Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

For information on Allsteel's warranty coverage, visit AllsteelOffice.com.

Specification and Price List

Effective Date May 13, 2022

- Software support packages furnished to the customer, either by Allsteel® or by another source, which support the sale of Allsteel products are superseded by printed price lists.
- Prices are subject to change without notice. All orders are subject to prices in effect at the time of order.
- Please refer to your Allsteel Dealer Sales and Discount Policies for order placement information, terms and conditions.
- Additional copies of this Specification and Price List are available upon request from Allsteel Literature at 1-866-255-7833.
- Ordering information appears at the bottom of each product page complete with examples on how to specify. Fabric and finish pages are referenced at the bottom of product pages.

This publication is available as an interactive or downloadable PDF at www.allsteeloffice.com.

COM Policy

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at **allsteelcomteam@allsteeloffice.com**.

Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.

   If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

   In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.

   You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 4 for Social Collaborative, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

   HNI Textile Distribution Center
   COM Production Yardage — PO Number
   Docks 20-22
   301 Mulberry Avenue
   Muscatine, IA 52761

Information that MUST be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

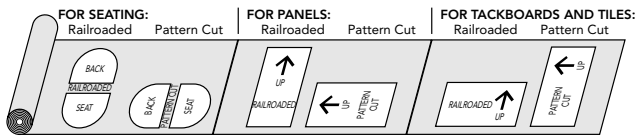
All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).



Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON SOCIAL COLLABORATIVE PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Everyday Advantage®

New terms and conditions for EDA:

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
   • Everyday Advantage Std-0125, Everyday Advantage Canada-0127
2. Everyday Advantage orders are not eligible for bid pricing.
3. Program discounting includes the complete Optimize, Further, Terrace, and Stride systems lines, private office solution, Approach and Involve storage. This program also includes Acuity, Access, Evo, Inspire, Lyric, Mimeo, Nimble, Quip, Relate, Seek, and Svelte, seating. Altitude, Aware, and Structure tables are also available, along with Align pedestals, lockers and metal storage and Essentials pedestals, and Radii storage lines. In addition, Extensions ergonomic accessories and lighting are part of the standard offering. All other product not called out is available for order on the contract but will receive standard discounting of 55%–65%.
4. All textiles and finishes except for veneer and some wood finishes are available, depending on quantity and selection, and may have extended lead times.
5. Everyday Advantage orders are not limited to a minimum or maximum.
6. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
7. Standard freight terms apply.
8. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

Allsteel Inc. reserves the right to amend or terminate this program at anytime with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).

Seating and Social Collaborative

* Colorway not shown on Textiles card; all Partnership Program memo samples are available from supplier. See contact information below.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's Partnership Program consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- **Camira, memos@camirafabrics.com 1.616.288.0655**
- **CF Stinson, cfstinson.com 1.800.841.6279**
- **HBF Textiles, hbftextiles.com 1.877.494.5727**
- **Maharam, maharam.com 1.800.645.3943**
- **Ultrafabrics, ultrafabricsinc.com, 1.877.309.6648**

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

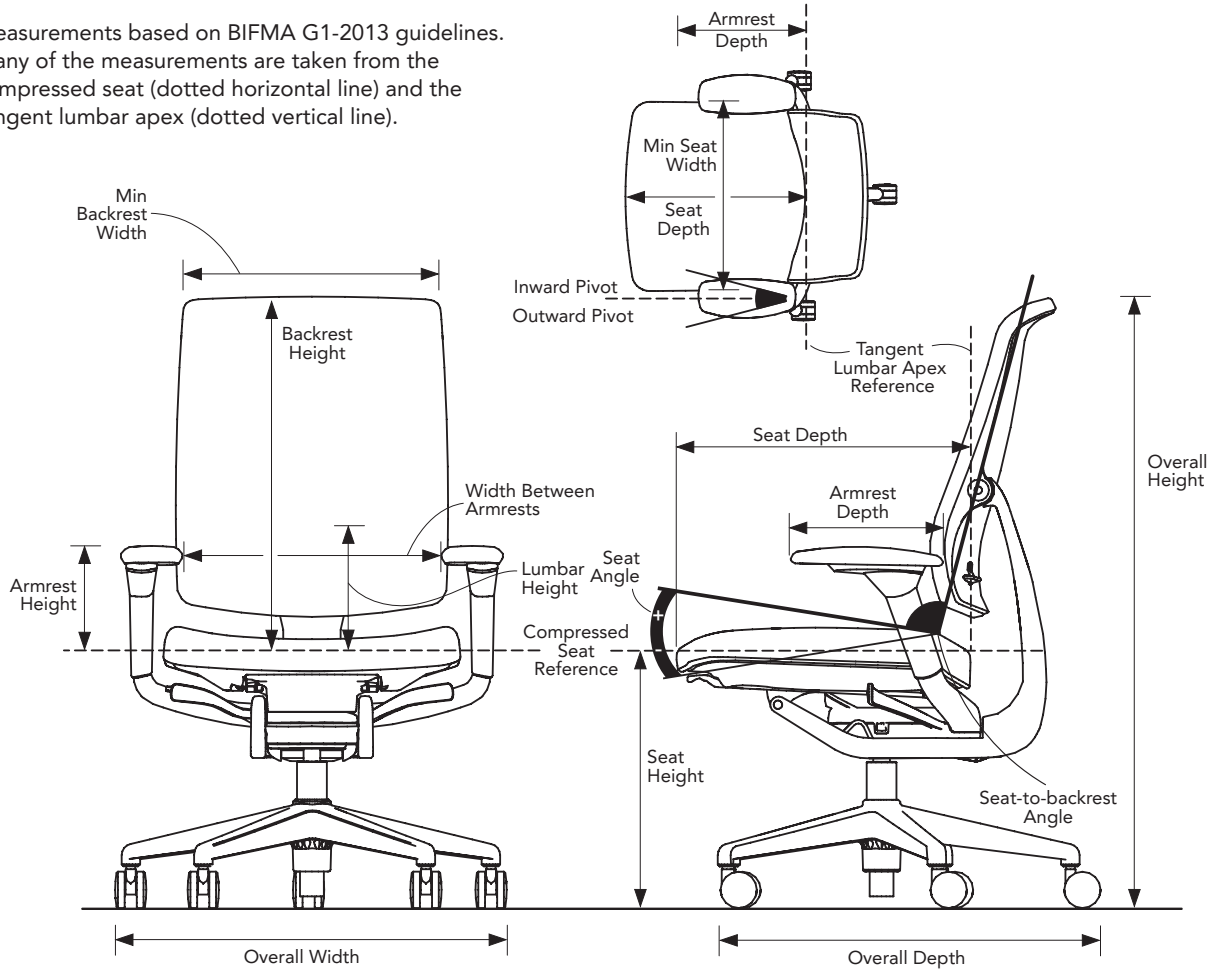
Measurements based on BIFMA G1-2013 guidelines. Many of the measurements are taken from the compressed seat (dotted horizontal line) and the tangent lumbar apex (dotted vertical line).



ANSI — (American National Standards Institute) ANSI is a private, non-profit organization (501(c)3) that administers and coordinates the U.S. voluntary standardization and conformity assessment system.

Asynchronous — High-performance seating control system with three levers to modify adjustments on the chair for a more customized fit:
- Angle of back relative to seat
- Tilt (free float or infinite locking)
- Forward tilt of seat

ASTM Standards — (American Society for Testing and Materials) is an international standards group that develops and publishes technical standards for many products, materials, and services.

BIFMA — (Business and Institutional Furniture Manufacturer's Association) Produces voluntary standards for manufacturers of office furnishings. These standards are intended to provide a common basis for the evaluation of safety, durability, dimensions, ergonomics, and the structural adequacy of the specified furniture.

CAL TB117-2013 — Method used to test open flame resistance of components of upholstered furniture. This test is done with a lighted cigarette placed in crevices of mock-up components.

CFC — (Chlorofluorocarbons) CFCs are broken down by strong ultraviolet light in the stratosphere and release chlorine atoms that then deplete the ozone layer. CFCs are commonly used as refrigerants, solvents, and foam blowing agents.

COL — (Customer's Own Leather)

COM — (Customers Own Material) See pages 6-7.

CTB133 — California Technical Bulletin (California Dept. of Consumer Affairs Bureau of Home Furnishings and Thermal Insulation) Full-scale fire test for furniture manufactured for use in public buildings. Industry standard for full burn test.

Ergonomic — The coordination of the design of a product with the capacities and requirements of the user.

HFES — (Human Factors and Ergonomics Society) A membership-based organization whose mission is to promote the discovery and exchange of knowledge concerning the characteristics of human beings that are applicable to the design of systems and devices of all kinds.

Knee Tilt — A seating control that pivots about a point underneath the knee (towards the front of the seat) to reduce pressure on the back of the legs when reclining.

Memory Foam — Viscoelastic foam developed by NASA that retains the shape impressed upon it to reduce pressure points and distribute the load on the seat more evenly.

NFPA261 — Method of test for determining resistance of mock-up upholstered furniture material assemblies to ignition by a smoldering cigarette. This test is done with a lighted cigarette placed in crevices of mock-up components.

NFPA266 — Method of test for fire characteristics of upholstered furniture exposed to flaming ignition source. This is a full-scale test of mock up. Equivalent to CAL133

Pneumatic — Operated by compressed air in a tool or machine

Powder Coat — Dry paint electrostatically charged for better adhesion to parts and baked on for a durable finish.

Recyclable — Able to be reclaimed and re-used into another value-added product.

Recycled — Made from post-industrial or post-consumer waste products.

Synchro-Tilt — A seating control where the chair back reclines at a prescribed ratio in relation to seat angle. Allows user to recline while keeping seat cushion relatively level to the floor.

Urethane — Synthetic plastic; any of a group of thermoplastic polymers that are used in resins, coatings, insulation, adhesives, foams, and fibers.

Weight-Activated — A seating control that has the recline tension engineered into the chair so that the chair recline tension will automatically vary depending on the weight of the user reclining the chair.

Wyzenbeck Testing — Method of testing the abrasion resistance of a fabric utilizing a cotton duck or wire mesh that is rubbed, back and forth (a double rub), over the fabric.

Reference Page

Access offers a light scale aesthetic that complements today's working environments with a price that fits from the workstation to the conference room, and from private office to call centers. Access provides a sleek, modern design that strikes the most common ergonomic and aesthetic features that customers are seeking today within a flexible price range.

POSTURE CONTROL SYSTEMS

Versatility of performance and the scalability of features provide a range of applications and adaptable comfort, allowing the user to easily adjust for a customized fit.

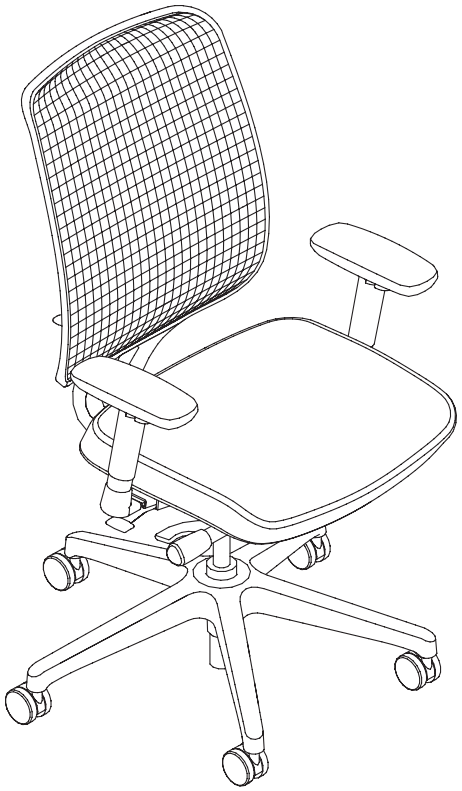
Active Ergonomics With A Synchro-Tilt Mechanism

Synchro-tilt allows the back to recline at a 2-to-1 ratio relative to the seat. This motion opens the angle between the legs and torso, providing increased circulation. Tilt lock allows the user to secure the chair in the upright posture, or tilt freely. Synchro-tilt models feature side mounted adjustable tension, that modifies the level of resistance to allow the user a custom fit. Basic synchro models feature a center tension knob.

Basic Synchro-Tilt Mechanism

An economical solution for individuals performing a variety of light tasks throughout the day, or for conferencing applications, where seat depth adjustment is not required.

The basic synchro-tilt allows the back to recline at a 2-to-1 ratio relative to the seat. This motion opens the angle between the legs and torso, providing increased circulation. Tilt lock allows the user to secure the chair in the upright posture, or tilt freely. Center mounted adjustable tension modifies the level of resistance to allow the user a custom fit.



PROPORTIONAL CONTROLS

Height Adjustable Lumbar Support

Allows user to adjust lumbar anywhere within a 4" range on mesh work chairs and mesh work stools. Lumbar support slides can be adjusted asynchronously to suit the individual user.

Adjustable Back Height (Upholstered models only)

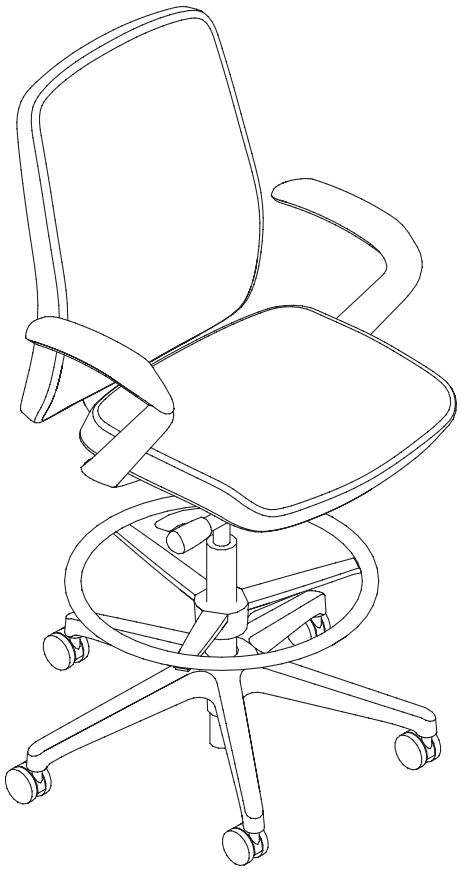
Upholstered models feature a standard height adjustment. Position the lumbar support in one of five positions within a 2½" range. Can be adjusted easily from a seated position.

Pneumatic Seat Height Adjustment

Regulates height of the chair relative to the floor. Standard 4½" of travel on work chairs accommodates average to tall users. Work stools have an extended range that allows 10" of travel.

Seat Depth Adjustment

Allows seat support to travel front-to-back and lock within a 3" range (mesh and upholstered work chair models). Seat depth adjustment not available on basic synchro models.



Reference Page

Adjustable Arms

Height and width adjustable arms will adjust 4" in height and 3" in width for optimal support of elbows and shoulders while keyboarding or conferencing.

Multi-adjustable arms offer 30 degrees of pivot inward and outward as well as up to 4½" of depth adjustment.

Fixed C Arms

Provide basic support for users engaging in a variety of tasks throughout the day. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Fixed C arms are available in a black urethane material or polished aluminum with protective black urethane arm pads.

DESIGN FEATURES

Access seating is engineered to support a variety of work and conference applications through its versatile performance and aesthetic options.

Mesh Back

A breathable mesh back offers a modern aesthetic along with an accentuated lumbar curve, provides superior comfort.

Upholstered Back

A fully upholstered back satisfies the discerning user, featuring an enhanced lumbar support and standard integrated height adjustment mechanism.

Base/Casters

Base is a composite five-star structure. Dual-wheel casters are available in hard tread for carpet, or soft tread for hard surfaces

Materials

- All upholstery foams are CFC-free
- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics and foam meet requirements for CAL TB117-2013. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Access meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Access is warranted for multiple shifts and users up to 300 lbs.
- Access synchro-tilt work chairs and work stools ship knocked down. Basic Synchro work chairs ship fully assembled.

OPTIONS — ACCESS WORK/CONFERENCE AND STOOL

Back Types:

- **M** Mesh Back
- **U** Upholstered Back

Armrests:

- **H** Height and Width Adjustable (manual width adjustment)
- **W** Pivot and Depth Adjustment (includes height and width adjustment)
- **F** Fixed C-Arms (urethane)
- **P** Fixed Polished Aluminum C-Arms (work chairs only)
- **A** Armless

Pneumatic Cylinder:

- **2** Standard, allows 4.5" of travel for work chairs
- **4** Extended Range, allows 10" of travel for stools

Casters:

- **0** 2½" Dual-wheel Hard Tread for carpets
- **1** 2½" Dual-wheel Soft Tread for smooth surfaces ($60 extra)

Frame Color:

- **BLK** Black

Base:

- **BLK** Black
- **PAL** Polished Aluminum (add $163) work chairs only

Access Mesh:

- **AM10** Black (Access mesh is only available in Black)

Upholstery:
See pages 12-14 for selections. See pages 18-19 for colors and codes.

(See page 156 for COM pricing on Grades 9-22)

A M 1 0 .

Acuity is a chair that enhances any environment, any body. Designed in collaboration with Bruce Fifield of Milan-based Design Continuum Italia, Acuity is designed with Italian sensibility and Allsteel ingenuity. Its design and ergonomics work seamlessly while the controls are intuitive. Acuity is elegant and pleasing to the eye, as anything inessential has been stripped away, leaving behind only a purity of form.

Acuity is level®2 certified and has achieved SCS Indoor Advantage™ Gold Certification. Acuity is designed and manufactured to have minimal impact on both the physical and social environment, made with no PVC components and has a recycled content of 28%-37%, depending on chair base selected.

KEY FEATURES

AcuFit®

Acuity provides ideal ergonomics, instantly. We used the latest anthropometric databases, high-tech modeling, and intense observation to understand just what a body needs. You'll feel it the minute you sit – snug support and contoured cushioning that conforms to your body and stays with you throughout the day. No matter what size you are or how you work, Acuity adapts, automatically.

Weight-activated mechanism

A ground-breaking, weight-activated mechanism built into the chair's structure does two things critical to effective ergonomics: automatically adjusts recline tension in response to the user's weight; and, keeps the seat and back moving smoothly together during recline, thereby maintaining perfect balance, body angle, and focus.

Hybrid seat cushion

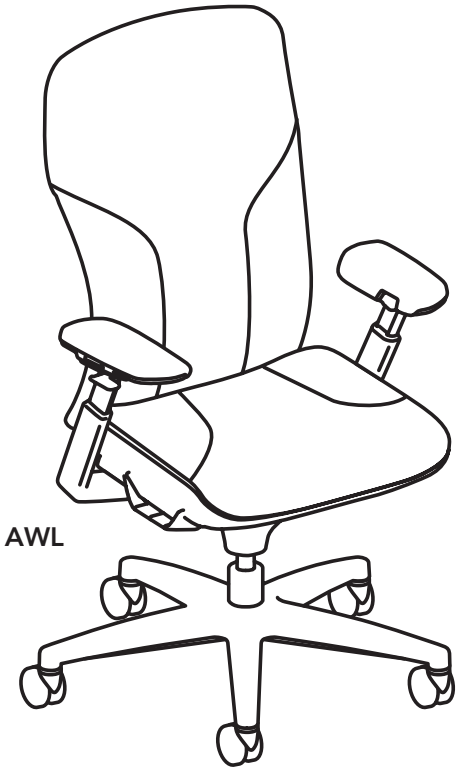
A unique combination of materials provides properties critical to comfort. A molded foam base with additional memory foam offers softness when you first sit along with greater support over time. This translates into instant comfort, the elimination of pressure points, and a healthy sitting experience over every hour of the day.

Conforming mesh back

Form creates function with a back designed to provide ideal ergonomics for bodies of every shape and size. The mesh carrier mirrors the shape of the human spine, offering snug support to the shoulders, lumbar area, and everywhere in between, simultaneously and continuously. In addition, the structure and materials of the yoke have inherent dynamic properties that promote healthy posture by allowing just the right amount of flex and body movement.

Intuitive Controls

Fine-tuning the fit is critical to optimizing ergonomics and improving personal comfort. Acuity's controls are well-marked, easy-to-find tabs, located along the sides of the seat so they're simple to see, use, and understand. Now you'll never have to get out of your seat or fuss with paddles and knobs to adjust your chair.



Materials and Finishes

Acuity has been designed to complement any interior design, any organizational aesthetic. Purity of form, sensual lines, and a slender profile let it make a supportive statement to every environment, every body. Choose from several classic colors for chassis, base, caster, mesh carrier, and mesh and a wide variety of standard and partnership upholstery options.

Optional Upholstered Jacket

Dress for success with a slip on jacket that offers premium appeal in conference areas, private offices, or the boardroom. Elegantly tailored with a simple snap closure and seven stitches per inch, architects and interior designers can choose from jackets in hundreds of approved colors. Remove the jacket and you're back to mesh for everyday flexibility, anywhere in the office.

Casters

Black dual-wheel hard tread casters for carpet are standard.

Optional multi-surface casters provide smooth functioning on any surface, from a carpeted conference room to polished concrete. Finishes that match bases in standard black, graphite, or polished aluminum give Acuity head-to-toe elegance.

Fully Adjustable Arms

Intuitive controls let you find any of the eight arm positions. A single lever releases the arms to slide up or down; a button right where the thumb naturally lands lets you move the arm pad inward or outward, forward or backward. You can also pivot the front of the arm pads inward to move in closer to your desk and offer support while working.

Fixed Arms

Provide basic support for people who face a varied work day. Fixed arms limit adjustability and maintain aesthetics in conference room settings. Acuity's Fixed T Arms are 100% cast aluminum.

Materials

- All upholstery foams are CFC-free.
- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering information.
- Flammability code compliance of Allsteel textiles and seating is listed on pages 18-19. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate with CTB 133.

Acuity meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Acuity is warranted for multiple shifts and users up to 300 lbs.

OPTIONS — ACUITY:

Armrests:

- **W** Fully Adjustable Arms
- **A** Armless
- **F** Fixed Arms

Jacket:

- **L** Leather
- **F** Fabric
- **M** (None)

Chassis:

- **G** Graphite Chassis
- **S** Silver Chassis
- **W** Brilliant White (limited to Titanium frames)
- **P** Polished Aluminum Chassis

Back Frame/Mesh:

- **GC** Graphite Carrier/Clay Mesh
- **GD** Graphite Carrier/Dusk Mesh
- **GM** Graphite Carrier/Mist Mesh
- **TL** Titanium Carrier/Lustre Mesh
- **TM** Titanium Carrier/Mist Mesh
- **TN** Titanium Carrier/Navy Mesh

Fire Code:

- **NO** Standard Upholstery, No Fire Code
- **FC** Fire Code Option for CTB 133 / Boston Fire Code / NY/NJ Port Authority ($100 extra)

Base:

- **P71** Black Polymer Base
- **P85** Graphite Painted Aluminum Base ($143 extra)
- **PR6** Silver Painted Aluminum Base ($143 extra)
- **PQ8** Brilliant White Painted Aluminum Base ($143 extra)
- **PAL** Polished Aluminum Base ($213 extra)

Pneumatic Cylinder:

- **2** Standard; allows 5" of travel
- **3** Short; non-standard 3½" of travel to meet BIFMA G1-2002

Casters:

- **H** Black Dual-Wheel Hard Tread for carpet
- **B** Black Multi-Surface ($96 extra)
- **T** Titanium Multi-Surface ($96 extra)
- **P** Polished Aluminum Multi-Surface ($130 extra)

Upholstery:

See pages 54-55 for Centurion model.
See pages 12-14 for other upholstery selections.
See pages 18-19 for colors and codes

▲ Indicates upholstery available for Acuity jacket

Armpads (upholstered option available on Leather models)

- **S** Standard Polyurethane Armpad
- **A** Upholstered Armpad — Standard Leather, only available on fully adjustable arms ($95 extra)

Jacket — Upholstery on Acuity jacket models are subject to creases and gathers. Fabric selection includes a subset of the Standard Upholstery Options to optimize customer satisfaction.

NOTE: Not all options listed above are available on all models. See pages 54-55 for options by model.

- Features and adjustments on all Acuity models: Conforming Mesh Back, AcuFit® Tilt Lock with Recline Tension, Seat Depth, and Pneumatic Adjustment

(See page 156 for COM pricing on Grades 9-22)

How to specify —

Select the Model Number from above.

1st Option:

Select the Frame/Mesh Color:

GC Graphite/Clay Mesh
GD Graphite/Dusk Mesh
GM Graphite/Mist Mesh
TL Titanium/Lustre Mesh
TM Titanium/Mist Mesh
TN Titanium/Navy Mesh

(Brilliant White models limited to Titanium frame finish. **VATWMG** model limited to Graphite/Dusk.)

2nd Option:

Select the Fire Code:

Add either **NO** for no; or **FC** for CTB133 / Boston Fire Code / NY/NJ Port Authority ($100 extra)

3rd Option:

Select the Base Color:

P71 Black Polymer
P85 Graphite Painted Aluminum ($143 extra)
PR6 Silver Painted Aluminum ($143 extra)
PQ8 Brilliant White Painted Aluminum ($143 extra)
PAL Polished Aluminum ($213 extra)

(**VATWMG** model limited to **P71** Black Polymer)

Examples: **AWFPGMNO.PAL.2.B.RS01** **AFMPTLFC.P85.3.G.DCW02**
VATWMGGDNO.P71.2.H.CU10

4th Option:

Select the Cylinder:

2 Standard, allows 5" of travel
3 Short, allows 3½" of travel

(**VATWMG** model limited to 2 standard cylinders)

5th Option:

Select the Casters:

H Black Dual-Wheel Hard Tread for carpet
B Black Multi-Surface ($96 extra)
T Titanium Multi-Surface ($96 extra)
P Polished Aluminum Multi-Surface ($130 extra)

(**VATWMG** model limited to **H** Black Dual-Wheel Hard Tread for carpet)

6th Option:

Select the Upholstery:

See pages 12-14 for selections.
See pages 6-7 for COM guidelines.

(**VATWMG** model limited to **CU** Centurion upholstery)

7th Option:

Select the Armpad:

S Standard Poly Armpads
A Upholstered Armpad — Standard Leather, only available on fully adjustable arms ($95 extra)

S

Acuity side chairs provide an ideal solution for busy work areas such as training rooms, gathering areas, informal conferencing, cafés, and more. With a stackable design and pivoting back, Acuity side chairs provide the perfect combination of versatility and unexpected comfort.

MODELS AND OPTIONS

Acuity offers side chair models with mesh backs in two frame colors.

Side chairs feature **arm and armless models** with casters or glides.

Glides are available in nylon, nickel-plated, or felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces.

Multi-surface casters are also available.

Chairs ship up to two per carton to minimize waste.

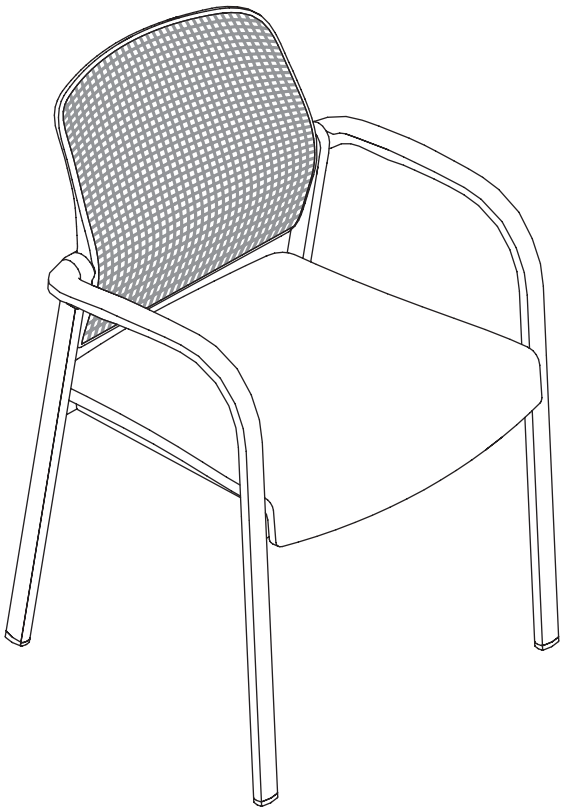
CONSTRUCTION

Steel frames and structural moldings create a durable design that performs in a variety of environments.

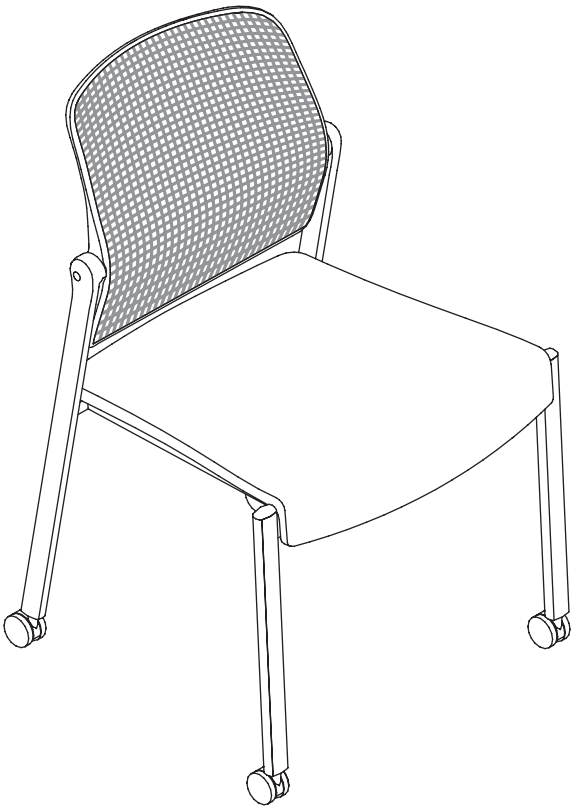
Seat upholstery is easily field replaceable allowing users to extend the lifecycle of the chairs.

Multi-purpose side chairs **stack up to 4-high** on the floor.

Acuity mesh chairs feature Acuity Mesh. This construction provides responsive, conforming back support and an open, airy aesthetic.



