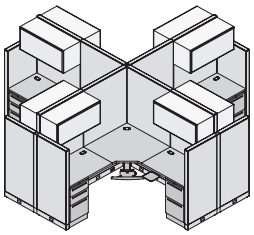
2 overheads with 1 lock-core each = 2
2 pedestals with 1 lock-core each = 2
Total silver lock-cores per station = 4

Step 2 — Count the total number of workstations needing 4 lock-cores.



4 total workstations

Step 3 — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.



LKFE4SLV.X.4
Lock-Cores per station
Color of Core
Number of workstations

Ordering Hints	*Reason for Replacement* (apply appropriate reason number to each line)		
Add-ons/Mis-specified product — order as cataloged items on Synergy or your ordering system. *Do not use this form.* Replacement parts order must be faxed or emailed to Allsteel Customer Support. Please alert CS of any special expedite requirements. Fees may apply. Replacement parts orders are usually shipped within 5 days. Punchlist and/or parts orders for projects should be sent to the Allsteel Project Coordinator assigned to the project.	1	Shortage	*Shipping order number required below. Always billable with credit pending POD. Must be reported within 30 days of delivery.
	2	Freight Damage	*Please provide serial number. Must be reported within 30 days of delivery date if shipping to a warehouse or 15 days if shipping direct to site.
	3	Non-conforming Product	*Please provide serial number.
	4	Billable	Purchase order number is required. Replacement parts are net priced (no discounting). *Freight will be invoiced if order is billable. Order finished goods (cataloged items) electronically on Synergy or your operating system.

Qty	Serial Number	Model Number (complete with options)	Part Number (if known)	Description of Part Needed	Original Shipping Order #	Reason #	Description of Damage/Problem

Note: This form is also available on the Allsteel Synergy website.

Allsteel®

Frame & Tile Panel Systems

Price & Specification Guide 2022

Prices effective May 13, 2022

PDF updated April 21, 2022

Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

For information on Allsteel's warranty coverage, visit AllsteelOffice.com.

Frame & Tile Panel Systems

Specification and Price List

Effective May 13, 2022

- Software support packages furnished to the customer, either by Allsteel® or by another source, which support the sale of Allsteel products are superseded by printed price lists.
- Prices are subject to change without notice. All orders are subject to prices in effect at the time of order.
- Please refer to your Allsteel Dealer Sales and Discount Policies for order placement information, terms and conditions.
- Additional copies of this Specification and Price List are available upon request from Allsteel Literature Fulfillment at 1-866-255-7833.
- Ordering information appears at the bottom of each product page complete with examples on how to specify. Fabric and finish pages are referenced at the bottom of product pages.

This publication is available as an interactive or downloadable PDF at www.allsteeloffice.com.

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at **allsteelcomteam@allsteeloffice.com**.

Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.

   If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

   In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.

   You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

   HNI Textile Distribution Center
   COM Production Yardage — PO Number
   Docks 20-22
   301 Mulberry Avenue
   Muscatine, IA 52761

Information that MUST be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

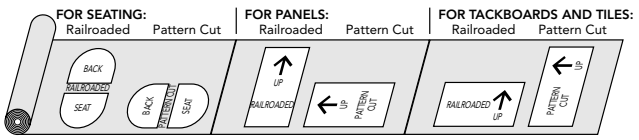
cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).



Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Frame &Tile Panel Systems

Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a $500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no $500 matching fee, however, there is a sample chip fee of $175 net for stains and $100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

  Allsteel Inc.
  Attn: Tailored Products Group
  2210 Second Avenue
  Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilsonart, Formica, Nevamar and Pionite laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

Veneer Care Instructions

Veneer worksurfaces feature the Gunlocke® finishing system. The finishing system is a process that begins with the application of stains, which promote exceptional depth and clarity. Next the worksurface receives a specialized coating that provides exceptional durability and chemical resistance. The remaining surfaces receive a top coat. These finishing processes ensure depth, clarity, color consistency and durability throughout the product.

Veneer worksurfaces have exceptional resistance to:

- Heat and moisture (hot beverages, pizza boxes)
- Chemicals (liquid paper, nail polish)
- Stains (permanent markers)
- Scratches and impact (everyday wear and tear)

Caring for your veneer finish:

- General maintenance procedures entail wiping clean the entire surface with a clean, water dampened soft cloth once per week (be sure to wipe with the grain)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately. Do not allow spills to dry.

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Allsteel does not guarantee the exact matching of grain, pattern and color.

Everyday Advantage®

New terms and conditions for EDA:

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
   • Everyday Advantage Std-0125, Everyday Advantage Canada-0127
2. Everyday Advantage orders are not eligible for bid pricing.
3. Program discounting includes the complete Optimize, Further, Terrace, and Stride systems lines, private office solution, Approach and Involve storage. This program also includes Acuity, Access, Evo, Inspire, Lyric, Mimeo, Nimble, WillQuip, Relate, Seek, and Svelte, seating. Altitude, Aware, and Structure tables are also available, along with Align pedestals, lockers and metal storage and Essentials pedestals, and Radii storage lines. In addition, Extensions ergonomic accessories and lighting are part of the standard offering. All other product not called out is available for order on the contract but will receive standard discounting of 55%–65%.
4. All textiles and finishes except for veneer and some wood finishes are available, depending on quantity and selection, and may have extended lead times.
5. Everyday Advantage orders are not limited to a minimum or maximum.
6. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
7. Standard freight terms apply.
8. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

Allsteel Inc. reserves the right to amend or terminate this program at anytime with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).

Refer to page 11 for current upholstery availability by model/series.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's Partnership Program consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- **Camira, memos@camirafabrics.com 1.616.288.0655**
- **CF Stinson, cfstinson.com 1.800.841.6279**
- **HBF Textiles, hbftextiles.com 1.877.494.5727**
- **Maharam, maharam.com 1.800.645.3943**
- **Ultrafabrics, ultrafabricsinc.com 1.877.309.6648**

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- Camira, memos@camirafabrics.com 1.616.288.0655
- HBF Textiles, hbftextiles.com 1.877.494.5727

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

PARTNERSHIP – GRADE 4

***HBF Textiles* BLINK**

Terrace® Systems

Finishes 20
Typicals Overview 21
Introduction to Terrace 22

FRAMES, CONNECTORS, AND TILES

Working with Frames and Connectors 23-27
Working with Sliding Doors 30
Working with Tiles 31-36
Working with Veneer 37

Frames

Base Panel Frames — Raceway and Footed 38
Stacking Frames and Segment Kits 39
Doors Panels, Sliding Door, and Conversion Kits — Footed and Base Raceway 40
Top Trim — Radius and Flat 41
Glass Panel Mounted Screens and Trim 42

Connectors

Connector Kits, Trim, and Stabilizer Brackets 43-46
Wall Track, Tile Attachment Kits, and Segment Bars 47

Tiles

Fabric Tackable Acoustical and with Port 48-51
Steel, Tool, Perforated Steel, Laminate, and Hard Surface 52-54
Glass — Single Pane 55
Marker Board 56
Landscape Surface and Custom Tile Bracket Kits 57-58
Veneer 59

ELECTRICAL (8-WIRE)

Working with Electrical & Data 60-70
Power Harnesses, Pass-Thru Cables, and Jumper Cables 71
Dual Electric Eight-Circuit Power Harness Kit 71
Duplex Receptacles, Infeeds, and Power Poles 72
Electrical and Data Components 73-74

WORKSURFACES AND SUPPORTS

Working with Worksurfaces and Supports 75-81
Working with Cadence® Freestanding Desking 82-90

Laminate Flat Edge

Primary and Bow Front 91-92
External Worksurface Support Channel 91
Corner, 120°, 60°, and Corner Cove 93-94
Altitude® Height-Adjustable Reference 94
Peninsula, P-Shaped, and Jetty 95
D-Shaped and Quarter-Round 96
Countertops 97-98
9120 Program for Non-Standard Size Worksurfaces 99-100

Veneer Square Edge

Primary and Bow Front 101-102
Altitude Height-Adjustable Reference 102
Corner, 120°, and Corner Cove 103-104
Peninsula, P-Shaped, and Jetty 105
D-Shaped and Quarter-Round 106

Supports

Panel-mount Worksurface Supports and Brackets 107
Cadence Desking Worksurface Supports and Brackets 108
Wall Track Kits and Tile Attachment Brackets 108
Cadence Desking Modesty Panels and Gussets 109

METAL OVERHEADS

Working with Overheads, Shelves, and Hutches 110-113
Overhead Cabinets, Shelves, and Up-mount Kits 114-115
Hutches and Tackboards 116

PAINTED METAL FINISHES

Gunmetal Metallic PR3
Platinum Metallic PR2
Silver** PR6
Solar Black P8X

**PR6 - no upcharge on Involve; available as Grade P2 color on stanchions.
PR6 & P8X - not available on Concensys, Essentials bookcases, and vertical files.

GRADE P3

Atom P8S
Blossom*** P8K
Bullseye ..... PJF
Cabernet*** P7T
Conifer*** P8H
Ember P8P
Ion P8N
Iris P8J
Krypton P8F
Regatta P8M
Succulent*** P8A

*** These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

STRATAWOOD VENEERS

GRADE V1

Add FSC prefix to Stratawood codes listed below for Stratawood veneer trim on Stride and Terrace.
Example: **FSCSC777**

CHERRY

Cinnamon/Biltmore Cherry SC260
Lowell Ash Cherry SC394
Clear Cherry SC700
Light Cherry SC701
Shaker Cherry SC774
Burnished Cherry SC777

MAPLE

Field Elm SE599
Clear Maple*** SE800
Harvest Maple SE856
Beigewood SE878
Phantom Ecru SE912
Belair SE934

OAK

Clear Oak SF300
Dark Rift Oak SF331

SILVER OAK

Silver Oak Clear SB100
Portico Teak Silver Oak SB150

WALNUT

Florence Walnut ST579
Light Walnut ST601
Skyline Walnut ST625
Pinnacle Walnut ST679
Sumatra Walnut ST693

NATURAL VENEERS — FLAT CUT

GRADE V1

CHERRY

Cinnamon/Biltmore Cherry NC260
Lowell Ash NC394
Medium Red Cherry NC512
Light Cherry NC701
Shaker Cherry NC774
Burnished Cherry NC777

MAPLE

Clear Maple NE800
Harvest Maple NE856

WALNUT

Ebony Walnut NT509
Florence Walnut NT579
Light Walnut NT601
Skyline Walnut NT625
Nutmeg Walnut NT629
Pinnacle Walnut NT679
Sumatra Walnut NT693

NATURAL VENEERS — RIFT CUT

GRADE V2

Fawn Cypress Rift Cut Oak RF108
Light Rift Cut Oak RF301
Dark Rift Cut Oak RF331
Natural Recon Rift Cut Oak RF896
Phantom Ecru Rift Cut Oak RF912

***SE800 and NE800 are not available on Stride trim.

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

GROMMETS ON VENEER WORKSURFACES

Wire management grommets come standard on most veneer worksurfaces. Choose between metal or plastic grommet option. Note: Plastic grommet color is predetermined based on finish selection.
All Maple veneers ..... Muslin EU
All other veneers ..... Black E4

LOCKS

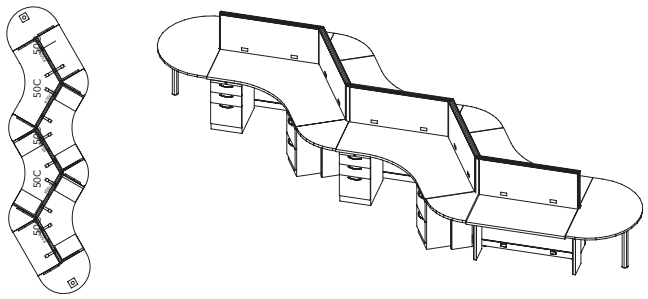
Black E4
Chrome ..... ordered by base model
Matte Silver ..... EL

NOTE: Refer to individual product pages for upcharges.

A full gallery of typicals from each Allsteel system can be found on our website:
https://www.allsteeloffice.com/design-resources/idea-starters.
Each typical includes a complete BOM with current pricing, downloadable CAD files and PDFs of each drawing.

Use the Allsteel Typicals Gallery to find the components in a Single Terrace Station…

"Irregular" Shape Station 23′ x 6′6" (6-pack)



Line Item	Product Description	Qty	Model Number
1	Structural Raceway Panel Frame — No Top Trim 50"H x 48"W	6	**TK05048WR**
2	Terrace Top Trim 48"W	6	**TK348PT**
3	E End Trim Connector Kit 50"H	2	**TK350E**

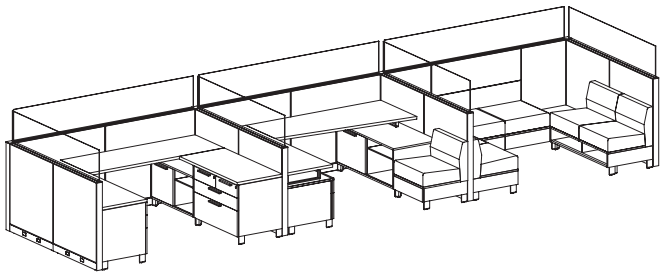
And how to make the most of your space with Involve®.

Involve "U" Stations 24′ x 6′ (3-pack)



Visit https://www.allsteeloffice.com/design-resources/idea-starters to view these typicals and more.

The building blocks for a better office.

What makes a workspace inspiring? The truth is it's different for every office and every worker. The Terrace frame-and-tile solution offers both flexibility and refined design details, so you can keep it basic or dress it up. And, when paired with other Allsteel products, you can create beautiful, functional spaces that look every bit as good as they work.

Ideas often come from collaboration. Other times from focused research. And sometimes they appear out of the blue. Terrace makes it easy to design environments that help people do better work, from individual workstations for focused activities to teaming areas for group collaboration. With lower panels and frameless glass, open, naturally lit workspaces have an aesthetic that inspires. So nothing gets in the way of the next big idea.

More ways to design one-of-a-kind environments.

With Terrace, spaces can be as active as the people who use them. Worksurfaces of varying heights give people the freedom to enjoy the ergonomic benefits of changing postures. Soft seating integrated within primary and secondary work areas encourages spontaneous collaboration. And customized storage options can be integrated into spaces in a variety of ways to better fit individual workstyles.

Terrace offers unique designs that make a strong visual statement customized for any application. From the clean aesthetic of benching to an open, cross-functional collaborative space to an individual workstation for focused activities, Terrace provides the options and features you want and need.

Make the most of your space and your resources.

With real estate at a premium and the need for workspaces to be more agile to accommodate future needs and changing workstyles, office furniture must work harder than ever. That's why Terrace is built to last with sturdy steel panels that stand up to years of use and numerous reconfigurations. And it's designed to work seamlessly with other Allsteel products, so you can easily integrate a variety of other furniture options whenever the need arises.

Terrace, make it yours.

Once you've selected the furniture for your space, a variety of material options are available to give it a personality all its own. Make a bold statement with woodgrain laminate storage and contrasting trim and panel fabric. Or create a brighter look with panels and storage in light fabrics and finishes. Find the perfect palette to complement your brand or style.

The most beautiful thing about Terrace is all the ways you can customize it for functionality, ergonomics, and aesthetics. It can support heads-down concentration or encourage open interaction. You can mix and match a variety of options, from panel heights to worksurfaces, fabrics to frameless glass, and storage to accessories. The choices are endless.

Frame Dimensions (Actual)

Depth: 2⅝" (use 2¾" to calculate intersections in length of panel run)

Widths: 24", 30", 36", 42", 48", 60"

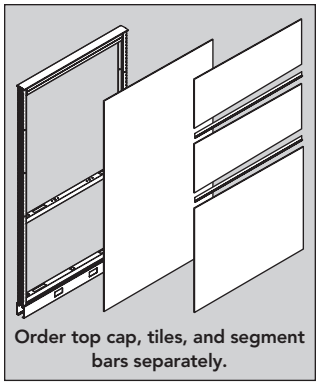
Heights* with radius painted trim: 29¼", 34¼", 41¼", 49¼", 56¾", 64¼"

Stacking Frames: 15"H, 22½"H, 30"H

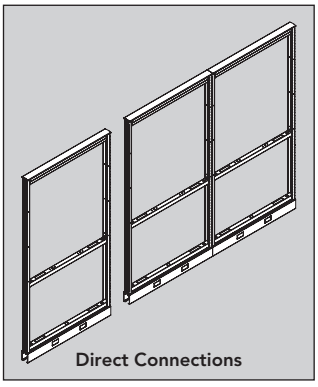
Leveling Glides on Frames with Raceway Covers: 2¾" range

Leveling Glides on Footed Frames: 2¼" range

*with levelers fully retracted



Order top cap, tiles, and segment bars separately.



Direct Connections

Panel Frames (page 38)

- Specifications: formed, steel vertical members, with tubular steel horizontal members are welded into a sturdy, structural panel frame.
- Panels are shipped with base pathway covers or decorative feet installed.
- Top trim, monolithic or segmented tiles, and segment bars are ordered separately with choices of applications.
- Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.
- For adequate stability, one of two methods of stabilization shown on page 25 must be adhered to.
- Base raceway panel frames include: frame, base pathway covers, attaching hardware, and bottom segment clip.
- Footed panel frames include: frame, panel feet, attaching hardware, and bottom segment clip.
- No electrical or data capabilities in footed panel frames. Decorative feet replace base raceway covers.

Panel Frame Conversion Kits (page 40)

- Base raceway to footed and footed to base raceway conversion kits can be used to convert existing frames. Footed to base raceway kits ship with glide tower assembly. Conversion process requires panel to be removed from panel run.

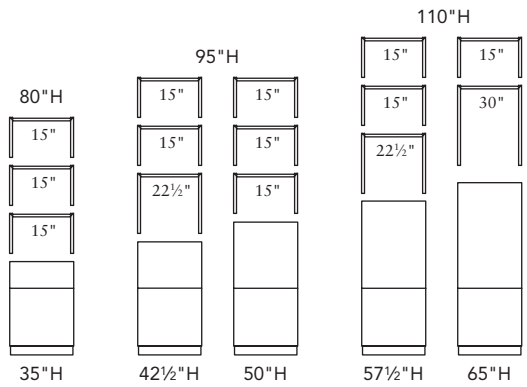
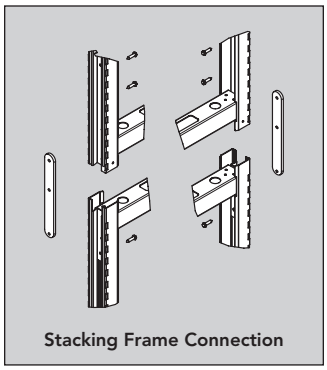
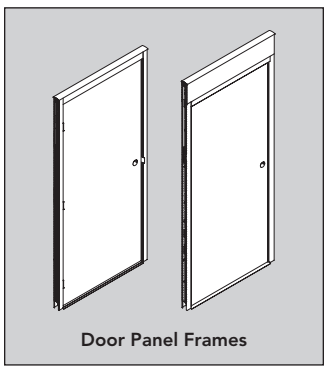
Building Vertically with Terrace Frames





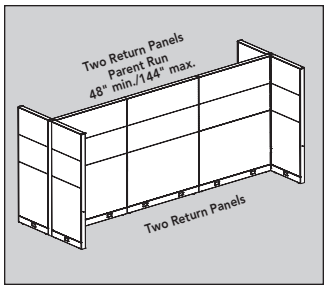
Stacking Frame Connection



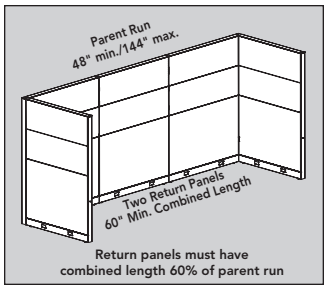
Door Panel Frames

Building Horizontally with Terrace Frames

Method 1—Opposing Returns



Method 2—Single-Sided Returns



Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1—Opposing returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.
- A single return panel (48" nominal minimum length) may be used with a mid-panel connector. The panel must extend at least 24" from one side of the parent run.
- Return panels must not be no more than 30" lower than the maximum height of the parent panel run.

Method 2—Single-sided returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels totaling at least 58% of its length, extending in one direction.
- Return panels must not be any more than 30" shorter in height than parent run. When using 120° connections, 12" must be added to length of return panels as determined by methods 1 and 2. Any run under 100" must have a minimum combined length of 60" of return panels.

Stacking Frames (page 39)

- When adding stacking frames, remove the top trim from the structural frame, and install it on top of uppermost stacking frame.
- Stacking connection provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per Allsteel configuration guidelines.
- Includes attachment hardware and uses specified top trim. Add appropriate connectors.
- Stacking frames can be added to the top of a 35"H base panel frame up to 80"H, added to 42½"H and 50"H base panel frames in any combination up to 95"H, and added to the top of 57½"H and 65"H structural panel frames up to 110"H.
- To maintain panel mounting slot modularity 22½"H stacking frames should only be used with 42½"H, 57½"H base panel frames, or 87½"H door frames.
- To match 87½"H door frame height, use a 65"H base panel frame with a 22½"H stacking frame (slot modularity will be lost on stacker).
- To maintain modularity on 35"H, 50"H, and 65"H base panel frames use 15"H or 30"H stacking frames.
- If panel mounting slots are not being used, any stacking frame can be used on any base panel frame.
- Do not combine differing frame widths in a single stack or span multiple base panel frames with stacking frames.
- Stacking frames cannot be used as base frames.
- Tile options for stacking frames are given on page 33.
- Guidelines for using overhead storage with stacking frames are given on page 111.

Segment Bars (page 39)

- Segment bars are horizontal steel cross members required between tile segments. Must be specified on each side of frame.
- Black only.

Electrical Mount Support Bars (page 39)

- Used to mount electrical in any location in panel frame other than base pathway or beltline. Order electrical mounting brackets separately.
- Tiles must be field ported when electrical is mounted in a location other than just above the worksurface at beltline.
- Can be used with acoustical tiles on one or both sides of the panel frame.
- Includes attaching hardware. Gray only.

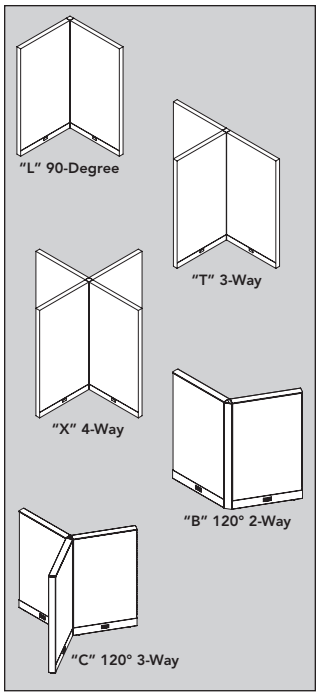
Door Panel Frames (page 40)

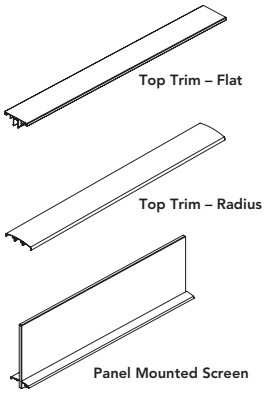
- The 87½"H door panel includes 42"W frame, 36"W door, hinges, top trim, and attaching hardware. See illustration above left.
- The 95"H door panel includes frame, 42"W door, hinges and attaching hardware, and two 8$\frac{3}{16}$"H x 42"W fabric tiles for top of door frame.
- Doors available in laminate.
- Painted top caps available in radius or flat.
- Specify fabric for top tiles on 95"H door.
- Lockset with knob or lever ordered separately.

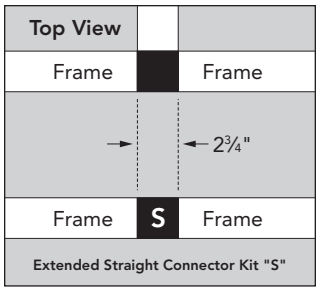
Sliding Door and Mounting Kit (page 40)

- See illustration and specification information on page 30.

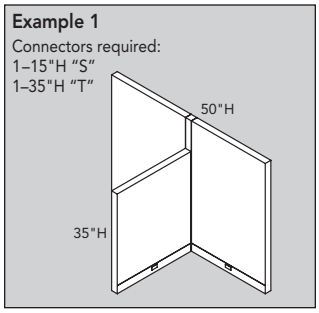
Reference Page

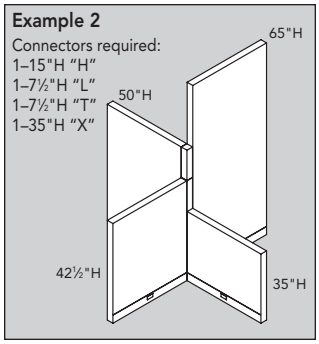


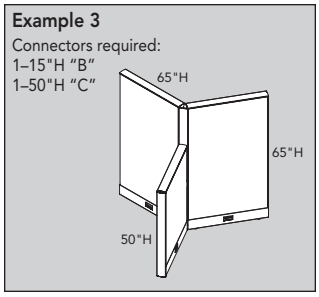


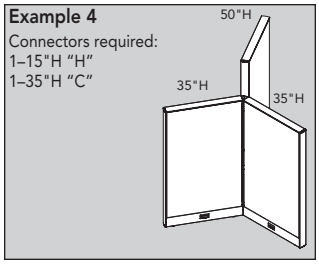


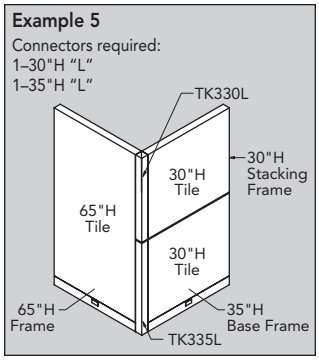
- **Multiple-height connections** also utilize standard "L", "T", "X", "S", and "E" connectors, with corresponding height connectors stacked according to the number of intersecting panels from the bottom up. (See examples below.)

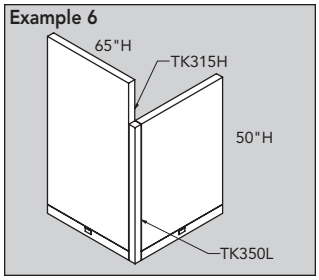












Connectors and Trim

Off-Modular Panel Connection Kit (page 40)
- Includes top and bottom attachment brackets and top trim finished end.
- Must be field installed. Installation requires defacing of the top tile.
- Cannot be mounted in locations where the bottom bracket is closer than 8 inches from the edge of frame in the base pathway on parent run panels.
- Not structural. No panel mounted glass on spine where attaching or on first off-modular panel.

Top Trim (page 41)
- Use to finish top on base panel frames and footed panel frames.
- Top trim can span individual or multiple base panel or stacking frames.
- It is possible to span multiple frames when the combined frame width is equal to the top trim width.
- Some spanning examples are listed on page 41, other combinations are possible.
- Available in flat or radius in painted finish.

Panel Mounted Screens (page 42)
- Frameless insert integrated into the base panel frame top trim.
- Replaces top trim on structural or stacking frame.
- It is possible to span multiple frames when the combined frame width is equal to the panel mounted screen width.
- Taller adjacent frames require "HG" grooved end trim.
- Panel mounted screens are non-structural. Do not hang or stack on top of panel mounted screens.
- Available in ⅜" thick clear or frosted glass.

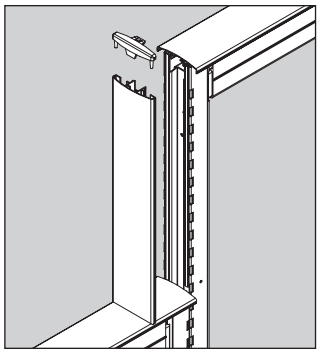
Connector Kits (pages 44-45)
- "L", "T", "X", "S", "B", and "C" connector kits are used when connecting frames at intersecting runs.
- Base connectors include base pathway and must be specified at base regardless of full height or segmented connection. Specify height that corresponds with segment frame height. See Examples 5 and 6 at left.

"L", "T", "X", and "S" Connector Kits (page 44-45)
- For "L", "T", "X", and "S" connector kits, add 2¾" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.
- "L", "T", "X", and "S" connector kits includes top cap, connectors, vertical cover, light gap extrusion, and attaching hardware.
- "X" connector kits Includes top cap and connectors.
- Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections. (Add 2¾" to the length of the run for every extended straight connector used.) See illustration at left.

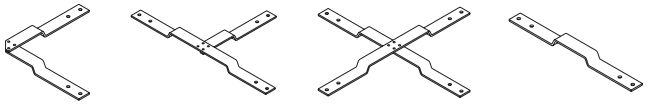
2-Way 120° Connector Kits (page 44)
- Includes top cap, connectors, vertical cover, and attaching hardware.

3-Way 120° Connector Kits (page 44)
- Includes top cap and connectors

"E" End Trim Kits (page 45)
- End vertical trim cover (includes top cap — adds ⅜" to run).

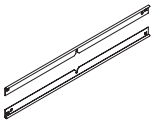


High-Low "H" End Trim



Top Stabilizer Brackets
Top and Bottom

Pair of Wall Track Ends



Tile Attachment Kit Top and Bottom

Segment Bar

Reference Page

High-Low End Trim Kits (page 45)
- High-low "H" covers the exposed end of a frame when joining frames of differing height in certain configurations — profile adds ⅜" to length of panel run. See illustration at left.
- At the end of a panel run use "E" model suffix end trim kit.

Grooved High-Low Trim (page 45)
- For use when the base panel frame of a panel mounted screen is shorter than the adjacent in-line panel. Taller adjacent in-line panel cannot have a panel mounted screen.

"W" Wall Mount Kits (page 45)
- Wall mount kits provide a means to affix a panel run to a permanent building wall.
- Kit adds 1 1/16" to length of panel run.
- Includes top cap. (Color must be specified.)
- Connector is Black only.

Top Stabilizer Brackets (page 46)
- Optional brackets to provide added strength to reduce flex at panel junctions.
- Lay in cabling below top cap is not possible where bracket is installed.
- Panel mounted screen cannot be used where bracket is installed.

Terrace Wall Track/Tile Attachment Kits (page 47)
- Allows for mounting of system panel components on permanent wall structures except cantilevers and sit-to-stand units.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Terrace wall track tile attachment kit to install tiles onto wall track. Tool tiles cannot be used on wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- It is not recommended to use Landscape™ or laminate Terrace tiles with wall track. If these tiles are required consider using Stride wall track.
- When using Terrace wall track and using tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

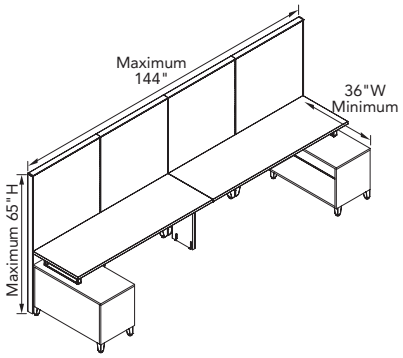
Approach and Involve Laminate Wood Storage

Leg or plinth base models available. Leg base units are shown below.

Reference Page

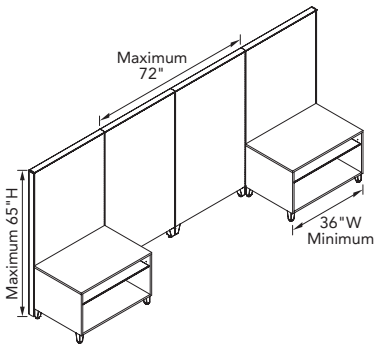
Side-mounted Credenzas

Use 1 storage-to-panel bracket per credenza — 1 LH and 1 RH.
The minimum credenza size is 24"H x 36"W x 18"D.
With a mid-run floor support, the maximum panel run is 144".
Without a mid-run floor support, the maximum panel run is 96".
Overheads and shelves cannot be used with 24"H side mounted credenzas.
Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.
Panel frame maximum height is 65".



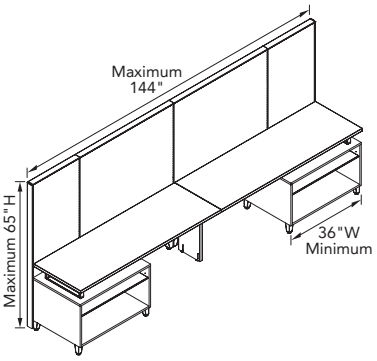
Back-mounted Credenzas — Modular

Use 2 storage-to-panel brackets per credenza — 1 LH and 1 RH.
The minimum credenza size is 24"H x 36"W x 24"D.
The maximum panel run between back-mounted credenzas is 72".
Overheads and shelves cannot be used with 24"H back mounted credenzas.
Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.
Panel frame maximum height is 65".

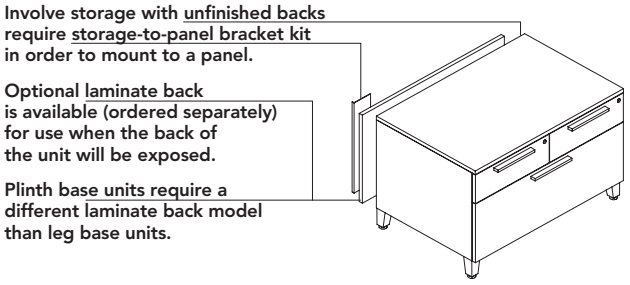


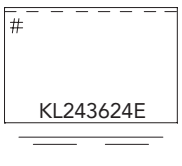
Back-mounted Credenzas — Off-Modular Ends

Use 1 storage-to-panel bracket per credenza — 1 LH and 1 RH.
The minimum credenza size is 24"H x 36"W x 24"D.
With a mid-run floor support, the maximum panel run is 144"
Without a mid-run floor support, the maximum panel run is 96".
Overheads and shelves cannot be used with 24"H back mounted credenzas.
Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.
Panel frame maximum height is 65".



Note: Storage with unfinished metal backs require storage-to-panel bracket kit in order to mount to a panel. Left- or right-handed storage-to-panel bracket is determined by slots on panel — left-handed bracket required when attaching to left panel slots and right-handed bracket required when attaching to right panel slots.





An example of a 2D CAD symbol for Involve is shown at left. Note the dashed line that represents the unfinished metal back. The pound sign indicates that counterweight kits may need to be added depending on the application. *See Casegoods & Storage Price List page 260 for counterweight specification rules.*

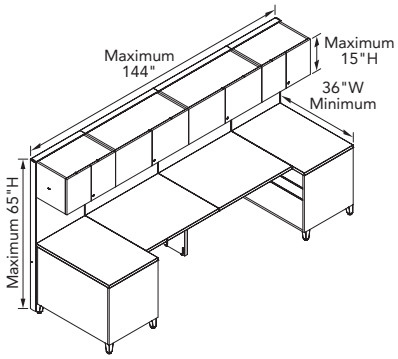
Approach and Involve Laminate Wood Storage Storage with Panel Frames

Reference Page

Leg or Plinth Base models available. Leg base units are shown below.

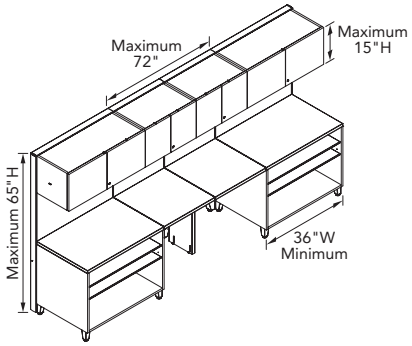
Side-mounted Credenzas — Modular for Overheads and Worksurfaces

Use 2 storage-to-panel brackets per credenza — 1 LH and 1 RH.
The minimum credenza size is 28"H x 36"W x 24"D.
28"H side mounted credenzas must be mounted modular when using overheads and worksurfaces on panels.
With a mid-run floor support, the maximum panel run is 144".
Without a mid-run floor support, the maximum panel run is 96".
Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas.
Maximum overhead height is 15".
Panel frame maximum height is 65".



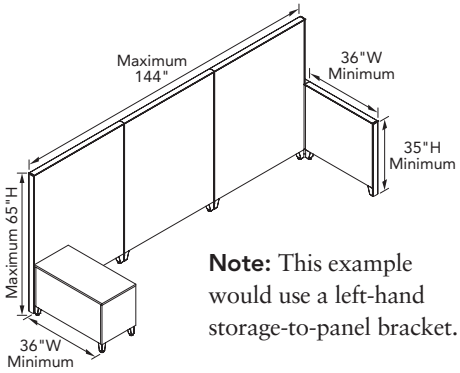
Back-mounted Credenzas — Modular for Overheads and Worksurfaces

Use 2 storage-to-panel brackets per credenza — 1 LH and 1 RH.
The minimum credenza size is 28"H x 36"W x 24"D.
Full back units without trough due to stability, only troughless Approach or Involve allowed.
With a mid-run floor support, the maximum panel run is 144".
Without a mid-run floor support, the maximum panel run is 96".
The maximum panel run between back-mounted credenzas is 72".
Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas.
Maximum overhead height is 15".
Panel frame maximum height is 65".



Side-mounted Credenzas — with Return Panel

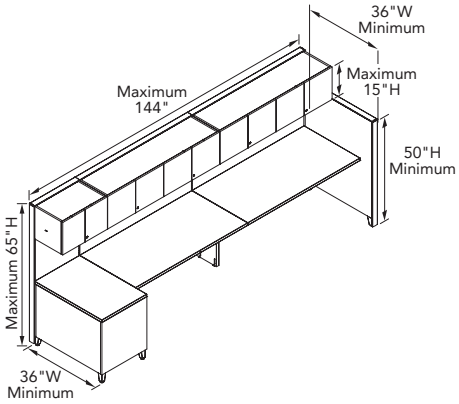
Use 1 storage-to-panel bracket on credenza.
The minimum credenza size is 24"H x 36"W x 18"D.
The minimum size for panel return is 35"H x 36"W.
With a mid-run floor support, the maximum panel run is 144"
Without a mid-run floor support, the maximum panel run is 96".
Overheads and shelves cannot be used with 24"H side mounted credenzas.
Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.
Panel frame maximum height is 65".



Note: This example would use a left-hand storage-to-panel bracket.

Side-mounted Credenzas — Modular for Overheads and Worksurfaces

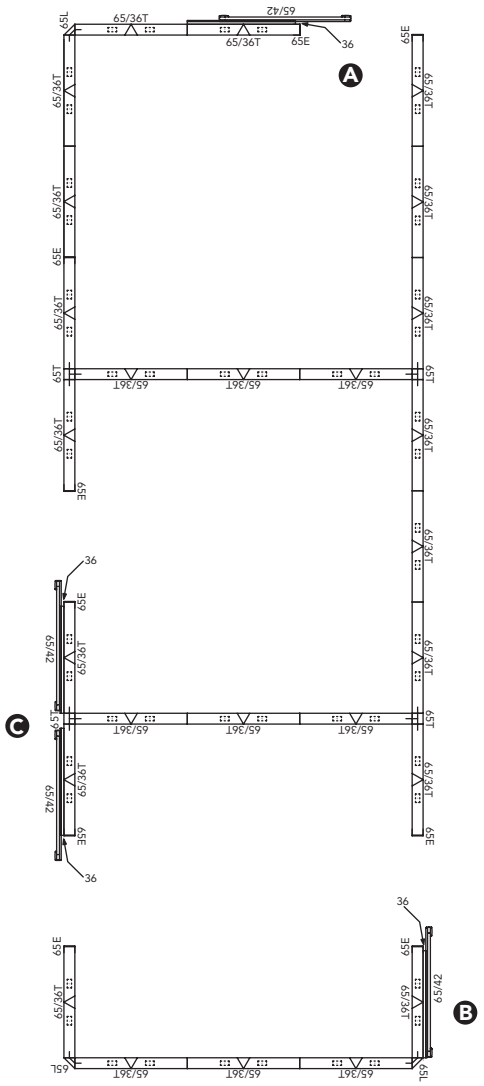
Use 2 storage-to-panel brackets per credenza — 1 LH and 1 RH.
The minimum credenza size is 28"H x 36"W x 24"D.
The minimum size for panel return is 50"H x 36"W.
28"H side mounted credenzas must be mounted modular when using overheads and worksurfaces on panels.
With a mid-run floor support, the maximum panel run is 144"
Without a mid-run floor support, the maximum panel run is 72".
Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas.
Maximum overhead height is 15".
Panel frame maximum height is 65".



Reference Page

Sliding doors for Terrace *are a great addition to any new or existing installations. The sliding door can be specified with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of P1 or P2 paint, the sliding door will create a unique look for any office environment.*

The **sliding doors** *are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. They accommodate a 36"W opening and are 42"W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are non-locking and are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.*



General Guidelines for Use of Sliding Door

- The system requires the ordering of both a door and a mounting bracket kit.
- All doors are 42" wide to accommodate a 36"W opening and are non-handed . Door leveling is dependent on floor being level.
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48"W).
- Mounting bracket kits are system specific and for Terrace.

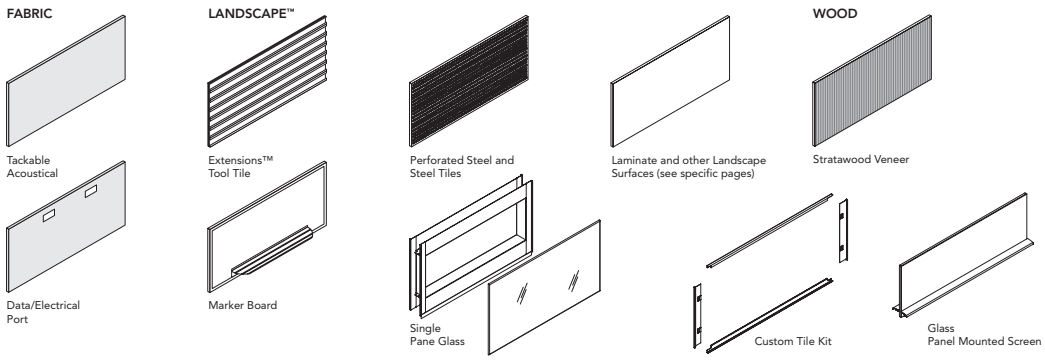
General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 25). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening **(A)** where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42"W. If the panel is at a corner **(B)**, the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels **(C)** that are less than 42"W they will interfere with each if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear **(D)** and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run that is positioned adjacent to a wall **(E)** or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.

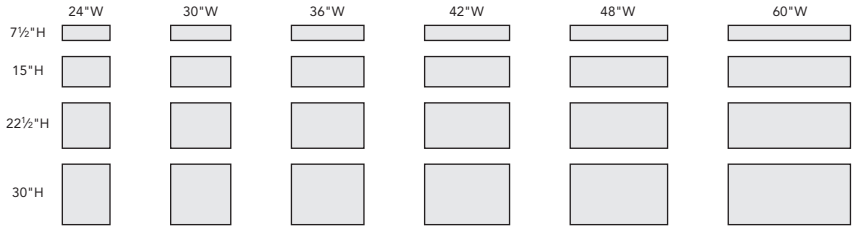
Tiles

Terrace® — Overview of Tiles

Reference Page

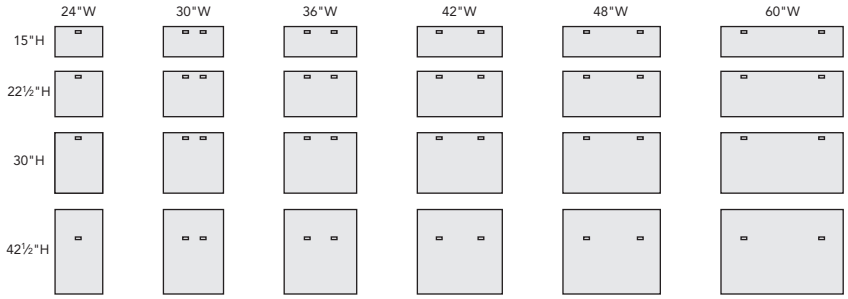


Tiles — *Tackable Acoustical, Steel, Perforated Steel, Markerboard*, Foundation™, Laminate*, and Veneer Tiles.*

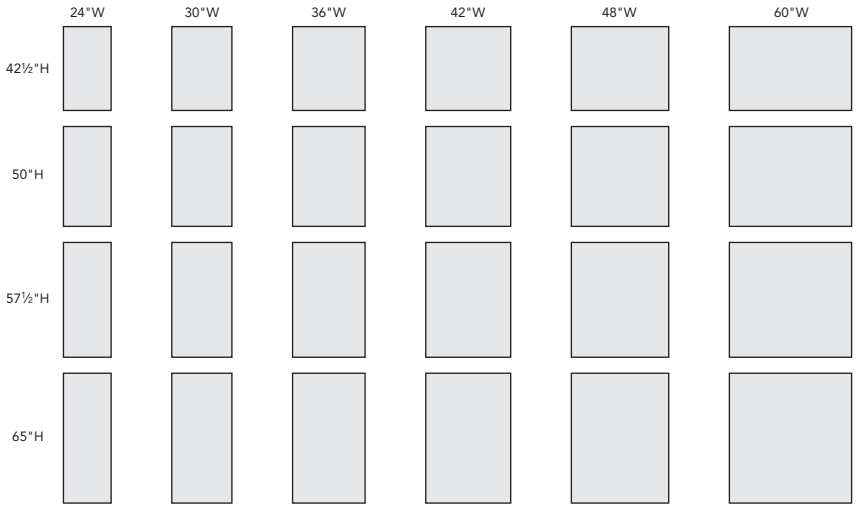


*Not available in 7½"H

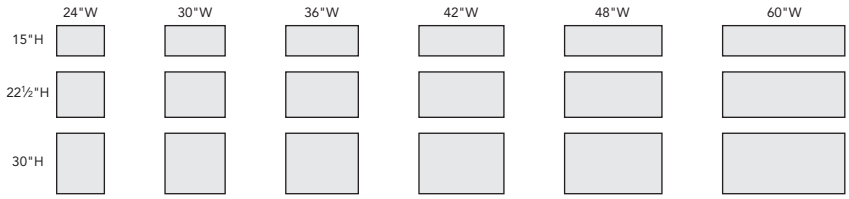
Data/Electrical Port *(port tiles available as acoustical only)*



Monolithic Tiles — *Tackable Acoustical and Port (veneer 42½"H non-ported only).*

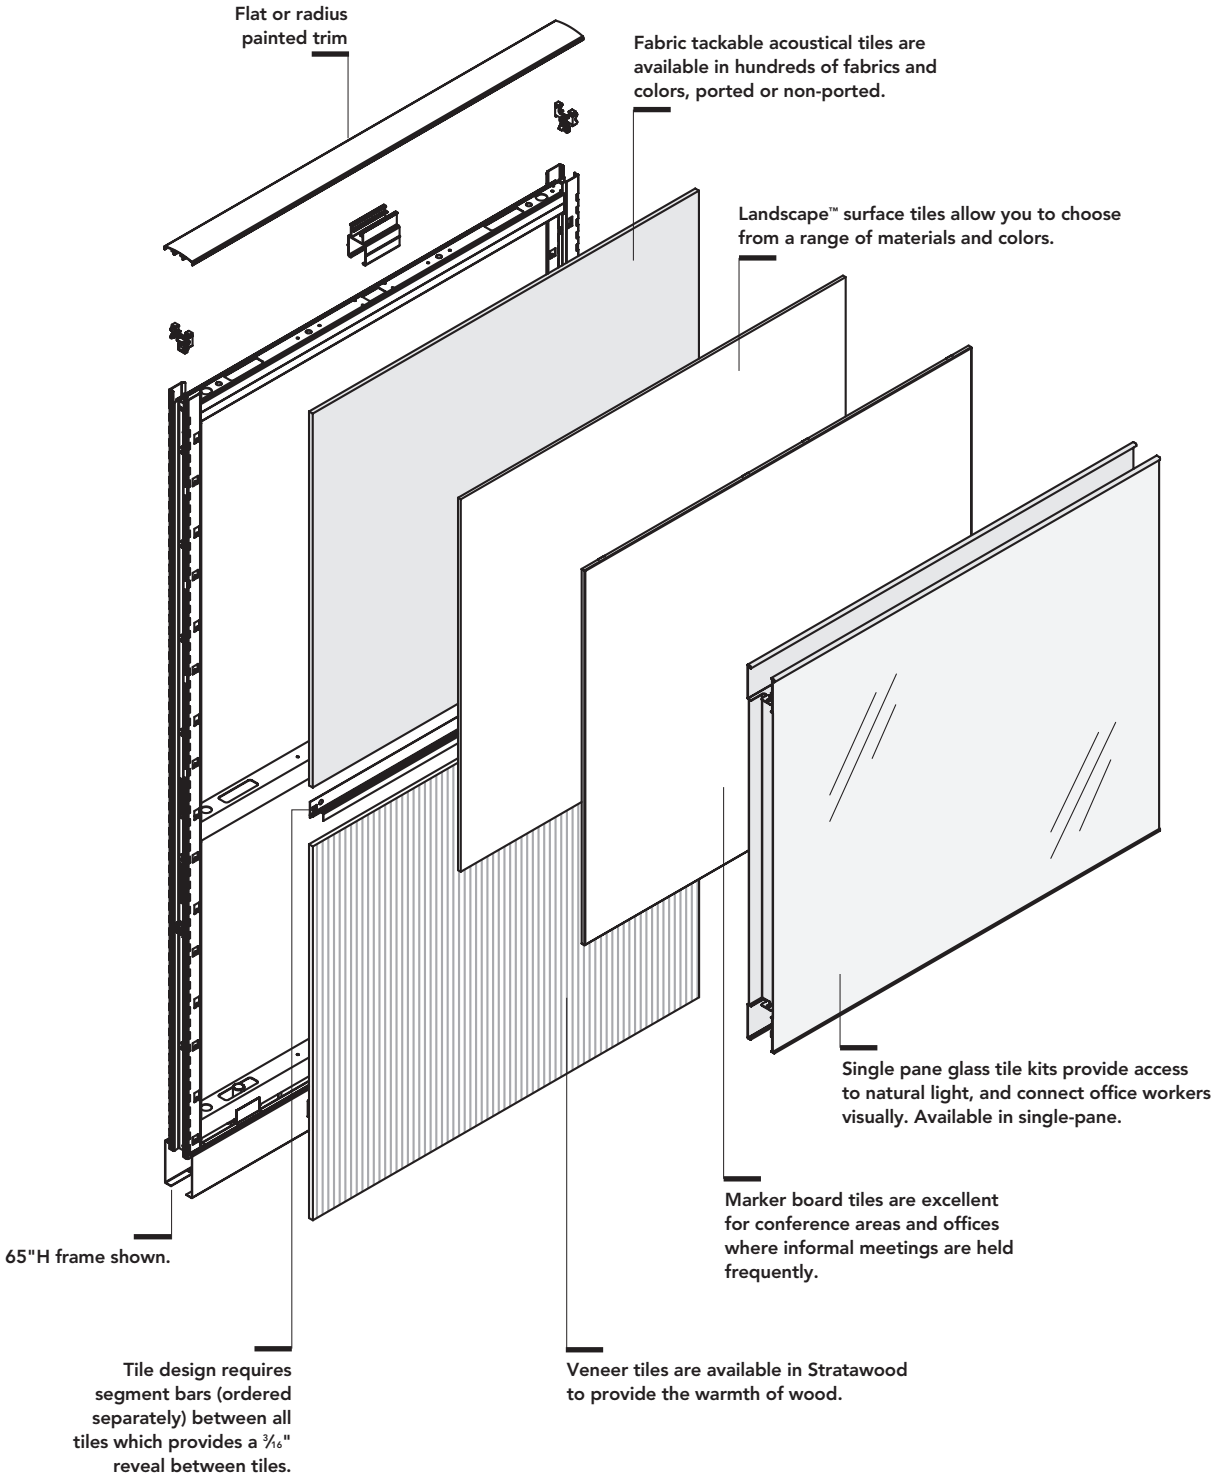


Glass Tile Kits



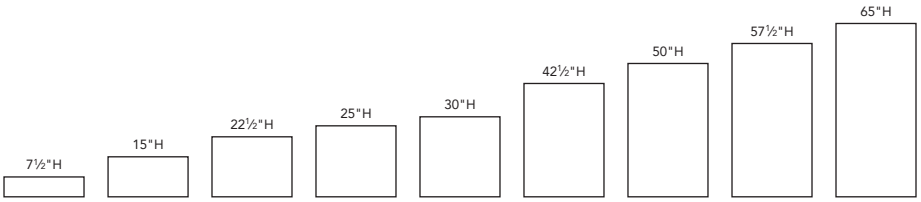
TERRACE

Terrace tiles come in a variety of styles. Select the aesthetic* and functional combination that meets your specific requirements. Additional tiles not shown below include Monolithic, Monolithic Port, and Custom.



*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting perforated or light colored sheer materials.

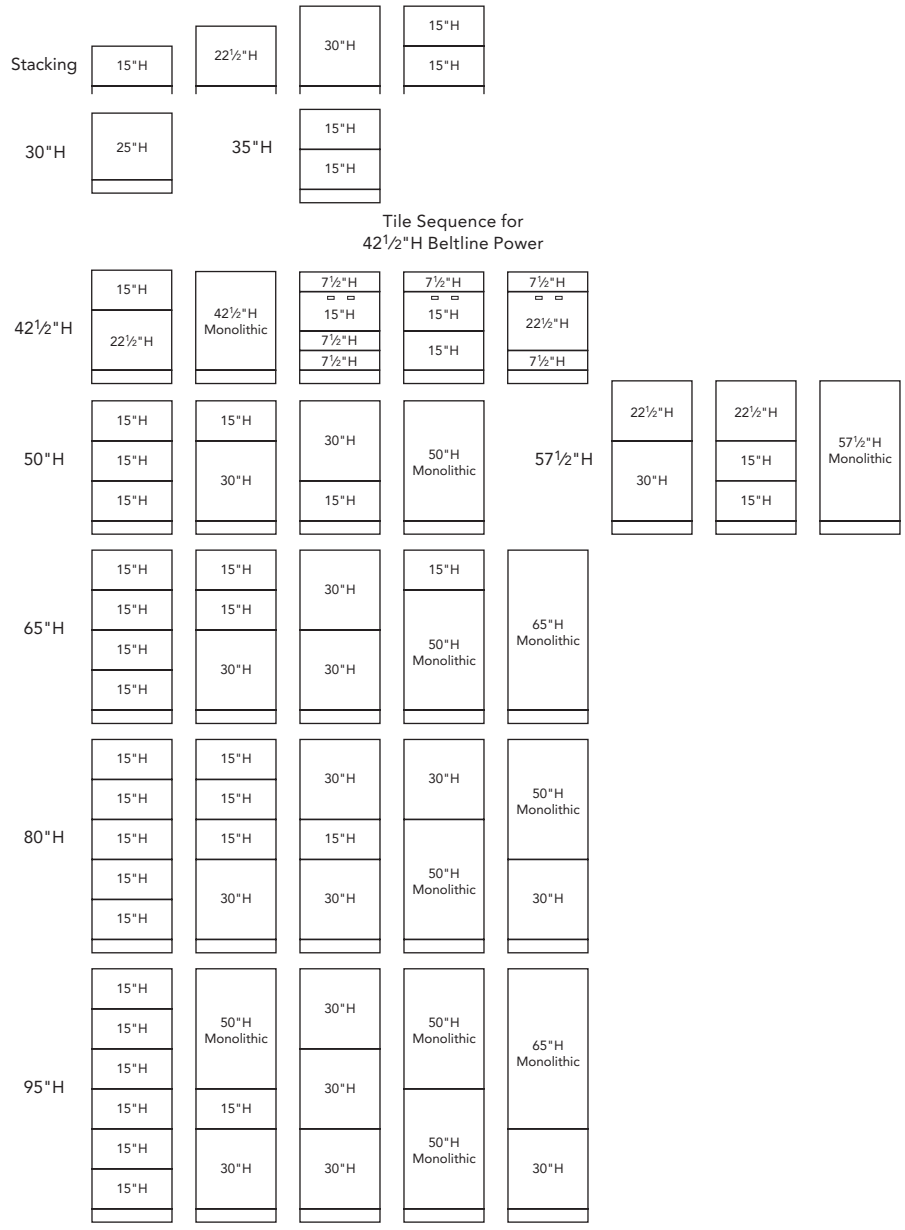
Tile Heights



Monolithic tiles are actually 5" shorter to account for base raceway and top trim.

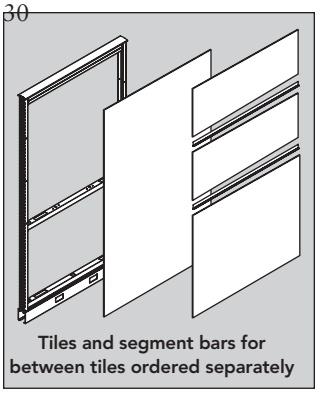
Typical Tile Height Configurations

Middle segment bars are required between any two tiles — order separately based on tile configuration on each side of frame. **Note:** Most CAD specification programs have tools that will calculate quantity of segment bars required.



*Additional tile combinations to those shown above are possible; heights above 65" require stacking frames - maximum height is 110".

Reference Page To calculate the total height of tiles(s) required, deduct 5" (height of base/top trim) from the total nominal panel height. **Example:** 65"H Frame takes 2 30"H tiles. 65–5 = 2 x 30



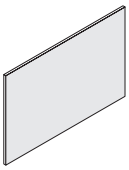
Tiles and segment bars for between tiles ordered separately

Tiles can be ordered in the size that matches the frame height plus the stacker height. **Example:** Order a 65"H monolithic tile if you are using a 35"H frame plus a 30"H stacker.

Terrace tiles are universal (except glass) and can be placed at any 7½" increment on the frame.

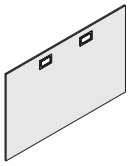
Reference Page

Tiles



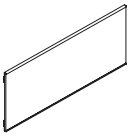
Tackable Acoustical Tiles (pages 48-49)

- Tiles do not include segment bars — order separately.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated. They can be used in any combination and in combination with other tile sizes.
- 25"H tiles can be used as monolithic tiles on 30"H frames.
- 30"H tiles can be used as monolithic tiles on 35"H frames.
- 42½"H, 50"H, 57½"H, and 65"H monolithic tiles are non-dedicated.
- 42½"H tiles can be used as monolithic on a 42½"H frame.
- 50"H monolithic tiles are actually 45"H and can be used in any combination with other tiles on a taller frame.
- 50"H tiles can be used as monolithic tiles on a 50"H frame.
- 57½"H tiles can be used as monolithic on a 57½"H frame.
- 65"H monolithic tiles are actually 60"H and can be used in combination with segmented tiles on a frame that is stacked above 65"H.
- 65"H tiles can be used as monolithic on a 65"H frame.



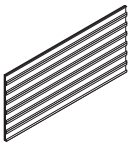
Port Tiles (pages 50-51)

- Receptacle openings with blank covers (1 in 24"W tiles; 2 in wider tiles). Located 29⅜" above bottom of base raceway.
- Tiles do not include segment bars — order separately.
- 15"H and 22½"H port tiles can be used on 42½"H or higher frame for data/power access above beltline. See tile sequence on page 33.
- 25"H tiles for use on 30"H frames.
- 35"H frames do not have beltline data/power capability.
- 30"H port tiles can be used in the base position on 42½"H or higher frames for data/power access above beltline.
- Specify the size that matches the frame size. One tile per frame side on 42½"H, 50"H, 57½"H, and 65"H.



Steel Tiles (page 52)

- Tiles do not include segment bars — order separately.
- Painted steel construction.
- 25"H tiles for use on 30"H frames.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.



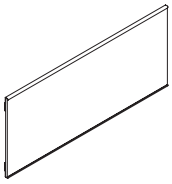
Tool Tiles (page 52)

- Tiles do not include segment bars — order separately.
- Sturdy aluminum extrusion with steel support construction.
- Powder-coated for durable finish.
- Work tools to be hung from this tile available in Extensions™ section.
- Use in place of standard 7½"H or 15"H tiles.
- Cannot be used in the bottom location of a panel frame or on wall track.
- Each tool tile has a suggested weight capacity of 80 lbs. of paper management accessories.

Perforated Steel Tiles (page 53)

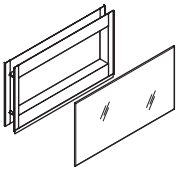
- Tiles do not include segment bars — order separately.
- Allows air flow when placed on each side of panel.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.
- Aesthetics of opposing tile surface and/or frame interior should be considered when using perforated or light colored sheer materials.

Reference Page



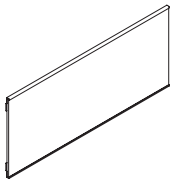
Laminate Tiles (page 54)

- Available in standard laminate colors. See page 20.
- Tiles do not ship with segment bars — order separately.
- Tiles come completely assembled and attach with custom tile bracket kit. Specify paint color.
- It is not recommended to use this tile with wall track.
- 15"H and 30"H tiles are non-dedicated and can be used in any tile position.
- Grain direction runs vertical on all sizes.



Glass Tiles (page 55)

- Tempered safety glass encased within a frame with built-in shrouds.
- Single-pane construction, glass is flush on one side.
- For use in stacking frames also.
- Glass opening is 4" less than nominal heights and widths.
- Cannot be used in top tile position of a 42½"H panel frame or any frame with integrated power pole.
- Cannot be used at the bottom or beltline location of panel frame.
- 30"H tiles will work in top position of 65"H frames and in 30"H stacking frame. Segment bar needs to be ordered
- Tiles do not ship with segment bars — order separately.



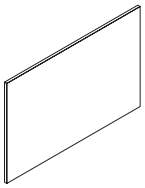
Marker Board Tiles (page 56)

- White marker board tile; painted steel surface.
- Accepts magnetic accessories.
- 15" magnetically attachable tray is natural aluminum color — order separately.
- 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.
- For everyday cleaning of dry-erase marker ink, use Clorox wipes. Should a permanent marker be used, a citrus cleaner such as Quartet will remove the ink. Note that a citrus cleaner is not recommended for everyday cleaning as it leaves a residue on the marker board.
- Tiles do not ship with segment bars — order separately.

Handling and care for marker boards:

1. Leaving ink on the board for an extended period of time may lead to images remaining on the board, commonly known as “ghosting,” after erasing.
2. To avoid ghosting, thoroughly erase your marker board after every use and clean your board weekly with marker board cleaner.
3. Expo® brand dry-erase markers are recommended for best erasing results.
4. Avoid using red and orange markers for easier cleaning and to reduce the likelihood of ghosting.
5. Do not use permanent or non-dry erase markers.
6. To maintain eraser performance, follow manufacturer’s instructions.

Reference Page



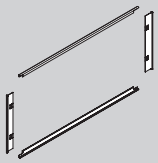
Landscape™ Tiles (page 57)
- ¼" material encased within a painted steel frame.
- Paint color for frame must be specified.
- Tiles do not ship with segment bars — order separately.
- 7½"H, 15"H, 22½"H, and 30"H tiles are non-dedicated and can be used in any tile position.
- Aesthetics of opposing tile surface and/or frame interior should be considered when using perforated or light colored sheer materials.

Foundation™ Tiles (page 57)
- Fabric laminated between recyclable PETG resin sheets.

Custom Tile Bracket Kits (page 58)
- Tile attachment kit allows for any approved ¼" thick "rigid" material to be used as a used as a Terrace tile.
- Use supplied dimensions below for tile size.

Custom Tile Bracket Kits

Custom material used in the custom tile brackets should be sized according to these dimensions:



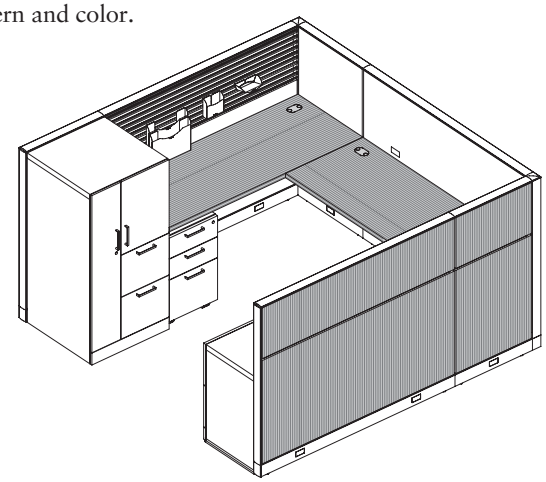
Standard Tile Height	Actual Height Dimensions
7½"H	7.198"H
15"H	14.698"H
22½"H	22.198"H
30"H	29.698"H

Thickness of custom material must be ¼" thick ±.030".

Standard Tile Width	Actual Width Dimensions
20"W	19.481"W
24"W	23.481"W
30"W	29.481"W
36"W	35.481"W
42"W	41.481"W
48"W	47.481"W
60"W	59.481"W

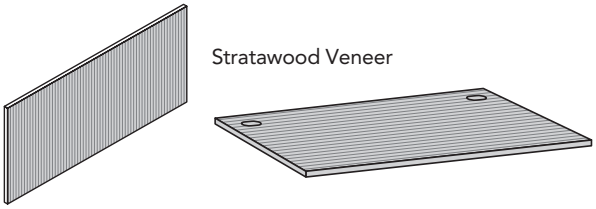
Terrace Stratawood Veneer

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next, even though they are finished at the same time. Exposure to light and the aging process will cause darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Therefore, Allsteel does not guarantee the exact matching grain, pattern and color.



Terrace veneer tiles and worksurfaces are offered in Stratawood (composite). (See page 20 for finishes.) These products offer excellent scratch, stain, and abrasions resistance, plus a high level of clarity.

Terrace Stratawood veneer worksurfaces are protected by one of the world's most advanced wood finishing process. It provides the ultimate in scratch, stain, chemical, and heat resistance for these high-wear surfaces. The jewel-like clarity and depth allow the natural beauty of the wood to glow through.

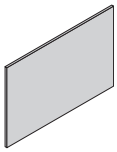


Stratawood Veneer

Stratawood veneer features a repeatable straight-grain pattern, absent of the cathedrals seen in Natural veneer. Although slight differences in tone should be expected, the Stratawood pattern will maintain a consistent appearance across all products.

Stratawood veneer is an engineered wood veneer enhanced by technology for consistency in both color and grain pattern resulting in very few defects.

Although exposure to light will cause Stratawood veneer to darken slightly, additional orders at later dates will match existing product pattern and will match the color when matured. This creates a smooth process for adding on to existing installations.



Veneer Tiles (page 59)

- Veneer tiles produced by Gunlocke® available in Stratawood veneer. See page 7 for additional veneer information.
- Stratawood veneer has a consistent straight-grain pattern.
- Veneer tiles ship with factory-installed attachment clips.
- Tiles do not include segment kits — order separately.
- Grain direction runs vertical on all sizes.

Caring for your veneer worksurface finish:

- General maintenance procedures entail wiping clean the entire surface with a clean water dampened soft cloth once per week. (Be sure to wipe with the grain.)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately.

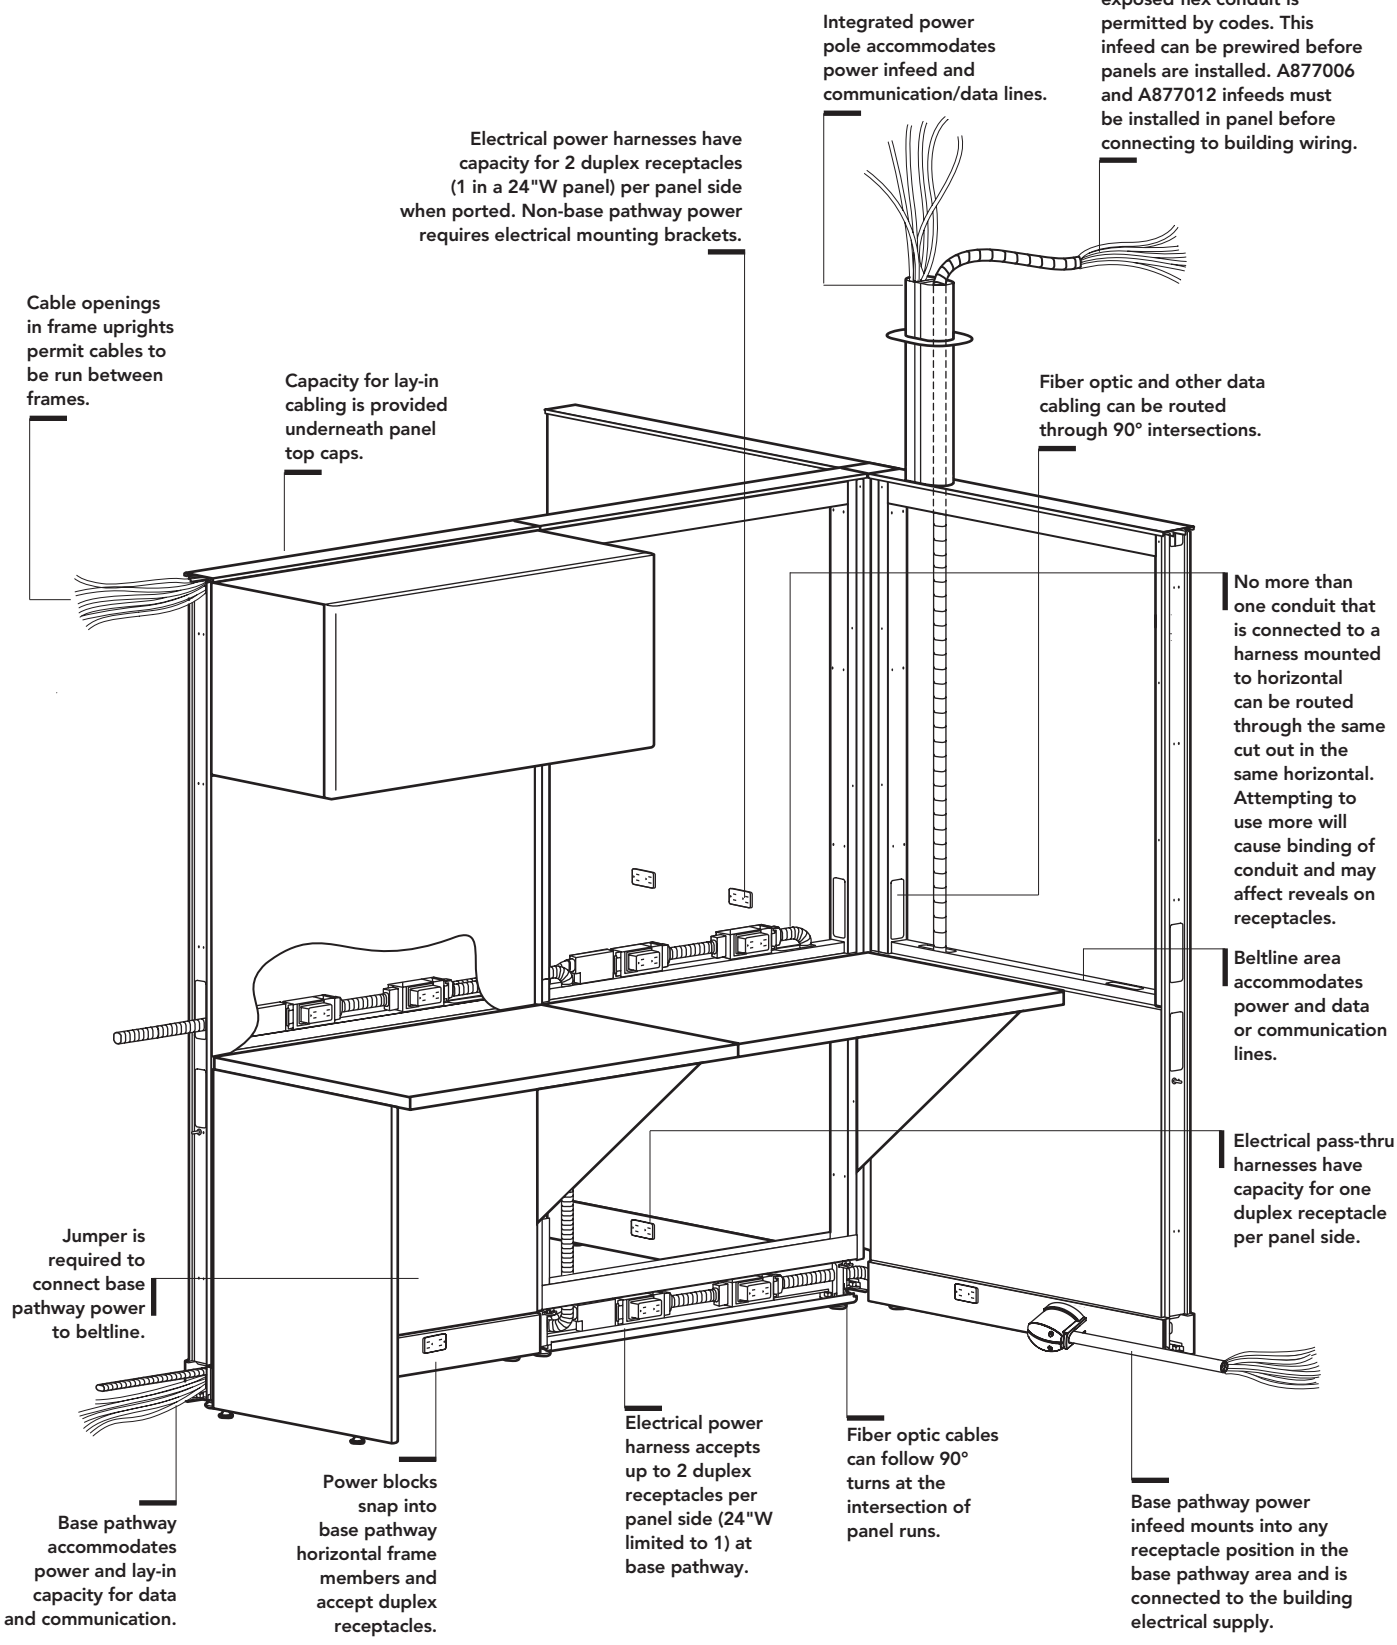
Example: **TK43036V.SC777**

S ***Shippable by small-package carrier.***

Terrace features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.



Electrical Systems

Terrace offers a choice of four electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- Eight circuits; two four-circuit systems provided back-to-back.

- See pages 62-63 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian) - 16 amps plannable in U.S.
- Terrace panels and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.
- Use of a 35"H frame in a panel run will block beltline and above power distribution.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

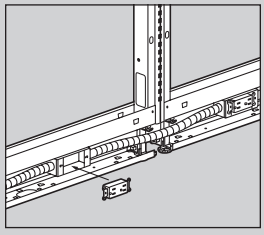
Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal at beltline. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Hardwire New York Code (page 72)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 30"W to 60"W.
- When used in 30"W and 36"W panels, power can be routed only in one direction.
- When used in 42"W, 48"W, and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction.
- Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.

Hardwire Chicago Code (page 73)

- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- The base pathway, junction box (model 873600) clips directly into receptacle locations and can be used both single- and double-sided.
- In the beltline location, junction box (model 873550) can only be used single-sided.
- Base pathway model has a larger volume capacity for wiring to allow for dual-sided applications.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.

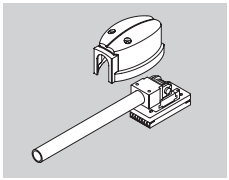


- Tiles at the beltline must be field ported.
- Power entry can be routed from the ceiling, via a Terrace power pole, or from the floor into a junction box (beltline model 873550; or base pathway model 873600).

Electrical Infeeds

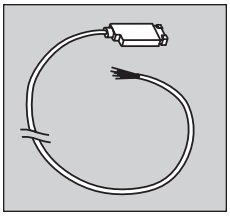
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

Base Infeed (page 72)



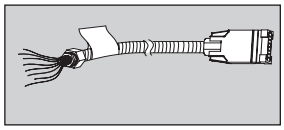
- Sealttight base pathway power infeed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.
- A jumper is required to connect base pathway power to beltline.

Sealtight Electrical Infeed (page 72)



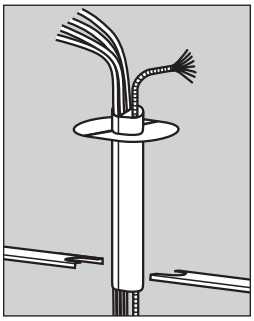
- Sealtight electrical infeed cable is used with footed panels.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that infeed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

Ceiling Power Infeed (page 72)



- Ceiling power infeed connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole.
- Use models A870535 or A870565 with integrated power pole.
- Can also be used as infeed for footed panels.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

Integrated Power Pole (page 72)



- Integrated power and communications poles provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap.
- Avoid glass or translucent tiles in upper position of frames with integrated power poles.
- Power pole has a cavity on each side of a center septum.
- When using a ceiling power infeed, consider that the infeed must connect into an electrical harness located in an adjacent panel. (See pages 68-69 for cable capacity.)

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power infeed needed.

Reference Page

* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

Flexconnect™ Electrical System Options

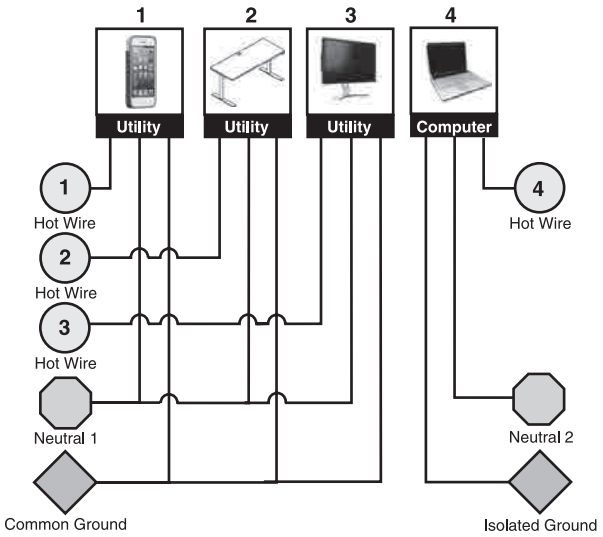
The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an “A” suffix and appear in a gray box in this pricer.

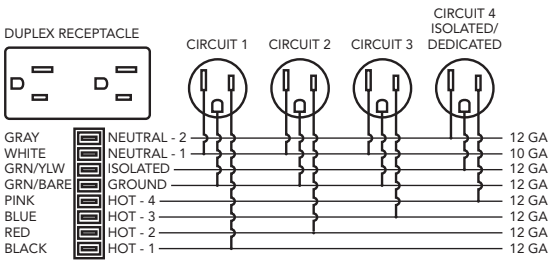
All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 70.

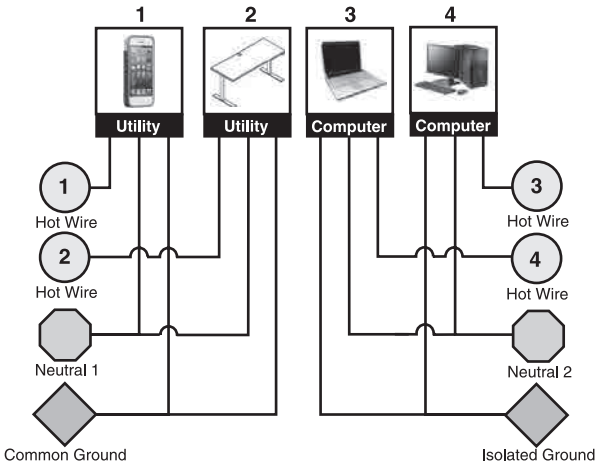
Four-circuit, 3 + 1 Receptacle Option



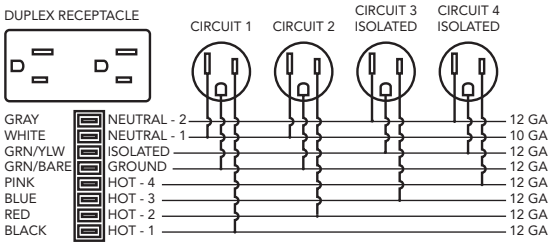
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



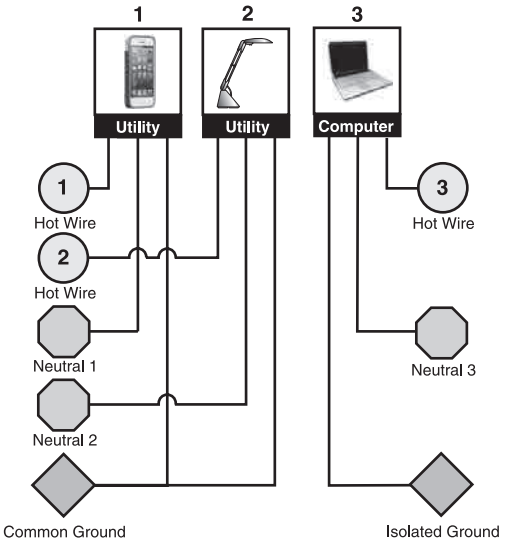
Four-circuit, 2 + 2 Receptacle Option



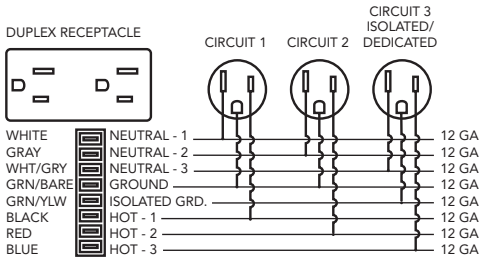
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Terrace System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered

Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A873501**	Common Circuit-2 (1) **A873502**	Common C ircuit-3 **A873503**	Iso/Dedicated Circuit-4 **A873504**
	2 + 2	Common Circuit-1 **A873501**	Common Cir- cuit-2 **A873502**	Isolated Circuit-3 **A873506**	Isolated Circuit-4 **A873504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

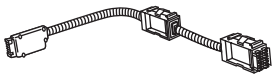
- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust-colored.

Duplex Receptacle

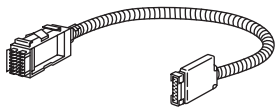
15 amp receptacle

Power Harnesses, Pass-Thru Cables, and Jumpers

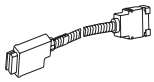
Electrical power harnesses are used to distribute power in Terrace panels. Harnesses can be mounted at base pathway or beltline. **Power blocks** on electrical power harness and pass-thru harness accept duplex receptacles.



Electrical Power Harness

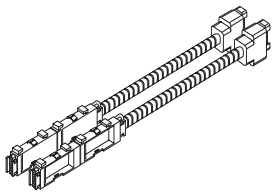


Electrical Pass-Thru Harness With Power Block



Electrical Pass-Thru Harness Without Power Block

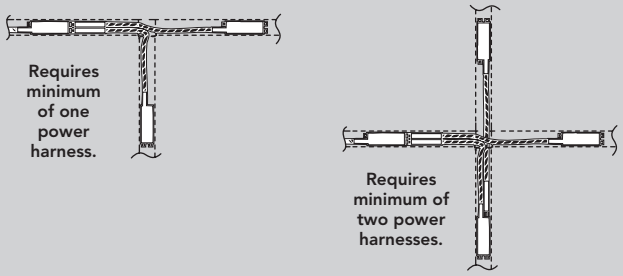
Electrical Jumper Cables



Dual Electrical Eight-circuit Power Harness Kit

All electrical power harnesses and pass-thru harnesses (except 20"W) will stretch 3½", allowing them to span "T", "X", and 120° intersections and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.



Electrical Power Harnesses (page 71)
- Specify harness length to match panel width. 24" power harness accepts one receptacle on each side of the harness, all other length power harnesses have power blocks to accept four duplex receptacles (two on each side of panel).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in base pathway; harnesses require optional mounting brackets at beltline or other vertical locations
- Use of a ceiling infeed or jumper requires one additional harness.

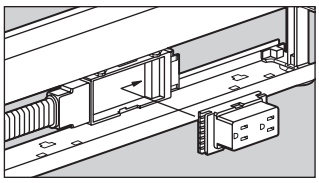
Electrical Pass-thru Harnesses With Power Block (page 71)
- Specify harness length to match panel width.
- Electrical pass-thru harnesses have capacity to handle one duplex receptacle on each side of the panel.
- A 60" pass-thru harness can be used to jump up to a single duplex receptacle per side at beltine and connecting to a power harness at base pathway.
- Electrical power harnesses and pass-thru cables cannot be routed at 90° at beltline once frames are connected to connector blocks.
- Specify harness length to match panel width.

Electrical Pass-thru Harnesses Without Power Block (page 71)
- Specify harness length to match panel width.
- Electrical pass-thru cables distribute power through any panel where receptacles are not required. Cable length cannot be stretched.

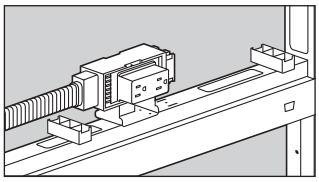
Electrical Jumper Cables (page 71)
- Electrical jumper cables connect power from base pathway or beltline to a harness located on any horizontal member as needed.
- Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.
- Model A871366 is 66" to jumper up to 30 inches vertically – base pathway to beltline, beltline to base pathway, or up to 30" above or below beltline when connected to beltline electrical.
- Model A8713108 is 108" to jumper up to 65" vertically – from baserail up to the highest 15" opening on an 80"H frame.
- Jumper can also be used from beltline to adjacent beltline at 90° juncture via baseline.

Dual Electrical Eight-circuit Power Harness Kits (page 71)
- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables. Cannot be used at beltline with Terrace. Restricted to base pathway only.
- Requires two four-circuit infeeds. Uses four-circuit receptacles.
- Models must be positioned "back-to-back" in the panel — single-side use is not permitted.
- Components can only be routed in a single run — a single run cannot branch to multiple panel runs at "T" and "X" junctions.
- Four-circuit jumper cables (A8713xx) can only be connected to a power block at one end of a run — power cannot be routed between a run in the base pathway and beltline area, except at one end of the run.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity.
- Two power infeeds are required to connect the back-to-back runs. Power A8719xx must be connector to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed.
- Power infeeds A8719xx must be routed from a panel wherein no power harness is positioned, into an adjacent panel where a power harness is positioned and connected to the end of a power block.

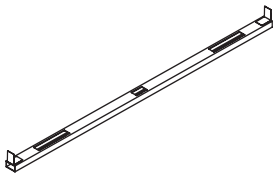
Power Blocks



Power Block Base Pathway Mounting



Power Block at Beltline



Horizontal Electrical Mount Support

Terrace offers multiple options for mounting electrical:

Base Pathway Mounting

- Power blocks snap directly onto brackets in base pathway area and accept receptacles (sold separately) on each side of harness.

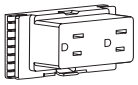
Electrical Mounting Brackets (page 73)

- Package of 12. One bracket required at beltline for each pass-thru harness and 24"W power harness. Two brackets required at beltline for 30"-60"W power harnesses.
- For ported receptacles at beltline or below worksurface, mount power blocks onto electrical mounting brackets which screw into Terrace panel frame.
- Model 8989EB for use with data/electrical port tiles at beltline or directly below standard worksurface height on 42½"H-65"H panels.
- Model 8989BW for use with data/electrical port tiles directly below standard worksurface height on 35"H panels only.
- Data/electrical port tiles must be used where exposed receptacles will be located. No standard port tiles are currently available for below worksurface, either field port using kit model UTP or contact tailored products.
- To connect power between the base pathway and the beltline area, four-circuit jumper cables (A8713xx) must be connected to a power block at one end of a run, routed into an adjacent panel that contains no power harness, then routed back into the panel that contains a power harness (or pass-thru cable), and connected to a power harness in the other pathway.

Horizontal Electrical Mount Support (page 74)

- Use horizontal electrical mount support bar and electrical mounting brackets (sold separately) when mounting power blocks at a location other than beltline or base pathway.
- Specify support bar width to match panel width.
- Tiles must be field ported when electrical is mounted in a location other than just above the worksurface at beltline.
- 22½"H ported tiles can be used to mount power below the worksurface with the electrical mount support bar being field located in the panel to align with the tile's ports.
- Can be used with acoustical tiles on one or both sides of the panel frame.
- One electrical mounting bracket required for each pass-thru harness and 24"W power harness. Two electrical mounting brackets required for 30"– 60"W power harnesses.
- Gray only. Includes attaching hardware.

Receptacles



Duplex Receptacle

Receptacle Color Recommended to Coordinate with Paint Color

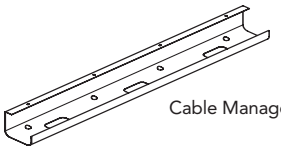
Paint Color	Receptacle Color
Designer White PJW	use Designer White DW
Bungalow	use Muslin EU
Carob *(De-emphasized)* D	use Black E4
Champagne Metallic	use Muslin EU
Cinder	use Brownstone EY
Fossil	use Flint E9
Gunmetal Metallic	use Brownstone EY
Parchment	use Muslin EU
Pebble	use Loft EV
Pewter	use Flint E9
Platinum Metallic	use Silver ES
Salt	use Silver ES
Titanium	use Silver ES

Duplex Receptacles (page 72)

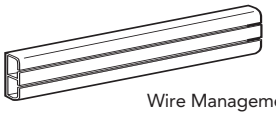
- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses.
- Duplexes are available in multiple colors. See page 20 for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical infeed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical infeed.

D *Discontinued 12/31/2020*

Cable and Wire Management

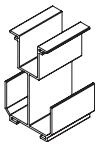


Cable Management Tray

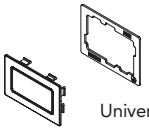


Wire Management Channel

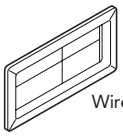
Cord Retainer Clip



Data Management Organizer



Universal Tile Port Kit



Wireway Grommet

Cable Management Tray (page 73)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 73)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

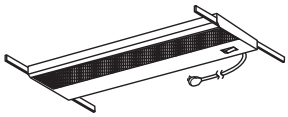
Cord Retainer Clip (page 73)
- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each task light cord.
- Package of 50. Available in Black only.

Data Management Organizers (page 73)
- Cable organizers are made of rigid polymer, and hang from the horizontal cross members or in the base raceway. Can be stacked infinitely.
- Cables can be placed into the extensions of the organizers to keep cables aligned as they pass through the panel frame.
- Commercially available tie-wraps can also be used to strap cables to the organizer extensions.
- Organizers are ordered separately in packs of 20.

Universal Tile Port Kit (page 73)
- Allows field installation of additional data accessories.
- Grommet opening dimension — 1.375"H x 2.700"W.

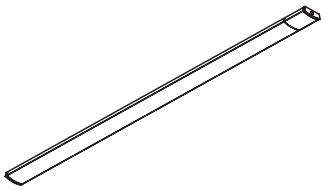
Wireway Grommet (page 73)
- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

Lighting



Task Lights

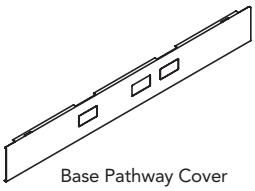
Task Lights (page 407)
- Task lights can be recessed under storage cabinets or storage shelves, panel-hung, or freestanding.
- Three styles of recessed task lights in four sizes are available to correspond to cabinet or shelf width.
- All styles have 9' power cords in black, connected in the right rear corner.
- All models feature electronic ballast for longer bulb life and cooler operating temperature.
- Task lights with a fused plug to meet Chicago electrical code are also available.
  Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.



Undercabinet LED Light

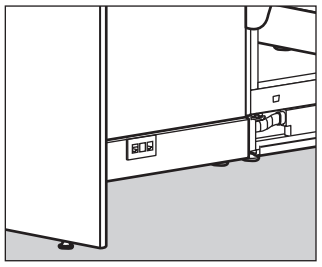
Undercabinet LED Light (page 407)
- Undercabinet LED light can be mounted beneath overhead cabinets with wood screws or magnets.

Data

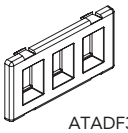


Base Pathway Cover

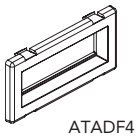
Terrace Base Pathway Covers (page 74)
- Features an additional knockout (offset) for improved utilization of power and data. Knockouts are 2.700"W x 1.377"H.
- Due to panel depth, back-to-back data modules should not be used at beltline or in the base on Terrace.



Voice/Data Receptacle



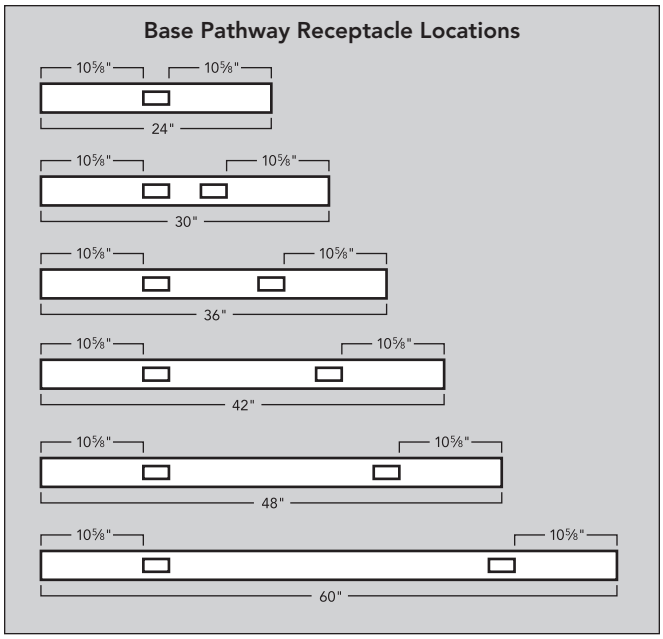
ATADF3

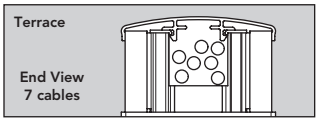


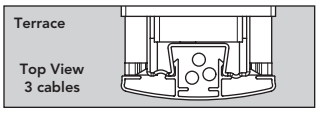
ATADF4

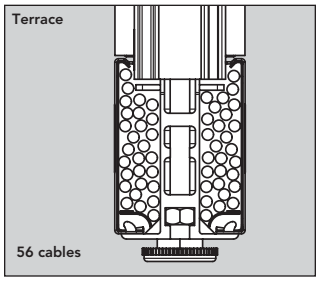
Data Faceplates (page 74)
- Fit into receptacle and data port openings in base raceway covers or into data port (UTP).
- Due to panel depth, data modules should not be used back-to-back at beltline or in the base on Terrace.

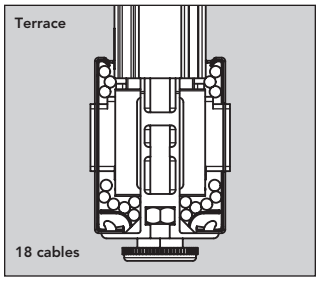
Cord Organizer (page 74)
- Attaches to bottom of worksurface.
- 4"W x ⅞"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

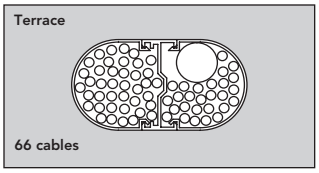












Circuit Usage

Strategy 1
Circuits to Equipment
Assign specific uses for each of the circuits:

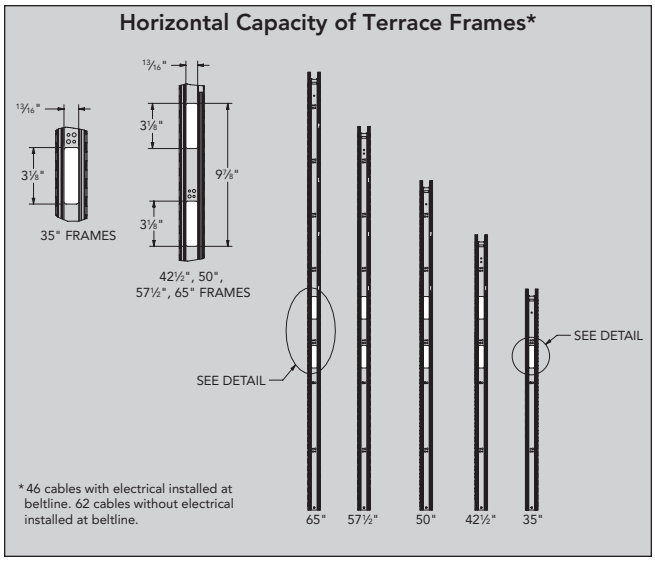
- For example, in a four-circuit system:
  Circuit 1 — Calculators, fans, etc.
  Circuit 2 — Task lights (could be wired to wall switch)
  Circuit 3 — CRT or flat screen monitors
  Circuit 4 — CPUs

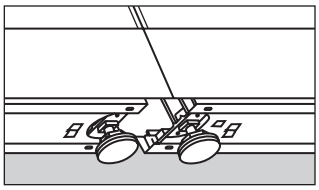
Strategy 2
Circuits to Workstations
Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

Lay-in Cable Capacity

- The top and base pathway allow continuous voice and data lines to run through and between panels without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Terrace top pathway accepts up to 7 voice/data cables (.25" dia).
- Terrace variable height junctions accept up to 3 voice/data cables (.25" dia.).
- Terrace base pathway accepts up to 56 voice/data cables (.25" dia.) (6.03 sq. in.) at 60% fill.
- When electrical system shares base pathway, the cable capacity in Terrace is reduced to 18 cables (2.25 sq. in.). Cable quantities listed are at 60% fill ratio.
- Cable capacity of the Terrace power pole, in addition to electrical infeed is 2.79 sq. in. on one side and 2.91 sq. in. on the other for a total capacity of 66 cables of .25" diameter.





Underside of Base Pathway Juncture Between Frames

Terrace String-in Capacity

- **Openings in frame sides** permit data and communication cables to be run between frames in Terrace.
- Using tackable acoustical tiles, the beltline pathway accommodates up to 62 cables (.25" dia) or 46 cables with electrical components installed.

DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

- **Cables can enter/exit panel** through underside of base pathway at juncture between frames.
- Openings are sized as follows (in sq. in.):

Terrace System	Sq. In.
Straight connection	6.0
"S" Extended Straight Connection	10.0
"L" 90° Connection	8.9
"T" Connection	15.9
"X" Connection	17.9
"A" Connection	—
"Y" Connection	—

- When leveling glides are fully retracted, panel-to-floor clearance is 7⁄16". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

Vertical Capacity

Vertical Capacity Through Panel Frames

	Panel Width	Qty. of .25" Cables at 45% Fill Ratio	Qty. of .25" Cables at 60% Fill Ratio	Total Space (sq. in.)
Terrace	24" – 60"W	45	60	5.26

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

Office Equipment Typical Load Values

Item	*Amps

Corner Countertop

Arrows indicate grain direction for woodgrain laminates.
Grain direction on symmetrical corner worksurfaces runs at a diagonal.

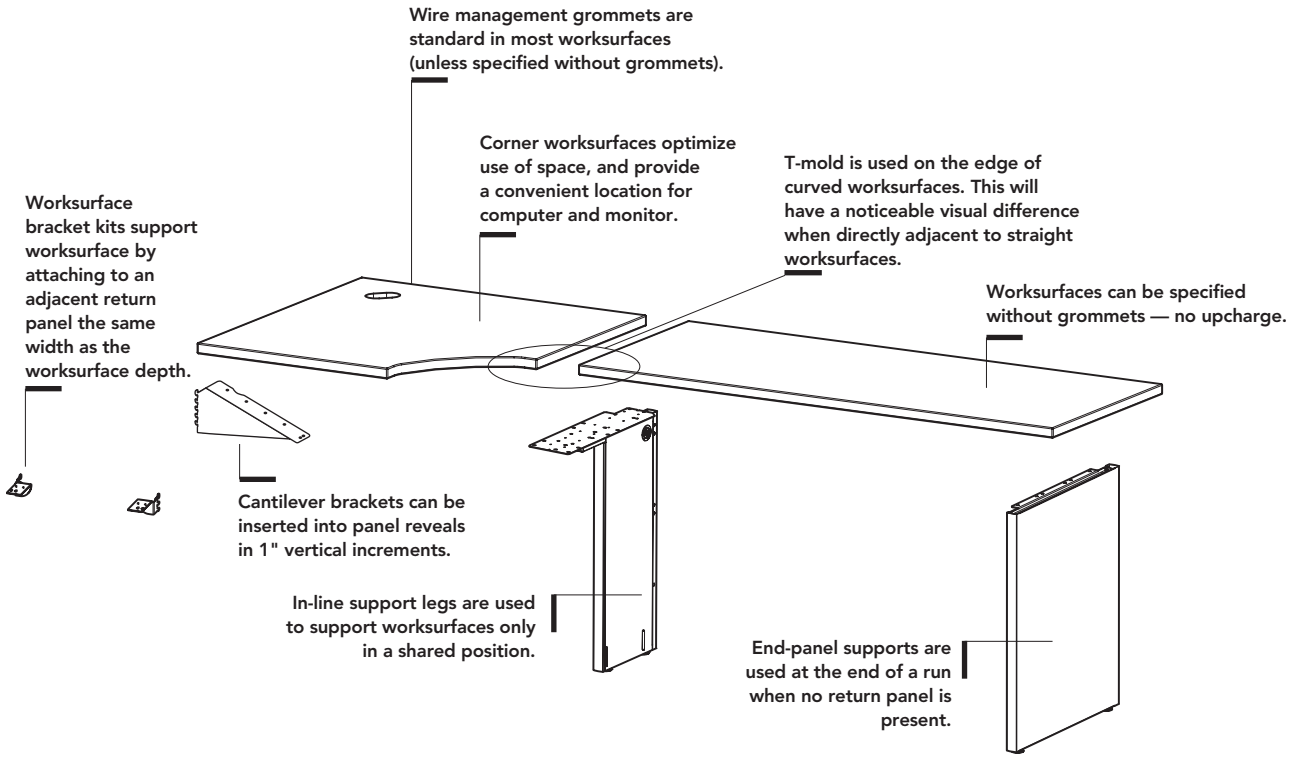
*Laminate only

Note: Add suffix "N" to model number for no grommets, no upcharge.

Worksurfaces

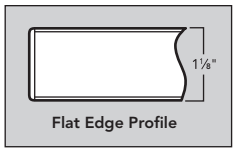
Reference Page

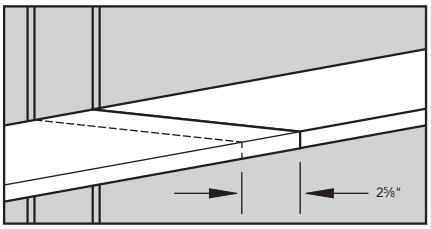
Worksurfaces are 1⅛" thick with particleboard core and with top surfaces finished in laminate. Bottom surfaces are covered with a backer sheet. Worksurfaces are available in laminate and Stratawood veneer. Veneer worksurfaces are by Gunlocke.



Worksurfaces

- Laminate worksurfaces are 1⅛" thick with particle board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.
- **Flat edge trim** is available on laminate tops in twenty standard colors (customer specified) to match solid or woodgrain laminates and to complement patterned laminates.
- Veneer worksurfaces have square veneer edge.

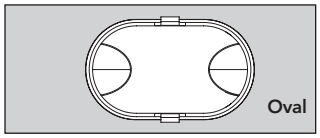


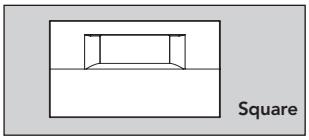


- **Optional wider width primary worksurfaces** are available for use with Terrace panel runs having a "T" or "S" connection — upcharge applies.

Wire management grommets are standard in most worksurfaces (unless specified with no grommets) and are specified in plastic or metal.

- **Metal grommets** are available in oval or square (shown below).





- Rectangular worksurfaces over 42"W have two grommets. Corner cove worksurfaces will have two grommets. Peninsula and corner worksurfaces have one. D-Shaped worksurfaces and countertops do not have grommets.
- Grommets on standard systems worksurfaces are located 6⅝" from side edges and 3⅝" from back edge.
- Add Suffix "N" to a model number for no grommets — no upcharge.

Supports

Worksurfaces can be configured at 29½"H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Support column*
- Flat brackets
- External support channel
- Worksurface bracket kits
- Height adjustable mechanisms
- Cantilever brackets
- In-line support legs*
- End-panel supports*
- Support storage units*
- Pedestal-to-panel attachment kit*
- Desk-to-panel attachment kit*
- Corner desk leg*
- Bridge and return kits
- Modesty panels
- Gussets

*Units provide floor support.

Support Guidelines — See Drawings on page 77

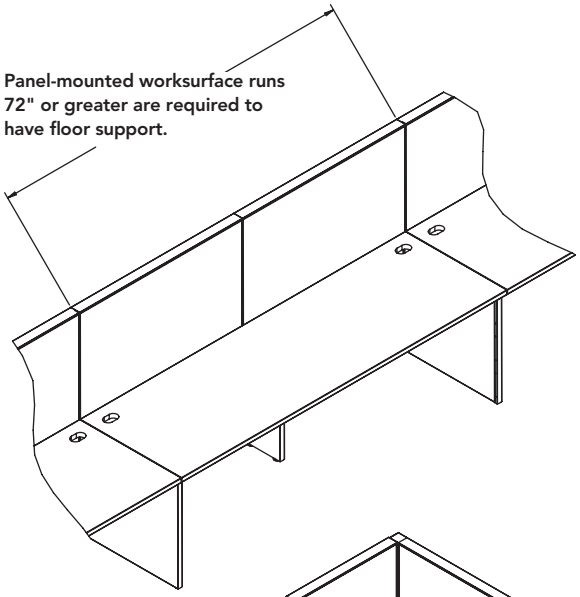
- Panel-mounted worksurface runs 72" or greater are required to have floor support.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.

continued on next page

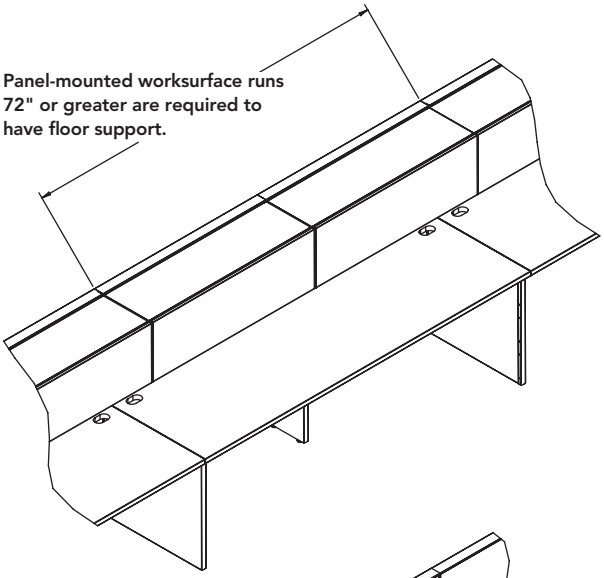
continued from previous page

- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Unsupported worksurfaces 60"W or greater require an external worksurface support channel. When a center support cantilever cannot be used, an external worksurface support channel is recommended for spans greater than 48"W. See pages 81 and 91.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72"W. See pages 82-90.

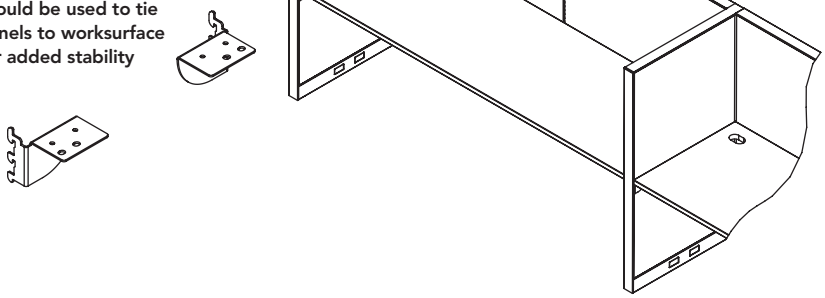
Panel-mounted worksurface runs 72" or greater are required to have floor support.

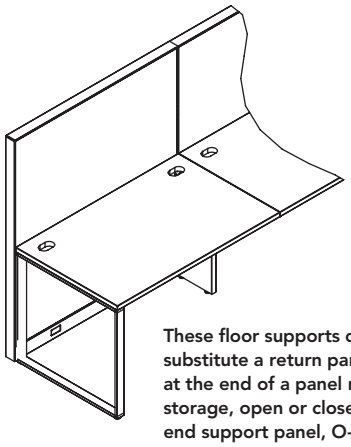


Panel-mounted worksurface runs 72" or greater are required to have floor support.

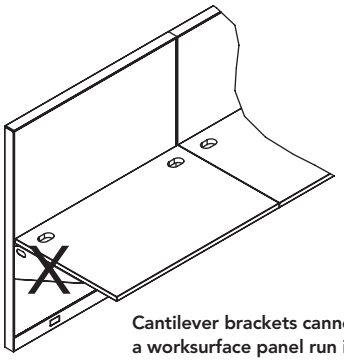


Worksurface bracket kit should be used to tie panels to worksurface for added stability



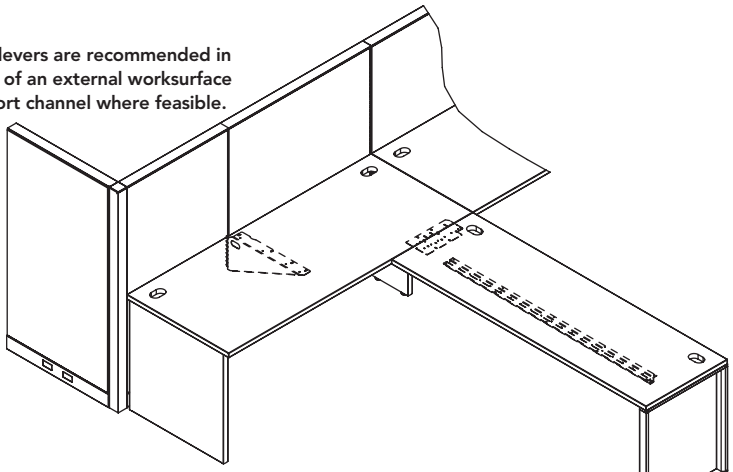


These floor supports can substitute a return panel at the end of a panel run: storage, open or closed end support panel, O-legs.



Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.

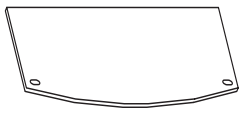
Cantilevers are recommended in place of an external worksurface support channel where feasible.



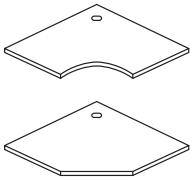
Unsupported worksurfaces 60"W or greater require an external worksurface support channel. When a center support cantilever cannot be used, an external worksurface support channel is recommended for spans greater than 48"W.

Worksurfaces - Laminate (L) w/Flat Edge and Veneer (V) w/Square Edge

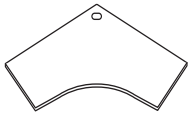
Primary Worksurfaces (L page 91; V page 101)
- Primary worksurfaces are available in 24" and 30" depths.
- Nominal worksurface width is equal to nominal panel width.
- Wire management grommets standard, one for widths up to 42", two on widths 48"W and greater.
- Center support bracket included on 54"W-60"W. Other support hardware is ordered separately.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 18"D, and 24" cantilever on 24"D and 30"D worksurfaces.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence, pages 82-90.



Bow-Front Worksurfaces (L page 92; V page 102)
- Two wire management grommets standard.
- Bow-front worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence, pages 82-90.

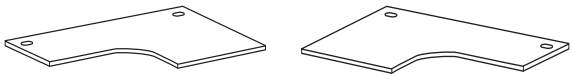


Corner Worksurfaces (L page 93; V page 103)
- One wire management grommet.
- Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces.
- Rear corner left-handed support bracket included. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

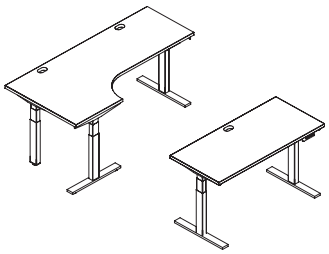


120° Corner Worksurfaces (L page 93, V page 103)
- Standard with one wire management grommet in corner location.
- Rear support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

60° Pie Worksurface (L page 93)
- Order support column and two flat brackets separately.

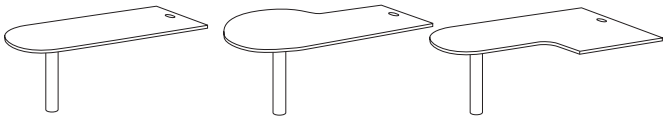


Corner Cove Worksurfaces (L page 94; V page 104)
- Two wire management grommets standard.
- Rear corner support bracket included with all surfaces. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to
  a permanent wall and wall track stanchion is not positioned in the right-hand corner. All other support hardware is ordered separately.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 82-90.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 24" cantilever on 24"D and 30"D worksurfaces.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

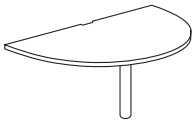


Height-Adjustable Worksurfaces
- For freestanding applications, see height-adjustable tables pages in the Seating, Collaboration, and Tables Price List.

Worksurfaces — Laminate(L) w/Flat Edge and Veneer(V) w/Square Edge

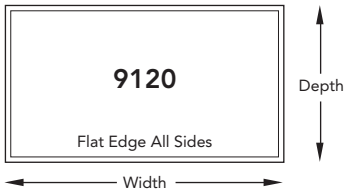


Peninsula, P-Shaped, and Jetty Worksurfaces
(L page 95; V page 105)
- Wire management grommets standard.
- Support column ordered separately, column includes panel support brackets T6BK.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 82-90.



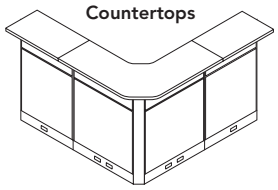
D-Shaped Worksurfaces (L page 96; V page 106)
- Order support column and two 24"D in-line support legs separately.
- Not recommended for use with T6CB24L or T6CB24R for shared applications.
- Includes attachment bracket.

Quarter-Round Worksurfaces (L page 96; V page 106)
- Use to connect two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

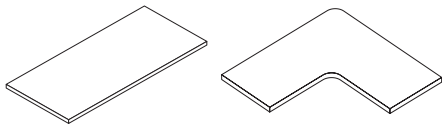


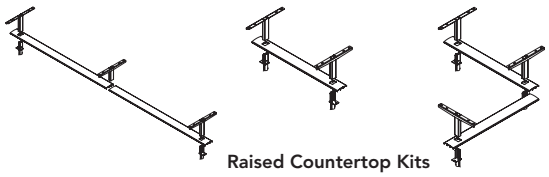
Non-Standard Worksurface Sizes (L, V pages 99 and 100)
- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

Countertops - Laminate (L) w/Flat and Veneer (V) w/Square



Countertops





Raised Countertop Kits

Countertops

- Countertops are available in straight and corner configurations.
- Choose between raised countertops which require raised countertop kit (ordered separately) or flush countertops which include brackets, top trim, and mounting hardware.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Raised Countertops (L page 97; V page 97)

- Countertops are raised 5" above panel top cap.
- Order raised countertop kits separately.
- Add appropriate suffix to end of model number for in-line variable height applications.
- Countertop kit can extend up to 6" beyond end of kit.

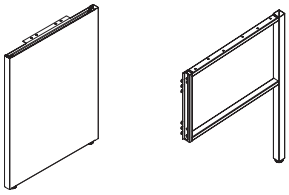
Raised Countertop Kits (L page 97; V page 97)

- Includes top cap and attachment hardware.

Flush Countertops (L page 98; V page 98)

- Mounting brackets, top trim, and attaching hardware included.
- Flush countertops come with a painted top cap — specify color.
- Countertops are flush with the ends of panel top cap.

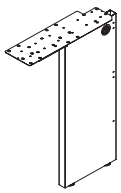
Worksurface Supports



End-Panel and Open End Supports

End Supports and Bracket Kits (page 107)

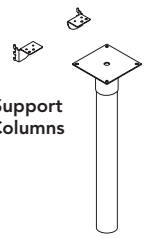
- End-panels are 1⅛" thick. For use in place of panels at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end-panels.
- 11"D end-panel models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.
- Panel mounted end-panel supports are ordered for right- or left-handed application.
- Open end panel supports are non-handed and are only for panel mounted applications.
- End-panel models can be converted to freestanding with removal of panel mount bracket.
- End-panel bracket kit converts freestanding end-panel support model to panel mounted.



Support Legs

Support Legs and Bracket Kit (page 107)

- Support legs are 1⅛" thick. Supports the junction of two worksurfaces.
- Non-handed for use at either end of worksurface. Leg portion is 12¾"D.
- Provided with flat bracket.
- Worksurface in-line support legs are used to support worksurfaces only in a shared position.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Closed full length models can be converted to freestanding with removal of panel mount bracket.
- Support Leg Bracket Kit (non-handed) converts closed full length freestanding model to panel mounted.

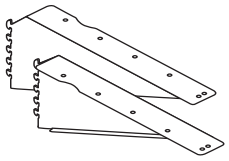


Support Columns

Support Columns (page 107)

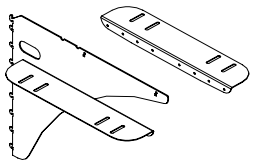
- Used to support one end of curvilinear worksurfaces.
- Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.
- D-shaped, P-shaped, peninsula, jetty, boomerang, and reef worksurfaces require support columns (ordered separately).

Worksurface Supports



Handed
Cantilever Brackets

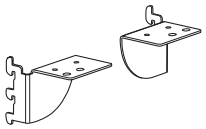
Cantilever Brackets (page 107)
- Use with runs less than 96". Floor support is required for runs 96" and longer.
- Where applicable, cantilevers are recommended over an external worksurface support channel. Unsupported worksurface runs 66"W or greater require an external worksurface support channel when a cantilever cannot be used.
- Do not use at the end of a worksurface where no 90° return panel is positioned.
- Includes tie bracket and attachment hardware.
- Avoid installation on only one side of a straight connection except to support corner worksurfaces.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.
- Do not use with wall track or to support a worksurface to which a return worksurface is attached.



Non-Handed
Cantilever Brackets

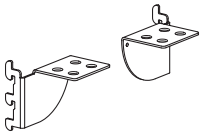
Cantilever Bracket — Handed (page 107)
- Cantilever brackets are handed (left or right) and can be inserted into panel reveals in 1" vertical increments. No assembly required.
- Left- and right-hand brackets required in shared applications.
- 24"D cantilevers are required to be used for both 24"D or 30"D worksurfaces.
- 18"D cantilevers are required to be used for 20"D worksurfaces or center support for 24"D.
- 12"D cantilevers are required to be used for 12"D worksurfaces.

Cantilever Bracket — Non-Handed (page 107)
- Cantilever brackets are non-handed and can be inserted into panel reveals in 1" vertical increments. Assembly required.
- One bracket in shared applications — includes two angled brackets.
- Bracket accommodates 24"D or 30"D worksurfaces.

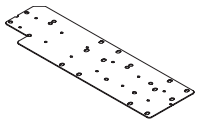


Worksurface Brackets

Worksurface Bracket Kit — T6BK (page 107)
- Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.
- Brackets — one pair. Attachment hardware included.



Worksurface Bracket — T6SB (page 107)
- Worksurface storage bracket kit (T6SB) is used for aesthetics where under-desk storage is immediately adjacent to the return panel. In all other applications use worksurface bracket kit (T6BK) to utilize worksurface threaded metal inserts. Black only.
- Brackets do not align with worksurface threaded metal inserts, and therefore require wood screws (included).

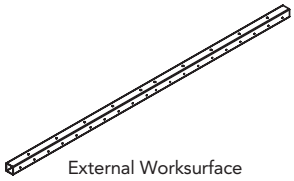


Flat Brackets

Flat Brackets (page 107)
- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Pedestal-to-Panel
Brackets

Pedestal-to-Panel Attachment Bracket (page 107)
- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Attachment hardware included.



External Worksurface
Support Channel

External Worksurface Support Channel (page 91)
- An external worksurface support channel is required on unsupported worksurfaces 60"W or greater. Width of worksurface span can be reduced by using support storage.
- The support channel extends 1½" below the worksurface. Installs 7" from user's edge.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports. May require spacer kit AKMH.

Cadence® Freestanding

Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.

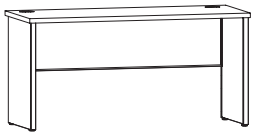
Full Modesty



Half Modesty

Gussets

All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Terrace, Optimize™, and Concensys®, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel metal storage solutions and Extensions™ — work tools to provide personalized organization for every workstyle.

Systems integration — Cadence works in combination with Terrace, Optimize, or Concensys panels, extending the functionality of both product lines.

Highly adaptable — Make the most of building architecture by using an existing wall to create a semi-private workspace.

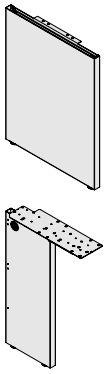
Space utilization — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

Team interaction — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

The Cadence Choice

It works in the open plan, the private office, or in combination with Terrace, Optimize, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

Configurations



End Panels E and Support Legs L

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

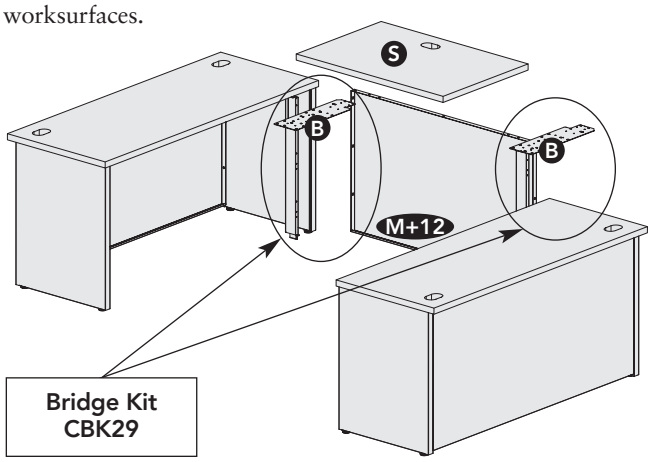
The 11"D end panel is used to freestand peninsulas, curvilinear shapes, and D-Tops in panel applications.

Corner Desk Legs C

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits B

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.



There are some bridge instances where only half of a bridge kit is needed (e.g. using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

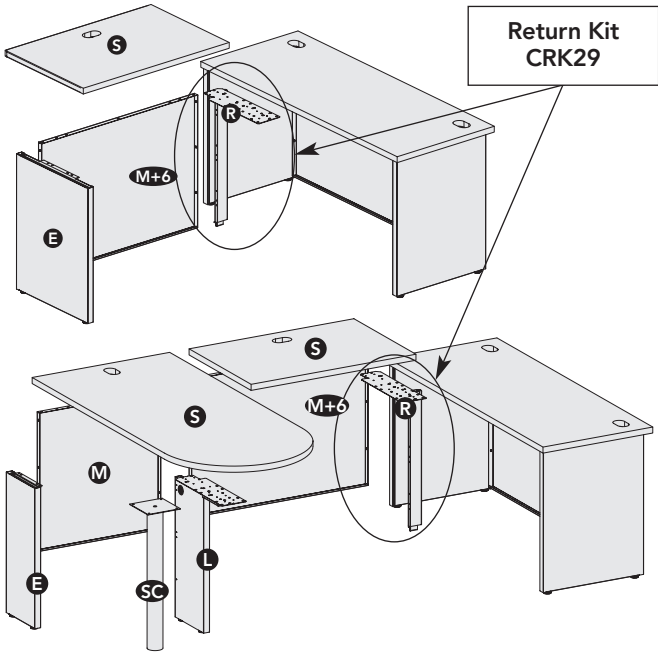
Surface S

Support Column SC

Used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

Return Kits R

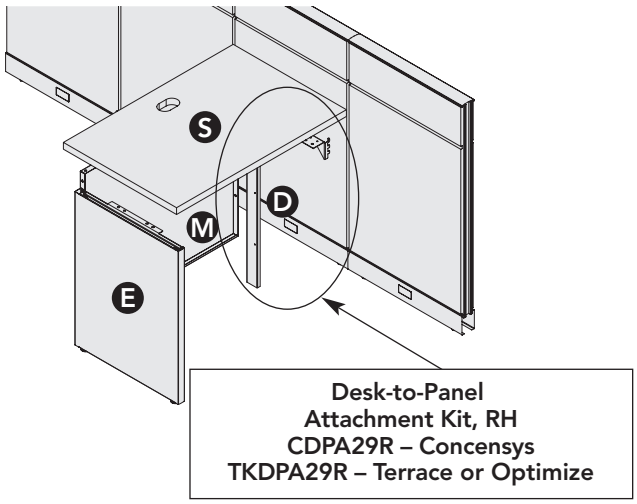
Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.



Desk-to-Panel Attachment Kits D

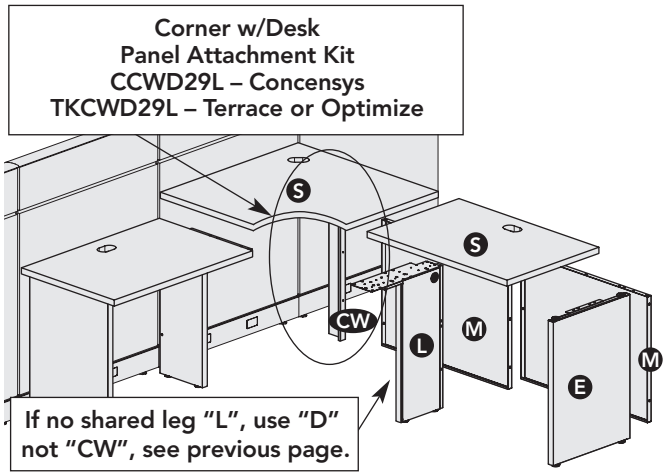
Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk attachment kit. "Hand" of unit is determined from the user's side of the desk (right hand unit attaches to right side of modesty).



Corner w/Desk Panel Attachment Kit CW

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. "Hand" of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

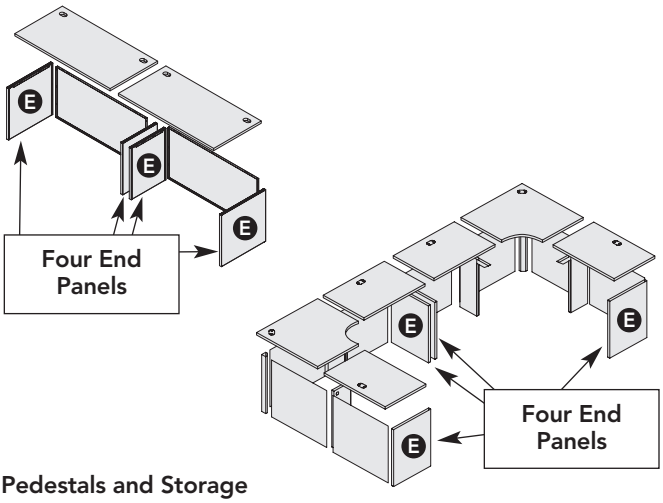


Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24"D full end panels may be used at the in-line junction on 30"D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.



Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 18"D or 20"D peds should be used with 24"D worksurfaces. 18"D, 20"D, or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional pull style and storage options under 24"D worksurfaces.

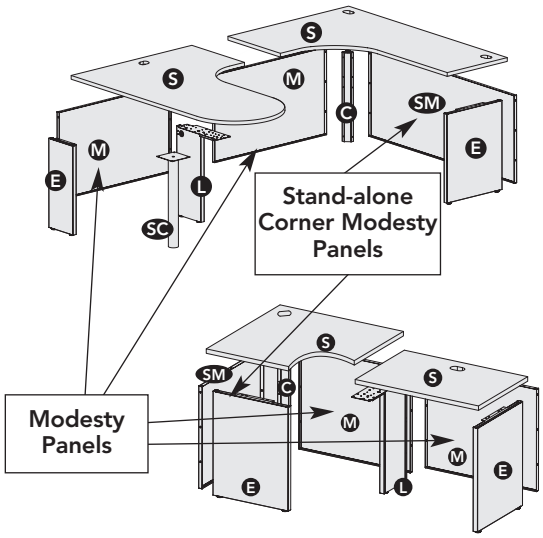
Modesty Panels M

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels SM

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.



Gussets G

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

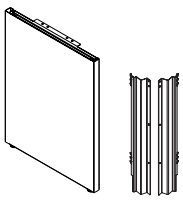
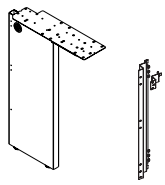
Cadence Supports



End-Panel Supports

End-Panel Supports (page 108)
- End panels are 1⅝" thick. For use at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Freestanding models can be converted to Terrace panel-mount with end panel bracket kit.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° and 135° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.

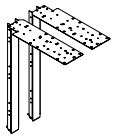


Support Leg

Support Legs (page 108)
- Support legs are non-handed. Supports the junction of two worksurfaces.
- Leg portion is 12¾"D and is 1⅝" thick.
- Flat bracket included.
- Levelers provide 2¾" vertical adjustment.
- Freestanding models can be converted to Terrace panel-mount with support leg bracket (non-handed).
- Must be connected into panel slots for panel hung applications.

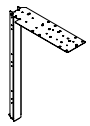
Corner Desk Leg

Corner Desk Leg (page 108)
- Attaches two modesty panels at rear of corner desk.
- Leveler provides 2¾" vertical adjustment.
- See examples on pages 87 and 88.



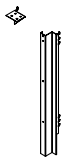
Bridge Kit

Bridge Kit (page 108)
- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.
- See examples on pages 83 and 86.



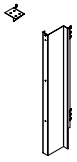
Return Kit

Return Kit (page 108)
- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat brackets and one modesty panel-to-end-panel bracket.
- See examples on pages 83 and 85.



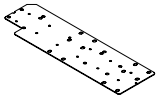
Desk-to-Panel Attachment Kit

Desk-to-Panel Attachment Kits for Terrace (page 108)
- Used to connect a worksurface and modesty panel perpendicularly to a Terrace Panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit.
- "Hand" of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).



Corner w/Desk Attachment Kit

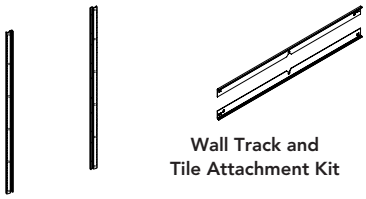
Corner w/Desk Panel Attachment Kit for Terrace (page 108)
- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Terrace panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- "Hand" of unit is determined from the user's side of the desk.



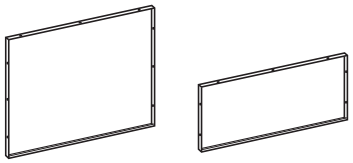
Flat Bracket

Flat Brackets (page 108)
- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Wall Track, Tile attachment Kits, Modesty Panels, and Gussets



Wall Track and Tile Attachment Kit



Full and Half High Modesty Panels

Freestanding Pedestals

- Can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

Freestanding Desks

- **Freestanding desks** can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See pages 82-88.

Pedestal Compatibility with Cadence and Panel-hung Worksurfaces

Cadence Desking	24" Deep	30" Deep
18"D Ped	Yes	Yes
19⅞"D Ped	Yes*	Yes
23⅜"D Ped		Yes

Terrace Wall Track/Tile Attachment Kits (page 108)

- Allows for mounting of system panel components on permanent wall structures.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Terrace wall track tile attachment kit to install tiles onto wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- When using Terrace wall track and using tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

Modesty Panel (page 109)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel, and corner w/desk panel attachment kits.
- 29½"H units provide ¾" of space between bottom of modesty panel and floor.
- Actual width of 29½"H modesty panel is 3¾" less than the nominal dimension listed in the Systems Price List.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Refer to pages 82-88 to select proper width.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels, or gussets can be used with corner or corner cove worksurfaces.

Stand-alone Corner Modesty Panel (page 109)

- 29½"H units provide ¾" of spacing between bottom of panel and floor.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Actual width of modesty panel is 6³⁄₁₆" less than the nominal dimension listed in the Systems Price List.
- Modesty panels are inset 2⅞"; when adding pedestals consult chart at left.

Pedestal-to-Pedestal Modesty Panels (page 109)

- Widths available to work with 60"W, 66"W, and 72"W worksurfaces to create freestanding double pedestal desk using two medal support pedestals.

Gussets (page 109)

- Provides easy access to wall outlets.
- Cannot be used with suspended pedestals.
- Gussets can be used on corner and corner cove worksurfaces.

Universal Modesty Panel (page 109)

- Mounts under peninsula, P-Shape and jetty worksurfaces. Refer to chart below to select proper width.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8½" of privacy and is non-handed.
- Constructed of steel. No upcharge for P2 paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1½" thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

Worksurfaces

For specification information see pages 76-81
For non-standard worksurface sizes see page 99.

TERRACE

ORDERING

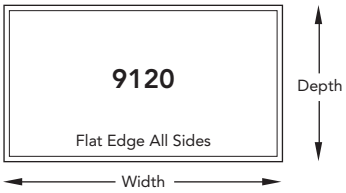
The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number** (see page 100)
   Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)
   See grommet specification instructions on this page.
3. **Grommet Type:**
   P Plastic
   M Metal (add $11 per grommet for laminate)
4. **Grommet Color:**
   (Metal only)
   EL Matte Silver
   Note: Plastic grommet will match flat edge.
5. **Laminate and Veneer Choices**
   See page 20.
6. **Flat Edge Color Choices**
   See edge colors page 20 for laminates.
7. **Exact Size**
   Specify the **exact width** and **exact depth** you require.
   Width and depth is specified in ⅛" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

⅛"	= 1	⅝"	= 5
¼"	= 2	¾"	= 6
⅜"	= 3	⅞"	= 7
½"	= 4	no extra increment	= 0

For example, when ordering a worksurface that is 34⅜"W x 20½"D, specification should be 345Wx204D.
Example: **9120R3624.G0.TM33.EU.345Wx204D**.



PRODUCT SPECIFICATIONS

- Flat edge on all sides
- 45 lb. particle board
- 1⅛" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates and veneers
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

Note: 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

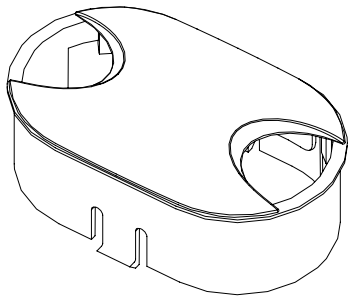
When spanning multiple freestanding storage units with one worksurface, add ⅛" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + ⅛" + ⅛" = 90¼" worksurface. Do NOT follow this rule if panel wrapping storage units.

CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program worksurfaces.

GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate and square for veneer.



PRICING

See page 100 for laminate and veneer 9120 worksurface pricing.

One Grommet — GC, GL, or GR Position..... $17.00
Two Grommets — G3 or G4 Position..... $34.00
Note: Add $10 per grommet for metal grommets with laminate.

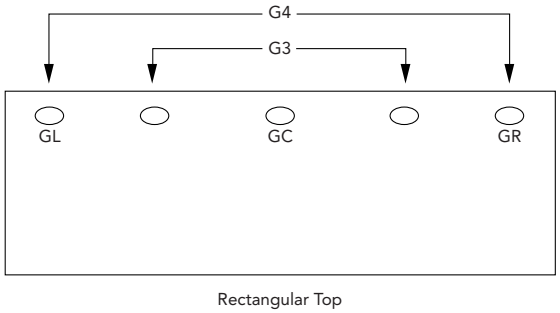
ORDERING

Specify grommet location and color.
Example: **9120R10836.GCP.TM33.EU.1022Wx326D**

Code Grommet Position

GC	Centered side-to-side – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
GL	6⁵⁄₁₆" from left side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
GR	6⁵⁄₁₆" from right side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
G3	Pair of grommets each 18" from side edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center (Position G3 not available on tops 60"W or less.)
G4	Pair of grommets each 6⁵⁄₁₆" from side edge to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
G0	No grommets

Dimensions are from grommet center line to top edge.



Rectangular Top

Grommet positions other than those shown above are considered non-standard.

Worksurfaces

Laminate and Veneer Worksurfaces / Non-Standard Sizes

For specification information see page 99.

Veneer Edge

Notes: 1) Add suffix and upcharge for primary worksurfaces to span a "T" or extended straight connection.
Suffix = T2 (Terrace — adds 2⅛" to width) $67 upcharge (veneer).
Example: **TV53084ST2**
2) Add Suffix "N" to model number for no grommet, no upcharge. Example: **TV53078SN**

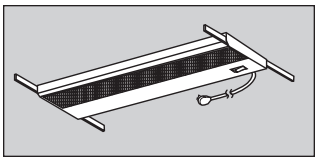
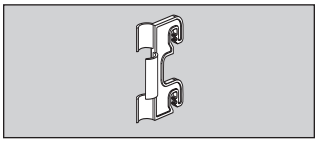
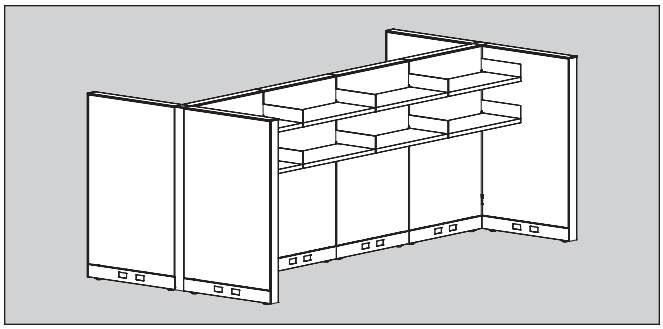
Depth	14¼" RTA models 12"
Inside depth	12⅞" Receding door 12⅛" RTA models 11⅝"
Height	15"
Inside height	12¾" Receding door 11⅝" RTA models 12¾"
Open Shelf	
Width	24", 30", 36", 42", 48", 60"
Depth	12⅞" RTA models 11½"
Height	4⅝" RTA models 5⅝"

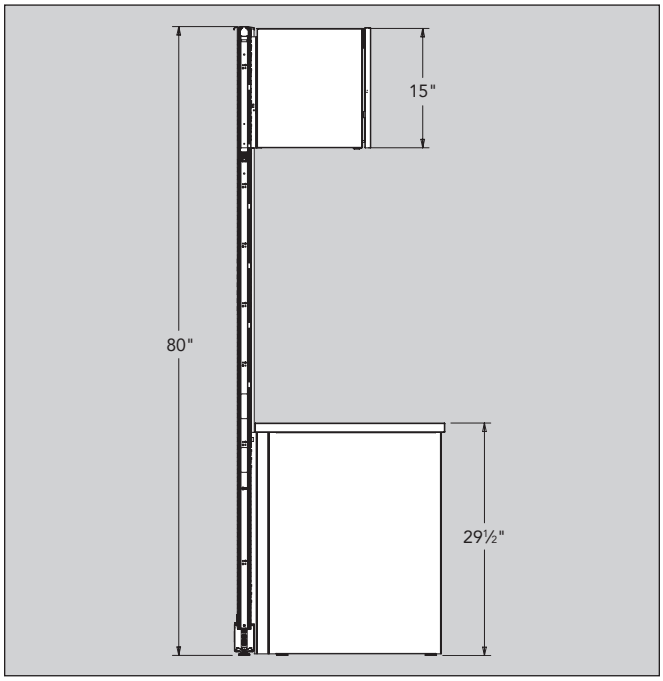


- **Task lights** can be mounted beneath storage shelves and overhead storage cabinets.
- Additional panel hung and freestanding lighting options are available.



- **Cord retainer clips** fasten into panel slots to anchor power cords.
- Available in black only.
- Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.



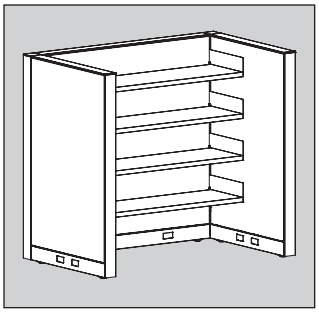


Specification Guidelines

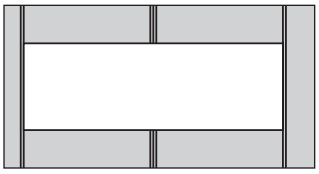
- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.
- Overhead storage cabinets and open storage shelves can be mounted on Terrace structural and stacking panels to a maximum height of 80"H.
- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket.
- For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected.
- Base panel frames with stacking frames that have an overall height of 57½" also use the YZ bracket.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

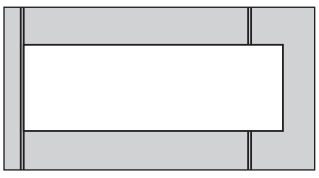
- Stacking frames should be added to all the parent run panels, and to, at least the first panel of each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.
- With Terrace, a full height panel end cover is required for adequate stability when using overhead storage on the end of a run, or on a return panel.



- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

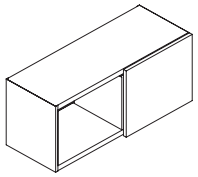


- **Storage shelf, receding door overhead, RTA overhead, and RTA shelf width** must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.

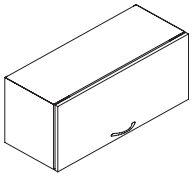


- **Terrace assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets.

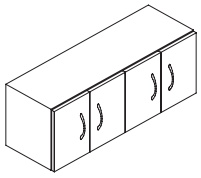
Reference Page



Sliding Door Overhead



Flipper Door Overhead



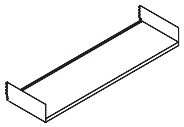
Hinged Door Overhead

Overhead Storage Cabinet (page 114)

- Steel cabinet with backstop.
- Available with sliding, hinged, or flipper door(s).
- Easy-Assist flipper door optional — requires minimal assistance in opening and closing. Not available on 60"W cabinets, specify 2–30"W cabinets with Easy-Assist.
- Self-engaging safety latch to secure cabinet to panel.
- Width can correspond with width of panel, or 2 panels joined without a connector.
- Arch or square pull optional on flipper and hinged doors.
- 60"W flipper door cabinet has 2–30"W doors with 2 independent locks.
- 24"-36"W hinged door cabinets have 1 lock and 2 optional pulls, 42"-48"W have 2 locks and 4 optional pulls.
- Accommodates recessed task lighting (specified separately).
- For locking specifications, see pages 414-416.
- Cabinets are 14¼"D x 15"H.
- 15"H cabinets can also be mounted on a panel equal to or up to 18"narrower than cabinet using provided panel attachment brackets.
- Sliding doors have a built in pull.
- Sliding, hinged, and flipper door overhead weight limits:

24"W	59 lbs.	42"W	105 lbs.
30"W	74 lbs.	48"W	121 lbs.
36"W	90 lbs.	60"W	152 lbs.

- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket. For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected. Base panel frames with stacking frames that have an overall height of 57½"H also use the YZ bracket.

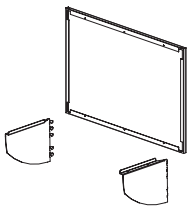


Open Shelf

Open Shelf (page 114)

- Metal shelf with back stop.
- Locking clips (2) standard.
- Will accommodate recessed task lighting — ordered separately.
- Weight Limits:

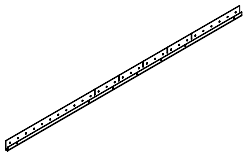
24"W	61 lbs.	42"W	108 lbs.
30"W	77 lbs.	48"W	124 lbs.
36"W	93 lbs.	60"W	155 lbs.



Upmount Kit for Overhead Cabinets

Upmount Kits for Assembled Overhead Cabinets (page 114)

- Consists of two upmount brackets, full back panel and required installation hardware.
- Allows mounting of an assembled overhead cabinet up to 15" above height of panel.
- Specify "Z2" prefix model number upmount kits with 15"H, 30"H, 35"H, 50"H, or 65"H frames; and "Z4" prefix model numbers for use with 22½"H, 42½"H, or 57½"H frames.
- Brackets require a clearance of 6½"below bottom of overhead cabinet.
- Width must correspond with width of panel frame or 2 panel frames joined directly in-line.
- Full back panel adds ½" to depth of overhead case. Full back panel only used when upmounting cabinet.
- Cannot be used with RTA models.

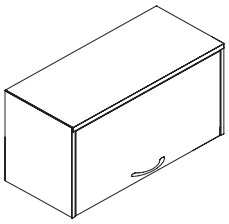


Horizontal Wall Track

Horizontal Wall Track (page 114)

- Allows mounting overheads on permanent wall structures only.
- Cannot be used with RTA models.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- For use with 15"H sliding door overhead, field modification is necessary.
- Available in Black only.
- Attachment hardware not included.

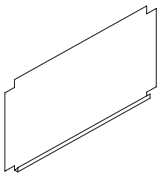
Reference Page



Receding Door Overhead

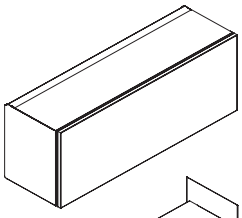
Receding Door Overhead Storage Cabinet (page 115)
- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or Square pull optional.
- 60"W cabinet has 2 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 414-416.
- Cabinets are 13¼"D x 15"H. When door is recessed, interior dimensions are 12⅛"D x 11⅝"H.
- Weight Limits:

30"W.....70 lbs.	48"W.....110 lbs.
36"W.....85 lbs.	60"W.....138 lbs.
42"W.....100 lbs.	

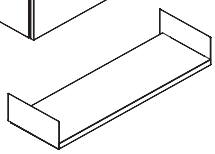


Receding Door Overhead Back

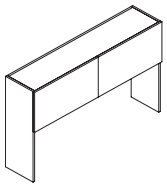
Receding Door Overhead Back (page 115)
- Optional for use with receding door overhead.
- Order width to match overhead cabinet.



Ready to Assemble (RTA) Flipper Door Overhead (page 115)
- Steel cabinet with open back.
- 60"W and 72"W cabinets have 2 doors with independent locks.
- Accommodates recessed task lighting — ordered separately.
- Random keying, for locking specifications see pages 414-416.
- Cabinets are 12"D x 15"H. Interior dimensions 11⅝"D x 12¾"H.

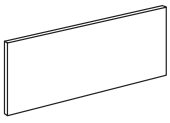


Ready to Assemble (RTA) Shelf (page 115)
- Metal shelf with locking clips.
- Accommodates recessed task lighting — ordered separately.



Stack-On Hutch

Stack-on Hutch (page 116)
- Have flipper doors with square horizontal edges.
- Universal model can be converted to open hutch.
- Doors are standard with a core removable lock (60"W, 66"W and 72"W have two doors and two locks.)
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Hutches have clearance of 19¾" for computers, etc.
- Ship easy to assemble.
- Depth dimensions shown includes thickness of door.
- Universal model inside depth dimension is 12¾"
- Stack-on hutches accommodate recessed task lighting.
- For locking specification see pages 414-416.
- Chicago task light cords cannot be routed through the Hutch end panels, due to the large size of the fused plugs.



Tackboards for Hutches

Tackboards (page 116)
- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 72"W tackboards are available in railroad cut only.
- Back of tackboard is painted steel, a finished surface.

Metal Overheads

For specification information see pages 110-113.

*** These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is limited and color availability two years to coincide with evolving workplace trends.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

***SE800 and NE800 are not available on Stride trim.

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

GROMMETS ON VENEER WORKSURFACES

Wire management grommets come standard on most veneer worksurfaces. Choose between metal or plastic grommet option. Note: Plastic grommet color is predetermined based on finish selection.

Keep pace with your environment.

When designing Stride, we set out to discover a furniture platform that could evolve to reflect the changes today's organizations are experiencing. To create components that could adapt to personal preferences and demands of different job functions. To make of the most sustainably minded and manufactured products available. What we found is a whole new way to build a better office environment.

You're asking more of your staff. So we asked more of our furniture.

Today, you have to get more done in less time and in a smaller space. Stride responds by maximizing every inch you have. We made storage smarter with details like under-desk corner drawers for tucking away a recycle bin or binders, and sliding shelves for quick, easy access to projects. Perch overhead cabinets and rail-mounted screens bring storage within easy reach and create desktop privacy. And a clever credenza rail not only supports worksurfaces at different heights for managing multiple tasks, it offers easy access to technology.

Designed for real people and real work.

Stride supports multiple job functions, not rigid hierarchy. So it's possible to create an office that serves everyone, whether they work side-by-side or back-to-back. We found a simple way to make every task more comfortable with sit-to-stand worksurfaces that allow users to change postures. Staying organized is easy with a variety of open and enclosed storage options. Low panels and glass screens keep the space clean, lean, and light.

Space that works like an office, but feels like home.

Because each component of Stride was designed with every other component in mind, the entire collection works together seamlessly. Countless thoughtful details have been designed to increase comfort, improve effectiveness, and add visual appeal. Storage dresses up with elegant pulls, a sophisticated mix of materials, footed bases, and the welcome surprise of a Landscape™ surface tower sidelight. A work wall with both open and enclosed storage makes the private office elegant, inviting, and functional.

As Stride was being developed, we considered everything from raw materials to end-of-life for each component. But we also considered the needs of the person using the furniture. A range of contemporary worksurface shapes makes it easier to get work done. Segmentation every 7½" offers unlimited access to power. And design details like footed panels, tiles to-the-floor, and spanning glass create a welcoming aesthetic. So even the most straightforward workspace can be more inspiring, long-lasing, and productive.

With simplification of form and subtleness of strength, Stride benching supports highly collaborative users who need dedicated spaces, as well as mobile workers who only need to touch down for part of the day. Exceptionally easy access to power and data allows people to settle in or come and go. Cantilever storage combines space division and personal storage in one functional, visually dynamic solution. And the elegantly designed open leg supports long spans, creating uninterrupted workspaces.

A people-centric approach to furniture design makes spaces more comfortable, functional, and friendly. It's flexible enough to support the different ways that people work. As your company grows and changes, so does Stride; built-in flexibility allows the collection to adapt to your organization's evolving needs. Yet it's more than furniture. It's a platform for building better environments, while protecting the one we have.

An exceptional new collection of materials — textiles, finishes, landscape material options and color palette — were also developed for Stride and many of these additions help to bring a more residential vs. contract ethos to the furnishings.

With an integrated and cohesive kit of universal components, Stride supports a broad range of applications from private office to open plan, and a seamless migration from an environment with more separation to one with more openness or vice versa. Stride can be scaled down or up with ease — adding, subtracting, or rearranging, providing a stunning degree of versatility and flexibility to adapt to the organization and the individual.

Stride brings it all together in one complete collection of surfaces, storage, and space division.

Mix and match worksurfaces, storage and space division for your own unique solution. Stride achieves a stunning degree of versatility and flexibility. The use of cohesive, scalable materials and finishes creates a beautiful aesthetic in every application.

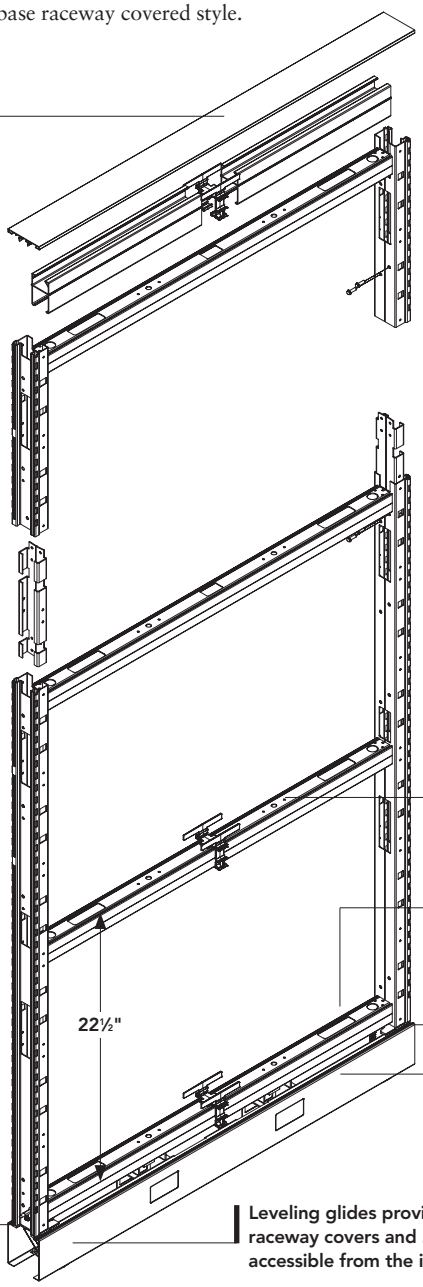
STRIDE

Reference Page

Stride base raceway panel frames include frame, base pathway covers, and in-line connection attachment hardware. Footed panel frames include panel feet. No electrical or data capabilities in base of footed panel frames. Base raceway to footed and footed-to-base raceway kits can be used to convert existing frames to footed style or to base raceway covered style.



Panel frames are only available without top trim. Flat top trim (ordered separately) is available in painted or veneer to match panel width or to span multiple frames.

Panels (frames and tiles) are 3" thick (use 3⅛" to calculate intersections in length of panel run).

Stacking frames are available in 15", 22½", and 30"H.

Structural panel frames are available in 35", 42½", 50", 57½", and 65" nominal heights.

Frames accommodate tiles at 7½" increments. One segment kit (ordered separately) required on base panel frames and stacking frames between each segmented tile.

Beltline area accommodates electrical power and provides desktop access to data and communication cables.

Horizontal cross-members at 22½" provide additional rigidity on frames.

All steel horizontal members have vertical cable and electrical routing capacity.

Opening in the side of uprights accommodates a large volume of data cabling and electrical.

Frames can be specified with knockouts only on one side of base raceway cover.

4"H base raceway cover has outlet openings that accept duplex receptacles or commercially available modular data faceplates. Optional raceway cover with additional opening or no outlet openings available.

Lay-in base raceway accepts voice, data, and fiber optic cable, as well as electrical system.

Leveling glides provide 2¾" of adjustment on frames with raceway covers and 2" of adjustment on footed frames. Glides are accessible from the interior of the frame, except on panel feet.

Stride Frame Dimensions (Actual)

Depth: 3" (use 3⅛" to calculate intersections in length of panel run)

Widths: 24", 30", 36", 42", 48", 60"

Heights*: 34⅜", 41⅞", 49⅜", 56⅞", 64⅜"

Stacking Frames: 15", 22½", 30"H

Leveling Glides on Frames with Raceway Covers: 2¾" range

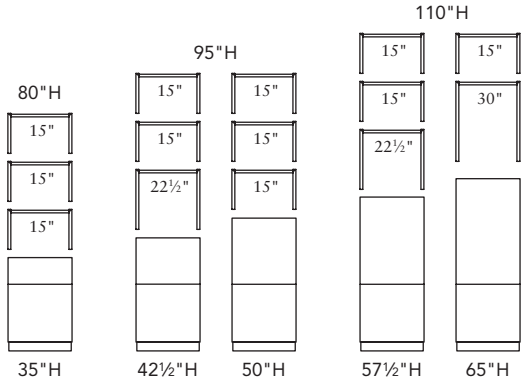
Leveling Glides on Footed Frames: 2" range

*with levelers fully retracted

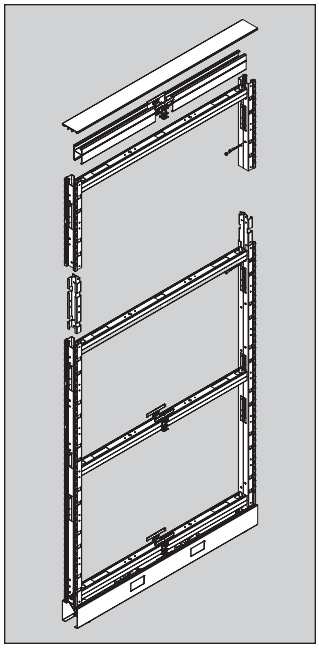
Panel Frames and Conversion Kits (pages 143-144)

- Specifications: formed steel vertical members, with tubular steel horizontal members are welded into a strong, sturdy structural panel frame.
- Top trim, tiles, and segment kits are ordered separately depending on application choice.
- Panel frames are standardly shipped with base raceway covers or decorative feet installed. There is no electrical or data capabilities in base of footed panel frames.
- Base raceway to footed and footed-to-base raceway kits can be used to convert existing frames. Footed-to-base raceway kits ship with glide tower assembly. Conversion process requires panel to be removed from panel run.
- Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in length along the run.
- For adequate stability, one of two methods of stabilization shown on page 127 must be adhered to.

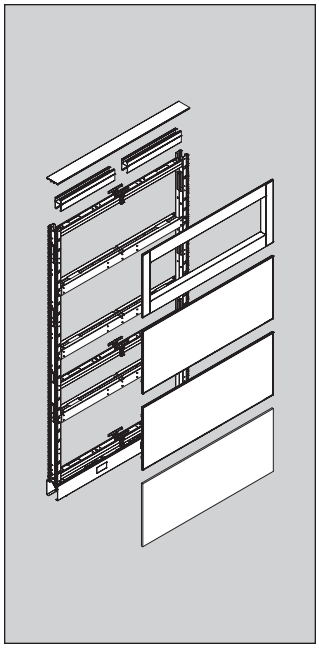
Building vertically with Stride frames



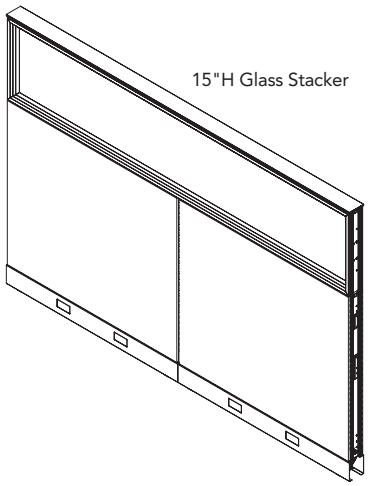
Stacking Connection



Segmented Panels



A low profile glass stacker kit is a single pane of clear or frosted safety tempered glass centered within a silver metal frame.



Stacking Frames (page 144)

- Stacking frames can be added to the top of any base panel frame.
- This stacking connection provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per Allsteel configuration guidelines.
- A maximum of three stacking frames are allowed on base panel frames 35"H-65"H up to a maximum height of 110". Do not combine differing frame widths in a single stack or span multiple base panel frames with stacking frames.
- Guidelines for using overhead storage with stacking frames are given on page 284.
- Includes attachment hardware.
- Add appropriate connector blocks (2 per stacker level).
- When adding stacking frames, the top trim and top trim retainer are removed from the base frame and installed on the uppermost stacking frame.
- To maintain panel mounting slot modularity 22½"H stacking frames should only be used with 42½"H, 57½"H base panel frames or 87½"H door frames. To match 87½"H door frame height, use a 65"H base panel frame with a 22½"H stacking frame (slot modularity will be lost on stacker). To maintain modularity on 35"H, 50"H, and 65"H base panel frames use 15"H or 30"H stacking frames.
- If panel mounting slots are not being used, any stacking frame can be used on any base panel frame of matching width.

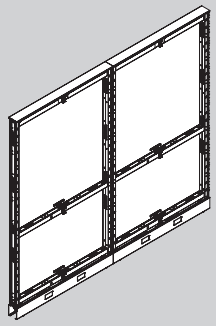
Segment Kits (page 144)

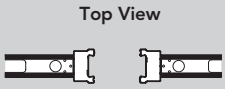
- One segment kit required (order segment kit separately) on base panel frames and stacking frames between each segmented tile.
- Segment kit not required at beltline (22½" above the base raceway).
- One segment kit accommodates segmentation on both sides of the frame.
- Segment kit is required to mount electrical other than at beltline or base raceway. Kit provides support for components at 7½"H increments.
- Segment kit not required between low profile glass and base frame.

Low Profile Glass Stacker Kits and Tie Brackets (page 145)

- Single pane clear or frosted safety tempered glass encased within a frame.
- Glass is positioned in the middle of the stacking frame.
- Can be used to span multiple frames when the combined frame width is equal to the low profile glass stacker width.
- Mounts to base panel frame(s) as a stacking unit.
- The top trim from the base panel frame or spanning top trim is used to finish the top of low profile glass stacker kit.
- For use at top position only.
- Low profile glass stackers are non-structural. Do not hang or stack on top of low profile glass stacker kits.
- Cannot mount a countertop on low profile glass stacker kits.
- Tie bracket kit(s) required when two or more low profile glass stackers are adjacent (order separately). Specify based on low profile glass stacker kit intersections at the same height only, ignoring base frames at the same height.
- Tie bracket kits only connect to low profile glass stacker kits. They do not attach to base frames.
- Low profile glass stackers do not have panel slots.
- Height of low profile glass stackers must be considered when calculating overall height.
- Horizontal segment kit is not needed below low profile glass stacker.
- Add appropriate additional connector blocks.
- Uppermost tile(s) on base frame(s) below low profile glass stacker must be removed for stacker installation.

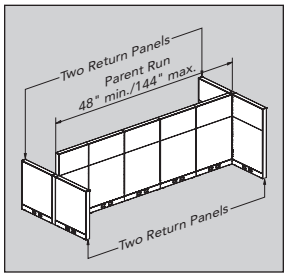
Building horizontally with Stride frames

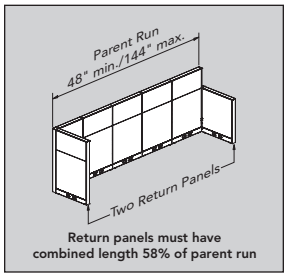




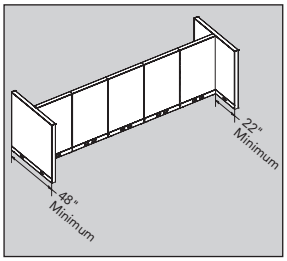
Direct connections between same height frames.

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:





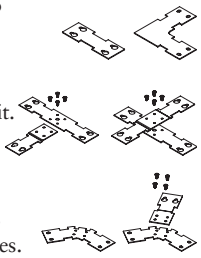
- **Method 1—Opposing returns:** A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run. Return panels must be a minimum of 24"W; and must not be any more than 30" shorter in height than parent run.
- **Method 2—Single-sided returns:** A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels totaling at least 58% of its length, extending in one direction. Return panels must not be any more than 30" shorter in height than parent run. Any run under 100" must have a minimum combined length of 60" of return panels.



- **An off-modular return panel** must be at least 48"W and there must be at least 22"W on one side of the parent run.

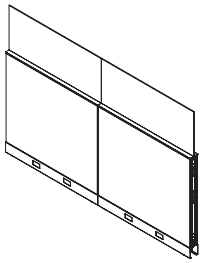
Note: Alternate stabilization methods available using back- or side-mounted Stride credenzas — see pages 128-129.

Tie Bracket Kits for Low Profile Glass Stackers (page 145)



- For use with low profile glass stackers when two or more low profile glass stacker kits come together at a connector juncture.
- Only used when attaching one low profile glass stacker kit to another low profile glass stacker kit.
- Specify based on low profile glass stacker kit intersections at the same height only, ignoring base frames at the same height.
- Tie bracket kits only connect to low profile glass stacker kits. Brackets do not attach to base frames.

Panel Mounted Screens (pages 146-147)



- A panel mounted screen is a frameless insert that is integrated into the top trim on a base panel frame.
- The panel mounted screen replaces the top trim on base panel frame or stacking frame on which it is mounted.
- Panel mounted screens cannot be mounted on low profile glass stackers.
- "G" grooved end trim must be used when a base panel frame below a panel mounted screen is shorter than the adjacent in-line panel.
- Panel mounted screens are non-structural and therefore cannot be stacked on top of support hanging elements.
- Finishes and Sizes:
  Clear or Frosted safety glass — available in 7½"H and 15"H

Hinged Door Panel Frame (page 148)

- Includes 42"W frame, top trim, 36"W door, hinges, and attachment hardware.
- Door is available in laminate.
- Order door knob or lever separately, see page 148.

Sliding Door and Mounting Kit (page 148)

- See illustration and specification information on page 130.

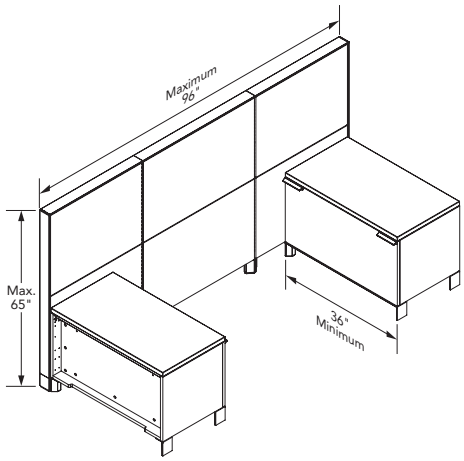
Standard Flat Top Trim (page 149)

- Used when specifying base panel frames without top trim.
- Top trim can span individual or multiple base panel or stacking frames.
- It is possible to span multiple frames when the combined frame width is equal to the top trim width.
- Some examples are listed on page 149, other combinations are possible.
- Available in painted or veneer finish.

Connector Span Flat Top Trim (page 149)

- It is possible to span multiple frames and one ("TS", "XS", or "SS") connector when the combined frame width is equal to the top trim width and one "S" style connector.
- Only to be used on a parent run where all return panels are at a lower height (extended straight connections only).
- Available in painted or veneer finish.

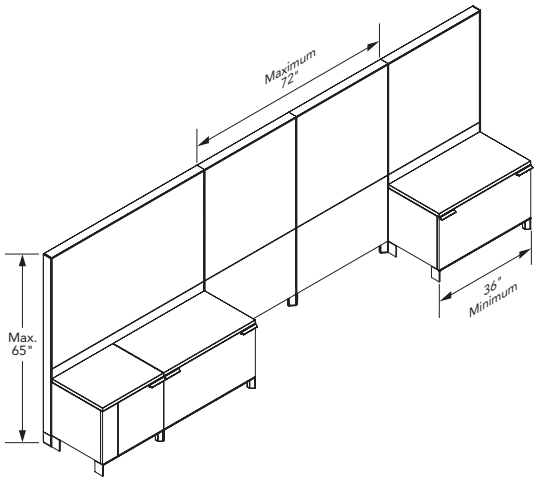
Low Credenza Side to Panel Bracket



Side-mounted low credenzas

- The minimum Stride low credenza width is 36" on each end.
- With a mid-run floor support the maximum panel run is 144".
- Without a mid-run floor support, the maximum panel run is 96".
- Overheads and shelves cannot be used with side-mounted low credenzas.
- Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.
- Panel frame maximum height is 65"H. Stacking frames can be used.

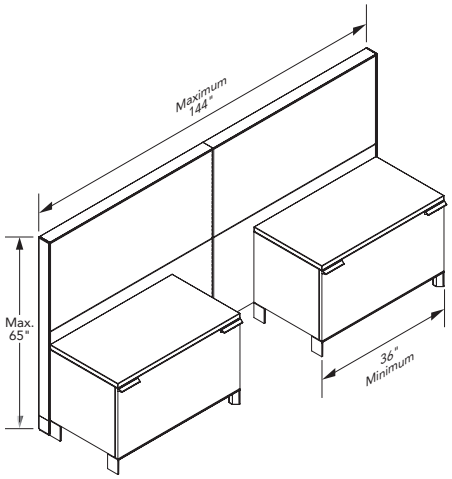
Credenza Back to Panel Bracket — Modular



Back-mounted credenzas

- The minimum Stride credenza width is 36"W on each end.
- The maximum panel run between back-mounted credenzas is 72".
- With the use of one bracket kit, two credenzas can be ganged together up to 72"W and can span two panels. Each panel must be the same width as each credenza.
- When using overhead cabinets or shelves, both sides of the run must have credenzas that are the same width as the panel or panels joined without a connector.
- Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas. Stacking frames cannot be used with overheads.
- Panel frame maximum height is 65"H.

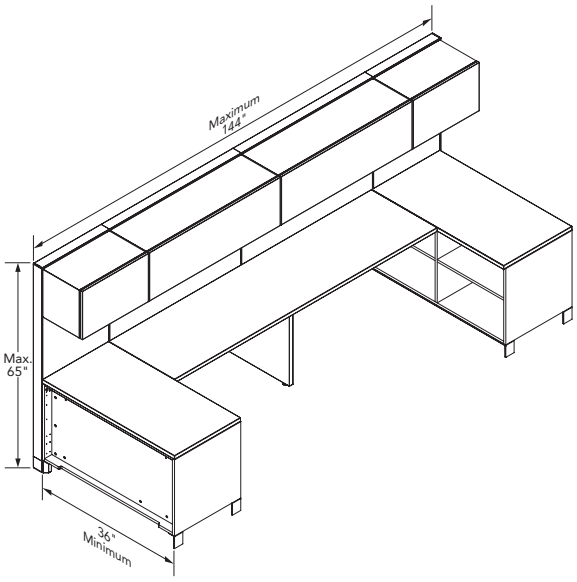
Credenza Back to Panel Bracket — Off-Modular Ends



Off-Modular back-mounted Credenzas

- The minimum Stride credenza width is 36"W.
- With a floor support the maximum panel run is 144".
- Without a floor support, the maximum panel run is 96".
- Overheads and shelves cannot be used if both ends of the credenza are not on modular.
- Panel frame maximum height is 65"H. Stacking frames can be used.