ACM-MUGO — Mesh Back and Upholstered Seat



ACM-MUCA — Mesh Back and Upholstered Seat

UPHOLSTERY AND CONTOURING

Acuity side chairs feature a pivoting back that provides unexpected comfort in any application. The **pivoting back** provides support while encouraging movement that makes for healthy sitting. The **backrest** features a contoured lumbar support to help relieve stress on the back. Added movement and support allow the Acuity multi-purpose side chair to go from project conference rooms to teaming areas to training rooms with ease.

The upholstered seat features a generous 2" of high-resiliency molded foam padding for comfort and long-term support.

All upholstery foams are **CFC-free**.

All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.

Flammability code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133, contact Allsteel Customer Support.

Acuity meets the requirements set forth in ANSI/BIFMA X5.1-2011. Acuity side chairs are warranted for users up to 300 lbs.

OPTIONS — ACUITY MULTI-PURPOSE SIDE:

Versions include arm and armless models with glides or casters with an upholstered seat and mesh back.

Back Type:
- **M** Mesh

Seat Type:
- **U** Upholstered

Frame Type:
- **C** Casters
- **G** Glides

Arm Option:
- **O** Arms (Arm color will match carrier color — black or titanium)
- **A** Armless

Glides/Casters:
- **0** Nylon Glides for hard surfaces and commercial carpet
- **1** Nickel-plated Glides for carpet ($16 extra)
- **2** Felt Glides for wood, tile, or high-sheen surfaces. ($16 extra)

Seating — Work/Guest/Lounge

Reference Page

Clarity offers a clean, simple design that preserves only the essential elements of form and function. Designed in collaboration with BMW Group DesignworksUSA, Clarity combines a pure, honest aesthetic that transcends the floor plan with an unexpected comfort that anticipates your every posture.

Form

The streamlined design creates a unique visual interest that inspires your imagination without distracting your focus. Clarity's frame and base are constructed of aluminum, offering superior quality and durability. Choose from several chair styles, nine mesh colors, and a variety of frame finishes to complement spaces from formal to casual. Wherever you work, it goes.

Function

The continuous mesh seat and back offer instant comfort and support with minimal adjustment. You can sit upright. Side sit. Turn around. Or lean over the back. With no fussing and less fine-tuning. Anywhere you go, and any way you sit, it works.

Versatility

Because form and function are simplified, Clarity adapts to any space you're in, as well as any type of work you're doing. From focused heads-down work to engaged collaboration to active lounging. It's always a reflection of the space it's in and the people who use it.

C5OMFC

C4OMFC

CLOMFC

DESIGN FEATURES

Clarity seating is engineered to support a variety of work, conference, and lounge applications that share a simple, intuitive, and active design.

Fixed Arms

Provide basic support for users engaging in a variety of tasks throughout the day. Arms come with protective urethane arm pads. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Arm Covers

Optional soft arm pad sleeves are available as a set, one left and one right. Pad sleeves slip over existing arms on a Clarity work, guest, or lounge chair. Sleeves are made of ⅛" thick santoprene and are available in G Graphite or T Titanium.

Pneumatic Seat Height Adjustment

Regulates height of work chair relative to the floor. Standard 5" of travel accommodates average to tall users.

Base/Casters/Glides

Work chair bases are a five-star design, C5 models are aluminum and polymer base work models are composite. Dual-wheel casters are available in hard tread for carpet, or multi-surface for any floor surface.

Glides on guest and lounge chairs provide stability as user changes position. Cylinders return chairs to center position.

Materials

- All models meet CAL133.
- All COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CAL TB117-2013. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Clarity is warranted for multiple shifts and users up to 300 lbs.

_ _ _ _ _ _

People are moving around the workspace to get work done, and the conference room or shared bench is the home away from home. The Evo collection is adaptable and interchangeable across multiple spaces to provide consistent comfort while maintaining a cohesive design.

KEY FEATURES

Evo chairs feature weight-activated recline so there's no additional tension adjustment. Intuitive controls, along with specially sculpted and formulated seat foam, create a comfortable sitting experience for wherever and however people work.

Arms

Open arms allow for multiple sitting postures and remain lateral when reclining for maximum support. Options for work and conference models: 4D adjustable arms, height-adjustable arms, fixed polished aluminum arms, or armless.

Accent stitching

Accent stitching, available in nine colors, offers a way to make a design statement on work and conference models.

Back support

Contoured frame provides upright back support. Optional user-adjustable lumbar can be added at any time.

Up-front controls

Integrated, up-front controls are easy to access and use and contribute to an overall clean aesthetic.

Height-Adjustable Footring

Travels 8" to ensure users have comfortable support of their feet and legs. The footring has a 20" diameter.

MATERIALS

All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.

Allsteel fabrics meet requirements for CTB117. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB117. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

Evo meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Evo is warranted for multiple shifts and users up to 300 lbs.

Evo Side Chair is warranted for users up to 300 lbs.

4D adjustable arms

Evo's 4D arms are fully adjustable in height, width, depth, and can pivot to provide optimal support. Pivot the front of the arm pads inward to move in closer to your desk and offer support while working.

Height-adjustable arms

Provides height adjustments for optimal support of elbows and shoulders while keyboarding or conferencing while providing ease of entry/exit.

Fixed polished aluminum arms

Provide basic support for users engaging in a variety of tasks throughout the day. Arms come with protective black, flint, titanium or salt urethane arm pads to match the specified frame finish. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Optional adjustable lumbar support

To accommodate personal preference, an optional external lumbar support can be added at any time with 4" range of adjustment.

Base and casters

Work chair bases are a five-star design. Dual-wheel casters are available in hard tread for carpet, or multi-surface for any floor surface.

SIDE CHAIR MODELS AND OPTIONS

Evo offers side chair models in four frame colors with mesh backs in five colors. Side chairs feature arms with casters or glides. Glides are available in nylon, nickel-plated, or felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces. Multi-surface casters are also available. Chairs ship up to three per carton to minimize waste. Evo Side chair can be stacked up to four high.

OPTIONS — WORK/CONFERENCE/STOOL

Chair Type:
- **DWW** Work
- **DWC** Conference
- **DWS** Stool

Back Type:
- **M** Mesh (Work/Stool)
- **U** Upholstered (Conference)

Overall Size:
- **H** High-Back (Work/Stool)
- **M** Mid-Back (Conference)

Arms:
- **W** 4D Adjustable Arms
- **H** Height Adjustable Arms
- **F** Fixed Polished Aluminum Arms
- **A** No Arms

Fire Code:
- **NO** No Fire Code

Frame Color (Work/Conference/Stool):

Inspire is designed to support a multitude of higher education environments. In Allsteel's second collaboration with Bruce Fifield of Milan-based Design Continuum Italia, Inspire responds to the specific needs of today's dynamic learning environments. Incorporating automatic comfort technologies, students can now stay comfortable longer promoting active, engaged learning.

Inspire has achieved SCS Indoor Advantage Gold Certification and level® 2 certification. Inspire is designed and manufactured to have minimal impact on both the physical and social environment, made with no PVC components, and ranges in percent recyclable from 59% to 98%.

KEY FEATURES

TriFit™ Comfort Technologies

Inspire encourages interaction and involvement through unrestricted freedom of movement. The TriFit technology incorporates seat suspension, back recline, and seat flexure in a non-mechanical system that allows users to move freely and learn comfortably.

Breadth of Line

Today's learning environments are extending beyond the classroom. Spaces are needed that invite interaction and support collaboration. With Inspire's broad statement of line, versatile spaces are created not only in classrooms, but also in active learning environments – cafés, libraries, labs, and team project rooms – throughout campus.

Lasting Performance

Higher education environments mandate lasting performance. With Inspire's 4-sided welded steel frame construction, it creates a durable design that withstands active environments. The back recline and seat movement technologies are robust and non-mechanical to provide long-lasting, quiet use.

MODELS AND OPTIONS

Inspire models are available with arms or armless. Arm models feature two arm cap options: non-flexible for high-use environments and flexible for enhanced comfort.

Seat and back upholstery options are available on all models. Upholstery can be field-installed and is field-replaceable.

MATERIALS AND FINISHES

Polymer shells are offered in eight energizing colors and are made from recyclable material.

Trisect seating upholstery provides a high performance, sustainable fabric option to complement the eight polymer shell colors. This EIP antimony-free fabric incorporates Greenshield finish. Additional upholstery options also available.

- All upholstery foams are CFC-free.
- All COMs/COLs must be approved for upholsterability and applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.
- Allsteel fabrics and foam meet requirements for CAL TB117-2013. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Flammability code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013.
- Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

Inspire meets the requirements set forth in ANSI/BIFMA X5.1-2017. Inspire is warranted for multiple shifts and users up to 350 pounds. Inspire four-leg stack and sled base chairs ship two per carton. All other models ship one per carton. Work chairs and work stools ship fully assembled. Model numbers and pricing are per chair.

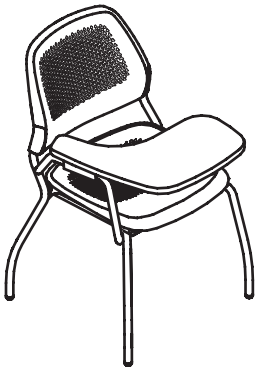
4-Leg Tablet Arm



4-Leg Tablet Arm chairs can stack three high.

Tablets are field-installed to the chairs.

Tablet material consists of ¾" thick 11-ply laminated Baltic Birch plywood.

Flip-and-fold tablet option provides 6 degrees of lateral rotation in the use position to accommodate a wider range of user types. It also flips up 90 degrees and rotates back 180 degrees to store when a tablet is not needed.

Glides are available in nylon, nickel-plated steel, or nylon with felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments.

Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces.

Multi-surface casters are also available.

Fire Code:
- **NO** Standard Upholstery, No Fire Code
- **FC** Fire Code Option for CTB 133 / Boston Fire Code / NY/NJ Port Authority ($100 extra) *See note below.*

Pneumatic Cylinder:
- **4** Extended Range Cylinder; allows 10" of travel

Type Casters:
- **0** 2½" Black Dual-wheel Hard Tread for Carpet
- **1** 2½" Black Dual-wheel Soft Tread for Smooth Surfaces
- **2** Glides

Arm Cap:
- **N** No Arm
- **H** Non-Flexible
- **F** Flexible ($20 extra)

Frame Finish with Charblack base:

CBK	Black	**P8N**	Ion
P8T	Titanium	**P8J**	Iris
P8B	Night Bronze	**P8F**	Krypton
PJE	Pyrite	**P8M**	Regatta
PR6	Silver	**P091**	Amethyst
P8X	Solar Black	**P090**	Cobalt
P8S	Atom	**P093**	Ochre
PJF	Bullseye	**P092**	Sienna
P8P	Ember		

Polymer Shell Color:

BLK	Black (formerly **CB** Onyx)	**GY**	Summit
		RD	Cayenne
BU	Surf	**RG**	Tangelo
BW	Brownstone	**WT**	White (formerly Frost)
GN	Sprout		

NOTE: Models with the fire code option are available in Black/Onyx polymer shell only.

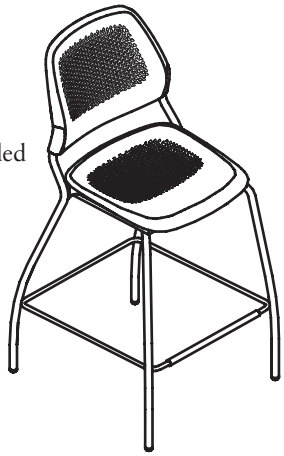
Upholstery
See pages 12-14 for selections and pages 18-19 for color codes.

Reference Page

4-LEG STOOL

4-Leg stools do not stack.

Glides are available in nylon, nickel-plated steel, or nylon with felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated steel glides are recommended for carpet. Nylon with felt glides are recommended for wood, tile, or high-sheen floor surfaces.



OPTIONS — 4-LEG STOOL

Upholstery Option:
- **N** None (Polymer Seat and Back)
- **S** Upholstered Seat Pad
- **U** Upholstered Seat and Back Pad

Glides:
- **G** Glides

Armrests:
- **O** Fixed Arms
- **A** Armless

Fire Code:
- **NO** Standard Upholstery, No Fire Code
- **FC** Fire Code Option for CTB 133 / Boston Fire Code / NY/NJ Port Authority ($100 extra) *See note below.*

Type of Glides:
- **0** Nylon Glides
- **1** Nickel-plated Steel Glides ($16 extra)
- **2** Nylon with Felt Glides ($16 extra)

Arm Cap:
- **N** No Arm
- **H** Non-Flexible
- **F** Flexible ($20 extra)

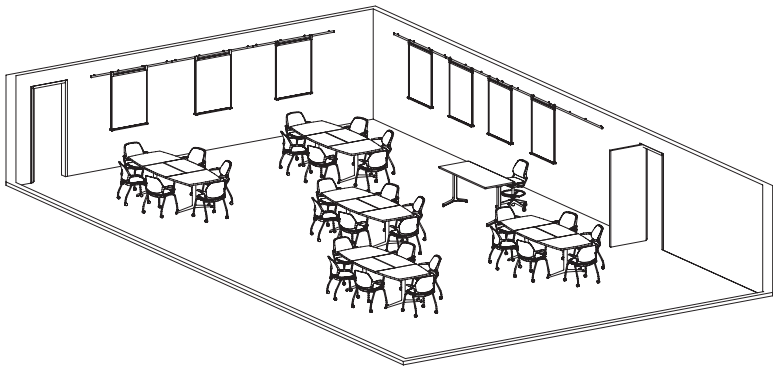
Attention	Particles can become lodged in nylon and mar floor surface.	Particles can become lodged in felt and mar floor surface.	Cleaning chemicals and water can cause rusting.	Resists moving/sliding. Could lead to chairs tipping back.

Inspire Room Typicals

These eight typicals show various arrangements featuring Inspire.

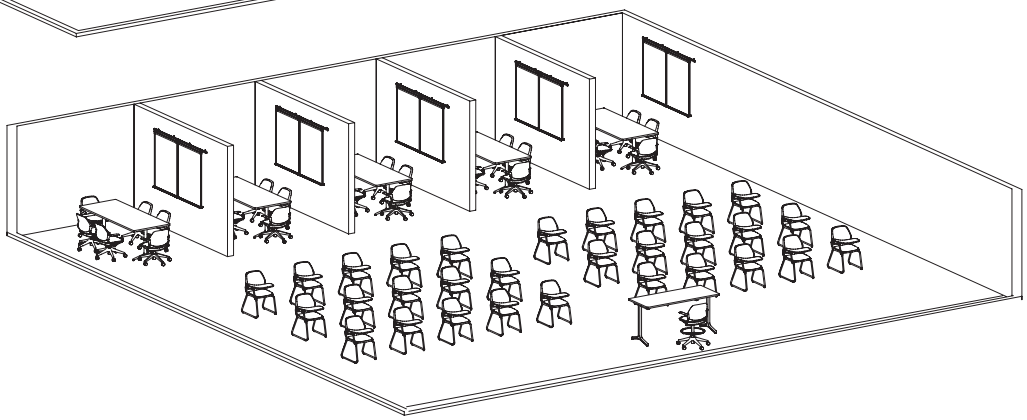
CLASSROOM

Collaborative areas feature Inspire four-leg stack chairs with casters around Merge® Power Bay™ tables. Instructor has an Inspire work stool at a variable height table.



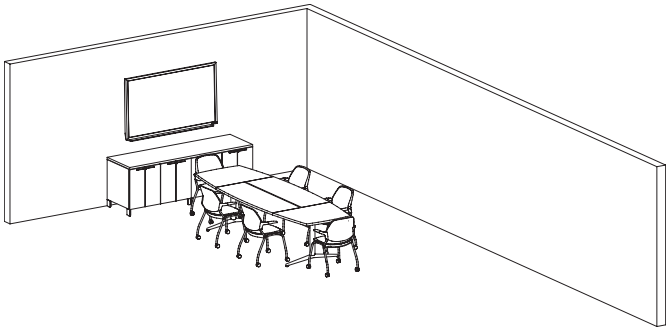
CLASSROOM

Sled Base Tablet Arm with center aisle. Instructor has an Inspire Multi-Purpose Work Stool with a variable height table. Break-out areas feature Inspire Multi-Purpose Work Chair with tables.



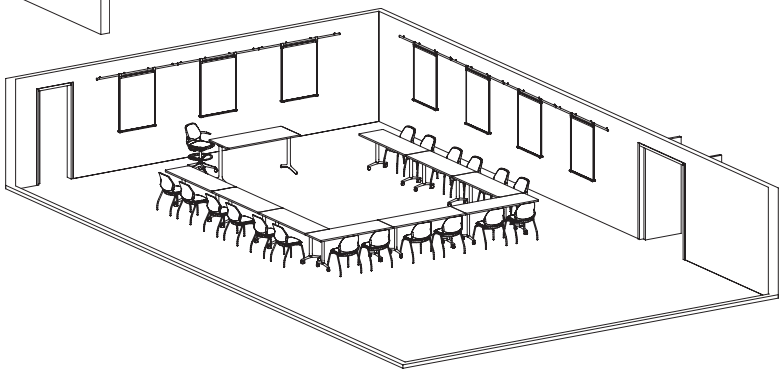
TEAM ROOM

Inspire 4-Leg Multi-Purpose with casters around a Merge Power Bay table. Stride high credenza along wall.

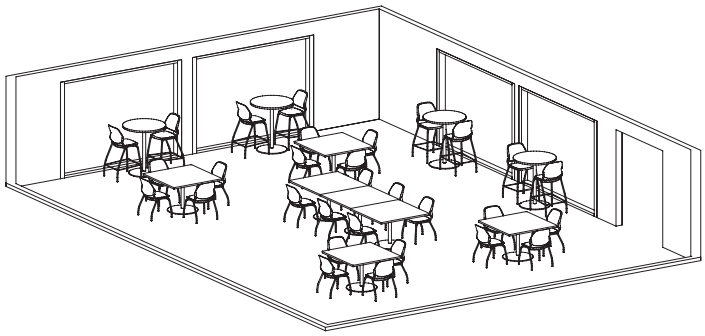


U SHAPE CLASSROOM

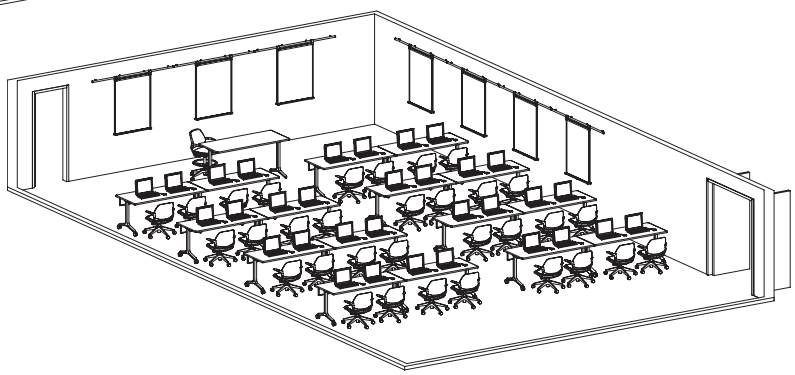
Inspire 4-Leg Multi-Purpose with glides around tables. Instructor has an Inspire Multi-Purpose Work Stool with a variable height table.



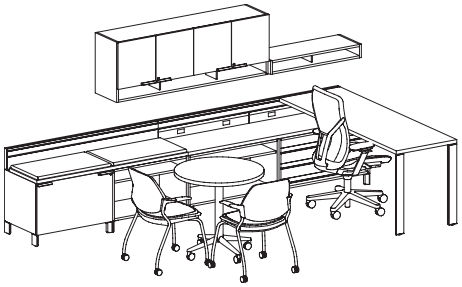
CAFÉ/ATRIUM
Inspire 4-Leg Multi-Purpose with glides around Merge tables. Inspire four-leg stools with Merge standing height tables occupy the perimeter.



COMPUTER LAB
Inspire Multi-Purpose Work Chair with tables. Instructor has an Inspire Multi-Purpose Work Stool at a variable height table.



FACULTY OFFICE
Inspire 4-Leg Multi-Purpose with casters around a Merge table create a teaming area in a Stride office with an Acuity® chair.



SEMINAR
Inspire 4-Leg Multi-Purpose with casters around a Merge Power Bay table.

DESIGN FEATURES

Choose the options specific to your needs.

Basic synchro control adjustment
Manual crank tension with knob and an upright lock.

Enhanced synchro-tilt control
Manual crank tension adjustment with easily reached lever and three locking positions for the back.

Weight activated control
Automatic tension control with an upright lock and tilt limiter.

Mesh and Upholstered Mesh Backs
Mesh back chairs are available in six mesh colors. Upholstered mesh back chairs are available with Centurion fabric in one of 18 colors (see codes on page 18). Upholstery is inset with mesh and chair back frame is exposed. Mesh color is predetermined by frame color selection.

Optional adjustable lumbar support
Lyric provides automatic lumbar support. To accommodate personal preference, an optional external lumbar support can be added at any time with 4" range of adjustment.

4D fully adjustable arms
Lyric's 4D arms are fully adjustable in height, width, depth, and can pivot to provide optimal support. Pivot the front of the arm pads inward to move in closer to your desk and offer support while working.

2D adjustable arms
Provides height and width adjustments for optimal support of elbows and shoulders while keyboarding or conferencing while providing ease of entry/exit.

Fixed arms
Provide basic support for users engaging in a variety of tasks throughout the day. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Pneumatic seat height adjustment
Regulates height of work chair relative to the floor. Standard 5" of travel accommodates average to tall users. Stools offer 10" of travel.

Seat depth adjustment
Allows seat cushion to manually adjust front to back.

Base and casters
Work chair and stool bases are a five-star design. Dual-wheel casters are available in hard tread for carpet, or multi-surface for any floor surface.

Materials

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions. Allsteel fabrics meet requirements for CTB117. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric only tests such as CTB117. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Lyric meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Lyric is warranted for multiple shifts and users up to 300 lbs.

Height-Adjustable Footring
Travels 8" to ensure users have comfortable support of their feet and legs. The footring has a 20" diameter.

How to specify —

Select the Model Number from above.

Add either **NO** for no; or **FC** to end of model for CTB133 / Boston Fire Code / NY/NJ Port Authority ($100 extra)

1st Option:

Select the Frame Color:

BLK Black
T Titanium (add $40)

2nd Option:

Select the Base Color:

BLK Black
T Titanium
PAL Polished Aluminum ($145 extra)

3rd Option:

Select the Lumbar:

N No Lumbar
L Lumbar ($30 extra)

4th Option:

Select the Lumbar Color *(if applicable)*:

BLK Black
T Titanium

Examples: **CWW-MHWNO.T.T.LT.2.T.FWM55.AI26 LLUK.BLK**
CBW-MMWFC.BLK.BLK.N.2.H.FWM55.CU19

How to specify —

Select the Model Number from above.

Add either **NO** for no; or **FC** to end of model for CTB133 / Boston Fire Code / NY/NJ Port Authority ($100 extra)

FC option is not available on upholstered models.

1st Option:

Select the Frame Color:

(Frame color determines upholstered mesh color.)

BLK Black (*Black Mesh*)
T Titanium (*Titanium Mesh*) (add $40)

2nd Option:

Select the Base Color:

BLK Black
T Titanium
PAL Polished Aluminum ($145 extra)

3rd Option:

Select the Lumbar:

N No Lumbar
L Lumbar ($30 extra)

4th Option:

Select the Lumbar Color *(if applicable)*:

BLK Black
T Titanium

5th Option:

Select the Cylinder:

4 Extended range work stool cylinder allows 10" of travel

C S S – [ ][ ][ ][ ][ ] . [ ][ ][ ][ ] . [ ][ ][ ] . [ ] . [ ][ ][ ] . **4** .

See pages 12-14 for selection, colors, and codes.

10th Option:

Select the Headrest *(if applicable)*:

- **N** No Headrest
- **HR** Headrest (+$120 extra)

LYRIC

DESIGN FEATURES

An economical solution, suited for larger and taller people who perform a variety of tasks. Lyric Large & Tall is warranted for multiple shifts and users up to 400 lbs.

Enhanced synchro-tilt control

Manual crank tension adjustment with easily reached lever and three locking positions for the back.

Mesh and Upholstered Mesh Backs

Mesh back Large & Tall chairs are available in Black mesh. Upholstered mesh back chairs are available with Centurion fabric in one of 18 colors (see codes on page 18). Upholstery is inset with mesh and chair back frame is exposed. Mesh color is predetermined by frame color selection.

2D adjustable arms

Provides height and width adjustments for optimal support of elbows and shoulders while keyboarding or conferencing while providing ease of entry/exit.

Fixed arms

Provide basic support for users engaging in a variety of tasks throughout the day. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Pneumatic seat height adjustment

Regulates height of work chair relative to the floor. Standard 5" of travel accommodates average to tall users.

Base and casters

Bases are a five-star design. Dual-wheel casters in multi-surface for any floor surface.

Materials

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CTB117. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric only tests such as CTB117. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Lyric LT meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Lyric LT is warranted for multiple shifts and users up to 400 lbs.

OPTIONS — LARGE & TALL

Chair Types:
- **CLL** Large & Tall

Back:
- **ML** Mesh Large & Tall
- **UL** Upholstered Mesh Large & Tall

Wherever they are, invite visitors to sit in style with options like an upholstered or mesh back, adding comfort and style to any location.

KEY FEATURES

The waterfall seat front reduces pressure points and the intuitive back design offers built-in lumbar support. Lyric side chairs can be stacked up to four high.

MODELS AND OPTIONS

Lyric side chair models with back types in mesh or upholstered mesh, and in two frame colors. Side chairs feature arm models with casters or glides.

Glides are available in nylon, nickel-plated, or felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces. The versatile multi-surface casters are designed for use on hard or soft surfaces.

Chairs ship up to three per carton to minimize waste.

MATERIALS

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CTB117. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric only tests such as CTB117. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Lyric side chairs are warranted for users up to 300 lbs.

Lyric multi-purpose chairs go with the flow of your business. They're light, yet durable, so you can easily shift from one meeting to the next. Stow some away for the department lunch and learn. Then pull more off a stack to set up for the all-company awards celebration. Choose a bright shell color to create a bold look, or play it safe with a neutral color that blends seamlessly with your space. For whatever awaits, write the next line with Lyric, the family of chairs that fit everywhere.

KEY FEATURES

The perforated back on Lyric multi-purpose chair provides ventilation and distributed support. The waterfall seat front reduces pressure points and the intuitive back design offers built-in lumbar support.

MODELS AND OPTIONS

Arm and armless models available. Shell color options from sophisticated to playful and leg options from sled-base to four-legged with casters or glides.

Glide options include nylon, polycarbonate, nickel-plated, or felt. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces.

Multi-surface casters are also available on four leg models and are designed for use on hard or soft surfaces.

Lyric 4-Leg Multi-Purpose chairs offer the ability to stack up to four chairs high on the floor.

Lyric Wire Stacker Multi-Purpose chairs offer the ability to stack up to ten high on the floor.

Chairs ship up to four per carton to minimize waste. Model numbers and prices are per chair.

Lyric multi-purpose chairs are warranted for users up to 300 lbs.

Reference Page

Mimeo seating from Allsteel is designed to move with you. Created for today's active workplace, active workstyles, and active sitting, Mimeo is responsive and supportive of your every move. It hugs you. Embraces you. Envelops you. No matter your task. No matter your size or shape. Mimeo becomes one with you.

Designed in partnership with Bruce Fifield of Studio Fifield, Milan, Italy

Visually moving.
Mimeo's distinctive design and smart use of materials make a strong visual impact. It's appropriately scaled to impress and inspire across an open floorplan without overwhelming the environment. Comfortably moving from one space to the next, it brings style and character wherever it's used.

Always the right fit.
Mimeo's lightweight and intuitive design adapts to any type of work you're doing. Experience immediate and lasting comfort for focused work, as well as in project rooms and open desking areas where activities change day to day or hour to hour. Mimeo is ideal for highly active and collaborative workstyles and enhances every space.

Uncompromised comfort and support.
Mimeo's enveloping shape and dynamic back maintain constant contact with you, reducing and evenly distributing pressure points across the entire frame. No matter how you sit or move, the weight-activated motion adjusts automatically. Your whole body is supported. And each user, regardless of size, shape, or posture, has the same supportive experience.

A new standard in weight activation
Mimeo's recline tension has been engineered to automatically adjust to the specific needs and body weight of each user without the need for manual adjustment.

The innovative weight-activated chair motion delivers the appropriate amount of tension for full recline, upright sitting, and every posture in between. As you effortlessly recline, the seat lifts your bodyweight, which modifies the amount of tension accordingly. The result is a personalized, balanced recline that allows for comfortable and healthy movement for any body, in any posture.

MIW-KWNO

MIS-KWNO

DESIGN FEATURES

Mimeo's innovative back-pattern design provides integrated lumbar support while accommodating every movement. The generous seat width and slightly curved arms invite unrestricted movement and comfort for all postures and body types. Mimeo is lightweight and easy to transport with an integrated back handle, bringing function to any space, effortlessly.

IntelliForm™ back technology

Exclusive technology combines the benefits of the compliant, polymer back with flex wings, supportive uprights, and the soft, breathable Mimeo mesh material. The innovative back design and carefully selected materials have been engineered to deliver personalized comfort for each user, even as they move and change postures. The polymer back is highly pliable, allowing the material to flex and move along with the user.

Optional adjustable lumbar support

Mimeo provides automatic lumbar support. To accommodate personal preference, an optional external lumbar support can be added at any time with 4" range of adjustment.

4D adjustable arms

Mimeo's open arm design moves with you as you recline to support your arms in a variety of postures. Adjustments in four directions allow support during work tasks, and the ability to position arms close to the body.

Fixed arms

Provide basic support for users engaging in a variety of tasks throughout the day. Arms come with protective black urethane arm pads. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Pneumatic seat height adjustment

Regulates height of work chair relative to the floor. Standard 5" of travel accommodates average to tall users. Stools offer 10" of travel.

Base and casters

Work chair bases are a five-star design. Dual-wheel casters are available in hard tread for carpet, or multi-surface for any floor surface.

Materials

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CTB117. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB117. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Mimeo meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Mimeo is warranted for multiple shifts and users up to 300 lbs.

Height-Adjustable Footring

Travels 8" to ensure users have comfortable support of their feet and legs. The footring has a 20" diameter.

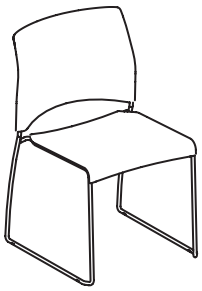
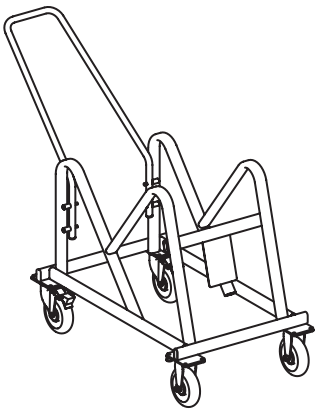
See pages 6-7 for COM guidelines.

Nimble is a high density stacking solution that is both extremely durable and surprisingly comfortable. Durable because we use the thickest wire frame in the industry. Comfortable because of the hidden front support bar, the contoured polypropylene back and seat along with the flexibility of the frame. The clean design will appeal to designers and facility managers alike.





MODELS AND OPTIONS

The Nimble chair is suited for team conference, cafeterias, auditoriums, or visitor's chair applications.

Nimble **stacks 36 chairs high** in 66"H by 50"D by 22"W (on a cart). A maximum of 12 chairs can be stacked without a cart with a dimension of 40"H by 33"D by 19½"W.

The **cart** is available in black epoxy paint finish with black casters. The cart angles chairs in a neat vertical arrangement that fits through doorways and can be moved by one person. Carts are shipped one per carton.

SEATS AND BACKS

The seat features a **waterfall** edge to *enhance circulation* and *reduce fatigue*. The backrest features contoured **lumbar** support to help *relieve stress in the spine*.

The **seat and backrest shells** are color-impregnated, washable polypropylene with U.V. inhibitors.

The polypropylene shells are easily **field replaceable** with simple hand tools for long life.

GLIDES

Nimble offers glide options for different types of flooring.

Polycarbonate glide is standard and well-suited for carpet and vinyl flooring.

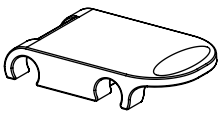
Stainless steel glide can provide extra protection when used on rough, gritty, or hard surfaces (concrete).

Felt-covered polycarbonate glide is recommended for wood, tile, or high-sheen gloss floor surfaces to protect the finish longer.

GANGING BRACKETS

Brackets securely connect Nimble chairs together for a neat, aligned row. The brackets are snapped in place over the chair glide (two brackets per chair). To connect the chairs, snap the bracket from one chair leg to the adjacent chair leg. To disconnect, unsnap the bracket. The chairs stack with the brackets in place.

Reference Page



Brackets are sold in packages of eight (for four chairs). The brackets can be added to Nimble chairs at any time.

FRAMES

The sturdy, **12mm wire frame** provides clean lines and excellent strength, ideal for high-density stacking.

The **chrome, black or silver epoxy powder-coated frame** is durable and scuff-resistant and complements any environment. **Powder coating** is a non-hazardous and solvent-free process which provides an environmentally friendly, baked-on, durable finish. **Chrome** is recommended for high-intensity stacking applications due to its chip-resistant properties.

SHIPPING

Nimble chairs **ship in cartons containing 4 chairs** to reduce packaging waste.

STANDARDS

Nimble meets the requirements set forth in ANSI/ BIFMA X5.1-2011. Nimble is warranted for users up to 300 lbs.

All Nimble models meet CTB133 fire code standards.

Seating — Work/Stool

Reference Page

With two frame finishes and six mesh color options that allow you to create your own aesthetic, Quip acts as a clever commentary on your company's personality.

Exceed expectations, not your budget.

Quip is the prize fighter of work chairs and work stools. This is a hard-working, no-nonsense chair that supports you through heads-down work, lunch breaks, and whatever else the day brings.

All comfort. No fuss.

Easy-to-use adjustments, including seat depth, make Quip a comfortable sit.

1. Height-adjustable arms adjust side-to-side and front-to-back. Fixed arms and armless options are also available.
2. Intuitive standard controls include height adjustment, tilt tension, tilt lock, and seat depth, an adjustment that customizes the chair to your body.
3. Lumbar support has been engineered into the back. Optional lumbar support allows users to adapt the chair to their needs with minimal effort.

DESIGN FEATURES

The jack-of-all-trades functionality you need.
The attention-commanding look everyone loves.
Quip wraps it all up in one smart investment.

Frame finishes

A Black or White finish pairs with any of the mesh and upholstery color options for a stylish chair.

Mesh and upholstery colors

From playful to traditional and every stop in between, there's a color combination that fits your space. You can even mix and match mesh and upholstery colors to get the exact look you want.

3D Adjustable arms

3D adjustable arms adjust up and down with armpads that adjust side-to-side and front-to-back to allow support during work tasks.

Fixed arms

Provide basic support for users engaging in a variety of tasks throughout the day. Fixed arms limit adjustability but provide consistent aesthetics in conference room settings.

Optional adjustable lumbar support

Adjustable lumbar support to accommodate personal preference. An optional external lumbar support can be added at any time.

Pneumatic seat height adjustment

Regulates height of work chair relative to the floor. Standard 5" of travel accommodates average to tall users. Stools offer 10" of travel.

Base and Casters

Work chair and stool bases are a five-star design. Dual-wheel casters are available in hard tread for carpet, or multi-surface for any floor surface.

Materials

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CTB117. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB117. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.
- Quip meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013. Quip is warranted for multiple shifts and users up to 300 lbs.

Height-Adjustable Footring

Travels 8" to ensure users have comfortable support of their feet and legs. The footring has a 20" diameter.

Relate combines everything you want into a single collection of seating. A synchronous mechanism and a unique pivoting back provide exceptional ergonomics for more people at more tasks. Active adjustments allow you to control and customize your seating tension and support relative to any task. Replaceable high-wear parts encourage you to repair rather than replace your chairs. And, the full line of models makes coordinating office seating simple.

KEY FEATURES

Relate's Body Adaptive Control™ combines a weight-sensing synchronized tilt mechanism with a pivoting back, resulting in improved pressure distribution, superior back support, and movement for healthy sitting.

Synchronized Tilt

The synchronized tilt motion keeps the user's head level when reclining to improve mental focus and productivity, while reducing neck and eyestrain.

Pivoting Back

The position of the pivoting back aligns with the natural position of the spine. This alignment keeps the spine supported in its proper curvature, which increases comfort. The adaptive, pivoting motion provides continuous back support while encouraging movement. Movement while sitting replenishes the spinal discs with nutrients, which reduces fatigue and keeps discs healthy.

Quick Tension™ Lever

Features 5 settings to quickly adjust from low to high tension. Allows for frequent adjustment throughout the workday to provide custom support for different tasks.

Height-Adjustable Lumbar Support

Allows users to adjust lumbar support anywhere within a 4" range on upholstered and mesh work/conference chairs. Lumbar support on mesh chairs can be adjusted asynchronously.

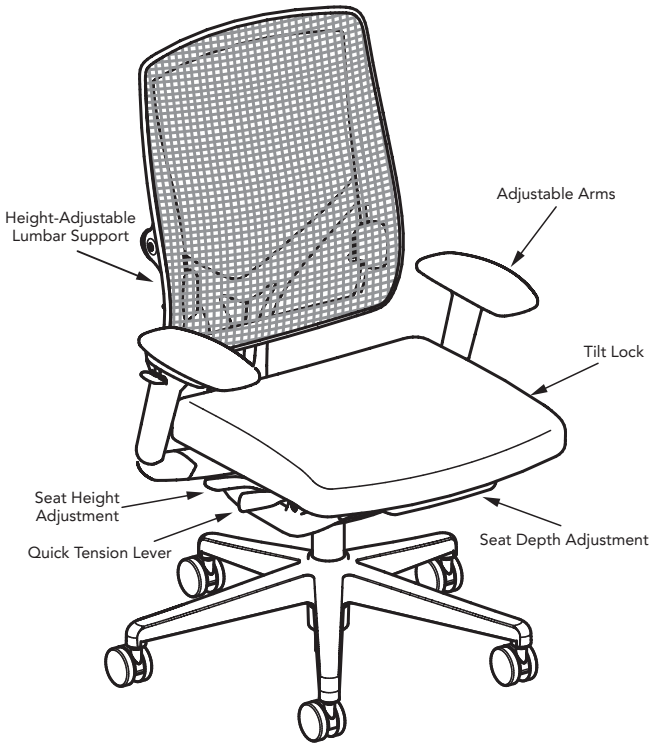
Pneumatic Seat Height Adjustment

Regulates height of chair relative to the floor.

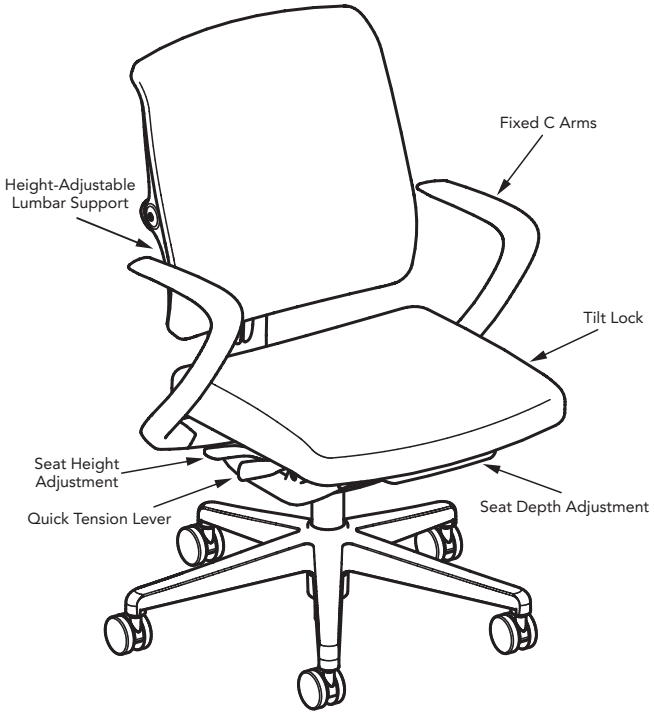
- Standard cylinder with 5" of travel accommodates average or tall users.
- Optional short cylinder with 3½" of travel keeps chair closer to the floor for shorter users, allowing all models to meet BIFMA G1-2002 solutions for VDT users.

Seat Depth Adjustment

Adjusts from front-to-back, within a 3" range, to accommodate different leg lengths.



RL-MHW — Mesh High-Back



RL-UHC — Upholstered High-Back

Reference Page

Fully Adjustable Arms
Arms are fully adjustable in height, width, depth, and can pivot to provide optimal support. Pivot the front of the arm pads inward to move in closer to your desk and offer support while working.

Adjustable Arms
Adjust in height, width, and depth for optimal support of elbows and shoulders while keyboarding or conferencing.

Fixed C Arms
Provide basic support for people who face a varied workday. Fixed arms limit adjustability and maintain aesthetics in conference room settings. Cast aluminum fixed C arms are available in polished aluminum or powder-coated finishes to match the frame color.

DESIGN FEATURES
Relate seating is engineered to last a lifetime, simplify maintenance, and reduce costs.

Base/Casters
Base is composite five-star structure. Specific models are available in polished aluminum. Dual-wheel casters feature hard tread for carpeted floors or soft tread for smooth floors.

Link Mesh
Relate's Link Mesh is a leno weave with a polyester elastomeric and a polyester fill yarn. This construction provides responsive, conforming back support and an open, airy aesthetic. Link Mesh is 100% recyclable.

Materials
- All upholstery foams are **CFC-free**.
- All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

Relate meets the requirements set forth in ANSI/ BIFMA X5.1-2011 and BIFMA G1-2013. Relate is warranted for multiple shifts and users up to 300 lbs.

Relate work chairs with adjustable arms ship knocked down.

OPTIONS — RELATE WORK/CONFERENCE:
Versions include High-Back models in mesh or upholstery with adjustable arms, fixed C arms, or without arms.

Back Type:
- **M** Mesh (only available in High-Back)
- **U** Upholstered

Overall Size:
- **H** High-Back

Armrests:
- **P** Fully Adjustable Arms
- **W** Adjustable Arms
- **C** Fixed C Arms
- **A** Armless

Pneumatic Cylinder:
- **2** Standard, allows 5" of travel
- **3** Short, 3½" of travel to meet BIFMA G1-2002

Casters:
- **0** 2½" Black Dual-wheel Hard Tread for carpet
- **1** 2½" Black Dual-wheel Soft Tread for smooth surfaces ($60 extra)

Lumbar:
- **L** Height-Adjustable

Aluminum Option: (Aluminum models only — see pages 120-121)
- **A1** Aluminum Base

Fixed C arm Option:
- **A3** Aluminum Base and Aluminum Fixed C Arm (add $153)

Aluminum Finish:
- **PAL** Polished Aluminum (Aluminum models only)

Frame Color:
- **CBK** Charblack
- **T** Titanium (only available on Mesh Back models) (add $40)

Mesh Color: (for Mesh Backs Only)
Available on Charblack (**CBK**) *frames*
- **LKM01** Carbon
- **CM21** Clay
- **CM30** Lime

Available on Titanium (**T**) *frames*
- **LKM01** Carbon
- **CM28** Navy
- **CM23** Platinum
- **CM29** Taupe

Upholstery:
See pages 12-14 for other upholstery selections.
See pages 18-19 for colors and codes

NOTE: Mesh and upholstery work/conference chairs feature upholstered seats.

- Features and adjustments on Relate models:
  Synchro-Tilt, Pivot Back, Seat Depth, and Pneumatic Adjustment.

(See page 160 for COM pricing on Grades 9-22)

Reference Page

Relate offers a full line of seating in complementary finishes making it simple to coordinate seating for the entire office. The Relate work stool is the perfect solution for anyplace where work happens at a standing height position. Relate work stools feature all of the same intuitive, ergonomic adjustments as the Relate work/conference chair.

KEY FEATURES

Relate's Body Adaptive Control™ combines a weight-sensing synchronized tilt mechanism with a pivoting back, resulting in improved pressure distribution, superior back support, and movement for healthy sitting.

Synchronized Tilt

The synchronized tilt motion keeps the user's head level when reclining to improve mental focus and productivity, while reducing neck and eyestrain.

Pivoting Back

The position of the pivoting back aligns with the natural position of the spine. This alignment keeps the spine supported in its proper curvature, which increases comfort. The adaptive, pivoting motion provides continuous back support while encouraging movement. Movement while sitting replenishes the spinal discs with nutrients, which reduces fatigue and keeps discs healthy.

Quick Tension™ Lever

Features 5 settings to quickly adjust from low to high tension. Allows for frequent adjustment throughout the workday to provide custom support for different tasks.

Height-Adjustable Lumbar Support

Allows users to adjust lumbar support anywhere within a 4" range on upholstered and mesh work stools. Lumbar support on mesh work stools can be adjusted asynchronously.

Pneumatic Seat Height Adjustment

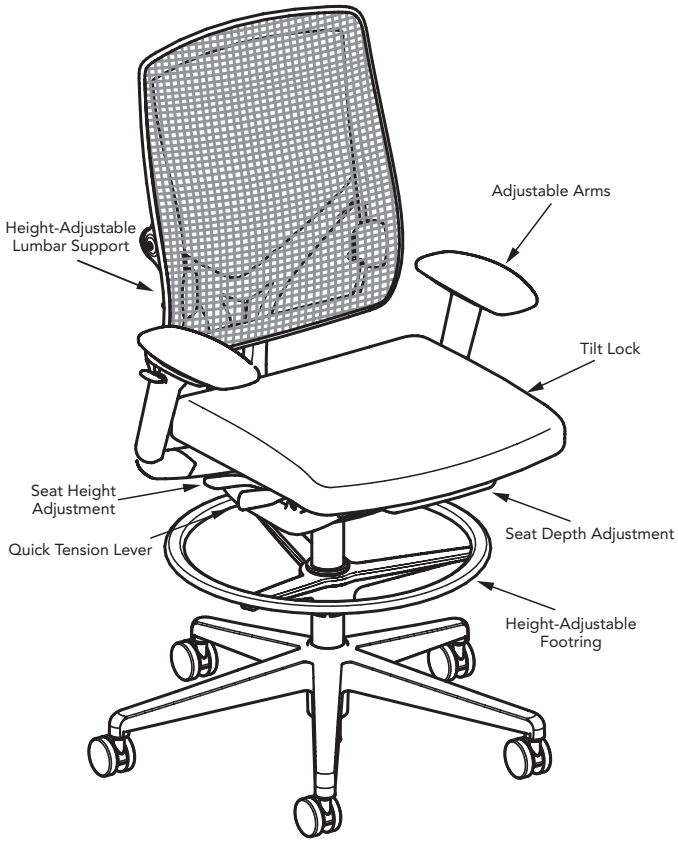
Regulates height of stool relative to the floor. Includes extended range height pneumatic cylinder with 10" of vertical travel.

Seat Depth Adjustment

Adjusts from front-to-back, within a 3" range, to accommodate different leg lengths.

Height-Adjustable Footring

Travels 8" to ensure users have comfortable support of their feet and legs. The footring has a 20" diameter.



RLS-MHW — Mesh High-Back

Fully Adjustable Arms
Arms are fully adjustable in height, width, depth, and can pivot to provide optimal support. Pivot the front of the arm pads inward to move in closer to your desk and offer support while working.

Adjustable Arms
Adjust in height, width, and depth for optimal support of elbows and shoulders while keyboarding or conferencing.

Fixed C Arms
Provide basic support for people who face a varied workday. Fixed arms limit adjustability and maintain aesthetics in conference room settings. Cast aluminum fixed C arms are available in powder-coated finishes to match the frame color.

DESIGN FEATURES
Relate seating is engineered to last a lifetime, simplify maintenance, and reduce costs.

Base/Casters
Base is composite five-star structure. Dual-wheel casters feature hard tread for carpeted floors or soft tread for smooth floors.

Link Mesh
Relate's Link Mesh is a leno weave with a polyester elastomeric and a polyester fill yarn. This construction provides responsive, conforming back support and an open, airy aesthetic. Link Mesh is 100% recyclable.

Relate multi-purpose side chairs provide an ideal solution for busy work areas such as training rooms, gathering areas, informal conferencing, cafés, and more. With a stackable design and pivoting back, Relate side chairs provide the perfect combination of versatility and unexpected comfort.

MODELS AND OPTIONS

Relate offers side chair models with **back types** in mesh, upholstery, and wood in three frame colors.

Side chairs feature **arm and armless models** with casters or glides.

Glides are available in nylon, nickel-plated, or felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces.

Multi-surface casters are also available.

Chairs ship up to two per carton to minimize waste.

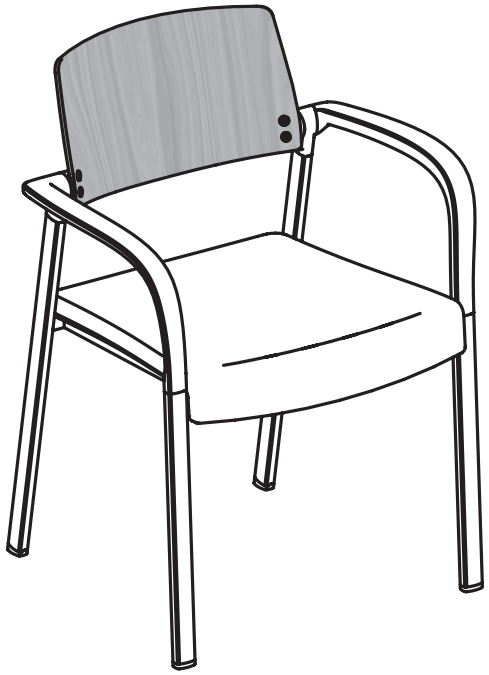
CONSTRUCTION

Steel frames and structural moldings create a durable design that performs in a variety of environments.

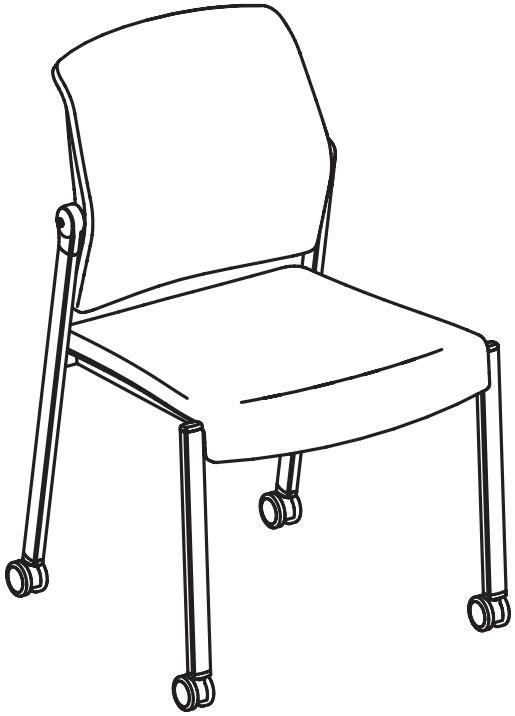
Seat and back upholstery are easily field replaceable allowing users to extend the lifecycle of the chairs.

Multi-purpose side chairs **stack up to 4-high** on the floor.

Mesh chairs feature Link™ Mesh. **Link Mesh** is a leno weave with a polyester elastomeric and a polyester fill yarn. This construction provides responsive, conforming back support and an open, airy aesthetic. Link Mesh is 100% recyclable.



RLM-WUGO — Wood Back and Upholstered Seat



RLM-UUCA — Upholstered Back and Upholstered Seat

Reference Page

UPHOLSTERY AND CONTOURING

Relate multi-purpose side chairs feature a pivoting back that provides unexpected comfort in any application. The **pivoting back** provides support while encouraging movement that makes for healthy sitting. The **backrest** features a contoured lumbar support to help relieve stress on the back. Added movement and support allow the Relate multi-purpose side chair to go from project conference rooms to teaming areas to training rooms with ease.

The upholstered seat features a generous 2" of high-resiliency molded foam padding for comfort and long-term support.

All upholstery foams are **CFC-free**.

All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.

Flammability code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

Relate meets the requirements set forth in ANSI/BIFMA X5.1-2011. Relate side chairs are warranted for users up to 300 lbs.

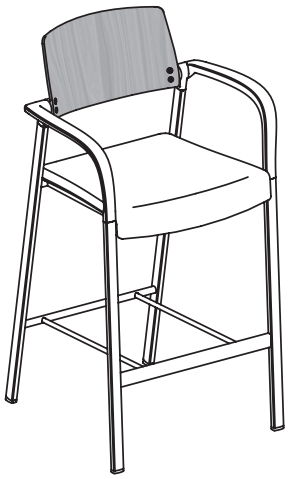
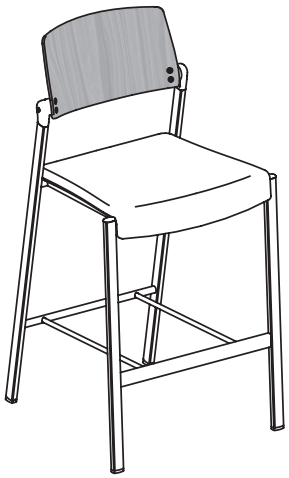
Relate 4-Leg Stools are the perfect solution for any application where people prefer a standing height position such as cafés, standing height workstations, touchdown areas, and coffee bars. Similar to the side chair, Relate 4-Leg Stools feature a pivoting back for exceptional comfort and support.



RLC-WUGO — Wood Back



RLC-WUGA — Wood Back

MODELS AND OPTIONS

Relate 4-Leg Stools are available with mesh, upholstered or wood backs. Four-legged stools feature arm and armless models with glides.

Glides are available in nylon, nickel-plated, or felt options. Nylon glides are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces.

CONSTRUCTION

Steel frames and structural moldings create a durable design that performs in a variety of environments.

Seat upholstery is easily field replaceable allowing users to extend the lifecycle of the chairs.

UPHOLSTERY AND CONTOURING

Relate 4-Leg Stools feature a pivoting back that provides unexpected comfort in any application. The **pivoting back** provides support while encouraging movement that makes for healthy sitting. The **backrest** features a contoured lumbar support to help relieve stress on the back.

The upholstered seat features a generous 2" of high-resiliency molded foam padding for comfort and long-term support.

All upholstery foams are **CFC-free**.

All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.

Flammability code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

Relate meets the requirements set forth in ANSI/BIFMA X5.1-2011. Relate four-legged stools are warranted for users up to 300 lbs.

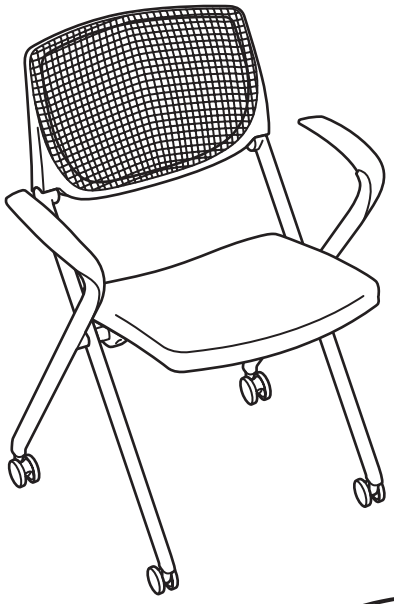
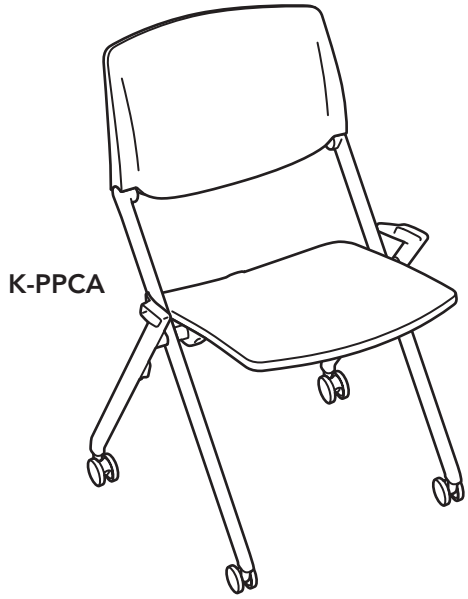
Reference Page

Seek is a multi-purpose chair designed for today's ever-changing corporate environments that require durability, versatility, and beauty. Its light-weight mobile design is ideal for multi-purpose settings such as adjunct teaming areas, conference rooms, classrooms, training rooms, and cafés.

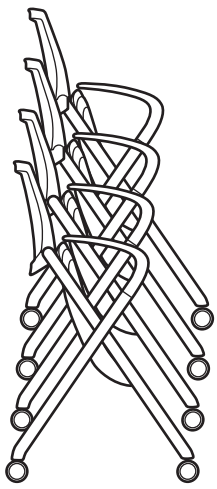
The idea has always been to provide seating that one can sit in...not on. Seek achieves this with a deceptively simple design that conforms to the shape and movement of each user's body. Its pivoting back allows for natural shifts in posture while intuitively distributing lumbar support. The contoured seat reduces pressure points and evenly distributes weight for long-term comfort. So sit back, relax, and let Seek do all the work.

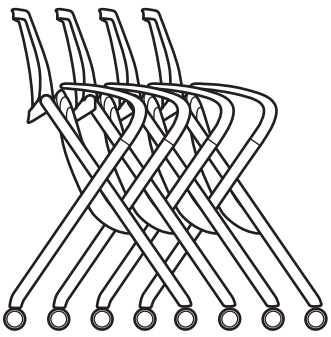


K-MUCO



K-PPCA





MODELS AND OPTIONS

With Seek, extended periods of sitting are refreshingly comfortable. Designed to move with the body and minimize pressure points, Seek conforms to each user's body movement, so no matter how they sit — or how long they stay — they stay comfortable.

Weight-assisted pivot back technology intuitively provides balance and lumbar support for ergonomic recline.

Contoured seat design distributes weight evenly, stabilizing the sitting bones during forward and reclined comfort. Universal fitting, Seek comfortably accommodates 95% of users.

Arm and armless models available. The curved shape of the arms accommodates differences in elbow height. The downward curve helps when approaching worksurfaces.

Casters or glides are available. Glide options include nylon, nickel-plated, or felt. The versatile multi-surface casters are designed for use on hard or soft surfaces.

Seek offers the ability to stack, to nest, and to nest the stacks for optimum space efficiency. The seat folds up so multiple chairs nest together like grocery carts. Four nested chairs can move or store together in a discrete 37-inches of space. Each additional nested chair adds 5⅛" of depth. Multiple chairs can stack up to four high in a space of 53"H x 28"W x 22"D. Each additional stack of nested chairs adds 15" of depth.

A Seek stack height of 4 chairs is recommended for storage density that allows the stacks to nest together. A maximum stack height of 6 chairs should not be exceeded when transporting the stacks of chairs.

Chairs ship two per carton to minimize waste. Model numbers and prices are per chair.

Reference Page

CONSTRUCTION

The solid construction meets or exceeds industry standards for performance. Seek's flexible molded-polymer backrest facilitates heat-reducing airflow. Optional mesh back lets light and air through for added comfort.

Seek's polymer shells are made from recyclable color-matched polymers with UV resistance to preserve colorfastness and ensure long-term durability. Allsteel paint finishes (for frames) are formulated for optimum hardness and chip resistance.

Seek meets the requirements set forth in ANSI/BIFMA X5.1-2011. Seek is level®2 certified. Seek is warranted for multiple shifts and users up to 300 lbs. Its lightweight construction makes it easy to move.