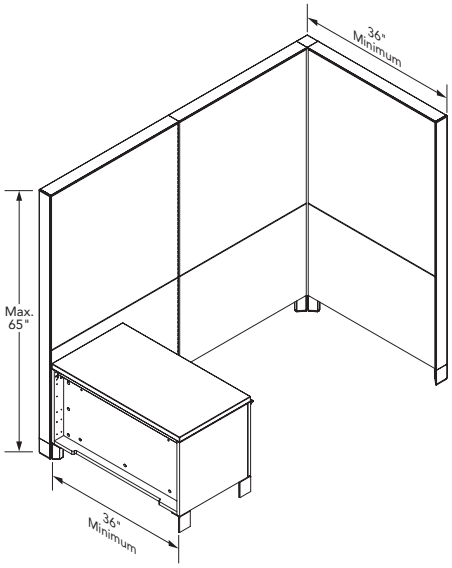
High Credenza Side to Panel Bracket



Side-mounted high credenzas

- The minimum Stride high credenza width is 36"W on each end.
- With a floor support the maximum panel run is 144".
- Without a floor support, the maximum panel run is 96".
- Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas. Stacking frames cannot be used with overheads.
- Panel frame maximum height is 65"H.

Credenza Side to Panel Bracket with Return Panel



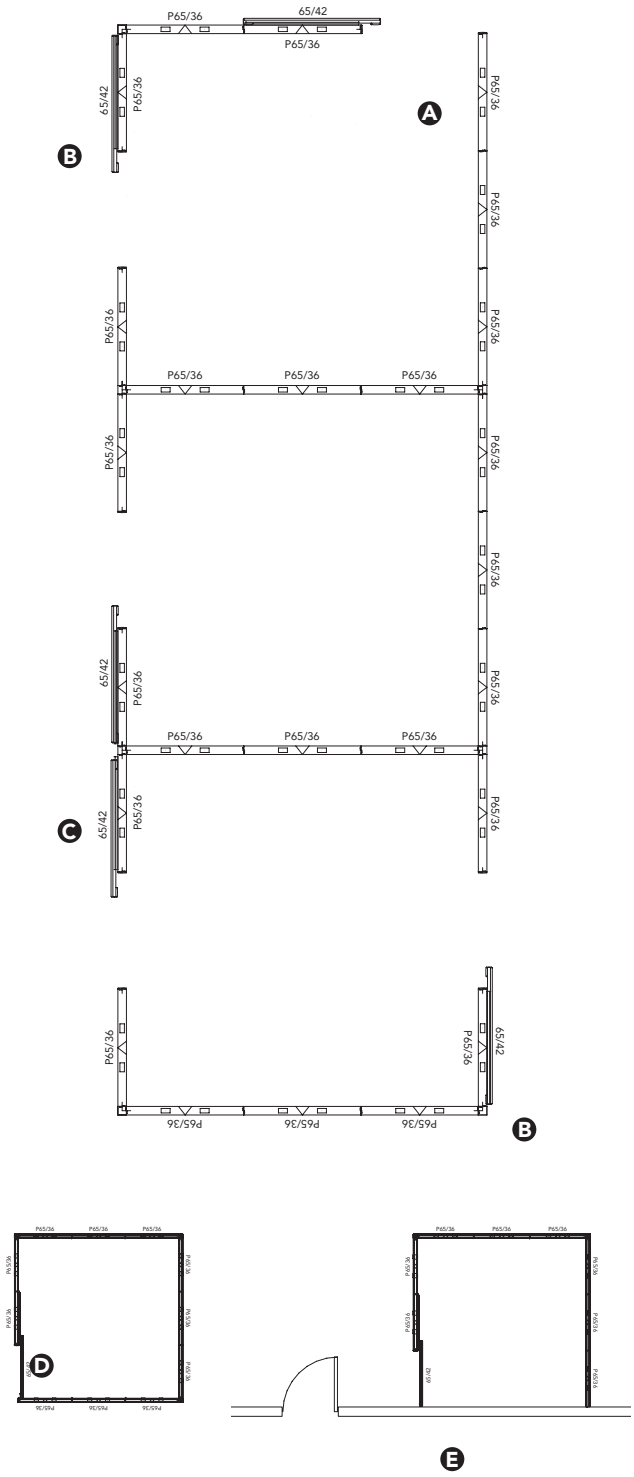
Bracket with return panel

- Minimum Stride credenza width 36".
- With a floor support the maximum panel run is 144".
- Without a floor support, the maximum panel run is 96".
- The minimum size for panel return is 36"W x 35"H.
- Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the high credenza.
- Panel frame maximum height is 65"H.

Reference Page

The sliding door for Stride is system specific; one model for Stride with specific mounting kits for each door ordered. With a frosted translucent insert and your choice of P1 or P2 paint, the sliding door will create a unique look for any office environment.

Sliding doors are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. They accommodate a 36"W opening and are 42"W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the specifications of the project. The handle pulls located on each side of the door are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.



Sliding Doors and Mounting Bracket Kits (page 148)

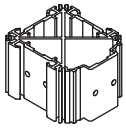
- The system requires the ordering of both a door and a mounting bracket kit.
- The door and mounting bracket kits are system specific. The Stride door and mounting kit only works with Stride.
- All sliding doors are 42" wide to accommodate a 36"W opening. Doors are non-handed and non-locking.
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48"W) on which the kit is being installed.

General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 127). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces or return panels may seem less stable.
- If the door is used to close an opening **(A)** where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42"W.
- If the panel is at a corner **(B)**, the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels **(C)** that are less than 42"W they will interfere with each if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear **(D)** and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run that is positioned adjacent to a wall **(E)** or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.
- Door leveling is dependent on floor being level.

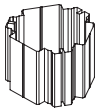
There are three components to consider when specifying Stride connectors: 1) connector blocks 2) light block kit 3) vertical trim. Light block and trim must be ordered separately. See examples of "L", "T", and "X" configurations on pages 133 and 134.

Connector Blocks



2-Way, 3-Way, and 4-Way Universal Connector Blocks

2-Way 120° Connector Blocks



3-Way 120° Connector Blocks

35"H Frames = 2 Connector Blocks
42½"H Frames = 3 Connector Blocks
50"H Frames = 3 Connector Blocks
57½"H Frames = 3 Connector Blocks
65"H Frames = 4 Connector Blocks

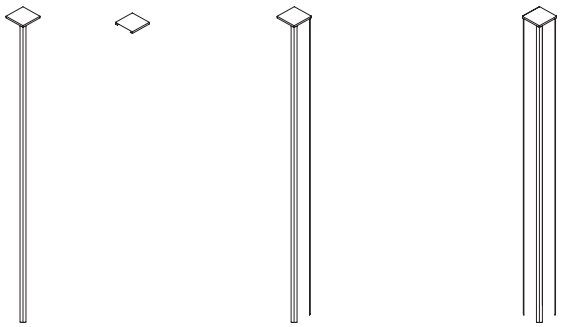
Add connector blocks for each level:
7½"H = 1 connector block
15, 22½ or 30"H = 2 connector blocks

STEP 1: CONNECTOR BLOCKS (page 150)

- Universal connector blocks are used to connect frames at "L", "T", "X", or "S" connector junctures, 2-Way "B" 120° connector blocks are used for 120° connector junctures, and 3-Way "C" 120° connector blocks are used for 3-way connector junctures.
- At all connector junctures, specify the number of base frame connector blocks based on the height of the shortest base frame(s).
- Starting at the top of the lowest base frame and going up, add additional connector blocks for each level change. *A level change is any difference in height between frames and/or stacking frames within a connector juncture, not necessarily top cap to top cap. A level change includes a stacking frame (each stacking frame level requires 2 connector blocks).*
- Continue adding blocks for each level until there are fewer than two frames remaining above the last specified level.
- When specifying the 2-, 3-, or 4-way Universal Connector Blocks, CAP/CET specification tools will auto-pick the Z3UCON10P model which comes as a pack of 10. You can manually overwrite this model to Z3UCON and adjust the quantity as needed.

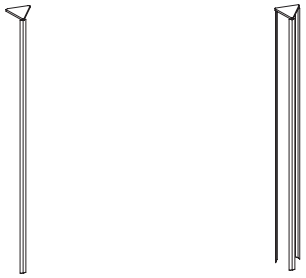
Light Block

2-Way Light Block **3-Way Light Block** **4-Way Light Block**



2-Way "L" 2-Way "S"

120° Light Block



2-Way "B" 3-Way "C"

2 Frames (90°) = 2-Way Light Block Kit (L)
3 Frames = 3-Way Light Block Kit (T)
4 Frames = 4-Way Light Block Kit (X)

2 Frames (120°) = 2-Way Light Block Kit (B)
3 Frames (120°) = 3- Way Light Block Kit (C)

STEP 2: LIGHT BLOCK KIT (pages 151-156)

- Each light block kit includes a top cap transition piece and light block. Light block can be specified without top cap for use in extended straight specifications when using spanning top trim.
- Connector blocks and trim must be ordered separately. Trim is available in painted or veneer finish. If top cap only (for use at a 2-way extended straight connector juncture) no light block is required.
- Light block height is equal to the tallest frames. ***Exception:*** When there is only one tallest frame, determine the light block height considering the frames(s) at the next highest frame height.
- Light block quantity is determined by the number of frames at the connector juncture.
- The top cap transition piece is determined by the configuration of the tallest frames at a connector juncture. ***Exception:*** When there is only one tallest frame, specify the top cap transition piece considering the frame(s) at the next highest frame height **and** the tallest frame.
- The top cap transition piece will be located at the height of the light block light block kits can also be specified without a top cap transition piece.

Light Block Model Logic:

Stride connector = **Z365XS**

Z3	6 5	X	S
	2a. Height	**2b.** Connector Junction	**2c.** Top Cap Trans. Piece (config.)

2a. Light block height = ␣ ␣
2b. Connector junction = ␣
X – 4-Way
T – 3-Way
L – 2-Way
B – 120° – 2-Way
C – 120° – 3-Way
2c. Top cap transition piece (configuration): X, T, L, S, B, C = ␣
Letter codes will be the same if panels are all the same height.

Vertical Trim

"VH" Variable Height End Trim

"EG" Grooved Variable Height End Trim

"L" 2-Way 90° Filler Trim

"F" Flat Filler Trim (Use 2 for "S" Extended Straight)

"B" 2-Way 120° Filler Trim

"E" End Trim

"EF" End Trim for Footed Panel

STEP 3: TRIM (pages 151-156)

- Vertical trim finishes off panel frames and connectors - available in painted or veneer finish. Connector and light blocks must be ordered separately.
- Vertical filler trim is specified by first considering the location (height) of the top cap transition piece at the connector juncture. (Step 2)

Variable Height (pages 151-156)

- Directly above the top cap transition piece, specify variable height vertical trim "VH" to cover the exposed frame. "VH" attaches directly to the end of the panel frame to finish ends in a high-low condition.
- "G" grooved variable height end trim is used when the base frame of a panel mounted screen is shorter than the adjacent in-line panel.

Filler Trim (pages 151-156)

- Below the top cap transition piece, fill voids to cover exposed connector blocks. If there are two adjacent exposed sides (90°) use "L" 90° vertical filler trim. "L" 90° vertical filler trim attaches to connector blocks
- Fill in remaining voids with "F" flat vertical filler trim, which also attached to connector blocks.
- For "S" extended straight configurations, specify 2 "F" flat vertical filler trim pieces.
- "B" vertical filler trim is used below the top cap transition piece in 120° configurations.

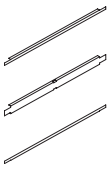
Finished Ends (page 156)

- "E" vertical end trim attaches to the end of the panel frame for use as a finished end on base raceway panel frames.
- "EF" vertical end trim for footed panel is used as a finished end on footed panels frames.
- Wall mount kits provide a means to affix a panel frame to a permanent building wall. Kit adds ¼" to length of panel run.

Wall Kits

Wall Mount Kit

Wall Track



Wall Track Tile Attachment Kit

Wall Track Tile Segment

"W" Wall Mount Kit (page 157)

- Includes top cap.
- Adds 1¼" to run.
- Provides means to affix a panel run to permanent building wall.
- Anchor devices are not supplied.
- Available in painted or veneer finish.

Wall Track (page 157)

- Allows for mounting of system panel components on permanent wall structures.
- Vertical wall track is 60"H. Field cut for lower heights.
- Wall track will add ⅞" to depth of attached components.
- One pair — left and right included.

Wall Track Tile Attachment Kit (page 157)

- Allows mounting of Stride tiles to wall track segments.
- Includes two top/bottom bars and one middle segment bar.
- Add additional wall track tile segment(s) if attaching more than two tiles.

Wall Track Tile Segment (page 157)

- Includes one middle segment bar for additional segmentation.

STRIDE

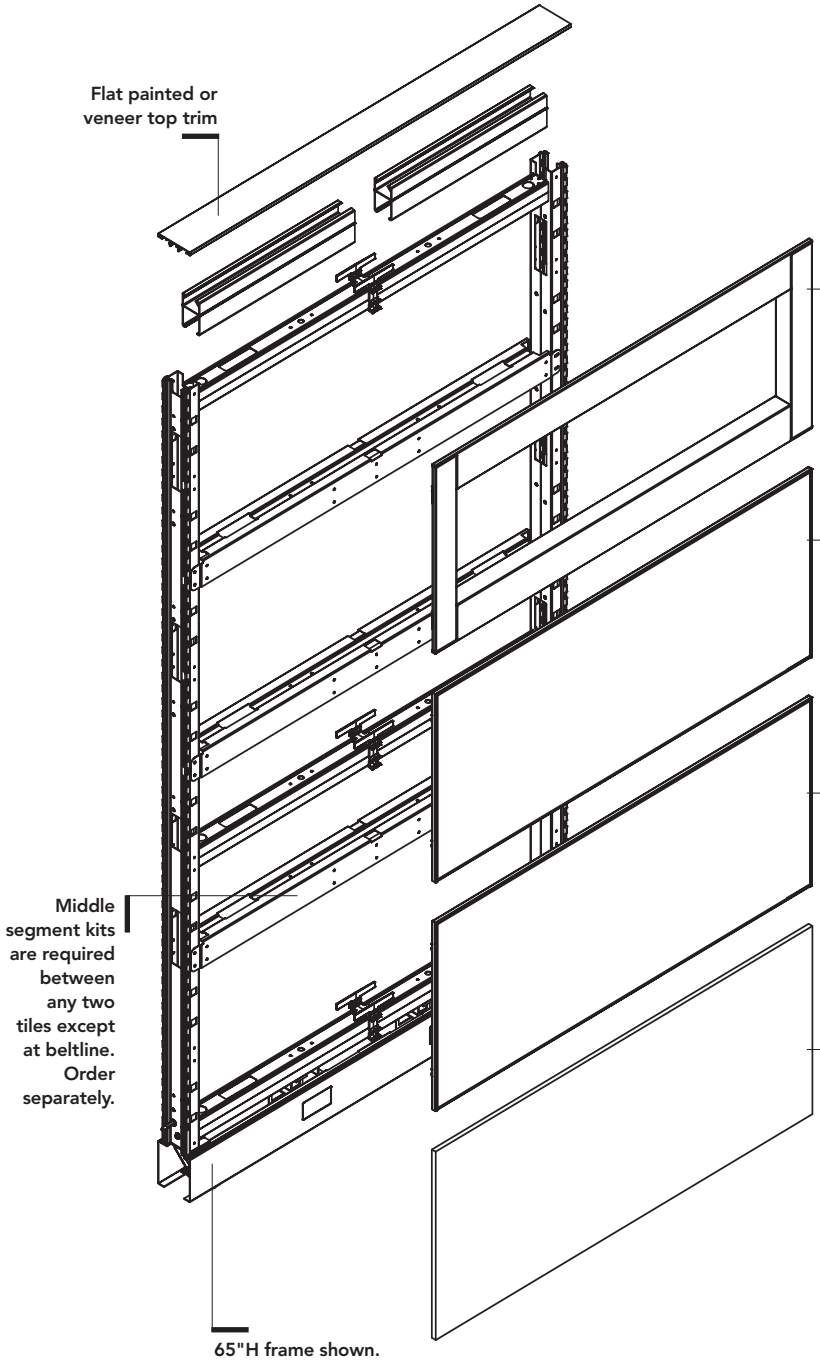
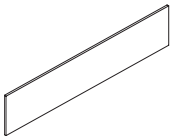
Reference Page

Stride tiles come in a variety of styles. Select the aesthetic* and functional combination that meets your specific requirements.

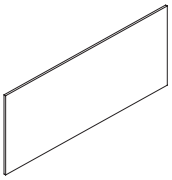
Additional tiles available, see pages 136-141.



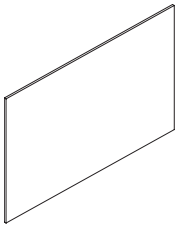
*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting perforated or light colored translucent materials.



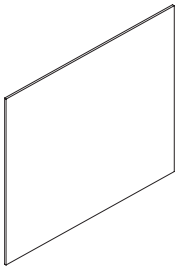
7½"H Tile



15"H Tile



22½"H Tile



30"H Tile

Landscape™ Surface Material is a ¼" thick material that is available for use on tiles, tower sidelights, storage fronts, panel mounted screens, and modesty panels. The Landscape surface material offering for Stride includes: Foundation and Quattro. Refer to the matrix below for usage guidelines.

Foundation
- Foundation is a fabric material laminated between recyclable PETG resin sheets.
- Foundation is available in two color options: Pure White and Sand.

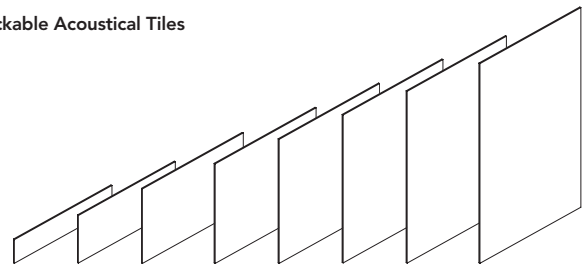
Quattro
- Quattro is fabric laminated between recyclable PETG resin sheets.
- Quattro is available in Platinum.

Frosted Translucent
- Frosted Translucent is ¼" thick Plexiglas acrylic with flat polished edge.
- Frosted Translucent is available in one color option: Frost.

	Tiles	Tower Sidelights	Storage Fronts	Panel Mounted Screens	Desk Screens	Modesty Panels
Foundation	•	•	•			
Quattro	•	•	•			
Frosted Translucent					•	

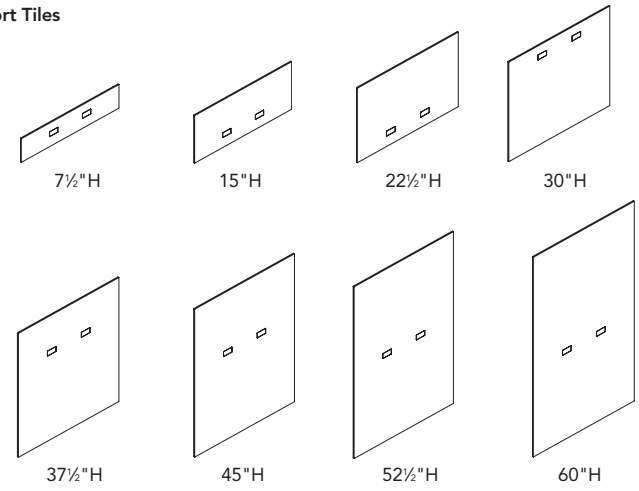
Tiles ship with attachment clips installed. Tiles do not include segment kits, order separately.

Tackable Acoustical Tiles



7½", 15", 22½", 30", 37½", 45", 52½", 60"H

Port Tiles



Coordinate Grommet Color with Paint Color:

Paint Color	Grommet Color

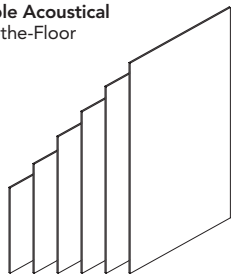
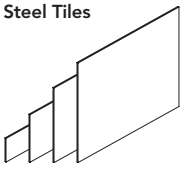
Tackable Acoustical
Tile-to-the-Floor



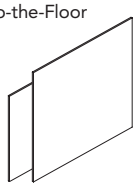
22½", 30", 37½", 45", 52½", 60"H

Steel Tiles



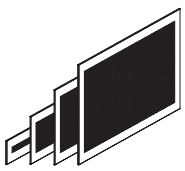
7½", 15", 22½", 30"H

Steel
Tile-to-the-Floor



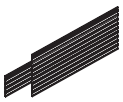
22½", 30"H

Perforated Steel Tiles



7½", 15", 22½", 30"H

Tool Tiles



7½", 15"H

Tackable Acoustical Tiles (pages 158-159)
- Tackable and acoustical. 7½"H-60"H, 20"W-60"W.
- Tiles do not include segment kits — order separately.
- Tiles are level® 2 when a level® 2 fabric is used.

Port Tiles (pages 160-161)
- Receptacle openings with blank covers (1 in 24"W tiles; 2 in wider tiles).
- Receptacle openings have the ability to accept most commercially available modular data plates.
- Tackable and acoustical. 7½"H-60"H, 24"W-60"W.
- Grommet opening dimension is 1.375"H x 2.700"W.
- When using rail based off-modular, ported tile grommets may interfere with frames mounted perpendicular to the spine.
- 7½"-15"H port tiles can be mounted in any position except bottom position on frame.
- 7½"-22½"H are ported in the bottom for use when segmenting.
- 22½"H port tiles can be flipped for below worksurface power access.
- 30"-60"H port tiles are used to position grommets above a worksurface mounted at 29½"H. Designed for use in bottom position, but can be used in any position.
- Tiles do not include segment kits — order separately.
- Tiles are level® 2 when a level® 2 fabric is used.

Tackable Acoustical Tiles to-the-Floor (page 162)
- Tackable and acoustical. 22½"H-60"H, 20"W-60"W.
- Tiles to-the-floor are to be used in the bottom position only.
- Tiles to-the-floor are 5" longer to accommodate to-the-floor applications and replace base raceway cover.
- Tiles do not include segment kits — order separately.
- Tiles are level® 2 when a level® 2 fabric is used.
- Cannot use tiles to-the-floor with footed panel frames.
- Requires simple in field modification to frame glide tower. After modification, base raceway cover cannot be used with fabric or steel tiles.

Steel Tiles (page 163)
- Painted steel construction. 7½"H-30"H, 20"W-60"W.
- Tiles do not include segment kits — order separately.
- Steel tiles can be used in any location.

Steel Tiles to-the-Floor (page 163)
- Painted steel construction. 22½"H-30"H, 20"W-60"W.
- Tiles do not include segment kits — order separately.
- Tiles to-the-floor are to be used in the bottom position only.
- Tiles to-the-floor are 5" longer to accommodate to-the-floor applications and replace base raceway cover.
- Attachment hardware included.
- Cannot use tiles to-the-floor with footed panel frames.

Perforated Steel Tiles (page 164)
- Tiles do not include segment kits — order separately.
- Allows air flow when placed on each side of panel.
- Aesthetics of opposing tile surface and/or frame interior should be considered when selecting perforated steel tiles.
- Should not be used at locations that span horizontal segment kits or at beltline.

Tool Tiles (page 165)
- Sturdy aluminum extrusion.
- Accommodates Extensions™ work tools — weight capacity not to exceed 80 lbs. If monitor arm attached subtract 25 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces and storage.
- Do not segment within the center of the back side of a 15"H tool tile, instead use two 7½"H tool tiles.
- Tiles do not include segment kits — order separately.
- Do not use at top of wall track.

Tiles ship with attachment clips installed. Tiles do not include segment kits, order separately.

Porcelain Marker Board Tiles

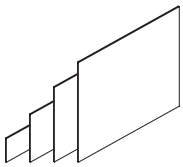
Landscape Surface Tiles



7½", 15", 22½", 30"H
Infinite Spectrum™, Pearlescent Strata, Foundation, Quattro

Handling and care for marker boards:

1. Leaving ink on the board for an extended period of time may lead to images remaining on the board, commonly known as "ghosting," after erasing.
2. To avoid ghosting, thoroughly erase your marker board after every use and clean your board weekly with marker board cleaner.
3. Expo® brand dry-erase markers are recommended for best erasing results.
4. Avoid using red and orange markers for easier cleaning and to reduce the likelihood of ghosting.
5. Do not use permanent or non-dry erase markers.
6. To maintain eraser performance, follow manufacturer's instructions.

Porcelain Marker Board Tiles (page 166)
- White porcelain-coated steel surface encased within a steel frame.
- Accepts magnetic accessories.
- Paint color for frame must be specified.
- Marker boards ship with tile attachment clips installed.
- Tiles do not include segment kits — order separately.
- 15"W magnetic marker board tray that is natural aluminum is available. Order model TK4TRAYMS separately.
- For everyday cleaning of dry-erase marker ink, use Clorox wipes. Should a permanent marker be used, a citrus cleaner such as Quartet will remove the ink. Note that a citrus cleaner is not recommended for everyday cleaning as it leaves a residue on the marker board.

Steel Marker Board Tiles (page 166)
- White marker board tile; painted steel surface.
- Accepts magnetic accessories.
- Tiles do not include segment kits — order separately.
- 15"W magnetic marker board tray that is natural aluminum is available. Order model TK4TRAYMS separately.
- For everyday cleaning of dry-erase marker ink, use Clorox wipes. Should a permanent marker be used, a citrus cleaner such as Quartet will remove the ink. Note that a citrus cleaner is not recommended for everyday cleaning as it leaves a residue on the marker board.

Landscape Surface Tiles (page 167)
- ¼" material encased within a painted steel frame.
- Paint color for frame must be specified.
- Tiles do not ship with segment kits — order separately.
- Should not be used at locations that span horizontal segment kits or at beltline.
- Available in Foundation™ and Quattro.

Laminate Tiles (page 168)
- Laminate construction, available in all standard laminate finishes.
- Tiles do not include segment kits — order separately.
- Grain direction runs vertical on all sizes.

Laminate Tiles to-the-Floor (page 168)
- Laminate construction, available in all standard laminate finishes.
- Tiles to-the-floor are to be used in the bottom position only.
- Tiles to-the-floor are 5" longer to accommodate to-the-floor applications and replace base raceway cover.
- Do not use tiles to-the-floor with footed panel frames.
- Tiles do not include segment kits — order separately.

Single Pane Glass Tile Kits (page 169)
- Kit includes single pane of tempered safety glass for one side of frame and trim for the other side of frame.
- Glass is flush on one side.
- Tiles do not include segment kits — order separately.
- Kits ship with tile attachment clips installed.
- Attachment hardware included.
- Should not be used at locations that span horizontal segment kits or at beltline.
- Low profile glass stacker kits also available.

Pass-Thru Trim Kits (page 169)
- Painted steel frame.
- Open frame without tiles, used for ability to pass objects from one side of frame to the other.
- Segment kits not included — order separately.
- One kit accommodates both sides of panel frame.
- Attachment hardware included.
- Should not be used at locations that span horizontal segment kits or at beltline.

Stride Stratawood and Natural Veneer

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next, even though they are finished at the same time. Exposure to light and the aging process will cause darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Therefore, Allsteel does not guarantee the exact matching grain, pattern and color.

Stride veneer trim, connectors, tiles and storage fronts are offered in Stratawood (composite) finishes and in Natural veneer finishes. (See page 118 for finishes.)

Stride Stratawood and Natural veneer worksurfaces are protected by one of the world's most advanced wood finishing process by Gunlocke®. It provides the ultimate in scratch, stain, chemical, and heat resistance for these high-wear surfaces. The jewel-like clarity and depth allow the natural beauty of the wood to glow through.

Stratawood Veneer Vs. Natural Veneer: Which is best for you?

Stratawood and Natural veneer have similarities and differences. Both options provide a wood surface. Exposure to light will cause both options to darken. Both Stratawood and Natural veneer will be a stylish addition to any specification. However the look, feel and process for Stratawood and Natural veneer are different.

Stratawood Veneer

Stratawood veneer features a repeatable straight-grain pattern, absent of the cathedrals seen in Natural veneer. Although slight differences in tone should be expected, the Stratawood pattern will maintain a consistent appearance across all products.

Stratawood veneer is an engineered wood veneer enhanced by technology for consistency in both color and grain pattern resulting in very few defects.

Although exposure to light will cause Stratawood veneer to darken slightly, additional orders at later dates will match existing product pattern and will match the color when matured. This creates a smooth process for adding on to existing installations.

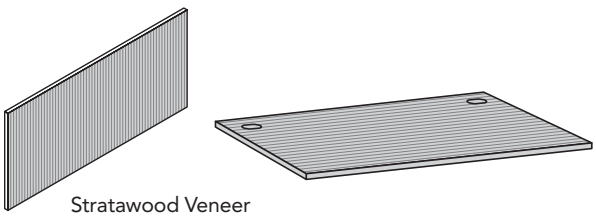
Natural Veneer

Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and can not be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.

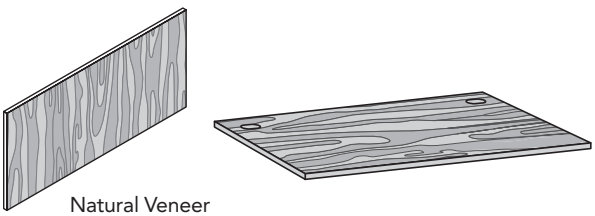
Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of the existing product. Even with this maturation process the additional product may not be an exact match.

When ordering Natural veneer tiles for Stride frames, please refer to pages 140-141 for information. Natural tiles sets must be ordered to ensure grain pattern matching. All panels with two or more continual natural veneer segments will need to be ordered as a set and will be grain matched for consistency. These tile sets must remain together throughout the manufacturing and installation process.

Natural veneer worksurfaces may exhibit a color variance between the surface and the edge detail or when butted together at a 90 degree angle. This natural phenomenon is called polarization (or grain flip) which alters the color and appearance of adjacent worksurfaces with grain running perpendicular. The appearance of wood veneer may change slightly depending on what angle it is viewed from, although it is most often noticed on worksurfaces installed at 90 degree angles to each other. For your guidance, please see illustrations within the worksurface section when specifying for an understanding of grain direction in your installation.



Stratawood Veneer



Natural Veneer

Caring for your Veneer finish:

- General maintenance procedures entail wiping clean the entire surface with a clean, water dampened soft cloth once per week. (Be sure to wipe with the grain.)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately.

Veneer on Stride

2 Different Veneer Types

Natural veneer is subject to nature's quality control. Each specimen will exhibit differences in grain pattern and tone. This is to be expected, and, in fact contributes to the individuality of each product.

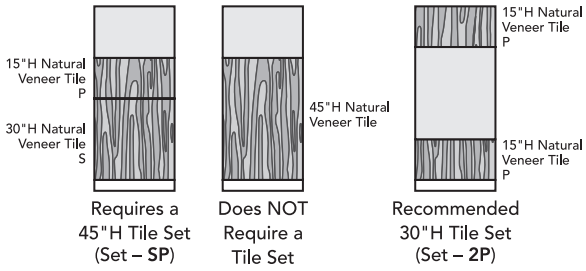
Stratawood veneer features a straight-grain pattern, absent of the cathedrals seen in natural veneer. Although slight differences in tone should be expected, the Stratawood pattern will maintain a consistent appearance across all products.

Veneer Finish Options

See page 118 for available finishes and finish indicators in both Natural and Stratawood.

Natural Veneer Tile Sets for Stride

- Natural veneer tile sets are used when 2 or more natural veneer tiles are vertically adjacent to each other on the same panel (see illustration below) in order to maximize the beauty of real wood and carry the grain pattern from tile to tile.
- Tile sets do not apply to Stratawood tiles, as the grain pattern is consistent from tile to tile.



Specifying Standard Natural Veneer Tile Sets

1. Determine the height of the natural veneer tile set.
   a. The total height of tile required can be calculated by deducting 5" (the height of the frame base) from the nominal panel height.
   b. To calculate set height simply add the heights of the tiles in the set (for example, one 15"H tile and one 30"H tile would require a 45"H tile set — see illustration above).
2. Natural veneer to-the-floor tile sets are available following regular sets.
   - A 45"H Natural veneer to-the-floor tile set will fully fill a 50"H frame.
   - A 52½"H Natural veneer to-the-floor tile set will fully fill a 57½"H frame.
   - A 60"H Natural veneer to-the-floor tile set will fully fill a 65"H frame.

Note

1. Tile sets MUST remain together throughout the installation process in order to maximize the beauty of real wood and carry the grain pattern vertically from tile to tile.
2. The backside of each tile in the tile set is marked with a set number so that the tiles comprising that specific set do not get confused with any other natural veneer tile sets.
3. The backside of each tile in the tile set with a letter denoting the placement of each tile in the set. The tile marked A is the top tile in the set, followed by B, C, and so on.

Reference Page

Natural Veneer Tile Set Position Options Chart

Natural Veneer Tile Sets	Nominal Panel Height	Natural Veneer Tile Set Code	Tile Set Height	Tiles Included (bottom to top)
	35"H	2P	30"H	PP
	42½"H	QP	37½"H	QP
	50"H	3P	45"H	PPP

Veneer Tiles (page 170)
- Veneer tiles produced by Gunlocke® available in Stratawood or Natural veneer.
- Stratawood veneer has a consistent straight-grain pattern.
- Natural veneer will have cathedrals and as a natural material is subject to nature's quality control with variations in grain pattern and tone.
- Tiles do not include segment kits — order separately.
- Veneer tiles, kits, and tile sets all ship with attachment clips installed.
- If two or more natural veneer tiles are vertically adjacent, Natural veneer tile sets should be ordered to carry the grain pattern.
- Grain direction runs vertical on all sizes.

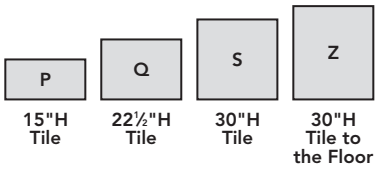
Veneer Tiles to-the-Floor Kits (page 171)
- Tiles do not include segment kits — order separately.
- Tiles to-the-floor are to be used in the bottom position only.
- Tiles to-the-floor are 5" longer to accommodate to-the-floor applications.
- Tiles to-the-floor replace base raceway cover.
- Tiles to-the-floor cannot be used with footed panel frames.

Natural Veneer Tile Sets (pages 172-173)
- Specify when two or more natural veneer tiles are adjacent to carry the vertical grain pattern from tile to tile.

Veneer to-the-Floor Tile Sets (page 174)
- Specify when two or more natural veneer tiles are adjacent to carry the vertical grain pattern from tile to tile.
- Veneer to-the-floor tile set are 5" longer to accommodate to-the-floor applications.
- Veneer to-the-floor tile sets replace base raceway cover.
- Veneer to-the-floor tile sets cannot be used with footed panel frames.

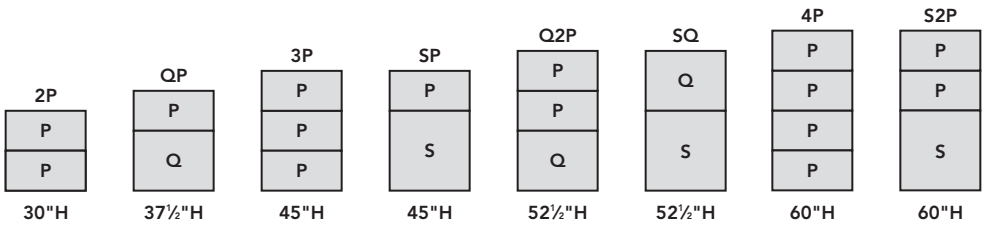
Natural Veneer Tile Sets

Tile Height Codes used for Natural Veneer Sets below:

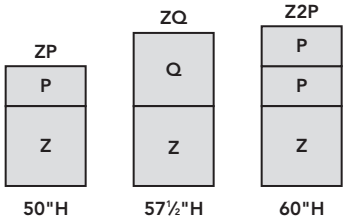


Letters on tiles represent height of individual tiles, see codes above.

Ordering code is listed above each tile set, and total height of set is listed below.

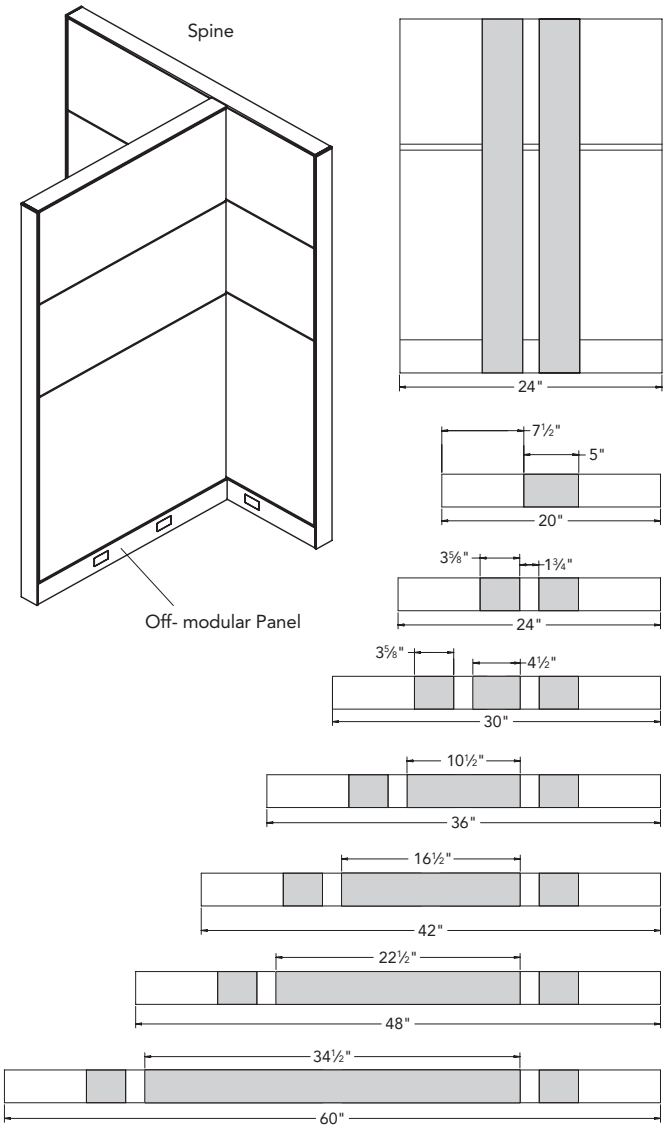


Veneer to-the-floor tile sets have a base tile that is 5" longer to accommodate "to-the-floor" applications.



STRIDE

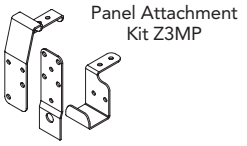
Reference Page



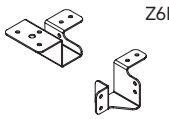
Shaded area indicates acceptable location for off-module connector when using electrical power harnesses.

Off-Module Non-Rail Based Connector Guidelines

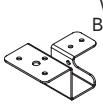
- Off-module connector kits join panels off-module at 90° angles. The total 3" panel thickness must be positioned within the confines of the shaded areas, as depicted in the illustration, but cannot be positioned directly over electrical cutouts in the frame horizontal.
- Tiles and base pathway covers cannot be removed from the face of a panel to which an off-module connected panel is mounted.
- Base panel frames must be the same height.
- Do not stack on an off-modular return panel.
- Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.
- Use data port (model UTP) to route data and electrical between primary panel run and panel-mounted off-modular.
- Panel mounted screens or low profile glass stackers cannot be used on the parent run or on an off-modular panel.
- Footed panel frames can be used on the spine wall but cannot be used as the off-modular panel frame.
- To-the-floor tiles cannot be used on the side of the spine wall where off-modular return panel is attached.



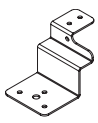
Panel Attachment Kit Z3MP



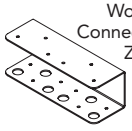
End Panel Kit Z6EPK



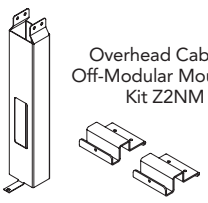
Worksurface Bracket Z6MK



3" Layered Worksurface Bracket Z6Z3MK



Layered Worksurface Connection Bracket Z6C3BK



Overhead Cabinet Off-Modular Mounting Kit Z2NM

Off-Modular Non Rail-Based Accessories

Panel Attachment Kit (page 175)
- Connector allows for off-module connection, does not add to length of run.
- Black only.

End Panel Kit (page 175)
- Used to attach an end panel off-modular.
- Bracket requires a segmented panel at 22½"H for mounting.

Worksurface Bracket (page 175)
- Allows in-line support legs and end-panels to be attached off-module.
- Bracket requires a segmented panel at 22½"H for mounting.
- Cannot be used closer than 12" from end of panel.

3" Layered Worksurface Bracket (page 175)
- Used to mount off-modular worksurface at 26½"H.
- Bracket requires a segmented panel at 22½"H for mounting.

Layered Worksurface Connection Bracket (page 175)
- Used to attach a worksurface 3" higher or lower to an installed worksurface.

Overhead Cabinet Off-Modular Mounting Kit (page 175)
- Used to mount overhead cabinet on a panel which is up to 18" narrower than cabinet width.
- Requires one side of cabinet to be held on module.

For specification information see pages 124-130.

How to specify —

Select the Panel Frame Model Number from above.

Z 0 ⌴⌴⌴⌴

1st Option:

Select the Base Option:

WR Without Top Trim; With Raceway Cover Knockouts on both sides

WN Without Top Trim; With Raceway Cover Knockouts on 1 side.

WF Without Top Trim; With Footed Panel Frame.

⌴⌴ .

2nd Option:

Select the Paint Color:

P1 P2 P3

See page 118 for finishes.

For P2 Paints — add $26.

For P3 Paint — add $50.
Footed frames not available in P3 paint.

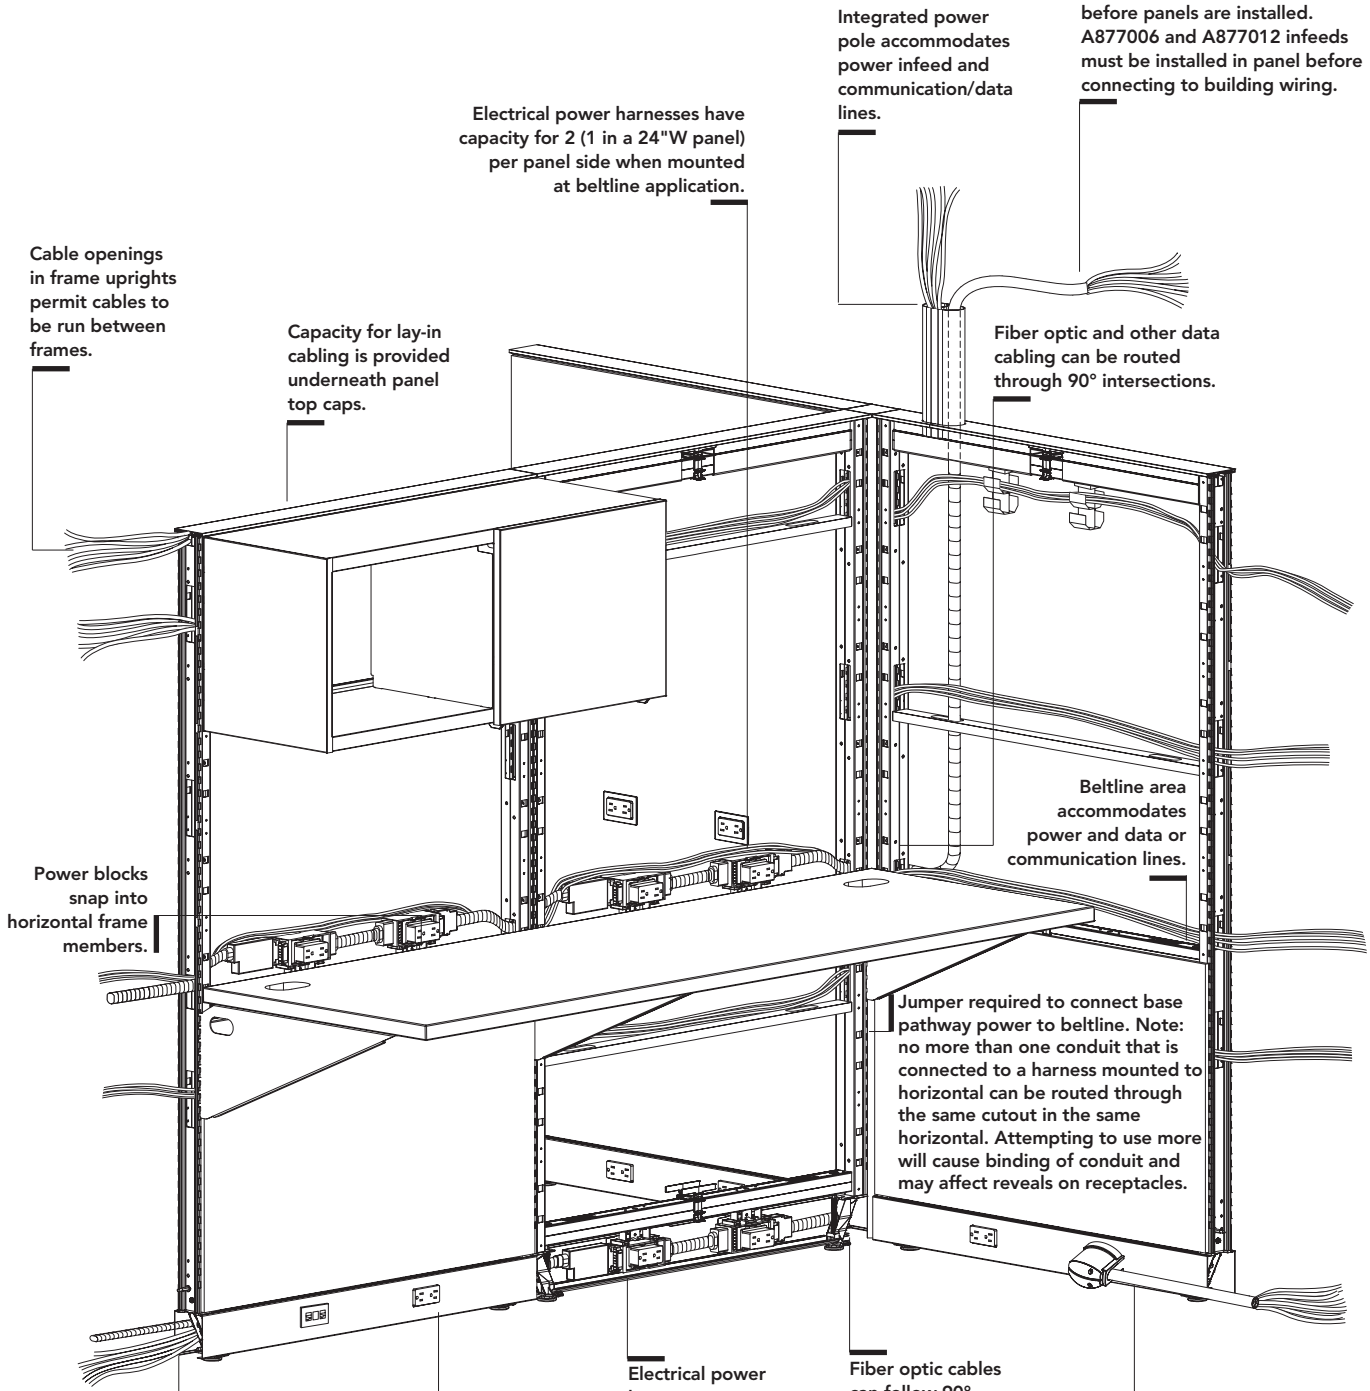
Reference Page

Stride features high capacity for cable management, including electrical, voice, and data capabilities. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.



Electrical Systems

Stride electrical offers a choice of four electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- Eight circuits; two four-circuit systems provided back-to-back.

- See pages 179-180 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (16 amps plan-able U.S. and 15 amps Canadian).
- Stride panels and electrical components are UL Listed. Electrical components are also CSA certified. PVC-free models are C2C certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Hardwire New York Code (page 188)

- **Hardwire (New York Code) junction box** (model A871400C) is used when local electrical codes require hardwire entry.
- For use in panels 30"W to 60"W.
- When used in 30"W and 36"W panels, power can be routed only in one direction.
- When used in 42"W, 48"W, and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction.
- Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.

Hardwire Chicago Code (page 190)

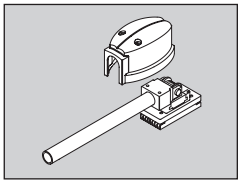
- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- For the base pathway, junction box (model 877600) clips directly into receptacle locations and can be used both single- and double-sided.

- In the beltline location, junction box (model 877550) can only be used single-sided.
- Base pathway model has a larger volume capacity for wiring to allow for dual-sided applications.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.
- Tiles at the beltline must be field ported.
- Power entry can be routed from the ceiling, via a Stride power pole, or from the floor into a junction box (beltline model 877550; or base pathway model 877600).

Electrical Infeeds

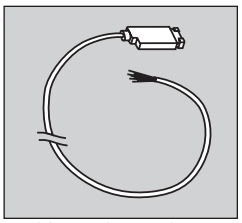
- **Power infeed cables** deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

Base Infeed (page 188)



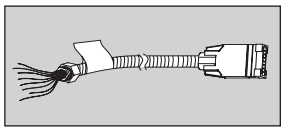
- **Sealtight base pathway power infeed** attaches to any receptacle opening at the base pathway.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.
- A jumper is required to connect base pathway power to beltline.

Sealtight Electrical Infeed Cable (page 188)



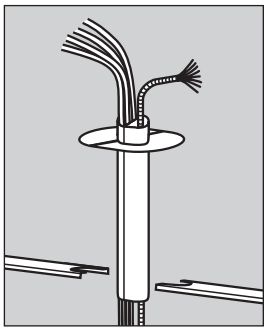
- **Sealtight electrical infeed cable** is used with footed panels.
- Should not be ordered prior to installation to have prewired as infeed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that infeed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

Ceiling Power Infeed (page 188)



- **Ceiling power infeed** connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole.
- For use with integrated power pole models Z235PP and Z265PP.
- Can also be used as infeed for footed panels.
- Most codes permit flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

Integrated Power Pole (page 188)



- **Integrated power and communications poles** provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap.
- Power pole has a cavity on each side of a center septum.
- See page 185 for cable capacity.
- When using a ceiling power infeed, consider that the infeed must connect into an electrical harness located in an adjacent panel.
- Integrated power pole will not work with low profile glass stackers, panel mounted glass screens, or panel mounted screens.
- Avoid glass or translucent tiles in upper position of frames with integrated power poles.

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The Three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The Eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated, and Separate Neutrals circuits.
4. Specify appropriate Power Harnesses* and Pass-Thru Cables.*
5. Determine the location, quantity, and type of Power Infeeds needed.

Reference Page

* Select Power Harness models (A8712XX), Pass-Thru Cables (A8710XX) and Pass-Thru Harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L" and Extended Straight Connectors.

Flexconnect™ Electrical System Options

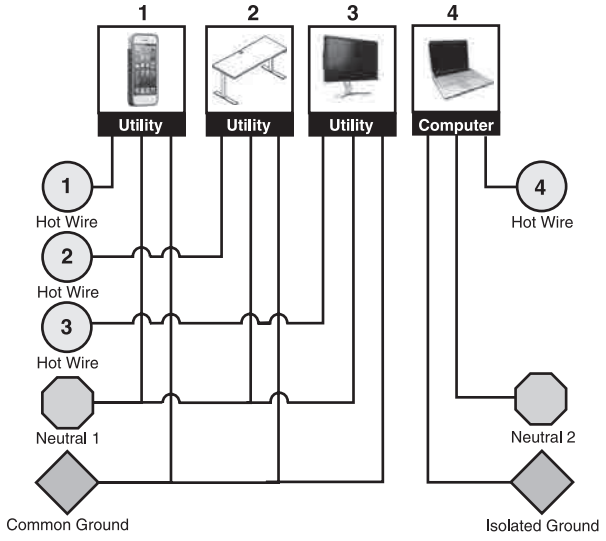
The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same prewired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix.

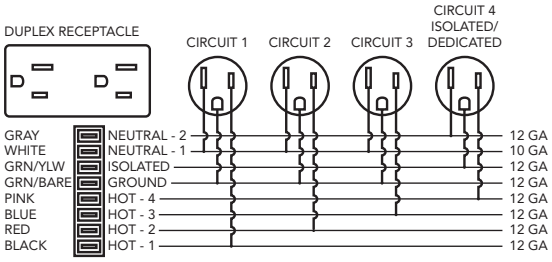
All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 70.

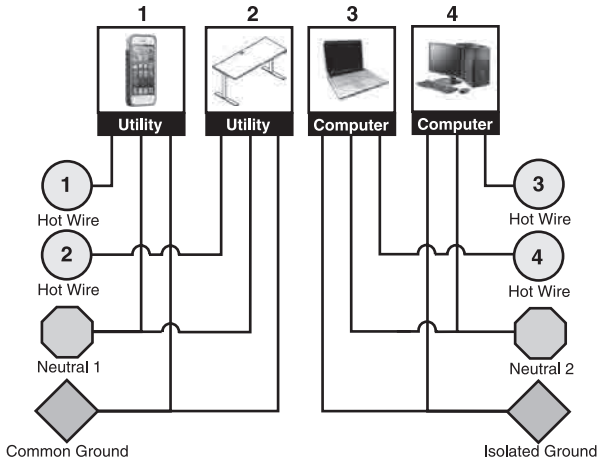
Four-circuit, 3 + 1 Receptacle Option



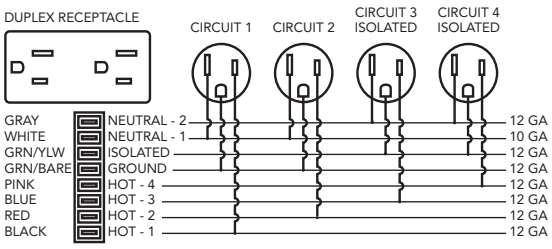
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



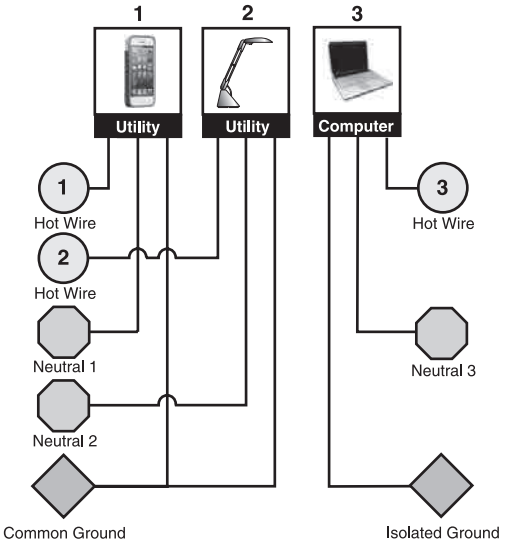
Four-circuit, 2 + 2 Receptacle Option



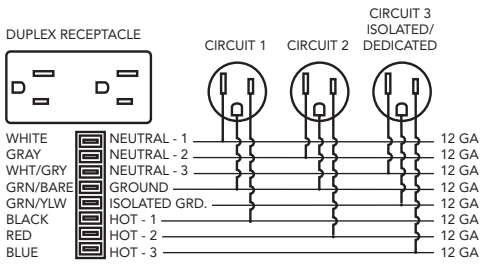
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Stride System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A877501**	Common Circuit-2 (1) **A877502**	Common Circuit-3 **A877503**	Iso/Dedicated Circuit-4 **A877504**
	2 + 2	Common Circuit-1 **A877501**	Common Circuit-2 **A877502**	Isolated Circuit-3 **A877506**	Isolated Circuit-4 **A877504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A877501A**	Common Circuit-2 **A877502A**	Iso/Dedicated Circuit-3 **A877503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel Model Numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

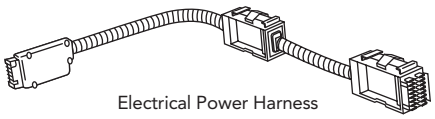
Duplex Receptacle

15 amp Receptacle

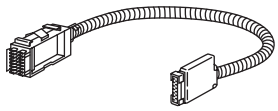
STRIDE

Power Harnesses, Pass-Thru Cables, and Jumpers

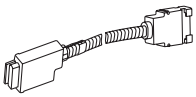
Electrical power harnesses are used to distribute power in Stride panels. Harnesses can be mounted at the base pathway and at 7½" vertical intervals above the base pathway using mounting brackets or power block beltline mounting brackets. **Power blocks** on electrical power harnesses and pass-thru harnesses accept duplex receptacles.



Electrical Power Harness

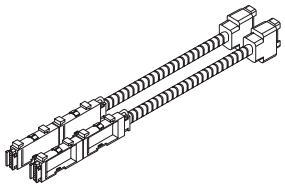


Electrical Pass-Thru Harness



Electrical Pass-Thru Harness without Power Block

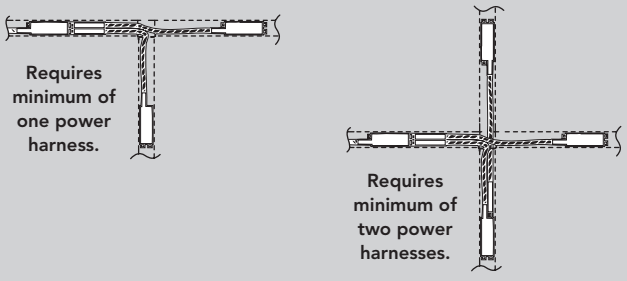
Electrical Jumper Cables



Dual Electrical Eight-circuit Power Harness Kit

All electrical power harnesses and pass-thru harnesses (except 20"W) will stretch 3½", allowing them to span "T", "X", and "A" intersections and "S" extended straight connections.
Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.

Use of a ceiling infeed or jumper requires one additional harness.



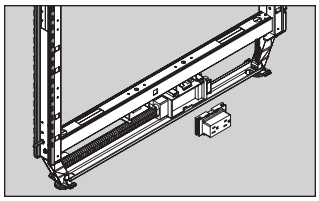
Power Harnesses (page 189)
- Specify harness length to match panel width. 24" power harnesses accept one receptacle on each side of the harness when exposed, all other power harnesses have power blocks to accept four duplex receptacles (two on each side of panel).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in base pathway; at beltline or other vertical locations harnesses require optional mounting brackets.

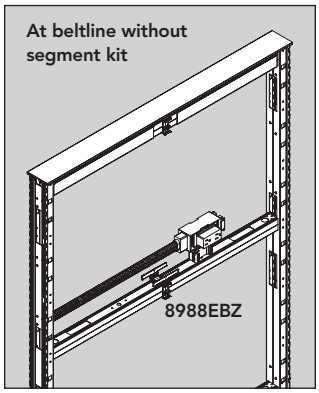
Pass-thru Harnesses (page 189)
- Electrical pass-thru harnesses have capacity to handle one duplex receptacle on each side of panel.
- Electrical pass-thru harnesses distribute power in panels — specify harness length to match panel width.
- Electrical pass-thru cables distribute power through any panel where receptacles are not required.
- 20"W frames use 20"W pass-thru cables since they do not have electrical knockouts or ported tiles. Cable length cannot be stretched.

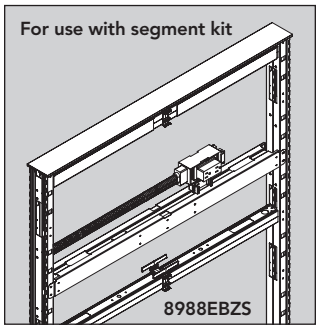
Jumper Cables (page 189)
- Electrical jumper cables connect power from base pathway or beltline to a harness located on any horizontal member as needed.
- Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.
- Model A871366 is 66" and connects beltline power harnesses at 90° juncture to adjacent base line power.
- Model A8713108 is 106" to jumper up to 69" vertically – from base rail up to the highest 7½" opening on an 65"H frame.

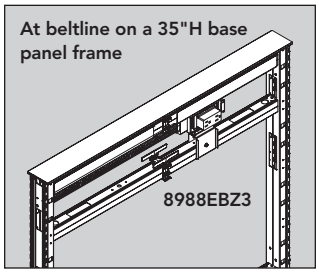
Dual Electrical Eight-circuit Power Harness Kits (page 189)
- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables
- Requires two four-circuit infeeds. Uses four-circuit receptacles.
- Models must be positioned "back-to-back" in the panel — single-side use is not permitted
- Components can only be routed in a single run — a single run cannot branch to multiple panel runs at "T" and "X" junctions.
- Four-circuit jumper cables (A8713xx) can only be connected to a power block at one end of a run. Power cannot be routed between a run in the base pathway and a run in the beltline area, except at one end of the run.
- To connect power between the base pathway and the beltline area, four-circuit jumper cables (A8713xx) must be connected to a power block at one end of a run, routed into an adjacent panel that contains no power harness, then routed back into the panel that contains a power harness (or pass-thru cable), and connected to a power harness in the other pathway.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to-back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity
- Two power infeeds are required to connect the back-to-back runs. Power infeed A8719xx must be connector to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed
- Power infeeds A8719xx must be routed from a panel wherein no power harness is positioned, into an adjacent panel where a power harness is positioned and connected to the end of a power block.

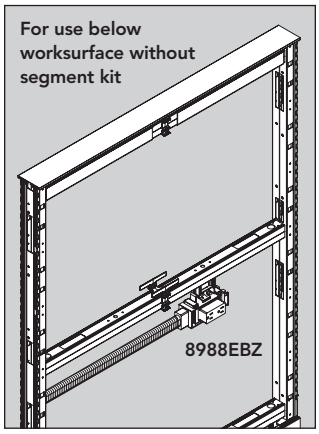
Power Blocks











Stride offers multiple options for mounting electrical:

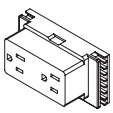
Base Pathway Mounting
- Power blocks snap directly onto brackets in base pathway area and accept receptacles on each side of harness.

Beltline Mounting Brackets (page 190)
- For exposed receptacles at beltline mount power blocks onto electrical mounting bracket (8988EBZ or 8988EBZ3 for 35"H base panel frames — sold separately) which screw into the panel frame or segment kit.
- Port tiles must be used where exposed receptacles will be located.

Segment Kit Mounting Brackets (page 190)
- When using segment kits at other locations mount power blocks onto electrical mounting bracket (8988EBZS — sold separately) which screw into segment kit.
- Port tiles must be used where exposed receptacles will be located.

Below Worksurface Mounting Brackets (page 190)
- When using a 22½" ported tile for power below the worksurface, use beltline electrical mounting bracket (8988EBZ — sold separately) and mount the bracket underneath the standard beltline horizontal.

Receptacles



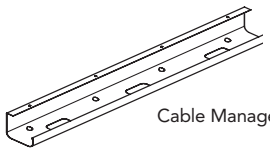
Duplex Receptacles

Receptacle Color Recommended to Coordinate with Paint Color

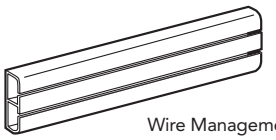
Paint Color	Receptacle Color
Bungalow P7C	Muslin — EU
Carob — P52	Black — E4
Champagne Metallic — PR5	Muslin — EU
Cinder P7Q	Brownstone — EY
Fossil — P28	Flint — E9
Gunmetal Metallic — PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Pebble P8R	Loft — EV
Pewter P8D	Flint — E9
Platinum Metallic — PR2	Loft — EV
Salt P8C	Silver — ES
Titanium P8T	Silver — ES

Duplex Receptacles (page 190)
- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses.
- Duplexes are available in multiple colors. See page 118 for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical infeed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical infeed.

Cable and Wire Management

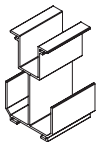


Cable Management Tray

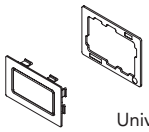


Wire Management Channel

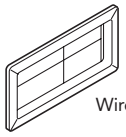
Cord Retainer Clip



Data Management Organizer



Universal Tile Port Kit



Wireway Grommet

Cable Management Tray (page 190)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 190)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

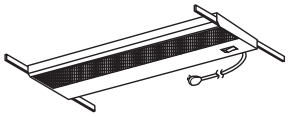
Cord Retainer Clip (page 190)
- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each task light cord.

Data Management Organizers (page 190)
- **Cable organizers** are made of rigid polymer, and hang from the horizontal cross members or in the base raceway. Can be stacked infinitely.
- Cables can be placed into the extensions of the organizers to keep cables aligned as they pass through the panel frame.
- Commercially available tie-wraps can also be used to strap cables to the organizer extensions.
- Organizers are ordered separately in packs of 20.

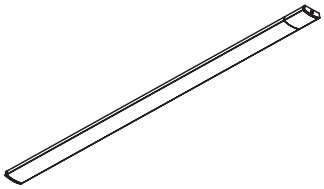
Universal Tile Port Kit (page 190)
- Allows field installation of additional data accessories.
- Grommet opening dimension — 1.375"H x 2.700"W.

Wireway Grommet (page 190)
- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

Lighting



Task Lights



Undercabinet LED Light

Task Lights (page 407)

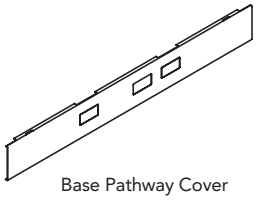
- Task lights can be recessed under storage cabinets or storage shelves, panel-hung, or freestanding.
- Three styles of recessed task lights in four sizes are available to correspond to cabinet or shelf width.
- All styles have 9' power cords in black, connected in the right rear corner.
- All models feature electronic ballast for longer bulb life and cooler operating temperature.
- Task lights with a fused plug to meet Chicago electrical code are also available.

Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

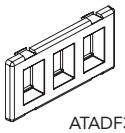
Undercabinet LED Light (page 407)

- Undercabinet LED light can be mounted beneath overhead cabinets with wood screws or magnets.

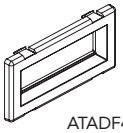
Data



Base Pathway Cover



ATADF3



ATADF4

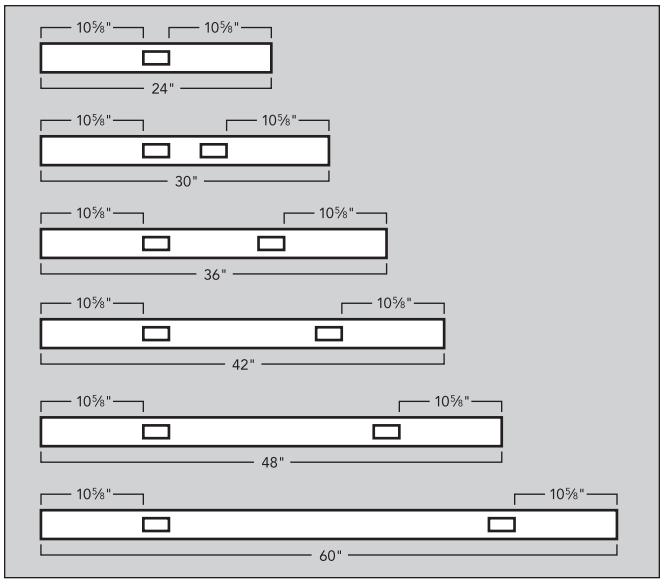
Base Pathway Covers (page 191)

- Features an additional knockout (offset) for improved utilization of power and data. Knockouts are 2.700"W x 1.377"H.
- Due to panel depth, back-to-back data modules should not be used at beltline or in the base on Stride.

Data Faceplates (page 191)

- Fit into receptacle and data port openings in base raceway covers or into data port (UTP).
- Due to panel depth, back-to-back data modules should not be used at beltline or in the base on Stride.

Base Pathway Receptacle Locations



Circuit Usage

Strategy 1
Circuits to Equipment
Assign specific uses for each of the circuits. For example, in a four-circuit system:

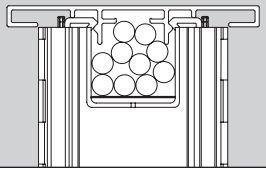
- Circuit 1 — calculators, fans, etc.
- Circuit 2 — task lights (could be wired to wall switch)
- Circuit 3 — CRT or flat screen monitors
- Circuit 4 — CPUs

Strategy 2
Circuits to Workstations
Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

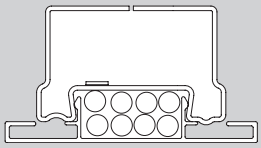
Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

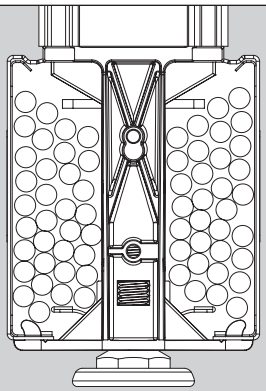
Lay-in Cable Capacity — Stride cable quantities listed at 60% fill ratio

Top Pathway (side view)
Up to 10 voice/data cables (.25" dia).

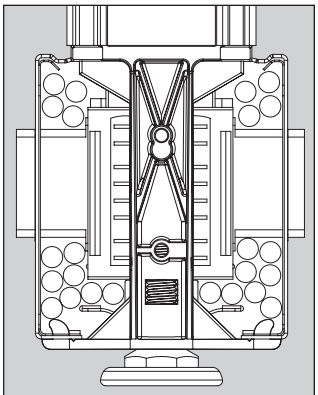


Variable Height Junction (top view)
Up to 8 voice/data cables (.25" dia).



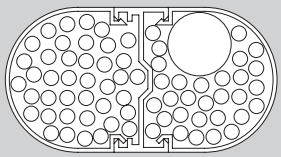


Base Pathway without electrical (side view)
Up to 68 voice/data cables (.25" dia).



Base Pathway with electrical (side view)
Up to 24 voice/data cables (.25" dia).

Power Pole (top view)

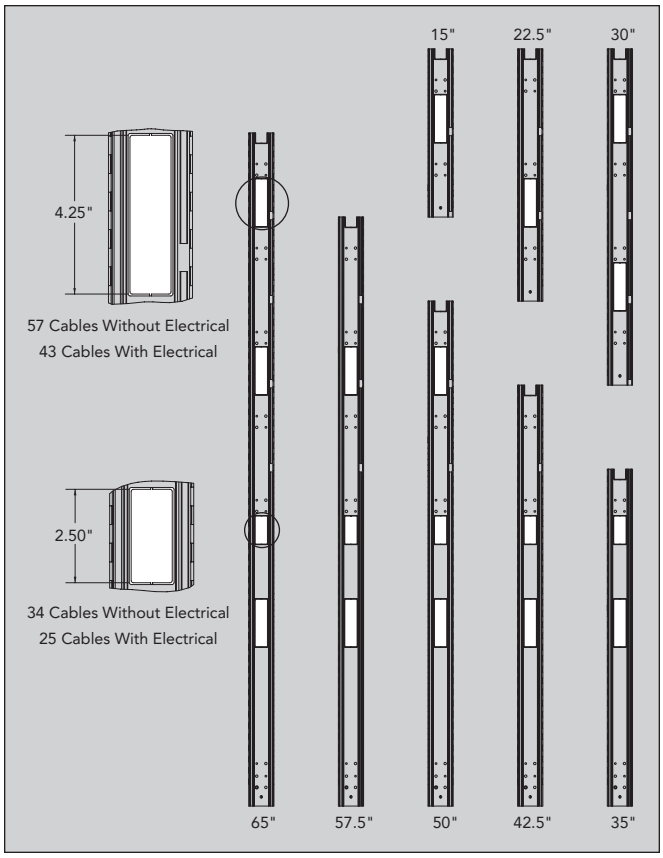


Up to 69 voice/data cables (.25" dia).

The top and base pathway allow continuous voice and data lines to run through and between panels without interruption. Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.

- Stride panels top pathway accepts up to 10 voice/data cables (.25" dia).
- Stride panels variable height junctions accept up to 8 voice/data cables (.25" dia.) with a bend radius of approximately ½" to ¾".
- Stride panels base pathway accepts up to 68 (5.56 sq. in.) voice/data cables (.25" dia.) when electrical system is located in beltline pathway.
- When electrical system shares base pathway, the cable capacity in Stride panels is reduced to 24 (1.95 sq. in.) voice/data cables (.25" dia.) Cable quantities listed are at 60% fill ratio.
- Cable capacity of the Stride power pole, in addition to electrical infeed, is 2.79 sq. in. on one side and 2.91 sq. in. on the other for a total capacity of 69 cables of .25" diameter. Cable quantities listed are at 60% fill ratio.

Horizontal Capacity of Stride Frames

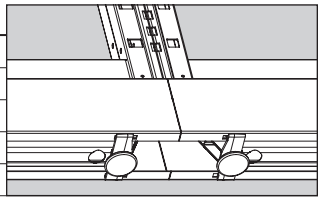


DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

String-in Capacity

- Openings in frame sides permit data and communication cables to be run between frames at up to five levels in a 65"H Stride frame.
- Using tackable acoustical tiles, each opening accommodates up to 57 cables (.25" dia) and the beltline pathway accommodates 25 cables with electrical components installed.
- Cables can enter/exit panel through underside of base pathway at juncture between frames. Openings are sized as follows::

Stride Connections	Sq. In.
Straight	5.4
"S" Extended Straight	12.9
"L" 90°	13.0
"T"	16.6
"X"	20.4



- When leveling glides are fully retracted, panel-to-floor clearance is 7/16". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

Vertical Capacity

Vertical Capacity Through Stride Panel Frames

	Panel Width	Qty of .25" Cables at 40% Fill Ratio	Qty of .25" Cables at 60% Fill Ratio	Total Space (sq. in.)
Stride	24" – 60"W	46	60	4.90

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

Office Equipment Typical Load Values

Item	*Amps
Desktop Computer/2 Monitors	4
Laptop Computer	1
Laptop/2 Monitors/Docking Station	4
Paper Shredder	1.22
Radio	0.05

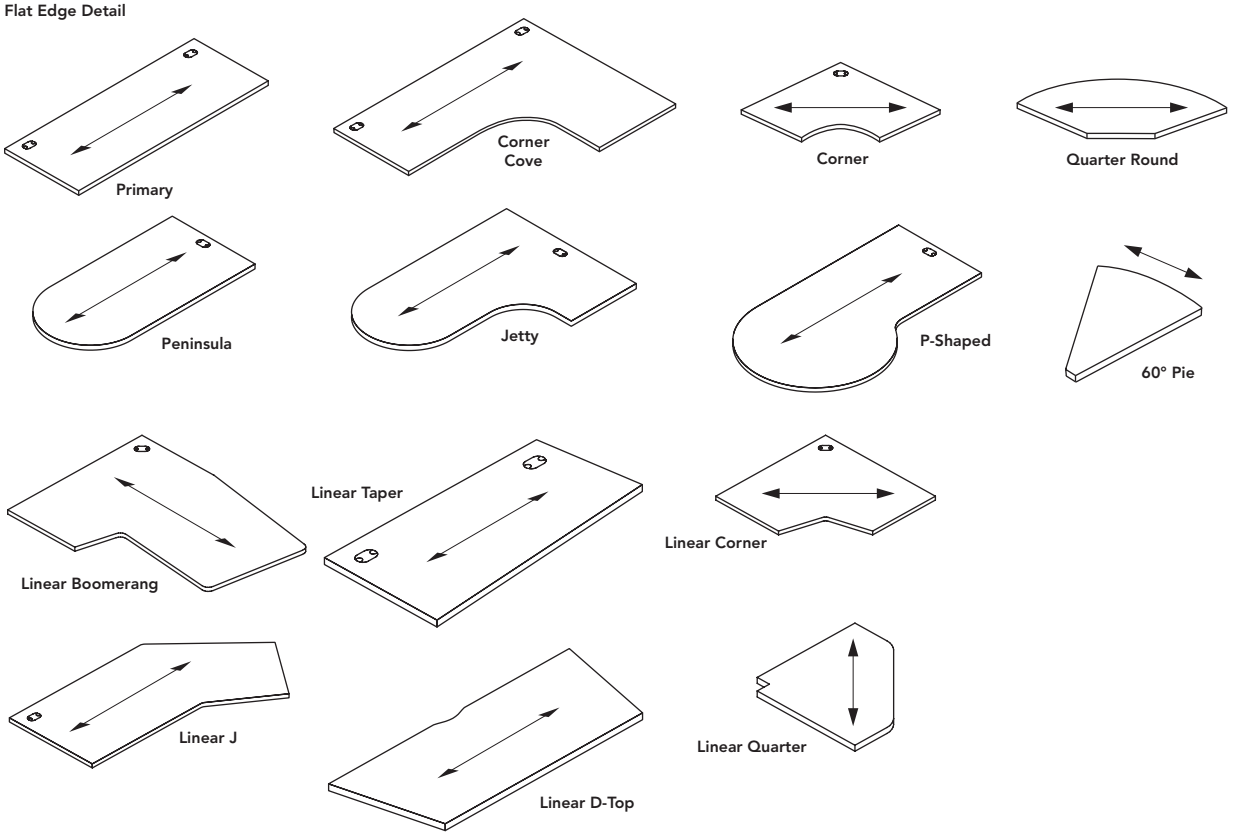
Laminate with Flat Edge or Veneer with Square Edge Worksurfaces

Flat Edge Detail



Note: Add suffix "N" to model number for no grommets, no upcharge.

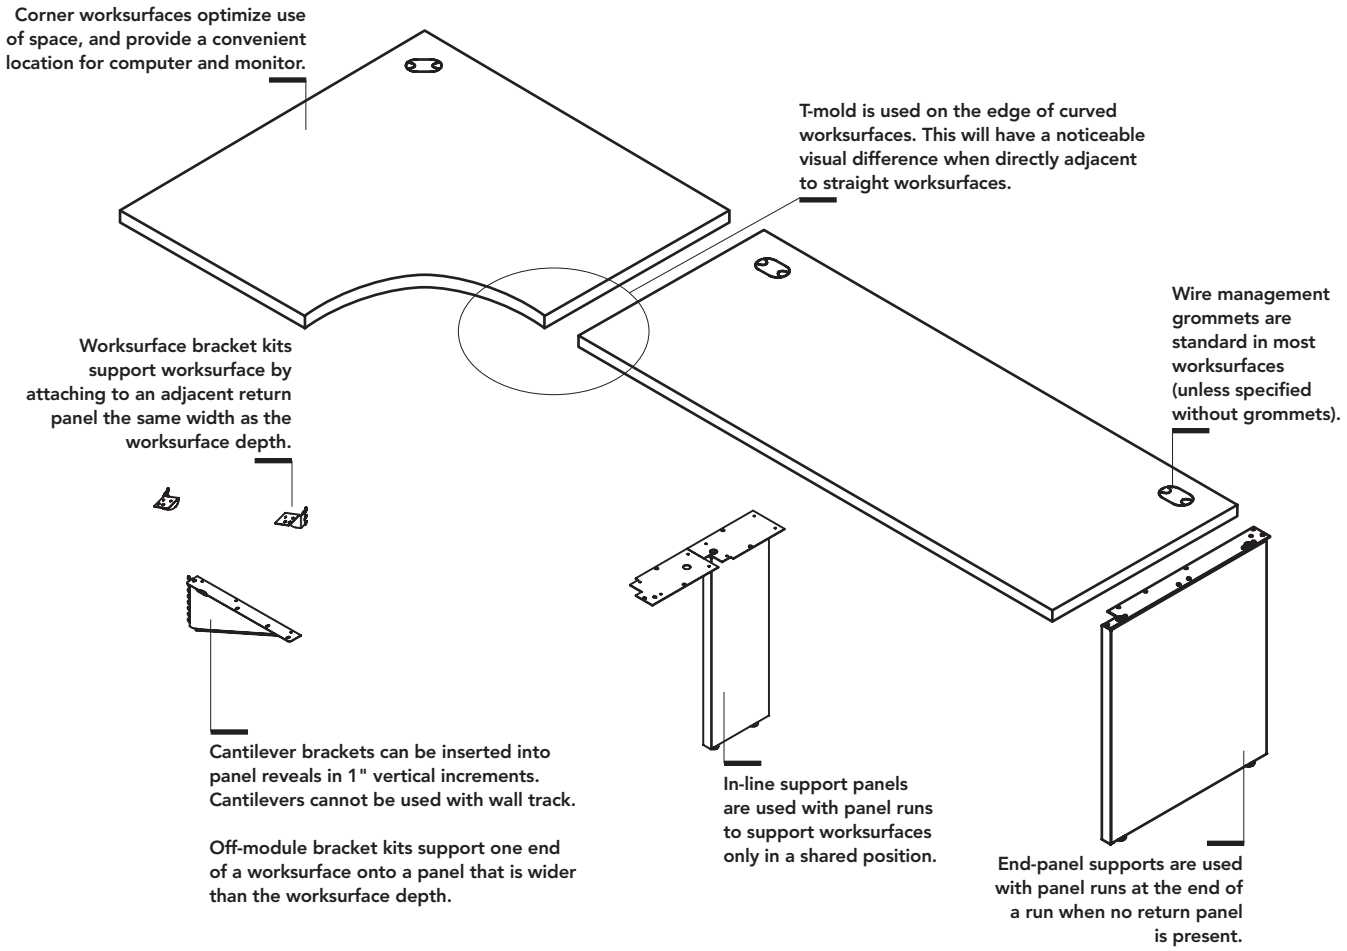
Arrows indicate grain direction for woodgrain laminates.
Grain direction on symmetrical corner worksurfaces runs at a diagonal.

STRIDE

Worksurfaces

Reference Page

Laminate worksurfaces are 1⅛" thick with particleboard core and with top surfaces finished in laminate. Bottom surfaces are covered with a backer sheet. Wall track allows for mounting of systems panel components on permanent wall structures.



Worksurfaces can be configured at 29½"H or 26½"H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

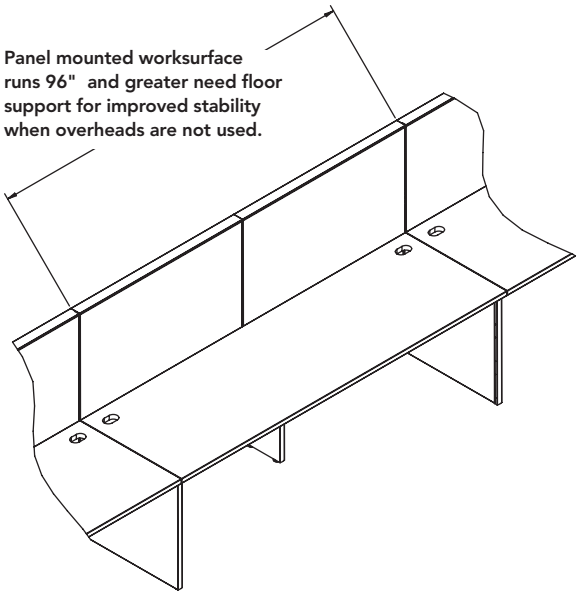
- Support column*
- Off-module bracket kit
- Flat brackets
- External support channel
- Worksurface bracket kit
- Height adjustable mechanism
- Cantilever bracket
- In-line support panels*
- End support panel*
- Support storage units*
- Storage unit with stanchion*
- C-Legs*
- Post Legs*

*Units provide floor support.

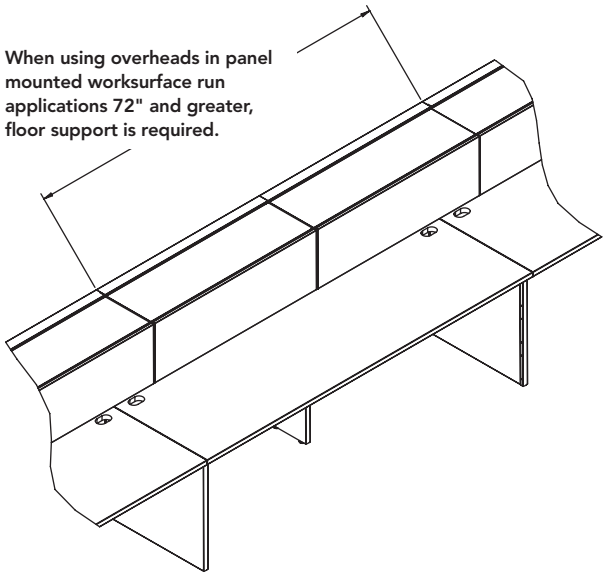
Support Guidelines — See Drawings on page 194

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.
- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Unsupported worksurfaces 60"W or greater require an external worksurface support channel. When a center support cantilever cannot be used, an external worksurface support channel is recommended for spans greater than 48"W.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.