Allsteel fabrics and foam meet requirements for CAL TB117-2013. Contact Allsteel Customer Support for CTB133. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

Svelte is a modern, multi-functional office chair that brings refined, yet affordable, sophistication across a variety of applications. Sophistication shouldn't have to be expensive, and quality can be affordable. Svelte gracefully alleviates the disparity between low-cost and luxury with an elegant design that possesses an aesthetic as slender as the stack of cash to afford it. Combine that with its ability to consistently perform across almost any office setting, and it only adds to its value. Svelte meets the requirements set forth in ANSI/BIFMA X5.1-2013. Svelte is warranted for multiple shifts and users up to 300 lbs.

Reference Page

Pull up a seat and take a few minutes for a quick meeting or settle in for an extended conversation. Take-5 is a simple, light and inviting chair or stool that accommodates the needs of an office while offering a highly designed, residential appeal. Specify Take-5 with a cushion for areas that accommodate longer meetings, or for a pop of color in your space.

MODELS AND OPTIONS

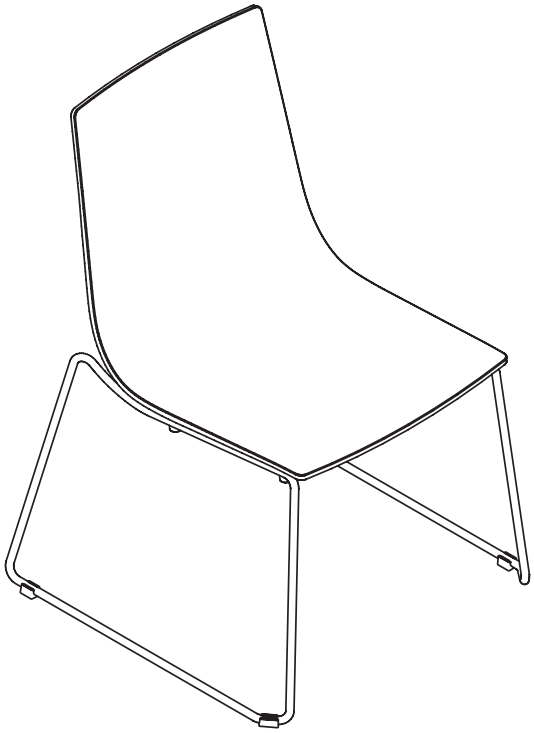
Take-5 is available as a chair or stool with a bent plywood shell with an optional upholstered seat cushion.

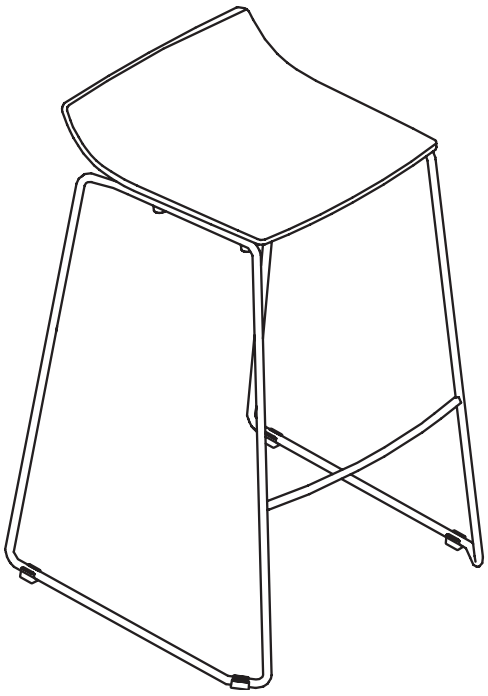
APPLICATION

Take-5 is ideal in both office and higher education in spaces such as cafés, open areas, dedicated collaboration rooms, small conference and huddle rooms, neighborhood areas, libraries, commons, and as an office side chair.

KEY FEATURES

The shell on Take-5 is constructed of bent plywood with a painted or chrome frame. An optional upholstered cushion can be added to top the seat. It stacks up to 6 high for easy storage. The sophisticated wire frame of Take-5 is durable yet lightweight, so it is easy to move from space to space.





Reference Page

MATERIALS AND FINISHES

The optional seat cushion is fully upholstered. Take-5 is available in four stain colors of stratawood veneer.

- All upholstery foams are CFC-free.
- All COMs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 15-17. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete chair to supply a certificate of compliance with CTB133.

NOTE: Take-5 non-cushion models meet CTB133 / Boston Fire Code / NY/NJ Port Authority.

Take-5 is warranted for users up to 300 lbs.

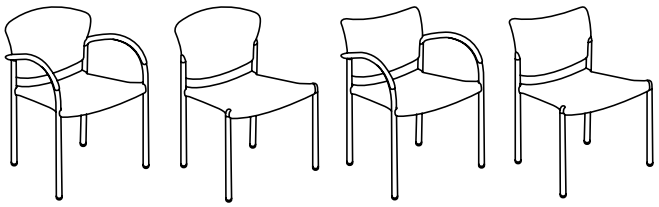
Reference Page

Tolleson Side chairs are versatile as they can move from office to conference room to waiting area applications. The menu of back shapes, finishes, and arm and armless options change the appearance, but the excellent comfort and consistent durability remain throughout.

Designed by Greg Saul and Tom Tolleson of Tolleson/Design.



Keystone | Keystone Armless | Square | Square Armless

MODELS AND OPTIONS

Tolleson side chair models feature a generous and inviting **scale** suited for waiting areas, conference, office, cafeteria or guest chair applications.

The **two backrest shapes** create versatile options which can coordinate with other Allsteel seating lines and any environment. Even though the backrest shape changes the comfort stays consistent.

Arm and armless models are available. Armcaps are wide to support the arm. The curved shape accommodates differences in elbow heights. The arm curves downward to help approach worksurfaces.

The **arm caps** are washable, impact-resistant nylon. Arm caps are easily field replaced using two machine screws per arm cap.

Armless models feature a metal cap which finishes the ends of the tubes.

Glides are standard with nickel-plated or nylon options. Nickel-plated glides are recommended for carpeted applications. The plastic surface of the black nylon glide is recommended for other surfaces or damp environments.

Casters are available on armed models to add mobility for training rooms and multi-purpose applications.

Chairs ship up to two per carton to minimize waste. Model numbers and prices are per chair.

CONSTRUCTION

The construction meets or exceeds industry standards for performance. The strong, 1" round, 16 gauge steel tubular frame construction provides exceptional strength and durability suitable for waiting areas and office applications. All connections are **steel-to-steel**.

The **steel tubular frame** extends the length of the armrest for superior strength while the chair is being lifted or stacked. The chair is lifted by the steel frame and not just an arm cap.

The backrest features a double-shell plywood construction with compound contouring for lumbar support.

The **seat** features an injection molded **polypropylene** seat which surrounds the tubular frame. The bottom of the seat is always black. It features a smooth profile so the chair can be stacked.

Arm and armless chairs can be **stacked up to five high** on the floor. On the cart, chairs can be stacked up to eight high.

UPHOLSTERY AND CONTOURING

The **outer back shell** is upholstered in a fabric to match the inner seat and back for a tailored appearance.

The **seat** features a generous 2½" of high-resiliency molded foam padding for comfort and long-term support. The **backrest** features contoured lumbar support to help relieve stress in the spine.

All upholstery foams are **CFC-free**.

All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.

Flammability code compliance of Allsteel textiles and seating is listed below. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB 117. Allsteel must test a complete chair to supply a certificate of compliance for CTB 133.

Tolleson Side meets the requirements set forth in ANSI/BIFMA X5.1-2011.

Tolleson side chair with glides is warranted for users up to 300 lbs. Tolleson side chair with casters is warranted for users up to 225 lbs.

Seating — Work

Reference Page

Trooper is a fit for whatever assignment you face. It allows one visual design to be used to meet a variety of use patterns and price points.

POSTURE CONTROL SYSTEMS — to fit the worker to the task

HIGH-PERFORMANCE — ASYNCHRONOUS MECHANISM

Recommended for computer-intensive work environments.
The multifunctional asynchronous mechanism allows the user to independently position and lock the angle of the back relative to the seat, and the angle of the seat relative to the floor. Free-floating tilt and infinite locking within a fixed range can both be achieved providing fine-tuned adjustability. Adjustable tension modifies the level of resistance to suit the user. The forward angle adjustment allows users to transfer some of their body weight to the floor, and opens the angle of the legs relative to the torso for improved circulation to the legs and a welcome alternative in posture for long-term computer use.

PROPORTIONAL CONTROLS — to fit the chair to the worker

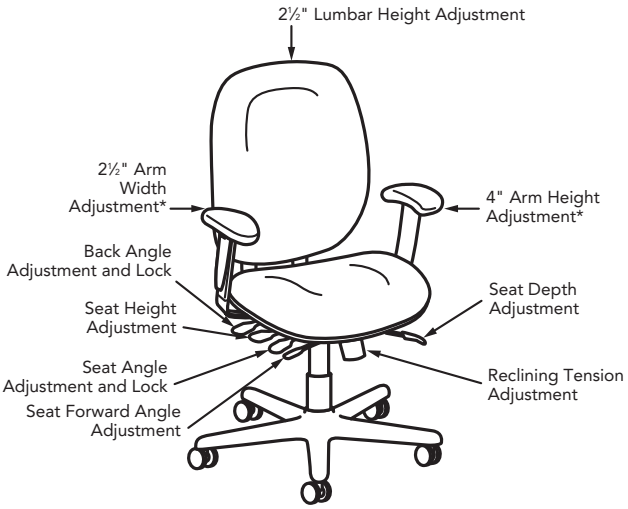
Quick-adjust back height

Positions the **lumbar** support in one of five positions within a 2½" range on all Trooper models. Can be adjusted easily from seated position.

Pneumatic seat height adjustment

Regulates height of chair relative to floor.

- Standard 5" travel accommodates average or taller users.
- **Optional 3" travel** keeps chair closer to floor for shorter users.



TR-HWM

* Arm Width and Height Adjustment on select models.

Seat depth
Allows seat cushion to travel front-to-back, and locked within a 2½" range. (**Active Ergonomic** – 2"and **High-Performance** – 2½"models.)

Adjustable arms
Height and manual width adjustments position elbows and shoulders for optimal support during keyboarding or conferencing while providing ease of entry/exit.

DESIGN FEATURES

Deeply contoured cushions
- Back and seat are formed of opposing compound curves to provide firm lumbar support and a subtle "wraparound" effect that gently hugs the body. Inner support is molded from polypropylene. These molded-in contours provide optimum support.
- The detailed back rest is offered in High-Back and Mid-Back styles, suitable for use by upper management, technical/professional staff, or administrative personnel.
- Molded polymer outer back is available upholstered or in textured matte black.
- **Seat cushion** features a **waterfall** front edge that promotes circulation to the lower legs.

Base/casters
Base is a composite five-star structure. Dual-wheel casters feature hard tread for carpet, or soft tread for smooth surfaces.

Materials
- All upholstery foams are **CFC-free**.
- All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB 117. Allsteel must test a complete chair to supply a certificate of compliance with CTB 133.

Trooper meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013.

Trooper Asynchronous and Synchro-Tilt models are warranted for multiple shifts and users up to 300 lbs.

OPTIONS — TROOPER WORK CHAIR:

Seating — Large & Tall

Reference Page

The Trooper Large & Tall model is designed for those larger or taller individuals expecting great design and functionality in a work chair. Truly making Trooper the right chair for every situation.....and every body.

POSTURE CONTROL SYSTEM —

Swivel-Tilt

An economical solution, suited for larger or taller people up to 500 lbs, who perform a variety of tasks. With swivel-tilt control, the reclining pivot point is directly above the center stem. Tilt lock secures the chair in an upright position for computing.

PROPORTIONAL CONTROLS — to fit the chair to the worker

Quick-adjust back height

Positions the **lumbar** support in one of five positions within a 3" range. Can be adjusted easily from seated position.

Pneumatic seat height adjustment

Regulates height of chair relative to floor.

- Standard 5" travel accommodates average or taller users.
- Optional 3" travel keeps chair closer to floor for shorter users.

Seat Adjustment

Allows seat cushion to manually adjust front to back from 17" to 19".

Adjustable arms

Height and manual width adjustments position elbows and shoulders for optimal support during keyboarding or conferencing while providing ease of entry/exit.

DESIGN FEATURES

Deeply contoured cushions

- Back and seat are formed of opposing compound curves to provide firm lumbar support and a subtle "wraparound" effect that gently hugs the body.
- The detailed back rest is suitable for use by upper management, technical/professional staff, or administrative personnel.
- Molded polymer outer back is available upholstered or in textured matte black.
- **Seat cushion** features a **waterfall** front edge that promotes circulation to the lower legs.

Base/casters

27" diameter 5-star composite base provides greater strength and stability than standard bases. Large 75mm dual-wheel casters work on any floor surface.

Materials

- All upholstery foams are **CFC-free**.
- All **COMs/COLs** must be approved for upholsterability or applicable fire code compliance prior to order entry. See COM ordering instructions on pages 6-7.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 12-14. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB 117. Allsteel must test a complete chair to supply a certificate of compliance with CTB 133.

Trooper Large & Tall meets the requirements set forth in ANSI/BIFMA X5.1-2011 and BIFMA G1-2013.

Trooper Large & Tall models are warranted for multiple shifts and users up to 500 lbs.

Introducing Vicinity, the newest addition to Allsteel's Social Collaborative collection of furniture.

Your next great idea happens here.

The cafeteria has evolved from a small, back-of-office nook to a vibrant, front-and-center space for planned and impromptu meetings, or for giving guests a taste of your company's culture. Vicinity meets these needs with the flexibility to fit more spaces around your office and a style that's distinctively yours. It's perfect for creative breaks, standing meetings, relaxed eating, or heads-down work.

The best ideas are born from connection. Vicinity gives you the space you need to discover what's possible.

Choose from multiple color and finish combinations to fit the style of your office.

Simple, clean lines serve as the calling card for your company's personality.

Lightweight pieces are easy to move and utilize for whatever your office needs.

MODELS AND OPTIONS

Vicinity seating is available as seated, counter, or standing heights, with formed wire-frame or tube legs. Vicinity seating is produced using material-efficient processes; little waste is generated during the manufacture of these chairs and what is generated can be recycled into new components. The seating bases all contain at least 25% post-consumer recycled content.

Glides are available in nylon or polycarbonate, nickel-plated or steel, and felt or rubber. Nylon glides or polycarbonate are recommended for hard surfaces, commercial carpet, and damp environments. Nickel-plated and steel glides are recommended for carpet. Felt glides are recommended for wood, tile, or high-sheen floor surfaces.

Vicinity offers 8 different polymer shell colors and nine frame finish colors. 4-Leg and sled base chairs stack up to 10 chairs high in 44"H. Chairs ship up to four per carton to minimize waste. Model number and prices are per chair.

Vicinity meets the requirements set forth in ANSI/BIFMA X5.1-2017. Vicinity is warranted for multiple shifts and users up to 300 lbs.

	Bar Stool with Seat Pad	**CUBS-PGANOSP**	**$ 938**

*List price is for Grade 1 fabric

How to specify —

Select the Model Number from above.

1st Option:

Select the Glide:

4-Leg/Stool

- **0** Nylon for hard surfaces
- **1** Nickel for carpets (add $16)
- **2** Felt (add $16)
- **5** Rubber (add $16)

Sled Base

- **0** Polycarbonate
- **1** Steel (add $16)
- **2** Felt (add $16)

2nd Option:

Select the Frame Finish:

- **P71** Black
- **PJF** Bullseye
- **PJW** Designer White
- **POL** Chrome
- **P02** Flint
- **P8B** Night Bronze (not available on Lounge)
- **PJE** Pyrite
- **PR6** Silver
- **P8X** Solar Black
- **P8T** Titanium

3rd Option:

Select the Poly Shell Color:

- **BW** Brownstone
- **CP** Calypso
- **CR** Cherry
- **LA** Lava
- **RE** Regatta
- **TI** Titanium
- **WT** White
- **ZE** Zest

• **Available upholstery option**

- Allsteel fabrics and foam meet requirements for CTB117.
- Blank spaces indicate that a product has not yet been tested or that it failed.
- Contact Allsteel Customer Support for other flammability code approvals.

Reference Page

Jetty:Mod supports individual and group activities in cafes, atriums, and walkways while also influencing and directing circulation patterns. Its modern, modular, and can be modified to fit whatever the installation requires.

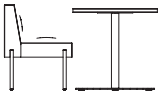
Jetty:Mod was designed to focus on work geometry and how to properly support you. Making sure to have proper sit depth and posture. There are two different versions or dimensions. The lounge version is 30" wide by 30" deep and you sit 18" off of the floor. This allows for more trust conversations to happen or to relax for the day. The work version is 24" wide by 24" deep and you sit 19.5" off of the floor. This will allow for a more upright position to do active work.

Lounge
18"H x 30"D x 30"W

Work
19.5"H x 24"D x 24"W

WORK GEOMETRY

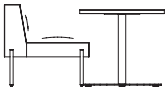
It is important to determine whether the clearances between work mode/lounge mode and table are large enough to allow for an individual's legs to be positioned under the table and yet not too large as to result in awkward upper body positions when using the worksurface.



WORK POSTURE & STANDARD HEIGHT TABLE

When specifying the work posture Jetty:Mod it is recommended to pair with standard height tables that provide 9"-10" of leg clearance.

Standard Table Height: 28"-29.75"



LOUNGE POSTURE & CONTINENTAL HEIGHT TABLE

When specifying the lounge posture Jetty:Mod it is recommended to pair with continental height tables that provide 8.5"-10" of leg clearance.

Continental Table Height: 25"-27.75"

MODELS AND OPTIONS

Jetty:Mod is comprised of seating, arms, tables, screens, legs and connectors that allow you to create an array of configurations.

The seating includes Ottomans, Single Seats and Backs, Half-Backs, Serpentine Ottoman and Serpentine Seat and Back units.

Arms include Tailored Arms, Box Arms and Bolster Arm.

Tables are connected or an accessory to the overall configuration. These include Connecting Tables, both full and half, Serpentine Tables, End Caps, Shared Arm, Tablet Table and Coffee Table.

Screens provide privacy in any space. There are 4 different lengths of screens that can be attached to seating and tables.

Legs and connectors coincide with the work or lounge version.

APPLICATIONS

This sofa system supports applications for private offices, work islands, booths, individual workspaces and banquettes.

MATERIALS

All COMs/COLs must be approved for upholsterability. See pages 6-7 for COM ordering instructions.

OPTIONS — SEATING

Description:
Ottoman — Straight or Serpentine
Seat and Back — Straight, Serpentine, Half Back or Corner

FSC Certified Wood:
FSC FSC Certified Wood

Seat Upholstery:
See page 178 for upholstery selections.

Back Upholstery:
See page 178 for upholstery selections.

OPTIONS — ARMS

Serpentine

*Rule: Serpentine units need to have a leg at each connection point wherever there is the biggest radius. At the smallest radius, you will need a leg every 2 units. Where there isn't a leg, you can use a serpentine in-line connector.

General Guidelines When Working With Jetty:Mod

SEATING

Corner Units - BPLCS, BPLCM, BPLWCS, BPWCM

- Corner unit is used to make an L-application and should not be used to end a run
- Corner unit needs to be specified with 2 corner post legs (BPLCRPL and BPWCRPL)

Calf Rest - BPLCR

- Calf Rest can only be used with the lounge version of Jetty:Mod
- It is recommended to placed at the front of the sofa unit it is being attached to, and should be placed either to the right or the left of the unit. This will depend on what the application is.
- Calf Rest is attached with 2 brackets to the bottom of the sofa unit, and then comes with 2 post legs that will go at the end to support

Serpentine Units - BPLSWS, BPLSWM, BPLSNS, BPLSNM, BPLSO, BPWSWS, BPWSWM, BPWSNS, BPWSNM, BPWSO

- Serpentine units need to have a leg at each connection point wherever there is the biggest radius. At the smallest radius, you will need a leg every 2 units. Where there isn't a leg, you can use a serpentine in-line connector.

See specifing examples below

What to Specify:
4 Serpentine Wide at Back (BPLSWS)
4 End Leg with Metal Cover (BPLELC)
4 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Connector 30 (BPSIC30)

What to Specify:
4 Serpentine Wide at Back (BPLSNS)
4 End Leg with Metal Cover (BPLELC)
4 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Connector 30 (BPSIC30)

What to Specify:
2 Serpentine Wide at Back (BPLSWS)
2 Single Seat and Back (BPLSS)
4 End Leg with Metal Cover (BPLELC)
2 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Leg 15 (BPLSIL15)
2 Serpentine In-Line Connector 15 (BPSIC15)

What to Specify:
2 Serpentine Wide at Back (BPLSNS)
2 Single Seat and Back (BPLSS)
4 End Leg with Metal Cover (BPLELC)
2 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Leg 15 (BPLSIL15)
2 Serpentine In-Line Connector 15 (BPSIC15)
Note: This can also be done using the work version

What to Specify:
4 Serpentine Wide at Back (BPLSWS)
1 Serpentine Connecting Table (BPCTO30)
4 End Leg with Metal Cover (BPLELC)
6 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Connector 30 (BPSIC30)

What to Specify:
4 Serpentine Wide at Back (BPLSNS)
1 Serpentine Connecting Table (BPCTO30)
4 End Leg with Metal Cover (BPLELC)
6 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Connector 30 (BPSIC30)

What to Specify:
2 Serpentine Wide at Back (BPLSNS)
2 Single Seat and Back (BPLSS)
1 Serpentine Connecting Table (BPCTO30)
4 End Leg with Metal Cover (BPLELC)
4 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Connector 15 (BPSIC15)

What to Specify:
2 Serpentine Wide at Back (BPLSWS)
2 Single Seat and Back (BPLSS)
1 Serpentine Connecting Table (BPCTO30)
4 End Leg with Metal Cover (BPLELC)
4 Serpentine In-Line Leg 30 (BPLSIL30)
2 Serpentine In-Line Connector 15 (BPSIC15)

HOW TO SPECIFY JETTY:MOD

EXAMPLE #1

- (3) BPLSS - Lounge Single Seat and Back
- (1) BPLB - Lounge Boster Arm
- (1) BPLBL - Lounge Box Arm Left
- (1) BPLBR - Lounge Box Arm Right
- (4) BPLEL - Lounge End Leg for Attaching
- (4) BPLSIC - Lounge Straight In-Line Connector

EXAMPLE #2

- (1) BPLSS - Lounge Single Seat and Back
- (1) BPLCR - Lounge Calf Rest
- (1) BPBSCR30 - Lounge Screen 30"
- (1) BPBSCR45 - Lounge Screen 45"
- (1) BPCT15 - Half Connecting Table 15" x 30"
- (1) BPTT - Swivel Tablet
- (4) BPLELC - Lounge End Leg with Metal Cover
- (2) BSSICC - Short In-Line Connector

Note: One pod is specified, multiply by 3 for total

EXAMPLE #3

- (10) BPLSWS - Lounge Serpentine Wide at Back
- (5) BPLCTO30 - Lounge Serpentine Connecting Table
- (4) BPLELC - Lounge End Leg with Metal Cover
- (23) BPLSIL30 - Lounge Serpentine In-Line Leg 30
- (5) BPSIC30 - Serpentine In-line Connector 30

EXAMPLE #4

- (2) BPLSS - Lounge Single Seat and Back
- (1) BPCT30 - Connecting Table 30" x 30"
- (4) BPLELC - Lounge End Leg with Metal Cover
- (4) BPLSIL - Lounge Straight In-Line Leg

EXAMPLE #5

- (6) BPLSS - Lounge Single Seat and Back
- (2) BPLB - Lounge Boster Arm
- (1) BPLTL - Lounge Tailored Arm Left
- (1) BPLTR - Lounge Tailored Arm Right
- (2) BPTT - Swivel Tablet
- (1) BPTE60 - Lounge End Cap 60"
- (8) BPLEL - Lounge End Leg for Attaching
- (8) BPLSIC - Lounge Straight In-Line Connector

EXAMPLE #6

- (6) BPLSS - Lounge Single Seat and Back
- (1) BPLSWS - Lounge Serpentine Wide at Back
- (1) BPLSNS - Lounge Serpentine Wide at Back
- (1) BPLCTO30 - Lounge Serpentine Connecting Table
- (2) BPTE30 - Lounge End Cap 30"
- (2) BPTS30 - Lounge Shared Arm
- (4) BPLEL - Lounge End Leg for Attaching
- (4) BPLSIC - Lounge Straight In-Line Connector
- (10) BPLSIL30 - Lounge Serpentine In-Line Leg 15
- (2) BPSIC15 - Serpentine In-line Connector 15

ARMS

Tailored Arms - BPLTL, BPLTR, BPWTL, BPWTR
- Tailored Arms can only be used at the end of the run, not in between units

Box Arms - BPLBL, BPLBR, BPWBL, BPWBR
- Box Arms can only be used at the end of the run, not in between units

Bolster Arms - BPLB, BPWB
- Bolster Arms can only be used in between units that have a seat and back. It is recommended to not be used with an ottoman

TABLES

Connecting Tables - BPCT30, BPCT24
- Connecting tables can go in between seating units and at the end of a run
- If a connecting table is in between 2 seat units, it will need 4 in-line legs (BPLSIL or BPWSIL) at each connection point between the units
- If a connecting table is placed at the end of a run, it will need 2 in-line legs (BPLSIL or BPWSIL) and then 2 end legs with a metal cover. You need a point of connection for the connecting tables

Half Connecting Tables - BPCT15, BPCT12
- Half connecting tables can go in between seating units and at the end of a run
- If a half connecting table is in between 2 seat units, it will need 2 in-line legs (BPLSIL or BPWSIL) at 2 of the connection points and the 2 short in-line (BSSICC) connectors at the other 2 connection points
- If a half connecting table is placed at the end of a run, it will need 2 short in-line connectors (BSSICC) and then 2 end legs with a metal cover. You need a point of connection for the half connecting tables

Serpentine Connecting Tables - BPCTO30, BPCTO24
- Serpentine connecting tables can go in between seating units and at the end of a run
- If a serpentine connecting table is in between 2 linear seat units, it will need 4 serpentine in-line legs (BPLSIL15 or BPWSIL15) at each of the connection points
- If a serpentine connecting table is in between 2 serpentine units, it will need 4 serpentine in-line legs (BPLSIL30 or BPWSIL30) at each of the connection points
- If a serpentine connecting table is in between 1 serpentine unit and 1 linear unit, the linear to serpentine will have a different leg compared to the serpentine to serpentine connection. You will need to specify 2 serpentine in-line legs (BPLSIL30 or BPWSIL30) and 2 serpentine in-line legs (BPLSIL15 or BPWSIL15)

Corner Connecting Tables - BPCCT30, BPCCT24
- Corner table is used to make an L-application and should not be used to end a run
- Corner table needs to be specified with 2 corner post legs (BPLCRPL and BPWCRPL)

Notched Tables - BPNT30, BPNT15, BPNT24, BPNT12
- When pairing legs with notched tables, follow same guidelines that are used for connecting and half connecting tables
- It is recommended that you put a tablet arm within the notches. Items that we do not recommend are bolster arm, arms and the shared arm

End Caps - BPTE30, BPTE60, BPTE24, BPTE48
- End caps should be used at the end of a run, connecting into the end legs for attaching (BPLEL or BPWEL)
- The longer end caps are used to span across two units that are back-to-back

Shared Arms - BPTS30, BPTS24
- Shared arms are recommended to be used in between 2 seat and back units (serpentine or linear)

Swivel Tablet - BPTT
- Swivel tablet can go at the end of the run or in between units (serpentine or linear)

Coffee Table - BPCT2445
- Coffee table should be used on its own as a stand alone coffee table

LEGS, CONNECTORS AND METAL PIECES

You will need to specify two legs or connectors at each connection point. For example, if you have a two-seat sofa, you would need to specify two in-line connectors where the sofa units meet and then four end legs (two at one end and two at the other end of the sofa).

Straight In-Line Connectors - BPLSIC, BPWSIC
- Straight in-line connectors are used to connect 2 linear units together, both seating and tables
- Swivel tablet, bolster arm and shared arm can be inserted into the in-line connectors

End Legs for Attaching - BPLEL, BPWEL
- End legs for attaching are used at the end of a run
- Tailored arms, box arms and tablet arm can be inserted into the end legs at the end of a run

End Legs with Metal Cover - BPLELC, BPWELC
- End legs with the metal cover are used at the end of a run where nothing will be inserted or attached to them

Corner Post Legs - BPLCRPL, BPWCRPL
- Corner post legs are to be used with corner seating and tables
- When corner units are used, 2 corner post legs will need to be specified

Serpentine In-Line Connector - BPSIC15, BPSIC30
- BPSIC15 should be used when connecting a linear unit to a serpentine unit
- BPSIC30 should be used when connecting a serpentine unit to a serpentine unit

Serpentine In-Line Leg - BPLSIL15, BPLSIL30, BPWSIL15, BPWSIL30
- BPLSIL15 and BPWSIL15 should be used when connecting a linear unit to a serpentine unit
- BPLSIL30 and BPWSIL30 should be used when connecting a serpentine unit to a serpentine unit

4 Unit Beam Connector - BP4UC
- The 4 unit beam connector can be used to connect 4 linear units together without having to put a leg in between
- This cannot be used with serpentine units

Short In-Line Connector - BSSICC
- Short in-line connector should be used when connecting a single seat and back unit to a half connecting table, and should be placed in between those units

Coat Hanger - BPCH
- The coat hanger can be placed on the back of seat and back, half back and serpentine units

SCREENS

Screens - BPBSCR30, BPBSCR45, BPBSCR24, BPBSCR36
- The 30" and 45" screens should be paired with the lounge version, and the 24" and 36" should coincide with the work version
- Screens are attached to the bottom of the seat and tables
- Screens can go on the back and sides of seating units. Screens can be attached to the back of the tables, but cannot attach to the sides of them.
- They cannot be used in between units

*COM Yardage is listed for total yardage/feet required for a model, with applicable yardage/feet for individual components listed.

Jetty:Mod electrical will be attached to the underside of the sofa. Electrical includes the Triplex system that has jumper kits, corded infeed, hardwire infeed and H-Connectors. Jumper kits, corded infeed and hardwire infeed are available at various lengths to support an array of configurations. Miki undermount units plugged into the Triplex system and placed at the front of the sofa. The Miki undermount power module has 1 simplex and 2 USB outlets.

It's the customer's responsibility to ensure that installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply meets all local and national electrical codes.

GUIDELINES WHEN WORKING WITH ELECTRICAL FOR JETTY:MOD

Miki Undermount - APWRMOD1UWM

- The Miki undermount consists of 1 simplex and 2 USB outlets
- Miki undermount power modules can be placed at the front of seat and table units. It cannot be placed where there is a support leg.
- 72" corded Miki undermount power modules can be specified on their own if the Jetty:Mod layout is placed along a wall with building power close enough to reach or within proximity of floor outlets.
- Miki can also be paired with the Triplex system to route a series of electrical components for larger Jetty:Mod configurations and/or if a hardwired in-feed is required/ desired.

Triplex Circuit 1 Jumper Kit - ATPKIT48, ATPKIT60, ATPKIT72

- Triplex Jumper Kits include 4-Trac Triplex Raceway available in lengths of 48", 60" and 72", conduit clamps and Triplex receptacle mounting bracket
- It is recommended to position the jumpers in the middle of the seat or table units that the electrical is going under

Triplex Circuit 2 Jumper Kit - ATPKIT482, ATPKIT602, ATPKIT722

- Triplex Jumper Kits include 4-Trac Triplex Raceway available in lengths of 48", 60" and 72", conduit clamps and Triplex receptacle mounting bracket
- It is recommended to position the jumpers in the middle of the seat or table units that the electrical is going under

Triplex Corded Infeed - ATPCIF48, ATPCIF72

- Triplex Corded Infeed includes a straight corded infeed with a straight 15 amp plug that is available in 48" and 72". Also available is an H-Connector with a mounting bracket.

Triplex Hardwire Infeed - ATPHWIF72

- Triplex Hardwire Infeed includes a straight hardwire infeed that is available in 72" and an H-Connector

Triplex H-Connector - ATPSPLIT

- H-Connectors are used to connector jumpers that will go in different directions whether that's a 90 degree turn or serpentine configurations

ELECTRICAL EXAMPLE 1 — L-SHAPE

- ATPCIF48 – 48” Triplex Corded Infeed (1)
- ATPKIT48 – 48” Triplex Circuit 1 Jumper Kit (2)
- APWRMOD1UWM – Miki Undermount (2)

• **Available upholstery option**

◆ **Available upholstery option with CTB133 approval — requires FC suffix added to model (FC extra, $ varies by series)**

- Allsteel fabrics and foam meet requirements for CTB117.
- Blank spaces indicate that a product has not yet been tested or that it failed.
- Contact Allsteel Customer Support for other flammability code approvals.

Reference Page

Designed in partnership with Chris Adamick, Recharge includes soft seating pieces and tables that can be integrated for private, public, or collaborative settings.

MODELS AND OPTIONS

Recharge seating is available in four different options: Pouf, Bench, Bench with Bolster, and Bench with Bolster and Screen. Bolsters are available as full width, half-width, and as corner units providing a large array of configurations.

Recharge Tables can stand alone or allow connection of seating components to create straight or 120-degree configurations. Power options are also available.

APPLICATIONS

Use Recharge as booths, micro-environments or bench seating in café areas, lobbies, open plan, atrium spaces, or reception areas.

KEY FEATURES

Recharge modular lounge seating is constructed of fabric covered foam with upholstery-grade FSC plywood core and box joints.

Each bench has glides that can be adjusted up to 2".

MATERIALS

- All COMs/COLs must be approved for upholsterability. See pages 6-7 for COM ordering instructions.

OPTIONS — MODULAR LOUNGE SEATING

Description:

Bench — Single or Double width seats (no back bolster)

Bench with Bolsters — Single or Double width seats with full, half, or corner bolsters

Bench with Bolsters and Screens — Single or Double width seats with full, half, or corner bolsters and full width or full width and 3/4 side screens.

Poufs (mini ottomans) — Round or Square seat

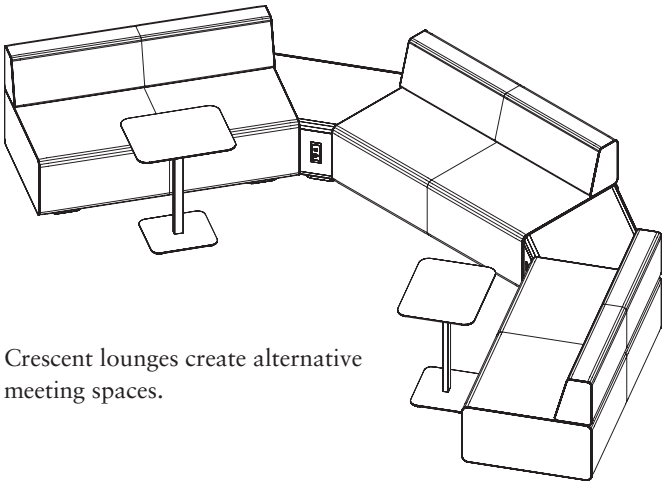
OPTIONS — ELECTRICAL

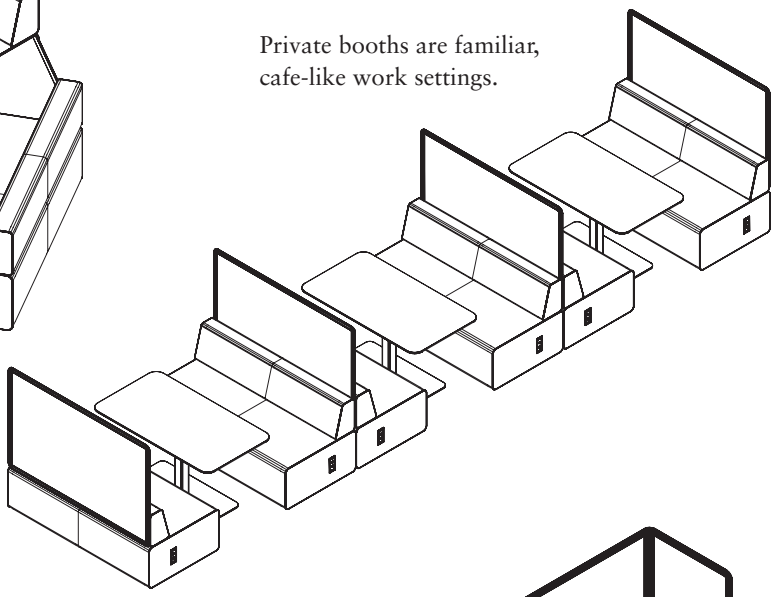
Description:

Electrical ports are available on seat benches and connector tables with corded, 4-Wire Kits, or hard wire options. See pages 248-249 for specifications and examples. See page 259 for electrical components.

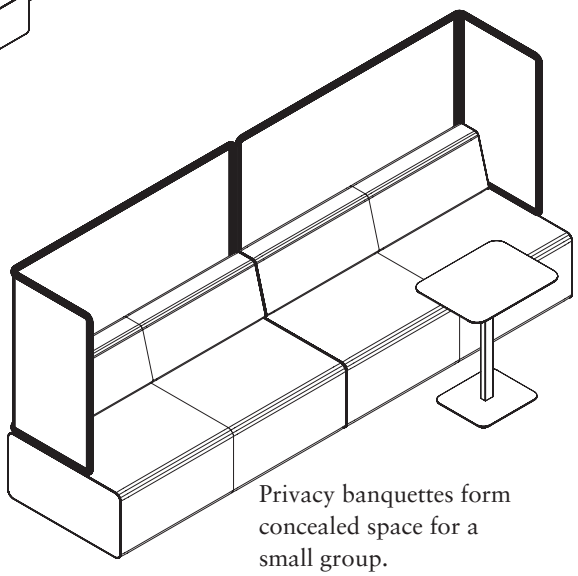
A full gallery of typicals can be found on our website: **https://www.allsteeloffice.com/design-resources/idea-starters**. *Each typical includes a complete BOM with current pricing, downloadable CAD files, and PDFs of each drawing.*



Crescent lounges create alternative meeting spaces.

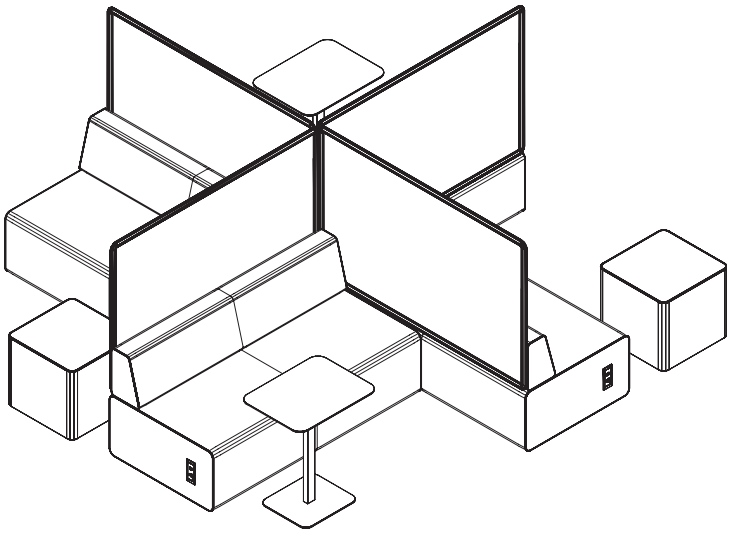


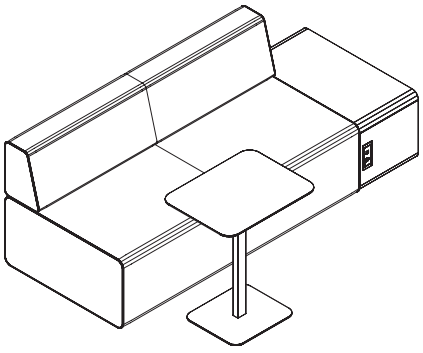
Private booths are familiar, cafe-like work settings.



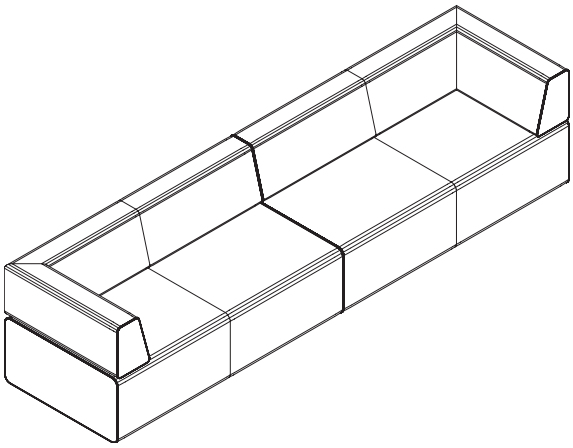
Privacy banquettes form concealed space for a small group.

Clusters provide seating options and power for common spaces.

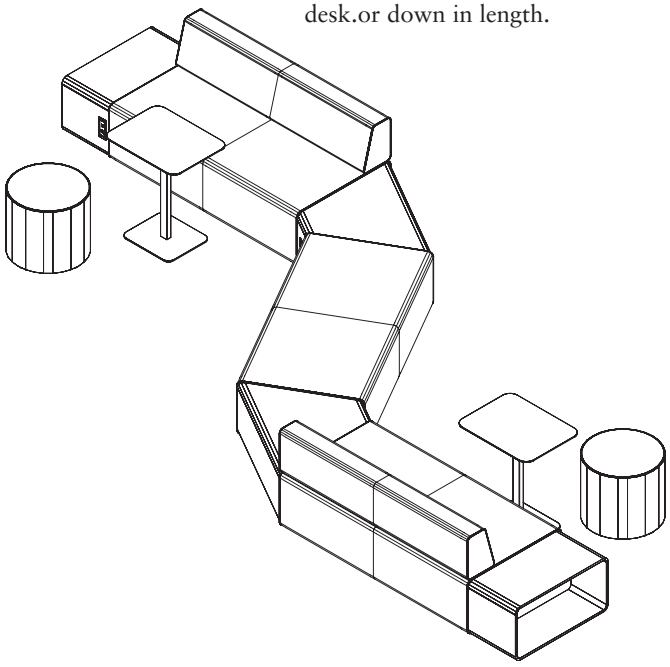




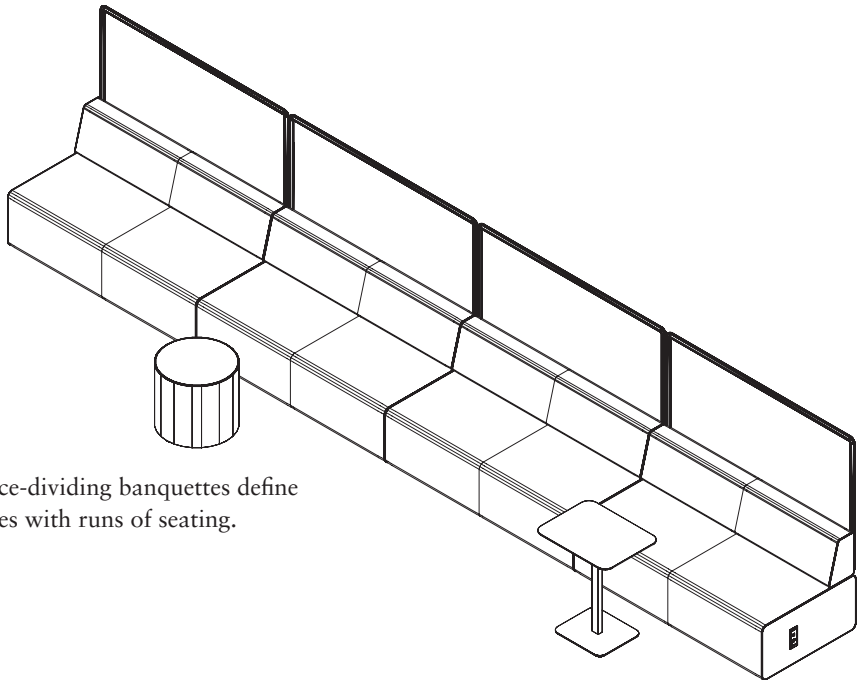
Sofas offer space to think away from the desk.



Sectional sofas easily scale up spontaneous work beyond the desk.or down in length.

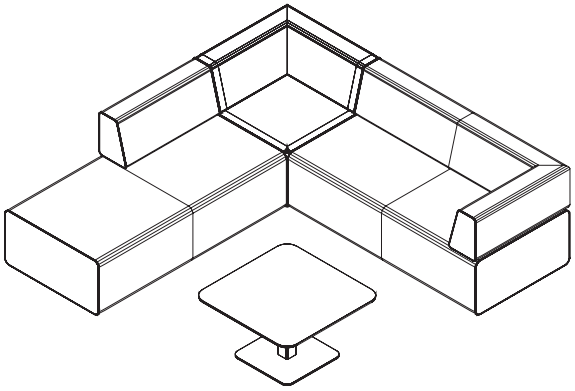


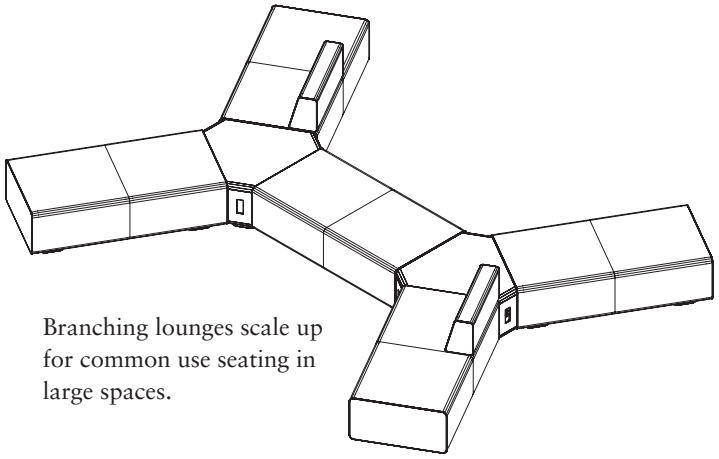
Sectional sofas easily scale up or down in length.



Space-dividing banquettes define zones with runs of seating.

Sectional return sofas turn 90 degree corners.





Branching lounges scale up for common use seating in large spaces.

POWER-READY MODELS

Recharge power-ready Bench models and Connector Tables have cut-out(s) that will accept Recharge Power Ports (ordered separately).

Electrical cutout on the soft seating pieces is located on the side or in the front of the unit. The opening is 1.94"W x 6.25"H.

All Connector Tables come with or without an electrical cutout in them. The 120° x 3 Connector Table has three electrical cutouts, while the 120° x 2 and Straight Connector Tables have one electrical cutout. Electrical components need to be ordered separately from the units.

Recharge Power Ports are UL listed. All power modules have 2 simplex and 2 USB outlets. Three power options with cords are available:

- Corded – plugs a single unit into standard outlet
- Hardwire – connects a single unit to power source by a licensed electrician
- 4-Wire used for powering multiple units – requires 4-Wire Infeed Kit. 4-Wire Jumper Kit(s) may also be required when powering multiple units from the same Infeed. See examples.

It's the customer's responsibility to ensure that installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply meets all local and national electrical codes.

STEPS FOR ORDERING RECHARGE 4-WIRE POWER KITS:

1. Determine the number and location of powered ports in configuration. A maximum of thirteen Recharge ports can be connected on one Infeed.
2. Order one 4-Wire Power Port for each powered Recharge Unit.
3. Order one Infeed Kit. Each Infeed Kit includes H-Connector which can power either:
   - 3 Recharge units
   - 2 Recharge units and 1 Jumper
   - 1 Recharge unit and 2 Jumpers
   - 3 Jumpers
4. Determine if Jumper with H-Connector Kits are needed for connecting multiple powered Recharge units.
   - A Jumper Kit is required if the distance between the H-Connector on the end of Infeed or Jumper is greater than 72" to the Power Port cutout on the Recharge unit.
   - Jumper Kits are available in 42" and 72" lengths.
   - Infeeds and Jumpers can't plug directly into Power Port.

ELECTRICAL EXAMPLE 1 — 2 variations

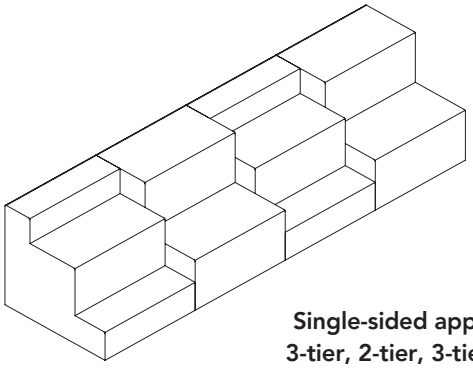
Take collaboration to a new level.

Rise transforms any space into a meeting space. It is tiered and modular upholstered seating that allows a number of people to gather without taking over an entire room.



Single-sided application:
3-tier, 2-tier, 3-tier, 2-tier

MODELS AND OPTIONS

Rise is designed as building blocks that can be combined into a variety of configurations. Rise is available as non-powered or power-ready. Rise is not intended for use as stairs.

APPLICATION

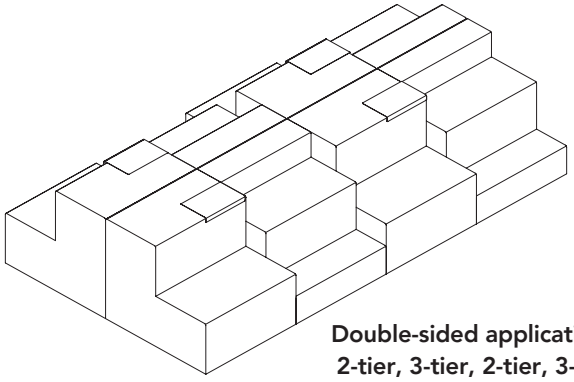
Use Rise back-to-back or side-by-side against a wall in atriums, open plan areas, brainstorming/huddle rooms, conference room, cafés, waiting areas, or lounges.

KEY FEATURES

Rise is constructed of fabric covered foam with upholstery-grade FSC plywood core, box joint, and corner block construction.

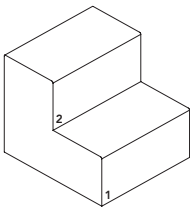
Rise has glides that are adjustable up to 2".

Ganging brackets with screws are included for connecting multiple units. Two brackets are required to connect two Rise units together. Soft Wall requires a special ganging bracket S922GB if it is not put between two units.



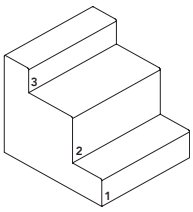
Double-sided application:
2-tier, 3-tier, 2-tier, 3-tier

DIMENSIONS



RISE 2-TIER

2-Tier — 34"H x 36"W x 40"D
2-Tier Corner* — 34"H x 40"W x 40"D
Tiers 1 and 2 — 17"H x 20"D



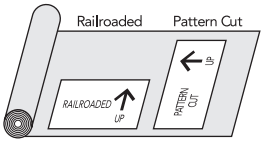
RISE 3-TIER

3-Tier — 34"H x 36"W x 40"D
Tier 1 — 9½"H x 12"D
Tier 2 — 16"H x 18"D
Tier 3 — 8½"H x 10"D

***NOTE:** Dimension of unit may not fit through standard door, check installation site prior to ordering.

MATERIALS

The outside cover on Rise is fully upholstered. Rise can be specified in a solid color or two-tone on selected models.



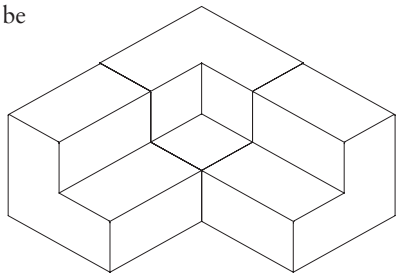
- Due to the dimension of the seat Rise fabric will be pattern cut.
- All upholstery foams are CFC-free.
- All COMs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 15-17. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete model to supply a certificate of compliance with CTB133.

Rise is warranted up to 300 lbs per unit.

See pages 15-17 for upholstery selections.
See pages 18-19 for colors and codes.

CORNER MODELS

Corner Rise models are available in two-tier models and are 40"W x 40"D. Units can be specified in a solid color or two-tone.



Corner Application:
2-Tier, 2-Tier Inside Corner, 2-Tier

POWER-READY MODELS

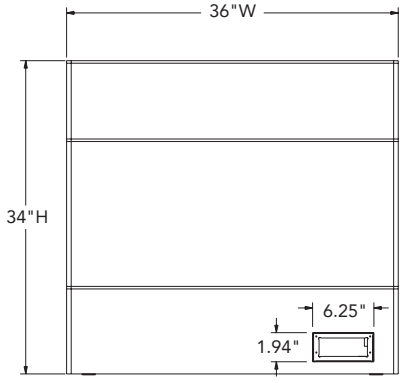
Power-ready Rise models have a cut-out on the front right side of the lower tier (see below) that will accept a Rise Power Port (ordered separately). The opening is 6.25"W x 1.94"H.

Rise Power Ports are UL listed and constructed out of anodized aluminum with a painted, steel faceplate and two water-proof outlets and two USB ports. Three power options are available:

- Corded — plugs a single unit into standard outlet
- Hardwire — connects a single unit to power source by a licensed electrician
- 4-Wire used for powering multiple units — requires 4-Wire Infeed Kit. 4-wire Jumper Kit(s) may also be required when powering multiple units from the same infeed. See examples.

It's the customer's responsibility to ensure that installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply meets all local and national electrical codes.

Front view of 3-Tier Rise Unit



Reference Page

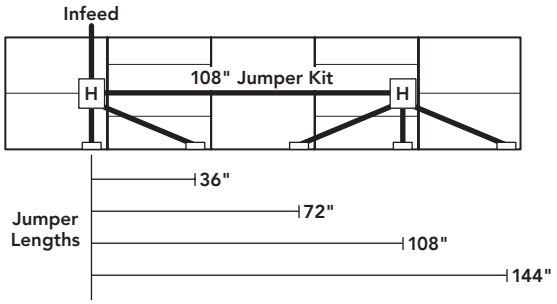
STEPS FOR ORDERING RISE 4-WIRE POWER KITS:

1. Determine the number and kind of Rise Powered Units in configuration. A maximum of thirteen Powered Rise units can be connected on one Infeed.
2. Order one 4-Wire Power Port for each Powered Rise unit.
3. Order one Infeed Kit. Each Infeed Kit includes H-Connector which can power either:
   - Three Rise units.
   - Two Rise units and one Jumper.
   - One Rise unit and two Jumpers.
   - Three Jumpers.
4. Determine if Jumper with H-Connector Kits are needed for connecting multiple Powered Rise units.
   - A Jumper Kit is required if the distance between the H-Connector on the end of Infeed or Jumper is greater than 72" to the Power Port cut-out in Rise unit.
   - Jumper Kits are available in 36", 72", 108" and 144" lengths.
   - Infeeds and Jumpers can't plug directly into Power Port.

See examples below. Electrical components listed on page 267.

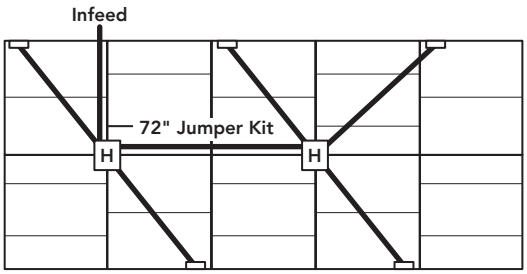
Example 1 — Single-sided Application (Top View)

- **5 – 4-Wire Power Ports**
- **1 – Infeed Kit**
- **1 – 108" Jumper Kit**



Example 2 — Double-sided Application (Top View)

- **5 – 4-Wire Power Ports**
- **1 – Infeed Kit**
- **1 – 72" Jumper Kit**



(See page 340 for COM pricing on Grades 9-22)

✪ **Partnership Program —** See page 9 for details.

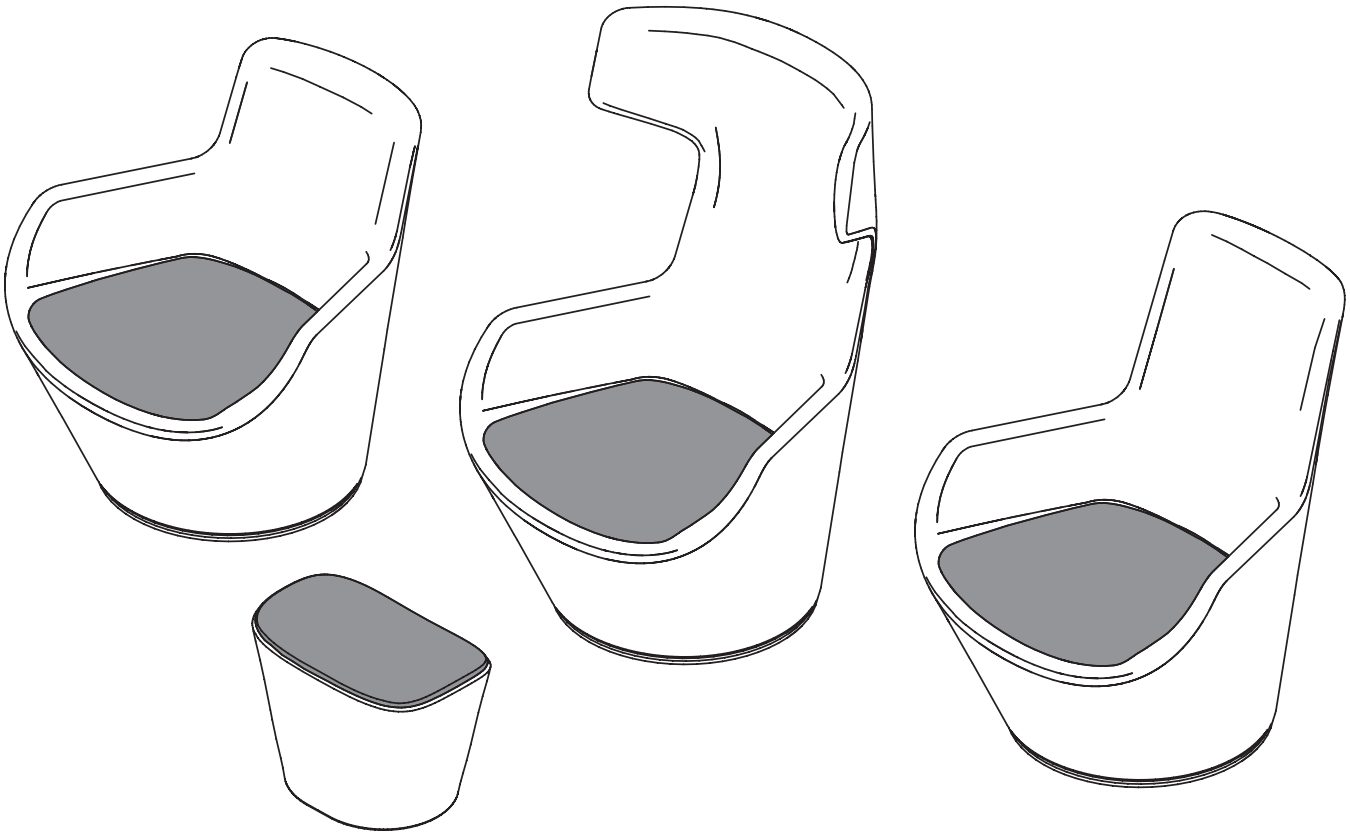
• **Available upholstery option**

◆ **Available upholstery option with CTB133 approval — requires FC suffix added to model (FC extra, $ varies by series).** Creases and gathers may be visible with CTB133 Fire Code seating due to the construction of the fire barrier material used.

- Allsteel fabrics and foam meet requirements for CTB117.
- Blank spaces indicate that a product has not yet been tested or that it failed.
- Contact Allsteel Customer Support for other flammability code approvals.

RETREAT

Retreat Lounge is a space-defining collection that supports real work in often underutilized spaces. It defines areas for small groups, provides privacy for individuals, and offers visual consistency in space planning. The lounge collection includes wing-back, high-back, and low-back chairs, and a matching ottoman.