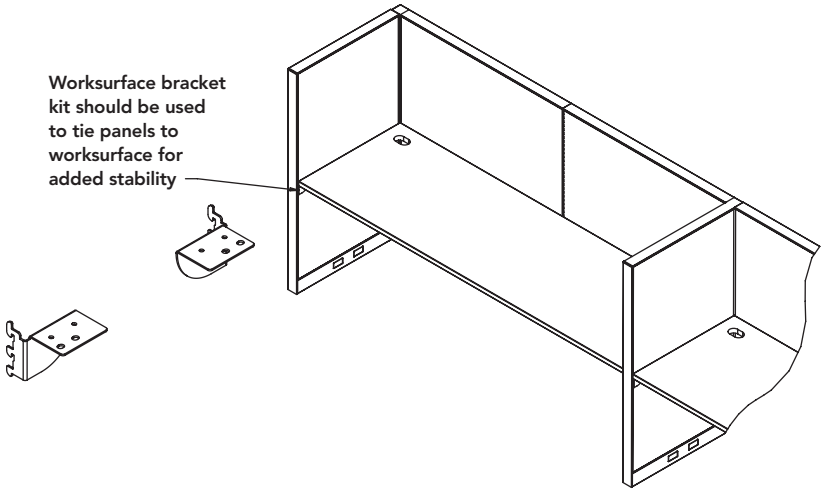
Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.

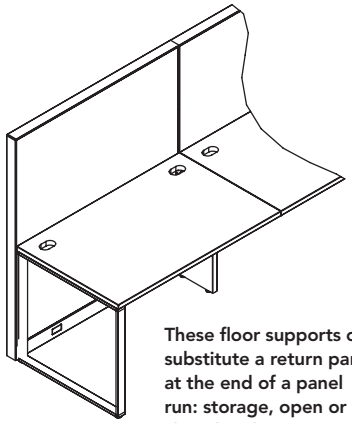


When using overheads in panel mounted worksurface run applications 72" and greater, floor support is required.

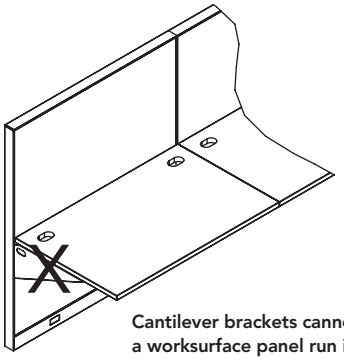


Worksurface bracket kit should be used to tie panels to worksurface for added stability



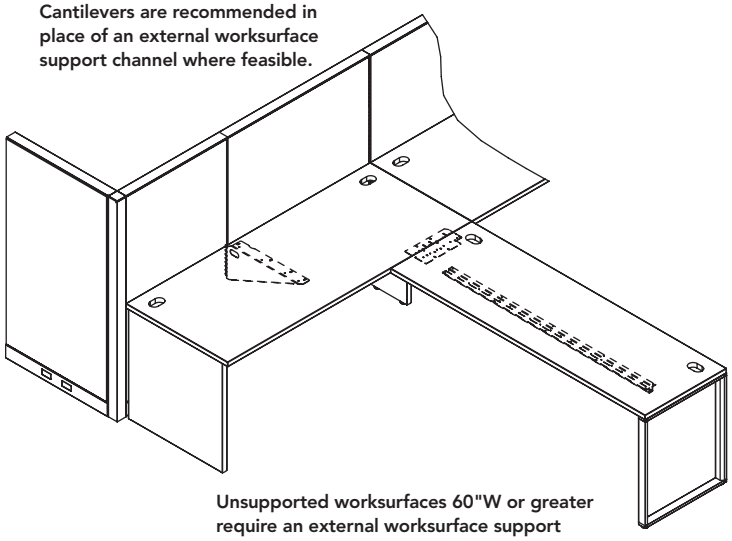


These floor supports can substitute a return panel at the end of a panel run: storage, open or closed end support panel, O-legs (shown, additional drawing on page 195)

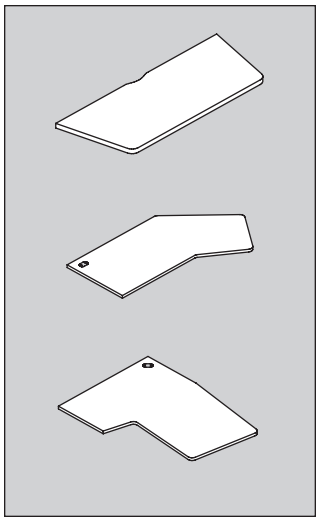


Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.

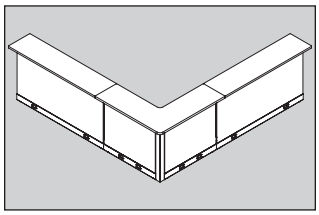
Cantilevers are recommended in place of an external worksurface support channel where feasible.



Unsupported worksurfaces 60"W or greater require an external worksurface support channel. When a center support cantilever cannot be used, an external worksurface support channel is recommended for spans greater than 48"W.

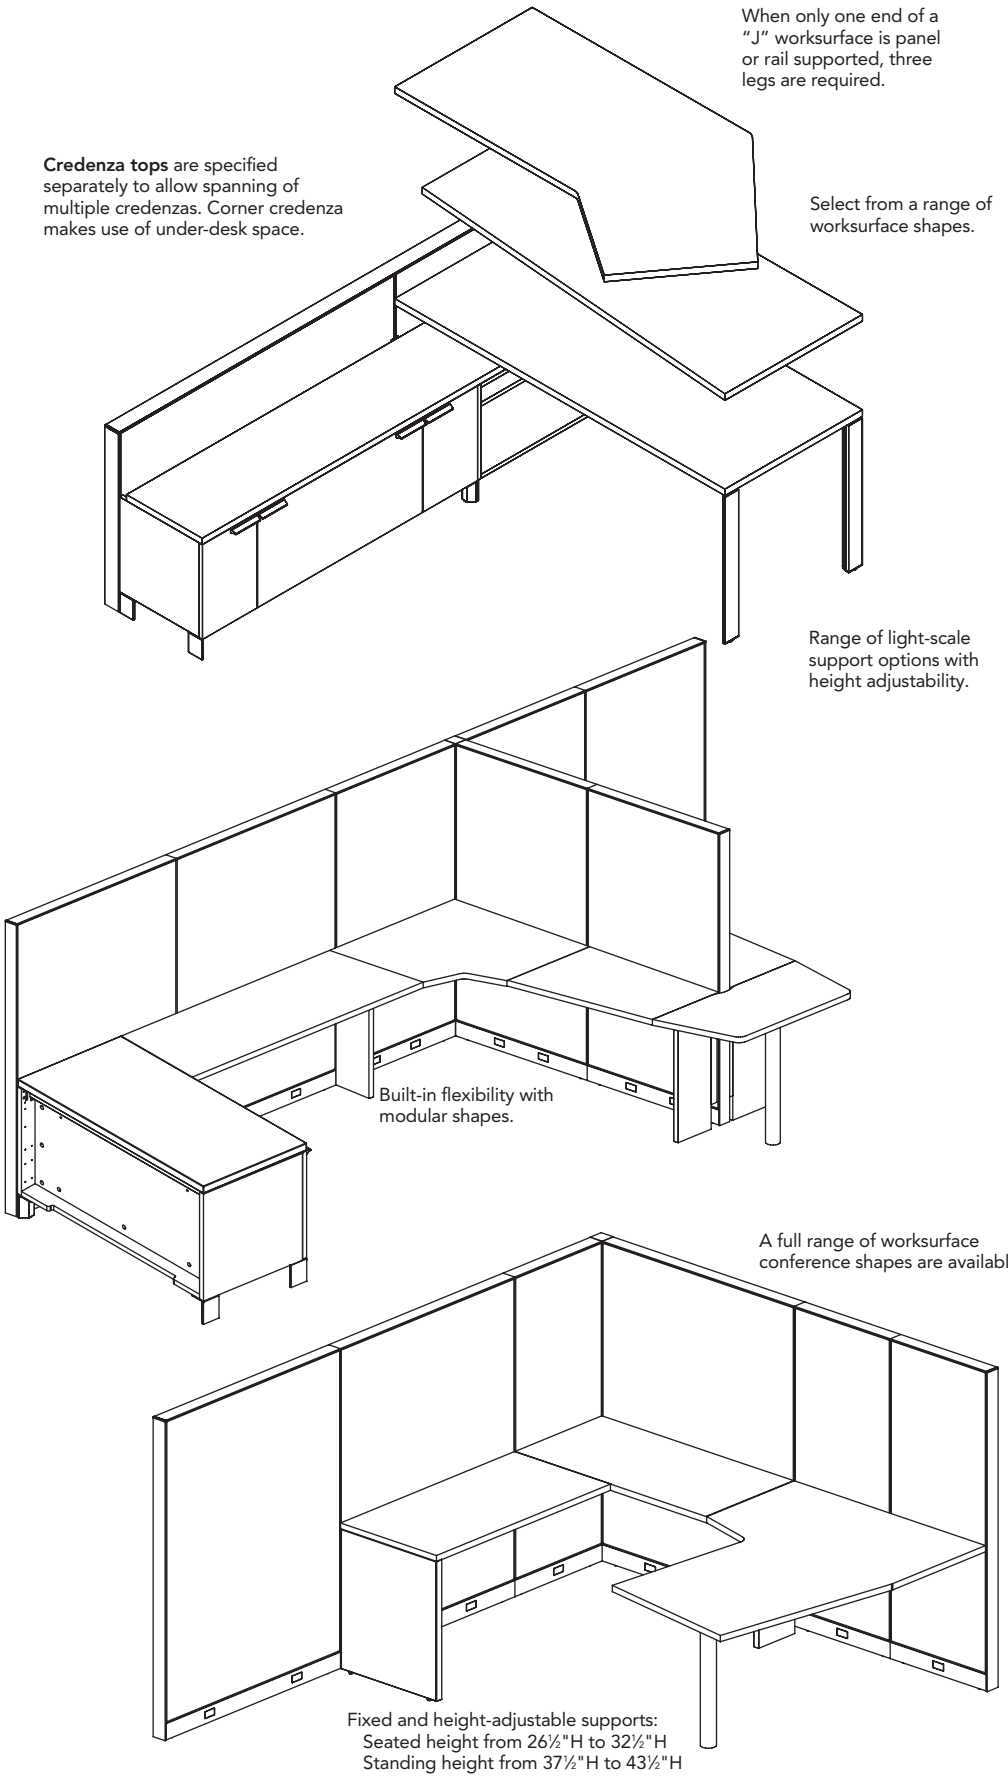


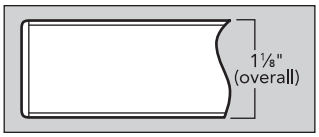
Linear D-shape, linear J, Linear boomerang, D-shaped, P-shaped, peninsula, jetty, boomerang, and reef worksurfaces require support columns (ordered separately).



Stride countertops are flush with the top cap and are available in straight, corner, and **120°** configurations. Mounting hardware is included with Stride countertops. Panel top caps need to be ordered separately.

Worksurface Application Versatility

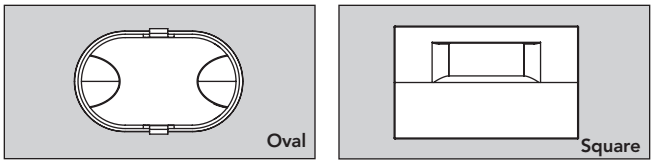




Flat Edge Trim

Worksurfaces

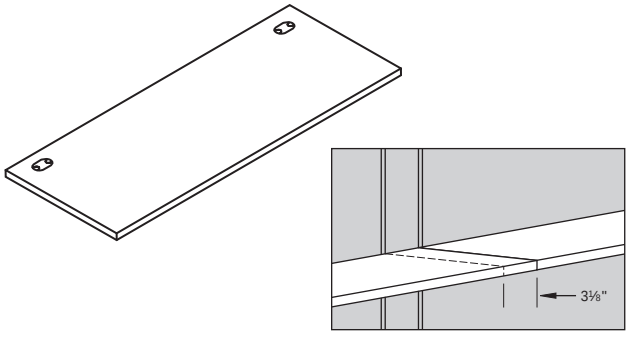
- Laminate (L) worksurfaces are 1⅛" thick with particleboard core and with top surfaces finished in laminate. Bottom surfaces are covered with a backer sheet.
- Flat edge trim is available on laminate tops in standard colors (customer specified) to match solid laminates and to complement patterned or woodgrain laminates.
- Veneer (V) worksurfaces have square veneer edge.



Wire Management Grommets

Wire management grommets are standard in most worksurfaces and are specified in plastic or metal.

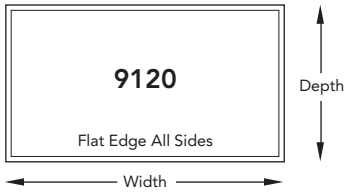
- Metal grommets are available in oval or square (shown at left).
- Grommets on standard systems worksurfaces are located 6$\frac{5}{16}$" from side edges and 3$\frac{5}{16}$" from back edge.
- Add Suffix "N" to a model number for no grommets, no upcharge.



Optional width worksurfaces to span "T" or "S" panel connection.

Primary Worksurfaces (L pages 206-207, V pages 220-221)

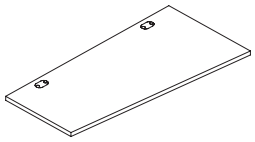
- Primary worksurfaces are available in 20", 24", 30", and 36" depths.
- One grommet for widths up to 42", two on widths 48"W and greater.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 12" cantilever on 12"D, 18" cantilever on 20"D, and 24" cantilever on 24"D and 30"D worksurfaces.
- Optional width worksurfaces, 3⅛" wider than standard panel widths, are available for use with Stride panel runs having a "T" or "S" connection.
- Bracketry on post legs will interfere with grommets on systems (non-desking) worksurfaces.
- Nominal worksurface width is equal to nominal panel width.
- Corner worksurfaces include a corner left-handed support bracket. Other support hardware is ordered separately.
- Desking worksurfaces should be specified whenever worksurfaces 48"W and wider are not attached to a panel.



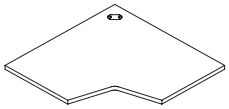
Non-Standard Worksurface Sizes (L and V on pages 218 and 219)

- The 9120 Program can be used to order laminate and veneer rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

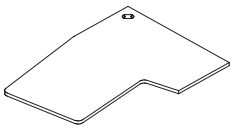
Reference Page

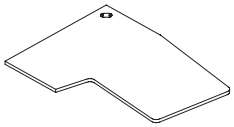


Linear Taper Worksurfaces (L pages 208-209)
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 12" cantilever on 12"D, 18" cantilever on 20"D, and 24" cantilever on 24"D and 30"D worksurfaces.



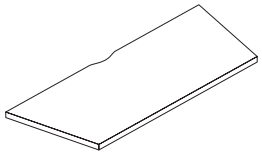
Linear Corner Worksurfaces (L page 210)
- Rear corner left-handed support bracket included.
- Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.



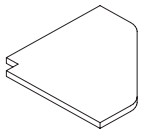


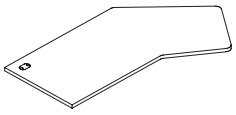
Linear Boomerang Worksurfaces (L page 211)
- Support column ordered separately.

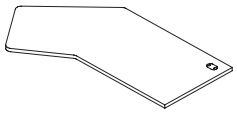
Linear D-Shaped Worksurfaces (L page 211)
- Order support column and two 10"D in-line support panels.
- Worksurface includes attachment bracket.
- Not recommended for use with T6CB24L or T6CB24R for shared applications.



Linear Quarter Worksurfaces (L page 211)
- Connect two 90° panel-attached worksurfaces.
- Order support column and shared cantilevers or in-line support legs separately.

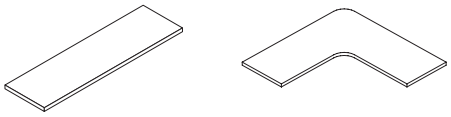




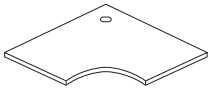


Linear J Worksurfaces (L pages 212-213)
- The dimension of straight back side "D" is equal to "C" – 24. "C" dimensions are listed in the systems price list linear J worksurface page.

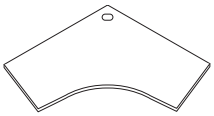
Reference Page



Countertops (L page 214, V page 225)
- Available in Straight and Corner.
- Mounting bracket and attachment hardware included. When used with in-line high-low "H" trim kit add "V" suffix for straight countertop and "RV" for right or "LV" for left on corner countertops. Not available with fluid form models.
- Countertops are flush with panel top cap. Stride top caps need to be ordered separately.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

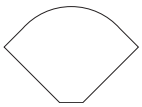


Corner Worksurfaces (L page 215, V page 222)
- One rear corner support bracket included (left-handed). All other support hardware is ordered separately.
- Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- Corner worksurfaces with woodgrain laminate and veneer have grain direction diagonal to adjacent worksurfaces.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

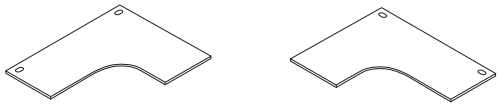


120° Corner Worksurfaces (L page 215, V page 222)
- Standard with one wire management grommet in corner location.
- Rear support bracket included (left-handed).
- Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and Wall Track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

60° Pie Worksurface (L page 215)
- Order support column and two flat brackets separately.

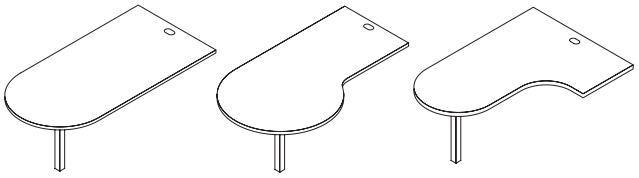


Quarter-Round Worksurface (L page 215, V page 222)
- Connect to 90° panel-attached worksurfaces.
- Order support column and shared cantilevers or in-line support legs separately.



Corner Cove Worksurfaces (L page 216, V page 223)
- Worksurfaces 66" and over require a cantilever bracket for center support in panel mounted applications. Specify 24" cantilever on 24"D and 30"D worksurfaces.
- Rear corner support bracket included (left-handed).
- Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Support columns shown below ordered separately.

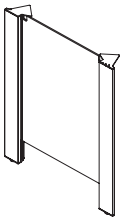


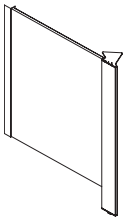
Reference Page

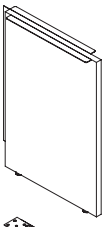
Peninsula, P-Shaped and Jetty Worksurfaces
(L page 217, V page 224)

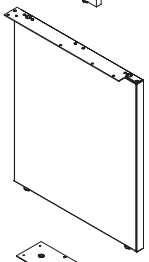
- Support column ordered separately, column includes panel support brackets T6BK.

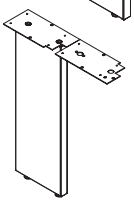
End Panels and Panel Brackets



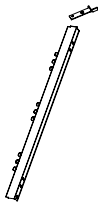








Panel Mount Bracket



Ped-to-Panel

Credenza-to-Panel

Worksurfaces can be configured at 29½"H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

Freestanding End Panel Legs — Painted Wood (page 226)
- Available in 29½" height and 24" and 30" depths.
- Freestanding end panel leg includes two post legs, painted wood modesty panel, and attachment hardware.
- Order according to type of worksurface (flat/square or rabbet edge) the end panel leg will support.
- End panel leg will interfere with the grommet location on systems (non-desking) worksurfaces.

Panel-Mount End Panel Legs — Painted Wood (page 226)
- Available in 29½" height and 20" and 24" depths.
- Panel-mount end panel leg includes one post leg, painted wood modesty panel, panel-mount bracket, and attachment hardware.
- Order according to type of worksurface (flat/square or rabbet edge) the end panel leg will support.
- Handedness is determined by position relative to the user. Specify a left hand leg to be on the user's left hand side, specify a right hand leg to be on the user's right hand side.
- End panel leg will interfere with the grommet location on systems (non-desking) worksurfaces.

In-Line Panel Supports — Painted Wood (page 226)
- Worksurface in-line support panels are used to support worksurfaces only in a shared position.
- Available in 29½" height and 10", 20", and 24" depths.
- Includes painted wood support panel with wire management grommet, panel-mount bracket, and attachment hardware.
- Supports will interfere with the grommet location on systems (non-desking) worksurfaces.

End Support Panel — Metal (page 227)
- Includes end-panel (non-handed), attaching hardware, and adjustable glides. (Panel mount version includes panel mount bracket.)
- End support panels are used in place of return panels at the end of worksurface runs.
- Leveling glides provide 3" of adjustment.
- Cannot be used with rabbet edge worksurfaces.

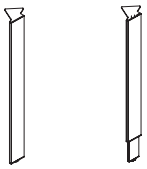
In-Line Support Panel — Metal (page 227)
- Includes support panel (non-handed), attaching hardware, adjustable glides, and wire management grommet. (Panel-mount version includes panel mount brackets.)
- Cannot be used with rabbet edge worksurfaces.

Panel Mount Bracket — Non-Handed (page 227)
- Includes hardware to convert freestanding end-panel or support leg to panel mount.

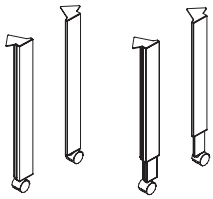
Pedestal-to-Panel Attachment Bracket (page 227)
- Can be used with Align™ pedestal in place of full end-panel or return panel. Provides structural support to panel run by securing panel directly to pedestal.
- Freestanding pedestals can also be used to support one end of a panel-attached worksurface in conjunction with ped-to-panel attachment kit.

Credenza-to-Panel Brackets (page 227)
- Used to attach the back or side of a credenza to a panel frame to provide stability when used with Stride panel frames.
- Handedness on side-to-panel bracket is determined by side of credenza that attaches to panel when facing panel run.

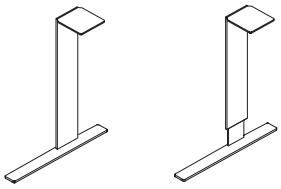
Legs



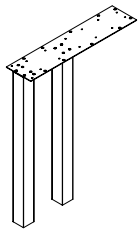
Post Legs (page 228)
- Used to support one corner of a panel attached worksurface. Cannot be used in freestanding applications, use table post legs.
- Fixed height is for support at 29½"H and 40½"H.
- 26½"H to 32½"H height adjustable legs provide a 6" range of adjustment in ½" increments.
- 37½"H to 43½"H height adjustable legs provide a 6" range of adjustment in ½" increments.
- Telescoping legs require common tools to adjust height.
- Leveling glides provide 1" of additional adjustment.
- Attachment hardware included.
- Post leg will interfere with the grommet location on systems (non-desking) worksurfaces.



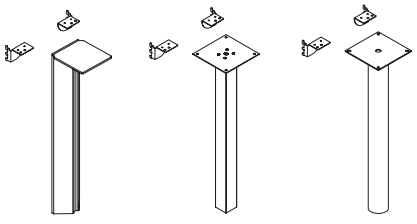
Freestanding Post Legs (page 228)
- Reinforced post leg with an integrated gusset is used to build a freestanding table.
- For use with Stride desking worksurfaces.
- Fixed height is for support at 29½"H.
- 26½"H to 32½"H height adjustable legs provide a 6" range of adjustment in ½" increments.
- Telescoping legs require common tools to adjust height.
- Leveling glides provide 1" of additional adjustment. Caster version aligns with glide version when glide is fully retracted.
- Attachment hardware included.



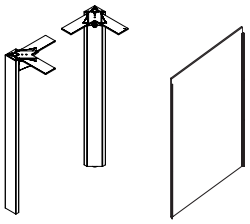
C-Legs (page 229)
- Used to support one end of a worksurface or table. Cannot be shared between surfaces.
- C-Legs cannot be used at both ends of a surface to create a freestanding desk.
- Fixed Height is for support at 29½"H.
- 26½"H to 32½"H height adjustable legs provide a 6" range of adjustment in ½" increments.
- Height adjustable C-legs are for use on worksurface spans up to 72"W. Fixed height C-legs must be used if the span is greater than 72"W.
- Telescoping legs require common tools to adjust height.
- Leveling glides provide ½" of additional adjustment.
- Attachment hardware included.



Post In-line Support Leg (page 229)
- Includes legs (non-handed, mounted to bracket) and attaching hardware.



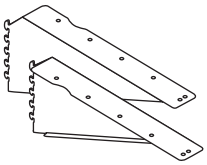
Support Columns (page 229)
- Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.
- Fixed height column is for support at 29½"H.
- Height adjustable column provides a 6" range of adjustment in ½" increments from 26½"H to 30½"H.



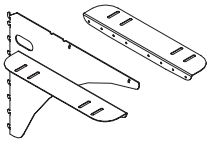
Light-scale Wire Management Table Post Legs (page 229)
- Includes pair of legs (non-handed, mounted to bracket) and attaching hardware. Available for modesty panel or not for modesty.
- Available painted or anodized.

Leg Modesty Panels (page 229)
- Height adjustable table post legs cannot be used with leg modesty panels.
- Available in ¼" thick Landscape™ surface material.

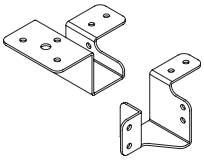
Worksurface Support Brackets



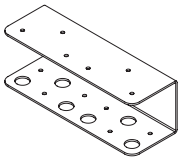
Cantilever Brackets — Handed



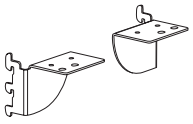
Cantilever Brackets — Non-Handed



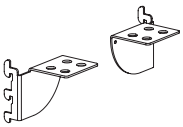
Non Rail-Based End Panel Kit Z6EPK



Layered Worksurface Bracket Z6C3BK



Worksurface Bracket Kit T6BK



Worksurface Bracket Kit T6SB

Cantilever Brackets
- Use with runs less than 96". Floor support is required for runs 96" and longer.
- Where applicable, cantilevers are recommended over an external worksurface support channel. Unsupported worksurface runs 60"W or greater require an external worksurface support channel when a cantilever cannot be used.
- Do not use at the end of a worksurface where no 90° return panel is positioned.
- Includes tie bracket and attachment hardware.
- Avoid installation on only one side of a straight connection except to support corner worksurfaces.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.
- Do not use with wall track or to support a worksurface to which a return worksurface is attached.

Cantilever Bracket — Handed (page 230)
- Cantilever brackets are handed (left or right) and can be inserted into panel reveals in 1" vertical increments. No assembly required.
- Left- and right-hand brackets required in shared applications.
- 24"D cantilevers are required to be used for both 24"D or 30"D worksurfaces.
- 18"D cantilevers are required to be used for 20"D worksurfaces or center support for 24"D.
- 12"D cantilevers are required to be used for 12"D worksurfaces.

Cantilever Bracket — Non-Handed (page 230)
- Cantilever brackets are non-handed and can be inserted into panel reveals in 1" vertical increments. Assembly required.
- One bracket in shared applications — includes two angled brackets.
- Bracket accommodates 24"D or 30"D worksurfaces.

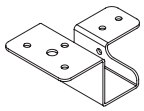
Non Rail-based End Panel Kit (page 230)
- Non rail-based end panel kit Z6EPK is used to attach an end panel off-module to a segmented panel.

Layered Worksurface Bracket (page 230)
- Layered worksurface bracket model Z6C3BK, used for mounting off-modular worksurfaces 3" higher or lower than the installed worksurface.

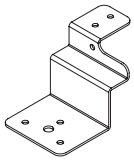
Worksurface Bracket Kits (Pair)— T6BK (page 230)
- Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Attachment hardware included.
- Return panel width must be the same as the depth of the worksurface.

Worksurface Bracket — T6SB (page 230)
- Worksurface storage bracket kit (T6SB) is used for aesthetics where under-desk storage is immediately adjacent to the return panel. In all other applications use worksurface bracket kit (T6BK) to utilize worksurface threaded metal inserts.
- Brackets — one pair. Black only.
- Attachment hardware included.
- Brackets do not align with worksurface threaded metal inserts, and therefore require wood screws (included).

Reference Page

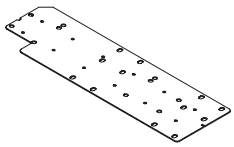


Off-Module Worksurface Bracket Z6MK



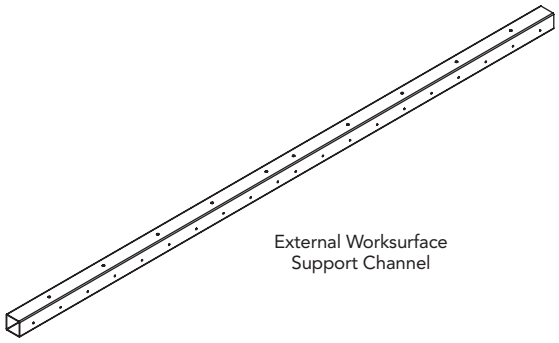
Off-Module Worksurface Bracket Z6Z3MK

Off-Modular Worksurface Brackets (page 230)
- Allows in-line support legs and end-panels to be attached off-module.
- Cannot be used closer than 12" from end of panel.
- Non-rail based 3" layered worksurface bracket used to mount off-modular worksurface at 26½".
- Off-module worksurface bracket model Z6MK can only be used for attachment of a worksurface end to a segmented panel at 29½"H.
- Off-module worksurface bracket model Z6Z3MK is used for mounting non-rail based off-modular worksurfaces to a segmented panel at 26½"H.



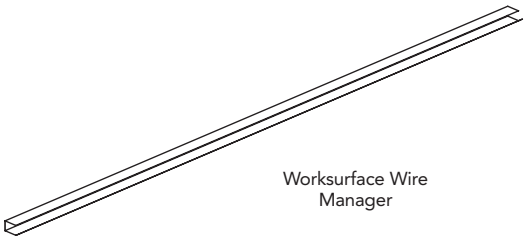
Flat Bracket

Flat Brackets (page 230)
- Flat brackets can be used to connect one worksurface perpendicular to another worksurface.
- Use two 12"D flat brackets (T612FB) side-by-side with rabbet edge worksurfaces and when placing flat or rabbet edge worksurfaces perpendicular to high credenzas.



External Worksurface Support Channel

External Worksurface Support Channel (page 230)
- Support channel should be specified separately for use with non-desking worksurfaces.
- Extends 1½" below the worksurface. Installs 7" from user's edge.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Is required on a systems worksurface for additional support for unsupported spans 66"W or greater. Width of worksurface span can be reduced by using support storage.
- Required when mounting a modesty panel.
- 36"D worksurfaces require two external support channels distributed equally from the center of the worksurface.

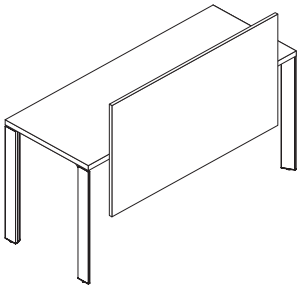


Worksurface Wire Manager

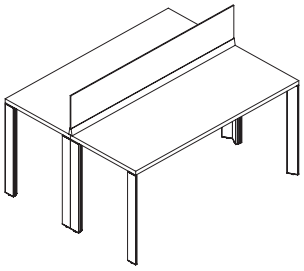
Worksurface Wire Manager (page 230)
- Provides channel to run wires under a worksurface.
- Extends 1⅛" below the worksurface.
- Wire manager (ordered separately) is mounted in front of the desk support channel to hide exposed hardware.

Reference Page

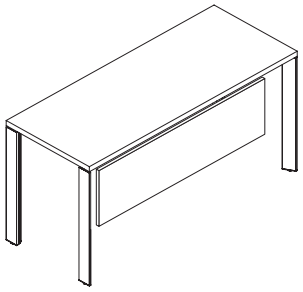
Desk screens and modesty panels provide light-scale space division. There are four options available: full desk screens, shared desk screens, desk modesty panels, and leg modesty panels.



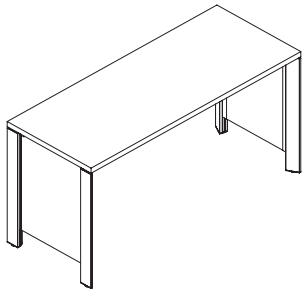
Full desk screens extend above and below the worksurface acting as both a screen and a modesty panel. They are 28"H and available in painted wood or painted wood with fabric Insert. Landscape™ surface material will soon be available as an additional finish option.



Shared desk screens are for use above the worksurface in a back-to-back application for added privacy. They are 13"H and are available in ⅜" Clear or Frosted Glass.

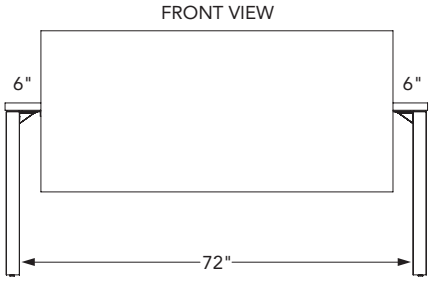


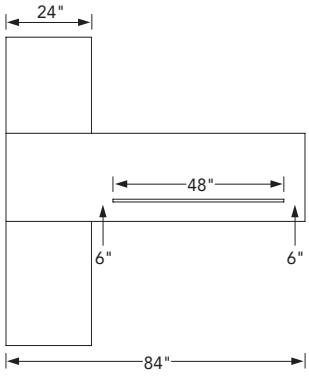
Modesty panels are for use below the worksurface. They must be used with Stride desking worksurfaces or a systems worksurface with an external support channel installed. An optional worksurface wire manager conceals hardware. They are 14"H and available in ¾" thick painted wood or ¼" thick Landscape surface material.



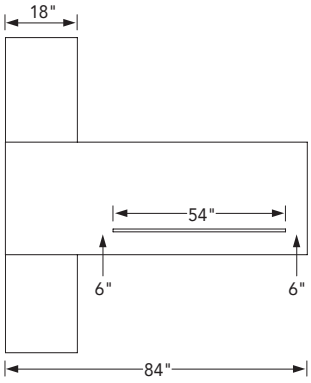
Leg modesty panels are used between two post legs on either a 24"D or a 30"D worksurface. They are 29"H and are available in Landscape surface material.

Specification Rules for Desk-Mounted Screens and Modesty Panels





High Credenzas — TOP VIEW



Low Credenzas — TOP VIEW

Freestanding Table Applications:
Subtract 12" from the size of the table/worksurface to get the recommended screen or modesty widths.

Example for an 72"W table: 72" – 12" = 60"W

Specify a 60"W screen and center-mount on the table.

Credenza-based Layered Applications:

- **High credenzas** — Subtract 24" for the credenza depth and an additional 12" from the width of the worksurface to get the recommended width.

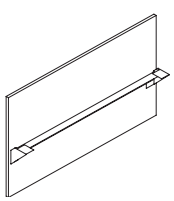
  Example for an 84"W table: 84" – (24" + 12") = 48"W

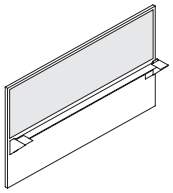
  Specify a 48"W screen and center-mount on the worksurface opening.

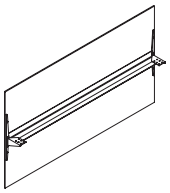
- **Low credenzas** — Subtract 18" for the credenza depth and an additional 12" from the width of the worksurface to get to the recommended screen width.

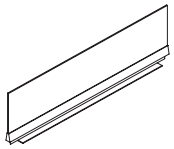
  Example for an 84"W table: 84" – (18" + 12") = 54"W

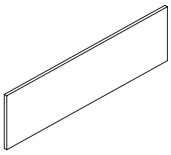
  Specify a 54"W screen and center-mount on the worksurface opening.









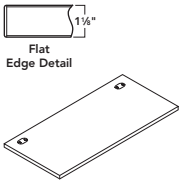


Screens and Modesty Panels

Full Desk Screens (page 231)
- Extend 13" above the worksurface to provide desktop privacy and 14" below the worksurface as a modesty panel.
- Width of full screen must be 12" less than the width of the worksurface. If used on a worksurface attached to a credenza rail, the width of the screen must be 3½" less than the width of the worksurface.
- Painted wood full desk screens are ¾" thick, plus a 1"gap for cord management between worksurface and screen.
- Painted wood with fabric insert screens are ¾" thick painted wood with a tackable fabric insert on the user's side.
- Landscape™ surface screens are ¼" thick Frosted Translucent.

Shared Desk Screens (page 231)
- Provide privacy above the worksurface in back-to-back or side-to-side applications.
- Shared screens extend 13" above the worksurface to align with 42½"H panels and storage.
- Available in ⅜" thick Clear or Frosted glass.

Modesty Panels (page 232)
- Includes attachment hardware.



Description	Laminate w/Flat Edge Model	Laminate w/Flat Edge L1 List Price	L2 List Price	L3 List Price
20"D Primary Worksurfaces				
24"W	**T52024S**	$ 373	$ 388	$ 402
30"W	**T52030S**	$ 396	$ 412	$ 426
36"W	**T52036S**	$ 442	$ 459	$ 475

ORDERING

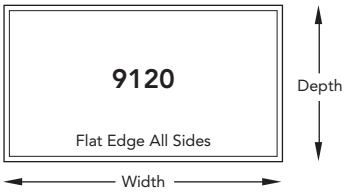
The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number**
   Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)
   See grommet specification instructions on this page.
3. **Grommet Type:**
   P Plastic
   M Metal (add $11 per grommet for laminate)
4. **Grommet Color:**
   (Metal only)
   EL Matte Silver
   Note: Plastic grommet will match flat edge.
5. **Laminate and Veneer Choices**
   See page 118.
6. **Flat Edge Color Choices**
   See edge colors page 118 for laminates.
7. **Exact Size**
   Specify the **exact width** and **exact depth** you require.
   Width and depth is specified in ⅛" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

⅛"	= 1	⅝"	= 5
¼"	= 2	¾"	= 6
⅜"	= 3	⅞"	= 7
½"	= 4	no extra increment	= 0

For example, when ordering a worksurface that is 34⅜"W x 20½"D, specification should be 345Wx204D.
Example: **9120R3624.G0.TM33.EU.345Wx204D**.



PRODUCT SPECIFICATIONS

- Flat edge on all sides
- 45 lb. particle board
- 1⅛" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates and veneers
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

Note: 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

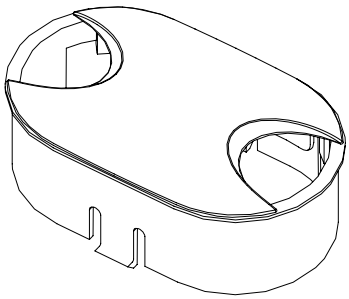
When spanning multiple freestanding storage units with one worksurface, add ⅛" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + ⅛" + ⅛" = 90¼" worksurface. Do NOT follow this rule if panel wrapping storage units.

CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program worksurfaces.

GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate and square for veneer.



PRICING

See page 219 for laminate and veneer 9120 worksurface pricing.

One Grommet — GC, GL, or GR Position..... $17.00
Two Grommets — G3 or G4 Position..... $34.00
Note: Add $11 per grommet for metal grommets with laminate.

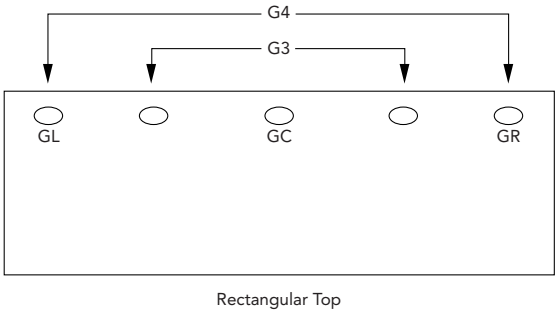
ORDERING

Specify grommet location and color.
Example: **9120R10836.GCP.TM33.EU.1022Wx326D**

Code Grommet Position

GC	Centered side-to-side – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
GL	6⁵⁄₁₆" from left side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
GR	6⁵⁄₁₆" from right side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
G3	Pair of grommets each 18" from side edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center (Position G3 not available on tops 60"W or less.)
G4	Pair of grommets each 6⁵⁄₁₆" from side edge to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
G0	No grommets

Dimensions are from grommet center line to top edge.



Rectangular Top

Grommet positions other than those shown above are considered non-standard.

STRIDE

Worksurfaces

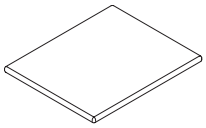
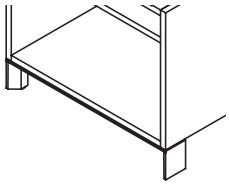
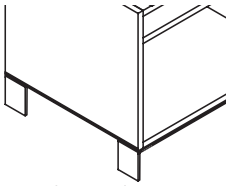
Credenza Top



Seat Cushion



Credenza Bottom Trim



Credenza Side Trim

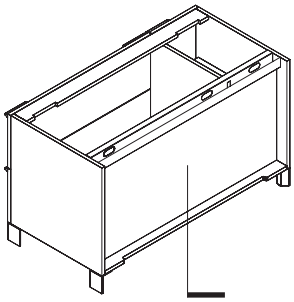
Credenzas ship fully assembled except for the credenza top, which must be ordered separately. Credenza tops in laminate or veneer with flat/square details are available in various depths. Veneer fronts by Gunlocke®.

Laminate credenza tops, a footed base, and aluminum trim along the front edge of the credenza enhance the durability of the credenza.

A relocatable seat cushion can be placed on the credenza top of a low credenza for additional seating.

Credenza bottom trim is standard on the front of all credenzas.

Optional side trim is an aesthetic piece for end of run credenzas and is ordered separately and field installed.



All credenzas have a recessed back with a cavity to support wire management. An optional metal back should be specified separately to finish the credenza in a single-sided application where the back is exposed. Finished back configurations should not utilize rail as the top cap required shows an unfinished top groove.

Relocatable wire trough provides a channel for wire management.

Each credenza ships with one front bracket that can be used to gang (multiple) credenzas in-line.

Credenza top must be ordered separately and can span multiple credenzas.

Corner credenzas with bin when housing a CPU must be used with credenza tops for wire trough or rail (not full depth) to minimize heat buildup.

Credenzas can support panels in certain applications with the addition of a credenza-to-panel bracket, see guidelines on pages 128-129 and bracket on page 241.

Credenzas can be shipped with lock cores removed; cores can be installed after files are in place. Core removable lock feature allows key numbers to be easily changed in the field.

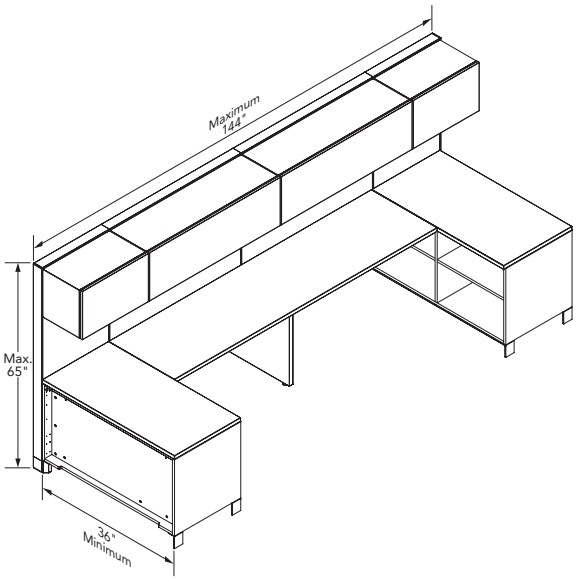
All credenzas feature silver linear pulls. Pulls, feet, and bottom trim are all PR6 Silver finish.

Credenzas are constructed from ¾" thick powder-coated medium density fiberboard with concealed fastener construction.

Credenza feet have sleeves to conceal the leveling glides. Leveling range is 1⅛". The hex-head design of the stem allows leveling to be done even when the credenza is fully loaded.

Credenzas ship with the feet located at the outside corners. Alternate mounting holes are provided for front feet to be inset 4" on mid-run credenzas, during installation.

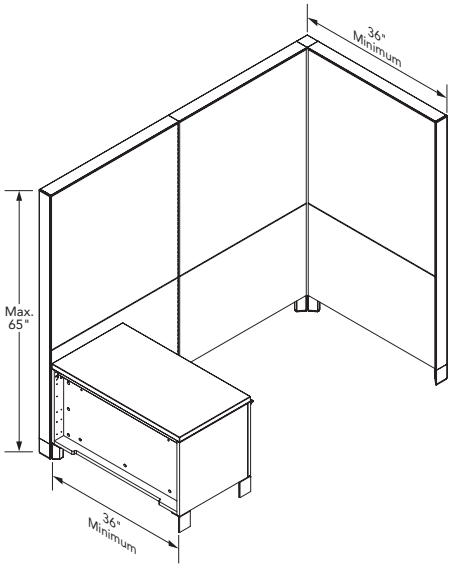
High Credenza Side to Panel Bracket



Side-mounted high credenzas

- The minimum Stride high credenza width is 36"W on each end.
- With a floor support the maximum panel run is 144".
- Without a floor support, the maximum panel run is 96".
- Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas. Stacking frames cannot be used with overheads.
- Panel frame maximum height is 65"H.

Credenza Side to Panel Bracket with Return Panel



Bracket with return panel

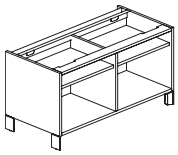
- Minimum Stride credenza width 36".
- With a floor support the maximum panel run is 144".
- Without a floor support, the maximum panel run is 96".
- The minimum size for panel return is 36"W x 35"H.
- Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the high credenza.
- Panel frame maximum height is 65"H.

22"H Low Credenzas

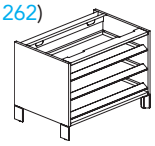
22"H low credenzas *are constructed of painted wood and are available with painted fronts. Low credenzas range from 24"W to 60"W x 22"H (without top; or 23½"H with top) x 18"D.*

Low Credenza Configurations (page 262)
- Open
- Open with Project Shelves#
- Hinged Doors
- Lateral File with Project Drawer#
- Box/File
- Corner Bin#

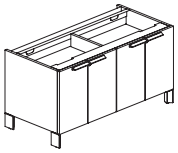
Low Credenza — Open (page 262)
- Low open credenzas have one removable shelf.
- Bottom shelf opening is 12⅛"H and will accommodate binders.
- Top shelf opening is 3⅜"H.



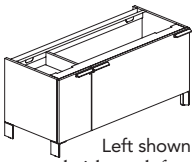
Low Credenza — Open with Project Shelves (page 262)
- Available in 24"-36" widths.
- Units have three pull out shelves at fixed height.
- Shelves have an opening clearance of 4½"H.



Low Credenza — Hinged Doors (page 262)
- 24"-36"W units have two doors with one lock and one adjustable shelf.
- 42"-60"W units have four doors with two locks and a center septum, with one shelf on each side that can be adjusted in 2" increments.



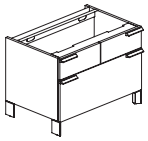
Low Credenza — Lateral File with Project Drawer # (page 262)
- Available in 30"-60"W.
- A 2⅞"H optional pull out project drawer is located behind the lateral file drawer front.
- When used freestanding, counterweight kit model ZD-CW must be specified.
- 30"-36"W are lateral files with one lock.



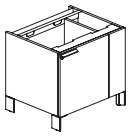
Left shown

- 42-48"W is a combination unit with a lateral drawer and either a left or right 12"W hinged door with an adjustable shelf inside. Unit has two locks.
- 60"W is a combination unit with a lateral drawer and both left and right 12"W hinged doors each with an adjustable shelf. Unit has three locks.

Low Credenza — Box/Box/Lateral # (page 262)
- 30"W box/box/lateral credenza provides a combination of personal and file storage.
- Unit has two locks.



Low Credenza — Corner with Bin # (page 262)
- For use under perpendicular layered worksurfaces.
- Available 24"W or 30"W and are either left or right handed with one lock.
- Handedness on corner credenzas is determined by the location of the credenza in the credenza run, considered when facing the run.



Right shown

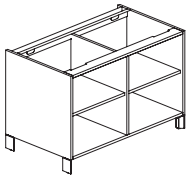
- Corner slide out bin has an open side to allow for easy side access of the stored content, and can be used for storing binders or a CPU (up to 12¼"H).
- There is venting to allow airflow, however, if a CPU is being stored in a corner credenza, a credenza top for wire trough or rail must be used to minimize heat buildup (do not use full depth credenza tops).
- All units have a side panel that provides clearance for modesty panel attachment. It is removable and can be used for cord management and power/data access.
- Side panel is 6"W on 24"W credenzas and 12"W on 30"W credenzas.

28"H High Credenzas

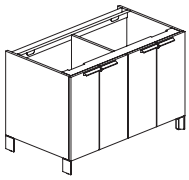
28"H high credenzas *are constructed of painted wood and are available with painted fronts. High Credenzas range from 24"W to 60"W x 28"H (without top; or 29½"H with top) x 24"D.*

High Credenza Configurations (page 263)
- Open
- Hinged Doors
- Lateral File#

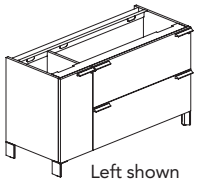
High Credenza — Open (page 263)
- Open credenzas have two fixed shelves.
- Bottom shelf opening is 12⅛"H and will accommodate binders.
- Top shelf opening is 9½"H.
- Open credenzas 42"W-60"W have a center septum.



High Credenza — Hinged Doors (page 263)
- 24"-36"W units have two doors with one lock and one adjustable shelf.
- 42-60"W units have four doors with two locks and a center septum, and one shelf on each side of the center septum that can be adjusted in 2" increments.



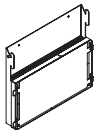
High Credenza — Lateral File (page 263)
Available in 30-60"W.
- 30-36"W are lateral files with one lock.
- 42-48"W is a combination unit with two 36"W lateral drawers and either a left or right 12"W hinged door with an adjustable shelf inside. Unit has two locks.
- 60"W is a combination unit with two 36"W lateral drawers and both left and right 12"W hinged doors each with an adjustable shelf inside. Unit has three locks.



Left shown

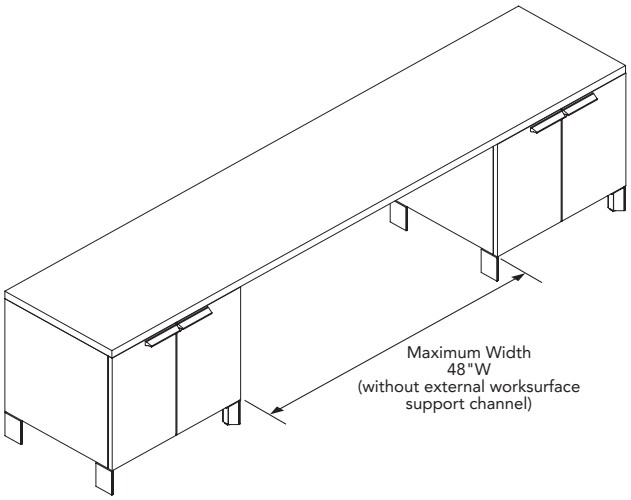
Counterweight Kits for Credenzas

Counterweight Kit (page 268)
- Weight attached to the back of a credenza to inhibit tipping. Must be ordered separately and field installed.
- Counterweight kits required for freestanding low credenzas:
  Open with Project Shelves, all widths.....1 Kit
  Lateral Files, all widths.....2 Kits
  30"W Box/Box/Lateral.....1 Kit
  Corner Credenza, all widths.....1 Kit
- For every 30" of added and ganged credenzas with spanning credenza tops, one counterweight kit can be removed.
- Stability bracket model number Z6CSBK can be used in place of a counterweight kit. See pages 128-129 and 268.



Unit may require counterweight depending on application, see chart above..

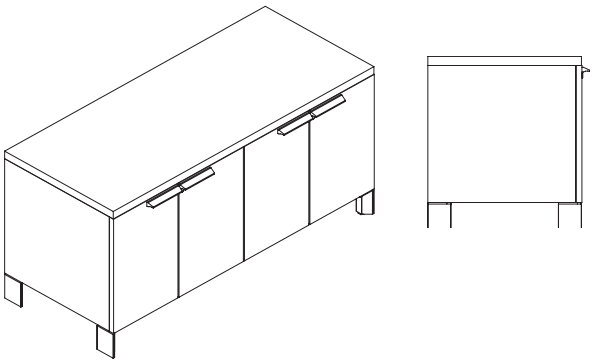
Credenza Tops:



Credenza tops are required to finish top surface of low and high credenzas.

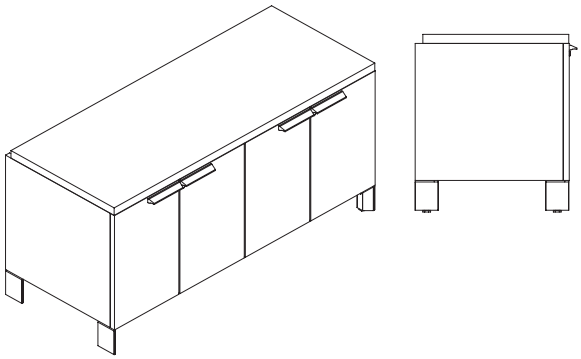
- Credenza tops are 1¼" thick.
- Two types (depths) of credenza tops:
  - Full Depth — to match depth of the credenza.
  - For Wire Trough — 1½" less than depth of the credenza, providing access to the wire trough and a channel for wire management when credenza is used along powered panel spine.
- Tops are available in laminate or veneer and with flat/square edge detail.
- Veneer credenza tops are by Gunlocke®. Stratawood veneer has a consistent straight-grain pattern. Natural veneer will have cathedrals and as a natural material is subject to nature's quality control with variations in grain pattern and tone.
- Credenza tops have threaded metal inserts at the ends for attachment to credenzas.
- The maximum span of credenza tops is 48". With the addition of an external worksurface support channel the maximum span for credenza tops is 72". Note: The maximum span of standard systems worksurfaces is 60". Grommets on standard systems worksurfaces will interfere with the wire trough on credenzas.

Credenza Top Configurations:



Full Depth Credenza Tops 66"W or greater (pages 265-266)

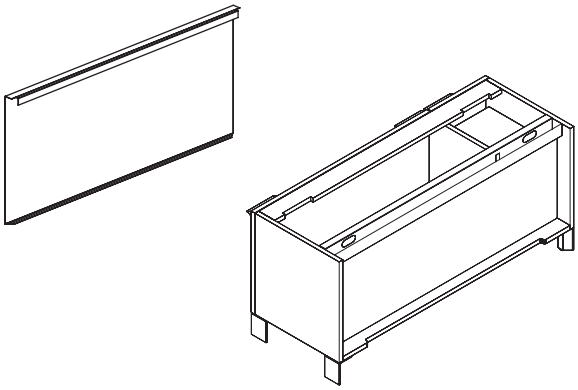
- Specify when there is no requirement for wire trough accessibility.
- 18"D Top for use on low credenzas.
- 24"D Top for use on high credenzas.



Credenza Top for Wire Trough (pages 265-266)

- Specify when using credenzas along a powered panel spine or wall if wire management capability is desired.
- 17"D (actual 16½"D) Top for use on low credenzas.
- 23"D (actual 22½"D) Top for use on high credenzas.
- Veneer tops that accommodate wire trough for high credenzas are available through the 9120 Program on page 218.

Credenza Backs

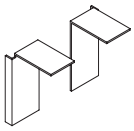


Credenza Backs (page 267)
- Metal credenza backs are optional, and should be specified in single-sided applications where the back side of the credenza will be visible and not using a rail.

Credenza backs can be specified for:
- Low credenza with rail will show an open groove on top cap
- High credenza with rail will show an open groove on top cap
- Low credenza without credenza rail
- High credenza without credenza rail
- Credenza backs cannot be specified with credenzas outfitted with credenza tops for wire trough.
- Credenza backs should be specified to match width of each credenza in the run; backs cannot span multiple credenzas.
- When using credenza back for credenzas with credenza rail, there is an open groove on top cap.
- If working in conjunction with perch cabinet a credenza rail is required for support.

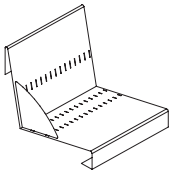
Painted Wood Credenza Accessories

Credenza to Panel Brackets (page 268)
- Attaches credenza to panel run.
- Used to attach credenza to panel frame to provide stability when used with Stride panel frames.
- Handedness is determined by side of credenza that attaches to panel when facing the credenza.
- Back-to-panel bracket kits include left and right brackets.



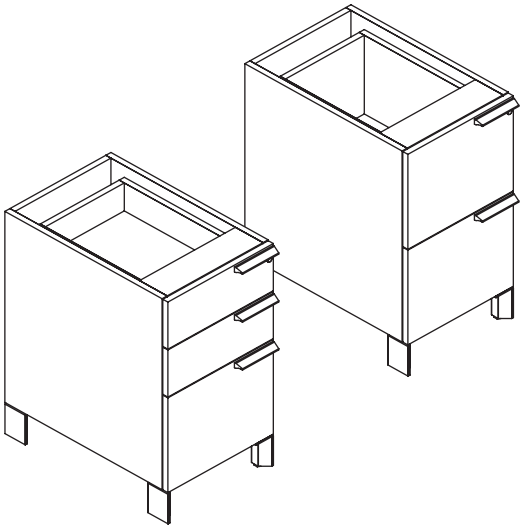
Stability Bracket Kit (page 268)
- Can be used in place of counterweight kit if the freestanding credenza is in front of a panel and one side of the credenza is modular with the panel.

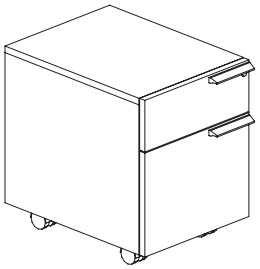
  Note: A credenza is freestanding if it is not ganged to another credenza, is not sharing a credenza top with another credenza, and not attached to a panel. See pages 128-129 for planning guidelines.



Binder Shelf for Corner Credenzas (page 268)
- Provides easy access and visibility for binders stored in corner bin.

Pedestals





Pedestal Configurations:

- Box/Box/File Support
- File/File Support
- Box/File Mobile
- Pedestals are constructed of ¾" thick powder-coated medium density fiberboard with concealed fasteners.
- All pedestals have asymmetric linear pulls in silver finish. Optional seat cushion can be added.
- Pedestals have one core removable lock.

Pedestals are specified as either left- or right-hand units.

- Handedness is determined by user's side, placing the pull on the side closest to the user. Specify a left unit to be on the user's left side (linear pull will be on the right side of the unit); specify a right unit to be on the user's right side (linear pull will be on the left side of the unit).
- Pedestals come fully assembled with a top and back. Support Pedestals will have pilot holes on the top for mounting under worksurfaces.

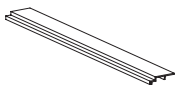
Support Pedestals (page 264)

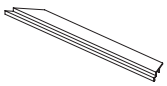
- Support pedestals are 15⅝"W x 24"D x 28"H and are for use under a worksurface or credenza top. Support pedestals have four feet with sleeves to conceal the leveling glides. Bottom trim is standard on all support pedestals.
- Optional side and back trim are aesthetic pieces and are ordered separately and field installed.

Mobile Pedestals (page 264)

- Mobile pedestals are 15⅝"W x 18"D x 20"H, 22" H with optional seat cushion. Mobile pedestals have 4 casters (2 locking). Counterweight kit is included.

Trim for Credenzas, Pedestals, and Towers





Trim for Credenzas, Pedestals, and Towers

Side Trim (page 268)

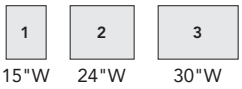
- Side trim is an optional aesthetic piece for credenzas, pedestals, and towers. Used at the end of a run to match standard front bottom trim.

Back Trim (page 268)

- Back trim is an optional aesthetic piece for pedestals and towers. Used to match standard front bottom trim.
- Order to match the width of each component.

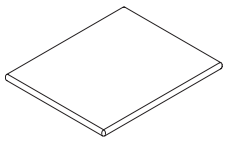
Recommended Seat Cushion Sizes for Mobile Pedestals and Low Credenzas

18"D Cushions for use with
Pedestals and Full Depth Credenza Tops



15"W Mobile Pedestal 15"W Cushion	1
24"W Credenza 24"W Cushion	2
30"W Credenza 30"/15"W Cushion	3 or 1
36"W Credenza 15"/24"W Cushion	1 or 2
42"W Credenza 24"W Cushion	2
48"W Credenza 24"W Cushion	2
60"W Credenza 30"W Cushion	3

Seat Cushions



Seat Cushions (page 268)

- Place on top of low credenza tops or mobile pedestal for quick and convenient additional seating.
- For use on low credenzas only.
- Seat cushion must rest on top of credenza top — order separately.
- COM yardage for seat cushion is 1 yard.

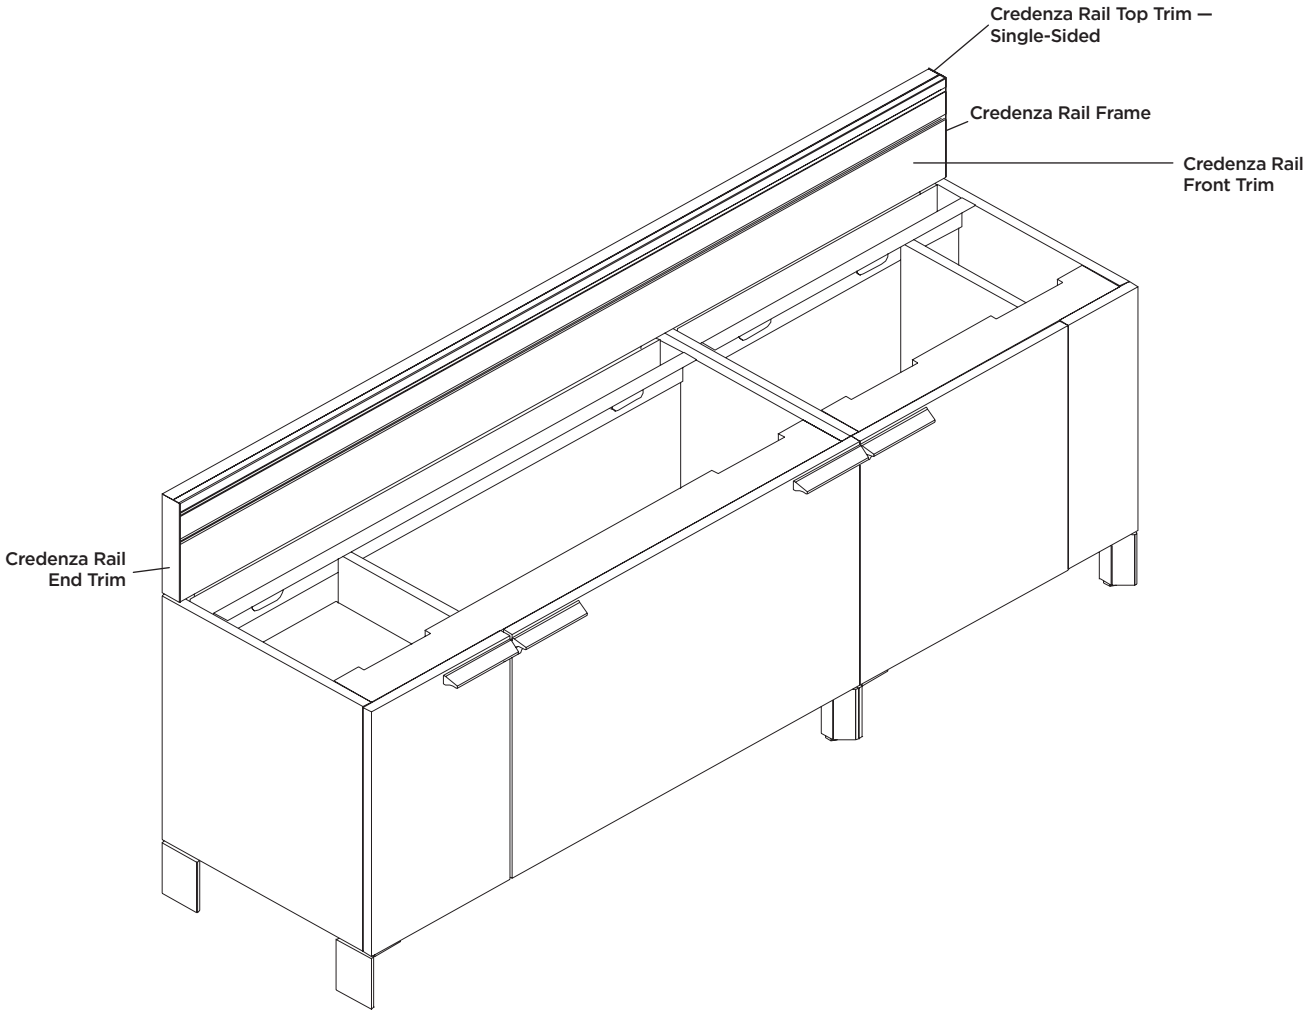
*The **credenza rail** is a single-sided 1½" thick frame that can be fitted atop credenza units.*

Credenza Rail (pages 269-270)

- Provides support for perpendicular run-off worksurfaces.
- When used on low credenzas, credenza rail supports a height adjustment range of 27½" to 30½" in 1" increments.
- Channel for power and data.
- Connection point for accessories.
- Will show groove on top of rail if adding a back panel.

Guidelines:

1. The credenza rail may have only one worksurface mounted to each individual rail.
2. The credenza rail can span multiple credenzas, but must stay on-module with credenzas.
3. Credenza rail must be fully supported by a run of credenzas.
4. A worksurface can be mounted off-modular along the rail at four heights — 27½"-30½"H in 1" increments.
5. All components must be specified separately.



Reference Page

All credenza rail components must be ordered separately.

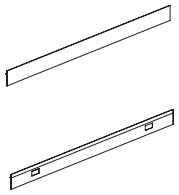
- Credenza rail frame
- Credenza rail front trim
- Credenza rail end trim
- Credenza rail bracket kit
- Credenza rail top trim

Credenza Rail Frame (page 269)

- Available 24"-96" W in 6" increments and can span multiple credenzas. Mounts atop storage credenzas — mounting hardware is included.

Credenza Rail Front Trim (page 269)

- Can be specified ported or non-ported. Ported trim has two openings positioned 6" from the edge and must match the size of the credenza.
- Openings (2.7"W x 1.377"H) must be filled with a duplex receptacle, data port or wire management grommet (TAWG) or there will be visible holes. Non-ported trim is available 24-96"W in 6" increments and can span multiple credenzas.



Credenza Rail End Trim (page 269)

- Specify in an end of run condition to finish an exposed end of the rail. End trim is not required on the end of a credenza rail when adjacent to a tower.

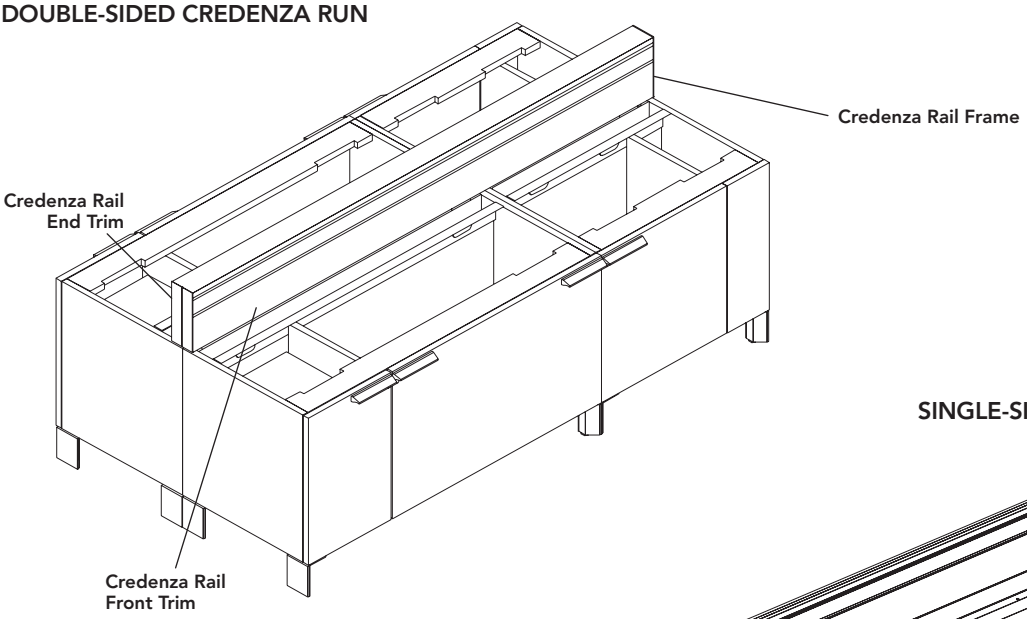
Rail Bracket Kit (page 269)

- Reversible bracket used to mount worksurface on credenza rail.
- Supports height adjustment range from 27½" to 30½".
- Includes two sets of brackets and attachment hardware.

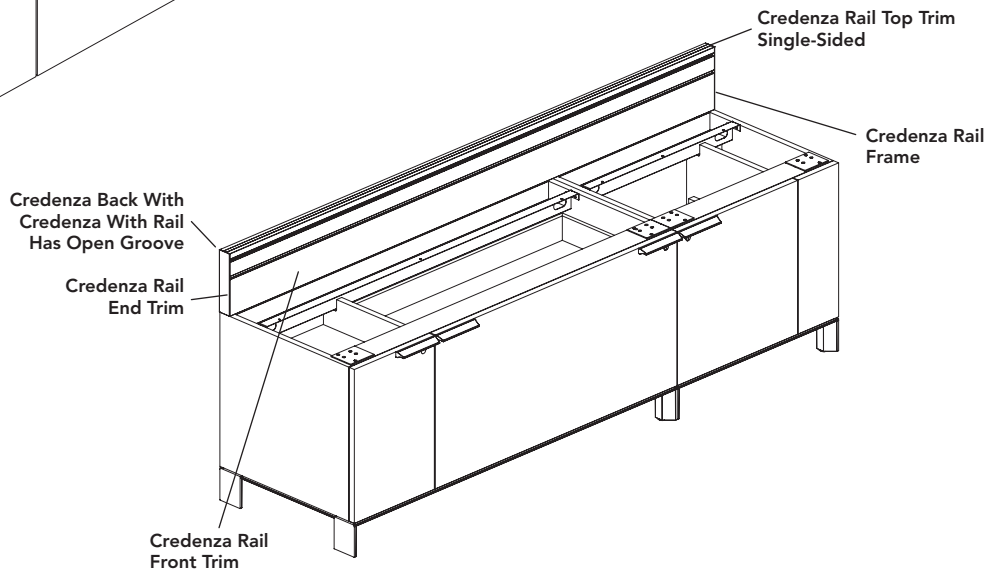
Credenza Rail Top Trim (page 270)

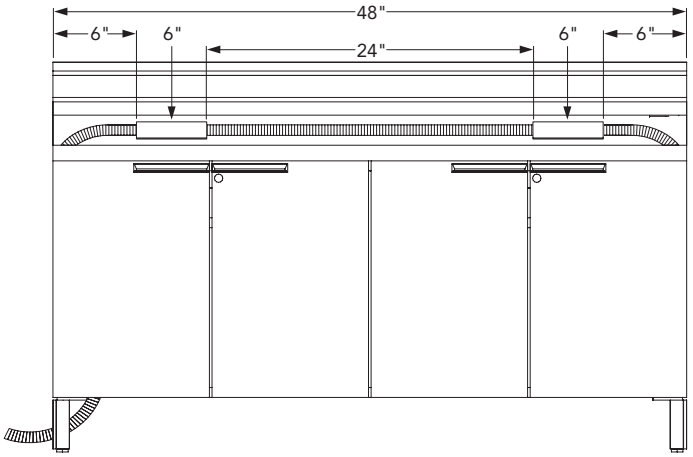
- Available in 24"-96"W in 6" increments and can span multiple credenzas.
- 13"H for overall height of 42½".
- Top trim may be specified off-module to the credenza rail as long as the total length equals the length of the credenza rail frame.

DOUBLE-SIDED CREDENZA RUN

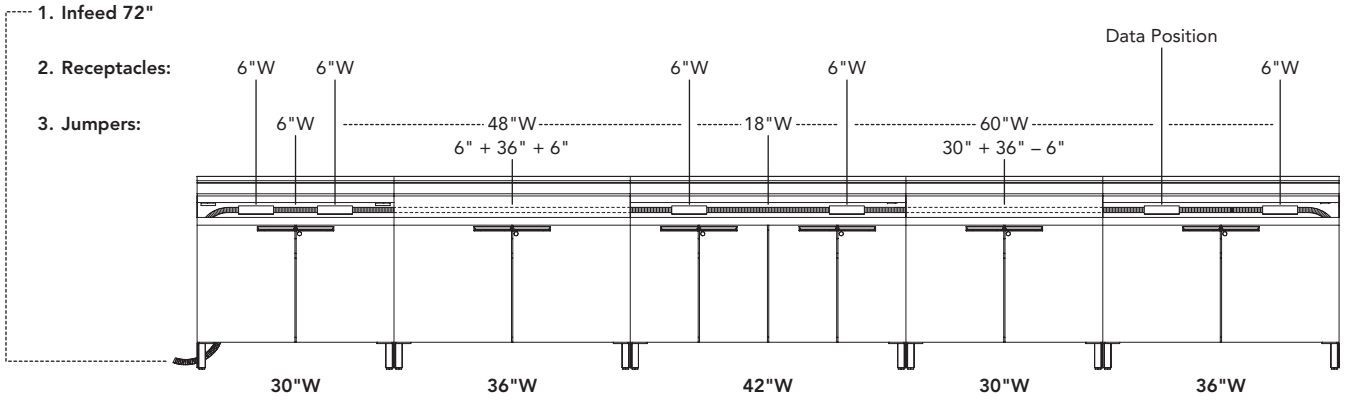


SINGLE-SIDED CREDENZA RUN



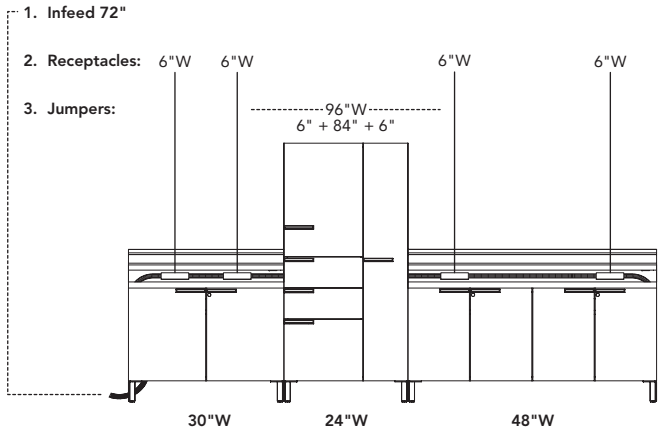


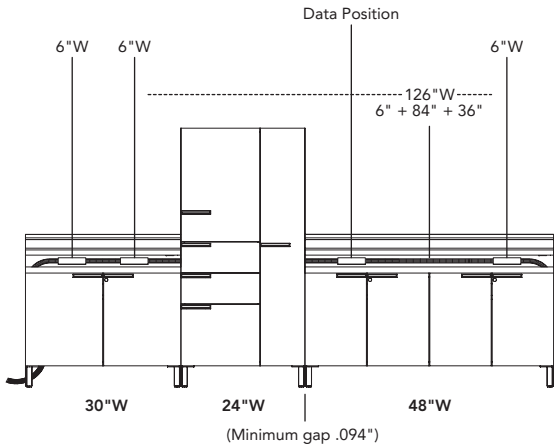
Routing Electrical: Credenzas



Jumper Situation:	Within a credenza	Spanning a credenza	Spanning a credenza with an open position for data.
Formula:	Subtract 24" from width of credenza. 30"W – 24" = 6" Jumper	Add 12" to width of spanned credenza. 36"W + 12" = 48" Jumper	Subtract 6" from total width of middle and end credenzas. (30"W + 36"W) – 6" = 60" Jumper

Routing Electrical: Credenzas with a Tower

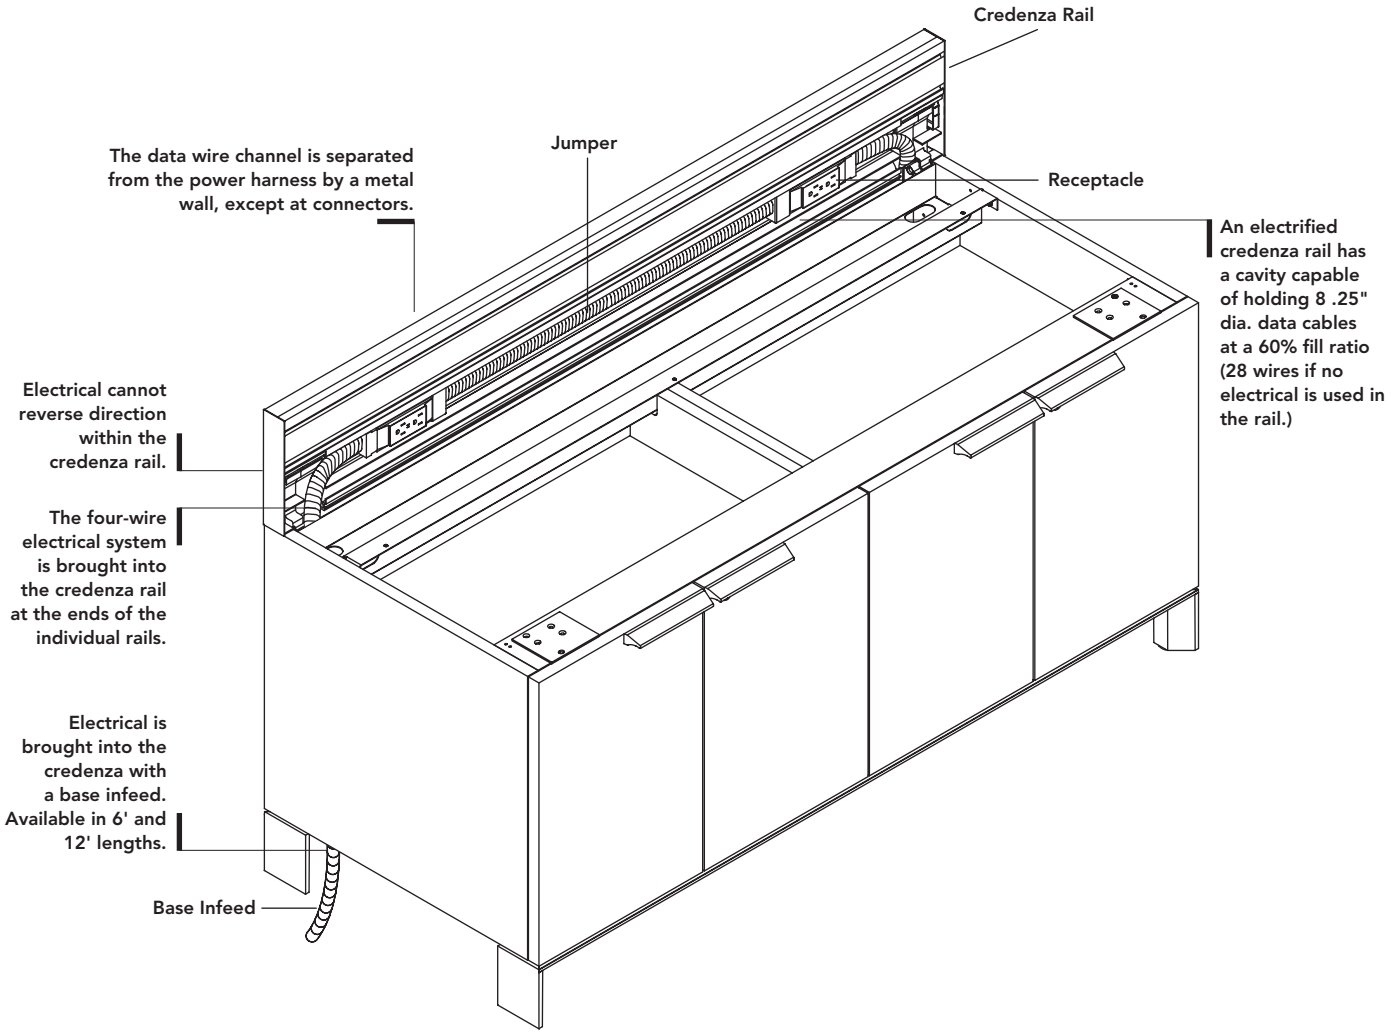




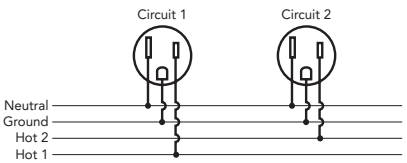
Jumper Situation:	Spanning a tower	Spanning a tower with an open position for data.
Formula:	6" + 84" + 6" = 96" Jumper	6" + 84" + 6" + 6" + 24" = 126" Jumper

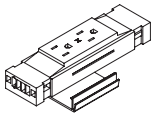
Reference Page

The 4-wire electrical system is a UL183-listed 2 circuit non-dedicated electrical system. The credenza rail supports continuous power and data distribution. With ported trim, the credenza rail provides easy access to power and data. In addition to the standard electrical components, PVC-free components are also available.



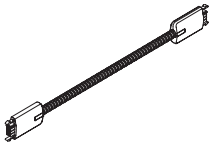
SPECIFICATION INFORMATION





Duplex Receptacle

0"W Desking Power Jumper



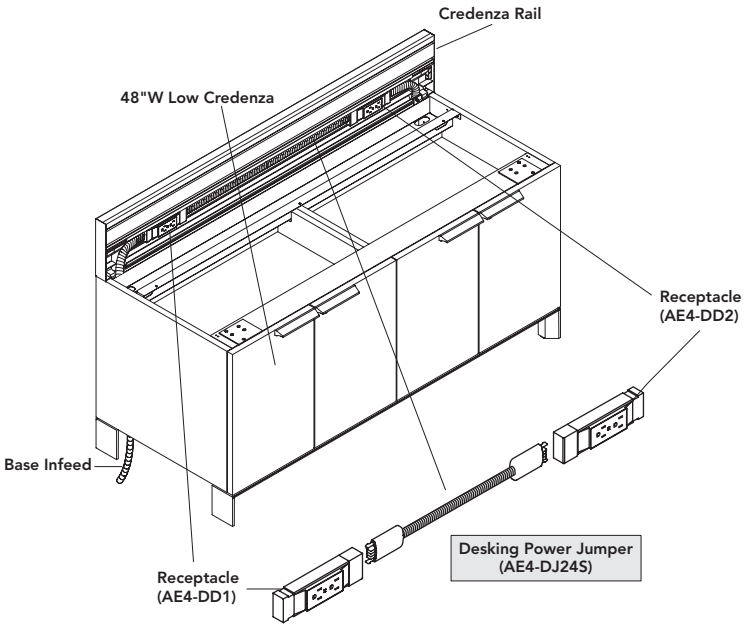
Desking Power Jumper

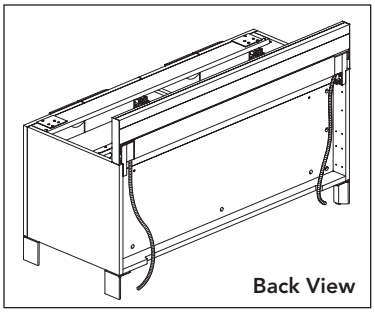
This electrical system has two hot wires, a shared neutral wire, and a shared ground wire. Each circuit is rated at 20 amps. A maximum of 13 duplex receptacles is permitted per circuit. Each receptacle is rated at 15 amps. Consult your electrician to ensure the planned electrical load is within permissible limits.

1. Determine location, quantity, and circuit number for duplex receptacles and power entry.
2. Base electrical infeed delivers power from building to system.
3. Desking power jumpers connect together duplex receptacles or groups of duplex receptacles.

It is the customer's responsibility to ensure that the installation of the electrical components meets all local and national building codes and all other applicable regulations.

A. Routing Electrical: Within Credenza

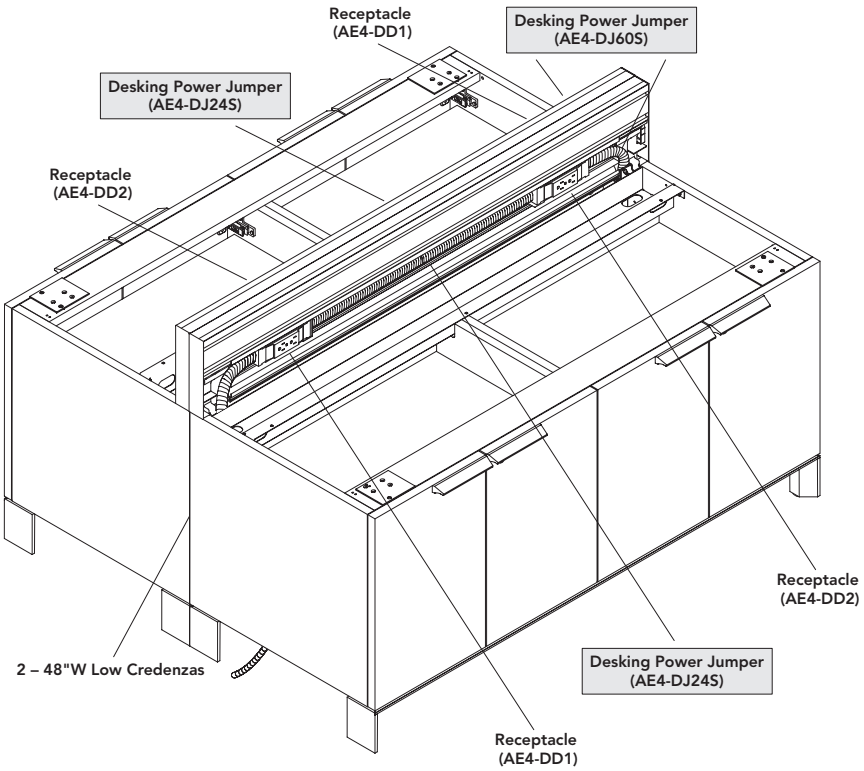




Credenza Width	Jumper Size	Jumper Model
24"	0"	AE4-DJ0S
30"	6"	AE4-DJ6S
36"	12"	AE4-DJ12S
42"	18"	AE4-DJ18S
48"	24"	AE4-DJ24S
60"	36"	AE4-DJ36S

B. Routing Electrical: Within Credenza Back-to-Back

All electrical components must be duplicated in a back-to-back situation. The credenza rail provides power to only one side of the credenza.



When routing from the front side to the back side in back-to-back credenzas use a 60" desking power jumper.

STRIDE

C. Routing Electrical: Spanning a Credenza

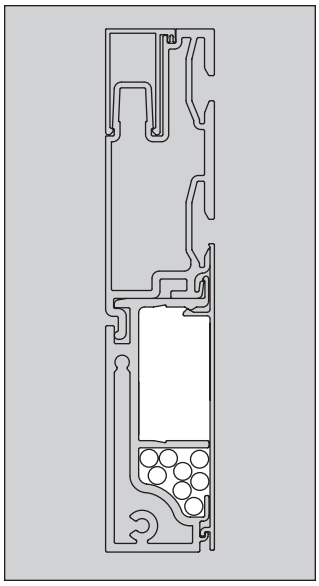
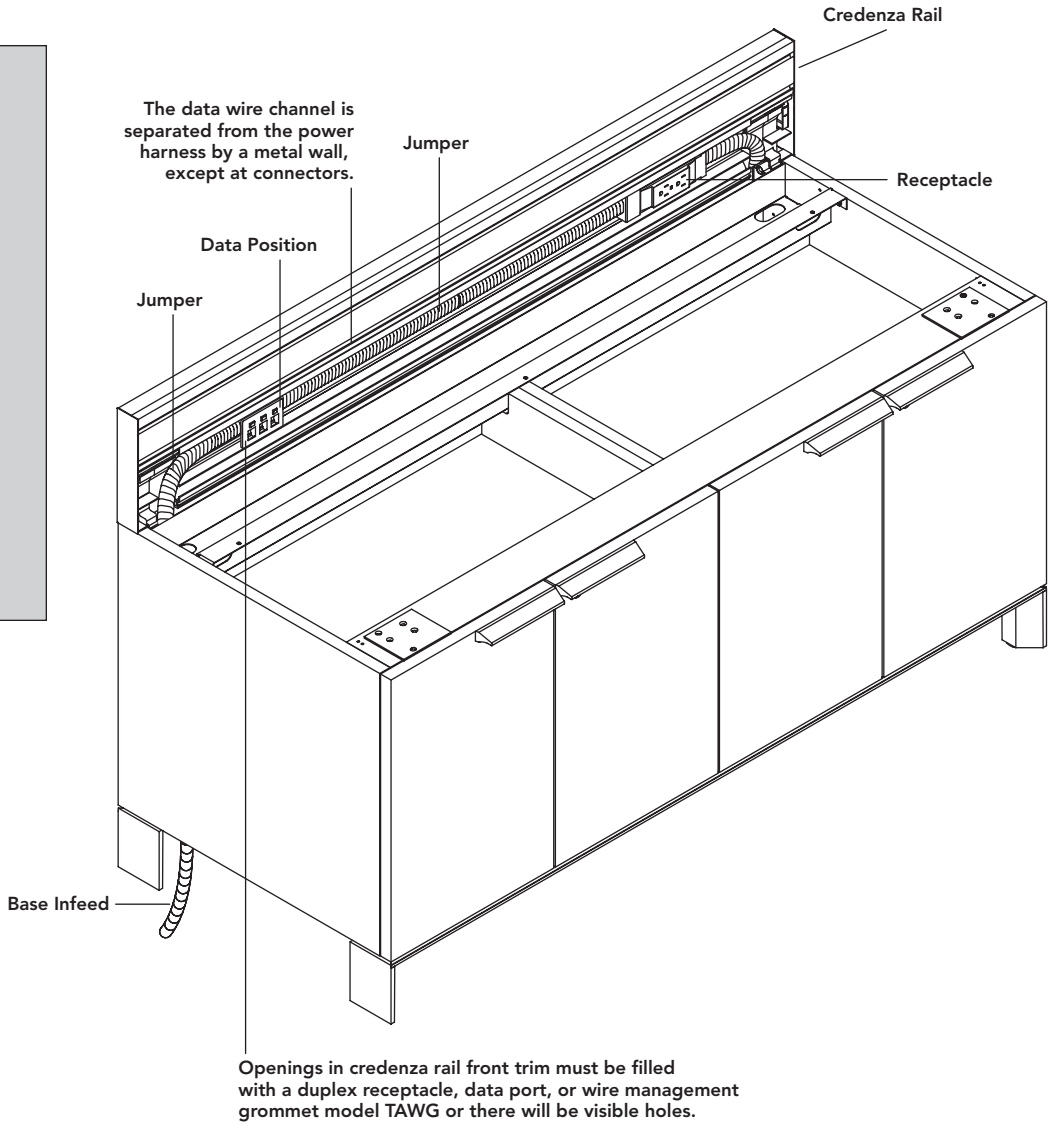
48"	126"	AE4-DJ126S
60"	136"	AE4-DJ136S

*Credenza with open data position

An electrified credenza rail has a cavity capable of holding 8 .25" dia. cables at 60% fill ratio (28 wires if no electrical is used in the rail).

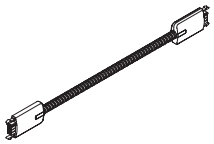




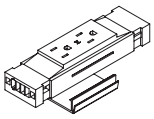
AMP data faceplates (models ATADF3 and ATADF4) and a jack (model ATADJ5) can also be used. An AMP data port extender is needed to install the data faceplate and jack in the credenza rail. The following data port extenders can be ordered from AMP: 1933468-1 (Black), 1993468-2 (Light Almond), and 1933468-4 (Nema Gray).

Reference Page

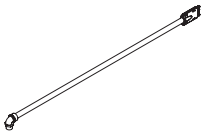
4-Wire Electrical Components for Stride Credenzas



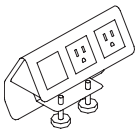
Desking Power Jumpers (page 271)
- UL-listed 4-wire electrical system.
- Ability to conceal power and data receptacles below primary worksurface.
- PVC-free electrical components available.
- Mounting brackets included.
- Cannot reverse direction within credenza rail.
- Length of 4-wire jumper needs to match distance between receptacles as there is not room to loop additional cable.



Duplex Receptacles (page 271)
- 4-wire receptacles are ordered separately for circuit 1 or 2 and are only available in ES Silver.
- 4-wire Infeed cable or jumper plug directly into each end of a 4-wire duplex receptacle.
- 4-wire receptacle adds 6" to length of electrical run.



Base Electrical Infeed Cable (page 271)
- Feed in from floor.
- UL183 listed to be exposed.
- 4-wire infeed can enter from the end of a credenza rail only.
- Credenzas ship with clips under the case for holding infeed off the floor.
- Select quantity of infeed cables depending on individual power requirements.



Worksurface Power/Data Module (page 271)
- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires ⅜" gap. Consider whether ⅜" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining a ⅜" gap may not be possible with worksurfaces that are panel wrapped.

Wood Storage

Configurations
Towers are available in three heights: 42½", 50", and 65"H. Configurations include box/box/file, file/file, file with project drawer. 50" and 65"H towers are available with side access and Landscape™ surface sidelight.

Combination File
Combination files are 65"H and are available either 18"D or 24"D. They can either be specified with a 2 drawer lateral or lateral with a project drawer.

Aesthetic Alignment
Drawer configuration matches across Stride painted wood storage offering and tower heights align with Stride panel segmentation. Towers feature a bottom aesthetic trim piece that provides protection for the bottom edge for the tower.

Painted Wood Construction
¾" thick powder-coated medium density fiberboard with concealed fastener construction.

Footed Base
All towers have a metal footed base with concealed leveling glides. Feet on wood storage match style of Stride footed panels.

Four Hex-head Leveling Glides
The hex-head design of the stem allows leveling to be done even when the tower is fully loaded. Range is 1⅛".

Linear Pull Style
Elegant asymmetric pull style matches across wood storage offering.

Suspension
Heavy-duty ball bearing slides.

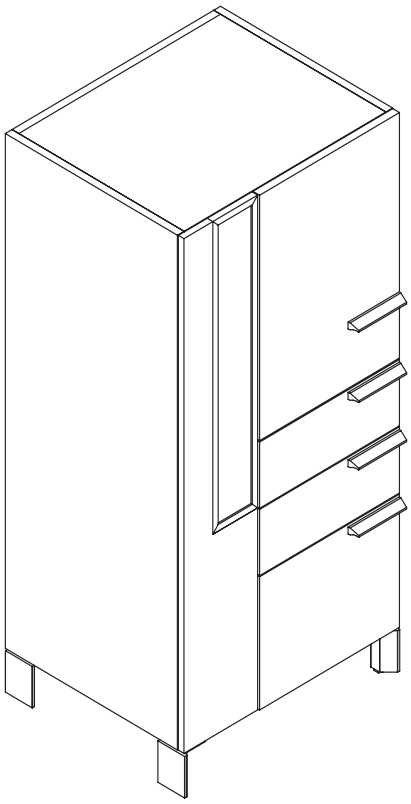
European Hinges
Wardrobe and cabinet door both feature European-style hinged door.

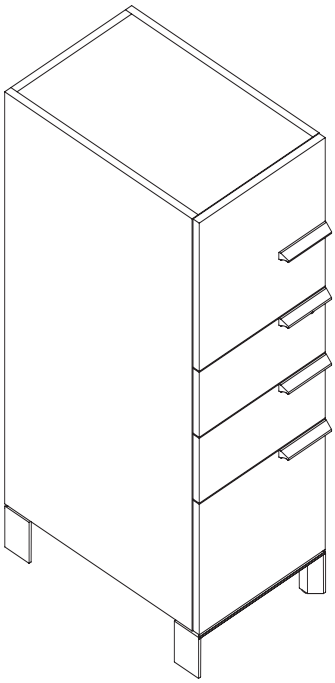
Filing
File drawers can accommodate front-to-back letter filing.

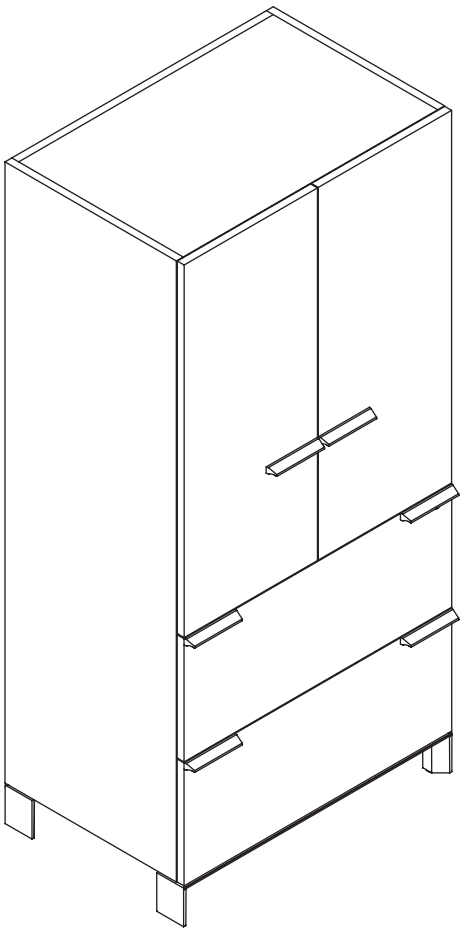
Shelves
Shelves in the cabinet door are adjustable in 2" increments. Shelves in side-access towers are fixed.

Wardrobe Door
All 24"W towers have wardrobe doors. 24"D with a coat rod; 18"D with a coat hook.

Lock Cores
Towers can be shipped with lock cores removed; cores can then be installed after towers are placed. Core removable lock feature allows key numbers to be easily changed in the field. It also facilitates installation.

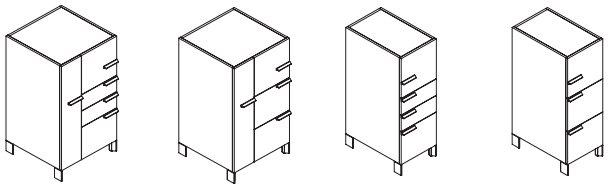




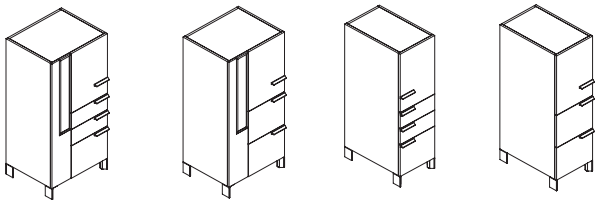


Reference Page

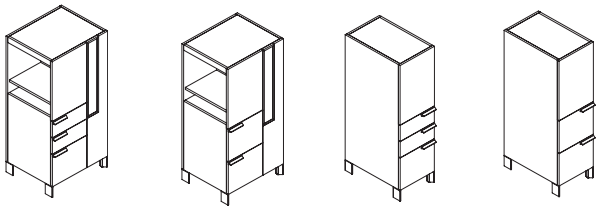
42½"H Personal Towers



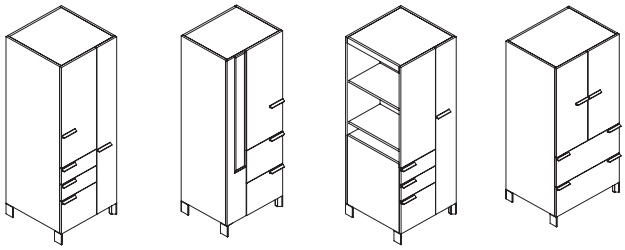
50"H Personal Towers



50"H Personal Side Access Towers



65"H Personal Towers, Side Access Towers, and Combination Files



Landscape™ Surface Sidelight
Optional Landscape surface sidelight ships installed in tower wardrobe door, available in the following materials:

- ***Foundation™***
  Fabric laminated between recyclable PETG resin sheets.
  Available in two finish options: Sand and Pure White.
- ***Quattro***
  Fabric encapsulated between recyclable PETG resin sheets.
  Available in finish option Platinum.

Painted Wood Towers and Combination Files

Personal Towers
- 18"D towers match the depth of low credenzas.
- 24"D towers match the depth of high credenzas.
- 24"W towers have a 7½"W wardrobe door. 24"D with a coat rod; 18"D with a coat hook.
- Towers feature Silver linear pulls.
- Locks — 24"W towers with sidelight, 15⅝"W towers and combination files have one lock to secure drawers. All other towers have two locks. One secures the wardrobe door and the other secures all drawers. Cabinet doors do not lock.

42½"H Personal Towers (page 272)
- 15⅝"W towers must be attached to a worksurface or a credenza top.
- Actual tower height is 37½" with a 5"H footed base. The feet are located at the outside corners of the tower.

50"H Personal Towers (page 272)
- Actual tower height is 45" with a 5"H footed base. The feet are located at the outside corners of the tower.
- 15⅝"W towers and 24"W towers with sidelight have one lock. All other 24"W towers have two independent locks.
- Back and side trim can be ordered separately to match standard front bottom trim.
- Shelves inside the cabinet door are height adjustable in 2" increments.

50"H Personal Side Access Towers (page 273)
- 15⅝"W towers must be attached to a worksurface or a credenza top.
- Actual tower height is 45" with a 5"H footed base. The feet are located at the outside corners of the tower.
- Shelves are fixed and not removable in side access personal towers.
- Back and side trim can be ordered separately to match standard front bottom trim.

65"H Personal Towers (page 274)
- Actual tower height is 60" with a 5"H footed base. The feet are located at the outside corners of the tower.
- 24"W towers with sidelight have one lock. All other 24"W towers have two independent locks.
- Back and side trim can be ordered separately to match standard front bottom trim.
- Cabinet door on 65"H towers has two shelves, adjustable in 2" increments.

65"H Personal Side Access Towers (page 274)
- Actual tower height is 60" with a 5"H footed base. The feet are located at the outside corners of the tower.
- Shelves are fixed and not removable in side access towers.
- Back and side trim can be ordered separately to match standard front bottom trim.

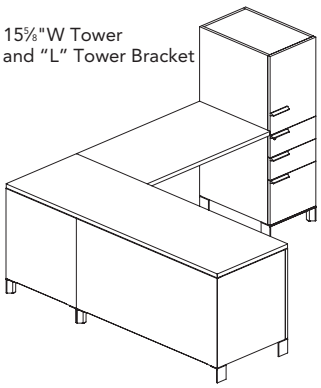
65"H Combination Files (page 275)
- 18"D combination files match the depth of low credenzas.
- 24"D combination files match the depth of high credenzas.
- Combination files feature Silver linear pulls.
- Actual combination file height is 60" with a 5"H footed base. The feet are located at the outside corners of the combination file.
- Each combination file has two shelves, adjustable in 2" increments.
- Combination files have one lock.
- Stratawood veneer has a consistent straight-grain pattern.
- Natural veneer will have cathedrals and as a natural material is subject to nature's quality control with variations in grain pattern and tone.

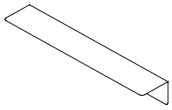
Painted Wood Towers and Combination File Accessories

Worksurface Supports
Tower has pre-drilled pilot holes on pull side of cabinet to accommodate addition of the "L" tower bracket.

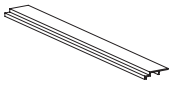
"L" Tower Bracket - An "L" tower bracket can be ordered separately and fitted to any tower to support worksurfaces at 29½"H.

15⅝"W Tower
and "L" Tower Bracket

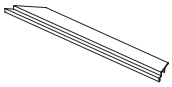




"L" Tower Bracket (page 276)
- Used to support a worksurface at 29½"H.
- Attaches using pre-drilled holes inside the tower.
- Can be attached to 18"D or 24"D towers.
- When using the "L" tower bracket, the depth of the worksurface and tower should be equal.
  18"D worksurface — 18"D tower
  24"D worksurface — 24"D tower
- "L" tower bracket is for use with laminate and painted wood storage only.



Side Trim for Credenzas, Pedestals, and Towers (page 276)
- Side trim is an optional aesthetic piece for credenzas, pedestals, and towers. Used at the end of a run to match standard front bottom trim.



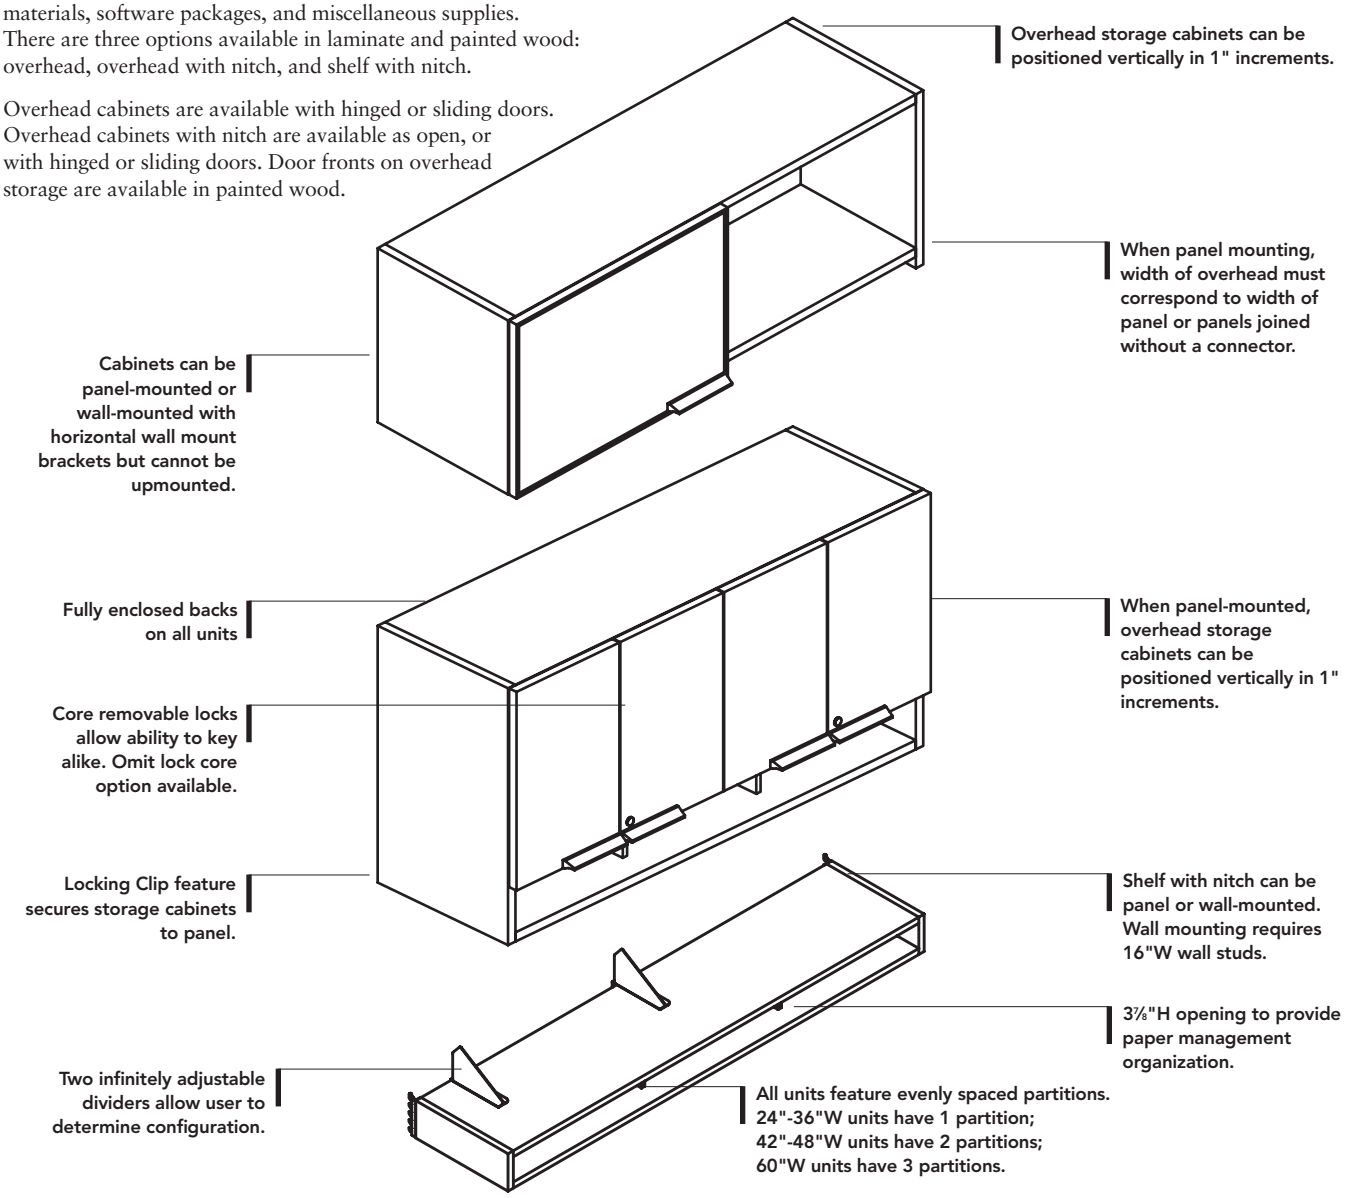
Back Trim for Pedestals and Towers (page 276)
- Back trim is an optional aesthetic piece for pedestals and towers used to match standard front bottom trim.
- Order to match with each individual component.

Wood Storage

Reference Page

Overhead storage components maximize the use of space in the workstation and also provide convenient access to binders, reference materials, software packages, and miscellaneous supplies. There are three options available in laminate and painted wood: overhead, overhead with nitch, and shelf with nitch.

Overhead cabinets are available with hinged or sliding doors. Overhead cabinets with nitch are available as open, or with hinged or sliding doors. Door fronts on overhead storage are available in painted wood.



Product Dimensions

Overhead Storage Cabinet

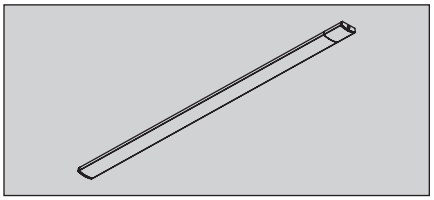
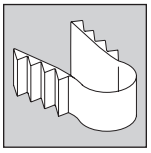
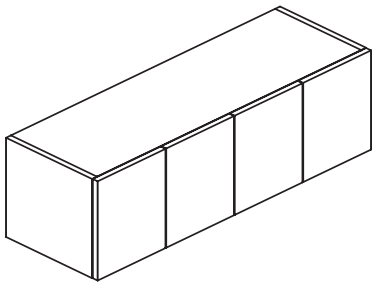
LED undercabinet light can be mounted beneath laminate or painted wood overhead cabinets for a low profile lighting option. (Do not use recessed tasklights with painted wood storage.)

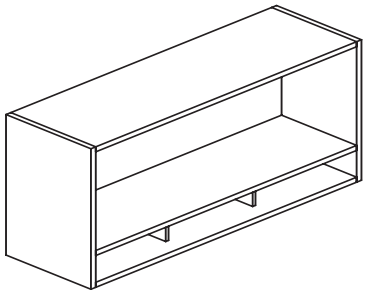


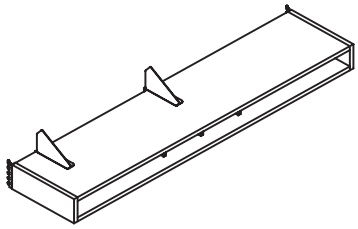
Cord retainer clips fasten into panel slots to anchor power cords. Available in black only. Three clips ship with each LED undercabinet light.

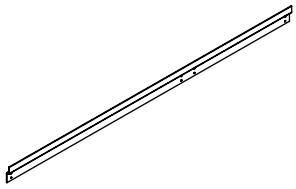


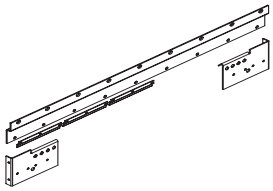
STRIDE

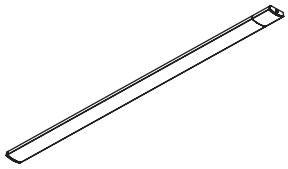


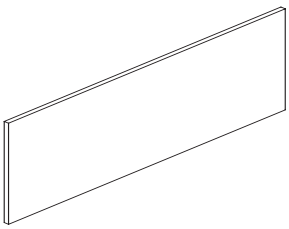


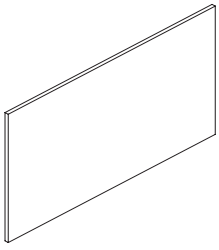












Painted Wood Overheads

Overhead Cabinets (pages 277-278)

- 24"-36"W hinged door cabinets have 2 doors with one lock on the front of the cabinet; 42"-60"W have 4 doors with 2 independent locks on the front of cabinet.
- Overhead cabinets have Silver linear pulls.
- 42"W-60"W overhead cabinets have a center security septum.
- Sliding door overheads have one door with one lock that can only be locked when the door is in the left-hand position.
- Overhead cabinets feature self-engaging safety latch to secure the cabinet to panel.
- Specify low profile LED tasklights.
- Width can correspond with the width of a panel or panel joined without a connector.
- Attachment hardware included for panel-mounting. Cannot be upmounted.
- Order horizontal wall-mount brackets separately. Add for wall-mounted application.
- For locking specification see pages 414-416.
- Overhead cabinets with nitch feature a paper management shelf with a 3⅞"H opening.
- Stratawood veneer has a consistent straight-grain pattern.
- Natural veneer will have cathedrals and as a natural material is subject to nature's quality control with variations in grain pattern and tone.

Shelf with Nitch (page 277)

- Painted wood.
- Paper management shelf with a 3½"H opening.
- Ships with attachment hardware for panel-mounting applications.
- Order horizontal wall-mount brackets separately. Add for wall-mounted application, requires 16"W wall studs..
- Shelf with nitch has two metal shelf dividers on top that are infinitely adjustable and removable.

Horizontal Wall-Mount Brackets (page 279)

- Use to attach an overhead directly to wall.
- Attachment hardware not included.

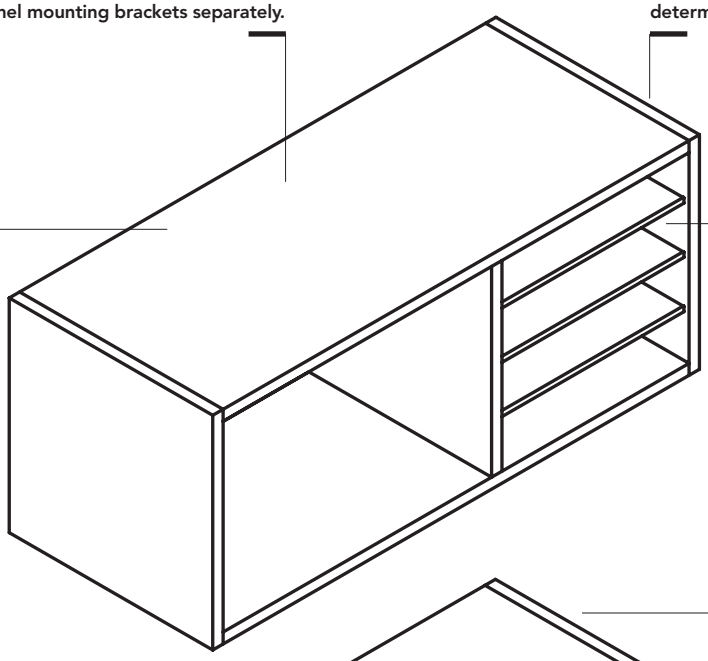
Undercabinet LED Light (page 279)

- Low profile energy-efficient LED tasklight for use with overhead storage cabinets.
- 15W power supply (0.125 amp).
- 3500K color temperature.
- 95 footcandles at 18".
- Magnetic or screw-mount option — attachment hardware included.
- Power drive is attached to plug: allow 1⅞"D space at outlet.
- Includes 3 cord retainer clips.
- For daisy chain capabilities and additional information see page 405.

Tackboards (page 279)

- 15"H tackboards are designed to work with overheads with nitch.
- 20"H tackboards are designed to work with overheads without nitch.
- Wall-mounted tackboards come with brackets to mount to wall. Does not require wall track.

Reference Page

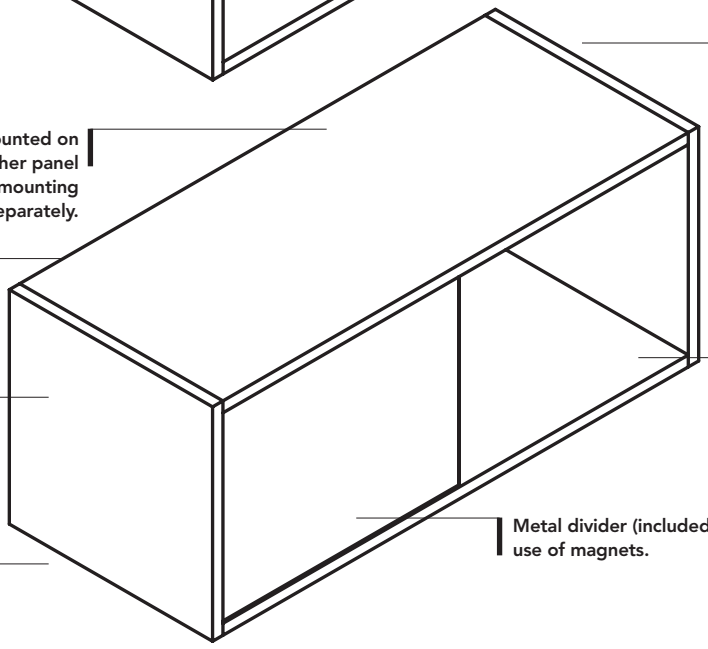


Full-depth horizontal storage can be panel-mounted or hung below the worksurface. Worksurface attachment hardware included. Specify panel mounting brackets separately.

24"W and 36"W units are available left- or right-handed. The side with shelves determines the handedness.

When panel-mounting cabinet must be same width as panel, or panels joined without a connector.

Cabinet is open with removable shelves. 24"W and 36"W cabinets have three shelves and must be specified left or right handed; 30"W cabinets have three shelves that can be positioned on either side; 42"W, 48"W, and 60"W units have six shelves, three on each side.



Shared cabinet splits access between the front and back.

Shared horizontal storage can be mounted on a panel or credenza rail. Specify either panel mounting bracket or credenza rail mounting bracket kits separately.

When mounting on credenza rail, must be mounted on two back-to-back rails.

When panel-mounting, cabinet must be same width as panel, or panels joined without a connector.

When mounted on credenza rail the cabinet can be mounted on or off-module.

Available left or right handed. The open side of the cabinet determines the handedness.

Metal divider (included) allows use of magnets.

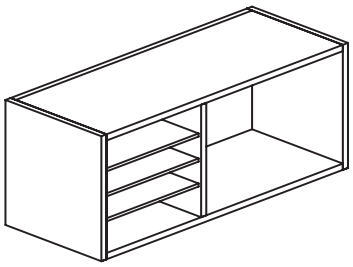
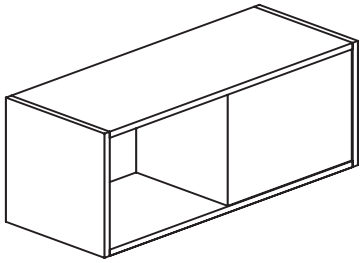
Reference Page

Painted Wood Horizontal Storage & Perch Cabinets



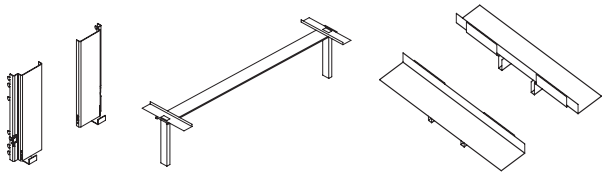
Full Depth Horizontal Storage (page 280)

- Can be panel-mounted with panel mounting kit ZHFPMK specified separately. The width of the unit must match the width of the panels.
- If horizontal storage is mounted under a panel-mounted worksurface, it must be undersized to accommodate supports.
- With overhead storage, floor support is needed within 24" of each side of the horizontal storage cabinet.
- Horizontal storage can be supported using a floor support when overhead storage is not being utilized. The floor support needs to be within 24" of the unit on one side and a cantilever on the opposite side. The cantilever must be within 6" of the horizontal storage, and no more than 48" from the floor support.
- If a 9120 worksurface is used it must have an external worksurface support channel installed and must be a minimum of 24"D to provide clearance for mounting hardware. For worksurfaces less than 24"D a special worksurface with an internal stiffener must be ordered.
- Hardware for wall-mounting is not included.
- Removable shelves included.
- 24"W-36"W units have 3 metal shelves. 42"W-60"W units have a total of six shelves (three on each side.)



Shared Horizontal Storage (page 280)

- Can be mounted atop panels or credenza rails. When mounting on credenza rails, it must be mounted on two back-to-back credenza rails. Mounting hardware ordered separately.
- For panel mounting specify panel mounting kit model ZHSPMKXX.
- For rail mounting specify model ZHSRMK.
- Splits the access between front and back.
- Includes a metal divider which provides a magnetic surface.
- Metal divider can be specified in markerboard paint MKP.
- When panel-mounting, width of unit must match width of panel.
- Cannot be mounted on panels taller than 50".



Horizontal Storage Mounting Kits (page 280)

- Unique mounting kits for: full depth horizontal, shared horizontal based on panel width, and credenza rail mount

Perch Cabinets (page 281)

- Perch cabinets are attached to the credenza rail.
- Ships with rail attachment bracket and two vertical uprights that rest on on the credenza top.
- Painted wood perch cabinets feature Silver linear pulls.
- The back of the perch cabinet is flush with the back of the credenza rail.
- The credenza rail must have a top trim piece installed where the perch cabinet is installed.
- All perch cabinets are non-locking.

For specification information see pages 233-243.

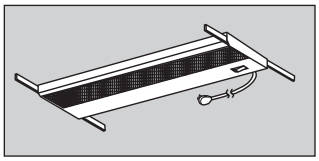
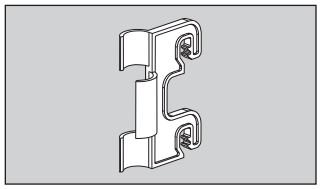
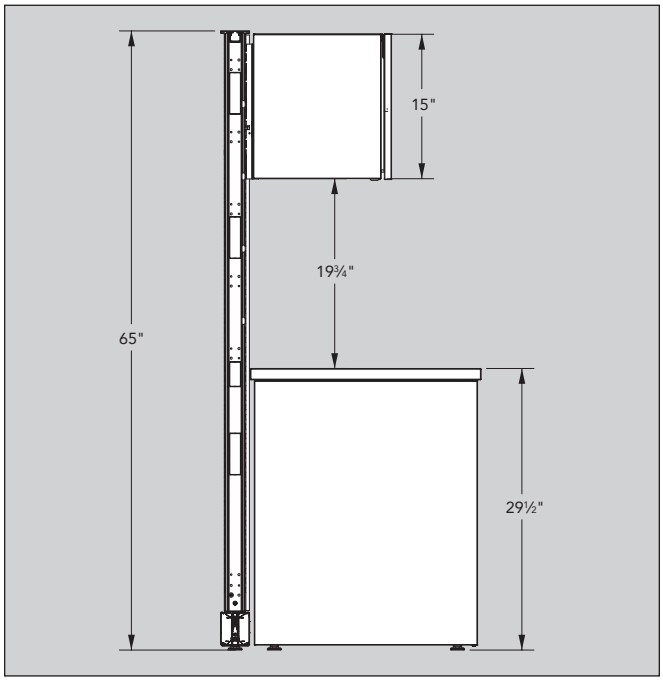
Height	15"
Inside height	12¾" Receding door 11⅝" RTA models 12¾"
Open Shelf	
Width	24", 30", 36", 42", 48", 60"
Depth	12⅞" RTA models 11½"
Height	4⅝" RTA models 5⅜"



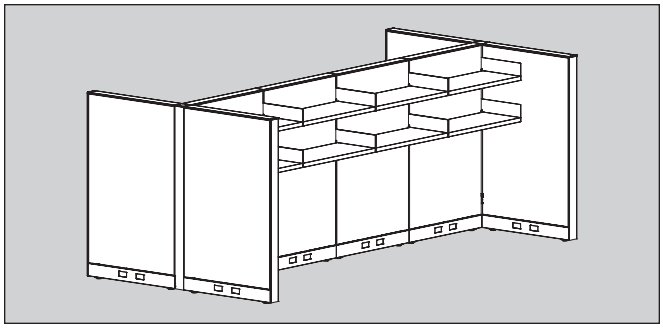
Recessed task lights can be mounted beneath storage shelves and overhead storage cabinets. Additional panel hung and freestanding lighting options are available.
Note: Do not use with laminate or painted wood storage.



Cord retainer clips fasten into panel slots to anchor power cords. Available in black only. Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.



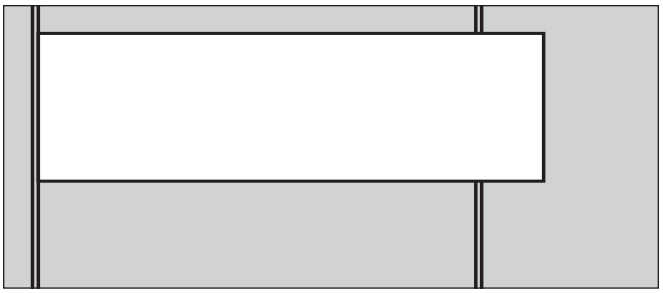
Overhead storage cabinets and open storage shelves can be mounted on Stride structural and stacking panels to a maximum height of 80". When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket. For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected. Base panel frames with stacking frames that have an overall height of 57½" also use the YZ bracket.



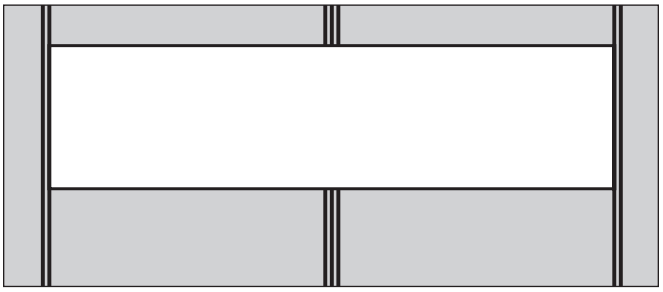
In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

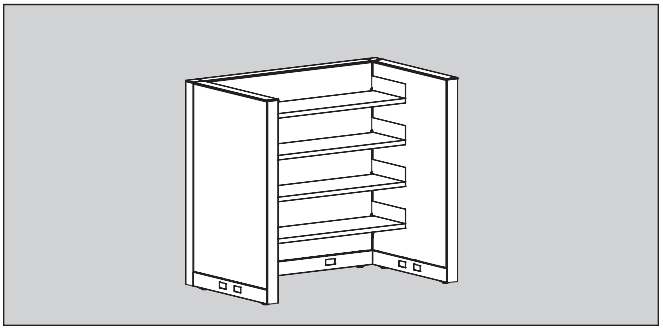
- Stacking frames should be added to all the parent run panels, and to each return-panel run.
- Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.



Metal Overhead Cabinets can be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets. Overhead cabinets can also be mounted on panels wider than the overhead cabinet when using off-module kit **Z2NM**. One side of overhead must be held on module.



Storage shelf, receding door overhead, RTA overhead, and RTA shelf width must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.



Up to 5 units can be hung on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

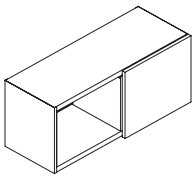
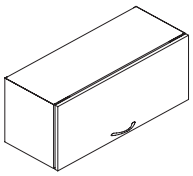
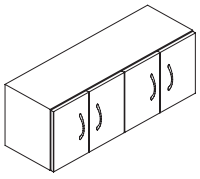
Overhead Storage Cabinets



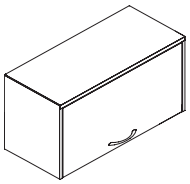
Metal Case with Single Sliding Door



Metal Case with Metal Flipper Door



Metal Case with Metal Hinged Doors



Metal Case with Metal Receding Door

15"H Overhead Storage Cabinet (page 286)
- Steel cabinet with backstop. Cabinets are 14¼"D x 15"H.
- Available with sliding, hinged, or flipper door(s).
- Easy-Assist flipper door optional — requires minimal assistance in opening and closing. Not available on 60"W cabinets, specify 2–30"W flipper door cabinets with Easy-Assist.
- Self-engaging safety latch to secure cabinet to panel.
- Arch or Square pull optional on flipper and hinged doors.
- 60"W flipper cabinet has 2–30"W doors with 2 independent locks.
- 24"-36"W hinged door cabinets have 1 lock and 2 optional pulls, 42"-48"W have 2 locks and 4 optional pulls.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 414-416.
- 15"H cabinets can be mounted on a panel equal or up to 18" narrower than the cabinet using provided panel attachment brackets.
- Sliding doors have a built in pull.
- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket. For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected. Base panel frames with stacking frames that have an overall height of 57½"H also use the YZ bracket.

Open Shelf (page 287)
- Metal shelf with back stop. Locking clips (2) standard.
- Will accommodate recessed task lighting —ordered separately.
- Width can correspond with width of panel, or 2 panels joined without a connector.

Open Shelf

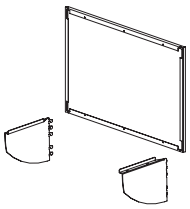
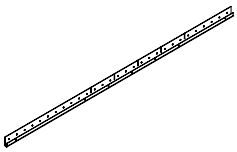
42"W	100 lbs.
48"W	110 lbs.
60"W	138 lbs.

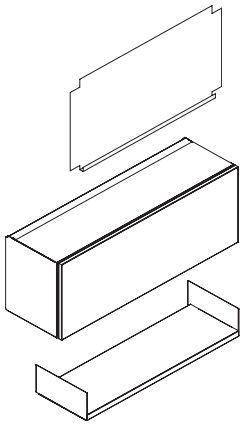


Upmount Kits for Assembled Overhead Cabinets (page 286)
- Consists of two upmount brackets, full back panel and required installation hardware.
- Allows mounting of an assembled cabinet up to 15" above height of panel. Cannot be used with RTA models.
- Specify "Z2" prefix model number upmount kits with 15"H, 30"H, 35"H, 50"H, or 65"H frames; and "Z4" prefix model numbers for use with 22½"H, 42½"H, or 57½"H frames.
- Brackets require a clearance of 6" below bottom of overhead cabinet.
- Width must correspond with width of panel frame or 2 panel frames joined directly in-line.
- Full back panel adds ½" to depth of overhead case.
- Full back panel only used when upmounting cabinet.



Horizontal Wall Track (page 286)
- Allows mounting overheads on permanent wall structures ONLY.
- Cannot be used with RTA models.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- Field modification necessary for use with sliding door overhead.
- Available in black only. Attachment hardware not included.

15"H Receding Door Overhead (page 287)
- Steel cabinet with open back. Optional back ordered separately.
- Arch or Square pull optional.
- 60"W cabinet has 2 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specification, see pages 414-416.
- Cabinets are 13¼"D x 15"H. When door is recessed, interior dimensions are 12⅛"D x 11⅛"H.



Receding Door Overhead Back (page 287)
- Optional, order width to match receding door overhead.

Ready to Assemble (RTA) Flipper Door Overhead (page 287)
- Steel cabinet with open back.
- 60"W and 72"W cabinets have 2 doors with independent locks.
- Accommodates recessed task lighting — ordered separately.
- Random keying, for locking specifications see pages 414-416.
- Cabinets are 12"D x 15"H. Interior dimensions 11⅝"D x 12¾"H.

Ready to Assemble (RTA) Shelf (page 287)
- Metal shelf with locking clips.
- Accommodates recessed task lighting — ordered separately.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

NOTE: Refer to individual product pages for upcharges.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- Camira, memos@camirafabrics.com 1.616.288.0655
- CF Stinson, cfstinson.com 1.800.841.6279
- HBF Textiles, hbftextiles.com 1.877.494.5727
- Maharam, maharam.com 1.800.645.3943
- Ultrafabrics, ultrafabricsllc.com

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

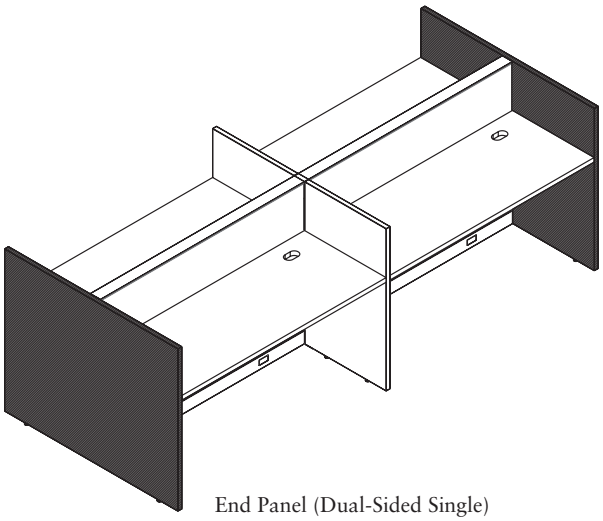
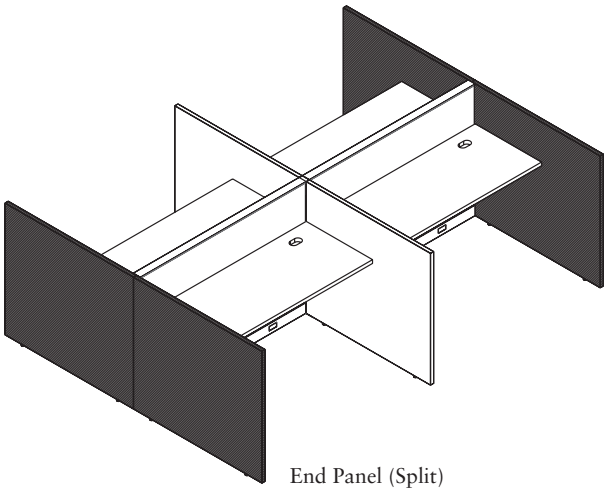
Gallery Panels

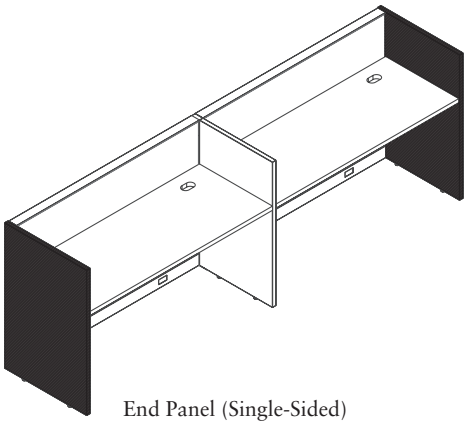
Gallery Panels are ideal for bringing natural wood elements to workstations and providing privacy. Allsteel Gallery Panels are designed to work universally across 4 product platforms. Please follow the product guidelines for proper specification.



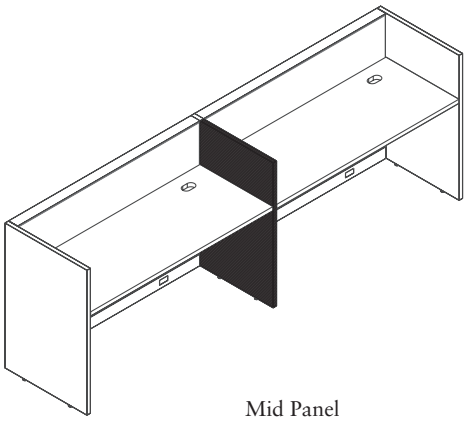
End Panel (Dual-Sided Single)



End Panel (Split)



End Panel (Single-Sided)



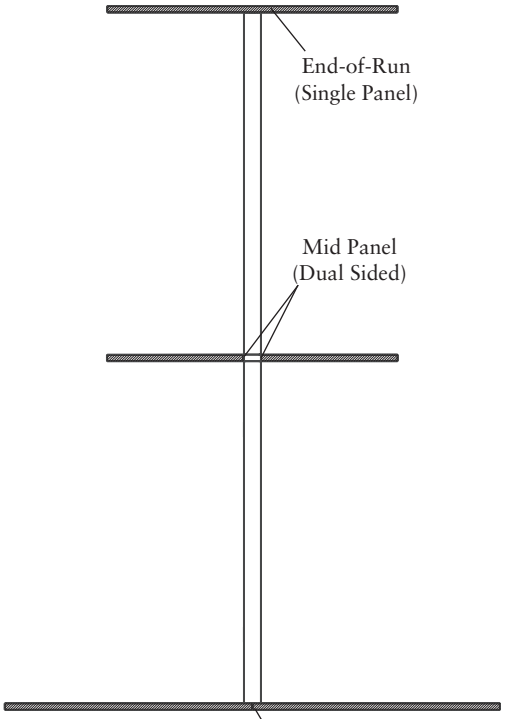
Mid Panel

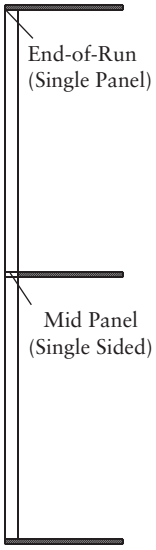
Gallery Panels

- Available to connect to Frame & Tile, Benching systems, and other Gallery Panels
- Standard Gallery Panels connect to Benching and Frame & Tile systems, and Gallery-to-Gallery panels connect to other Gallery Panels
- Gallery Panels can be used in freestanding applications. See page 308 for specification requirements.

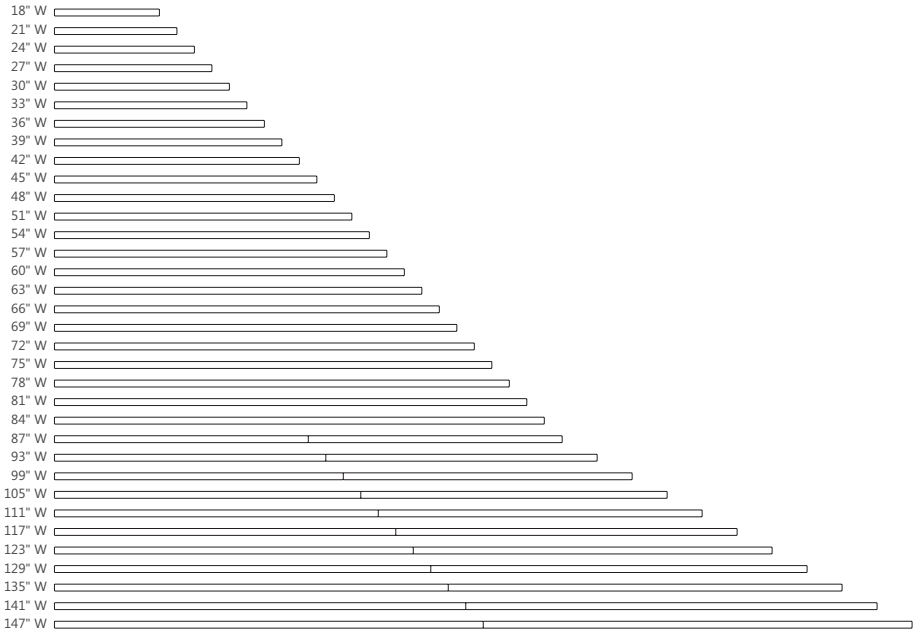
Standard Gallery Panels

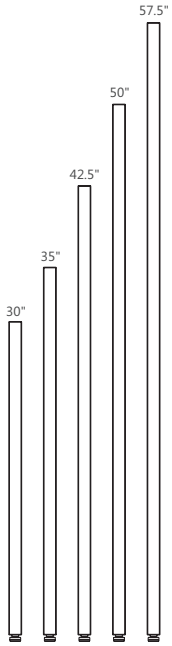
- Standard Gallery panels connect to Benching and Frame & Tile systems and are available as End-of-Run Single, End-of-Run Split (panel systems only), and Mid Panels (panel systems only)
- Made of 1⅛" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 60"W. Horizontal grain is available on all sizes.
- Single Panel widths are available in 3" increments from 18"W to 84"W. Split Panel widths are available in 6" increments from 87"W to 147"W.
- Standard Gallery Panel sizes up to 84"W come as a single piece. Sizes 87"W though 147"W are split panels and come in two pieces.
- Grain matching is not available on split panels.
- Split panels can only be used in End-of-Run configurations with Stride or Terrace panel systems.
- Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Standard Gallery panel widths are true to size
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- Standard Gallery panels can be used with Single Sided Further adaptive for privacy and stability along the beam.
- All configurations are non-handed.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in gallery panel width (i.e. storage or worksurface tie-in)





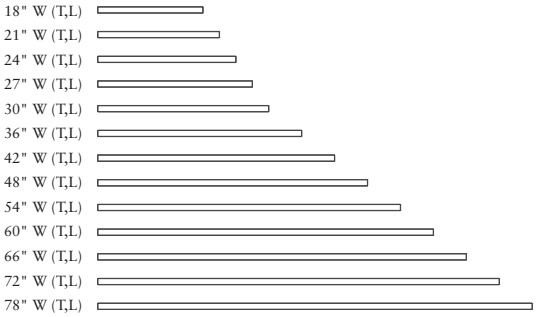
Standard Gallery Panel Widths

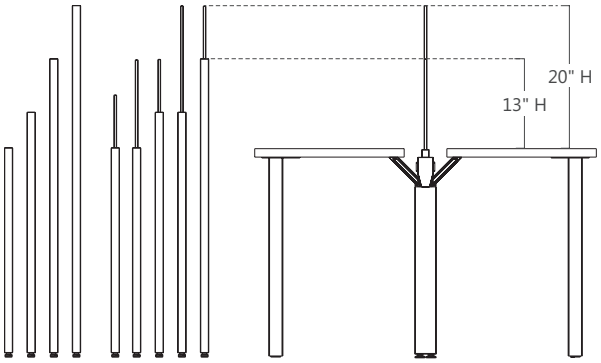




Gallery Panel Heights

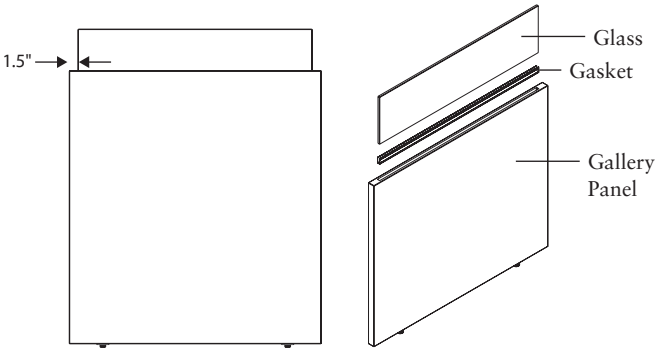
Gallery-to-Gallery Panel L/T Widths



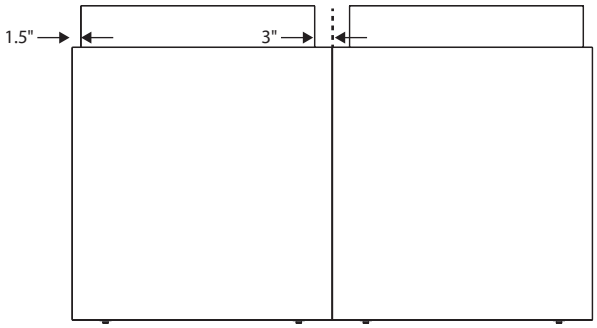


Standard Gallery Panels

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset 1½" from each end of the panel.
- Single-piece Gallery Panels for use with integrated glass require glass 3" shorter than the panel width.
- For split Gallery Panels, specify glass for each piece separately.
- Split Gallery Panels for use with integrated glass require glass that is 4½" shorter than panel width (individual piece).
- Glass is available in 3 colors: Clear, Frosted, Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H.
- Glass is available on all Gallery Panel widths.
- For benching systems, maximum allowable benching height cannot exceed 50"H with or without glass. Overall Gallery Panel height includes the glass.
- Specify glass models separate from Gallery Panel models.
- Glass Panels at 30"W and under are not UL listed.



Standard Single Panel with Glass



Standard Split Panel with Glass

Find the Gallery Glass width appropriate for your Gallery Panel width.

Shaded example: For the 18"W Gallery Panel, Gallery Glass should be ordered with width of 15".

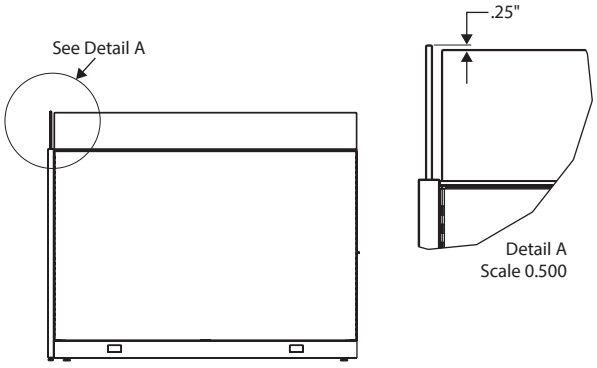
129"W Split Panel	60"W
135"W Split Panel	63"W
141"W Split Panel	66"W
147"W Split Panel	69"W

NOTE: Integrated glass height will align with Frameless Glass on Stride and will sit ¼" higher than Frameless Glass on Terrace (see detail below).



Gallery-to-Gallery Panels

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset ½" from each end of the panel.
- Gallery-to-Gallery Panels for use with integrated glass require glass equal to the panel width.
- Glass is available in 3 colors: Clear, Frosted, Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H
- Glass is available on all Gallery Panel widths. Glass panels at 30"W and under are not UL listed.
- For benching systems, maximum allowable benching height cannot exceed 50"H with or without glass. Overall Gallery Panel height includes the glass.
- Specify glass models separate from Gallery Panel models

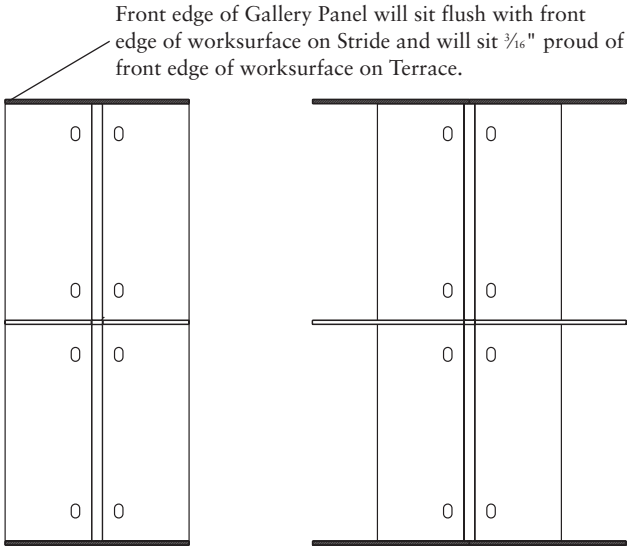
Gallery Panels

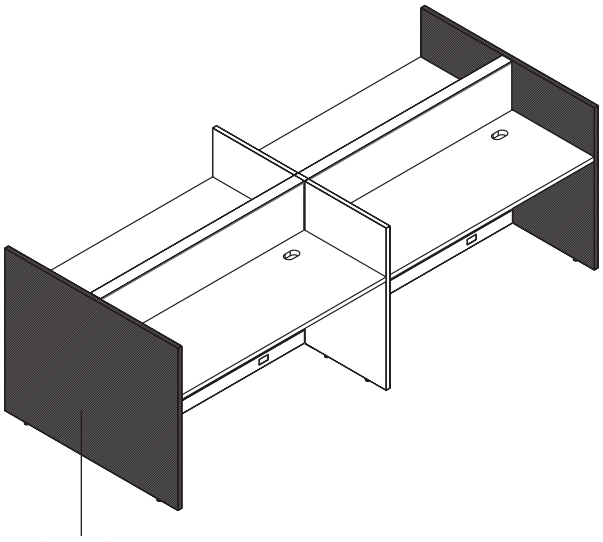
Stride® and Terrace® System - End Panel (Dual-Sided)

- Provides privacy to one or both ends of the system in a dual sided application.
- All Stride End Panels connect using GZCKP connector kit.
- All Terrace Single End Panels (Dual-Sided) connect using GTKCKP connector kit.
- All Terrace Split End Panels connect using GTSKCKP connector kit.
- GTKGK30 is required when a 30"H Terrace panel with frameless glass is attached to a Gallery Panel in an End configuration.
- Gallery Panel sizes 129"W or greater require storage or worksurface tie in on both sides of panel. Please reference storage and worksurface support sections for more details.
- When System panel is higher than the Gallery Panel, variable height System's trim must be specified to finish off exposed frame.
- Stride 30"H panel frames can be ordered via the Standard Specials catalog until available as standard.
- Single piece End Panels can be used for off-modular planning. Connector kit location must be field measured.
- Split End Panel seams must align with parent run.
- Split End Panels can be specified as asymmetrical. Contact Allsteel Tailored Solutions Group for details.

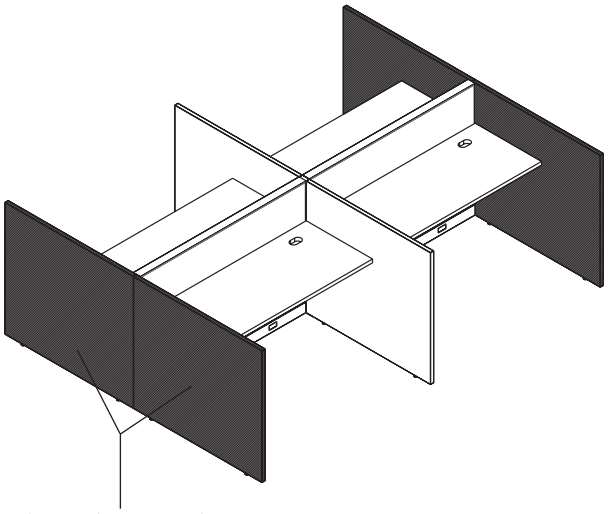


Single Panel Configuration

Split Panel Configuration

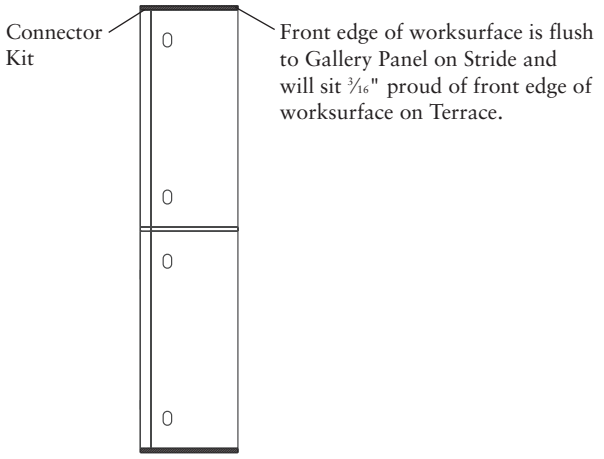


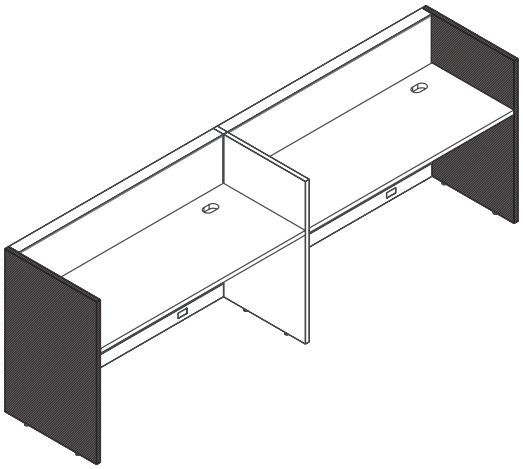
Single panel up to 84"W



Split panel 87"W and greater

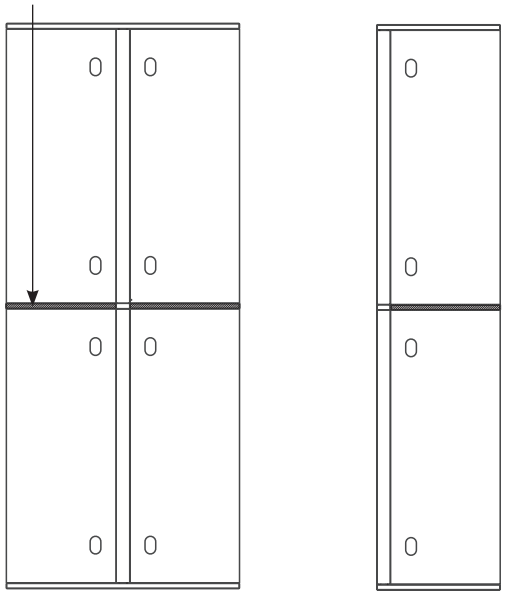
- Provides privacy to one or both ends of the system in a single sided application.
- Single-Sided End Panels cap over the System panel. Accommodate for 3" frame thickness when planning with Stride panel system and 2⅝" frame thickness when planning with Terrace panel system.
- All Stride End Panels (Single-Sided) require connector kit GZCKP to attach to parent run.
- All Terrace End Panels (Single-Sided) require connector kit GTKCKP to attach to parent run.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- When System panel is higher than the Gallery Panel, variable height system's trim must be specified to finish off exposed frame.
- Stride 30"H panel frames can be ordered via the Standard Specials catalog until available as standard.
- Due to thickness of the Terrace panel Single-Sided End Panel overhangs by approximately 3/16" on both sides.
- Accommodate for 2⅝" frame thickness planning when with Terrace panel system.
- GTKGK30 is required when a 30"H Terrace panel with frameless glass is attached to a Gallery Panel in an End configuration.

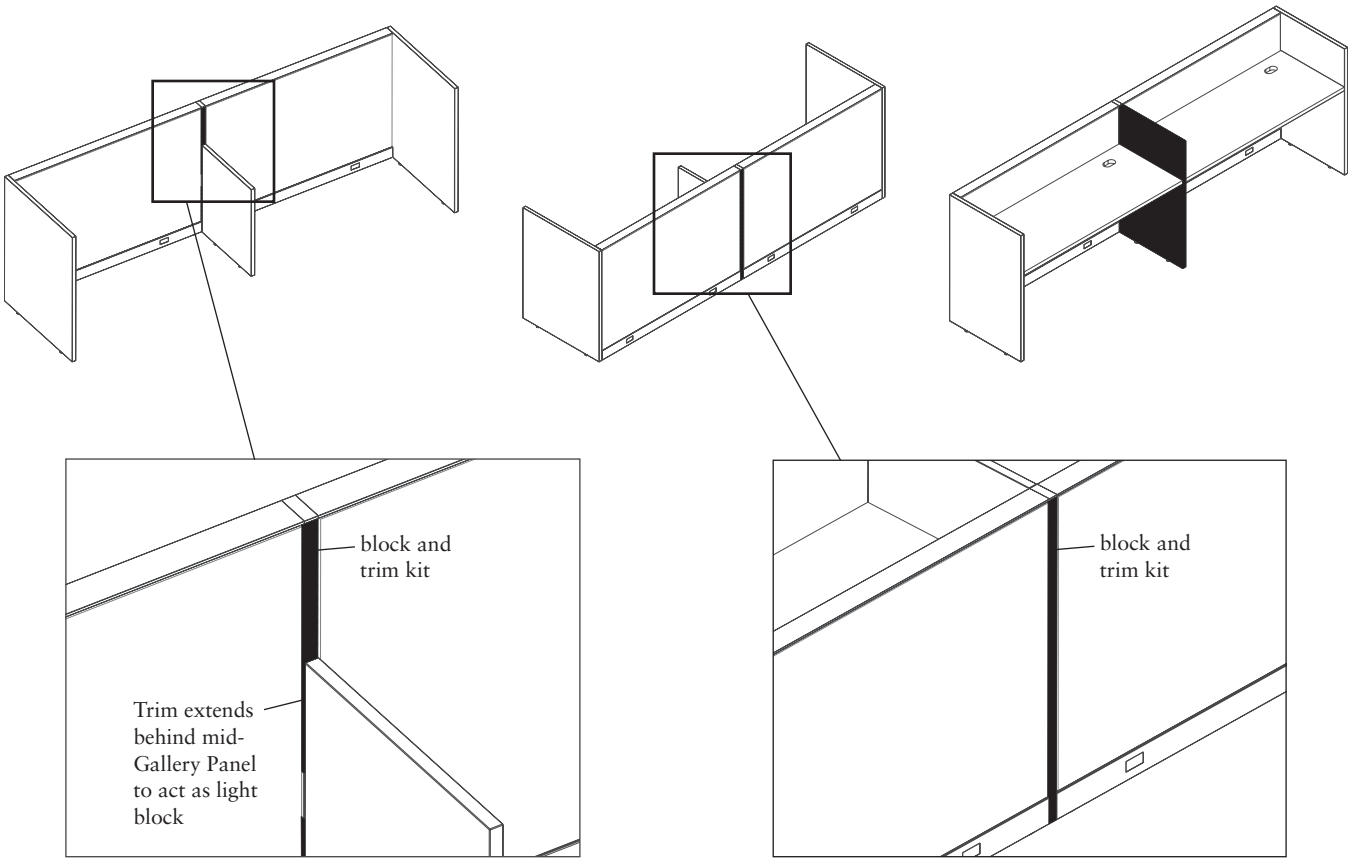




Gallery Panels

- Mid panels do not overlap parent system panel.
- When specifying Mid panels, one gallery panel “block and trim” kit (GZ3CONxx for Stride, GTK3CONXX for Terrace) is required to space the System panels out 1⅛". Kits include: Connector blocks, vertical trim and a top cap.
- “Block and trim” models must match the height of the parent run.
- Specify one mid-connector kit (GCKPM) per gallery panel to attach to parent run. Gallery panel and mid-connector kit attach over “block and trim” kit. Dual sided application requires two connector kit models.
- When using a Mid panel, both panel frames in spine must be of equal height.
- Mid Panels may not exceed height of parent run by more than 15".
- Trims can be painted to match the System panel trims.
- Mid Panels are available in 18"-84" widths in 3" increments.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Spanning top cap available through Allsteel Tailored Solution Group.

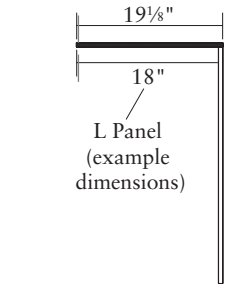




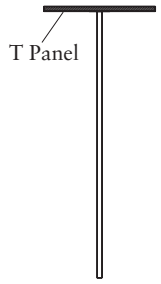
Reference Page

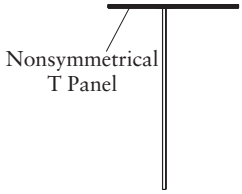
Gallery-to-Gallery Panels

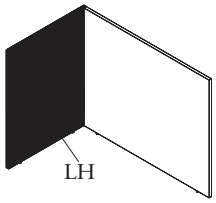
- Gallery-to-Gallery panels connect to other gallery panels and are available in L-, T-, and Nonsymmetrical T- configurations.
- When specifying Gallery-to-Gallery panels, the installation template (GTEMP) is required. The recommendation is 1 template for every 30 panels. Templates are reusable.
- Gallery-to-Gallery panels cap over Standard Gallery panels and are oversized by 1⅛" to maintain true interior dimensions
- Gallery-to-Gallery panels must be of equal or lower height than the Standard Gallery panel attached. The Gallery-to-Gallery panel cannot be taller than the adjacent panel. If this is required, please reach out to TPG for a custom solution.
- Made of 1⅛" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 54"W. Horizontal grain is available on all sizes.
- Gallery-to-Gallery panel widths are available in 3" increments from 18"W to 30"W and in 6" increments from 30"W to 78"W
- Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery panels are secured with an inset flat bracket under a painted metal cover.
- L- and Nonsymmetrical T- panels are handed.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in gallery panel width (i.e. storage or worksurface tie-in)
- Nonsymmetrical T Panels are specified in the format GTyyxxzz. Substitute yy as panel height, xx as LH nominal length, and zz as RH nominal length

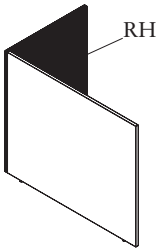


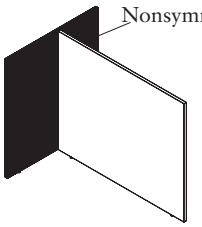
Note: Gallery-to-Gallery Panels cap over standard Gallery Panels and are oversized by 1⅛" to maintain modular interior dimensions. (ex: 18" panel is actually 19⅛"W)

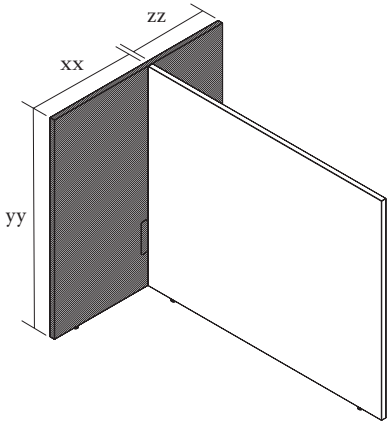












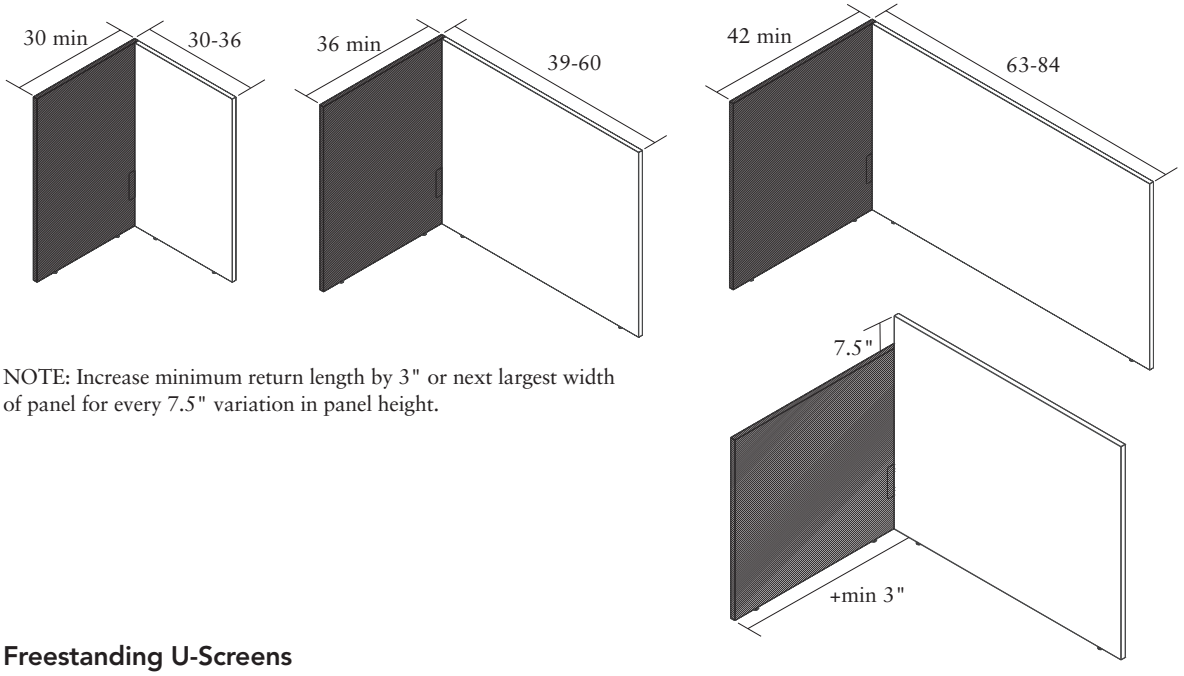
Gallery Panels

Reference Page

Freestanding Screens can be specified using Standard Gallery panels and Gallery-to-Gallery (depicted by the shaded panels in the illustrations below). Overall height, including glass, cannot exceed 72.5". Gallery Panel sizes 63"W or greater require storage or worksurface tie-in.

Freestanding L-Screens

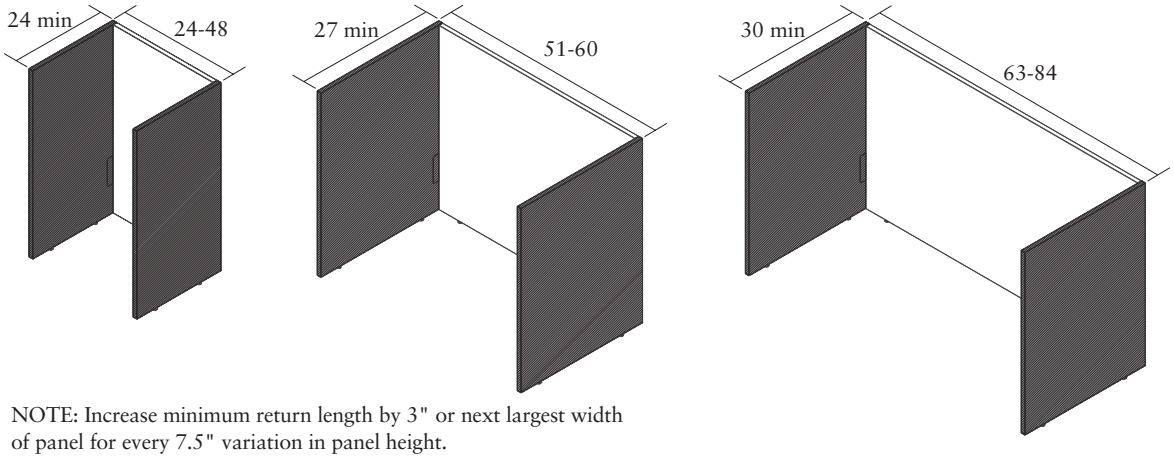
Parent	Minimum Return
18-24	Not Valid
30-36	30
39-60	36
63-84	42



NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

Freestanding U-Screens

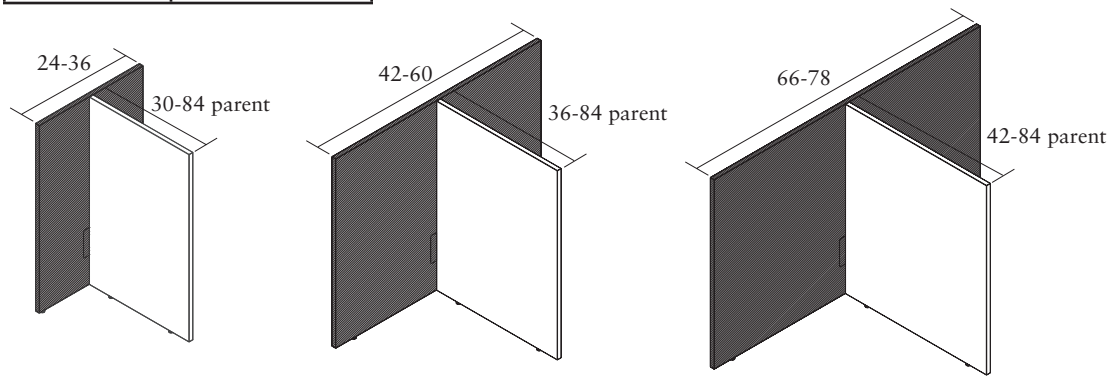
Parent	Minimum Return
18-21	Not Valid
24-48	24
51-60	27
63-84	30



NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

Freestanding T-Screens

T-Return	Minimum Parent
18-21	Not Valid
24-36	30-84
42-60	36-84
66-78	42-84

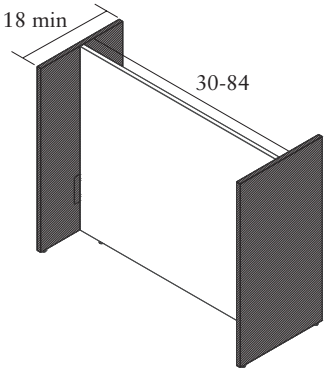


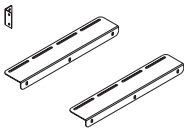
NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

Freestanding H-Screens

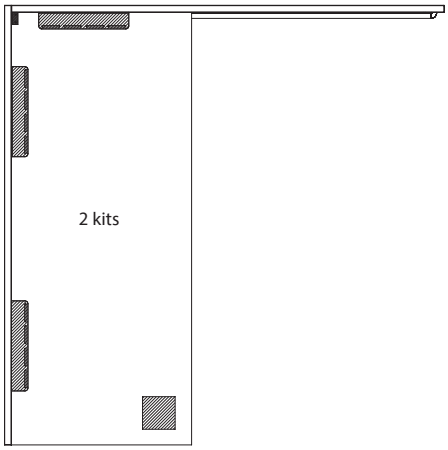
Parent	Minimum H-Return
30-84	18

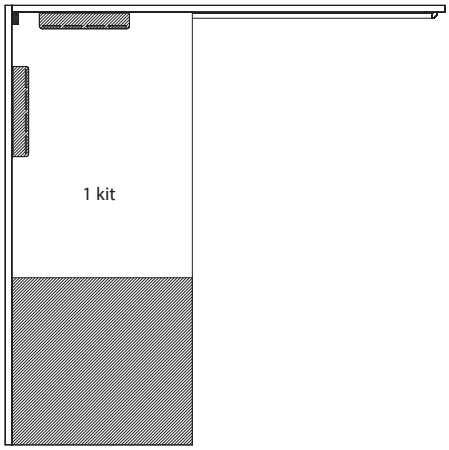
NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

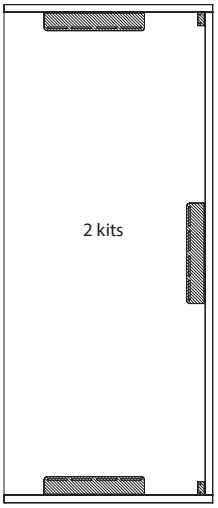


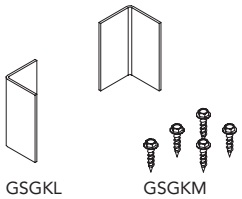


Worksurface Mounting Bracket (page 341)
- Used to mount a fixed-height worksurface to a Gallery panel.
- Can be painted any Allsteel Standard Paint color.
- A worksurface stiffener is required for surfaces 60"W or greater.
- One bracket kit (GWSBK) is required for each worksurface end attached to Gallery Panels.
- One bracket kit (GWSBK) includes two large L- brackets and one small corner L- bracket.