Retreat Executive, Conference and Side seating extends premium comfort throughout meeting and private office spaces with its iconic design know from the Retreat lounge collection. The soft, organic shape of Retreat speaks to multiple generations of leaders, while creating a timeless and cohesive aesthetic that does not overwhelm the space or user.

DESIGN FEATURES

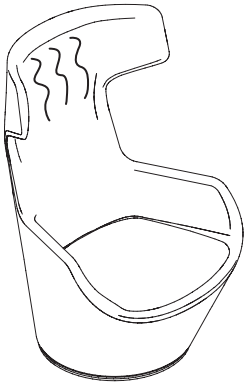
Retreat is a space defining lounge collection that supports real work in often underutilized spaces. It defines space for small groups, provides privacy for individuals, and visual consistency in planning and varied elevations.

Arms

Arm height is specific for comfort or laptop placement.

High-Back and Wing-Back

High-back protects back of head and wing-back provides added visual privacy. Relaxed tailoring is normal and expected in the upper headrest of the wing back (see illustration below).



Base Options for Chairs

Select between fixed, swivel, or return-to-center base.

Materials

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CTB117. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB117.

OPTIONS

Chair Type:

VERW	Wing-Back Upholstery
VERH	High-Back Upholstery
VERL	Low-Back Upholstery
VERO	Ottoman Upholstery

Fire Code:

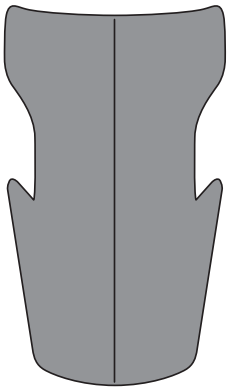
NO	Standard Upholstery, No Fire Code

Base Type (if applicable):

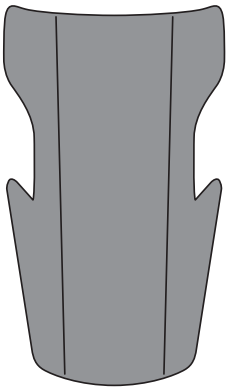
F	Fixed (Subtract $300)
S	Swivel
R	Return-to-Center ($265 extra)

Body Upholstery:

See page 273 for upholstery selection. Future "Non-stretch" fabrics will require dual zippers on wing back models (see illustration below).



Single Zipper



Dual Zipper

Seat Upholstery and Leather:

See page 273 for upholstery and leather selection.

Upcharges listed for Grades 2 and above, add to Base Price. Grades 9-22 on page 340.

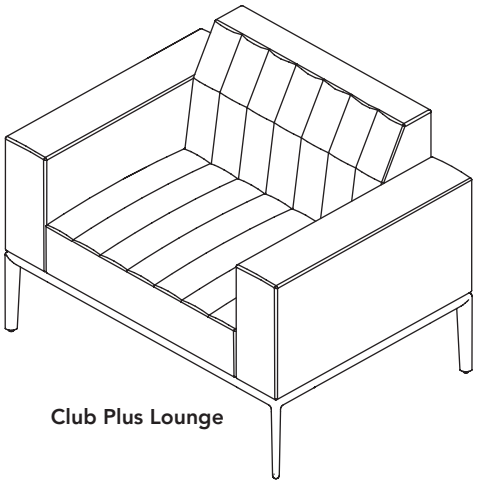
See page 451 for more information.

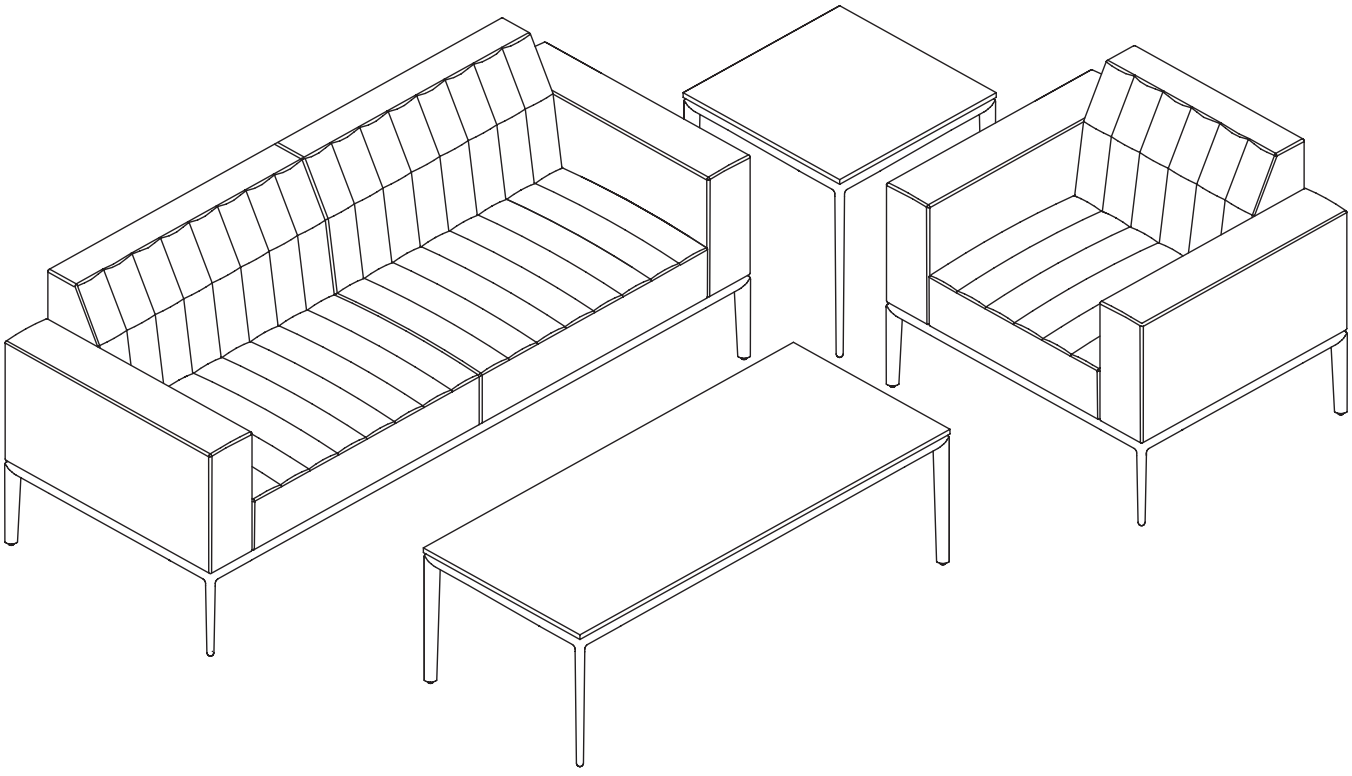
Reference Page

Introducing Parallel, a collection of soft seating and coordinating tables that adapts to a variety of spaces. Parallel is at home in reception areas and collaborative workspaces, accommodating different functions while maintaining a consistent aesthetic. With HBF Textiles, Allsteel fabrics, or a designer's own material, Parallel provides a canvas to make a strong first impression anywhere it's used.

Designed in partnership with Chris Adamick.



Club Plus Lounge



DESIGN FEATURES

Functional Versatility

Flexible and functional, Parallel soft seating can be considered a workhorse in helping meet a company's workplace needs, whether it be casual conference areas, lobby and reception settings, or collaborative hubs.

The variety of sizing and features allows Parallel to adapt from reception to collaborative areas throughout a workspace. The clean lines work well with current and future furniture settings. Generous sizing and thoughtful comfort considerations make the sit comfortable for five minutes or two hours.

Design Versatility

Cutting a sleek profile with tapered ellipse legs and a slim, stylistic reveal, Parallel is intended to work with your favorite Allsteel platforms without overpowering the space. The sharp tailoring of the upholstery paired with the dual-density foam means comfort without sacrificing aesthetics.

The Parallel club chair, club plus lounge, and modular sofa options, as well as the coordinating side and coffee tables, enable a diverse array of setups, from structured stylized formal, to a warmer domesticated corporate vibe, to flexible collaborative in combination with other Allsteel products. A variety of upholstery materials and frame colors celebrates beautiful form while telling a strong design story.

Wide Arms

6" wide arms with high-density foam allow for a comfortable surface for device usage, and the optional removable sleeve accessory, available in three finishes, makes a stable worksurface on the arm. Designed for comfort but also with the intent that all surfaces are sitting surfaces, Parallel is built to handle perching on the arms and back.

Design Nuances

- Legs – Ellipse, tapered shape set to the very edge of the frame
- Reveal – Slim reveal around the entire perimeter
- Tailored upholstery – Available with a channeled design detail for a more refined aesthetic

Materials

- All COMs/COLs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- Allsteel fabrics meet requirements for CTB117. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CTB117.

Tables (page 288)

- Available with laminate or veneer tops.
- Leg finish option includes painted (color specified) or polished chrome.

BASE PAINT FINISHES

GRADE P2

Silver PR6

GRADE 4

Polished Aluminum ..... PAL/P

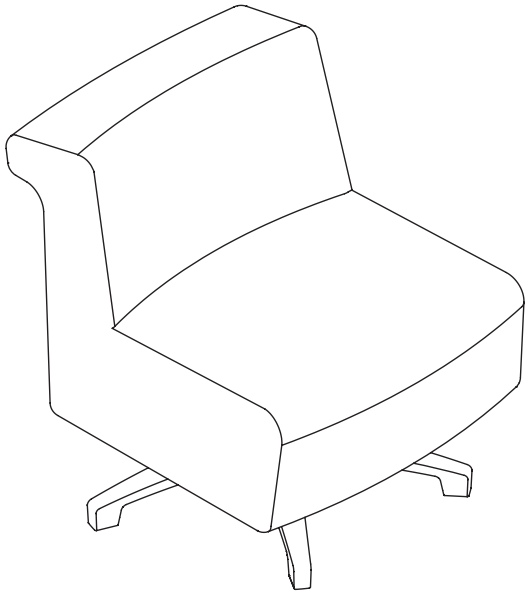
NOTE: Refer to individual product pages for upcharges.

FSC Certified Wood at Allsteel

See page 451 for more information.

Reference Page

Linger is a lounge chair that accommodates a variety of postures. Take a seat for longer meetings, sit upright, lounge, or swing your legs over the side. Perch on the back for shorter interactions when you don't want to commit to the sit.



MODELS AND OPTIONS

Linger is available in one size with an upholstered seat and a base that can be painted or polished aluminum. Linger is available in solid or two-tone upholstery options.

APPLICATION

Place Linger in open areas, public or neighborhood spaces, small conference rooms, dedicated collaboration rooms, dormitory lounges, libraries, or hospitality waiting areas.

KEY FEATURES

Linger is constructed of upholstery over frame and foam with either a painted or polished aluminum base. The core is upholstery-grade FSC plywood with box joint and corner block construction. The base swivels so you can engage the whole room. Plus it self-centers to its original position when not in use to keep spaces ready for the next meeting. Upholster the seat and sides in two different fabrics to create a unique aesthetic. Linger accommodates multiple postures, including the ability to sit on the back ledge.

MATERIALS AND FINISHES

Linger has a fully upholstered seat that can be specified as a single upholstery or two-tone.

- All upholstery foams are CFC-free.
- All COMs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 18-19. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete model to supply a certificate of compliance with CTB133.

Linger is warranted for users up to 300 lbs.

OPTIONS — LINGER

See page 451 for more information.

Reference Page

Reflect creates personal refuges around the open office — in the hallway, adjacent to a row of workstations, or near a wall of windows. Enjoy the privacy of a large, sound-stifling back that reduces distractions and communicates unavailability. Or the generous space formed from wide armrests and an oversized seat, allowing room for your laptop, paperwork, and other tools of the trade. And the comfort of padded upholstery, which cushions you as you finish that email, report, or video call.

With Reflect, going solo doesn't always mean you have to go at it alone. Arrange multiple seats into pairs or pods to give team members a new space to collaborate. Use the concealed swivel to move towards or away from others as needed.

Some time away is good for everyone. Focus your attention in the right place with Reflect.

MODELS AND OPTIONS

Reflect is available with an upholstered seat/back and upper shell. Lower shells are veneer and each unit ships with a steel base plate for stationary placement.

APPLICATION

Place Reflect in open areas, public or neighborhood spaces, adjacent to workstations or in a cafe-type setting.

KEY FEATURES

Surprising Functionality

With an integrated swivel-based mechanism, Reflect enables multiple work modes — from 1:1 conversation to private office focus.

Communicated Privacy

Sight-blocking and sound dampening upper shell visually communicates unavailability and creates private seclusion.

Comfortable Yet Active

Ergonomically designed soft seating promotes upright postures and active working behaviors for the task at hand.

Beautifully Designed

Reflect's asymmetrical aesthetic is visually compelling and intuitively offers ancillary worksurface support for beverages and writing with its extended width armrest.

CONSTRUCTION

Reflect is constructed of fabric covered foam with an upholstery-grade FSC plywood core with box joint and corner block construction.

NOTE: Refer to individual product pages for upcharges.

FSC Certified Wood at Allsteel

See page 451 for more information.

A bench. A screen. A micro-environment.

Mind-Share is high-back, modular, upholstered, banquette-style seating. It can be used to create one, two, and three sided micro-environments. The bench can also be specified without the back for versatile seating in open spaces.

MODELS AND OPTIONS

Mind-Share is available in four different options: Bench, Bench with Bolster, Bench with equal width Screen, and Bench with extended width Screen. On units with extended screen, the bench can be installed either right or left handed.

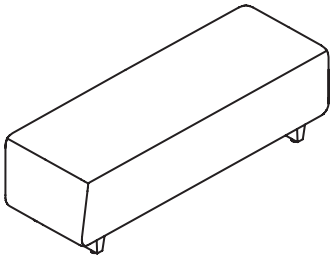
APPLICATION

Use Mind-Share as booths, micro-environments or bench seating in café areas, lobbies, open plan, atrium spaces, or reception areas.

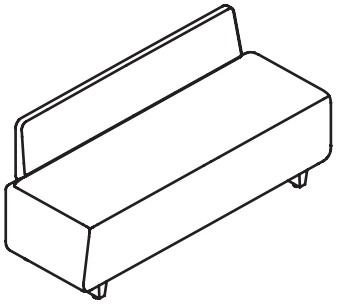
KEY FEATURES

Mind-Share is constructed of fabric covered foam with upholstery-grade FSC plywood core, box joint, and corner block construction.

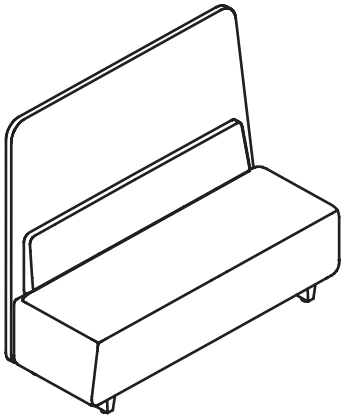
Each bench has glides that can be adjusted up to ¾".



Mind-Share Bench
S925B60



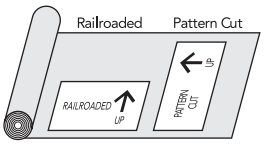
Mind-Share Bolster Bench
S925B60BOL



Mind-Share Bench with Screen
S925B60F60

MATERIALS AND FINISHES

All fabric on Mind-Share is Railroad cut.



- All upholstery foams are CFC-free.
- All COMs must be approved for upholsterability or applicable fire code compliance prior to order entry. See pages 6-7 for COM ordering instructions.
- **Flammability** code compliance of Allsteel textiles and seating is listed on pages 15-17. COM/COL manufacturers supply certificates of compliance for fabric-only tests such as CAL TB117-2013. Allsteel must test a complete model to supply a certificate of compliance with CTB133.

Mind-Share is warranted for users up to 300 lbs.

FSC Certified Wood at Allsteel

See page 451 for more information.

Social Collaborative — Seating Collections

Reference Page

The best work happens when the right people come together in the right space. A space that facilitates uninterrupted thought and sets team members up for everyday office victories.

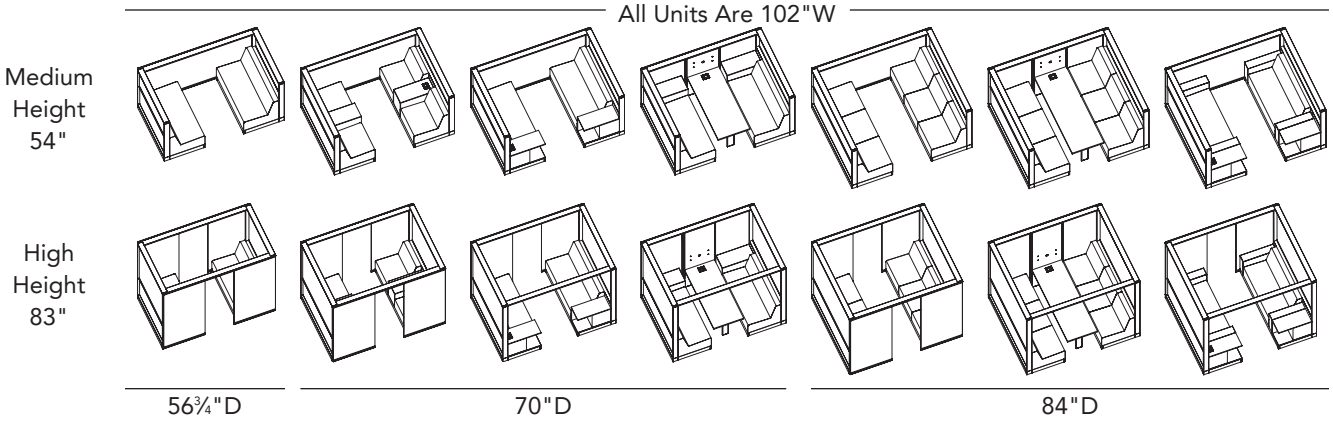
Meet Clubhouse, the newest addition to Allsteel's Social Collaborative collection of furniture.

It's where seating, surface and seclusion come together. Clubhouse is easy to set up in any space and fits however your team works. Its framed design serves a dual purpose: promoting collaboration while reducing outside distractions by communicating to others that work is happening inside.

Great things happen in your go-to place. That's the beauty of Clubhouse – the get-together getaway space.

AVAILABLE CONFIGURATIONS

Clubhouse is available in fourteen unique configurations that span between two different heights. Optional console and storage components provide ancillary worksurface support, media wall applications support technology and a wide array of fabrics and finishes allow for creative expression.



APPLICATION

Like its sister products, Clubhouse addresses the modern workplace's need for flexibility in an open office design. By forming — not filling — a room, Clubhouse creates a secluded space within any place:

- The brainstorm retreat.
- A private area for the job interview.
- The temporary office for writing that memo to the boss.

KEY FEATURES

Spatial Delineation

- Microarchitectural-like frame forms a 3D boundary and creates a space within a space.
- Semi-translucent back and side screening elements visually establish privacy and communicate unavailability

Extended Use Comfort

- Soft seating provides long-term comfort for small to mid-sized groups.
- Optional console and storage components provide ancillary work surface support.

Support for Technology

- Optional media wall and table support digital content sharing and power distribution.
- Integrated power within console and storage pieces further enable the usage of technology.

CONSTRUCTION

The construction of Clubhouse meets or exceeds industry standards for performance.

- Aluminum vertical uprights and horizontal extrusions are robust yet maintain a stream-line design.
- Back and side screens are made from durable polyester yarns. Screens are securely fastened across the top and a magnetic connection across the bottom allows the screen not to be damaged if impacted.
- Seating and console units are constructed of fabric covered foam with a plywood core.

ELECTRICAL

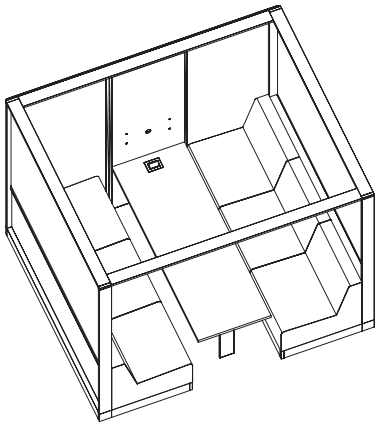
Electrical is to be separately specified and can be integrated within media walls, consoles and storage components. Standard, Chicago and New York electrical-coded models are available for specification throughout each of the previously indicated items.

When a media wall electrical assembly is specified, table top power integration is automatically included.

Console and storage power integration is only available on a single side of a Clubhouse configuration and is to be called out during the specification process.

Please refer to page 336 for additional information on electrical and power for Clubhouse.

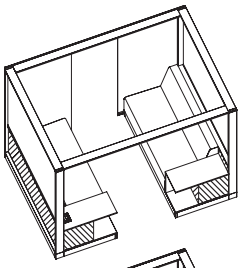
NOTE: Clubhouse Typicals can be found at https://www.allsteeloffice.com/design-resources/idea-starters



Clubhouse with Table and Media Wall, power ready.
GA84HMW
84"D x 102"W x 83"H

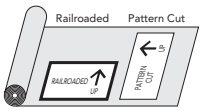
SPECIFICATION

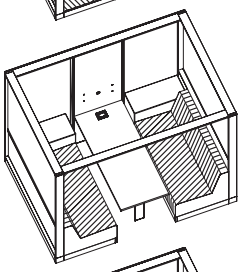
Fabric Specification



Frontboard, backboard and storage upholstery will match in specified fabric material.

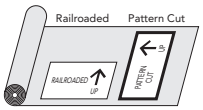
Fabric is railroad cut.

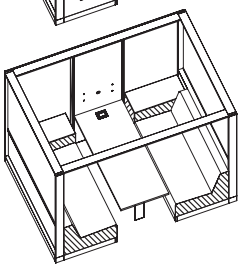




Seating top, back, seat and seat front upholstery will match in specified fabric material.

Fabric is pattern cut





Seating side and console upholstery will match in specified fabric material.

Fabric is pattern cut

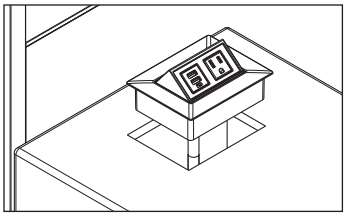
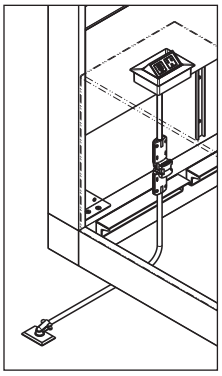
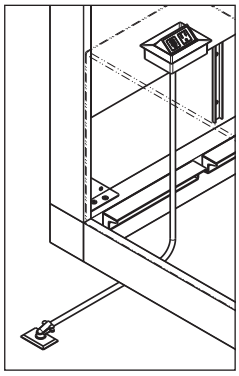
CONSOLE AND STORAGE ELECTRICAL

Console and storage Clubhouse units that are "power ready" require electrical module kits to be ordered separately based on local requirements. Select either Standard, Hardwire, or New York standard kits. Consult with your local electrician for the unit that is in compliance with local and national electrical codes. Verify code requirements before ordering. Chicago requires hardwiring. Exposed power module (shown) consists of one simplex receptacle and one USB hub for powering two devices.





Standard Kit

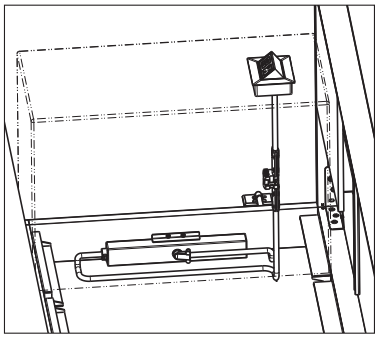


Hardwire Kit

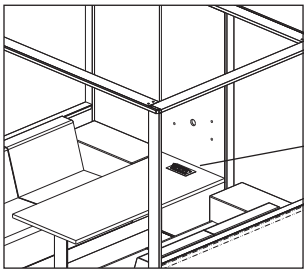
Standard Electrical Kit for Clubhouse "power ready" console or storage units comes with one power module with 72" cord, H-connector, and a 72" sealtight infeed cable. The infeed cable can be connected to a power monument located within the plinth base on the side where the powered console or storage unit is located; or it can be routed under the plinth base to an external power monument as shown above.

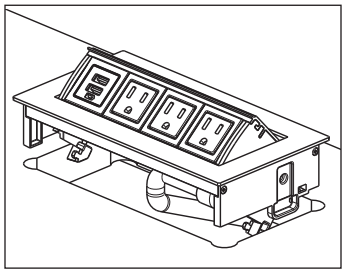
Hardwire Electrical Kit for Clubhouse "power ready" console or storage units comes with one power module with a 110" of flex cable. The infeed cable can be connected to a power monument located within the plinth base on the side where the powered console or storage unit is located; or it can be routed under the plinth base to an external power monument as shown above.

New York Electrical Kit for Clubhouse "power ready" console or storage comes with one power module, H-connector, and cable to New York infeed box which can be attached to the inside surface of plinth base.



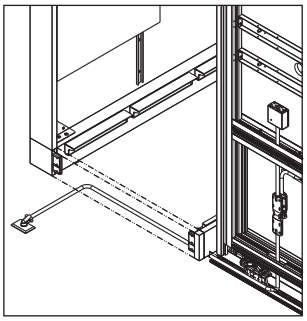
MEDIA WALL ELECTRICAL





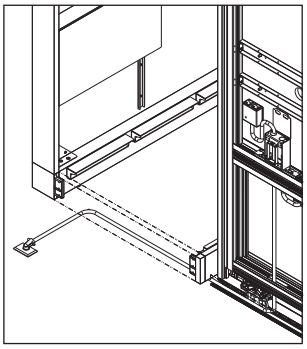
Media Wall Clubhouse units are "power ready" and require electrical module kits to be ordered separately based on local requirements. Select either Standard, Hardwire, or New York Standard kits. Consult with your local electrician for the unit that is in compliance with local and national electrical codes. Verify code requirements before ordering. Chicago requires hardwiring. Exposed power module (shown above) consists of three simplex receptacles and a USB hub for powering two devices.

Standard Electrical Kit for Clubhouse "power ready" media wall units comes with one external power module (described above), one internal power module with two simplex outlets to power monitor and accessory, H-connector, and a 72" sealtight infeed cable.



The infeed cable for Standard or Hardwire electrical can be connected to a power monument located within the plinth base on either side of unit; or it can be routed under the plinth base to an external power monument as shown above.

Hardwire Electrical Kit for Clubhouse media wall units comes with one external power module (described above), one internal power module with 72" cord and two simplex outlets to power monitor and accessory, H-connector, and a 72" flex infeed cable.



New York Electrical Kit for Clubhouse media wall units comes with one external power module (described above), one internal power module with 72" cord and two simplex outlets to power monitor and accessory, H-connector, and cable to New York infeed box which can be attached to the inside surface of plinth base (shown at right).

FSC Certified Wood at Allsteel

See page 451 for more information.

The spun aluminum

Belong occasional tables offer needed horizontal surfaces for small group meeting areas while providing a pleasing aesthetic.

MODELS AND OPTIONS

The sculptural curved shape and lightweight design are available in two sizes — Coffee (16"H x 32" diameter) or Side (21"H x 16 diameter). The Belong tops are available in laminate, veneer, or glass with painted pan.

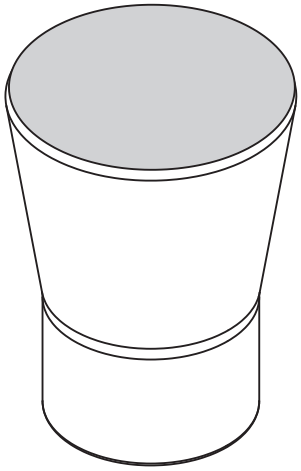
APPLICATION

Place in lounge and reception areas, small conference and huddle rooms, media and library areas, and cafés.

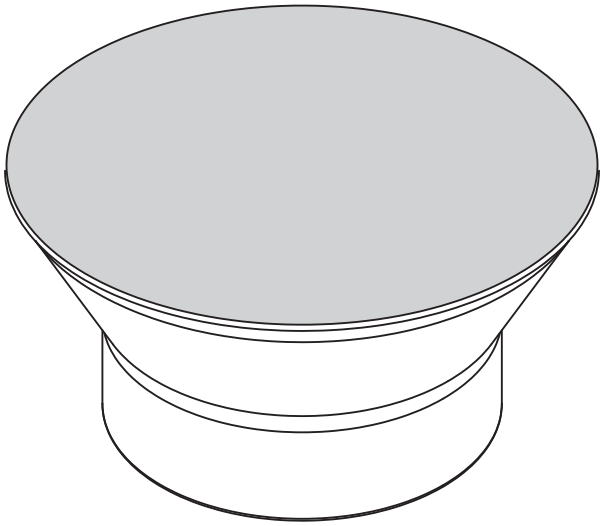
KEY FEATURES

Belong offers ample horizontal writing surface as a side table next to a chair or bench, or as a small coffee table surrounded by seating. Its organic hourglass shape provides legroom for users to sit up close when using laptops or tablets.

Belong Side Table



Belong Coffee Table



Social Collaborative — Accent Tables

Belong Side Tables

- Feature a 16" diameter top.
- Available in with four top finishes: laminate, glass, and veneer.
- Belong Side Table Base is 21"H.
- Specify top and base separately.

Belong Coffee Tables

- Feature a 32" diameter top.
- Available in three top finishes: laminate, glass with painted pan, and veneer.
- Belong Coffee Table Base is 16"H.
- Specify top and base separately.

*Old model numbers are no longer orderable. Please follow the new model numbers and the specification logic below.

How to specify —

Select the Model Number from above.

1st Option:

Select the Base Color:

See page 346 for selections and Color Codes.

P2 Add
$80 Side Table 22"
$100 Coffee Table 52"
$110 Coffee Table 42"

P3 Add
$120 Side Table 22"
$150 Coffee Table 52"
$165 Coffee Table 42"

P4 Add
$160 Side Table 22"
$200 Coffee Table 52"
$220 Coffee Table 42"

2nd Option:

Select the Laminate *(if applicable)*:

See page 346 for selections and Color Codes.