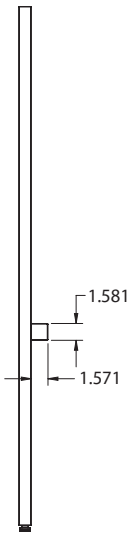




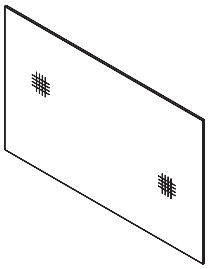




Storage Ganging Kits (page 336)
- The laminate storage ganging kit (GSGKL) is used to connect a Gallery Panel to a laminate storage unit.
- The metal storage ganging kit (GSGKM) is used to connect a Gallery Panel to a metal storage unit.

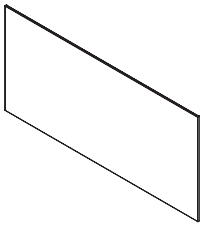


Gallery Panel Stiffeners (page 336)
- Required for single-piece panels 75"W and greater that are used in a wing or single-sided end condition and do not have a horizontally-mounted credenza.
- For panels 75"W and 78"W, order model (GSTFN7578). Stiffener width is 72".
- For panels 81"W and 84"W, order model (GSTFN8184). Stiffener width is 78".
- Attaches directly to one side of the Gallery Panel with a painted metal cover, attachment hardware included.
- Placement on panel face must be at least 18" above the floor but is not restricted to a specific location on the panel.
- Stiffener is 1½" x 1½".
- Available in any Allsteel standard paint color



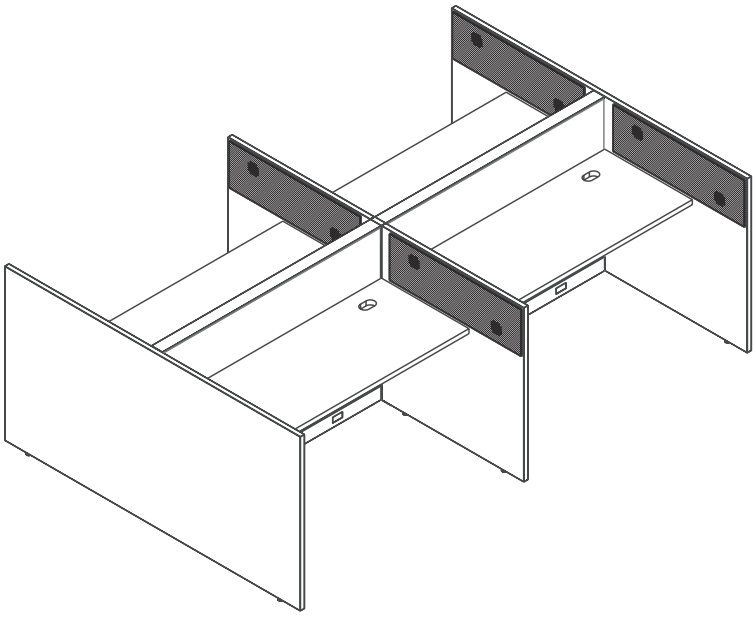
Tackboards *(Coming soon!)* (page 342)

- Provides tackable surface.
- Comes with steel-painted trim.
- Available in the following heights: 15", 22½"
- Available in the following *widths: 24", 30", 36", 42", 48", 54", 60".
  *Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Gallery Panel. Mounting hardware included. Will deface the panel.



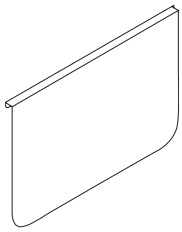
Magnet or Marker Boards *(Coming soon!)* (page 342)

- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Available in the following heights: 15", 22½"
- Available in the following *widths: 24", 30", 36", 42", 48", 54", 60".
  *Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Gallery Panel. Mounting hardware included. Will deface the panel.



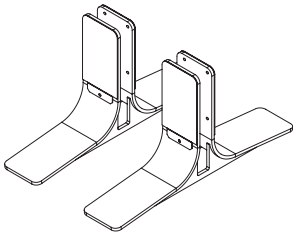
Tackboard Accessory on Mid and End Gallery Panels

Reference Page



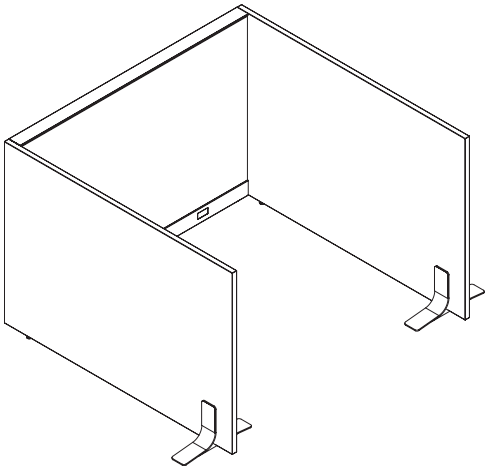
Hanging Magnet or Marker Boards *(Coming soon!)* (page 342)

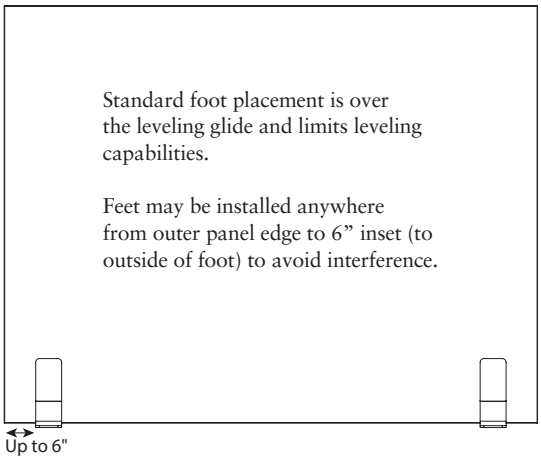
- Hangs over Gallery panel or sits on top of worksurface.
- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Cannot be installed back-to-back when hanging in the same location.
- Available in 30"W and in two heights: 20"H and 26"H.
- Cannot be installed on panels with integrated glass.

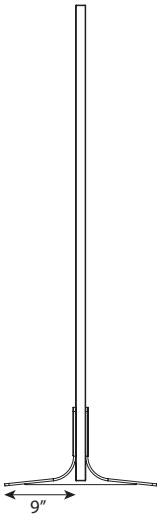


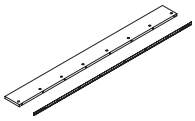
Gallery Panel Foot *(Coming soon!)* (page 342)

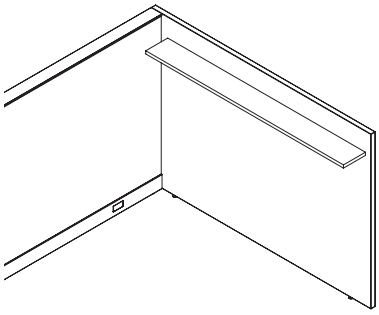
- Single foot provides rigidity to large wing panel.
- Using two feet on a single Gallery Panel allows for a freestanding application on panels greater than 24"W.
- Available in any textured Allsteel paint.
- Foot extends 9" from either side of the panel.







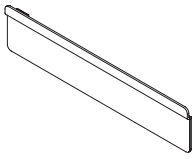




Floating Laminate Shelves (page 343)

- 6" depth.
- ¾" thickness.
- Constructed of HPL laminate with 0.8mm ABS edgebanding.
- Available in solid or horizontal woodgrain laminate.
- Available with contrasting or matching edge.
- Widths available every 6" from 12" to 78"W.
- Widths from 54" to 78" satisfy a stiffener requirement and are meant to be mounted to a panel that is 6" wider than the shelf. (e.g., 84"W panel would accept a 78"W stiffener shelf.)
- Shelves narrower than 54"W do not act as a stiffener.
- Weight capacity is 10lbs per linear foot.

Reference Page



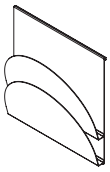
GACRL12

Accessory Rail and Paper Management *(Coming Soon!)* (page 343)

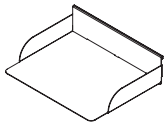
- Accessory Rail provides mounting for paper management accessories, listed below.
- Rail is 2.6"H and is available in the following widths: 12", 18", 24", 30", 36".
- Rails can be installed in any location on the Gallery Panel, as long as the rail does not extend beyond the top of the panel, and can be placed in-line to span panel length.
- Rail and accessories can be painted any standard Allsteel paint color.
- Mounts directly to the Gallery panel, attachment hardware included.
- Extensions accessories are NOT compatible with the accessory rail.
- These accessories are compatible with panel system tool tiles and rails.
- Includes a rail cover to hide hardware and provide magnetic surface.
- Compatible Rail Accessories:
  - Coat Hook (Rail-based, a mounted version is also available to attach directly to the panel)
    - Rail Based dimensions: 4"x 3"x 1¾"
    - Mounted dimensions: 4"x 3" x 1½"
    - Weight limit: 25 lbs
  - Angle File (Triple, Dual, and Single heights)
    - Depth of 2"
    - Heights: Triple = 15⅓", Dual = 12⅓", Single = 9⅓"
  - Paper Tray (Triple, Dual, and Single heights)
    - Depth of 10"
    - Heights: Triple = 9⅓", Dual = 6⅓", Single = 3⅓"
  - Personal Shelf
    - 9⅓" x 24" x 10⅗"
    - Weight limit: 25 lbs
  - Binder Shelf
    - 12⅓" x 12" x 11⅓"
    - Weight limit: 25lbs

NOTE: When accessory tools are attached to freestanding Gallery Panel screens, excess weight may affect overall panel stability.

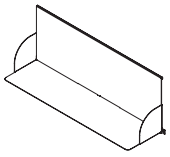
GCHRB



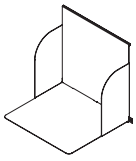
G2AGF



G1PTR



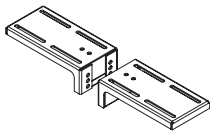
GWPSF



GBRSF

Wall Start *(Coming soon!)* (page 341)

- Wall Starts are 1⅛" by 1⅛" rectangular mounting posts that are meant to affix a Gallery Panel to a permanent building wall.
- Wall starts add 1⅛" to panel run.
- Attachment hardware not included.
- Must be specified at the same height as the connecting panel.

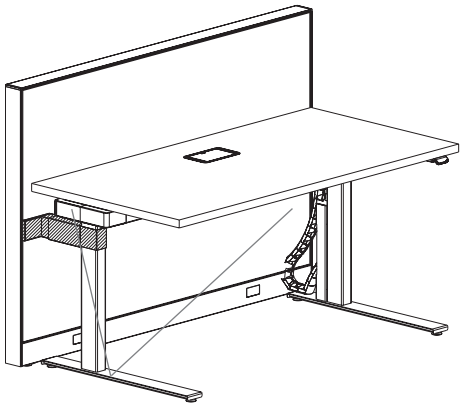


Countertop Brackets *(Coming soon!)* (page 341)

- Includes attachment hardware.
- Countertops are flush with the top of the panel and can be flush with the ends of the panel or shorter than the panel width.
- For straight countertops, two countertop brackets must be ordered.
- For corner countertops, three countertop brackets must be ordered.
- Will deface the Gallery Panel.
- May be used in conjunction with Stride, Terrace, or Optimize panels. When transitioning from a Panel spine to a Gallery Panel wing with a corner countertop, use countertop model of the panel system.

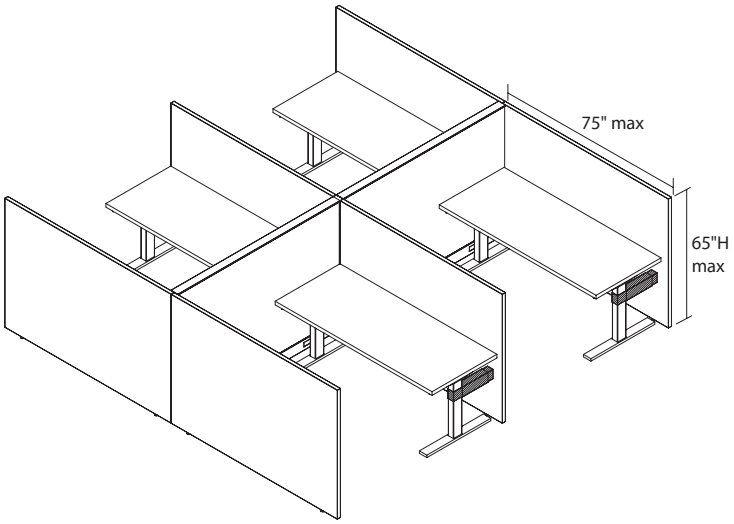
Height Adjustable Table Tie-In Brackets (Gallery Panels)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T leg HAT
- AGBKC to be specified for connection to a C leg HAT
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine.

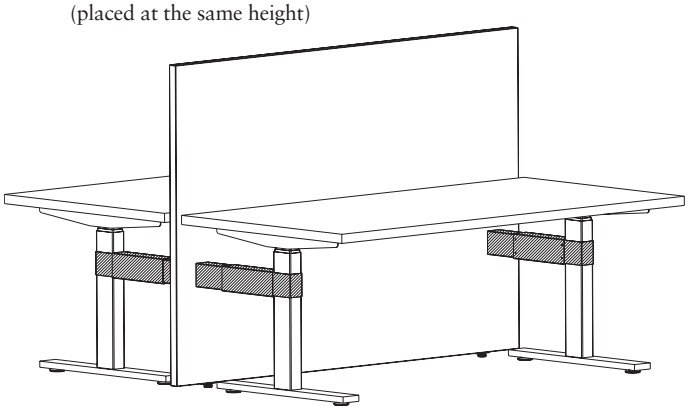


Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

SINGLE BRACKET
Gallery Panel Application:
Max Height (with Glass): 65"H
Max Width: 75"W; No top size restrictions



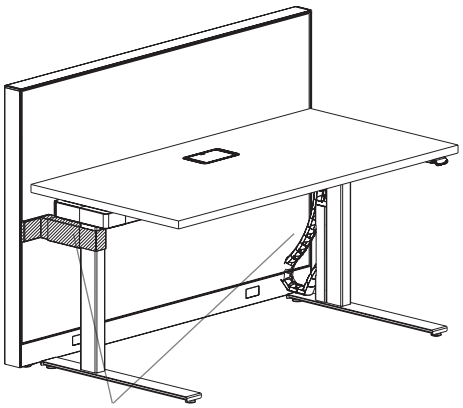
DUAL SIDED PANEL BENCH
Gallery Panel Application:
Max Height (with Glass): 65"H
Bracket Needed: Single Panel (75" max) with Brackets on each leg (placed at the same height)



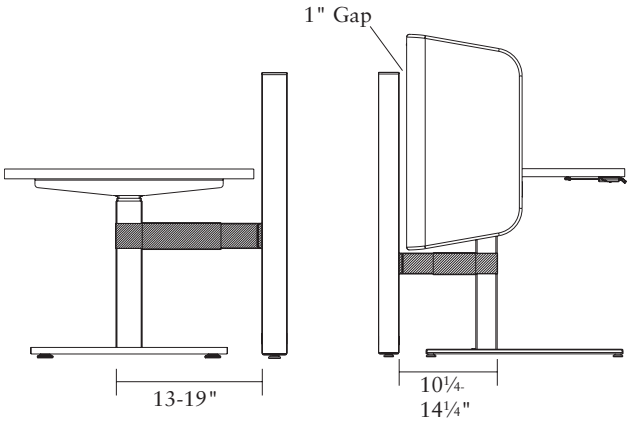
Freestanding Gallery Panel Application

Height Adjustable Table Tie-In Brackets (Optimize, Stride, and Terrace)

- Improves panel rigidity.
- ABKTL to be specified for connection to a LH T-leg HAT
- ABKTR to be specified for connection to a RH T-leg HAT
- ABKCL to be specified for connection to a LH C-leg HAT
- ABKCR to be specified for connection to a RH C-let HAT
- Brackets mount into slotted standard.
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine for A8, A3, and A6.
- Dual sided A5 tables cannot support a freestanding panel. (A5 will be discontinued on 12/31/2020)



Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.



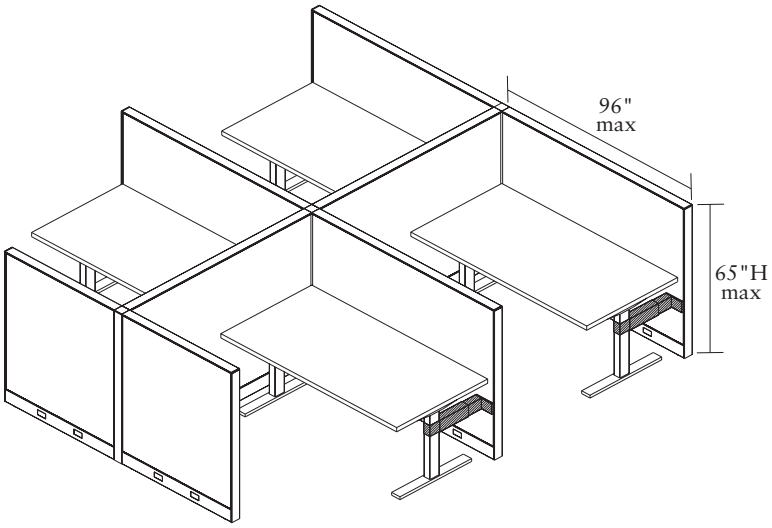
SINGLE BRACKET

Systems Application (not compatible with Concensys):

Max Height (with Glass): 65"H

Max Width: 96"W; Note: tops greater than 72"W will not align.

Overheads cannot be used without return panel



DUAL SIDED PANEL BENCH

Systems Application (not compatible with Concensys):

Max Height (with Glass): 65"H

Bracket Needed: Every 96" on both sides (placed at the same height). Note: tops greater than 72"W will not align.

Overheads cannot be used without return panel

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 355-356)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¾". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A6 Load capacity is 250 lbs for 2-leg models, 375 lbs for 3-leg models, and 350 lbs for Max models. This includes weight of worksurface.

Height-Adjustable Bases (page 352-353)

- Electronic height-adjustable base units are available in six styles: A6-T Base with 2 legs, A6-C Base with 2 legs, A6-T Base with 3 legs, A6-C Base with 3 legs, A6-T Max Base with 2 legs, and A6-C Max Base with 2 legs.
- A5 models travel at 1.5" per second, A6 2-stage 1.2"/sec, A6 3-stage 1.4"/sec, A6 Max .8"/sec. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 349.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- Slide glides offered as a .option and model level. Only available on 2-leg bases.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 72"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.
- Casters available on model level for retrofitting on 2-Leg Bases ONLY.
- Altitude A6 tables feature anti-collision, a feature designed to stop table travel when the table detects an obstacle. A5 & A8 tables do not have anti-collision technology.
- Altitude A5 and A6 bases specified with a work surface 60"W and greater require the use of an external stiffener. An external stiffener is included in Altitude work surface models 60"W and greater (all models ending with letter -D). If a non-Altitude work surface is being used, an external stiffener may need to be specified separately.

A6 Control Options (page 390)

- Memory Controls are now a .option.
- Up/Down: Basic Up/Down control.
- Memory Control: 4 memory pre-set options allow the user to adjust their height to their preferred heights.
- Paddle: Simple, aesthetic control with 1 memory pre-set option and reminder mode.
- Rotating: 3 memory pre-set options and a rotating, dial-like control.
- Foot Control: Basic up/down wireless, hands free control. Can be paired with hand controls for multi-control option.
- Bluetooth Capability: A6 optional Bluetooth capability is sold as accessory model A6BLUETOOTH. Bluetooth is enabled through smartphone app AiDesk. Bluetooth control will only work with 2-leg A6 tables. Bluetooth control will **not** work with 3-leg A6 tables.

Altitude Basic (page 354)

- Altitude Basic can accommodate either 24"D or 30"D work surfaces
- Altitude Basic can accommodate work surfaces ranging from 48"W to 60"W, 60"W is the maximum work surface size for the Altitude Basic
- Supports weight capacity of 180 lbs.
- Control Box: 100-240V, 3.6A, 50/60Hz, 400W
- 9' grounded power cord
- 1⅔"/second travel speed
- Available in silver only
- Available with up/down control only
- Features "easy-to-assemble" installation

Foot Controls

- Available as a .option on A6 and as model.
- Wireless, hands free control.
- Can be paired with hand control for multi-control option.
- Compatible with A6 and A3 tables.
- 2 AAA batteries needed. Batteries not included.

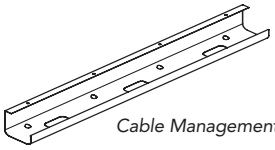
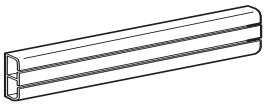
Cable & Wire Management



Cable Management Tray



Wire Management Channel

Cable Management Tray (page 357)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 357)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 357)
- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 357)
- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Quad Tap (page 357)
- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

72" Rectangle	3	3"	19¾	20"	8 lbs	8 lbs

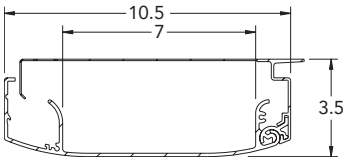
- Height-adjustable worksurfaces are available in laminate with square corners, laminate with round corners, and laminate eased edge with square corners.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) to accommodate screens and height adjustable motion. Actual depths are reduced by 0.75".
- Worksurfaces have pre-drilled alignment holes for bases, utility bay and screen brackets.
- The A8 utility bay acts as an external worksurface support; therefore, no A8 models require external supports.
- Grommet location is limited to center and 5¾" from back due to mounting of utility bay and power module under the worksurface.
- A8 load capacity is 300 pounds, including the weight of the worksurface, utility bay, power module, and screen.
- Electric height-adjustable base units are available in 2-Stage C-Leg.
- Height-adjustable legs travel at 1.5" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is <0.1 Watts. Power cords on models are 10'.
- Pedestals taller than 24½" when placed under table will interfere with utility bay in lowest position.

- Mobile peds can span over A8 foot.
- Mobile peds may extend past the worksurface; see Table 1 for dimensions.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- Tables with standard glides or slide-glides have ⅛" of adjustment. Tables with casters will sit 1.3" higher than glided versions.
- All models come standard with up-down height adjustable control. Optional control pad is available to provide app connectivity, Bluetooth, and memory set user heights (page 390)

Caster Option

- See Table 2 for caster-dependent dimensions.
- 24" deep worksurfaces with screens and casters must include surface mounted storage.
- See Storage Specification and Price List for A8 mounting specifications and applications.

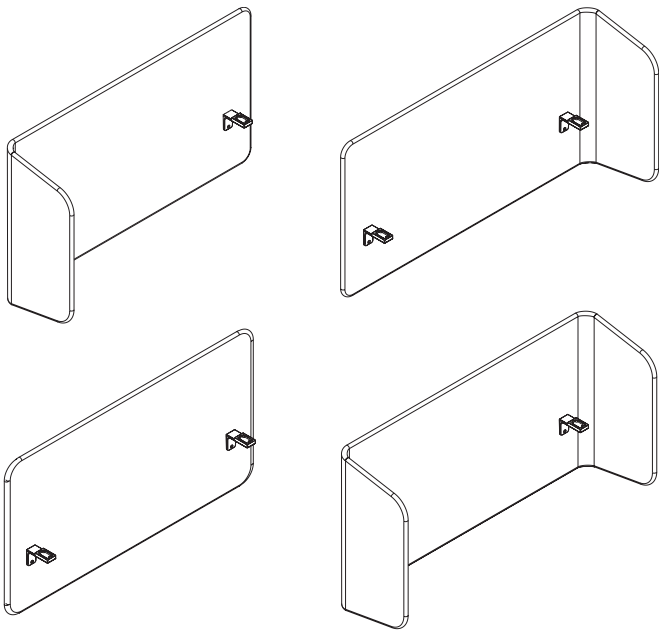
Utility Bay



Utility bay cross-section

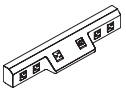
- Utility bay comes standard and attaches under the worksurface to contain cables, control box, and power module.
- See Table 4 for load and size specifications.
- Cord management chain comes standard with each table.
- Wire snake houses 3 cables at 0.300" diameter.
- Wire snake made of plastic links. Color options available are Black, Designer White, and Titanium.

Screens



- See Table 1 for overall table width and depth for each screen shape.
- Adding a screen adds 3" to depth of the table.
- Adding a screen adds 1" to the width of the table per return wing.
- A8 worksurfaces are 2" under nominal width to accommodate screens.
- RH L-screens have return wing on user's right; LH opposite.
- A3 and A5 worksurfaces are sized to accept A8 screens.

Power Module



- Contains 5 simplex outlets and 1 dual USB.
- Available in plastic or metal. Metal power module is required for Chicago code.
- Cord options include straight and curly.
  - Straight cord is 144"
  - Curly cord is 120"

Altitude — Metal Screens (page 382)
- Powder coated magnetic metal privacy screen.
- Metal surfaces can be easily disinfected with cleaners. See cleaning guide for more details at AllsteelOffice.com.
- Available in all standard paint colors.
- Provides 1" gap along the back for accessory mount and cord drop.
- Available in 48"W, 54"W, 60"W, 66"W and 72"W.
- 66"W and 72"W screens include 3rd center bracket.
- Available in Straight, L- and U-shape configurations. Above and Above/Below desk applications.
- L- and U-Shape screens are not compatible with shrouded Height Adjustable Table legs.
- Optional tackable accessories specified separately.
- 66"W tackable accessory comes as a set of (2) 24"W.
- 72"W tackable accessory comes as a set of (2) 20"W.
- Available in standard and extended wings.
- Wings mount flush to the edge of the surface with an L-Bracket.
- 20"W tackable accessory must only be applied to both standard and extended wings without accessory slots.
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.
- Do not hang more than 5lbs of weight on wings.
- Screens are compatible with Radii undermount storage.
- Not compatible with standard 120-worksrufaces. Contact Allsteel TPG for custom sizes.

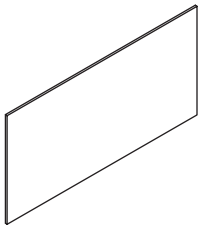
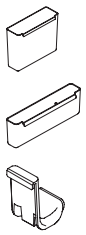
Set of Tackboards	1	1	1	1	2	2



Accessories — Tackboard (page 383)
- Tackable accessories come with metal frame available in standard paint colors and fabric options.
- Attach to the screen using a dual lock tape (included in hardware).



Accessories — Radii (page 383)
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.

Accessories — Further Worksurface Rail Mount (page 395)
- Accessory rail must be field cut to fit between the screen brackets.
- The following accessories are not compatible with screens: U9WTC and U9TM.

GENERAL OVERVIEW

- Accommodates power and lay-in capacity for data cables.
- Available in 48", 54", 60", 66", and 72" lengths.
- Maximum of 2 duplexes and 2 data ports per side of rail.
- Models come equipped with hardware for in-line connections.
- Fiber optic cables can follow 90 degree turns at the intersection of the power rails.
- Power harnesses snap into electrical brackets within the power rail and accept duplex receptacles.
- Electrical power harness accepts up to 2 duplex receptacles per side of rail.
- End caps are required at an end-of-run, unless connected to an end-of-run power pole or a hub.
- Power rail can be set low to the floor using the floor legs or raised off the floor at 20½"H with elevated legs.

WORKING WITH ALTITUDE POWER RAILS

Low Rail with Floor Legs:

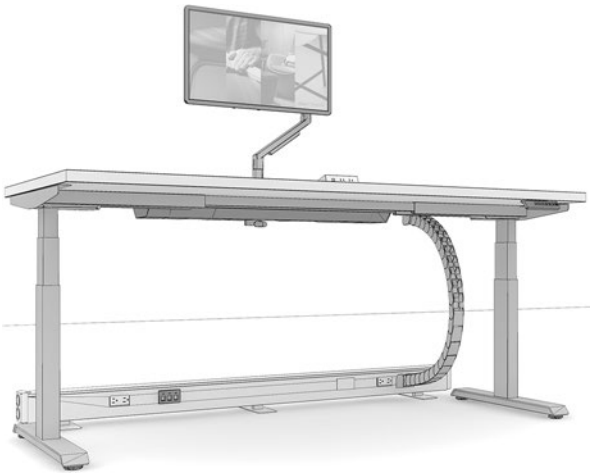
- Each power rail is supported by (2) floor legs.
- Floor legs have a leveling mechanism that can adjust up to 1¼"H.
- Legs are specified separately and come in qty of 1. Each leg is 7¼"D x 2¼"W.
- Leg is inset 2.8" from end of the power rail.
- Universal connector allows “L”, “T” and “X” configurations.
- Can connect directly to another power rail in linear applications without use of the universal connector.
- Cannot mount screens on the low rail.
- Power infeed can access the power rail in multiple ways:
  - through a receptacle position on the power rail (side infeed).
  - through the end cap on to the first power block.
  - through power pole using a power pole connector kit.

Raised Rail

- Power rails can be raised up to 20½"H using Elevated Legs and/or Hubs.
- Elevated Legs and Hubs can be used in conjunction to create the desired capability and aesthetic.
- Can be in Linear, L-, T- or X-configurations using Elevated Legs, Hubs or Universal Connector.
- Supports screens. See screens section for more details.
- Elevated Legs
  - Inset 2.8" from end of the power rail.
  - Can be shared in between the two rails in linear configuration.
  - Cannot route power and/or data.
  - Specified separately and come in qty of 1. Foot is included.
  - Leg is 15¼"D x 2¼"W x 17¾"H.
  - Order RFDRWAB separately to anchor to floor. Appropriate fasteners per floor type sourced locally.
- Support Hubs
  - Connect directly to the power rail.
  - Can be shared in between the two rails.
  - L-, T- and X-hubs can be shared in between power rails.
  - End of Run hub is only specified at end condition.
  - Can route power and/or data.
  - Can integrate power pole. Power Pole connector kit is specified separately and come in qty of 1. Foot is included.

Screens

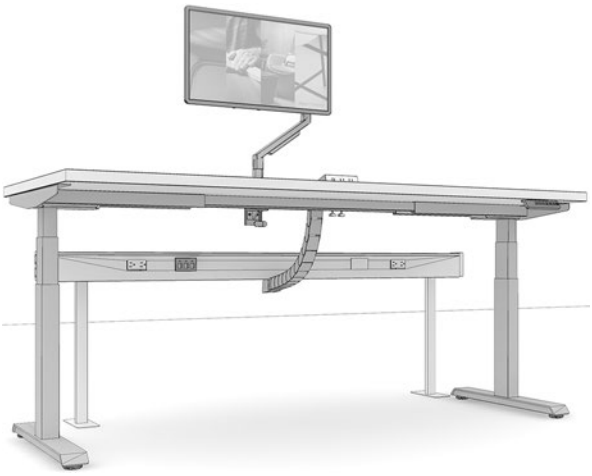
- Constructed of painted steel material.
- Standard Allsteel paint options can be applied.
- Screen height is 20"H, provides overall height of 42"H above fixed floor.
- Painted steel is magnetic and cleanable. Refer to cleaning solutions page at Allsteel Office website.
- Attachment hardware included.



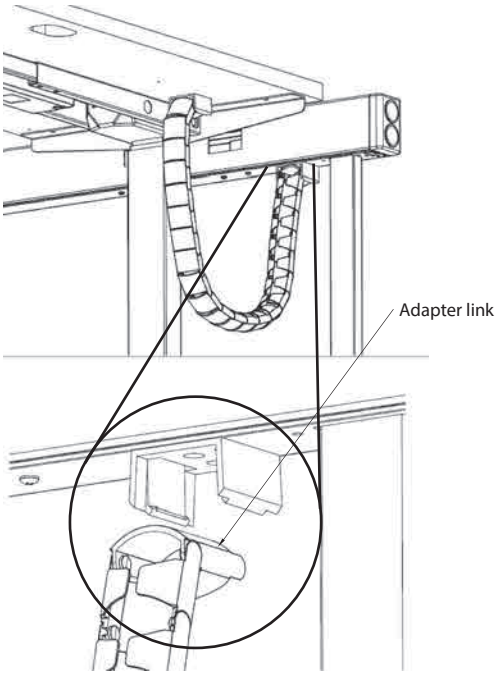
Altitude Desk + 60"W Low Rail + WKSWMC

WORKING WITH CABLE MANAGEMENT

- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware.
- Houses 6 cables @ 0.300" diameter.
- Specify WKSWMC for 58" chain. Only comes in Black Finish. Recommended for use with Low Rail.
- Specify A9CLWMC for 36" chain. Comes in Black, White and Silver. Recommended for use with Raised Rail.
- Links the power rail to a height adjustable desk.
- Has two connecting points: Top section connects underneath the Height Adjustable Desk and the bottom section connects underneath the power rail using a double-sided tape. Hardware included.
- When mounting the chain to underneath the rail, an adapter link is required. Included in the hardware.



Altitude Desk + 60"W Raised Rail + A9CLWMC



WORKING WITH POWER RAIL ELECTRICALS

General Notes about Electrical and Circuitry:

- Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
  - See Altitude Pricer section “Working with Electrical” for a detailed explanation of each electrical system.
  - All four systems utilize an 8-wire electrical system, rated at 20 amps.
- Per circuit (15 amps Canadian) — 16 amps plannable in U.S.
  - A8 Power Rail and electrical components are UL Listed. Electrical
- Components are also CSA certified.
  - Installation and use of the electrical system, the number of receptacles.
- Used on a given circuit and connections to the building power supply.
- Should follow all local and national electrical codes.

Electrical Infeeds

- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.
- Refer to rail supports for infeed access points.

Routing Power

- Power infeed can access the raised power rail in multiple ways:
  - Through power pole using a power pole connector kit.
  - Through Support Hubs.
  - Through the infeed vertebrae.

Electrical Systems

General Notes about Electric, Circuitry, and Chicago Code:

- A8 Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
- See pages 371-372 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian) — 16 amps plannable in U.S.
- A8 Power Rail and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

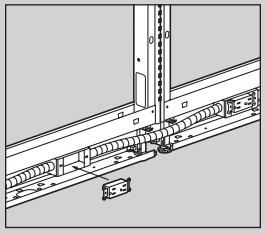
Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal at beltline. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Hardwire New York Code (page 376)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 48"W to 72"W.
- Unit must connect to a power harness.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.
- For NY infeed through the end cap:
  - Order 24" pass-thru harness with power block A871124.
  - Will not have power at first cut-out from infeed.
- For NY infeed through a power rail cut-out:
  - Order 48"-72" pass-thru harness with power block. *Harness width must match power rail width.*
  - Will not have power at cut-out location used for infeed.
- For any power rail not used for infeed, order standard electrical power harness.

Hardwire Chicago Code (page 378)

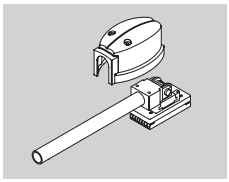
- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- The base pathway, junction box (model 873600) clips directly into receptacle locations and can be used both single- and double-sided.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.
- Power entry can be routed from the floor into a junction box (model 873600).



Electrical Infeeds

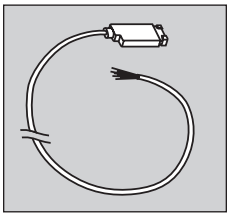
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

Base Infeed (page 377)



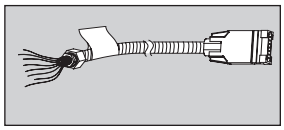
- Sealtight base pathway power infeed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.
- A jumper is required to connect base pathway power to beltline.

Sealtight Electrical Infeed (page 377)



- Sealtight electrical infeed cable is used with footed panels.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that infeed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

Power Infeed (page 377)



- Power infeed connects to a prewired electrical harness in the power rail.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power infeed needed.

Reference Page

* Select power harness models (A8712XX), with the last two digits corresponding with the panel width into which the component is to be positioned.
  The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

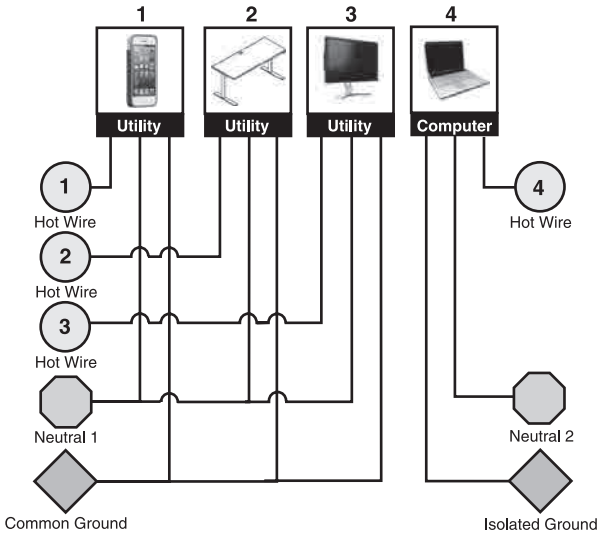
Flexconnect™ Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

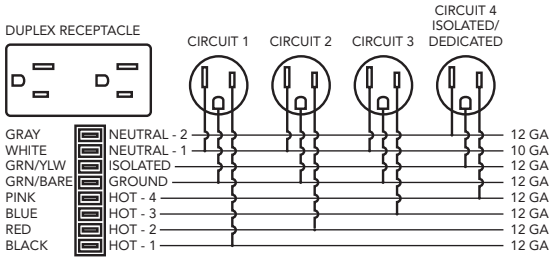
You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

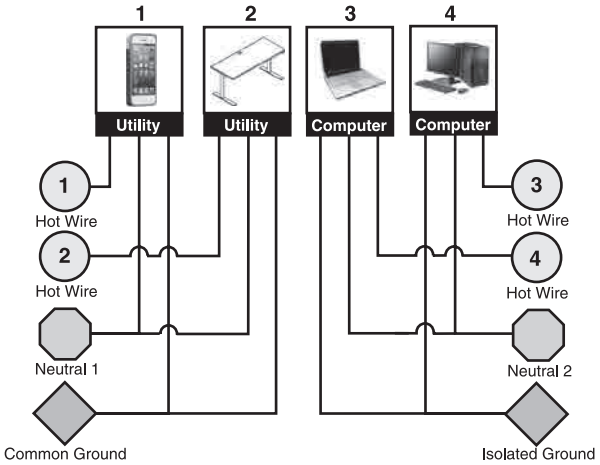
Four-circuit, 3 + 1 Receptacle Option



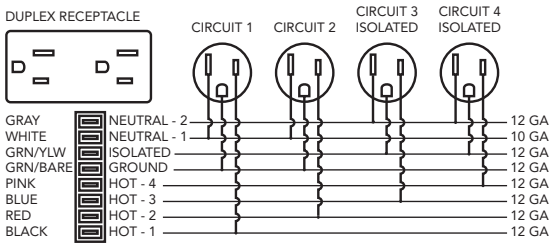
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



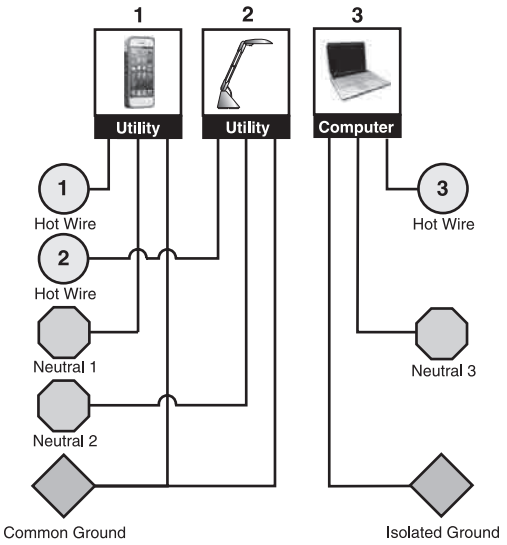
Four-circuit, 2 + 2 Receptacle Option



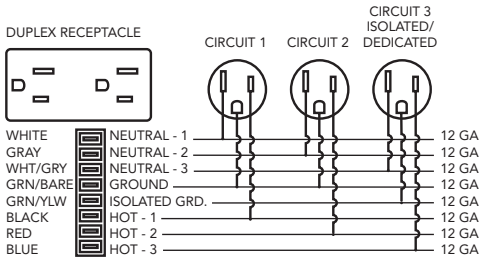
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Altitude System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A873501**	Common Circuit-2 (1) **A873502**	Common C ircuit-3 **A873503**	Iso/Dedicated Circuit-4 **A873504**
	2 + 2	Common Circuit-1 **A873501**	Common Cir- cuit-2 **A873502**	Isolated Circuit-3 **A873506**	Isolated Circuit-4 **A873504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust-colored.

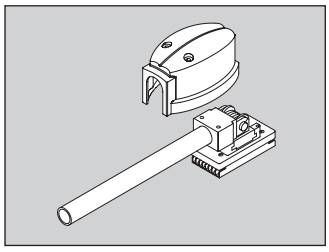
Duplex Receptacle

15 amp receptacle

ALTITUDE

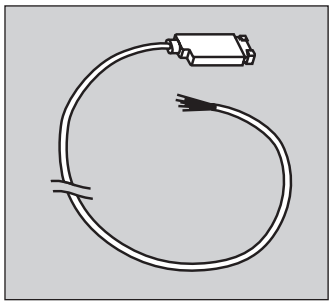
Infeeds

- Power infeed cables deliver power from building to A8 Power Rail's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of infeed cables depending on individual power requirements.



Base Infeed:

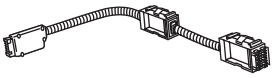
- Sealtight base pathway power infeed mounts into any receptacle position in the power rail housing.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.



Sealtight Electrical Infeed:

- Sealtight electrical infeed is used for power entering through the end cap.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of the power rail out to be connected to power.

Power Harness



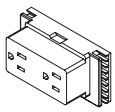
Electrical power harnesses are used to distribute power in the power rail. **Power blocks** on electrical power harness accept duplex receptacles.

- Electrical power harnesses are used to distribute power in A8 Power Rails. Harnesses must be installed in each power rail housing.
- Specify harness length to match rail housing length. Each power harness accepts four duplex receptacles (two on each side of power rail housing).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in power rail housing.

Power Blocks

- Power blocks snap directly onto brackets in the power rail and accept receptacles (sold separately) on each side of harness.

Duplexes



Duplex Receptacles

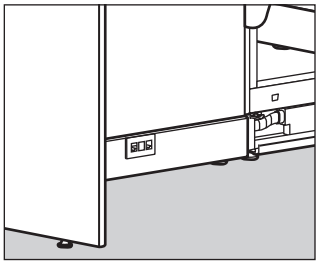
Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Bungalow — P7C	Muslin — EU
Champagne Metallic — PR5	Muslin — EU
Cinder — P7Q	Brownstone — EY
Fossil — P28	Flint — E9
Gunmetal Metallic — PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Pebble — P8R	Loft — EV
Pewter — P8D	Flint — E9
Platinum — PR2	Loft — EV
Platinum Metallic — P42	Silver — E5
Salt — P8C	Silver — E5
Titanium — P8T	Silver — E5

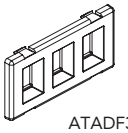
- Duplex receptacles snap into power blocks of power harnesses.
- Duplexes are available in multiple colors. See inside front cover for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3 or 4.
- Duplexes are model specific to support either 3 + 1 and 2 + 2 electrical infeed; or have an "A" suffix and are designed to support a three-circuit separate neutral electrical infeed.
- At least one duplex must be installed in upper housing side of rail housing assembly (see page 375, "Working with Electrical and Data").

Reference Page

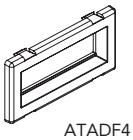
Data



Voice/Data Receptacle



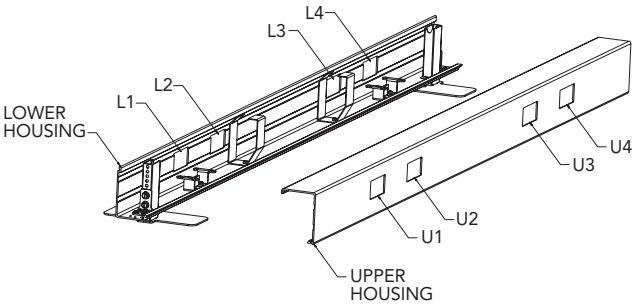
ATADF3



ATADF4

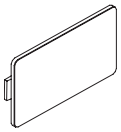
Data Faceplates:

- Fit into data port openings in Power Rail Housing.
- Due to rail housing depth, data modules should not be used back-to-back.



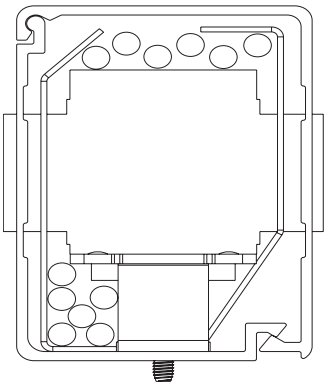
- Ports 1 and 4 accept duplexes, port covers and base infeeds.
- Ports 2 and 3 accept data and port covers.
- Either U1 or U4 must always contain a duplex.
- Data cannot be back-to-back (data in L2 + U2 or L3 + U3 combinations are not permitted).

Port Cover



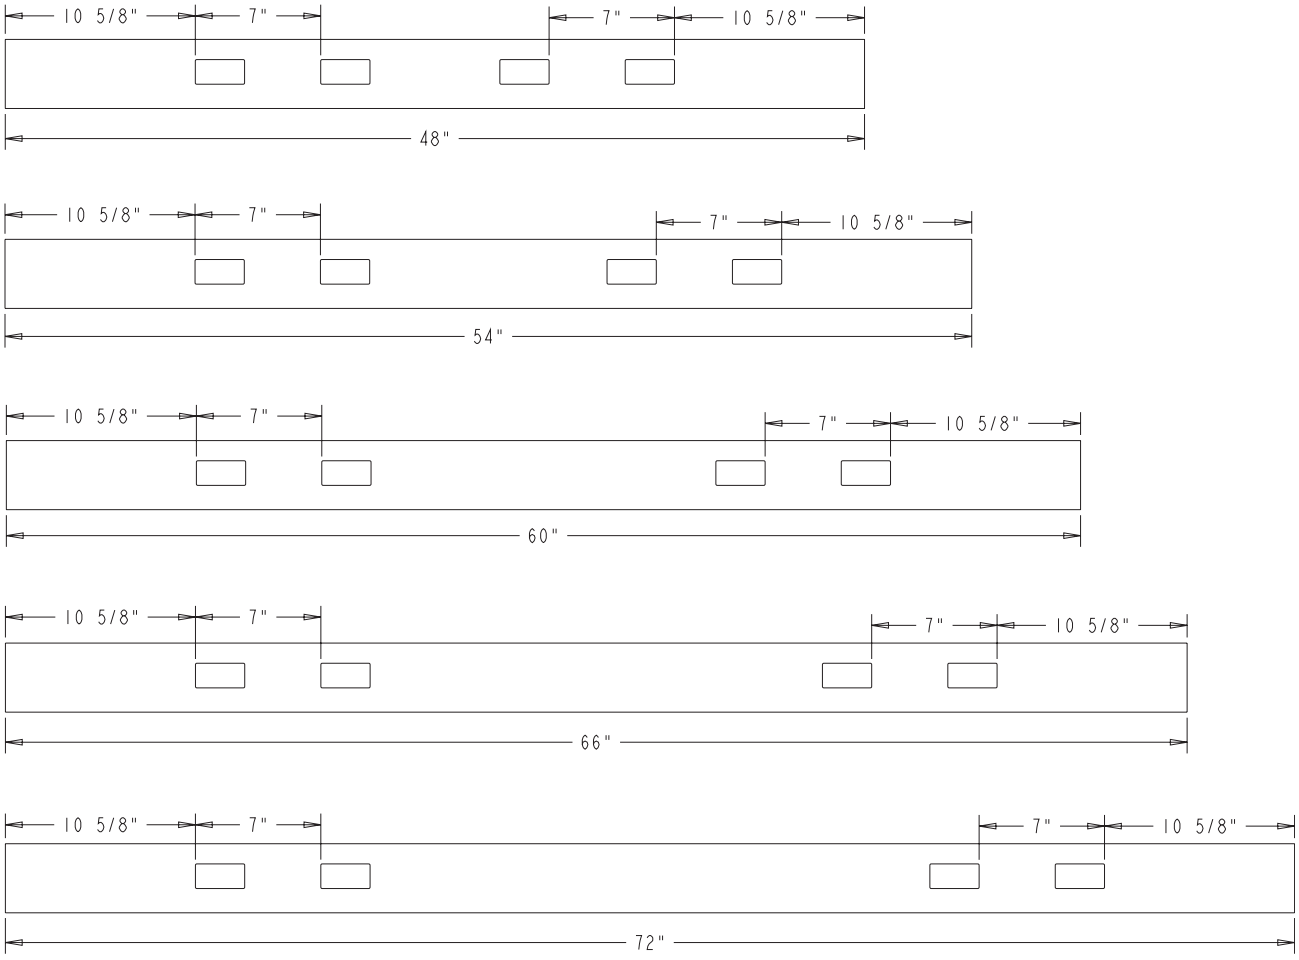
- Port covers must be used where no duplex or data faceplate is present.
- Fits into A8 Power Rail port locations in place of duplex receptacles and data faceplates.
- Does not fit into port sizes of other product lines.

Cable Capacity



- The power rail housing allows continuous voice and data lines to run without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Lower cavity allows 6 voice/data cables (¼" dia).
- Upper cavity lay-in allows 6 voice/data cables (¼" dia).

Power Rail Receptacle Locations



- For example, in a four-circuit system:
  Circuit 1 — calculators, fans, etc.
  Circuit 2 — task lights (could be wired to wall switch)
  Circuit 3 — CRT or flat screen monitors
  Circuit 4 — CPUs
- Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

For specification information see page 373.

*Reference A8 Paint Finishes Table for offering specific to A8.

*Unit comes unassembled in multiple cartons.

*Table includes worksurface, surface port, undersurface utility bay, height-adjustable base, and leg wire manager.

How to specify —

Select the Model Number from above.

1st Option:

Select the Table Base Color:

P71 Black
PJW Designer White
PR6 Silver

2nd Option:

Select Feet Options:

X Standard Leveling Glides
SLG Slide Glides (add $135 upcharge)
CSTR Casters (add $185 upcharge)

3rd Option:

FSC Certified Wood:

FSC Select for FSC Cert. Wood
X No FSC

4th Option:

Select the Laminate Color *(if applicable)*:

See page 346 for selections and color codes.

5th Option:

Select the Laminate Edge Color *(if applicable)*:

See page 346 for selections and color codes.

Continued below ▼

6th Option:

Select the Surface Port Paint Color *(if applicable)*:

P1 P2 P3

See page 346 for selections and color codes.*
P2 ($22 extra)
P3 ($56 extra)

7th Option:

Select the Utility Bay Paint Color:

P71 Black
PJW Designer White
PR6 Silver

8th Option:

Select the Wire Chain Color:

TI Titanium
DW Designer White
E4 Black

Examples: **FDTA4830FE.PJW.SLG.FSC.XXXX.XX.XX.XXX.TI** **FDTA7230EE.PR6.SLG.FSC.XX.XXX.TI**

For specification information see page 359.

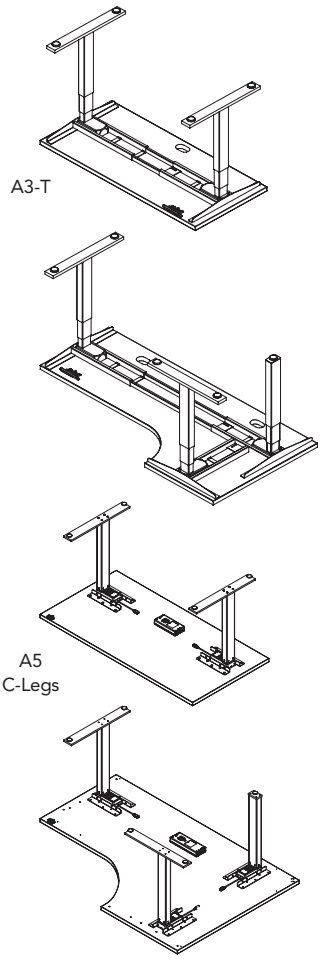
Bottom Views



Note: A3 height adjustable tables discontinue 12/31/20. See Allsteel's new A6 Height-Adjustable table for an updated, comprehensive offering.

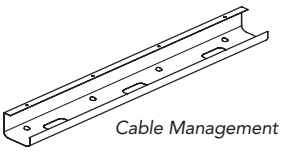
Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 355)
- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¾". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Any open span 60" and greater requires an external support channel. Altitude corner cove and 66"-72"W rectangular worksurfaces include an external support channel.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A5 load capacity is 300 pounds for 2-leg models and 450 pounds for 3-leg model, including weight of worksurface. A3-T load capacity is 250 pounds for 2-leg models and 400 pounds for 3-leg models, including weight of worksurface.

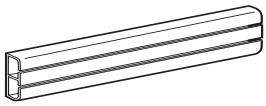
Height-Adjustable Bases (page 390)
- Electric height-adjustable base units are available in four styles: A3-T Base with two legs, A3-T Base with three legs, A5 C-Legs with two legs, or A5 C-Legs with three legs.
- A3-T models travel at 1.4" per second. A5 models travel at 1.5" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A5 and A3-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 388.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ⅛" adjustment on A5 and ½" adjustment on A3-T.
- The no crossbar design of the A5 exceeds knee clearance recommendations and provides optimal undersurface mounting capability.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 84"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.

Memory Controls (page 390)
- A3-T models come standard with control box with 4 memory set user heights.
- Optional control paddle allows for 4 memory presets, Bluetooth conductivity, and reminder functionality with A5 model.
- ATBCMC is not compatible with A3 tables.

Cable & Wire Management



Cable Management Tray



Wire Management Channel

Cable Management Tray (page 357)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 357)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 357)
- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 357)
- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Hinged Trough (page 357)
- Mounts beneath a worksurface. Used to conceal control box kit and extra cord slack.
- May be used in conjunction with quad tap unit UNQTMP to reduce the number of cords routed from a worksurface to a beam.
- Must specify at least 24" shorter than worksurface.
- Trough is user accessible, but may be fastened to worksurface if desired.

Quad Tap (page 357)
- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Note: A3 height adjustable tables discontinue 12/31/20. See Allsteel's new A6 Height-Adjustable table for an updated, comprehensive offering.

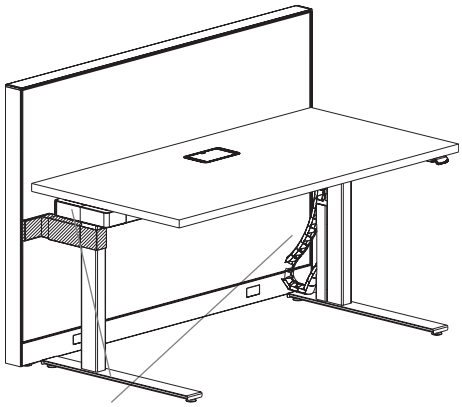
HAT to Panel Brackets

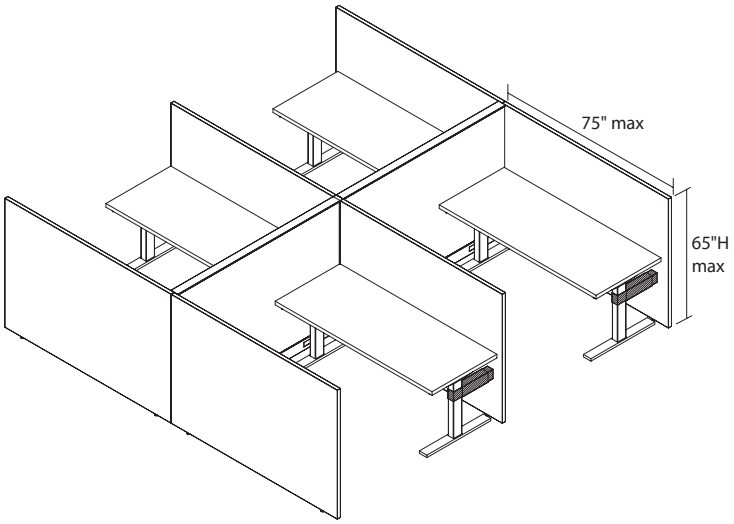
Height Adjustable Table Tie-In Brackets (Gallery Panels)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T leg HAT
- AGBKC to be specified for connection to a C leg HAT
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine.

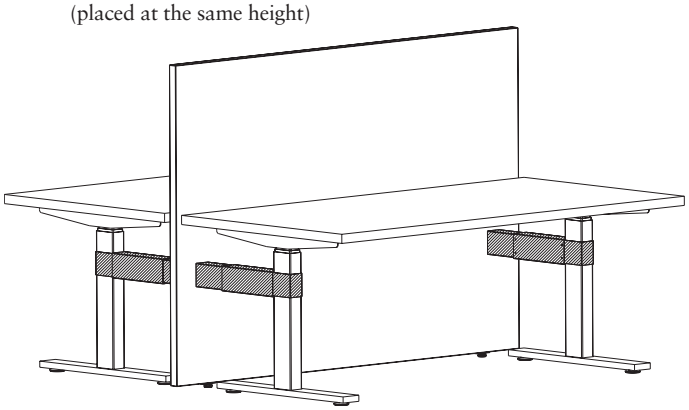


Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

SINGLE BRACKET
Gallery Panel Application:
Max Height (with Glass): 65"H
Max Width: 75"W; No top size restrictions



DUAL SIDED PANEL BENCH
Gallery Panel Application:
Max Height (with Glass): 65"H
Bracket Needed: Single Panel (75" max) with Brackets on each leg (placed at the same height)



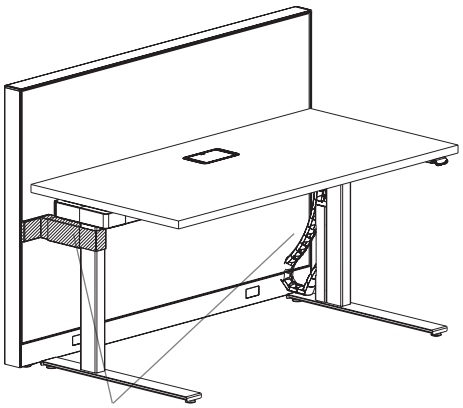
Freestanding Gallery Panel Application

ALTITUDE

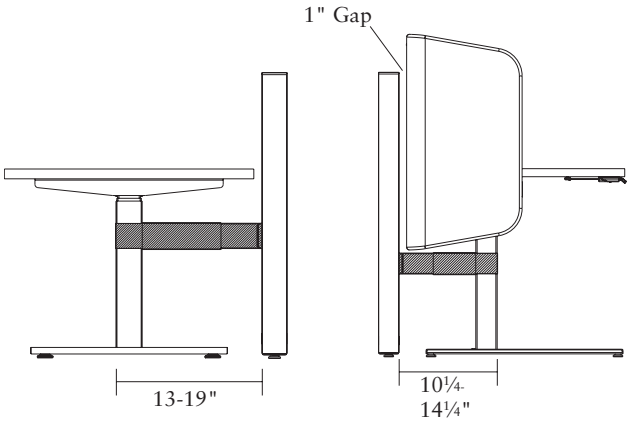
HAT to Panel Brackets

Height Adjustable Table Tie-In Brackets (Optimize, Stride, and Terrace)

- Improves panel rigidity.
- ABKTL to be specified for connection to a LH T-leg HAT
- ABKTR to be specified for connection to a RH T-leg HAT
- ABKCL to be specified for connection to a LH C-leg HAT
- ABKCR to be specified for connection to a RH C-let HAT
- Brackets mount into slotted standard.
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine for A8, A3, and A6.
- Dual sided A5 tables cannot support a freestanding panel. (A5 will be discontinued on 12/31/2020)



Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.



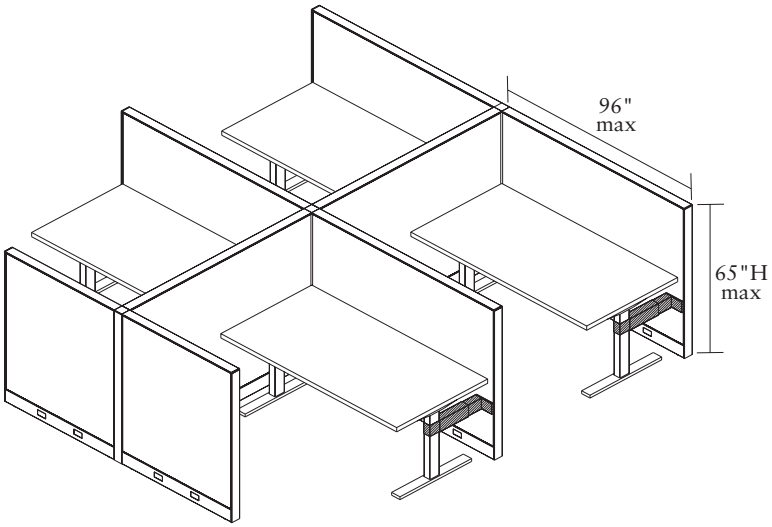
SINGLE BRACKET

Systems Application (not compatible with Concensys):

Max Height (with Glass): 65"H

Max Width: 96"W; Note: tops greater than 72"W will not align.

Overheads cannot be used without return panel



DUAL SIDED PANEL BENCH

Systems Application (not compatible with Concensys):

Max Height (with Glass): 65"H

Bracket Needed: Every 96" on both sides (placed at the same height). Note: tops greater than 72"W will not align.

Overheads cannot be used without return panel

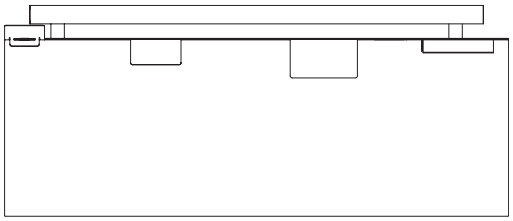
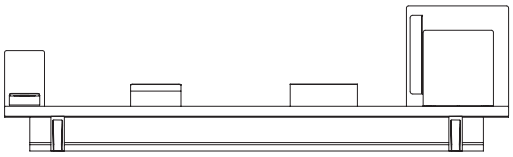
Worksurface Mounted Rail (page 395)
- Aluminum extrusion designed to mount to flat edge worksurfaces. Comes with rail and hardware for mounting.
- Mounted rail extends ¾" on underside of worksurface which may interfere with the mounting of storage and screens.
- Widths available for Altitude tables 12" through 66" in 6" increments. Can pass across seams of ganged worksurfaces in tethered applications.
- Passes behind worksurface bracket on tethered applications.
- For freestanding applications rail should be 6" shorter than worksurface (i.e. 54" rail for 60" worksurface).

Rail Accessories

Side View

Top View



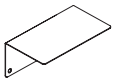


Front View

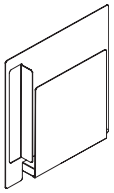
Rail Mounted Accessories
Not recommended for use on panel systems with attached worksurfaces due to fit up issues created with worksurface and panel. Adding accessory rail shifts worksurface — 3⁄16" away from panel along that edge. Forcing worksurface into place crushes fabric tile and with tiles of other material (steel, marker board, etc) is likely to scratch, dent, or otherwise damage tile during installation.

U9TM Phone/Tablet Stand (page 395)
- 6⅝"H x 4¾"W and angles back 1¾".
- Has a ¼" x 1" slot in bottom flange to allow for routing cables. Requires 1¾" space behind worksurface edge in order to be used.

U9TP Pencil Holder (page 395)
- 2⅝"H x 6"W x 3"D.
- Holds approximately twenty #2 pencils.



U9TS Rail Mounted Shelf (page 395)
- 8"W x 4½"D and sits 2⅝" higher than top of worksurface.
- Holds up to 8 pounds.



U9TF Vertical Paper Tray (page 395)
- Sits 12"H x 1½"W x 12"D from back of worksurface.
- Folder front stands 9" high from worksurface top, 1¼" space holds about 280 sheets of copy paper.

U9WTC Cord Organizer (page 395)
- Can attach to both bottom of worksurface or slides into rail.
- 4"W x ⅞"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

Universal Hook (page 395)
- Mounts to underside of worksurface and provides storage for bags, coats and purses. Can be used as a horizontal wire manager.

Extensions™

Extensions — Introduction

Extensions accessory line by Allsteel is designed to help you create your own space.

- **Create a unique space**

  Each person is unique, no one person works exactly like another, and different tasks require different tools. Extensions work tools allow each person the ability to create a unique environment that is all their own. Lots of paper to manage? Need active files within arm's reach? Want to maximize your worksurface space? Need light somewhere other than below a cabinet? Whatever the task, we have the tools to accommodate your workstyle.

- **Create a comfortable space**

  With a full line of organization, ergonomic, and illumination tools, Extensions allow you to create a comfortable, ergonomic work area. Organization tools keep important items visible and within your reach. Ergonomic tools help you stay comfortable while working. Illumination tools allow you to put your light where it suits you.

- **Create an organized space**

  Tired of all the piles of paper building up on your worksurface? Organization tools house your materials and keep them in an orderly fashion. With a combination of hanging or freestanding organizational accessories, Extensions let you manage everything from binders to paper clips.

- **Organization tools**

  Work tools are a durable metal construction. Extensions allow you to manage your workspace smartly with tools like the phone caddy to elevate the phone off the worksurface, landscaped mail box trays to minimize worksurface intrusion, folder holders and tool box pencil holders that hang off the slat rail and each other.

  Increase your efficiency with organization!

- **Ergonomic tools**

  Ergonomics is more than just comfort, it's flexibility and safety. The adjustable keyboard options allow users to maintain and vary comfortable wrist and arm positions throughout the day, whether typing or mousing. Monitor Arms offer versatile adjustability while providing optimum comfort for the eyes, neck, and shoulders.

- **Illumination tools**

  Sleek and flexible, our lighting components offer you several choices. Recessed task lights conserve space and feature electronic ballast for longer bulb life and cooler operating temperature. LED tasklights' slim design blends in with its surrounding while utilizing energy-efficient LED technology. The Link light offers award-winning style to a highly versatile and energy efficient light.

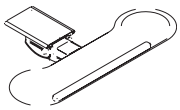
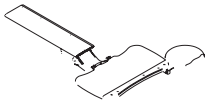
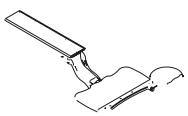
AKTSHORT Keyboard Support (page 398)



- Lift and lock intuitive height adjustment.
- Compatible with Altitude Height Adjustable Tables
- Positive and negative tilt for best ergonomic positioning.
- +10°/-20° tile adjustment and 360° rotation provides support of neutral position of shoulders, arms and wrists while accommodating multiple working postures.
- Surpasses ANSI/BIFMA standards.
- Black powder coat finish.
- Patented secondary slide and unique arm design provide minimal footprint.

AKTMID and AKTLONG Keyboard Support (page 398)





- Lift and lock intuitive height adjustment.
- Positive and negative tilt for the best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Non-handed mouse tray can be moved from right hand to left hand side.
- Surpasses ANSI/BIFMA standards.
- Black powder-coat finish.

Keyboard Spacer Kit (page 398)

- Keyboard Spacer Kit required for mounting under Altitude worksurfaces.
- Kit provides ten spacers and hardware for mounting keyboard supports beneath an external worksurface support channel.
- Spacers are 2⅛"H providing more room beneath surface for mounting.

CPU Hammock (page 398)

- Features 360-degree swivel with an 11" track.
- Load capacity is 75 lbs.
- CPU must be minimum of 3¼"W with maximum dimension of 64" in perimeter.
- Handy adjustment tool stores within unit.
- Safety feature prevents accidental release of straps and straps can be adjusted while CPU is installed.
- Can be used on Height Adjustable Tables as long as it is attached with spacer model AKMH. Take into account required leg room for users.

For specification information see page 397.

Reference Page

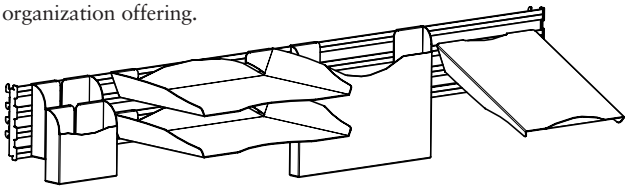
Allsteel's tool rail works in conjunction with a variety of accessories. Modular accessories free up worksurface space and provide orderly storage that is well within reach. Units can be arranged and rearranged to respond to changing workflow. The work tools that attach to the tool rail are:

- Mail Box
- Folder Holder
- Phone Caddy
- Binder Bin
- Tool Box
- Clip Caddy™
- Sidebar™ Personal Shelf
- Paper Wave™
- Gripper Clip

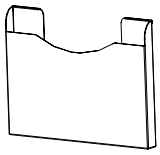
Additional accessories that work with the **tool rail work tools** aesthetically are:

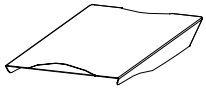
- Bookends
- Freestanding Mail Box

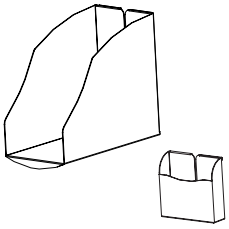
Coat hooks, marker boards and center drawers round out the organization offering.

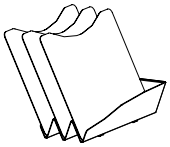


Tool rail, shown above, is height-adjustable in 1" increments using slots in panels or metal hutch. Tool rail shown with two tool boxes, two mail boxes, folder holder, and phone caddy. Folder holders and binder bins extend below a tool rail. Paper Wave and contents extend above a tool rail.









Tool Rails and Work Tools (page 402)
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.
- For use with Stride®, Terrace®, Concensys®, and Optimize™ systems.
- 5" high rail (widths coordinate with panels).
- Attachment via vertical reveals.
- Can be hung from wall track. Good solution for above copiers.
- Systems tool rail is off-modular — can be used on a panel of equal width or one size smaller.
- May span two panels of appropriate size, i.e., 60"W Tool Rail on two 30"W panels.

Tool Rail for Hutches (page 402)
- Will work on Universal, Terrace, Optimize, and Concensys system hutches produced after July 2, 2000 and Align™ metal hutches.
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.

Mail Box (page 403)
- Holds standard letter-size paper and inter-office envelopes.
- Minimal horizontal intrusion.

Folder Holder (page 403)
- Holds manila envelopes.
- Is capable of hanging on other folder holders to maximize space.
- Stores vertically for easy access to files.

Phone Caddy (page 403)
- Holds telephone at optimum ergonomic angle.
- Wire management cut-outs.
- Accommodates standard phone sizes.

Binder Bin (page 403)
- Holds folders, binders, and manuals.

Tool Box (page 403)
- Holds pencils and other writing utensils, large post-it notes, and other desk top accessories.

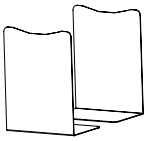
Clip Caddy™ (page 403)
- Holds paper clips and other small objects.

Sidebar™ Personal Shelf (page 403)
- Holds office supplies and personal effects.

Paper Wave™ (page 403)
- Provides 3 fully divided slots for organizing files.
- Keeps papers from "bowing" at bottom.

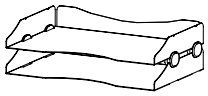
Reference Page

Gripper Clip (page 403)
- Binds project papers together.
- Mounts to tool rail or tool tile.



Bookends (page 403)
- Can be used on shelves or in cabinets.
- Used to hold books, binders, and catalogs upright.

Freestanding Mail Box (page 403)

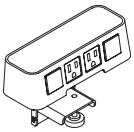


- Incorporates similar aesthetic to mounted Mail Box.
- Mounting brackets allow for free access from front and back.
- Sold in pairs of two; will stack up to eight high.
- Individual mail box dimension = 1¾"H.
- Stacking brackets are black.

Coat Hook APMC6 (page 403)

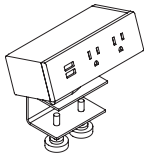
- Hangs directly into slotted Stride®, Terrace®, Optimize™, or Concensys® panel frame.
- Use for coat or bag.
- Package of six.
- Available in black only.

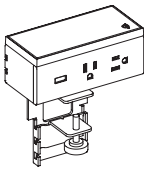
Power/Data Modules — Clamp On Worksurface (page 409)



- On-surface mounting option, fits on any worksurface with a 4" overhang.
- 6' Power cord. UL Listed.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings. Many of the AMP, AT&T, Krone, Leviton and most commercial data terminals can be used.

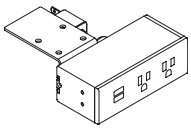
Power/Data Modules — Clamp On Worksurface (page 409)





- Worksurface clamp can be used on any surface with a 2½" overhang.
- Must be installed at time of initial worksurface installation if installing between a worksurface and panel.
- 6' Power cord. UL Listed.
- The USB hub allows simultaneous powering of 2 USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capacity is limited and may not charge all devices.
- Qi compatible wireless charging available on select models.

Power/Data Modules — Under Worksurface (page 409)

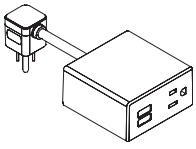


- Under surface mounting can be used on any surface with a 5" clearance.
- 6' Power cord. UL Listed.
- Hardware not included.

Worksurface Power/Data Module (page 409)

- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires ⅜" gap. Consider whether ⅜" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining ⅜" gap may not be possible with worksurfaces that are panel wrapped.

Miki Power Modules (page 409)



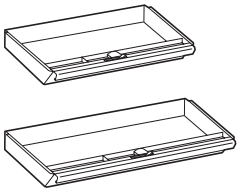
- Table top and undermount units.
- Hardware not included on undermount.
- 6' Power cord, UL Listed.
- 1 AC power and 1 dual USB configuration.

Vesta Mobile Power (page 409)

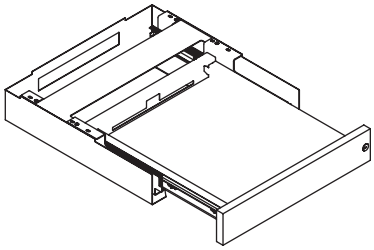
- 3 AC power simplex, 1 dual USB-A, 1 USB-C configuration.
- 10' Retractable power cord, UL Listed.
- Unit weighs 13 lbs.

EXTENSIONS

Reference Page



Metal Center Drawers (page 404)
- All metal center drawers feature pencil trays with three compartments for storage.
- Center drawers will not fit in center of 24"D worksurfaces which are wider than 60" due to location of center support bracket.
- For locking specifications, see pages 414-416.
- Ball-bearing slide suspension.

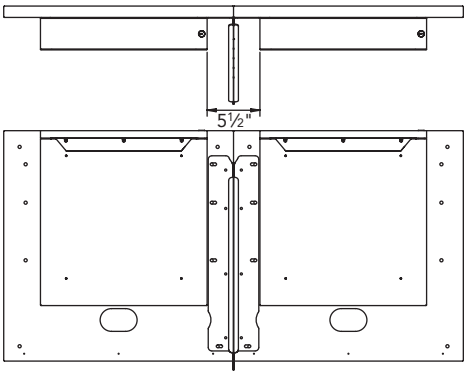


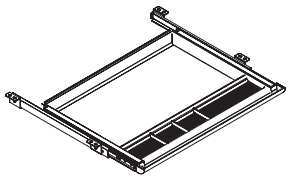
Laptop Drawer — U7WDA (page 404)
- Drawer body made of sheet metal.
- Drawer front made of ¾" particleboard with laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17⅝"W x 18"D x 3⅜"H Outside (interior 13"W x 16"D x 1⅞"H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/glides fully retracted is 24¾".
- Does not interfere with Further leg mounting plates so drawer can be placed directly next to either a system or table leg.
- When being placed next tower storage using the tower ell bracket (Z6LB) to support surface the drawer must be inset 3" to clear the ell bracket.
- Can be placed directly next to any support storage from any Allsteel product line (excluding towers).
- Flat brackets — drawer must be offset 3" from seam between surfaces to clear the bracket. See illustration at left.
- Can be used with rabbet edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

Flat Brackets

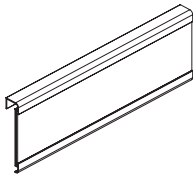
Front View

Top View





Polymer Center Drawer - ACD1 (page 404)
- 20½"W x 17"D x 2"H
- Available in black only
- Made from ABS.
- Minimum clearance for mounting: 23"W x 16¼"D x 2"H.
- Retracts on 16" ball-bearing slides.
- Can be used on worksurfaces with Height Adjustable Bases as long as it is attached with spacer model AKMH.
- Can store up to 25 lbs.



Name Plate (page 403)
- Comes in a 10-pack.
- Metal backer installs under a Terrace or Optimzie top cap, can be used with frameless glass.
- Cover is a transparent polycarbonate insert.
- Full plate is 8½"W x 2⅜"H.

For specification information see pages 399-400.

S *Shippable by small-package carrier.*

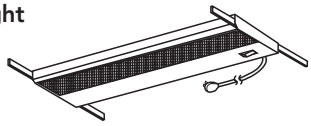
Allsteel Extensions offers Illumination in three styles — Undercabinet LED Light, Wand Light, and Link Light.

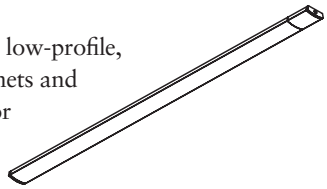
Recessed Undercabinet LED Light



Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with LED strips.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

Undercabinet LED Light

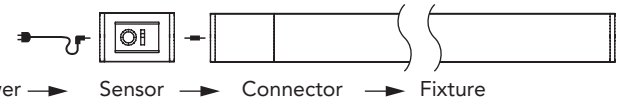


The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek ½" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

CONNECTION SEQUENCE*



*Cannot deviate from this sequence

Recessed Task Lights (page 407)

- Black Metal Construction with 9' long black cord attached to right rear corner of the fixture.
- LED strip comes installed within light.
  –50,000 hour life span
  –120V-277V
  –CCT 4000K
  –CRI 80+
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.

Undercabinet LED Lights (page 407)

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).
- 20W power supply for 20W 31" unit (.166 amps).
- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.

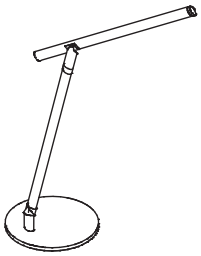
LED Light Combinations Must Not Exceed 60W in Combination	Power Usage
6X 17"	60W
3X 31"	60W
1X 31" + 4X 17"	60W
2X 31" + 2X 17"	60W

- The combinations that could max out 60W are featured above. *Daisy chained units have a power limit of 60W from one power entry. 17W units use 10W and 31W units use 20W.*
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).
  Example: Daisy-chain 4–17" undercabinet LED lights:
  Specify: 1 ALED17U60
  Specify: 3 ALED17UJMP30 with 10" jumper cord
- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).
- 3500K color temperature.
- 131 footcandles at 18" on ALED31U; 76 footcandles at 18" on ALED17U.
- Magnetic or screw-mount option — attachment hardware included.
- On 20 watt models, power drive is attached to plug: allow 1⅞"D space at outlet.
- On 60 watt models, power drive brick is in center of cord.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

Overhead Length	Suggested LED Sizes
24	17
30	17
36	17
42	31
48	17 + 17
60	31 + 17
72	31 + 31
Note: LED lights may need to be positioned along length properly to allow jumping to additional overheads. Suggested sizes above are recommendations for single overheads to provide as much light along length of overhead as possible.	

The suggested sizes factor in 4 inches of room for the power inlet and occupancy sensor (optional).

Wand™ Task Light



Wand freestanding task light offers a clean, simple design along with powerful LED technology to illuminate the workspace. The swivel base and arm tilt allow users to position the light just where they need it. The 7.7 watt LED light offers efficiency and long life, providing up to 25 years of daily use. The slim, sleek design makes it easy to integrate into any workspace. Wand task light is 97% recyclable. Occupancy sensor and/or charging models available.

Reference Page

Wand LED Freestanding Task Light (page 408)

- Available in Silver or White. 9'4" cord is Silver.
- Full range dimming from 100% – 10% with last state memory.
- Uses 5W at highest setting and as low as 1 watt at its lowest setting, providing 75 to 12.7 footcandles of light, respectively (16" above worksurface).
- 7½" round swivel base and 16½"H tilt arm allow versatile positioning of the 13" lampshade.
- Designed for 50,000 hours of life.
- Color Temperature: 3500K. Color Rendering Index (CRI): 80.
- Materials: aluminum arm and lampshade, steel base.
- Weight: 4.4 lbs. 97% recyclable, 76% post-consumer.
- Certifications: UL and CUL. TAA compliant.
- Occupancy sensor available with automatic shut-off after 15 minutes if no motion is detected.
- USB model features USB-A (1), USB-C (1) charging within base of unit.
- USB model also features occupancy sensor. 7.5W (A) & 18W (C) power consumption.

For specification information see pages 405-406.

Pivot Standard Weight Monitor Arms

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 18.75" extension, and 10" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Standard weight arms utilize a tension spring that allows for effortless adjustment of monitors to proper ergonomic positions.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6-17 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Pivot Clamp mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot or other monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Slider Mount

- Provides 11.8" of horizontal movement.
- Allows for wider monitors to be used on dual monitor arms and sit flush side by side.
- Not compatible with Pivot Heavy Duty Series.

Pivot Heavy Duty Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 20.75" extension, and 12" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 8-35 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 2 monitors weight 4-17.5 lbs each.
- Pivot Clamp mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot or other monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

*Use of APACSM Slider Model will allow for wider monitor capabilities

Pivot Post Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with 21" extension and 10.6" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6.5-17 lbs per arm.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞"–2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Silver color option with grey wire management only.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Single and dual models have a post height of 17.7"; Triple monitor model has a post height of 27.5".
- Monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot is compatible with 54"D Stride benching applications when worksurface grommets are specified and Pivot grommet mount is installed.
- Pivot Clamp or Grommet mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Counterweight Kit

- Counterweight Kit to be used with monitors weighing less than 6 lbs.
- Gray color only.
- Counterweight weighs 1 lb. 6 oz.

Pivot Conversion Kits

- Kit allows user to transform single monitor arm (Standard, Heavy Duty, or Post) into Dual Arm configuration
- Available in black and silver, Post arm only available in silver
- Required wire management included
- Once assembled, will aesthetically emulate dual configuration of chosen arm

For specification information see pages 410-411.

Laterals, Pedestals and Storage, Painted Wood Storage

Standard Options

- Random Keying — The factory will assign key(s) arbitrarily using key numbers from chart below.
- Omit Lock Core — The factory will omit lock cores. Removable lock core kits with specific key number must be ordered to facilitate keying alike in the field.

Vertical Files

Standard Options

- Random Keying — The factory will assign key(s) arbitrarily (see below chart for key numbers).

Key Alike Process

- Order standard product which will be shipped with factory installed locks and random numbered cores.
- Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
- Simply replace the factory installed core with the replacement cores after product has been installed.

Replacing Lock Cores

- Lock must be in the unlocked position.
- Insert core removal key and pull core straight out. (Reach units require rotating key 90° clockwise past unlocked position.)
- Insert new core with core removable key, hold core into lock and withdraw core removal key.
- Retain original core for future use.

Brushed Chrome Removable Lock Core Kit* **	Key Numbers 101N-225N	
 Includes one core, two keys, one core removal tool, adapter, and instructions	**ALKF23CN** S	**$ 27**
Open Market **Master Key*** (One key) Available to authorized dealers only on electronic orders.Will open ALKF23CN and LKF23CN locks numbered 101N-225N.	**AMF22** S	**$ 28**

N series lock cores (ALKF23CN) are a replacement part for legacy Allsteel products. N series lock cores were used in all Persona pedestals produced between January 1996 and August 2009 as well as Receding Door Overheads produced between January 1996 and August 2010. N series lock cores are NOT used in current product and should not be ordered for product produced after these dates. E series lock cores are used in current product, see above.

S *Shippable by small-package carrier.*

Appendix

EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except Receding Door Overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — Random, Specified or Sequential.

Random Keying

The Random Keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

Example: *There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

Example: *There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

Example: *A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

The first 40 offices have 4 silver locks each that need to be keyed-alike.

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

SAMPLE ORDER FOR EXAMPLES GIVEN:

Model	Key Type	Quantity
LKFE5BLK.	X.	15
LKFE2SLV.	X202.	10
LKFE4SLV.	SEQ/101.	40
LKFE3SLV.	SEQ/141.	20

NOTE: Quantity required is last number in model.option string.

Description	Model / Color	List Price
Easy Lock Lock-Core		
Lock Core Kit — 1 core, 2 keys	**LKFE1** ⌊__⌋	$ 27
Lock Core Kit — 2 cores, 2 keys	**LKFE2** ⌊__⌋	$ 56
Lock Core Kit — 3 cores, 2 keys	**LKFE3** ⌊__⌋	$ 83
Lock Core Kit — 4 cores, 2 keys	**LKFE4** ⌊__⌋	$ 111
Lock Core Kit — 5 cores, 2 keys	**LKFE5** ⌊__⌋	$ 139
Lock Core Kit — 6 cores, 2 keys	**LKFE6** ⌊__⌋	$ 167
Lock Core Kit — 7 cores, 2 keys	**LKFE7** ⌊__⌋	$ 195
Lock Core Kit — 8 cores, 2 keys	**LKFE8** ⌊__⌋	$ 223

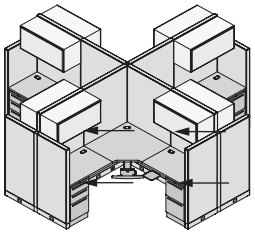
Add color suffix to model: **SLV** Silver, **BLK** Black, **MTS** Matte Silver

Note: One core removal key minimum per order. One additional core removal key per 25 lock-cores will be shipped.

Master Key		
(One key) Available to authorized dealers only on faxed orders.	**AMKF22**	$ 28

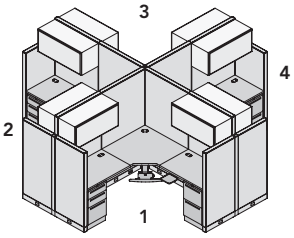
How to specify using Easy Lock Program:

Step 1 — Count the number of lock cores and color required in each workstation that need to be keyed alike.



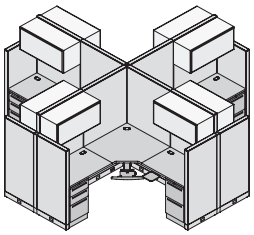
2 overheads with 1 lock-core each = 2
2 pedestals with 1 lock-core each = 2
Total silver lock-cores per station = 4

Step 2 — Count the total number of workstations needing 4 lock-cores.



4 total workstations

Step 3 — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.



LKFE4SLV.X.4

- **Lock-Cores per station**
- **Color of Core**
- **Number of workstations**

Price & Specification Guide 2022

Prices effective May 13, 2022

PDF updated April 21, 2022

Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

For information on Allsteel's warranty coverage, visit AllsteelOffice.com.

Desking & Benching

Specification and Price List

Effective May 13, 2022

- Software support packages furnished to the customer, either by Allsteel® or by another source, which support the sale of Allsteel products are superseded by printed price lists.
- Prices are subject to change without notice. All orders are subject to prices in effect at the time of order.
- Please refer to your Allsteel Dealer Sales and Discount Policies for order placement information, terms and conditions.
- Ordering information appears at the bottom of each product page complete with examples on how to specify. Fabric and finish pages are referenced at the bottom of product pages.

This publication is available as a downloadable PDF on Allsteel websites.

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at **allsteelcomteam@allsteeloffice.com**.

Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.

   If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

   In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.

   You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

   HNI Textile Distribution Center
   COM Production Yardage — PO Number
   Docks 20-22
   301 Mulberry Avenue
   Muscatine, IA 52761

Information that MUST be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

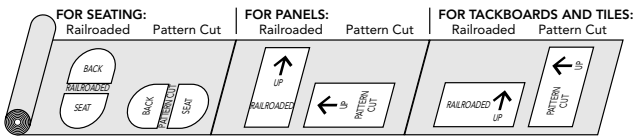
cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).



Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a $500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no $500 matching fee, however, there is a sample chip fee of $175 net for stains and $100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

  Allsteel Inc.
  Attn: Tailored Products Group
  2210 Second Avenue
  Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilsonart, Formica, Nevamar and Pionite laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

Everyday Advantage®

New terms and conditions for EDA:

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
   • Everyday Advantage Std-0125, Everyday Advantage Canada-0127
2. Everyday Advantage orders are not eligible for bid pricing.
3. Program discounting includes the complete Optimize, Further, Terrace, and Stride systems lines, private office solution, Approach and Involve storage. This program also includes Acuity, Access, Evo, Inspire, Lyric, Mimeo, Nimble, Quip, Relate, Seek, and Svelte, seating. Altitude, Aware, and Structure tables are also available, along with Align pedestals, lockers and metal storage and Essentials pedestals, and Radii storage lines. In addition, Extensions ergonomic accessories and lighting are part of the standard offering. All other product not called out is available for order on the contract but will receive standard discounting of 55%–65%.
4. All textiles and finishes except for veneer and some wood finishes are available, depending on quantity and selection, and may have extended lead times.
5. Everyday Advantage orders are not limited to a minimum or maximum.
6. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
7. Standard freight terms apply.
8. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

Allsteel Inc. reserves the right to amend or terminate this program at anytime with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's Partnership Program consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- **Carnegie, carnegiefabrics.com 1.800.727.6770**
- **CF Stinson, cfstinson.com 1.800.841.6279**
- **HBF Textiles, hbftextiles.com 1.877.494.5727**
- **Maharam, maharam.com 1.800.645.3943**
- **Ultrafabrics, ultrafabricsinc.com 1.877-309-6648**

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

***These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

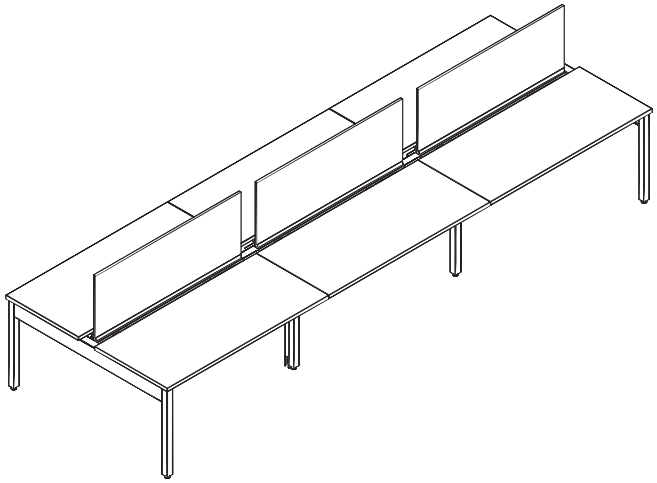
NOTE: Refer to individual product pages for upcharges.

FSC Certified Wood at Allsteel
See page 345 for more information.

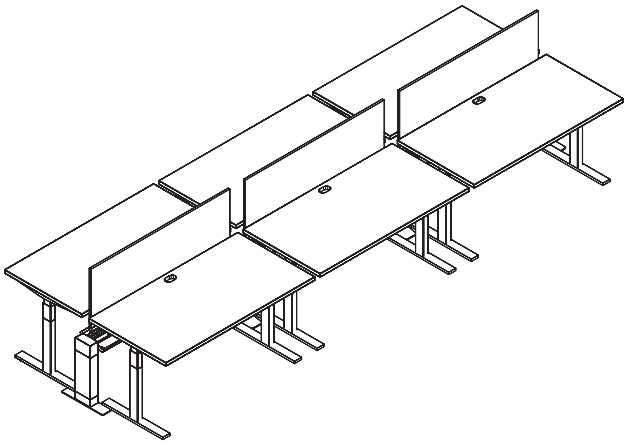
A full gallery of typicals from each Allsteel system can be found on our website:
https://www.allsteeloffice.com/design-resources/idea-starters.
Each typical includes a complete BOM with current pricing, downloadable CAD files and PDFs of each drawing.

Linear Shapes

Use the Allsteel Typicals Gallery to find the components used in a Further Station.

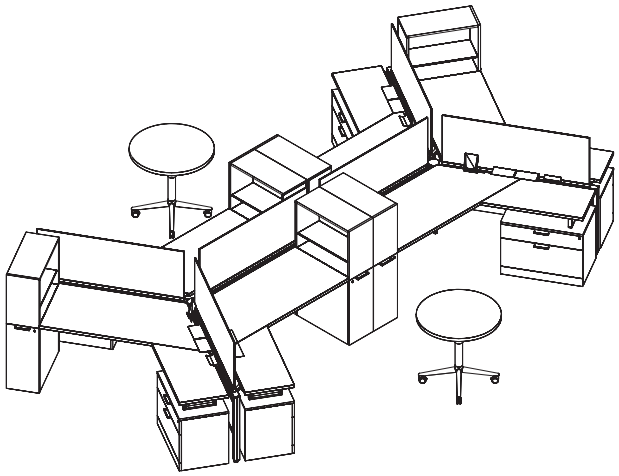


Further Beams Connected Bench 2'-6" x 5'
Bench configuration encourages collaboration.

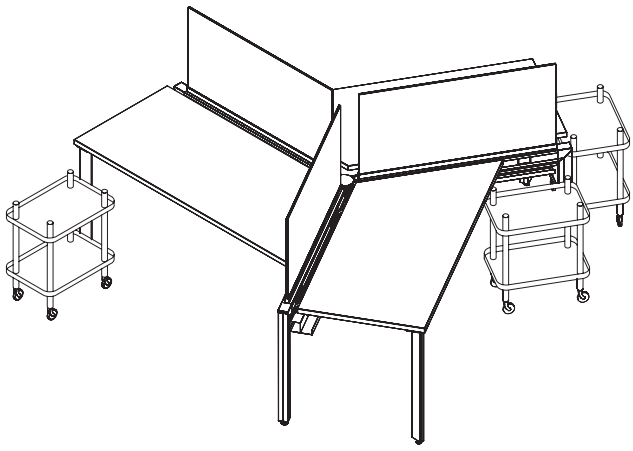


Further Bench w/Freestanding 2'-6" x 5'
Freestanding tables provide the ability to reconfigure as needed.

Organic Shapes



Further Beam Connected Dog Bone 7'-6" x 7'-6"
Trapezoid worksurfaces provide an open feeling.

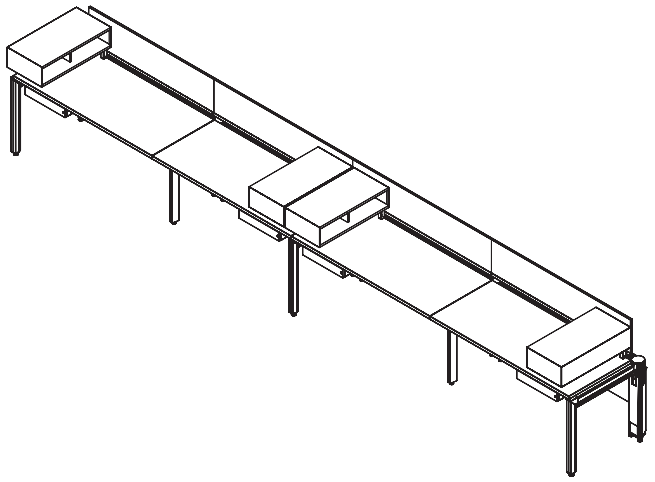


Further Pinwheel w/Freestanding 5'-6" x 6'
Mobile carts provide ability to reconfigure.

NOTE: Further Typicals can be found at https://www.allsteeloffice.com/design-resources/idea-starters.

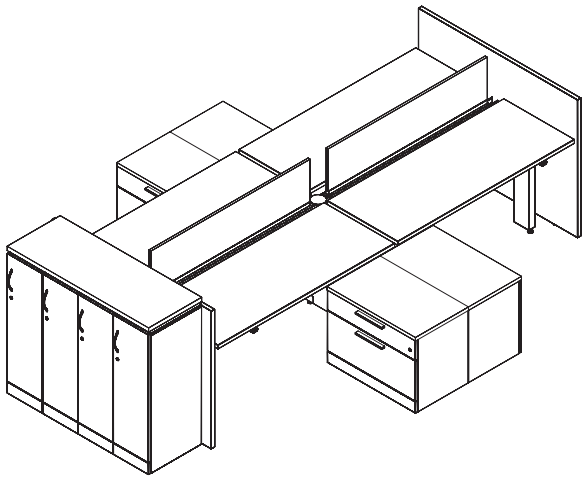
A full gallery of typicals from each Allsteel system can be found on our website:
https://www.allsteeloffice.com/design-resources/idea-starters.
Each typical includes a complete BOM with current pricing, downloadable CAD files and PDFs of each drawing.

Single Sided



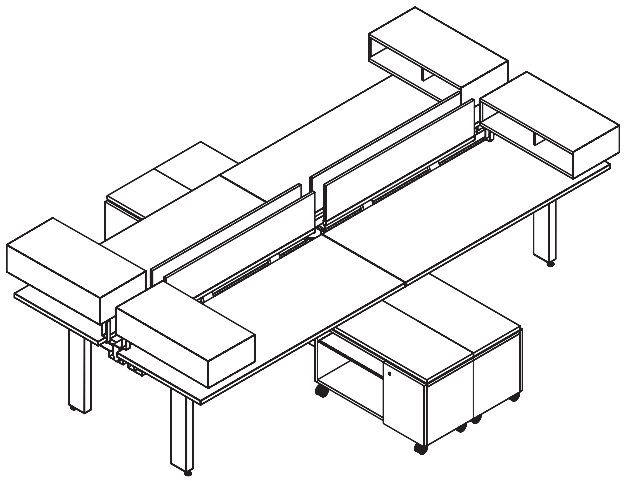
Further Touchdown 5' x 2'-9"
Storage and screens provide privacy.

90° Planning

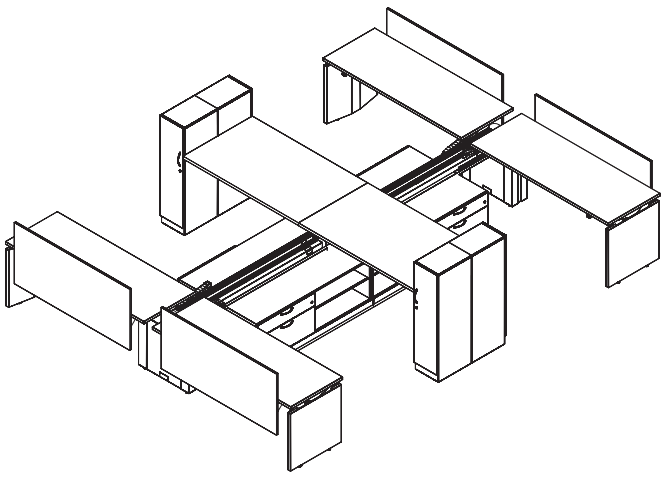


Further Short Bench 7' x 5'-6"
Gallery panels provide touch down privacy.

Dual Sided



Further Small Beehive 5'-6" x 5'-6"
Mobile credenzas double as guest seating.



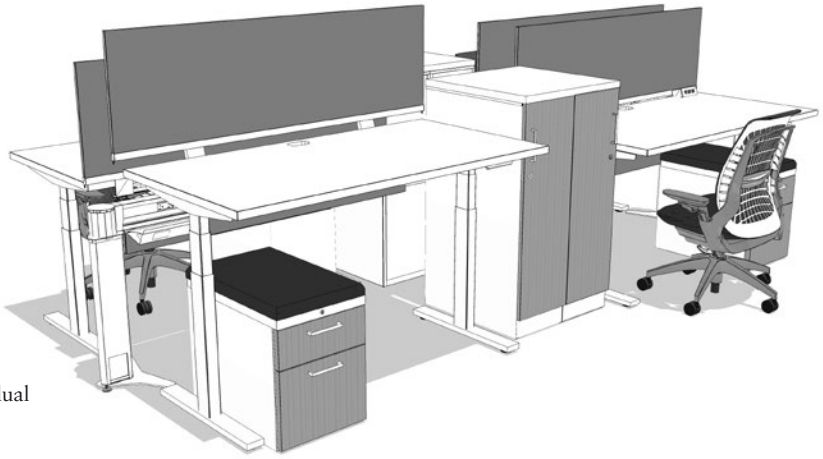
Further with Involve® 7' x 6'-2½"
Wardrobe towers provide storage for personal items and create space division.

NOTE: Further Typicals can be found at https://www.allsteeloffice.com/design-resources/idea-starters.

Choice is yours.

Further is an agile furniture solution that embraces the ever-changing workplace and frees people to adapt their environment — simply, elegantly and efficiently — at their own pace.

At the heart of Further is the hub. Ultimately flexible, the hub provides power and data support for a variety of applications, whether beam supported or freestanding.



Whether the planning approach is organic or linear, individual or team-based, Further can bring your design to life.

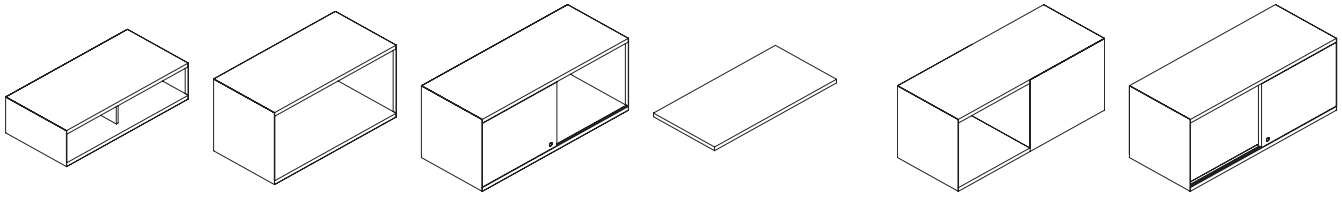
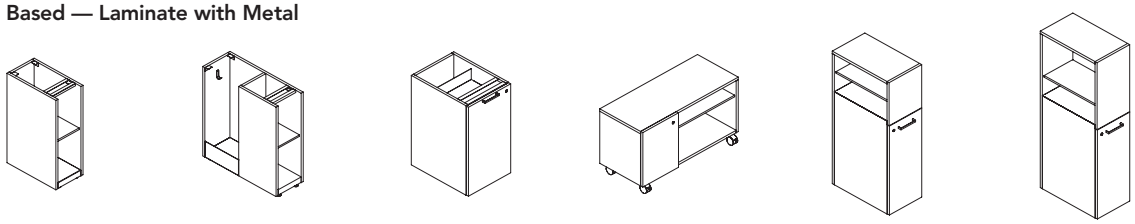
STORAGE

Horizontal — Laminate with Metal



Nitch | Open | Sliding Door | Beam Mounted Shelf | Dual-Sided Open | Dual-Sided Sliding Door

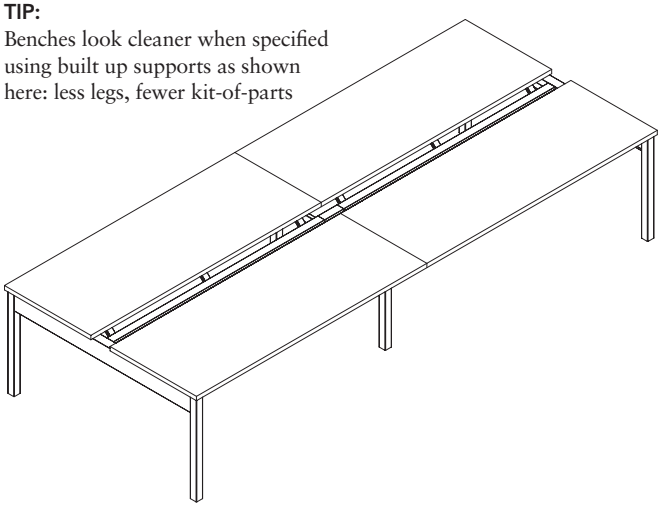
Floor Based — Laminate with Metal



Open Support Pedestal | Open w/Bin Pedestal | Pull Out Drawer Support Pedestal | Mobile Credenza | 42½"H Tower | 50"H Tower

Dual Sided Bench — Tethered

TIP:
Benches look cleaner when specified using built up supports as shown here: less legs, fewer kit-of-parts



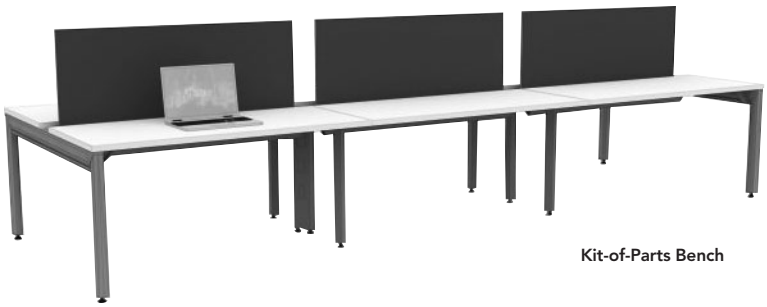
Dual-Sided Bench (Non-Sit-to-Stand):

- Maximum run length is 60'.
- Available in two styles: H-Leg and A-Leg for both End and Mid-Supports.
- Use infeed cover for H-Leg and A-Leg supports.
- Beam mounted storage shelf is allowed.

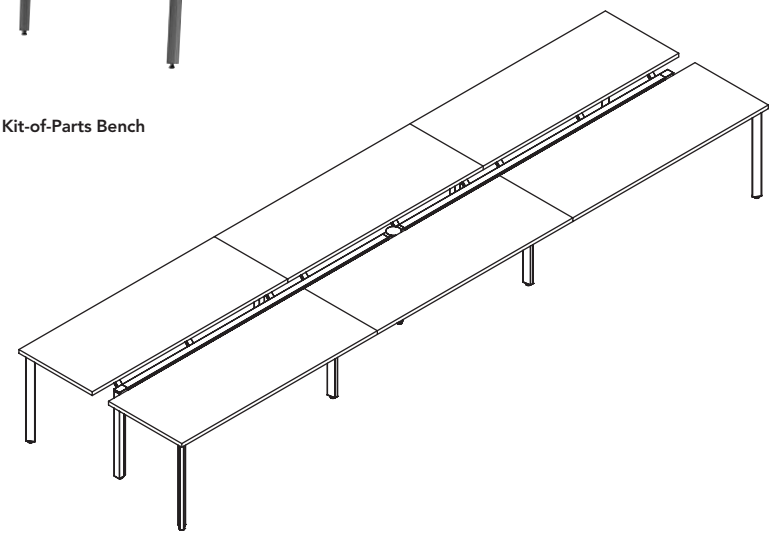
When specifying with Kit-of-Parts (Beam End Leg, In-Line Leg, Worksurface Legs and Hubs), adhere to the following rules:

- A support to the edge of the worksurfaces is required every 18' of run. This may be any of the following:
  a) return beam
  b) support storage
  c) bench end
  d) worksurface support leg at front edge of worksurface.
- When two worksurfaces are side by side parallel to the beam, a worksruface support leg in a shared application or worksurface support storage is required.
- A minimum of four worksurfaces are required when using a beam and beam end leg kits on both ends of a run.
- Cannot not use two in-line support legs in a row.

A-Leg Bench

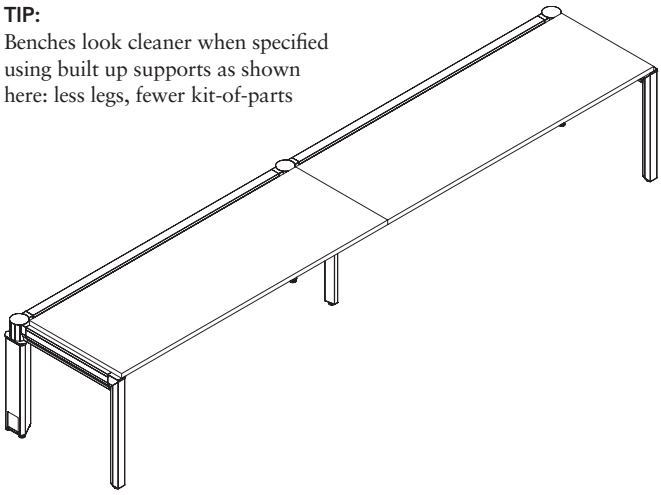


Kit-of-Parts Bench



Single Sided Bench — Tethered

TIP:
Benches look cleaner when specified using built up supports as shown here: less legs, fewer kit-of-parts

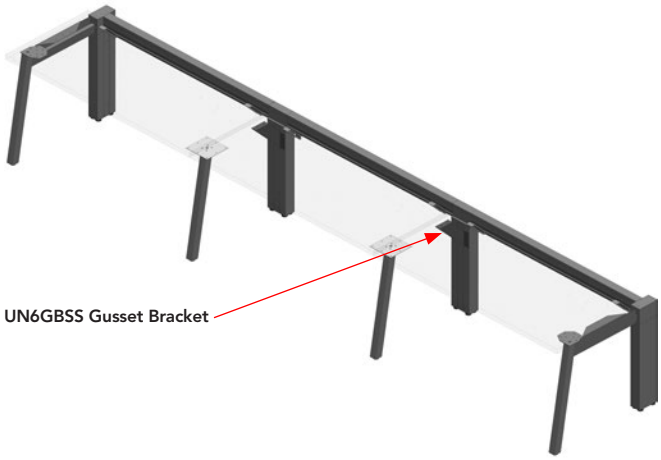


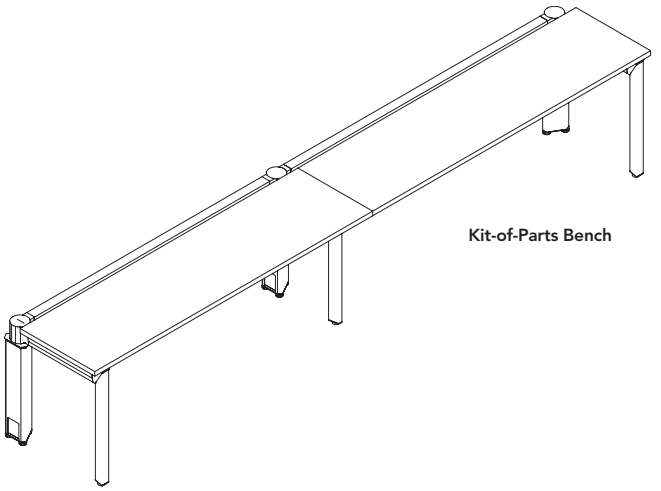
Single-Sided Bench

- Available in two styles: H-Leg and A-Leg for both End and Mid-Supports.
- Infeed can be routed through the H- or A-Frame supports.
- Use gusset bracket with every mid-support for stability. Adhere to this rule even when specifying In-Line legs or Hubs. Gusset bracket ordered separately - model UN6GBSS
- Beam mounted modesty screens recommended to provide privacy and conceal single-sided wire or data managers.
- Beam mounted storage shelf is allowed.

When specifying Kit-of-Parts bench (Beam End Leg, In-Line Leg, Worksurface Legs and/or Hubs), adhere to the following rules:

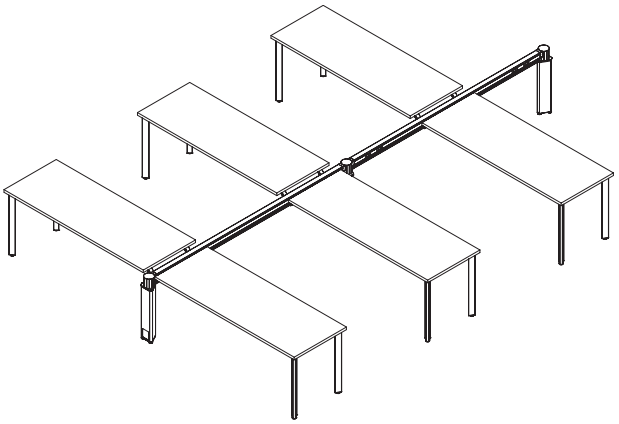
- Maximum run length is 26'.
- Maximum beam length allowed is 72".
- Worksurface support leg in a shared application or worksurface support storage is required.
- Gusset bracket is required at every mid-support leg or hub.
- Note: End-of-run worksurfaces overlay return beams halfway.





FURTHER

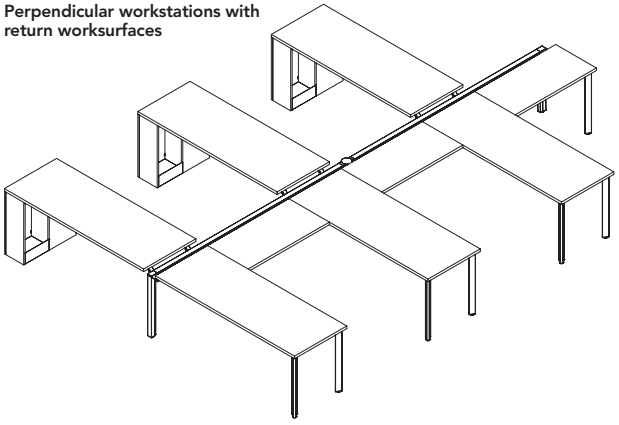
Perpendicular to Beam



Perpendicular Workstations

- Maximum setup length is 60'. Maximum of two 96" beams can be used in a run.
- Worksurfaces mounted perpendicularly to beam require 2 worksurface mounting brackets U6WBTF. Brackets cannot be placed more than 6" from edge of worksurface.
- Perpendicular workstations may be used with return worksurfaces. A flat bracket must be used between the two surfaces in place of a shared support leg.
- Specifying a setup with only perpendicular worksurfaces requires either support storage on the non-beam side or all beam support to be hubs.
- In-line support leg cannot be used.
- Horizontal storage is allowed. Worksurface stanchions must have a surface to rest on.

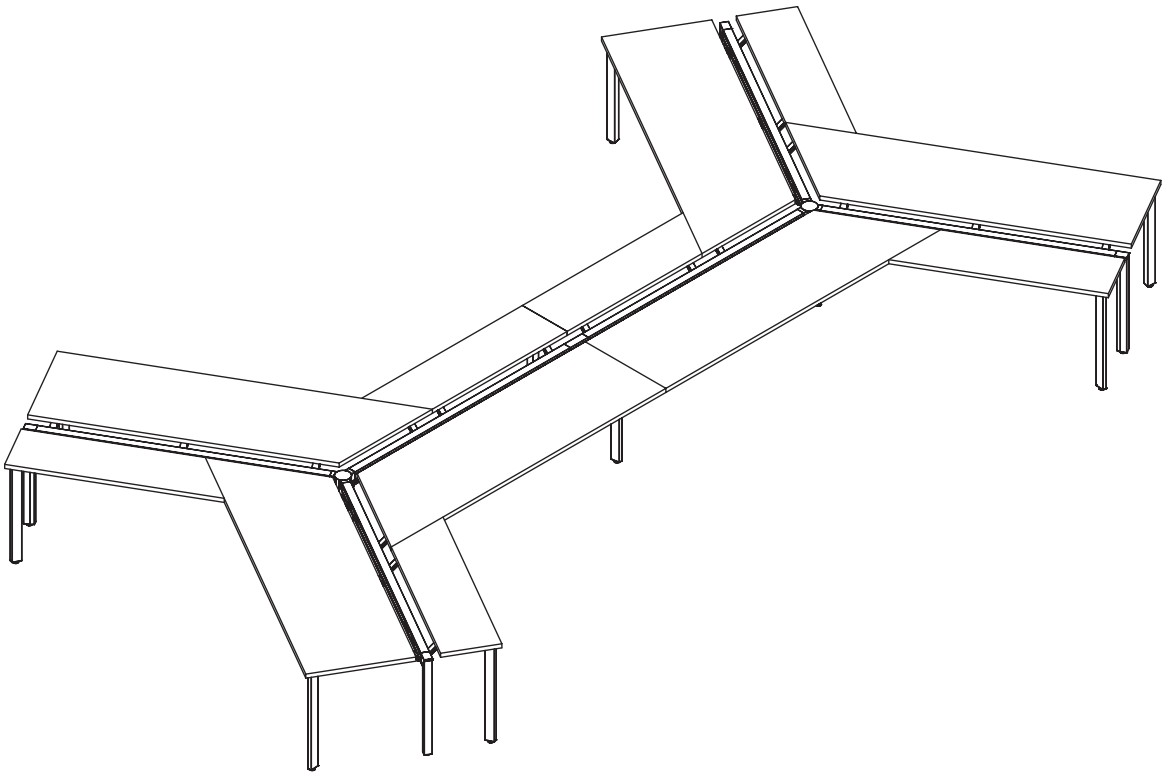
Perpendicular workstations with return worksurfaces



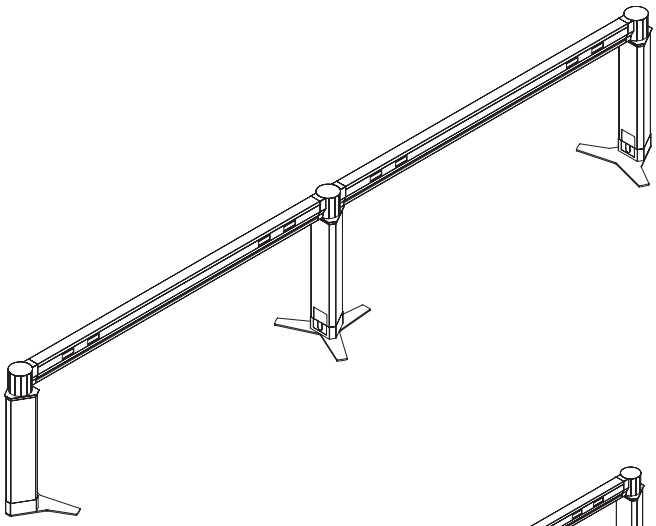
120° Pinwheel — Organic Tethered

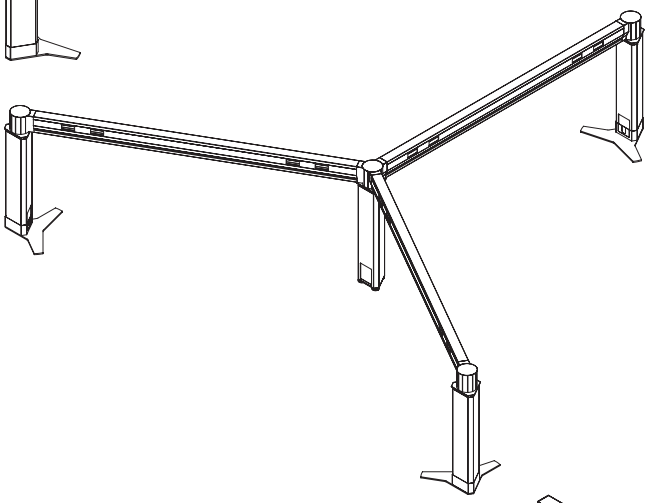
120° Organic Workstations

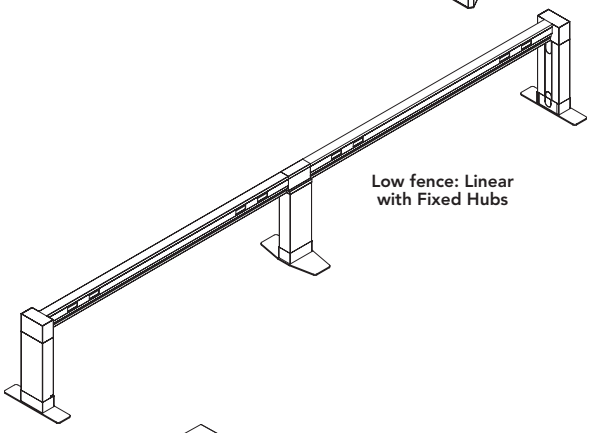
- Beam lengths match on module to short side of trapezoid surfaces only.
- Flexible hub required for 120° beam connections.
- When specified, runoff worksurface “hand” must be the opposite of the parent worksurface “hand” to match beam lengths.
- Horizontal storage is allowed. Worksurface stanchions must have a surface to rest on.
- When back-to-back worksurfaces are of equal depths (24"D or 27"D), Bench End and Mid-Supports can be specified.



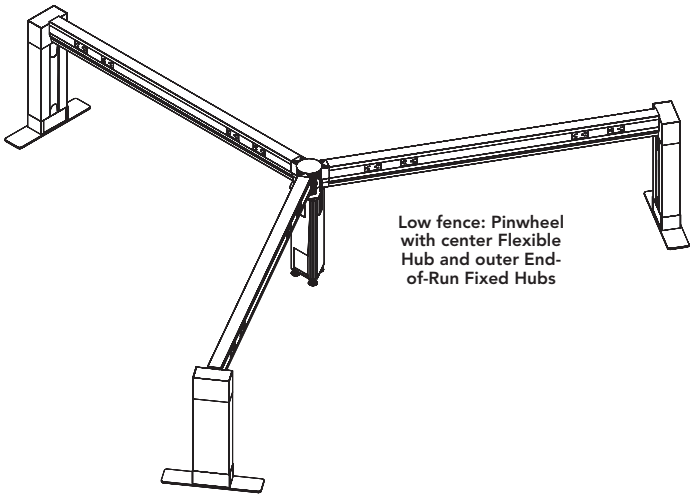
Freestanding Beams



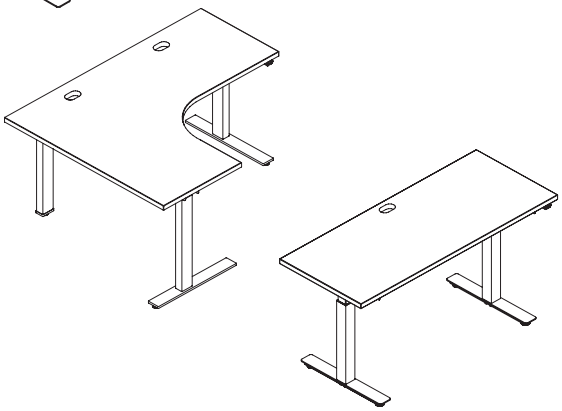




Low fence: Linear with Fixed Hubs



Low fence: Pinwheel with center Flexible Hub and outer End-of-Run Fixed Hubs



Freestanding Beams

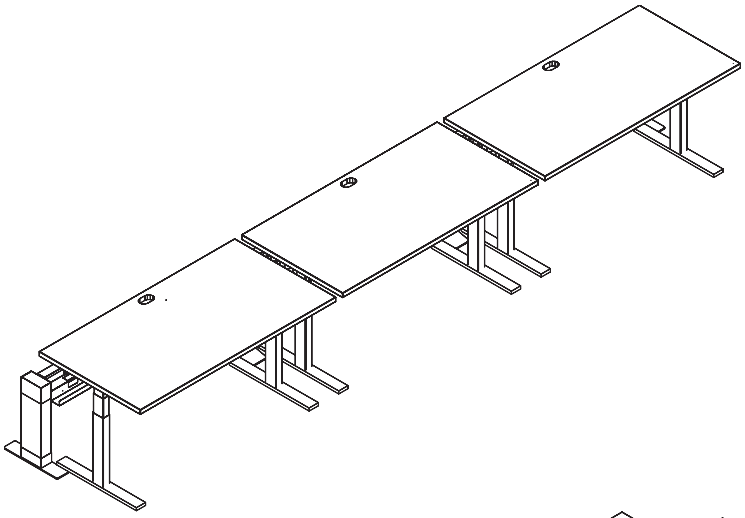
- No restrictions on maximum setup length.
- Hubs must be used for support. Gallery Panels can be used at ends in lieu of hubs.
- Low hubs recommended when using height-adjustable worksurfaces to avoid height-adjustable desk to beam collision.
- Hub feet or floor anchor brackets required, except at L-, T-, or X-connections.
- Minimum 54" beam in a one beam with two hubs application.
- Minimum return run length using a beam end support leg is 36", use of hub is recommended for return beams.
- Glass screens are allowed when supported using Gallery Panels at both ends or L-, T- or X-connections.
- Beam mounted fabric screens are allowed.
- 13"H fabric screens can be used as Modesty with low beams.
- Beam mounted horizontal storage not allowed.
- Flexible and Fixed Hubs are interchangeable.
- Flexible and Fixed Hubs may be used in conjunction to create the desired applications.
- 1-shelf per freestanding beam allowed. Must have hub feet.

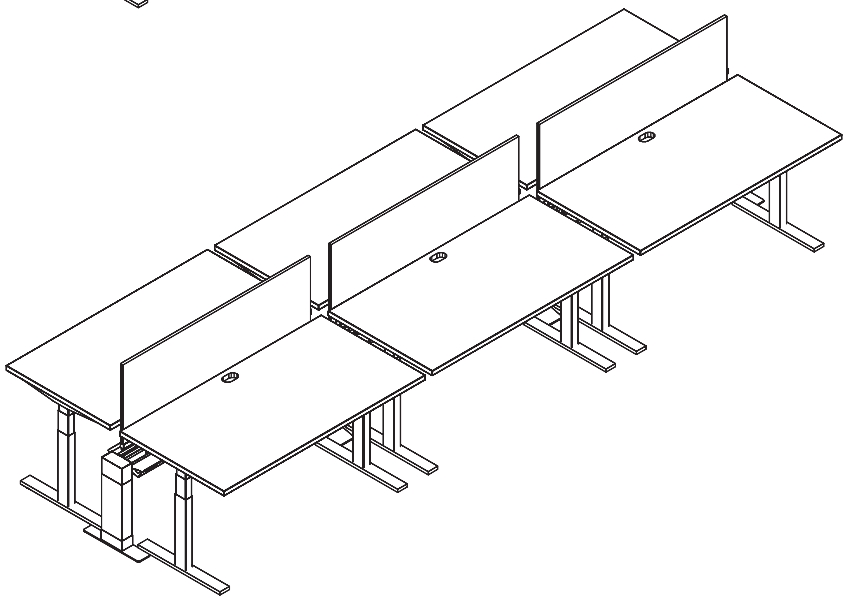
2- and 3-Stage Height-Adjustable Tables

Allsteel's Altitude electric height-adjustable tables provide the perfect combination of functionality and user control.

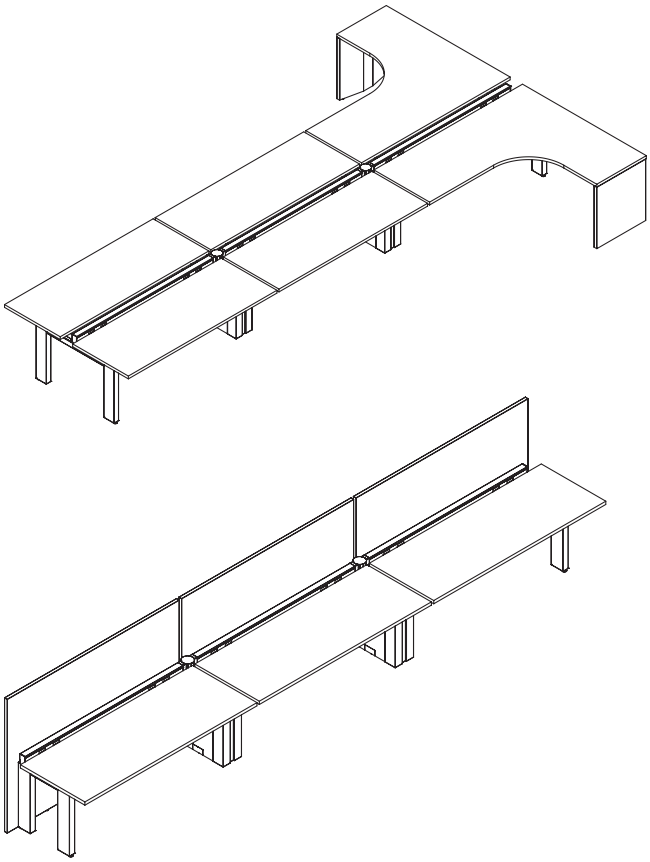
The sit-to-stand adjustment encourages posture changes throughout the day and has been shown to increase workplace satisfaction and overall comfort. These easy-to-operate tables can accommodate different workstyles, making it an ideal solution for any work environment.

Freestanding Beams





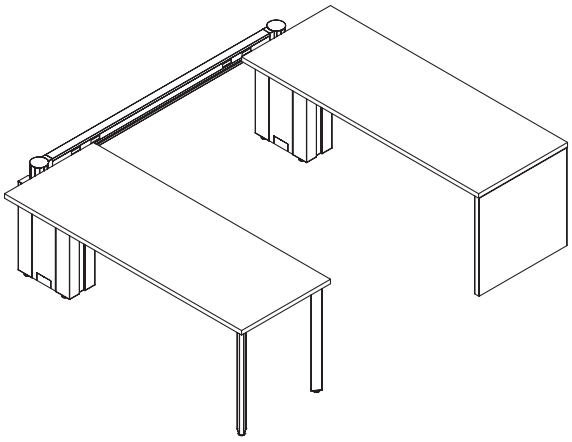
Adaptive Linear Benching — Height-Adjustable

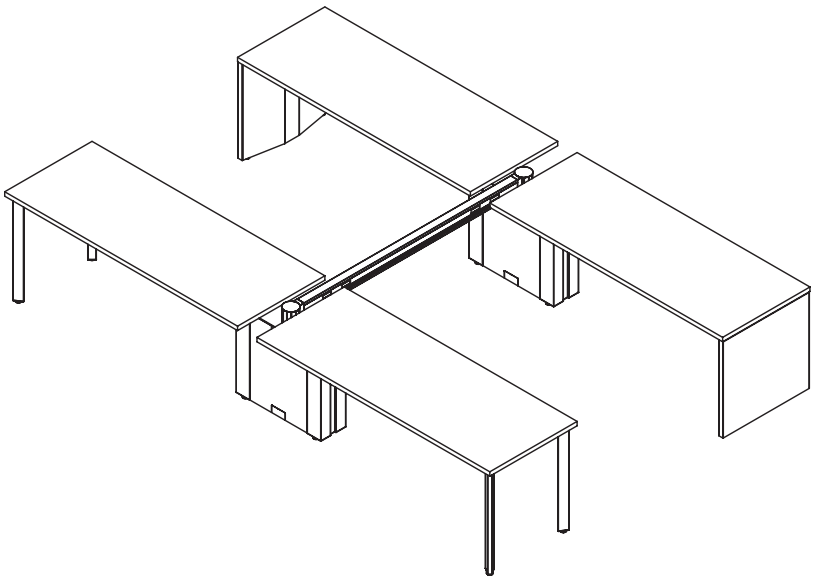


Adaptive Benching

- Mid-supports are required.
- A maximum of two mid-supports in a row may be used.
- Two end supports may be used in succession to extend 6-pack – requires 9" in-line beam connector.
- Single-sided setups require gallery panels to be mounted along spine of beam, or floor anchor brackets on all beam supports.
- Minimum of two single-sided stations allowed.
- Single-sided gallery panels must match the length of worksurfaces specified. Minimum height of the Gallery Panel must be 42"H.
- Adding power to a dual-sided two station application requires a hub at one end.
- Dual-sided two-station requires leg infill on each end support for stability. Contact Allsteel Tailored Products Group.
- Cornercove worksurfaces require a 3-leg control box kit and perpendicular outer support.

Adaptive Perpendicular — Height-Adjustable

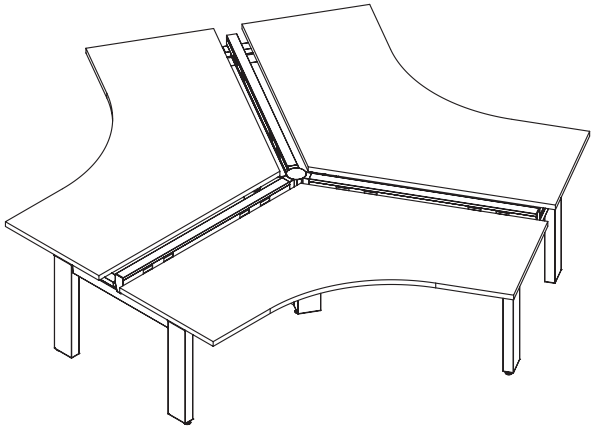


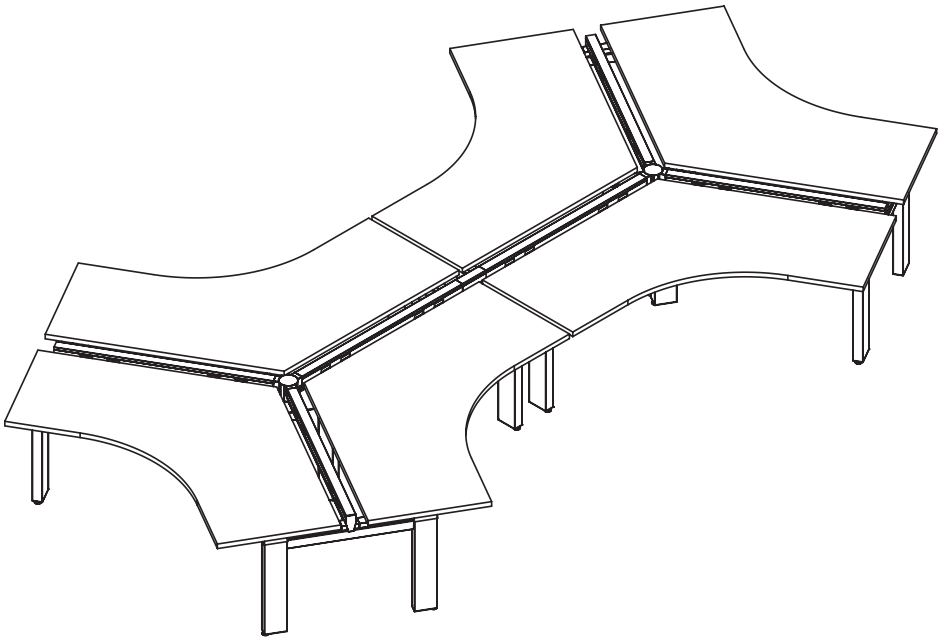


Adaptive Perpendicular Workstations

- No restriction on number of perpendicular mid supports used in a row.
- Worksurfaces are centered over perpendicular mid supports, but may be mounted up to 4⅛" forward from mid support to reduce footprint.
- Minimum of 4 stations for dual-sided applications, 2 stations for single-sided applications.
- Perpendicular mid support does not complete height-adjustable station – must order perpendicular outer support.
- Fixed height stations require two worksurface support legs on non-beam side in place of a perpendicular outer support.
- A minimum beam length of 30" must be used between perpendicular mid supports for 27"D surfaces, and a minimum length of 24" for 24"D surfaces.
- Trapezoid worksurfaces not allowed.

Adaptive Organic — Height-Adjustable

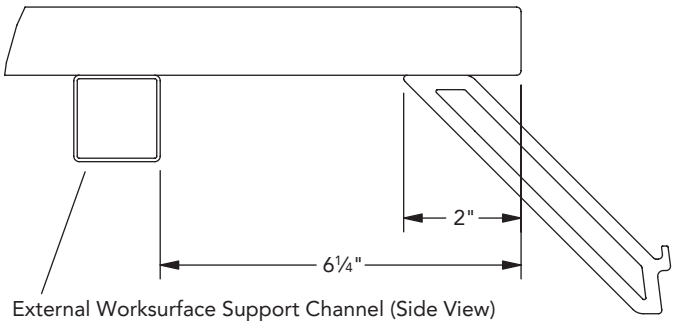




Adaptive 120° Workstations

- Requires a 120° mid support at all 3-way beam connections.
- End supports required on beams also connected to a 120° mid support.
- 7" in-line connector required to attach multiple 120° workstations.
- Single-sided end supports not allowed.
- Trapezoid worksurfaces not allowed.

Flat Edge Detail

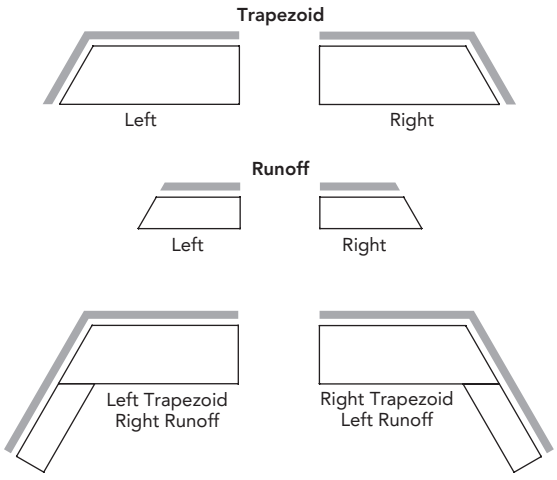


External Worksurface Support Channel (Side View)

The beam attaches to the shaded worksurface edge.

Rectangular Worksurfaces (Top View)

Trapezoid and Runoff Worksurfaces (Top View)



All Worksurfaces (pages 42-48)

- All worksurfaces for Further are 1¼" thick particleboard core with top surfaces finished in laminate, bottom surfaces covered with a backer sheet, and with a flat edge.
- Edge band is 2mm thick ABS plastic on all edges.
- All worksurfaces exclude grommets.
- 24"D worksurfaces support the use of storage from other Allsteel product lines.
- The gap from the back edge of the worksurface to the beam is 1⅞".
- Back edge of the worksurface to the beam centerline distance is 3".
- Maximum worksurface overhang of a parent run is 12". Worksurfaces that overhang the parent run by more than 12" require system legs or supporting storage to support the overhanging edge.
- Maximum 12" overhang when worksurfaces are used in freestanding or adjustable-height applications.
- Distance from floor to top of worksurface is 29½" with glides fully retracted.
- External worksurface support channels are required for unsupported spans at 60"W or greater — see description below.
- Legs and supports from other product lines (Stride post legs, Involve open legs, etc.) can be used but there are no pilot holes to support ease of installation and reconfiguration.

Rectangular Worksurfaces (page 43)

- Primary worksurface depths are 21", 24", and 27" (allows for gap and 24", 27", or 30" dimension to center of beam).
- Actual width and depth are equal to the nominal width and depth.

External Worksurface Support Channel (page 42)

- Must be added to unsupported spans at 60"W or greater. Pilot holes are included on worksurface to ensure accurate placement to avoid interference with screens, mounting plates etc.
- Extends 1½" below the worksurface. Stiffener is 6½" from back edge of the worksurface to the vertical wall of the stiffener.
- May interfere with storage or mounting of accessories.
- When using tethered surfaces order to match the size of worksurface. *Example:* Z5SC72 goes with an 72"W worksurface. Stiffener is 12" shorter than worksurface. For worksurfaces over 84", add a worksurface support leg or support storage centered along the width of the surface.
- If floor support storage is used, subtract width of storage from size of stiffener.
- For freestanding tables order one size down. Stiffener is 18" shorter than worksurface. Example: Z5SC66 is used with a 72"W worksurface.

Trapezoid Worksurfaces (pages 44-46)

- Primary worksurface depths are 21", 24", and 27".
- When using trapezoid surfaces beams will be on module when short side is oriented toward the beam. Using long side oriented to beam will be a non-modular application, specify nearest beam length.

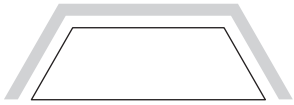
Trapezoid Runoff Worksurfaces (pages 44-46)

- Run off worksurface depths are 15" and 18".
- When using run off surfaces the hand of the run off should be opposite the hand of the parent to match beam lengths.
- Flat bracket T612FB and system support leg U6L2FG are required when using run off surfaces with primary surfaces in 120 degree applications.
- Are not allowed to be used for freestanding tables.

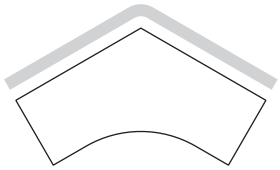
Reference Page

Flat Edge Detail

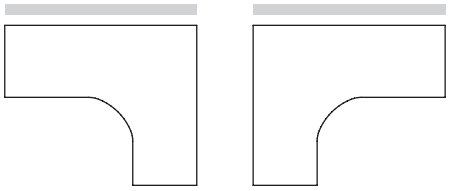
Shaded edge is side to attach to beam to be on module.



Symmetrical Trapezoid Worksurfaces (*De-emphasized*)
- Symmetrical Trapezoid worksurface depths are 21", 24", and 27". Sized for intended gap on three sides of worksurface.
- When using trapezoid surfaces beams will be on module when short side is oriented toward the beam. Using long side oriented to beam will result in a non-modular application, specify nearest beam length.
- Back edge widths 39"- 57"W require 4 worksurface brackets U6WBTF. Back edge widths over 57"W require 5 brackets.
- Models with a front edge length of 70" and wider require a support leg centered and no more than 18" from front edge in both tethered and freestanding applications
- Models with front edge of 60" in length and wider require external stiffener. Stiffener should be undersized by 12" from length of front edge.



120˚ Worksurfaces (page 47)
- 120˚ worksurface depths are 21", 24", and 27".
- Can be configured with Altitude™ height-adjustable bases.
- Can be configured with support storage on either side of the worksurface.
- Requires 4 worksurface brackets U6WBTF when primary sides of surface are parallel with beams.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.



Corner Coves (page 48)
- Corner cove worksurface depths are 24" and 27"; widths are 60"W, 66"W, and 72"W; and return side is always 60"W and 24"D.
- Worksurfaces come with required external support channel.
- Can be configured in standard Further or Further Adaptive.
- When using Further Adaptive perpendicular outer supports U6PE241HA, one U6MSDG adaptive gusset should be ordered for every two worksurfaces. If there is an odd number of worksurfaces, an additional U6MSDG should be ordered for the odd worksurface.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

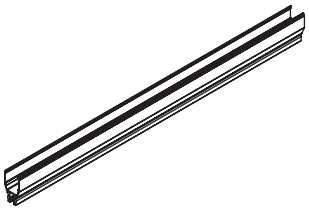
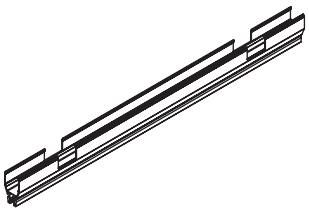
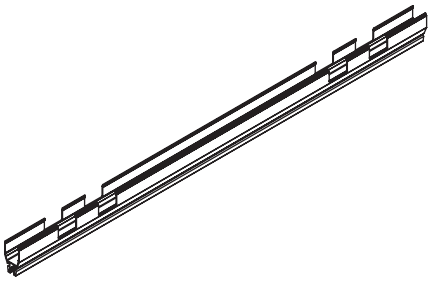
Beam Configurations



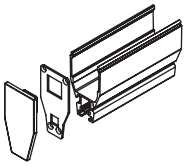
Beams —
Non-Ported
18"–96"



Beams — Ported
Short 36" and 42"

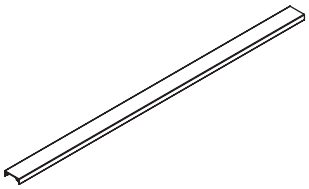


Beams — Ported
Long 48"–96"

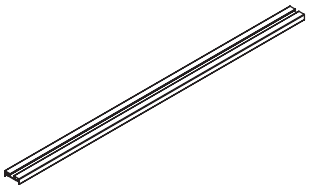


Cantilevered
Beam
6"–12"

Top Trim



Flat — 6"–96"



Rail — 6"–96"

Beams (page 49)
- Supplies power to user and supports worksurfaces, storage, and screens.
- Ported and non-ported options available in 6" increments. Ported beams require electrical receptacles or blank covers ordered separately.
- Flat or mounting top trim required to finish off beams – order separately.
- Beams do not connect directly in-line with one another, use in conjunction with beam support.
- Height of assembled beam with top trim is 4¼"H x 2⅛"D.
- Order worksurface support brackets U6WBTF separately – quantity varies, see page 40.
- Electrical port locations are back-to-back, symmetric about beam center, and a standard distance away from beam ends on all lengths.
- 36" and 42" ported beams have 2 duplex receptacle locations on each side (4 total), 48"-96" ported beams have 4 on each side (8 total).
- Ported beams do not carry data cables internally. Data cables are routed externally through beam mounted wire-managers. See pages 60 and 70.
- Non-ported beams can be used in conjunction with beam end legs and benching end connector to create a benching end condition.

Cantilevered Beam (page 49)
- Cantilevered beams can extend the length of a run by 6", 9", or 12".
- Must mount to a flexible hub or adaptive mid support.
- Must order flat or mounting top trim separately.
- Model includes a finished end cap.
- Worksurfaces can be mounted on a cantilevered beam when used in conjunction with a worksurface support bracket.
- Horizontal storage cannot be mounted to a cantilevered beam.

Beam Top Trim (page 50)
- Available in 6"-96" lengths in flat or mounting rail and is required to finish off a beam. Must match beam length, no exceptions.
- Mounting top trim contains a reveal for mounting screens and storage.
- Mounting top trim is recommended for projects specified under Chicago electrical Codes.
- Flat top trim is recommended on beams used in a bench end kit.

All Beam Supports (pages 51-53)
- Usage rules vary depending on configuration, see specification rules and examples, pages 25-33.
- Include leveling glides with 2¾" adjustment.

Flexible Hub (page 51)
- Supports up to four beams attached in 30° increments; order hubs based on the number of beams that will be connected.
- Carries power and data to the beam structure; infeed can be routed through the side or bottom of hub.
- Hub has one removable cover for installation of power and data.
- Standard, ported, and high-capacity options available.
- Ported flexible hub requires a power kit and duplex receptacles – each ordered separately.
- Flexible high-capacity hub increases system data capacity. (see pages 59-60)
- Flexible high-capacity hub comes with 2 grommet covers as standard.
- Required when using power pole U2HPP.
- Includes flat trim; may be used to span a screen over the trim.
- Freestanding applications require flexible hub feet. (see page 29)
- No foot is needed on a Flexible Hub when connecting to 2 or more beams in a non-linear application.

Flexible Hub Base Kit (page 51)
- Attaches to flexible hub.
- Options available for two and three feet. Two feet used at the end of a run, three feet used in the center.
- Provide standard leveling of 2¾".

Fixed Hubs (page 51)
- Carries power and data to the beam structure; infeed can be routed through the side or bottom of hub.
- Hub has one removable cover for installation of power and data.
- In-line and end-of-run options available.
- In-line fixed hub supports two beams in a 180° condition and adds 6" to run.
- End-of-run fixed hub supports one beam and adds 3" to run.
- End-of-run fixed hubs can be turned 180° to remove the cover and access leveling glides and cables inside.
- Freestanding option available – See additional details below.
- For a free-standing application, it is ideal to specify the low hubs. See below.
- Specify UN6HFCAU for In-Line foot or UN6HFEAU for end-of-run foot separately.
- Required when using square power pole.

Low Hubs (page 52)
- From floor to top of the low Hub is 20½".
- Fixed Hubs
  - include feet with standard leveling of 2¾".
  - are recommended for straight or linear applications.
- Flexible Hubs
  - feet are not required when used in L-, T-, or X-connection.
  - feet are required when using in linear application (feet ordered separately - see page 51).
  - may be used in conjunction with Fixed Hubs to create the desired applications.
  - are available in both standard- and high-capacity options.
  - include Hub-to-Beam connectors.
- Required when using square power pole.

Floor Anchor Brackets (page 51)
- Used to anchor beam and worksurface supports to the floor.
- Attach to standard leveling glides provided with all beam supports.
- May be required with hard-wired electrical depending on local code.
- May be used in place of flexible hub feet in freestanding applications.
- Hardware for mounting to floor is not included.
- Internal (hidden) option available for flexible hub. U3HAI
- External kit U3HAE contains 3 anchor brackets.

Carpet Grippers (page 51)
- Attach to leveling glides for added system rigidity when placed on carpeted surface.
- Kit U3CG12 contains 12 carpet grippers.

Reference Page

Beam
End Leg
(Adds 3")

Beam End Leg (page 53)
- Supports a beam at the end of a run.
- Model includes vertical support leg, beam connector, and trim.
- Extends beam run by 3".

Worksurface
Support Legs

Square A-Leg,
Worksurface
Support

Square
Straight Leg,
Worksurface
Support

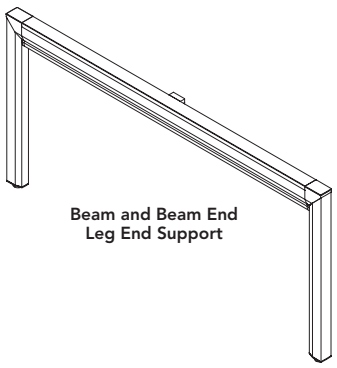
Worksurface Support Legs (page 53)
- Support worksurfaces that are tethered to the beam structure.
- Triangular Leg and Square Leg options available.
- Triangular Leg can be used to support free-standing tables.
- Can be used as a shared support leg centered between two worksurfaces. Includes tie-bracket for shared applications.
- When used as a shared support leg, must not be more than 15" back from front edge of worksurface on 24"D and 27"D worksurfaces; no more than 12" back on 15"D, 18"D and 21"D worksurfaces.

In-Line
Square Leg
(Adds 6")

In-Line Legs (page 53)
- Supports between two beams.
- Dual sided applications may not use two in a row.
- Single sided applications must be used in conjunction with the gusset bracket UN6GBSS. Ordered separately.
- Includes flat trim.
- Screens may span over in-line leg flat trim.

Wall Mount
(Adds 3")

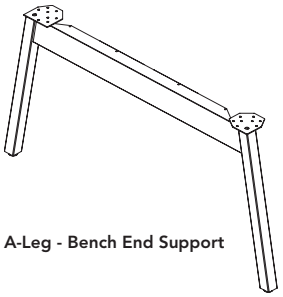
Wall Mount (page 53)
- Attaches end of beam run to wall.
- Power infeed and data accessible.
- Mounts directly over or adjacent to a wall core.
- Mounting hardware for attaching to wall is to be supplied by installer. Requires hitting wall stud.
- Starts beam 3" from wall. On module worksurfaces sit flush to wall.
- Can be used in freestanding beam applications.



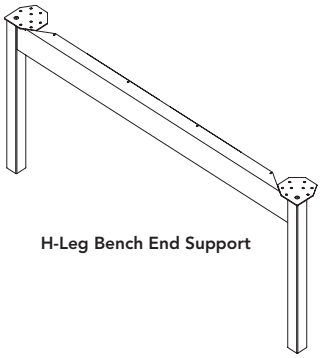
Beam and Beam End
Leg End Support

Bench End Triangular Supports with Built-up Components
(pages 49, 50, and 53)
- Supports a beam and two worksurfaces at the end of a run.
- Bench end support cannot be used to make a freestanding table.
- Comprised of the following items, all ordered separately:
  - Non-ported beam
  - Flat top trim
  - Beam end support leg (Qty 2)
  - Bench end connector kit
  - Worksurface mounting bracket (Qty 2)
- Beam and top trim length to be 2X the worksurface depth.
- Beam mounted modesty may be used on bench end beam.
- Power cannot be routed from parent run into bench end support beam.

Reference Page

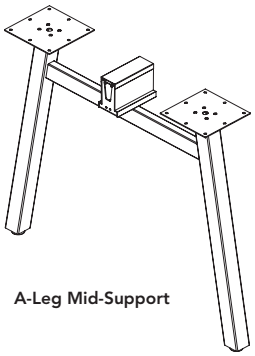


A-Leg - Bench End Support

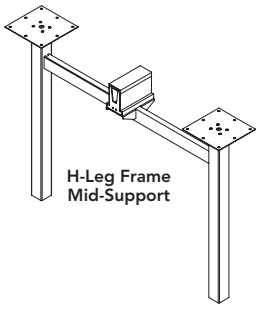


H-Leg Bench End Support

Bench End Support (Square leg page 54)
- Used in dual sided applications only.
- Supports a beam and two worksurfaces at the end of a run.
- Available in two styles: A-Leg and H-Leg.
- Power infeed accessible; infeed covers ordered separately.
- Bench end support cannot be used to make a freestanding table.
- Works with 24" and 27" deep worksurfaces.
- Beam mounted modesty cannot be used on bench end supports.
- Features “square” leg profile.



A-Leg Mid-Support

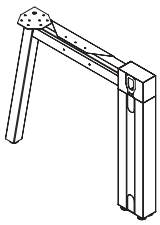


H-Leg Frame Mid-Support

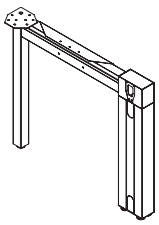
Mid-Support (page 54)
- Used in dual sided applications only.
- Available in two styles: A-Leg and H-Leg.
- Power infeed accessible; infeed covers ordered separately.
- Includes flat trim; may be used to span a screen over the trim.
- Features “square” leg profile.
- Not compatible with Chicago or NYC J-boxes.

Table Leg w/Caster

Table Leg with Caster (page 53)
- Support worksurfaces in freestanding table applications.
- Unsupported spans over 60" require external support channel.
- Tables 78"W or greater require 2 additional legs in the center of the table (6 legs total) to resist bowing.
- Can be used with surfaces from other product lines, but pilot hole locations will not be available for installation or reconfiguration.

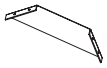


A-Leg, Single Sided End Support



H-Leg, Single Sided End Support

Single Sided End Supports (page 54)
- Used in single sided applications, end of run.
- Available in two styles: A-Leg and H-Leg.
- Comes in Left and Right Hand configurations.
- Works with 24" and 27" deep worksurfaces.
- Infeed accessible.
- Bench end supports cannot be used to make a freestanding table.
- Features “square” leg profile.



Gusset Bracket

Gusset Bracket (page 53)
- Must be used in single sided applications to provide stability to In-Line leg or Hubs.
- Specify one bracket per support.

Reference Page

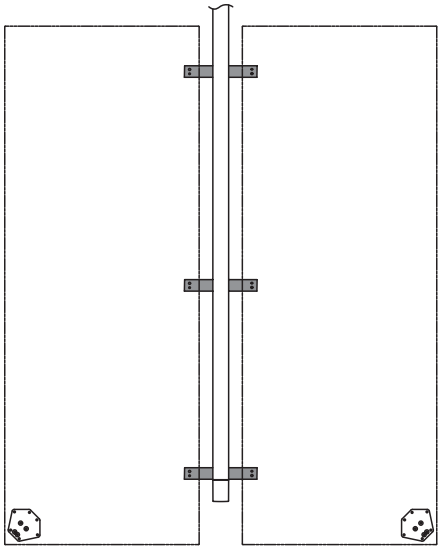
Worksurface Brackets Required for Attaching to Beams
(Additional Supports Required)

WORKSURFACE SHAPE:	QTY OF WORKSURFACE SUPPORT BRACKETS (Model U6WBTF)			
	1	2	3	4
Rectangular* Perpendicular		21"W–60"W**	Wider than 60"	
Trapezoid**			28"W–58"W	Wider than 58"
Runoff***	15"W–39"W	Wider than 39"		
120°				46"W–52"W
Corner Cove (supported on one side)		60"W	Wider than 60"	

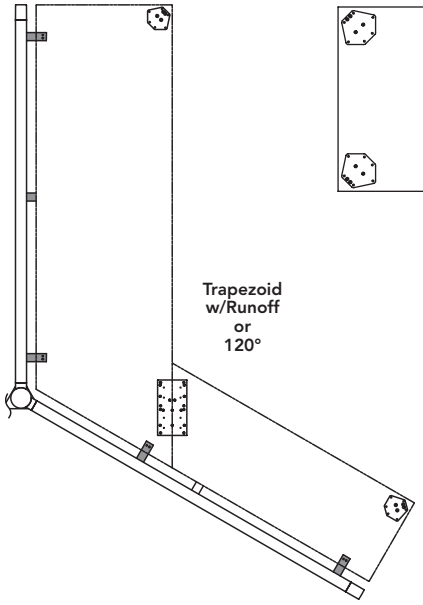
*Rectangular ends in return applications require an additional bracket.
**Dimensions are taken from the short width side of surface.
***Runoff worksurface dimension is taken from short side of worksurface.

Worksurface Support Bracket (pages 42 or 53)

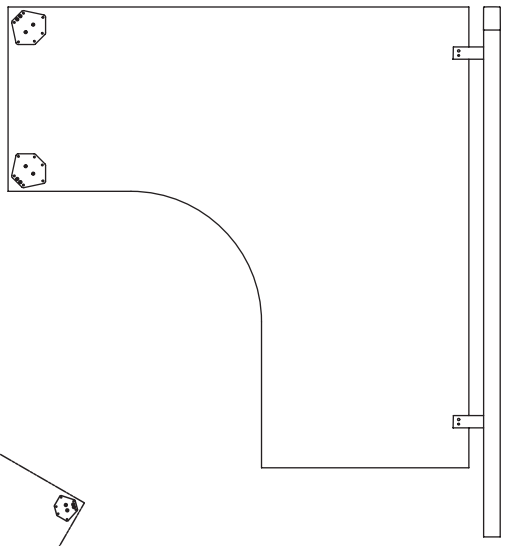
- Used to tether worksurfaces to the beam structure. All worksurfaces come with pilot holes for standard bracket locations along the back edge of worksurface.
- Brackets mount into the continuous reveal on each side of the beam.
- Worksurfaces cannot overhang worksurface support bracket by more than 12".
- Perpendicular worksurfaces require two worksurface support brackets no more than 6" from each edge.
- Quantity of brackets required varies by shape and size of worksurface – see chart and images to left.
- At least two brackets are required per worksurface. Support storage may replace one bracket on worksurfaces requiring three or more.

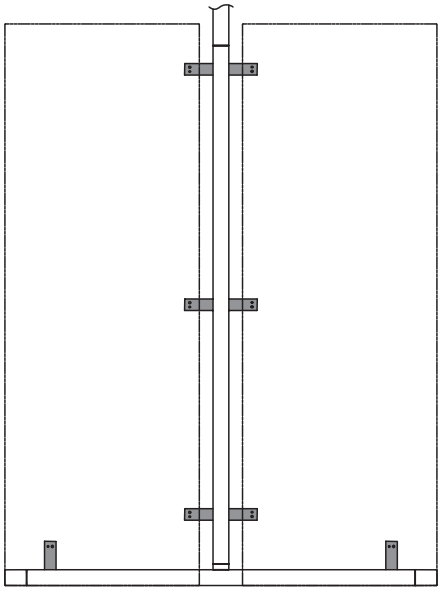


Rectangular with System Legs



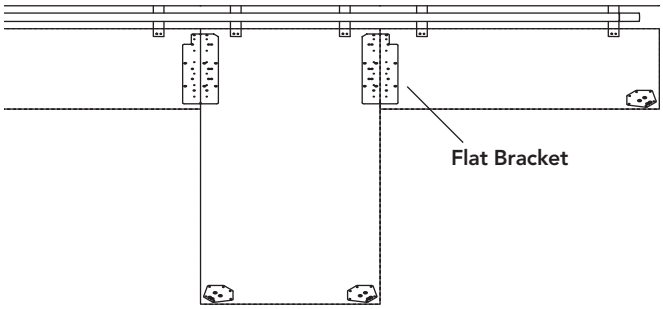
Trapezoid w/Runoff or 120°





Rectangular with Bench End

FURTHER



A Flat Bracket is required between the two surfaces when one worksurface is parallel to the beam and another is perpendicular.

Reference Page

Flat Bracket (page 53)

- Used to tether two worksurfaces together when floor support is not necessary.
- Required when one worksurface is parallel to the beam and another is perpendicular.
- Required between Trapezoid worksurfaces and runoffs.
- 12" bracket used for 15" and 18" deep runoff surfaces.
- 24" bracket used for 21" and 24" deep worksurfaces.
- 30" bracket used for 27" worksurface.

For specification information see pages 25-41.

S ***Shippable by small-package carrier.***

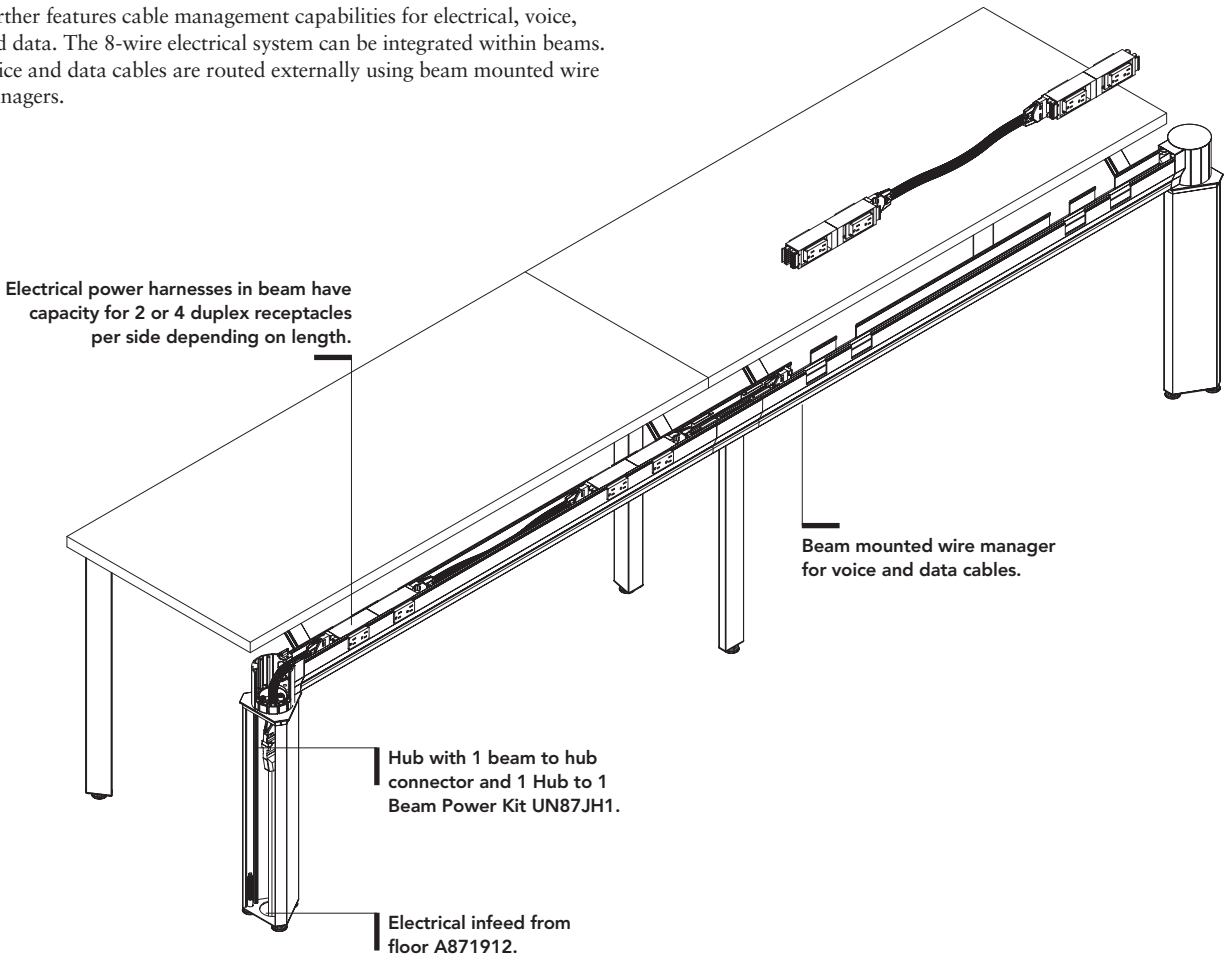
Further features cable management capabilities for electrical, voice, and data. The 8-wire electrical system can be integrated within beams. Voice and data cables are routed externally using beam mounted wire managers.

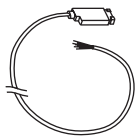


Further Electrical Systems

The electrical system for Further offers two options: 3+1 or 2+2. Both systems utilize an 8-wire, four-circuit electrical system, rated at 20 amps (15 amps Canadian). Connect a maximum of 13 receptacles (12 in Canada, and fewer in certain U.S. locales) to one circuit. Consult your electrician to ensure the planned electrical load is within permissible limits. Follow the steps below to help specify your Further electrical.

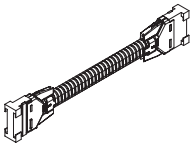
1. **Infeeds** — Determine the location, quantity, and type of power infeeds needed.
2. **Hub-to-Beam Power Kits** — Specify a Hub-to-Beam Power Kit with each Infeed. Order Kit based on the number of beams being powered at the infeed location. Ex: A Flexible Hub in the center of a 120° Pinwheel needs a Hub-to-3 Beam Power Kit. These kits connect to Beam Power Kits.
3. **Beam Power Kits & Jumpers** — Specify a Beam Power Kit for each ported beam. Power kits are determined by the size of beam ordered and are connected to one another with beam-to-beam jumpers - order separately.
4. **Duplex Receptacles** — Determine which electrical system will be used after consulting an electrician: 2+2 or 3+1. System is determined by which circuits are used. Specify circuit specific receptacles to fill all port locations where electrical is needed. Number of ports is determined by the beams and beam power kits specified. Port covers must be placed in port locations where duplex receptacles are not specified.

Reference Page

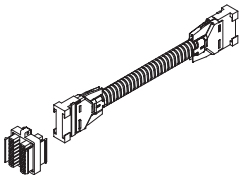


A871912

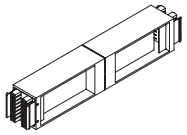
Electrical Infeed (page 68)
- Used to route power from a floor, wall, or ceiling core into the Further beam structure.
- Two infeeds can be routed into any hub, power pole, or H-leg. One infeed can be routed into the square leg bench end or wall mount.
- Available as sealtight cable in 12', or as flex cable in 12' or 18' lengths.
- Infeed cables cannot connect directly to beam power kits. Require a hub-to-beam power kit for all infeed locations.
- Consult your electrician to ensure the planned electrical load and cabling is within permissible national and local code limits.
- Infeed ordered separately for all hardwired applications. (see page 68)



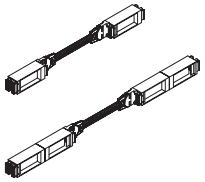
Beam-to-Beam Jumper (page 69)
- Used to pass power from one beam to another over beam support.
- Quantity varies on the number of beams being passed to. See illustration.
- Beam-to-beam jumpers do not need to be ordered for locations where hub-to-beam power kits are specified.



Hub-to-Beam Power Kits (page 69)
- Used to connect power from infeed cable to beam power kits.
- Order power kits based on the number of beams being connected to each infeed cable. If two infeed cables are entering the system in the same location, two hub-to-beam power kits should be ordered.
- Power can be routed into 1-4 beams from one infeed.



Ported Hub Power Kit (page 69)
- Installed within the ported flexible hub and delivers power to user.
- Requires two duplex receptacles – ordered separately.
- Can be used in conjunction with all hub-to-beam power kits.
- Must order an additional beam-to-beam jumper when placed in a location without an infeed cable.

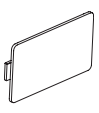


Beam Power Kits (page 69)
- Beam power kits are installed within the ported beam and deliver power to the user.
- Kits correlate to specific ported beam lengths; only one kit per beam.
- Quantity of duplex receptacles that can be used varies by length of beam specified. 36" and 42" ported beams have 2 ports on each side (4 total), 48"- 96" ported beams have 4 ports on each side (8 total). – duplex receptacles ordered separately.

Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Carob — P52	Black — E4
Champagne Metallic — PR5	Muslin — EU
Cinder — P7Q	Brownstone — BW
Designer White — PJW	Designer White — DW
Fossil — P28	Flint — E9
Gunmetal Metallic— PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Pebble — P8R	Loft — EV
Pewter — P8D	Flint — E9
Platinum Metallic — PR2	Silver — ES
Salt — P8C	Silver — ES
Titanium — P8T	Silver — ES

Duplex Receptacles (page 69)
- Receptacles snap into power blocks of power kits.
- Quantity depends on the length of beams specified.
- Four circuits available.
- Circuit 3 must be specified as a utility (3+1) or isolated (2+2) circuit depending on the electrical system desired.
- Available in 8 colors and labeled with circuit number on receptacle face.
- May be replaced with electrical port covers in locations where power is not desired – ordered separately.