2nd Option:

Select the Veneer *(if applicable)*:

See page 346 for selections and Finish Codes.

2nd Option:

Select Corian *(if applicable)*:

Grade A
SAW Cameo White
Grade B
SDW Designer White
Grade C
SES Deep Night Sky

More Corian colors available as specials

3rd Option:

Select the Edge Color *(Laminate only)*:

See page 346 for selections and Color Codes.

4th Option:

Veneer Finish Method *(Veneer only)*:

OP Open Pore Low Shin
FF Full-Fill Cleartech
Add $200 Side Table
$300 Coffee Tables

Example:

Transfer makes it easy to move from brainstorming and sharing ideas, to capturing your thoughts on paper, to using your laptop or tablet. Its lightweight design pulls up comfortably to lounge chairs or side seating, creating an instant worksurface.

MODELS AND OPTIONS

Available in two top shapes, oval or trapezoid, and in a variety of finish options, it complements your work as well as your work area aesthetic.

The three-star base is available painted with painted stem or polished with black stem. Tops are available in laminate.

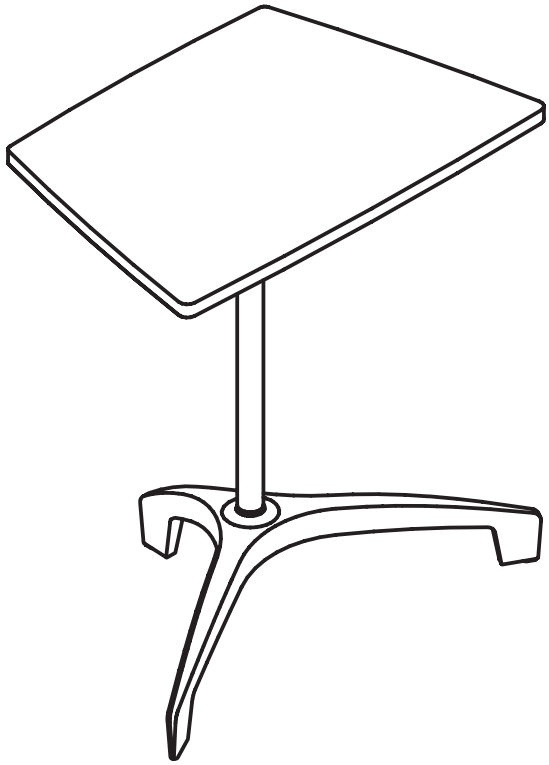
APPLICATION

Sprinkle throughout dedicated collaboration rooms, small conference rooms, huddle spaces, libraries, cafés, and reception and waiting areas.

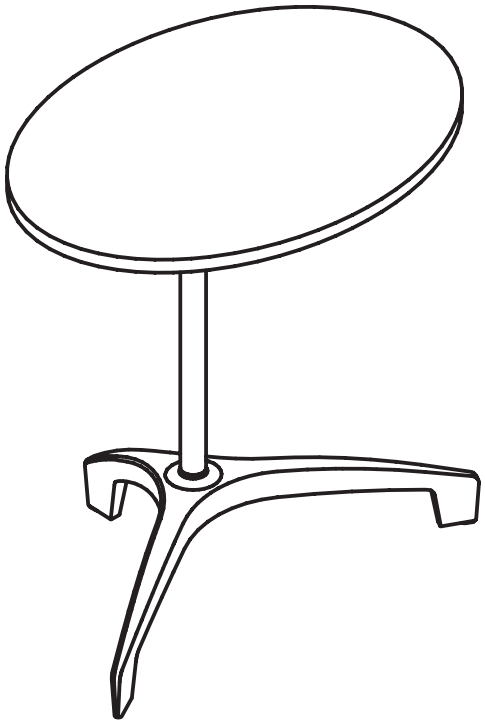
KEY FEATURES

The unique, slender base design allows you to pull the table close while leaving room to tuck your feet comfortably underneath.

Transfer Trapezoid Table



Transfer Oval Table



Transfer Tables

- Trapezoid or Oval shaped tops.
- 3-star painted or polished base.
- Laminate tops.
- Trapezoid dimensions: 26"H x 24"W x 16"D
- Oval dimensions: 26"H x 25"W x 18"D
- Painted base has matching painted stem.
- Polished base has black stem.

PARK

Social Collaborative — Conferencing

Sketch™

Reference Page

Sketch is a marker board you won't want to hide away in a closet after a meeting. Highly mobile, it helps you sketch out your best ideas while making a striking design statement. It's functional, versatile, and beautiful in either a casual meeting room or a sophisticated board room.

MODELS AND OPTIONS

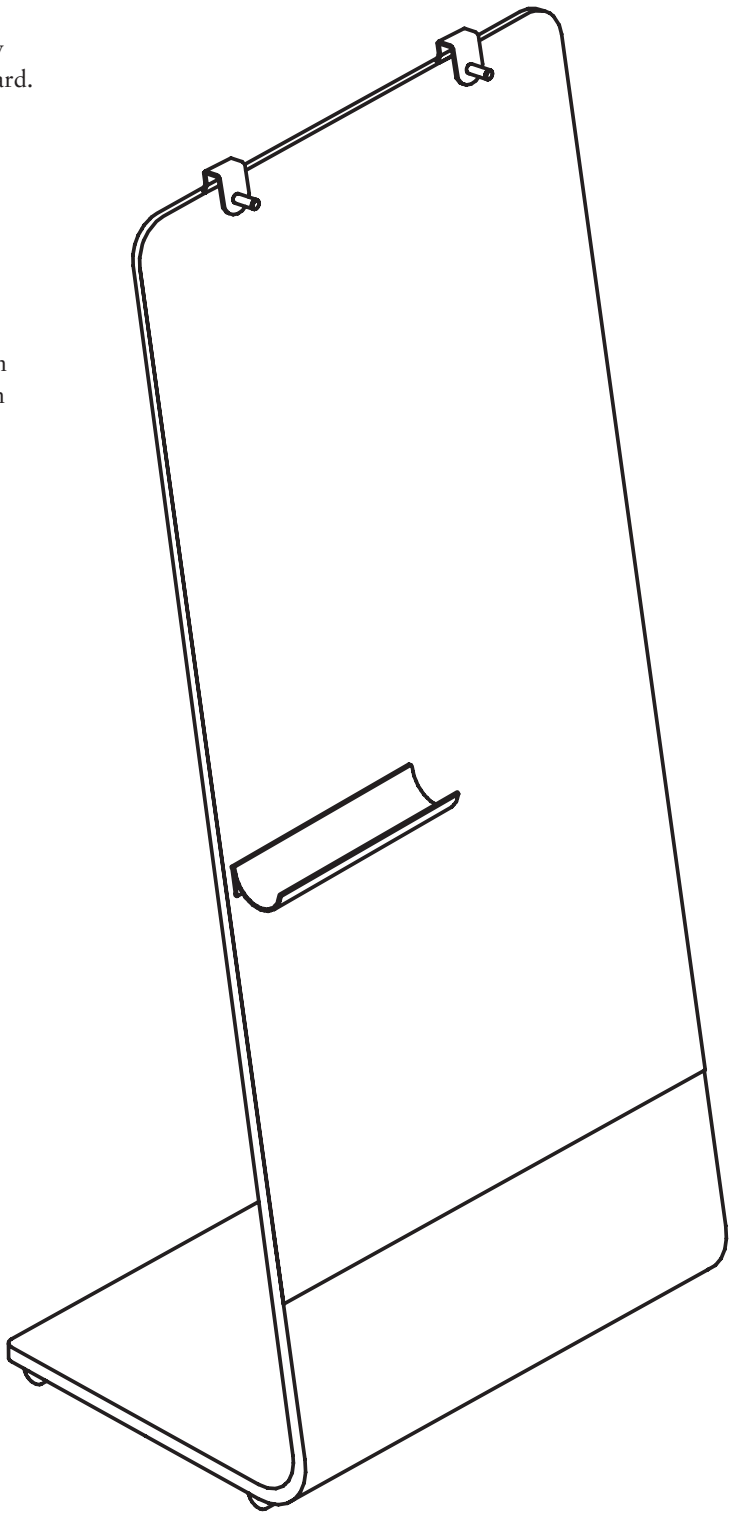
Sketch is available with a painted wood finish. Accessory tray and hooks can be ordered separately to use on the markerboard.

APPLICATION

Sketch can be used in conference rooms, huddle spaces, war rooms, training rooms, open-plan spaces, and libraries.

KEY FEATURES

Sketch is on casters for easy movement. It can be used as a markerboard, a magnetic board, or used to hang flipcharts on removable hooks. A magnetic tray can be added anywhere on Sketch's magnetic surface. Sketch is available in four painted wood colors.



Social Collaborative — Conferencing

Sketch Markerboard

- Bent ply construction. Available in four painted wood colors.
- Accommodates flipcharts with optional accessory hooks.
- Optional magnetic accessory tray available.
- Dimensions: 72"H x 29"W x 20¾"D
- On casters for easy movement.
- Sketch is made primarily of wood, a natural material that is affected by its environmental conditions. Sketch units may have a slight variance in the angle of the markerboard due to its construction and the natural variation expected in individual selections of wood.

Sketch Accessory Tray

- Magnetically attachable tray for storage of accessories on the markerboard. Can be positioned anywhere on Sketch's markerboard surface.
- PR6 Silver finish.

Sketch Paper Accessory Hooks

- Used to hang flipcharts on Sketch Markerboard.
- PR6 Silver finish.

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 393)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¾". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A6 Load capacity is 250 lbs for 2-leg models, 375 lbs for 3-leg models, and 350 lbs for Max models. This includes weight of worksurface.

Height-Adjustable Bases (page 390-391)

- Electronic height-adjustable base units are available in six styles: A6-T Base with 2 legs, A6-C Base with 2 legs, A6-T Base with 3 legs, A6-C Base with 3 legs, A6-T Max Base with 2 legs, and A6-C Max Base with 2 legs.
- A5 models travel at 1.5" per second, A6 2-stage 1.2"/sec, A6 3-stage 1.4"/sec, A6 Max .8"/sec. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 387.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- Slide glides offered as a .option and model level. Only available on 2-leg bases.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 72"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.
- Casters available on model level for retrofitting on 2-Leg Bases ONLY.
- Altitude A6 tables feature anti-collision, a feature designed to stop table travel when the table detects an obstacle. A5 & A8 tables do not have anti-collision technology.
- Altitude A5 and A6 bases specified with a work surface 60"W and greater require the use of an external stiffener. An external stiffener is included in Altitude work surface models 60"W and greater (all models ending with letter -D). If a non-Altitude work surface is being used, an external stiffener may need to be specified separately.

A6 Control Options (page 428)

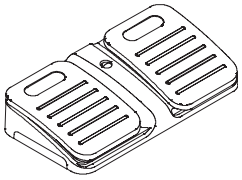
- Memory Controls are now a .option.
- Up/Down: Basic Up/Down control.
- Memory Control: 4 memory pre-set options allow the user to adjust their height to their preferred heights.
- Paddle: Simple, aesthetic control with 1 memory pre-set option and reminder mode.
- Rotating: 3 memory pre-set options and a rotating, dial-like control.
- Foot Control: Basic up/down wireless, hands free control. Can be paired with hand controls for multi-control option.
- Bluetooth Capability: A6 optional Bluetooth capability is sold as accessory model A6BLUETOOTH. Bluetooth is enabled through smartphone app AiDesk. Bluetooth control will only work with 2-leg A6 tables. Bluetooth control will **not** work with 3-leg A6 tables.

Altitude Basic (page 392)

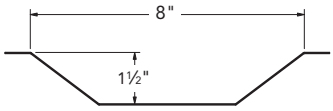
- Altitude Basic can accommodate either 24"D or 30"D work surfaces
- Altitude Basic can accommodate work surfaces ranging from 48"W to 60"W, 60"W is the maximum work surface size for the Altitude Basic
- Supports weight capacity of 180 lbs.
- Control Box: 100-240V, 3.6A, 50/60Hz, 400W
- 9' grounded power cord
- 1⅔"/second travel speed
- Available in silver only
- Available with up/down control only
- Features "easy-to-assemble" installation

Foot Controls

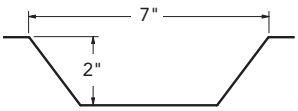
- Available as a .option on A6 and as model.
- Wireless, hands free control.
- Can be paired with hand control for multi-control option.
- Compatible with A6 and A3 tables.
- 2 AAA batteries needed. Batteries not included.



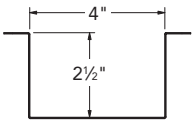
Cross-sectional Area Inside Under Worksurface Troughs



Minimum trough height

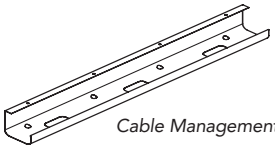


Median trough height

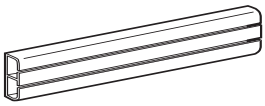


Maximum trough height

Cable & Wire Management



Cable Management Tray



Wire Management Channel

Cable Management Tray (page 395)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 395)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 395)
- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 395)
- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Quad Tap (page 395)
- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Edge of foot to outside of screen, wing	Edge of foot to outside of screen, no wing	Privacy height and modesty height	Space between table and screen	Back of worksurface to grommet
3"	2"	21¾" and 10"	2"	5¾"

Table 4: Utility Bay Dimensions/Specifications

Table Width	# Compart-ments	Wire tray height	Width of center compart-ment	Width of outer compart-ment	Center cavity load capacity	Outer cavity load capacity
48" Rectangle	1	3"	36½"	—	15 lbs	—
54"Rectangle	1	3"	42½"	—	18 lbs	—
60" Rectangle	3	3"	19¾"	14"	8 lbs	6 lbs
66" Rectangle	3	3"	19¾	17"	8 lbs	7 lbs
72" Rectangle	3	3"	19¾	20"	8 lbs	8 lbs

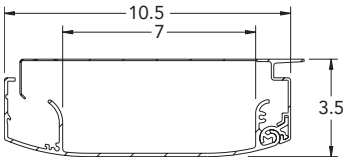
- Height-adjustable worksurfaces are available in laminate with square corners, laminate with round corners, and laminate eased edge with square corners.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) to accommodate screens and height adjustable motion. Actual depths are reduced by 0.75".
- Worksurfaces have pre-drilled alignment holes for bases, utility bay and screen brackets.
- The A8 utility bay acts as an external worksurface support; therefore, no A8 models require external supports.
- Grommet location is limited to center and 5¾" from back due to mounting of utility bay and power module under the worksurface.
- A8 load capacity is 300 pounds, including the weight of the worksurface, utility bay, power module, and screen.
- Electric height-adjustable base units are available in 2-Stage C-Leg.
- Height-adjustable legs travel at 1.5" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is <0.1 Watts. Power cords on models are 10'.
- Pedestals taller than 24½" when placed under table will interfere with utility bay in lowest position.

- Mobile peds can span over A8 foot.
- Mobile peds may extend past the worksurface; see Table 1 for dimensions.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- Tables with standard glides or slide-glides have ⅛" of adjustment. Tables with casters will sit 1.3" higher than glided versions.
- All models come standard with up-down height adjustable control. Optional control pad is available to provide app connectivity, Bluetooth, and memory set user heights (page 428)

Caster Option

- See Table 2 for caster-dependent dimensions.
- 24" deep worksurfaces with screens and casters must include surface mounted storage.
- See Storage Specification and Price List for A8 mounting specifications and applications.

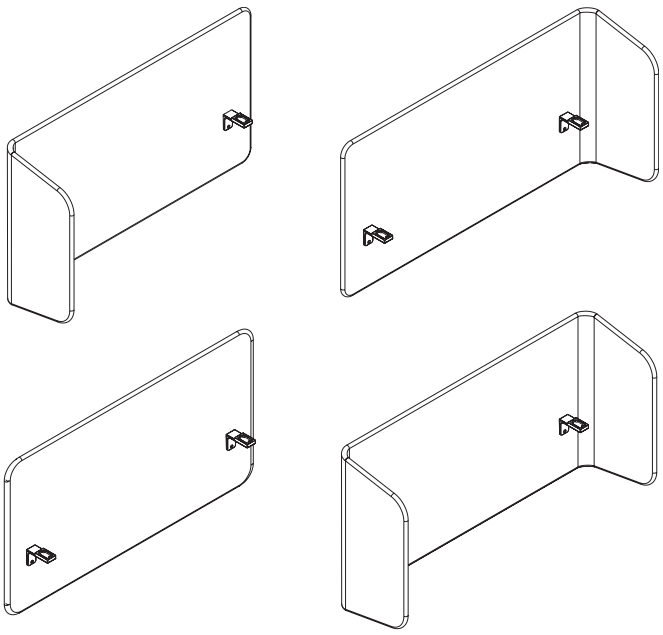
Utility Bay



Utility bay cross-section

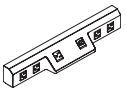
- Utility bay comes standard and attaches under the worksurface to contain cables, control box, and power module.
- See Table 4 for load and size specifications.
- Cord management chain comes standard with each table.
- Wire snake houses 3 cables at 0.300" diameter.
- Wire snake made of plastic links. Color options available are Black, Designer White, and Titanium.

Screens



- See Table 1 for overall table width and depth for each screen shape.
- Adding a screen adds 3" to depth of the table.
- Adding a screen adds 1" to the width of the table per return wing.
- A8 worksurfaces are 2" under nominal width to accommodate screens.
- RH L-screens have return wing on user's right; LH opposite.
- A3 and A5 worksurfaces are sized to accept A8 screens.

Power Module



- Contains 5 simplex outlets and 1 dual USB.
- Available in plastic or metal. Metal power module is required for Chicago code.
- Cord options include straight and curly.
  - Straight cord is 144"
  - Curly cord is 120"

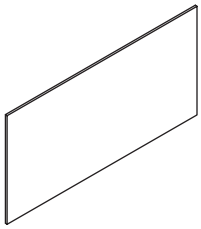
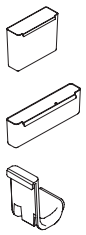
Altitude — Metal Screens (page 420)
- Powder coated magnetic metal privacy screen.
- Metal surfaces can be easily disinfected with cleaners. See cleaning guide for more details at AllsteelOffice.com.
- Available in all standard paint colors.
- Provides 1" gap along the back for accessory mount and cord drop.
- Available in 48"W, 54"W, 60"W, 66"W and 72"W.
- 66"W and 72"W screens include 3rd center bracket.
- Available in Straight, L- and U-shape configurations. Above and Above/Below desk applications.
- L- and U-Shape screens are not compatible with shrouded Height Adjustable Table legs.
- Optional tackable accessories specified separately.
- 66"W tackable accessory comes as a set of (2) 24"W.
- 72"W tackable accessory comes as a set of (2) 20"W.
- Available in standard and extended wings.
- Wings mount flush to the edge of the surface with an L-Bracket.
- 20"W tackable accessory must only be applied to both standard and extended wings without accessory slots.
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.
- Do not hang more than 5lbs of weight on wings.
- Screens are compatible with Radii undermount storage.
- Not compatible with standard 120-worksrufaces. Contact Allsteel TPG for custom sizes.

Size Reference Matrix

Tackboards	Wing	48"W	54"W	60"W	66"W	72"W
Actual Dimensions	20"W	30"W	36"W	42"W	20"W	24"W
Set of Tackboards	1	1	1	1	2	2



Accessories — Tackboard (page 421)
- Tackable accessories come with metal frame available in standard paint colors and fabric options.
- Attach to the screen using a dual lock tape (included in hardware).



Accessories — Radii (page 421)
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.

Accessories — Further Worksurface Rail Mount (page 430)
- Accessory rail must be field cut to fit between the screen brackets.
- The following accessories are not compatible with screens: U9WTC and U9TM.

General Overview 402
Power Rail Typicals 403

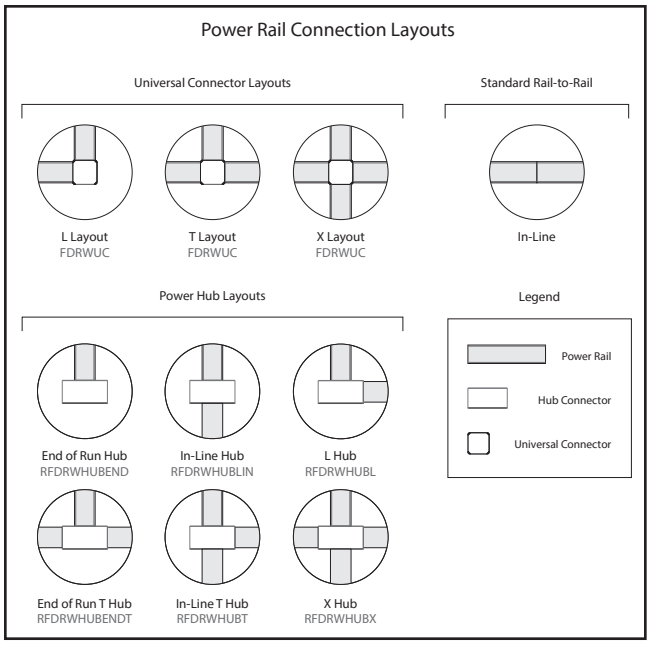
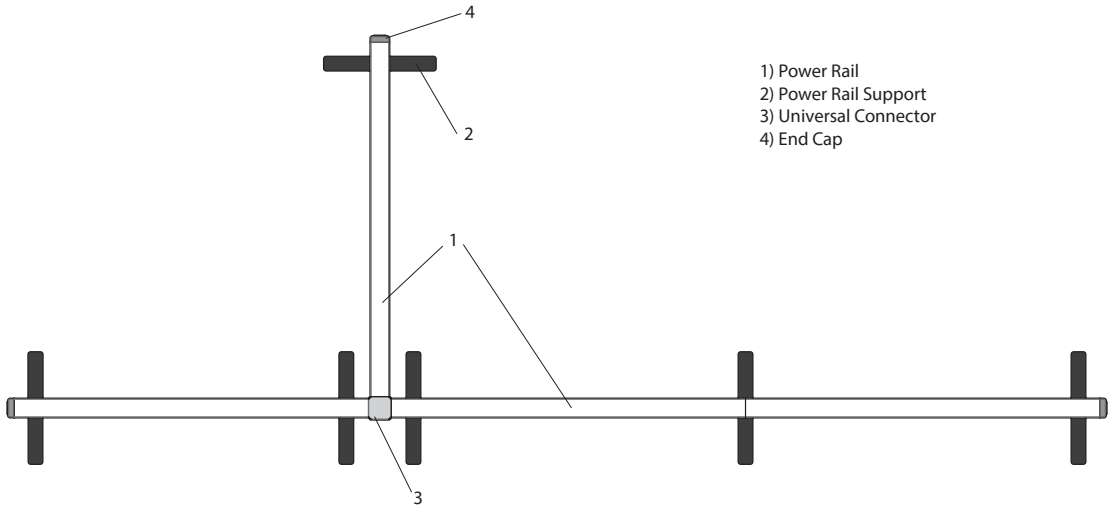
Routing Power 407

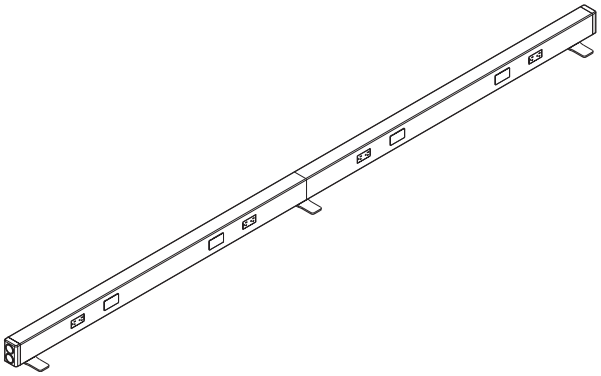


GENERAL OVERVIEW

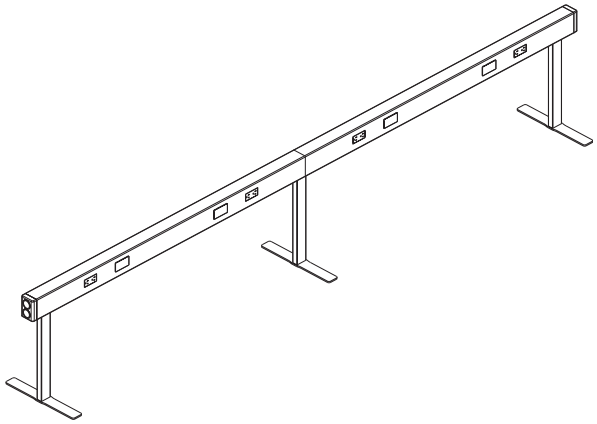
- Accommodates power and lay-in capacity for data cables.
- Available in 48", 54", 60", 66", and 72" lengths.
- Maximum of 2 duplexes and 2 data ports per side of rail.
- Models come equipped with hardware for in-line connections.
- Fiber optic cables can follow 90 degree turns at the intersection of the power rails.
- Power harnesses snap into electrical brackets within the power rail and accept duplex receptacles.
- Electrical power harness accepts up to 2 duplex receptacles per side of rail.
- End caps are required at an end-of-run, unless connected to an end-of-run power pole or a hub.
- Power rail can be set low to the floor using the floor legs or raised off the floor at 20½"H with elevated legs.



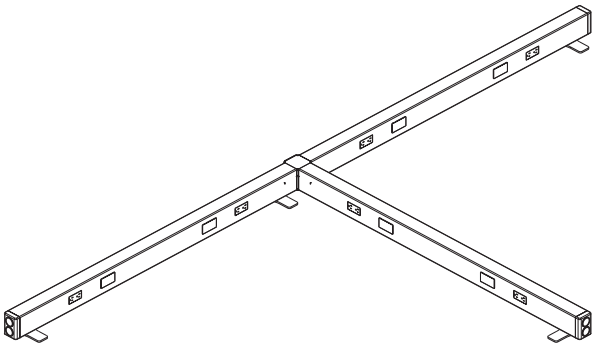
Power Rail Typicals



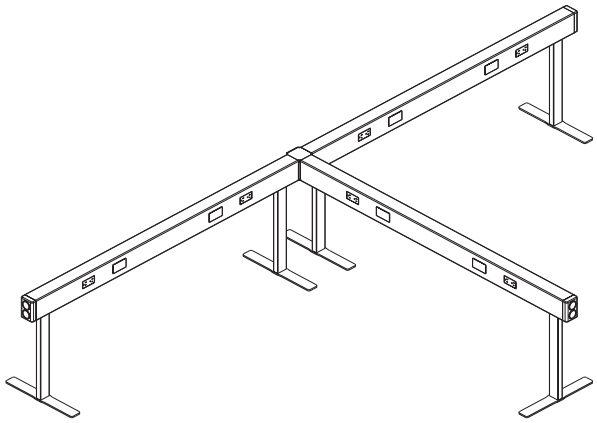
Low Rail, (2) 60"W Rail
Linear Configuration



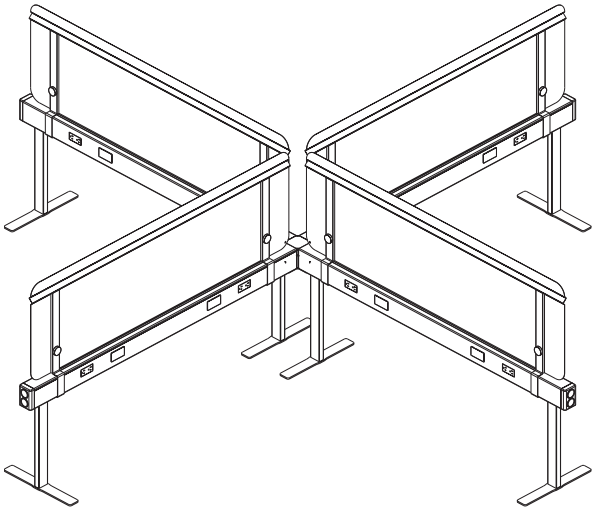
Raised Rail, (2) 60"W Rail
Linear Configuration



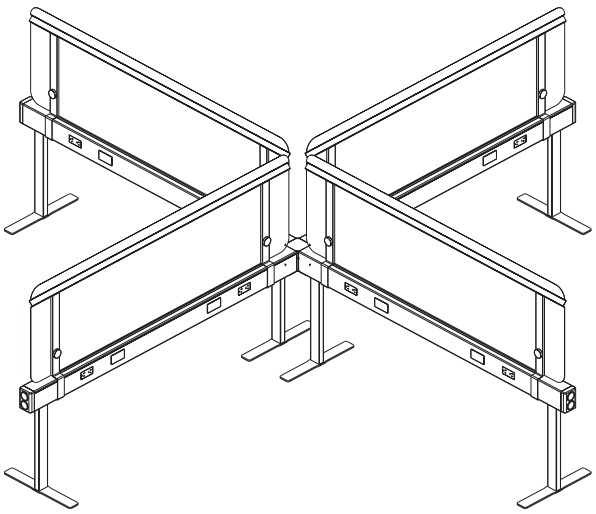
Low Rail, (3) 60"W Rail
T-Configuration



Raised Rail, (3) 60"W Rail
T-Configuration



Raised Rail, (4) 60"W Rail
X-Configuration with Screens



WORKING WITH ALTITUDE POWER RAILS

Low Rail with Floor Legs:

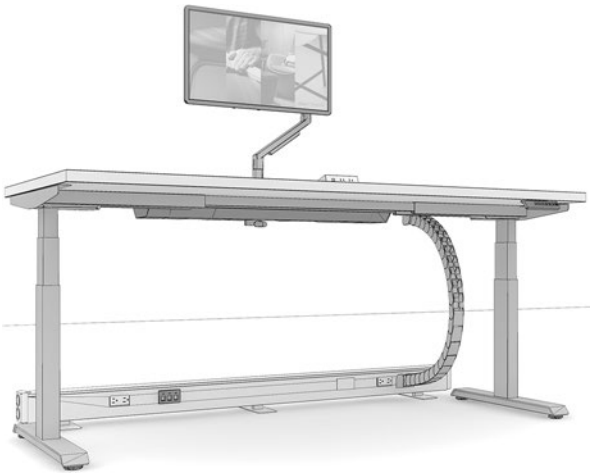
- Each power rail is supported by (2) floor legs.
- Floor legs have a leveling mechanism that can adjust up to 1¼"H.
- Legs are specified separately and come in qty of 1. Each leg is 7¼"D x 2¼"W.
- Leg is inset 2.8" from end of the power rail.
- Universal connector allows “L”, “T” and “X” configurations.
- Can connect directly to another power rail in linear applications without use of the universal connector.
- Cannot mount screens on the low rail.
- Power infeed can access the power rail in multiple ways:
  - through a receptacle position on the power rail (side infeed).
  - through the end cap on to the first power block.
  - through power pole using a power pole connector kit.