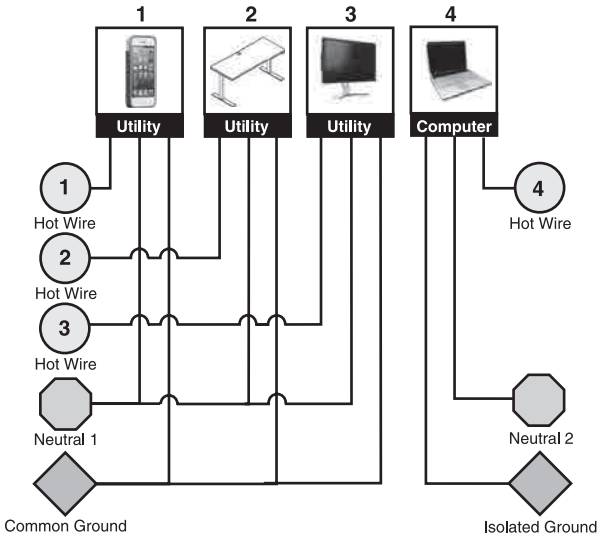
Electrical Port Cover (page 69)
- Fits into Further beam port locations in place of duplex receptacles.
- Does not fit into port sizes of other product lines.
- Requires electrical mounting kit UN8EBKCH.
- Chicago Code models available for hardwired applications.

Flexconnect™ Electrical System Options

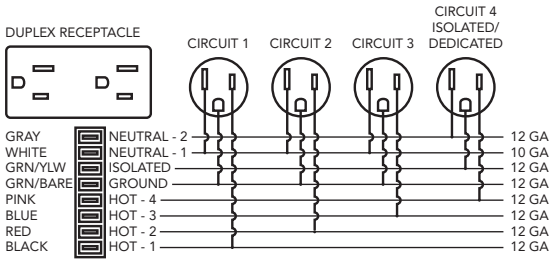
The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

Reference the Office Equipment Typical Load Values on page 58.

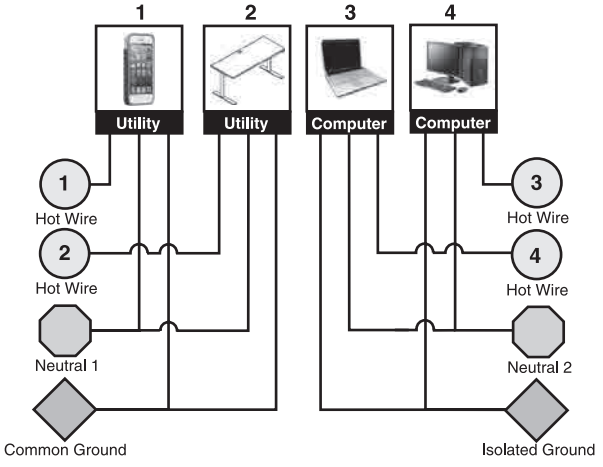
Four-circuit, 3 + 1 Receptacle Option



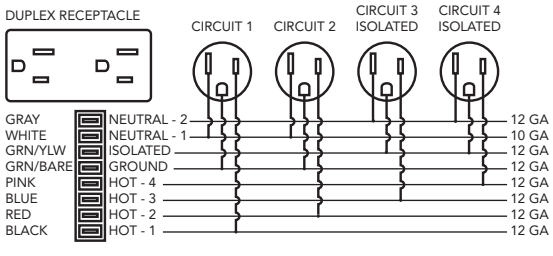
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



Four-circuit, 2 + 2 Receptacle Option



The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Office Equipment Typical Load Values

Item	*Amps
Desktop/2 Monitors	4
Laptop Computer	1
Laptop/2 Monitors/Docking Station	3
Paper Shredder	1.22
Radio	0.05
Scanner	3

FURTHER

Examples of Component Usage based on the *Office Equipment Typical Load Values* Chart

Power Option 3+1

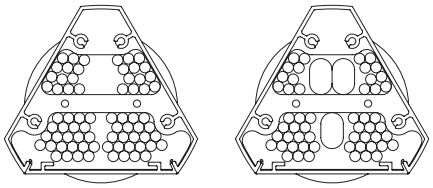
Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers
Utility Circuits 1, 2, 3: Height-adjustable tables and ancillary items

Power Option 2+2

Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers
Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

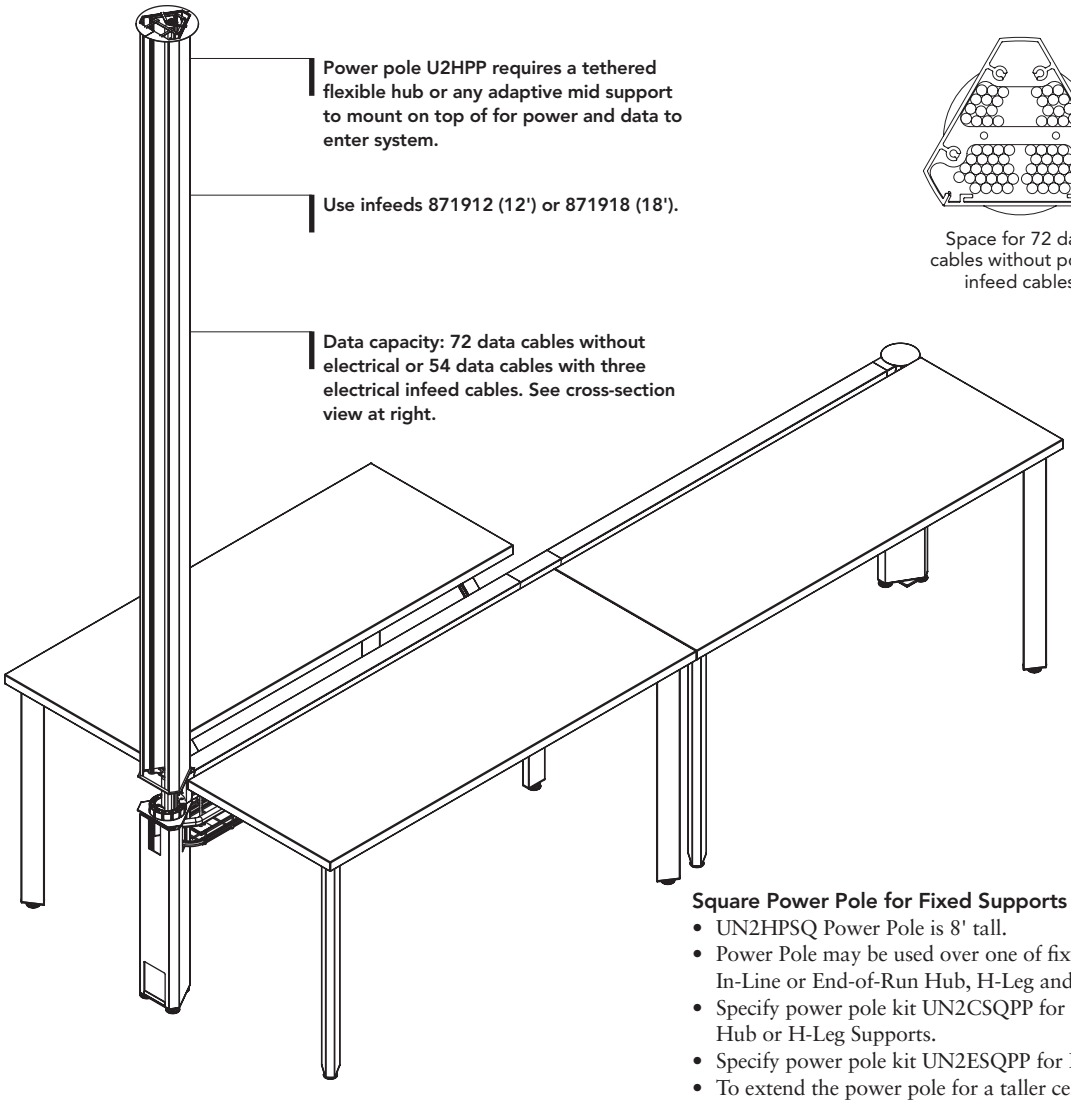
GSA Reference Page

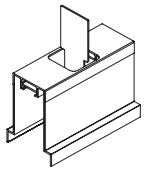
Model U2HPP



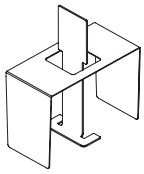
Space for 72 data cables without power infeed cables

Space for 54 data cables with three power infeed cables





UN2CSQPP



UN2ESQPP

Square Power Pole for Fixed Supports (page 68)

- UN2HPSQ Power Pole is 8' tall.
- Power Pole may be used over one of fixed supports: In-Line or End-of-Run Hub, H-Leg and In-Line Leg Supports.
- Specify power pole kit UN2CSQPP for In-Line Leg, In-Line Fixed Hub or H-Leg Supports.
- Specify power pole kit UN2ESQPP for End-of-Run Fixed Hub.
- To extend the power pole for a taller ceiling, order quantity-2 with a splicer kit UN2HPSQSK.

Power Pole (page 68)

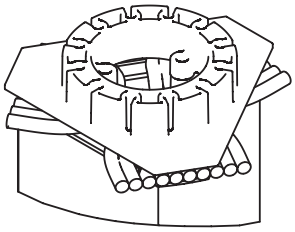
- Used to shroud infeed and data cables that are routed to the beam structure from a ceiling.
- Requires a flexible hub or any adaptive mid support to mount over.
- Cannot be used in freestanding applications.
- Power pole stands 124¼" high with hub glides fully retracted. Extension available through Allsteel Tailored Products.
- Kit includes all necessary mounting hardware and ceiling trim.
- Mounts over 1-4 beams. Aesthetic trim cover included for end condition applications.

Infeed Cover (page 68)

- Shrouds single infeed or up to 24 data cables.
- Specify UN6WC for H-Leg or UN6AWC A-Leg supports.
- Attaches to the legs with VHB tape - included in hardware.
- Not compatible with Chicago or NYC junction boxes. Refer to hubs if needed.

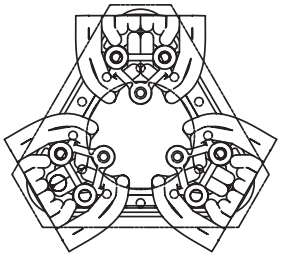
Reference Page

Top Views of Hub

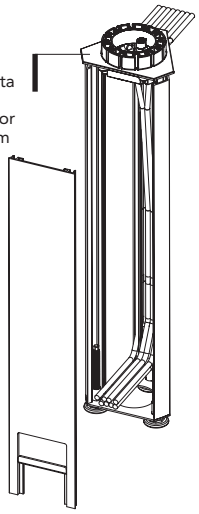


The top of the hub allows for a maximum of 30 (3.45 sq. in.) data cables (.300" dia.) to pass through the ½" gap around the perimeter of the hub

All quantities listed at 60% fill ratio



Cable capacities for routing voice and data cables through hub are provided at left for top, side, and bottom of hub.



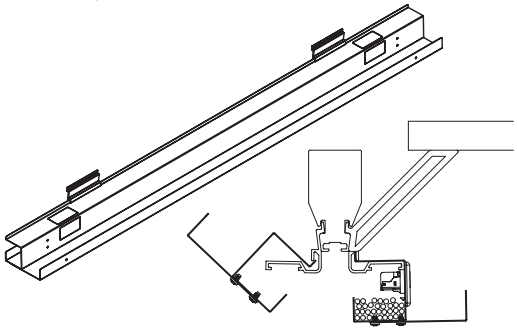
Data (page 70)

- Data is routed internally through any hub, power pole, wall-mount, or infeed cover; but is external to beam.
- Cabling is routed to users through beam-mounted wire managers. See illustrations at left.

Maximum Support Capacities

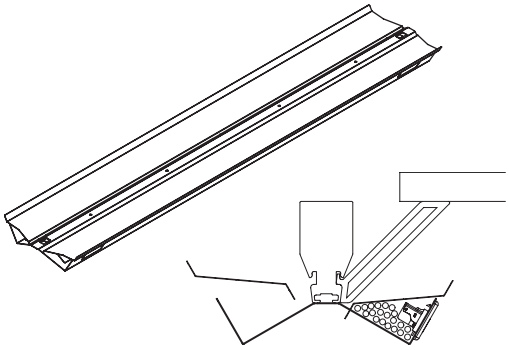
Support	Data*	Infeeds	Beams
Standard Flexible Hub	30	3	4
High Capacity Flexible Hub	84	3	4
Power Pole U2HPP	72	3	4
Power Pole UH2HPSQ	34	2	NA
In-Line Fixed Hub	24	1	2
End of Run Fixed Hub	24	1	1
H-Leg**	NA	2	2
Bench End**	NA	1	1
Infeed Cover	24	1	NA

*Reduce capacity of data cables by 6 for each infeed specified
*Data cable size is based on 0.25-diameter cable.
**Data capacity is determined by wire managers and infeed cover.



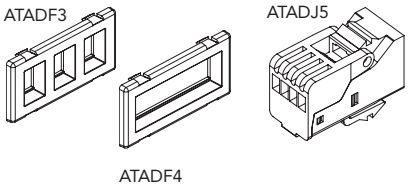
Single-Sided Wire Manager (page 70)

- Can be used with any single-sided, dual-sided, Further Adaptive, freestanding post and beam, and fixed-height applications.
- Holds user wires and up to 30 system data cables on one side of a beam.
- Mounts into the continuous reveal on either side of a beam – mounting clips included.
- Single-sided version is recommended when nesting storage.
- The data manager without the 2½"D tray can be ordered separately to maximize space, or the tray may be removed in the field.
- Available from 36" to 78" widths in 6" increments.
- Includes mounting locations for Cord Management Chain when used with Adaptive supports or freestanding height-adjustable workstations.
- Specify 6" shorter than beam length when used with Adaptive supports.
- Two single-sided wire managers can be used on either side of beam to increase data capacity. (60 total)
- May be used in conjunction with beam mounted modesty screens.
- Includes 4 knockout port locations for data faceplates (2.7"W x 1.375"H) on all widths. Data faceplates ordered separately.



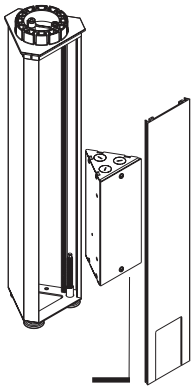
Dual-Sided Wire Manager (page 70)

- Holds user wires and up to 20 system data cables each side of a beam. (40 total)
- Mounts to underside of beam; does not use continuous side reveal.
- Available from 36" to 78" widths in 6" increments.
- Includes 8 knockout port locations for data faceplates on all widths. Data faceplates ordered separately.
- Ideal for use in a fixed-height dual sided application.
- Does not support wire chain.
- Cannot be used in conjunction with beam mounted modesty screens.



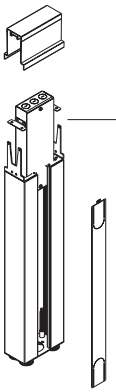
Data Faceplates & Jacks (page 71)

- Faceplates fit into knockout ports on both available wire managers.
- Faceplates do not work in beam electrical ports.
- Faceplate options available to install either 3 or 4 data jacks.
- Faceplates available in one color – black.
- Faceplates and Jacks sold separately.
- CAT 5E and CAT 6 data jacks available.



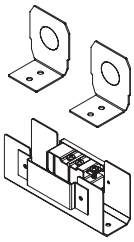
Chicago code junction box **U8IKCH** is compatible with both 28"H and 20½"H flexible hubs. The box is 9⅛"H x 3½"W.

U8IKCH

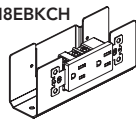


Chicago code junction box **U8SBKCH** is compatible with both 28"H and 20½"H fixed hubs. The box is 11"H x 5.7"W x 2.3"D.

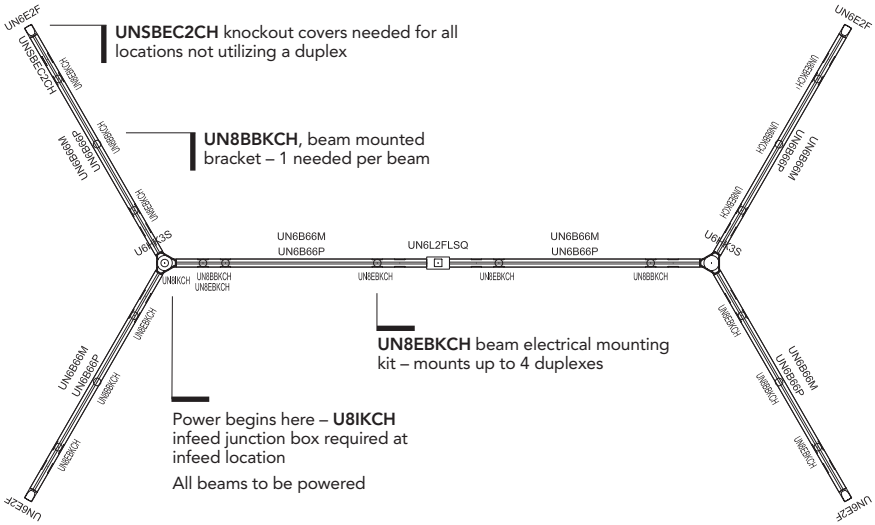
U8SBKCH



UN8BBKCH

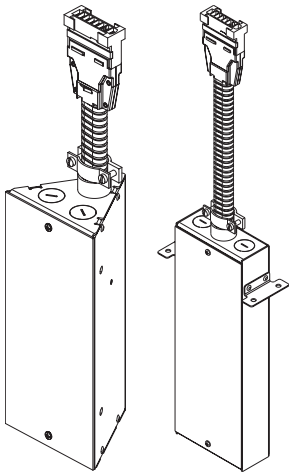


UN8EBKCH



Hardwire – Chicago Code (page 68)

- Mounting rail top trim required for all hardwired powered beams.
- Cannot wire two receptacles back-to-back. Receptacles must be staggered.
- Junction box U8IKCH or U8SBKCH are required for all infeed locations.
- A ⅜" diameter conduit fitting must be used at the knockout locations on the junction box and brackets to fit within enclosures.
- One beam kit UN8BBKCH required per beam. Kit includes two brackets to enclose beam to meet NEC and UL requirements.
- Electrical mounting kit UN8EBKCH is required for mounting duplex receptacles and/or electrical port covers. Kit includes two brackets.
- Electrical port covers can be installed in place of a duplex receptacle on the electrical mounting bracket. Cannot be installed without the electrical mounting kit UN8EBKCH.
- Ported flexible hubs cannot be used in hardwired applications.
- All wiring, conduit, and receptacles to be supplied by electrician.
- Use U8IKCH for flexible hubs and U8SBKCH for fixed hubs.



Hardwire – New York Code (page 68)

- Required for New York electrical.
- For flexible hubs and Further Adaptive, choose one of the 3 configurations:
  – U8IKNY1 for Hub to 1 Beam
  – U8IKNY2 for Hub to 2 Beam
  – U8IKNY3 for Hub to 3 Beam
- For fixed hubs (not for use with Further Adaptive), choose one of the 2 configurations:
  – U8SBKNY1 for Hub to 1 Beam
  – U8SBKNY2 for Hub to 2 Beam
- Ported flexible hubs cannot be used in hardwired applications.
- All wiring and conduit to be supplied by electrician.

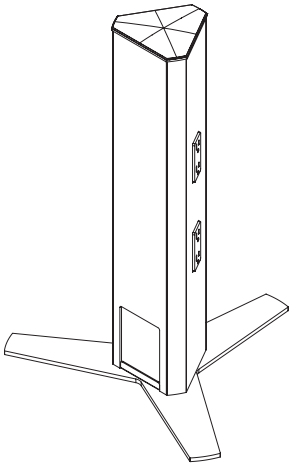
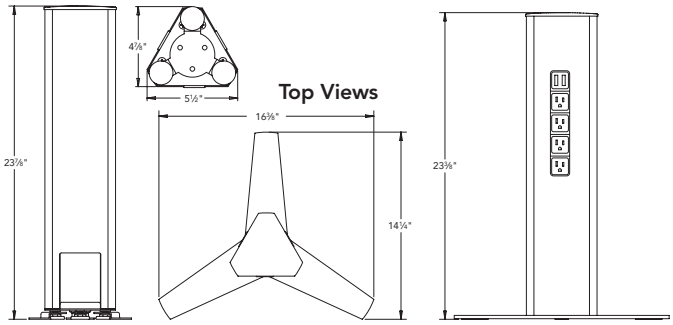
Collaborative Hub

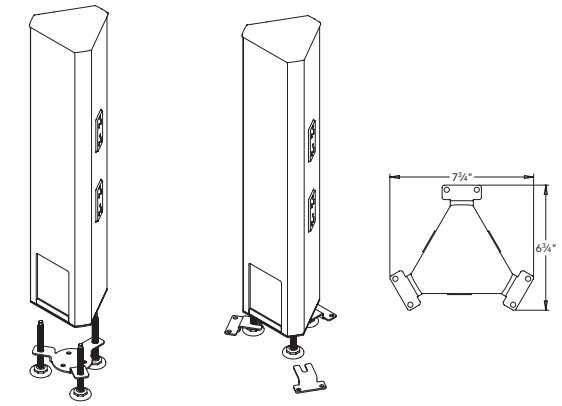
A Collaborative Standalone Hub provides access to power and data in teaming spaces in areas outside of the primary work area.





Hub with U3HAI base

Hub with U6HB3 base



U3HAI Internal

U3HAE External

Collaborative Hub (page 73)
- Provides access to power in teaming spaces outside of the individual workspace.
- Used as a standalone unit, does not support or run power into beams.
- Three feet base kit or floor anchor brackets required – order separately.
- Options available with a standard power cord, whip, or for use with an electrical infeed cable.
- 6' power cord or whip included, infeed cable ordered separate.
- When powered through infeed cable, two duplex receptacles are required – sold separately.

Collaborative Hub Foot Kit (page 73)
- Attaches to the bottom of a Collaborative Hub.
- Nonleveling hub feet kit required for Collaborative Hub if no floor anchors are specified.

Collaborative Hub

For specification information see page 72.

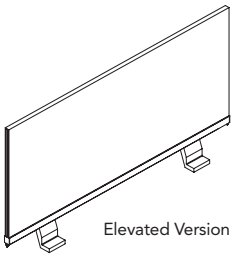
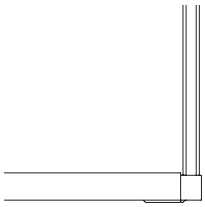
Beam Mounted Screen

Beam Mounted Screens (pages 76 and 78)

- Attach to the top or bottom of a beam, available in 6" increments at 13"H and 20½"H.
- Options available for tackable fabric up to 60"W, and glass up to 96"W.
- Fabric required when mounting screen to the bottom of a beam.
- Mounting top trim required to use screens on the top of a beam.
- May pass over a hub, h-leg, or in-line support without the use of split top trim.
- Beam mounted storage may be used on the same beam as a screen. Subtract the width of the storage unit from the screen.
- Worksurface mounted modesty screens are possible, but will interfere with cord management.
- Beam mounted modesty panels must be specified 6" shorter than beams when with Further Adaptive.



Elevated Version



Flush Mount

Table Mounted Screens (pages 77 and 78)

- Attach to the edge of a worksurface, available in 6" increments at 13" and 20½"H from 30"- 60"W.
- Flush-mounted option available in tackable fabric and glass.
- Glass screens only allowed on 27" deep worksurfaces.
- Elevated option available in fabric only.
- Elevated screens provide 1¼" clearance for routing cords and attachment of monitor arms.
- Flush-mounted screens should be specified 12" shorter than width of worksurface when used between Table legs – see example left.

Reference Page

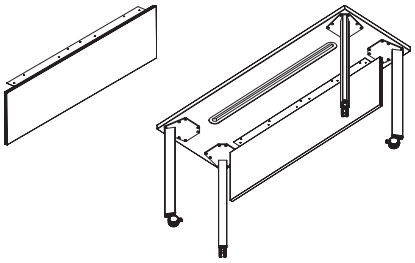


Table Mounted Modesty (page 77)
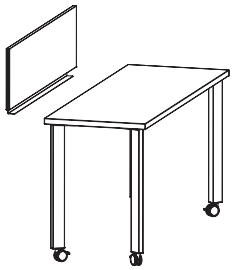
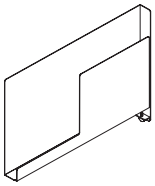
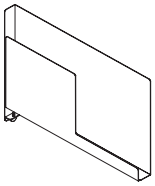
- Attaches to the underside of a worksurface, available in 6" increments at 13"H from 18"- 60"W.
- Specify 13" shorter than width of worksurface when used between Table legs – see example left.
- Must be inset at least 3" from back edge of worksurface if used with table mounted or user movable screens.



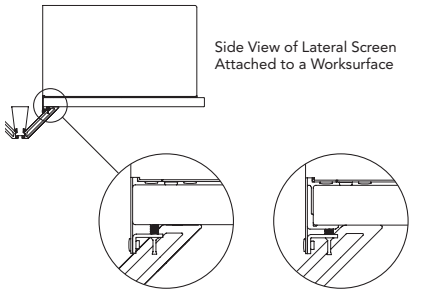
User Movable Screen (page 79)
- Mounts to the edge of a worksurface and may be transferred to other locations with ease. Available in 6" increments at 13"H from 18"- 60"W.
- Specify 12" shorter than worksurface edge when used between Table legs – see example left.
- Cannot be placed on mid support edge of worksurface when used with Further Adaptive.



U6BL1221ML



U6BL1221MR



Side View of Lateral Screen Attached to a Worksurface

Close-up of Attachment — Without Accessories Rail and With Accessories Rail

Lateral Screen (page 79)
- Clamps to back edge of worksurface at 12"H.
- 20" or 26"D models available. Screen is designed to sit back from front edge of worksurface.
- Space for folders is 1½" and holds approximately 340 sheets of paper.
- Folder storage is one-sided – LH and RH options available.
- Cannot be located right above run off support beams on Adaptive worksurfaces.

K6DFI2548L

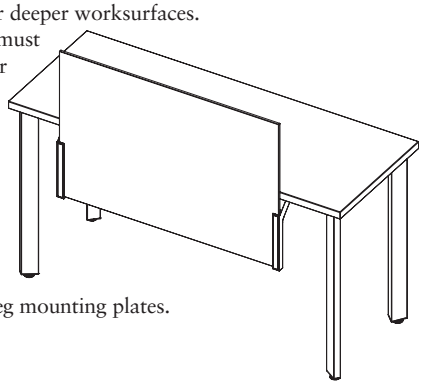
Using Stride® or Involve® Model Screens with Further

Stride Models w/Beam Mounted Surfaces (Stride price list)
- All models — width must be at least 12" narrower than worksurface width to allow for clearance of leg mounting plates.

Involve Models w/Beam Mounted Surfaces (Storage price list)
- Glass models — width must be at least 12" narrower than worksurface width to allow for clearance of leg mounting plates.
- Laminate models — width must be equal to, or less than worksurface width.

Stride Models w/Freestanding Tables (Stride price list)
- Only allowed on 27" or deeper worksurfaces.
- All models — width must be at least 12" narrower than worksurface width to allow for clearance of leg mounting plates.

Involve Models w/Freestanding Tables (Storage price list)
- Only allowed on 27" or deeper worksurfaces.
- Glass models — width must be at least 18" narrower than worksurface width to allow for clearance of leg mounting plates.
- Laminate models — width must be at least 6" narrower than worksurface width to allow for clearance of leg mounting plates.



For specification information see page 74.

Further Adaptive — Metal Screens (page 82)
- Powder coated magnetic metal privacy screen.
- Metal surfaces can be easily disinfected with cleaners. See cleaning guide for more details at AllsteelOffice.com.
- Available in all standard paint colors.
- Provides ½" gap along the back for accessory mount and cord drop.
- Available in 48"W, 54"W, 60"W, 66"W and 72"W.
- 66"W and 72"W screens include 3rd center bracket.
- Available in Straight, L- and U-shape configurations. Above the desk only.
- L- and U-Shape screens are compatible with shrouded Further Adaptive Desk legs.
- Optional tackable accessories specified separately.
- 66"W tackable accessory comes as a set of (2) 24"W.
- 72"W tackable accessory comes as a set of (2) 20"W.
- Available in standard and extended wings.
- Wings mount flush to the edge of the surface with a VHB tape (included in hardware).
- 20"W tackable accessory must only be applied to both standard and extended wings without accessory slots.
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.
- Do not hang more than 5lbs of weight on wings.
- Screens are compatible with Radii undermount storage.
- Not compatible with standard 120-worksrufaces. Contact Allsteel TPG for custom sizes.

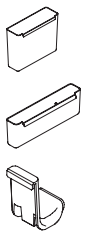
Accessories — Tackboard (page 82)
- Tackable accessories come with metal frame available in standard paint colors and fabric options.
- Attach to the screen using a dual lock tape (included in hardware).



Accessories — Radii (page 82)
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.

Accessories — Further Worksurface Rail Mount (page 141)
- Accessory rail must be field cut to fit between the screen brackets.
- The following accessories are not compatible with screens: U9WTC and U9TM.

For specification information see pages 80-81.

All Storage

- All storage is made from ¾" thick with particleboard core with top and bottom surfaces finished in laminate. Horizontal storage sides and back are painted steel.
- Edge band is made of 1mm thick ABS plastic — flat edge trim only.
- Cam and pin construction. Storage is plinth base only unless unit is mobile.
- Available in solid and woodgrain laminates, models with doors or drawers are available with a two-tone option.
- Pull options: arch, square, linear, straight. All standard in PR6 Silver.
- Locks have a silver finish.

Horizontal Storage (pages 88-89)

- Available in open and sliding door models, as single sided or dual sided.
- Top and bottom are laminate, sides and back are painted steel.
- Beam mounting top cap must be used, length must match length of beam.
- Horizontal storage cannot be panel or wall mounted.
- Units cannot be mounted directly on worksurface, requires stanchion kit ordered separately. Kit includes stanchions and installation hardware.
- Laterally mounted storage can overhang worksurface a maximum of 12". Worksurface stanchion is flush to edge of the worksurface when storage is overhanging worksurface, and is 8½" from edge of worksurface when storage is not overhanging worksurface.
- Beam mounted lateral stanchion kit (4-pack) U7HSK2 is used for single standard mounted storage or for dual laterally mounted storage. Kit includes ganging bracket for dual mounted storage units. See illustration and matrix at left.
- Beam mounted stanchion (2-pack) U7HSB2 is used for mounting a laminate shelf to beam. See illustrations and matrix on page 85.

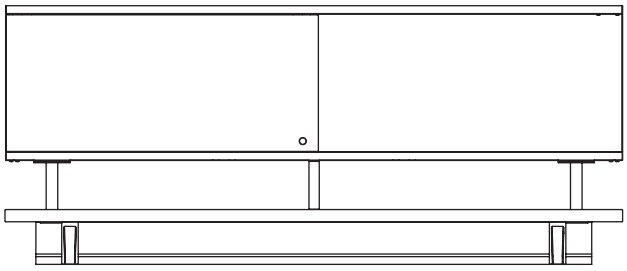
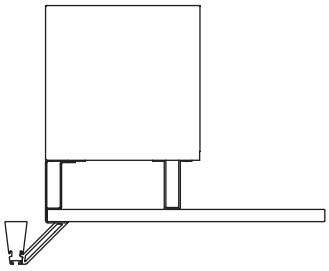
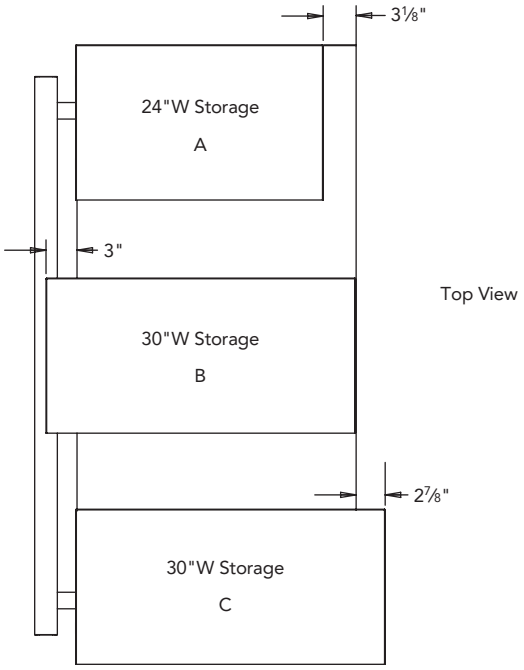
Mounting Horizontal Storage with Surface Mounted Worksurface Storage Stanchion Kit U7HSK1



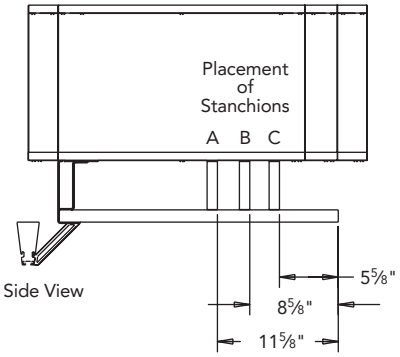
Front View



Side View



Top View



Side View

Worksurface Storage Stanchion Kit — U7HSK1 (page 88)

- Allows for use with beam mounted screens in conjunction with horizontal storage.
- Works with single sided applications such as aisle ways or up against a wall.
- Back stanchions mount to underside of worksurface — no pilot holes on surface.
- Back stanchions are made of 10 gauge steel.
- Front stanchion rests on worksurface top.
- Front stanchion is aluminum extrusion.
- Storage unit can be mounted such that back of unit is flush with back edge of worksurface or such that back of unit is centered on beam.
- When locating flush to back edge of worksurface uses pilot holes on bottom of horizontal storage to locate stanchions for proper support; no pilot holes for when mounting on beam centerline.
- Extending storage unit beyond beam centerline is not recommended — should be using standard beam mounted stanchion kit U7HSK2.
- Can be used to mount horizontal storage either parallel with beam or perpendicular to beam.
- Can be used with 7½"H or 15"H storage
  - 7½"H aligns to 13½"H Further/Stride screens/42½"H towers
  - 15"H aligns to Further/Stride 20"H screens/50"H towers
- Recommended for use only on tethered set ups.

Reference Page

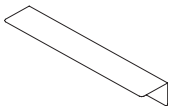
Open Support Pedestals (page 90)
- Constructed of laminate, shelves are painted steel.
- Open Support Pedestals may be used to add additional stability — see Further Stability Requirements on page 40.
- Support pedestals may be used to create freestanding desks, storage depth must match worksurface depth.
- 27"D models have a coat/bag hook located in back of unit.

Pull-Out Drawer Support Pedestal (page 90)
- Case is constructed of laminate and painted steel.
- Box and file drawers are miter fold, ½" thick particle board, polypropylene wrapped.
- Configuration is box/box/file and one shelf at top of unit.
- Shelf is not adjustable but can be removed.
- All drawers hidden behind single laminate front.
- Straight , linear, arch and square pulls available as options.
- 1⅝" leveling.
- Cannot be used as a freestanding, standalone unit.
- Outside overall dimensions: 15⅝"W and 21" or 27"D
- Box drawers extend 16" for both model depths.
- File drawers extend 16" on 21"D models and 20" on 27"D models.
- Front to back filing, standard letter size
- One lock, located in upper right hand corner of drawer front.
- Two-tone laminate option for drawer fronts
- Can be used to make a freestanding desk.

Mobile Credenza (page 90)
- Constructed of laminate, shelf is painted steel.
- Mobile credenza has a hinged door with lock, no pull.
- Front casters are locking, back casters are non-locking.

Side Access Towers (page 91)
- Top and sides are laminate, shelves are painted steel.
- Side Access Towers may be used to add additional stability — see Further Stability Requirements on page 40.
- 12" wide towers must be attached to a worksurface.
- Z6LB tower “L” bracket required when supporting a worksurface with a tower — storage depth must match worksurface depth.
- Tower drawers do not extend fully — 27"D towers have a 25"D drawer with 20" travel slides; 21"D towers have a 19"D drawer with 16" travel slides.
- 27"D models have a coat/bag hook located in back of drawer.

“L” Tower Bracket (page 91)
- Z6LB tower “L” bracket required when supporting a worksurface with a tower.
- Storage depth must match worksurface depth.



For specification information see pages 84-87.

Shaded surfaces — sides, back, and nitch septum are metal.

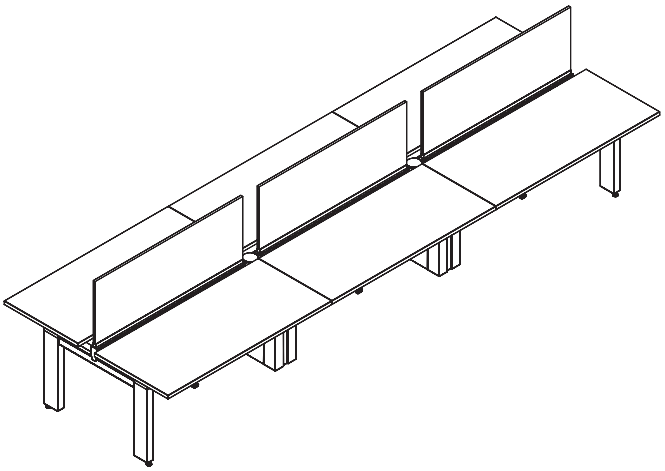
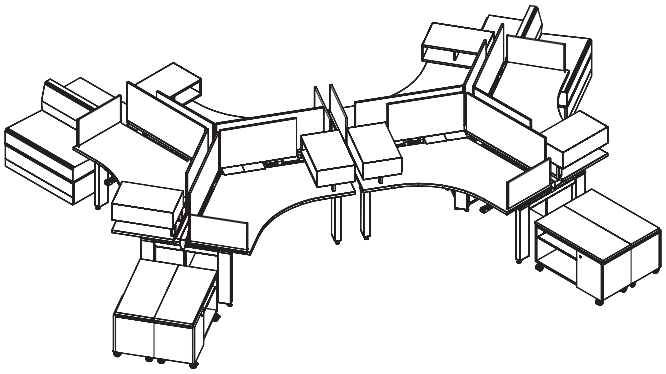
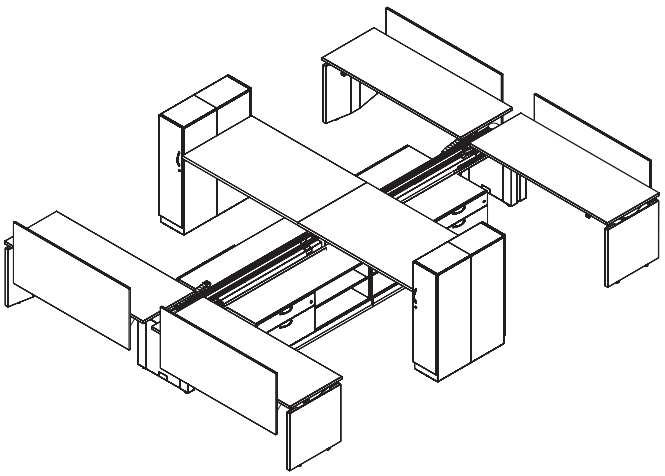
A full gallery of typicals from each Allsteel system can be found on our website:
https://www.allsteeloffice.com/design-resources/idea-starters.
Each typical includes a complete BOM with current pricing, downloadable CAD files and PDFs of each drawing.



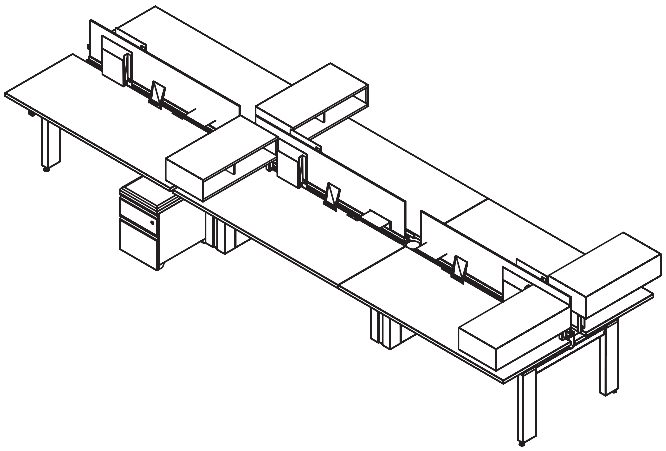
Further Height-Adjustable Bench 2'-6" x 5'
All 4 stations are height-adjustable.
Bench configuration encourages collaboration.



Further Height-Adjustable 120° 5'-2" x 9'-3"
6 stations are height-adjustable. Storage and screens provide privacy.



Further Height-Adjustable Bench w/Towers 7' x 5'-6"
All 4 stations are height-adjustable.
Wardrobe and credenzas provide personal storage.



Further Mixed Bench 5'-6" x 5'-6"
2 stations are height-adjustable and 4 are fixed height.
Mobile peds with seat cushions provide guest seating.

NOTE: Further Typicals can be found at https://www.allsteeloffice.com/design-resources/idea-starters.

Reference Page

Further Adaptive configurations use many of the standard Further components to create height-adjustable workstations. This Further Adaptive section contains just 40 models. For a complete Statement of Line of Further components see pages 23-24.

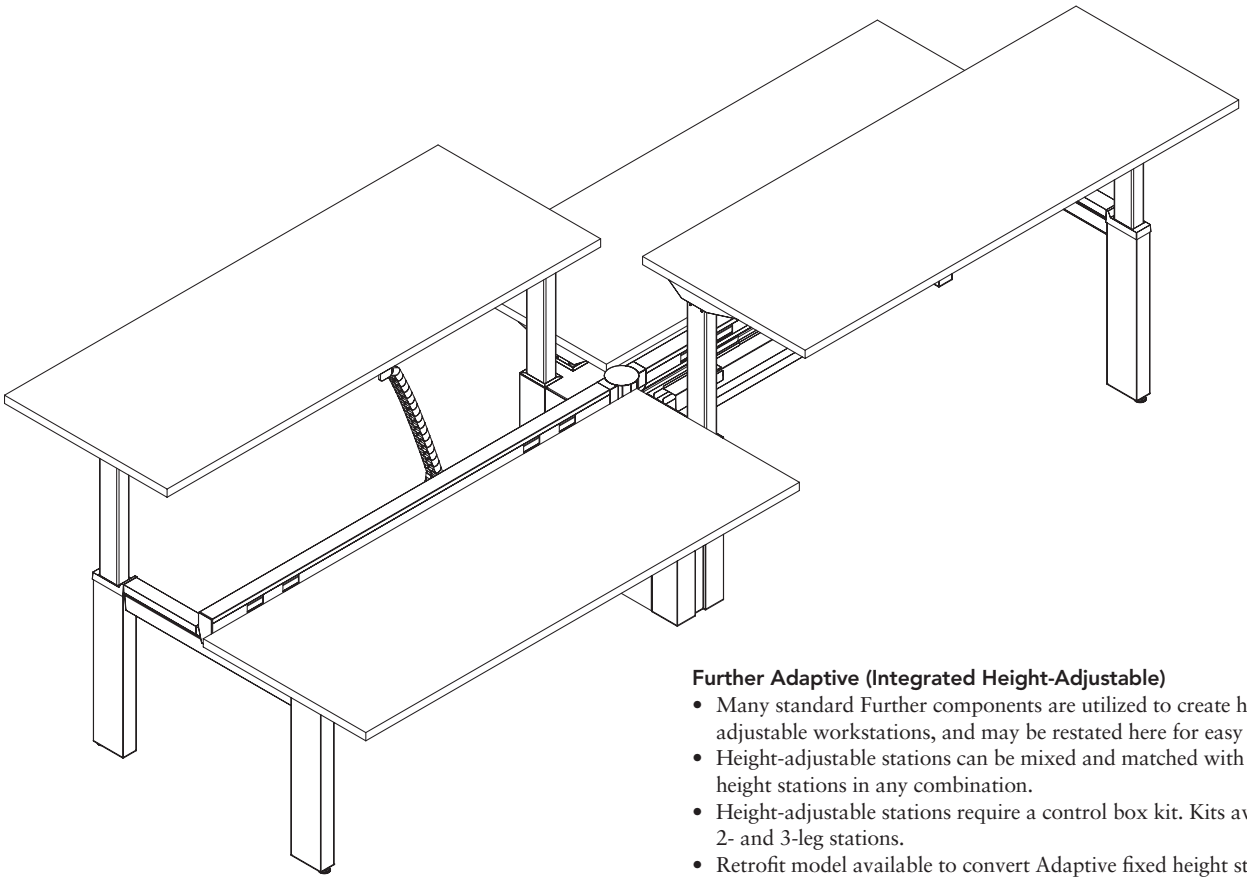
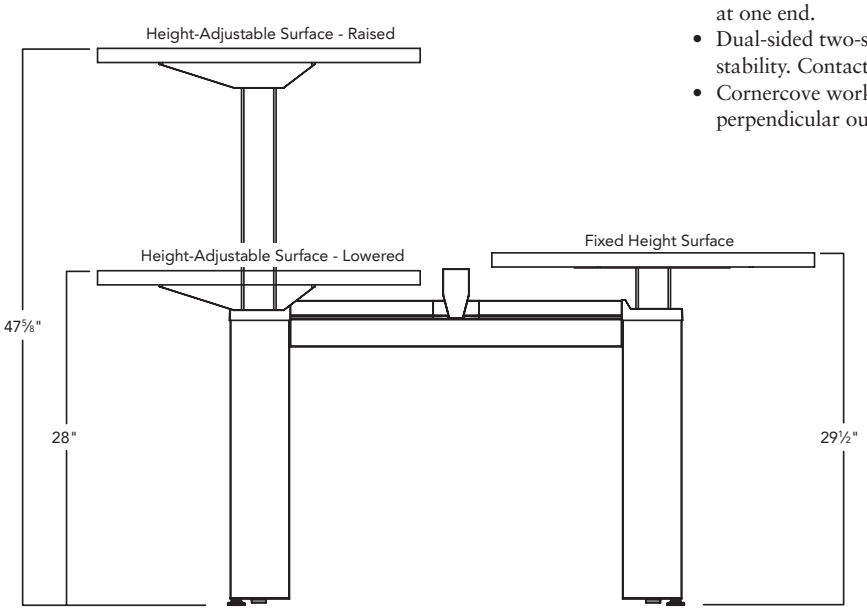
FURTHER

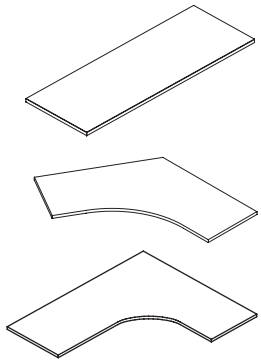


Further Adaptive (Integrated Height-Adjustable)

- Many standard Further components are utilized to create height-adjustable workstations, and may be restated here for easy reference.
- Height-adjustable stations can be mixed and matched with fixed height stations in any combination.
- Height-adjustable stations require a control box kit. Kits available for 2- and 3-leg stations.
- Retrofit model available to convert Adaptive fixed height stations to height-adjustable.
- Models available for retrofitting, see table on page 112.
- Mid-supports are required.
- A maximum of two mid-supports in a row may be used.
- Two end supports may be used in succession to extend 6-pack – requires 9" in-line beam connector.
- Single-sided setups require gallery panels to be mounted along spine of beam, or floor anchor brackets on all beam supports.
- Minimum of two single-sided stations allowed.
- Single-sided gallery panels must match the length of worksurfaces specified. Minimum height of the Gallery Panel must be 42"H.
- Adding power to a dual-sided two station application requires a hub at one end.
- Dual-sided two-station requires leg infill on each end support for stability. Contact Allsteel Tailored Products Group.
- Cornercove worksurfaces require a 3-leg control box kit and perpendicular outer support.

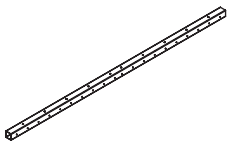


Reference Page



Worksurfaces (page 102)

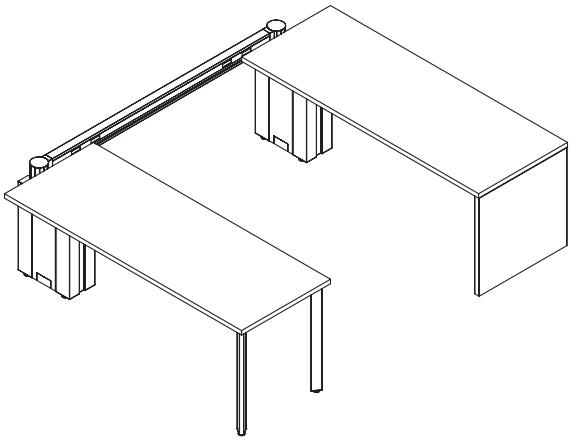
- Standard 48"-72"W Further worksurfaces are used for height-adjustable workstations.
- 21"D worksurfaces cannot be used.
- Trapezoid worksurfaces cannot be used.
- A 1" gap exists between surfaces to eliminate pinch points.
- Worksurfaces cannot overhang supports on ends by more than 12".
- Distance from floor to top of height-adjustable worksurfaces ranges from 28" to 47⅝" with glides fully retracted. See illustration left.
- Distance from floor to top of worksurface for fixed height remains at 29½" with glides fully retracted. See illustrations below.
- Load maximum: 300 lbs. including weight of worksurface.



External Worksurface Support Channel (page 102)

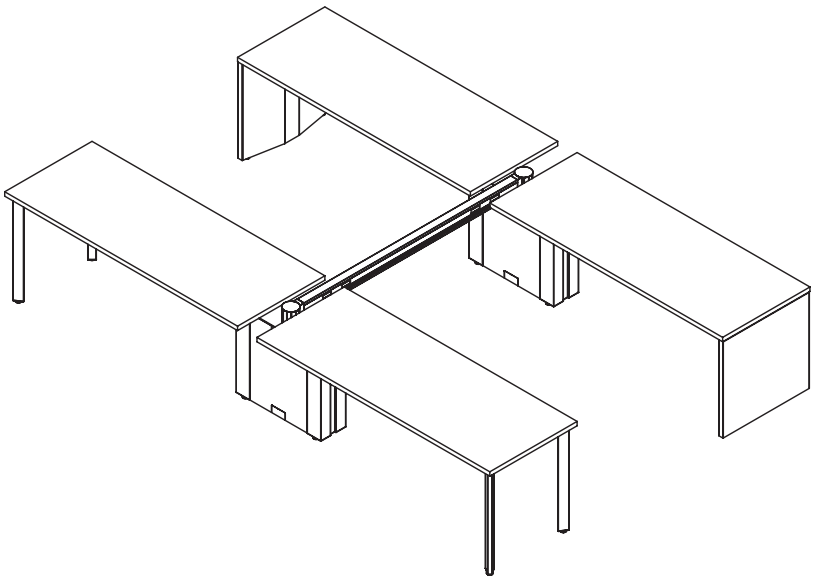
- External stiffeners to be used on 60"W worksurfaces and greater.
- Specify stiffener 12" shorter than standard. (ex. 60"W worksurface uses stiffener Z5SC48)
- Extends 1½" below the worksurface. Stiffener is 6¼" from back edge of the worksurface.
- May interfere with storage or mounting of accessories.

Adaptive Perpendicular — Height-Adjustable

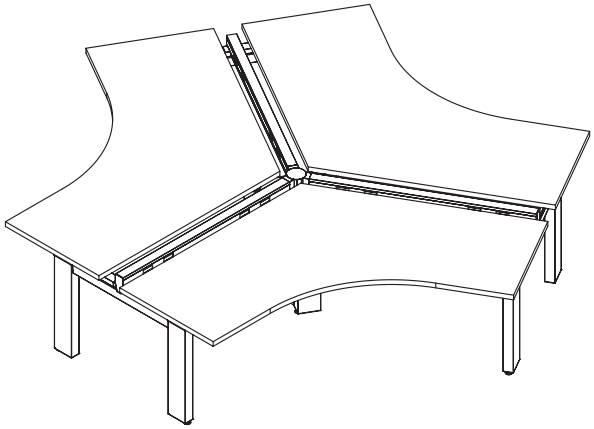


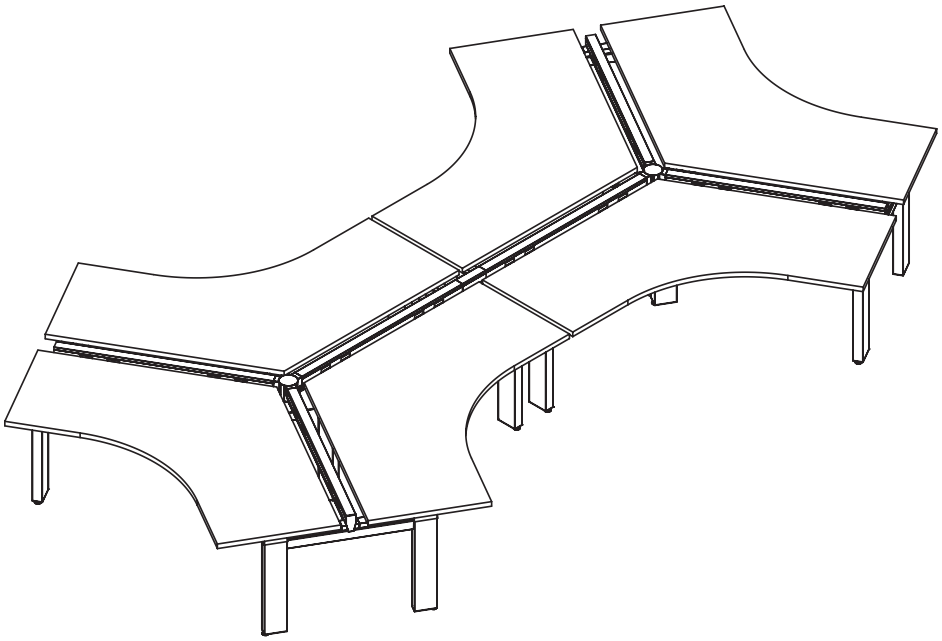
Adaptive Perpendicular Workstations

- No restriction on number of perpendicular mid supports used in a row.
- Worksurfaces are centered over perpendicular mid supports, but may be mounted up to 4⅛" forward from mid support to reduce footprint.
- Minimum of 4 stations for dual-sided applications, 2 stations for single-sided applications.
- Perpendicular mid support does not complete height-adjustable station – must order perpendicular outer support.
- Fixed height stations require two worksurface support legs on non-beam side in place of a perpendicular outer support.
- A minimum beam length of 30" must be used between perpendicular mid supports for 27"D surfaces, and a minimum length of 24" for 24"D surfaces.
- Trapezoid worksurfaces not allowed.



Adaptive Organic — Height-Adjustable

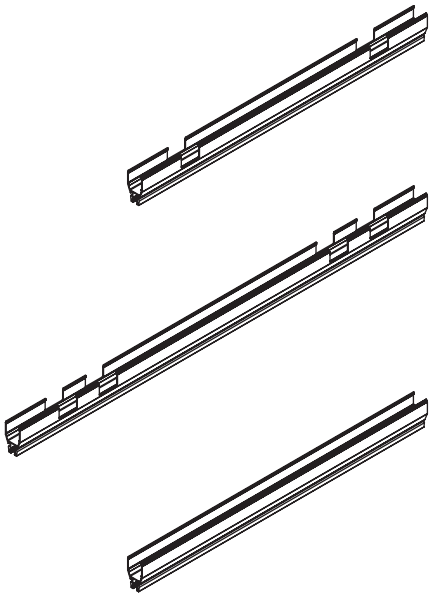




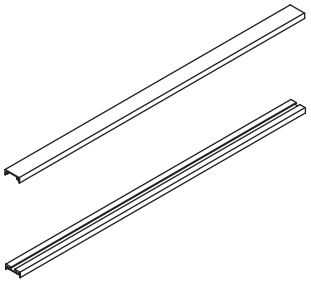
Adaptive 120° Workstations

- Requires a 120° mid support at all 3-way beam connections.
- End supports required on beams also connected to a 120° mid support.
- 7" in-line connector required to attach multiple 120° workstations.
- Single-sided end supports not allowed.
- Trapezoid worksurfaces not allowed.

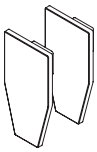
Reference Page



Beams (page 49)
- Supply power to users and support screens, but do not support worksurfaces or storage in adaptive applications.
- Ported and non-ported options available in 6" increments.
- Flat or mounting top trim required to finish off beams – order separately.
- Beams do not connect directly in-line with one another, use in conjunction with adaptive supports.
- Height of assembled beam with top trim is 4¼".
- Electrical port locations are back-to-back, symmetric about beam center, and a standard distance away from beam ends on all lengths.
- 36" and 42" ported beams have 2 receptacle locations on each side (4 total), 48"-96" ported beams have 4 on each side (8 total).
- Ported beams do not carry data cables internally. Routed externally through beam mounted wire-managers. See page 60.

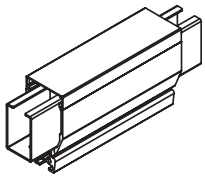


Beam Top Trim (page 50)
- Available in 6"-96" lengths in flat or mounting rail and is required to finish off a beam. Must match beam length, no exceptions.
- Mounting top trim contains a reveal for mounting screens.
- Mounting top trim must be used for projects specified under Chicago electrical Codes.



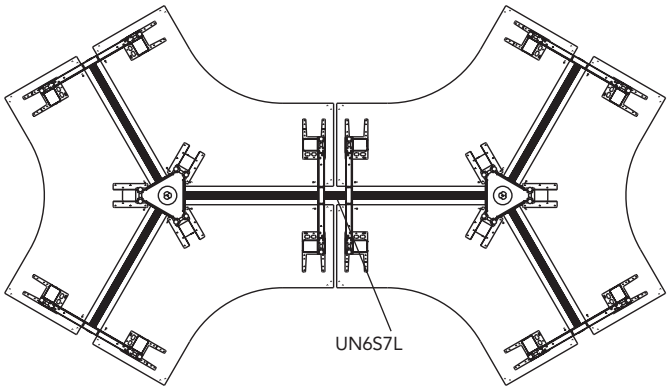
Beam End Cap (page 104)
- Caps off a beam at the end of a parent run.
- Used in conjunction with adaptive end support.
- Model ships with 2 end caps.

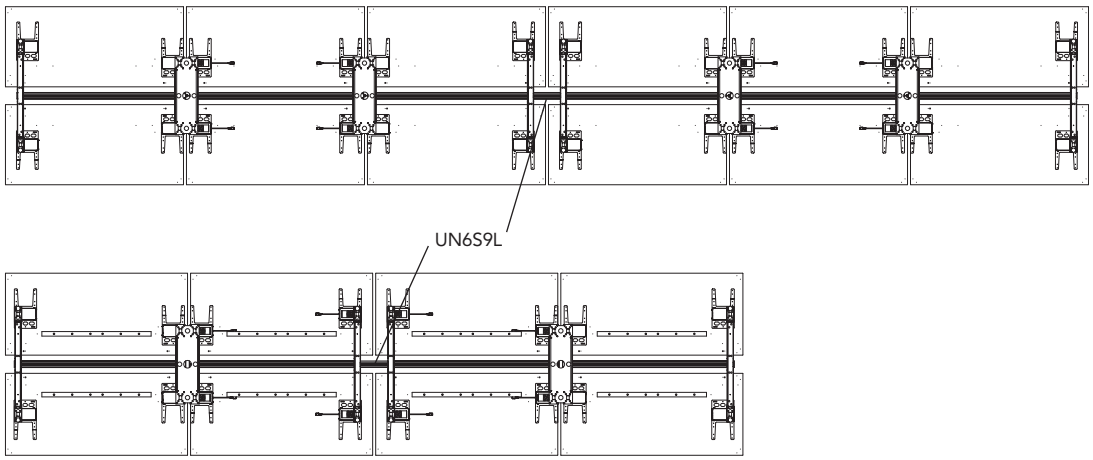
Reference Page



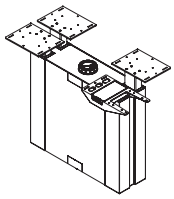
In-Line Beam Connector (page 104)

- Connects two end supports used in succession to extend a parent run.
- 7" connector used between 120° workstations, 9" connector used in linear benching applications.
- When routing power through an in-line beam connector, special length beam-to-beam jumpers are required; 7" – 17"(UN87J17), 9" – 19" (UN87J19).
- Needed every third beam for larger linear parent runs. Can be used after two beams in an 8-station typical to keep symmetry (gap will be 1"). *See examples at left and below.* For 120° applications use 7" beam length.
- Includes Flat trim; may be used to span a screen over the trim.





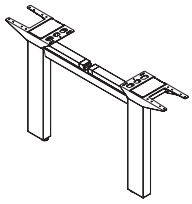
Reference Page



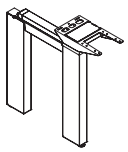
U6MSD1HA3F

All Adaptive Supports (pages 103-104)

- Used in place of standard Further beam and worksurface supports.
- Fixed height and height-adjustable columns are interchangeable and included with supports. Order supports based on the configuration of columns needed.
- Left- and right-hand worksurface gussets included with height-adjustable models.
- Specify a mid support to beam connector when specifying the Adaptive mid supports.
- Height-adjustable columns available in black, silver, or white.
- Load maximum: 300 lbs. per surface, including weight of worksurface.
- Include leveling glides with 2¾" adjustment.



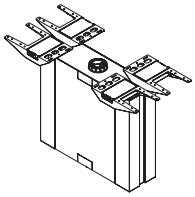
UN6E24D2HA



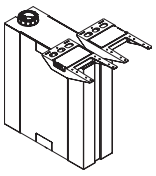
U6E24SS1F

End Supports (page 104)

- Supports a beam and worksurface(s) at the end of a run. Cannot be used throughout the run.
- Available in dual- and single-sided models.
- 24" and 27" deep models to be used with corresponding worksurfaces.
- Two end supports may be used in succession to extend parent run. This application requires an in-line beam connector – ordered separately.



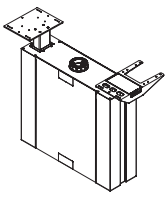
U6MSD4HA



U6MSDL2HA

Mid Supports (page 103)

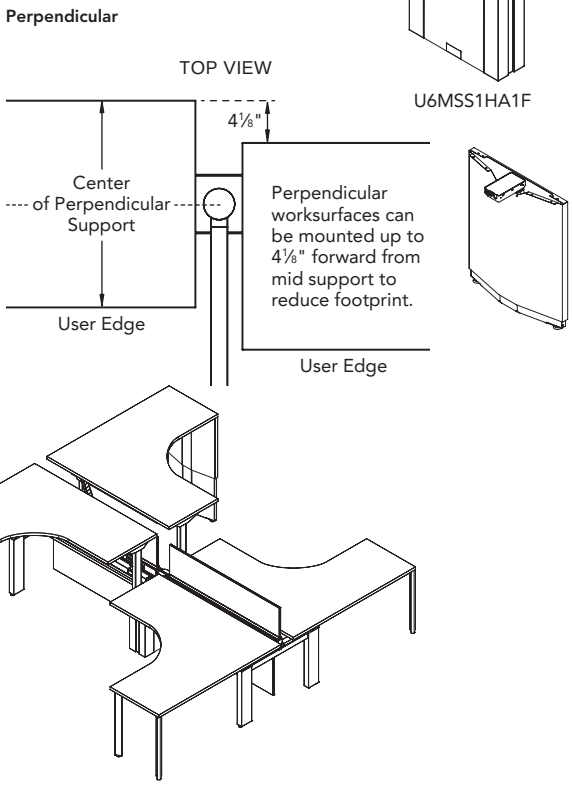
- Supports a beam and worksurface(s) in the middle of a run.
- Available in dual- and single-sided models.
- Same model used for both 24" and 27" deep worksurfaces.
- Hub to two beam connector kit UN3CHB2 required.
- Carries power and data to the beam structure; infeed can be routed through the side or bottom of support.



U6MSS1HA1F

Perpendicular Mid Support (page 103)

- Used to support beam side of worksurface in perpendicular applications.
- Available in dual- and single-sided models.
- Same model used for both 24" and 27" deep worksurfaces.
- Hub to one or two beam connector kit required.
- Carries power and data to the beam structure; infeed can be routed through the side or bottom of support.
- Includes appropriate gussets U6MSDG for support.



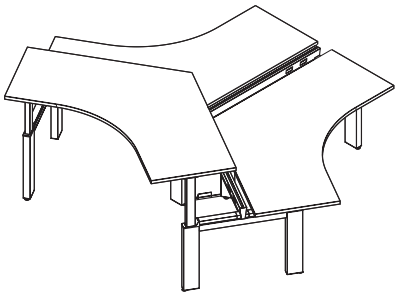
Perpendicular Outer Support (page 104)

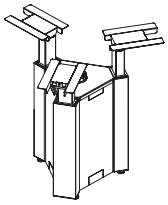
- Used to support non-beam side of worksurface in perpendicular applications.
- Supports only one worksurface (not a shared support). 24"D and 27"D height-adjustable models available.
- In fixed height applications, two worksurface support legs are used – see illustration at upper left.
- When specifying the Perpendicular Outer Supports in a freestanding application, order the U6MSDG gusset model separately.
- U6MSDG model includes LH and RH gussets.

Maximum Support Capacities

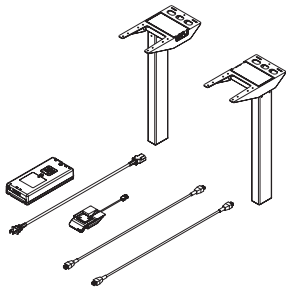
Support	Data*	Infeeds	Beams
Linear Mid Support	88	2	2
Perpendicular Mid Support	88	2	2
120° Mid Support	132	3	3

Reference Page

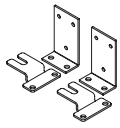




120° Mid Support (page 103)
- Used to support center of 120° worksurfaces in organic applications. Requires three dual-sided end supports – see example left.
- Same model used for 24" and 27" deep worksurfaces.
- Hub to three beam connector kit UN3CHB3 required.
- Carries power and data to the beam structure; infeed can be routed through the side or bottom of support.



Retrofit Kits (page 104)
- Used to convert Adaptive fixed-height stations to height-adjustable.
- One kit will convert two legs to support one worksurface.
- Kit includes two height-adjustable columns, a 2-leg control box kit, and two worksurface gussets (left and right).



Adaptive Floor Anchor Brackets (page 104)
- Used to mount single-sided Adaptive supports to floor if gallery panels are not desired.
- Kit includes brackets for 2 end supports and 2 mid supports.
- Hardware for mounting to floor is not included.

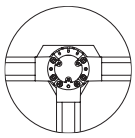
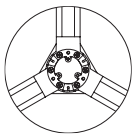
3 Beams to Mid Support — Model UN3CHB3



3-Way 90°



3-Way 120°

Mid Support to Beam Connector Kits (page 103)
- Reconfigurable connector kits used in conjunction with mid support to support beams.
- Ordered by quantity of beams joined to hub — 1, 2, or 3 beams; or connector gap filler and connector blocks can be ordered ala carte to aid in reconfiguration.
- Kits include top casting mounting bracket, top casting, hub to beam connector(s), gap fillers, connector gap fillers, and full top trim.
- Beams can be mounted in 30 degree increments using the same hub and beam connector kit. *Example:* 3 beam connector kit can make a 120 degree or a "T" arrangement. See beam connector kit illustration at left.
- When connector kit is mounted, a gap is created to pass data cords out.

Further™ Adaptive

For Adaptive specification information see pages 92-101.
Models listed below are a subset from pages 92-101 that are used for Adaptive applications.

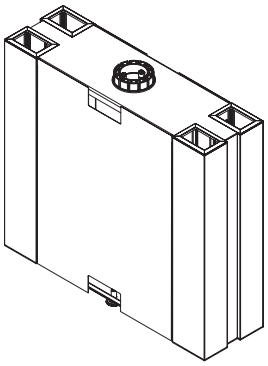
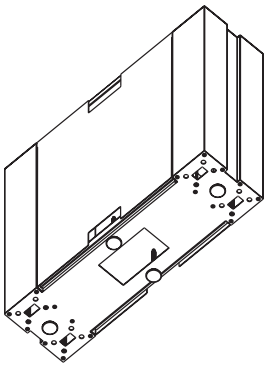
Reference Page

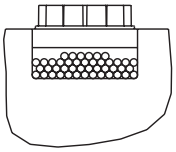




Adaptive Electrical (pages 108-109)

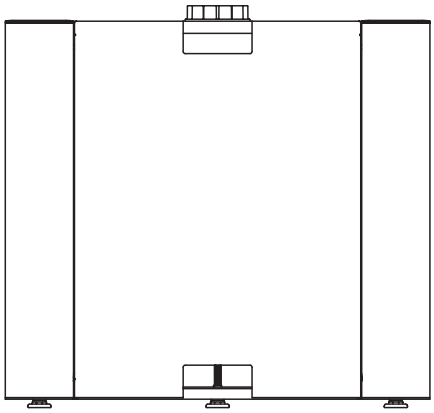
- Most electrical rules and options remain the same for Adaptive applications.
- Power infeeds cannot enter system through end supports.

Application	Beam Size	Bench Connector	Jumper Model
Linear	48-72"	UN6S9L	UN87J19
120°	42"	UN6S7L	UN87J19
120°	48"	UN6S7L	UN87J17



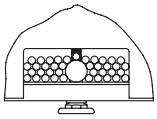
Upper knock-out opening (5.30 sq. in.) on access panel on mid support (both 2 & 4-column, 4-column shown) accepts up to 44 voice/data cables (.300" dia.)

All quantities listed at 60% fill ratio.



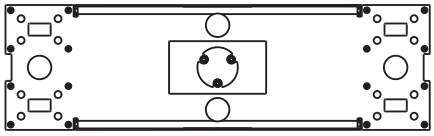
Lower knock-out opening (5.72 sq. in.) on access panel on mid support (both 2 & 4-column, 4-column shown) accepts up to 39 voice/data cables (.300" dia.) when electrical shares opening with one infeed.

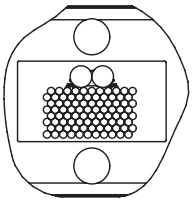
All quantities listed at 60% fill ratio.



Lower knock-out opening (5.72 sq. in.) on access panel on mid support (both 2 & 4-column, 4-column shown) accepts up to 44 voice/data cables (.300" dia.) without power. Maximum of 72 cables in wire management.

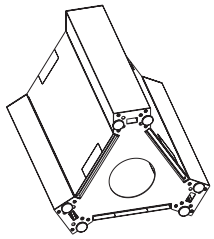
All quantities listed at 60% fill ratio.

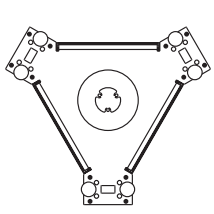


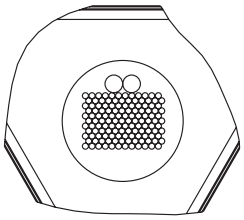


Bottom 6" x 3¼" opening (19.50 sq. in.) of mid support (both 2 & 4-column, 4-column shown) accepts up to 88 voice/data cables (.300" dia.) when electrical shares opening with two infeeds.

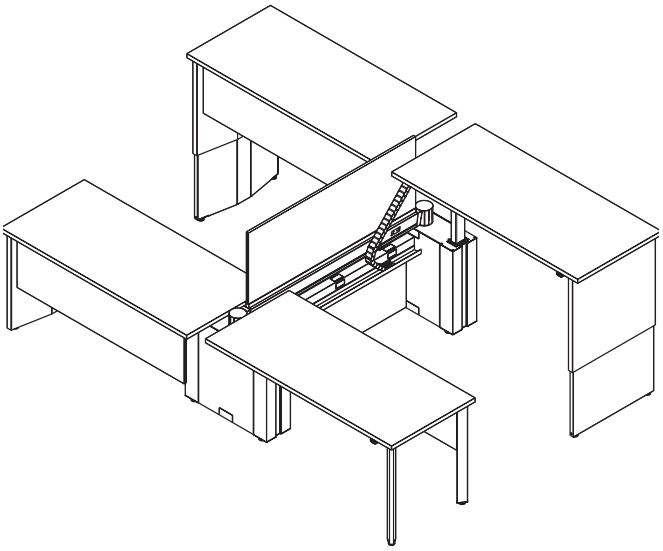
88 cables shown = 44 per access panel upper knock-out.

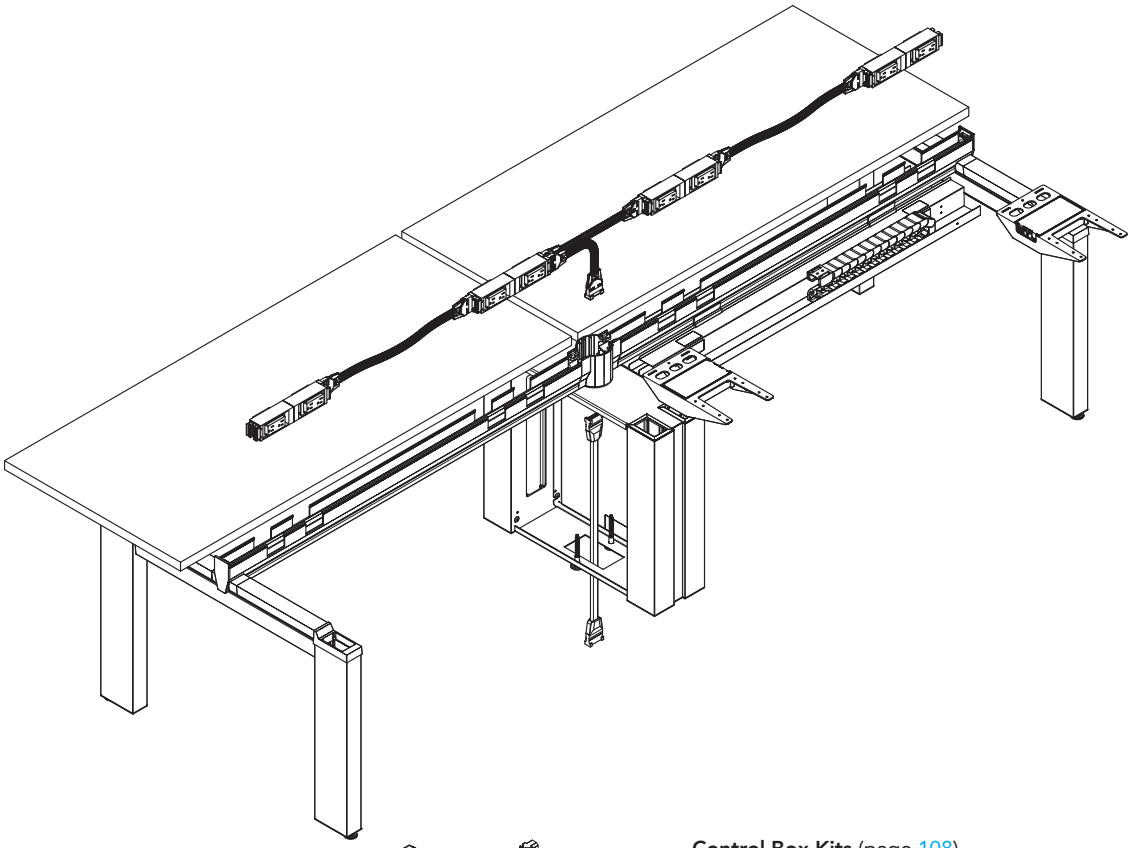


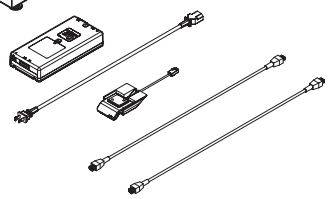




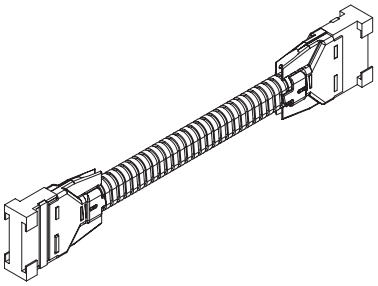
Bottom 6" dia. opening (28.27 sq. in.) of 120 mid support accepts up to 132 voice/data cables (.300" dia.) when electrical shares opening with two infeeds. 132 cables shown = 44 per access panel upper knock-out.



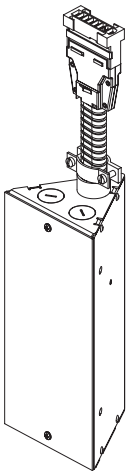




Control Box Kits (page 108)
- Required for every height-adjustable workstation.
- Model includes a standard key pad. Programmable height key pad option available – ordered separately.
- Kits available for 2- or 3-leg stations. 3-leg kits required for 120° and cornercove applications.
- Control box may be mounted to underside of worksurface or lay into hinged trough.

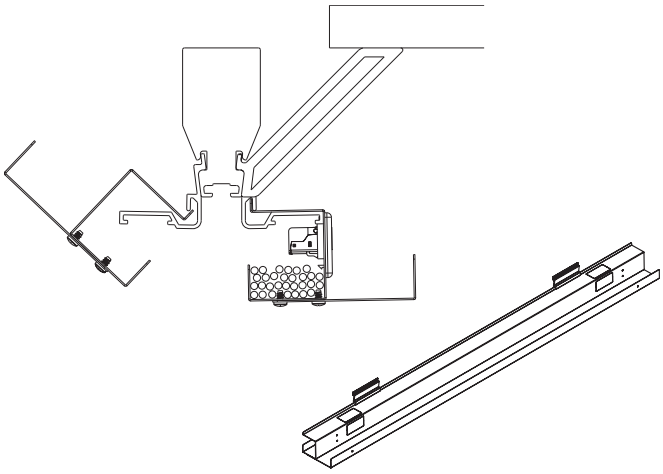


Beam-to-Beam Jumper (page 108)
- Standard 16" jumpers are used over mid supports.
- 17" jumper used over 7" connector.
- 19" jumper used over 9" connector.
- Special length jumpers are required when routing power over two end supports through an in-line beam connector.



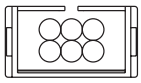
Hardwire – New York Code (page 68)
- Required for New York electrical.
- For flexible hubs and Further Adaptive, choose one of the 3 configurations:
  – U8IKNY1 for Hub to 1 Beam
  – U8IKNY2 for Hub to 2 Beam
  – U8IKNY3 for Hub to 3 Beam

Reference Page

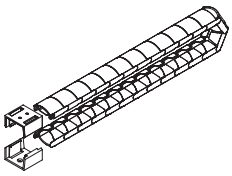


Single-Sided Wire Manager (page 70)

- Can be used with any single-sided, dual-sided, Further Adaptive, freestanding post and beam, and fixed-height applications.
- Holds user wires and up to 30 system data cables on one side of a beam.
- Mounts into the continuous reveal on either side of a beam – mounting clips included.
- Single-sided version is recommended when nesting storage.
- The data manager without the 2½"D tray can be ordered separately to maximize space, or the tray can be removed in the field.
- Available from 36" to 78" widths in 6" increments.
- Includes mounting locations for Cord Management Chain when used with Adaptive supports or freestanding height-adjustable workstations.
- Specify 6" shorter than beam length when used with Adaptive supports.
- Two single-sided wire managers can be used on either side of beam to increase data capacity. (60 total)
- May be used in conjunction with beam mounted modesty screens.
- Includes 4 knockout port locations for data faceplates (2.7"W x 1.375"H) on all widths. Data faceplates ordered separately.

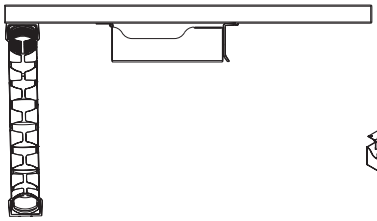


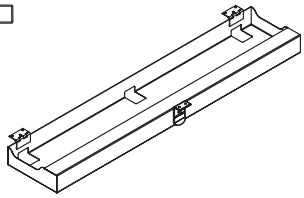
6 cables (.300" dia.)



Cord Management Chain (page 109)

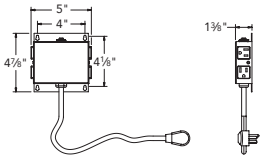
- Used to route and conceal power/data cables from worksurface to beam power receptacles.
- Houses 6 cables at .300" diameter – see illustration left.
- Chain is 36" and must be used in conjunction with a single-sided wire manager. Specify wire manager to be 6" shorter than beam length.
- Chain can be mounted in two orientations – see illustrations left.
- Chain is plastic and comes in one color – Black.
- Recommended cord length for electrical accessories is 60".
- Maximum of two chains can be mounted to a wire manager tray that is 48" or greater.

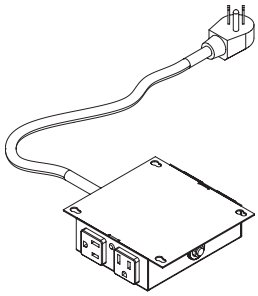




Hinged Trough (page 109)

- Mounts beneath a worksurface. Used to conceal control box kit and extra cord slack.
- May be used in conjunction with quad tap unit UNQTMP to reduce the number of cords routed from a worksurface to a beam.
- Must specify at least 24" shorter than worksurface.
- Trough is user accessible, but may be fastened to worksurface if desired.





Quad Tap (page 287)

- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.
- Comes standard with circuit-breaker feature.
- Chicago code compliant.
- Under surface mounting — 5" x 4⅞" x 1⅜".

For Adaptive specification information see pages 105-107.

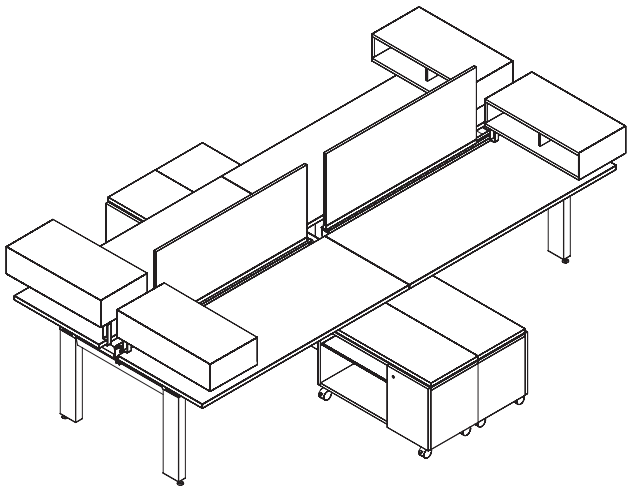
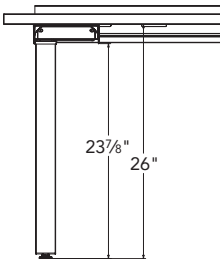
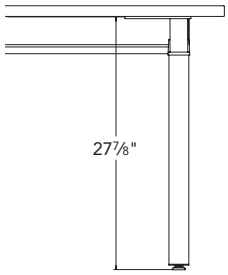
Storage (pages 84-91)

- Storage Nitches (24" & 30" W) can be mounted on Adaptive surfaces using worksurface mounted stanchion kits (U7HSK1).
- Nitch cannot overhang height-adjustable worksurfaces more than 3" from edge of worksurface.
- Laminate shelves (24" & 30" W) can be mounted on Adaptive surfaces using worksurface mounted stanchion kits (U7HSK1).
- Beam mounted storage cannot be used in conjunction with Adaptive worksurfaces.
- Storage cannot be attached to underside of Adaptive worksurfaces.
- Storage below 26"H can be used underneath Adaptive surfaces when not directly underneath height-adjustable leg, otherwise storage must be below 23⅞"H. Taller storage units can be used if keypad with preset height capabilities (ATBCMC) is specified.
- Storage below 26"H can be used underneath fixed supports. Normal Further storage units may be used if positioned to not interfere with plates. See below.

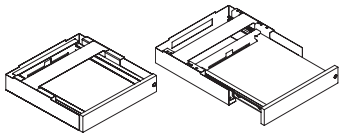






Further Height-Adjustable w/Open Storage 5'-6" x 5'-6"

2 stations are height-adjustable and 2 are fixed height.
Storage and screens provide privacy.



Laptop Drawer (pages 328 and 331)

- Laptop Drawers (U7WDA) must clear worksurface gussets.
- Drawer must be inset 11¾" from the side edge and 9" on mid support side. See illustration at left.
- Laptop drawer cannot be used on 24" x 60", 24" x 66", or 24" x 72" due to external stiffener placement.
- Clearance below drawer is 22⅝" when worksurface is fully lowered. See illustration at left.