Raised Rail

- Power rails can be raised up to 20½"H using Elevated Legs and/or Hubs.
- Elevated Legs and Hubs can be used in conjunction to create the desired capability and aesthetic.
- Can be in Linear, L-, T- or X-configurations using Elevated Legs, Hubs or Universal Connector.
- Supports screens. See screens section for more details.
- Elevated Legs
  - Inset 2.8" from end of the power rail.
  - Can be shared in between the two rails in linear configuration.
  - Cannot route power and/or data.
  - Specified separately and come in qty of 1. Foot is included.
  - Leg is 15¼"D x 2¼"W x 17¾"H.
  - Order RFDRWAB separately to anchor to floor. Appropriate fasteners per floor type sourced locally.
- Support Hubs
  - Connect directly to the power rail.
  - Can be shared in between the two rails.
  - L-, T- and X-hubs can be shared in between power rails.
  - End of Run hub is only specified at end condition.
  - Can route power and/or data.
  - Can integrate power pole. Power Pole connector kit is specified separately and come in qty of 1. Foot is included.

Screens

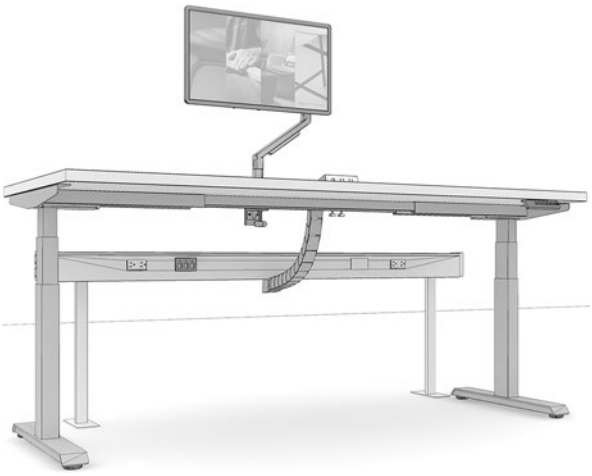
- Constructed of painted steel material.
- Standard Allsteel paint options can be applied.
- Screen height is 20"H, provides overall height of 42"H above fixed floor.
- Painted steel is magnetic and cleanable. Refer to cleaning solutions page at Allsteel Office website.
- Attachment hardware included.



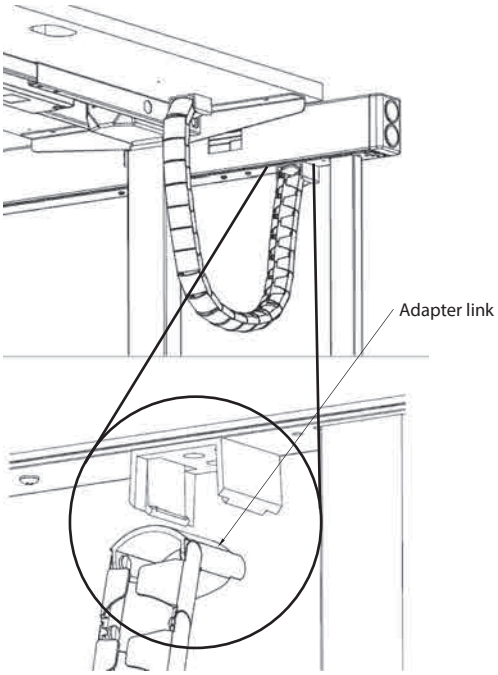
Altitude Desk + 60"W Low Rail + WKSWMC

WORKING WITH CABLE MANAGEMENT

- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware.
- Houses 6 cables @ 0.300" diameter.
- Specify WKSWMC for 58" chain. Only comes in Black Finish. Recommended for use with Low Rail.
- Specify A9CLWMC for 36" chain. Comes in Black, White and Silver. Recommended for use with Raised Rail.
- Links the power rail to a height adjustable desk.
- Has two connecting points: Top section connects underneath the Height Adjustable Desk and the bottom section connects underneath the power rail using a double-sided tape. Hardware included.
- When mounting the chain to underneath the rail, an adapter link is required. Included in the hardware.



Altitude Desk + 60"W Raised Rail + A9CLWMC



WORKING WITH POWER RAIL ELECTRICALS

General Notes about Electrical and Circuitry:

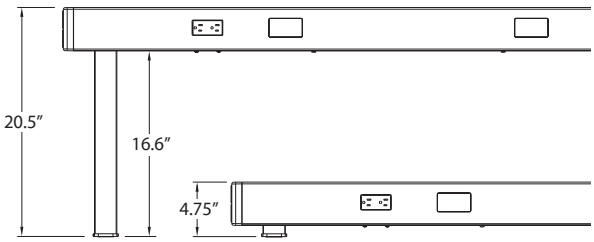
- Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
  - See Altitude Pricer section “Working with Electrical” for a detailed explanation of each electrical system.
  - All four systems utilize an 8-wire electrical system, rated at 20 amps.
- Per circuit (15 amps Canadian) — 16 amps plannable in U.S.
  - A8 Power Rail and electrical components are UL Listed. Electrical
- Components are also CSA certified.
  - Installation and use of the electrical system, the number of receptacles.
- Used on a given circuit and connections to the building power supply.
- Should follow all local and national electrical codes.

Electrical Infeeds

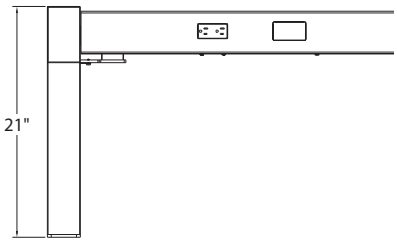
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.
- Refer to rail supports for infeed access points.

Routing Power

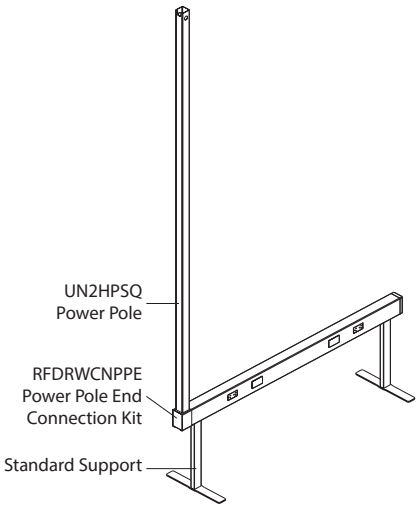
- Power infeed can access the raised power rail in multiple ways:
  - Through power pole using a power pole connector kit.
  - Through Support Hubs.
  - Through the infeed vertebrae.



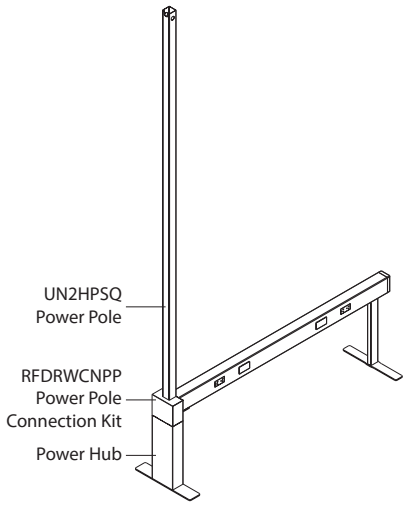
Raised Rail & Low Rail



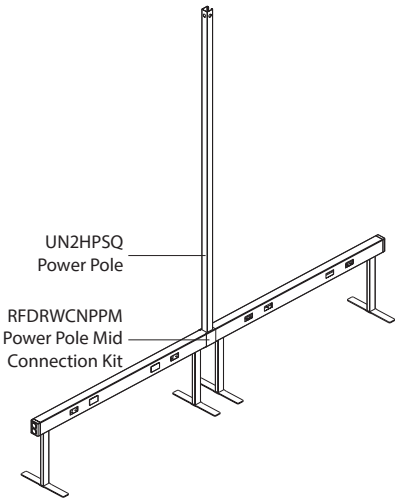
End of Run Hub



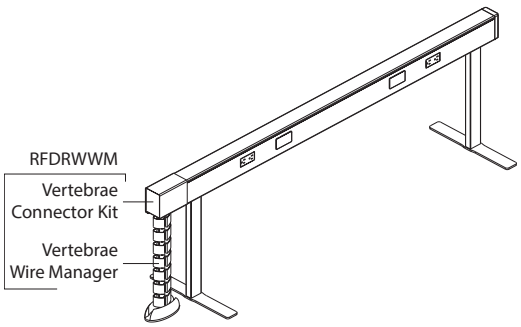
RFDRWCNPPE + UN2HPSQ
Connected to 60"W Rail



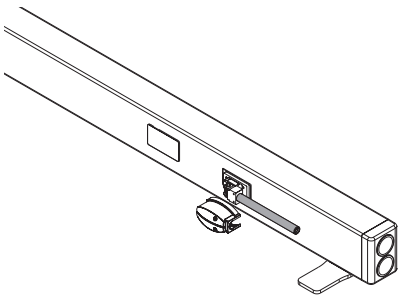
RFDRWHUBEND + RFDRWCNPP
UN2HPSQ connected to 60"W Rail



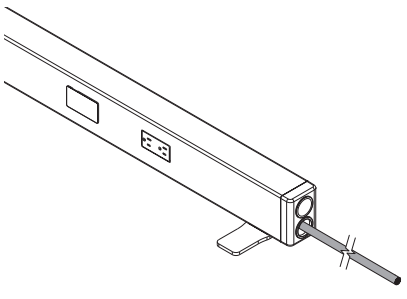
UN2HPSQ + RFDRWCNPPM
Connected to 60"W Rail



RFDRWWM
Connected to 60"W Rail



A876072 Infeed
Connected to 60"W Rail through End Cap



A877012 Infeed
Connected to 60"W Rail through End Cap

Electrical Systems

General Notes about Electric, Circuitry, and Chicago Code:

- A8 Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
- See pages 409-410 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian) — 16 amps plannable in U.S.
- A8 Power Rail and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

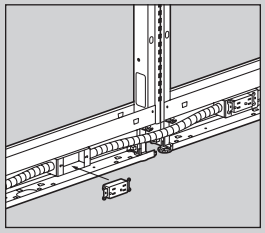
Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal at beltline. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.

Hardwire New York Code (page 414)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 48"W to 72"W.
- Unit must connect to a power harness.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.
- For NY infeed through the end cap:
  - Order 24" pass-thru harness with power block A871124.
  - Will not have power at first cut-out from infeed.
- For NY infeed through a power rail cut-out:
  - Order 48"-72" pass-thru harness with power block. *Harness width must match power rail width.*
  - Will not have power at cut-out location used for infeed.
- For any power rail not used for infeed, order standard electrical power harness.

Hardwire Chicago Code (page 416)

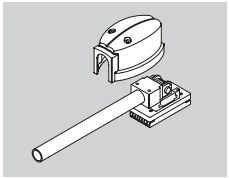
- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- The base pathway, junction box (model 873600) clips directly into receptacle locations and can be used both single- and double-sided.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.
- Power entry can be routed from the floor into a junction box (model 873600).



Electrical Infeeds

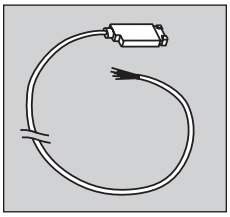
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

Base Infeed (page 415)



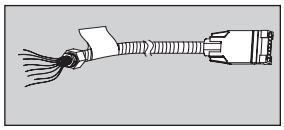
- Sealtight base pathway power infeed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.
- A jumper is required to connect base pathway power to beltline.

Sealtight Electrical Infeed (page 415)



- Sealtight electrical infeed cable is used with footed panels.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that infeed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

Power Infeed (page 415)



- Power infeed connects to a prewired electrical harness in the power rail.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power infeed needed.

Reference Page

* Select power harness models (A8712XX), with the last two digits corresponding with the panel width into which the component is to be positioned.
The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

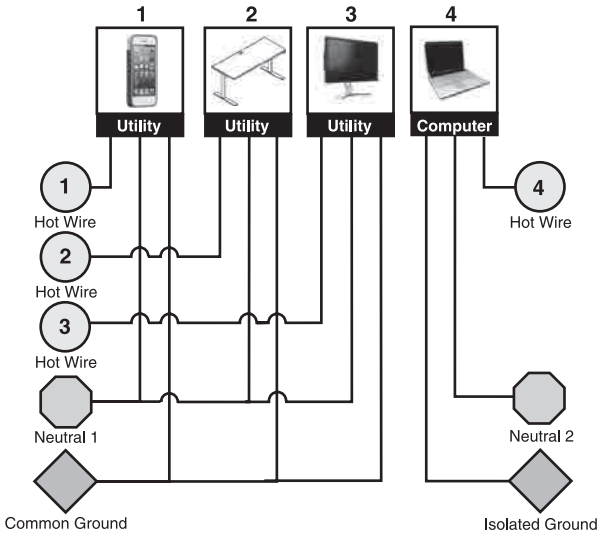
Flexconnect™ Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

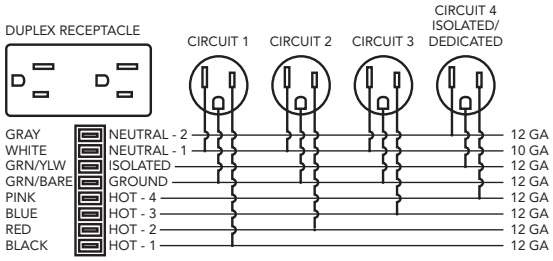
You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an “A” suffix and appear in a gray box in this pricer.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

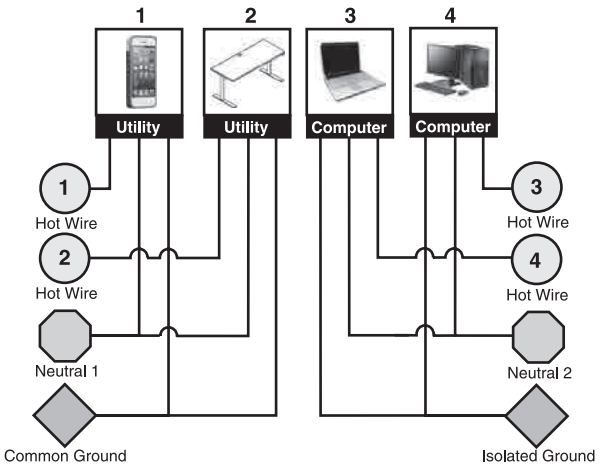
Four-circuit, 3 + 1 Receptacle Option



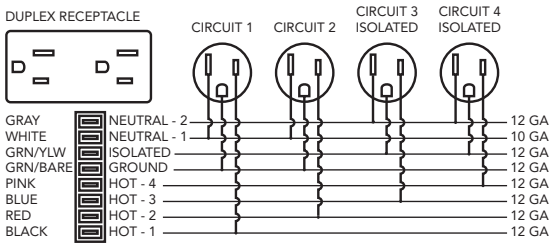
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



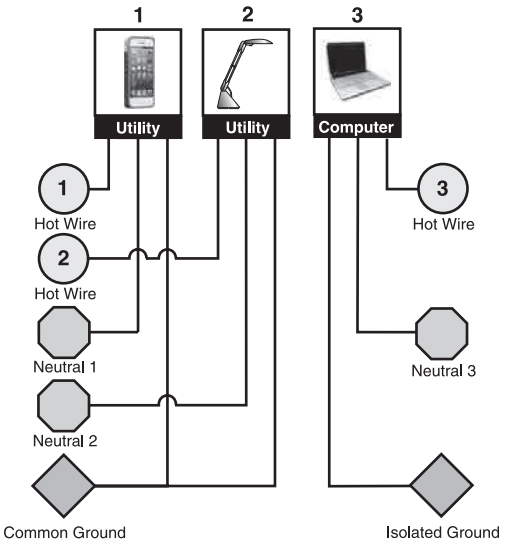
Four-circuit, 2 + 2 Receptacle Option



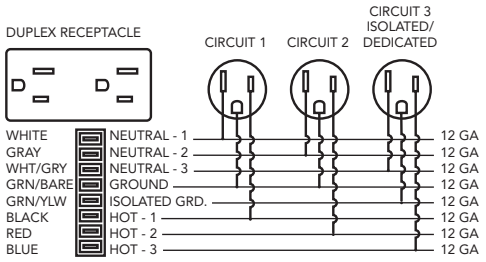
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Altitude System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A873501**	Common Circuit-2 (1) **A873502**	Common C ircuit-3 **A873503**	Iso/Dedicated Circuit-4 **A873504**
	2 + 2	Common Circuit-1 **A873501**	Common Cir- cuit-2 **A873502**	Isolated Circuit-3 **A873506**	Isolated Circuit-4 **A873504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

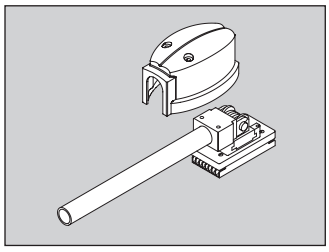
- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust-colored.

Duplex Receptacle

15 amp receptacle

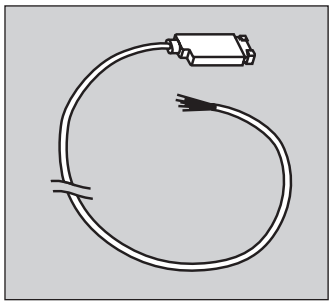
Infeeds

- Power infeed cables deliver power from building to A8 Power Rail's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of infeed cables depending on individual power requirements.



Base Infeed:

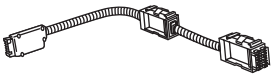
- Sealtight base pathway power infeed mounts into any receptacle position in the power rail housing.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.



Sealtight Electrical Infeed:

- Sealtight electrical infeed is used for power entering through the end cap.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of the power rail out to be connected to power.

Power Harness



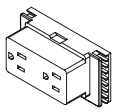
Electrical power harnesses are used to distribute power in the power rail. **Power blocks** on electrical power harness accept duplex receptacles.

- Electrical power harnesses are used to distribute power in A8 Power Rails. Harnesses must be installed in each power rail housing.
- Specify harness length to match rail housing length. Each power harness accepts four duplex receptacles (two on each side of power rail housing).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in power rail housing.

Power Blocks

- Power blocks snap directly onto brackets in the power rail and accept receptacles (sold separately) on each side of harness.

Duplexes



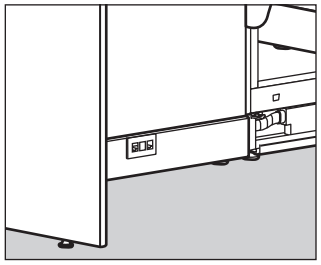
Duplex Receptacles

Receptacle Color Recommended to Coordinate with Paint Color

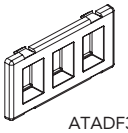
Paint Color	Receptacle Color
Bungalow — P7C	Muslin — EU
Champagne Metallic — PR5	Muslin — EU
Cinder — P7Q	Brownstone — EY
Fossil — P28	Flint — E9
Gunmetal Metallic — PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Pebble — P8R	Loft — EV
Pewter — P8D	Flint — E9
Platinum — PR2	Loft — EV
Platinum Metallic — P42	Silver — E5
Salt — P8C	Silver — E5
Titanium — P8T	Silver — E5

- Duplex receptacles snap into power blocks of power harnesses.
- Duplexes are available in multiple colors. See inside front cover for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3 or 4.
- Duplexes are model specific to support either 3 + 1 and 2 + 2 electrical infeed; or have an "A" suffix and are designed to support a three-circuit separate neutral electrical infeed.
- At least one duplex must be installed in upper housing side of rail housing assembly (see page 413, "Working with Electrical and Data").

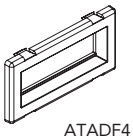
Data



Voice/Data Receptacle



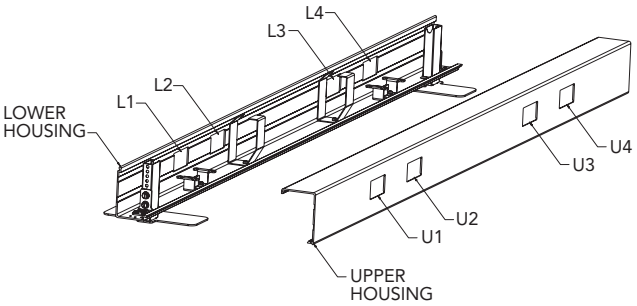
ATADF3



ATADF4

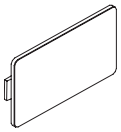
Data Faceplates:

- Fit into data port openings in Power Rail Housing.
- Due to rail housing depth, data modules should not be used back-to-back.



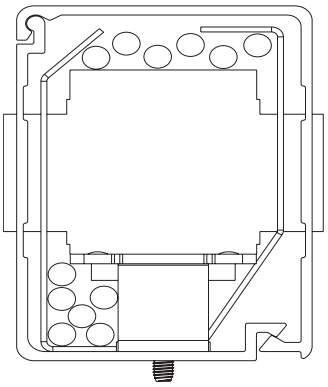
- Ports 1 and 4 accept duplexes, port covers and base infeeds.
- Ports 2 and 3 accept data and port covers.
- Either U1 or U4 must always contain a duplex.
- Data cannot be back-to-back (data in L2 + U2 or L3 + U3 combinations are not permitted).

Port Cover



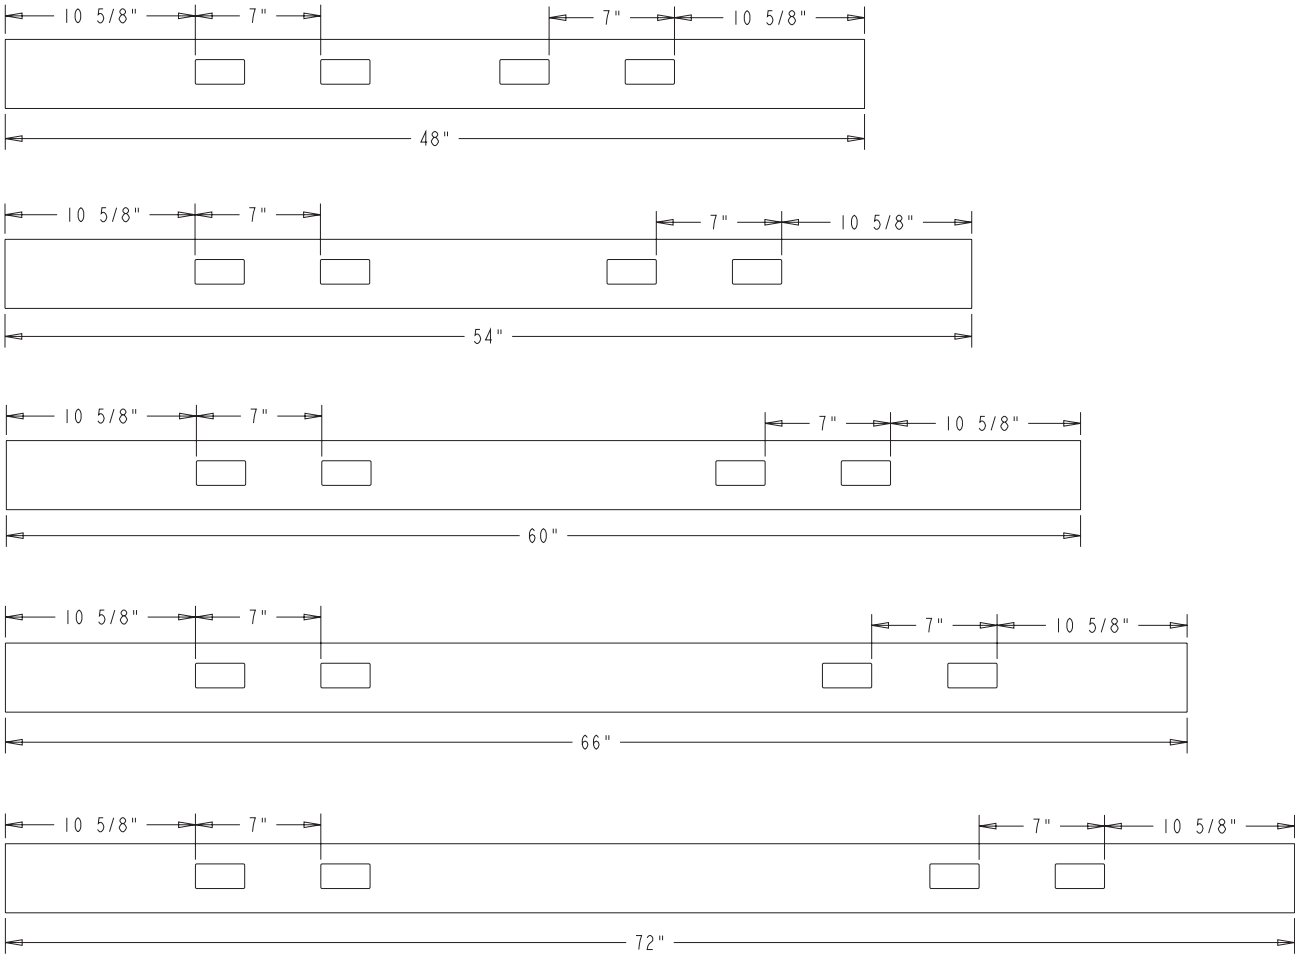
- Port covers must be used where no duplex or data faceplate is present.
- Fits into A8 Power Rail port locations in place of duplex receptacles and data faceplates.
- Does not fit into port sizes of other product lines.

Cable Capacity



- The power rail housing allows continuous voice and data lines to run without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Lower cavity allows 6 voice/data cables (¼" dia).
- Upper cavity lay-in allows 6 voice/data cables (¼" dia).

Power Rail Receptacle Locations



- For example, in a four-circuit system:
  Circuit 1 — calculators, fans, etc.
  Circuit 2 — task lights (could be wired to wall switch)
  Circuit 3 — CRT or flat screen monitors
  Circuit 4 — CPUs
- Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

For specification information see page 411.

Note: A3 height adjustable tables discontinue 12/31/20. See Allsteel's new A6 Height-Adjustable table for an updated, comprehensive offering.

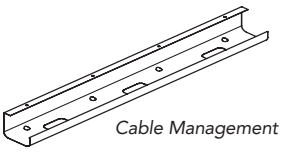
Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 393)
- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¾". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Any open span 60" and greater requires an external support channel. Altitude corner cove and 66"-72"W rectangular worksurfaces include an external support channel.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A5 load capacity is 300 pounds for 2-leg models and 450 pounds for 3-leg model, including weight of worksurface. A3-T load capacity is 250 pounds for 2-leg models and 400 pounds for 3-leg models, including weight of worksurface.

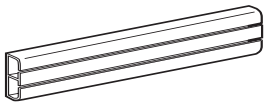
Height-Adjustable Bases (page 428)
- Electric height-adjustable base units are available in four styles: A3-T Base with two legs, A3-T Base with three legs, A5 C-Legs with two legs, or A5 C-Legs with three legs.
- A3-T models travel at 1.4" per second. A5 models travel at 1.5" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A5 and A3-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 426.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ⅛" adjustment on A5 and ½" adjustment on A3-T.
- The no crossbar design of the A5 exceeds knee clearance recommendations and provides optimal undersurface mounting capability.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 84"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.

Memory Controls (page 428)
- A3-T models come standard with control box with 4 memory set user heights.
- Optional control paddle allows for 4 memory presets, Bluetooth conductivity, and reminder functionality with A5 model.
- ATBCMC is not compatible with A3 tables.

Cable & Wire Management



Cable Management Tray



Wire Management Channel

Cable Management Tray (page 395)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 395)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 395)
- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 395)
- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Hinged Trough (page 395)
- Mounts beneath a worksurface. Used to conceal control box kit and extra cord slack.
- May be used in conjunction with quad tap unit UNQTMP to reduce the number of cords routed from a worksurface to a beam.
- Must specify at least 24" shorter than worksurface.
- Trough is user accessible, but may be fastened to worksurface if desired.

Quad Tap (page 395)
- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Note: A3 height adjustable tables discontinue 12/31/20. See Allsteel's new A6 Height-Adjustable table for an updated, comprehensive offering.

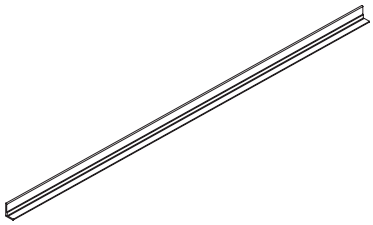
Reference Page

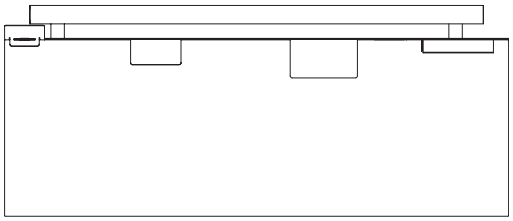


Worksurface Mounted Rail (page 430)
- Aluminum extrusion designed to mount to flat edge worksurfaces. Comes with rail and hardware for mounting.
- Mounted rail extends ¾" on underside of worksurface which may interfere with the mounting of storage and screens.
- Widths available for Altitude tables 12" through 66" in 6" increments. Can pass across seams of ganged worksurfaces in tethered applications.
- Passes behind worksurface bracket on tethered applications.
- For freestanding applications rail should be 6" shorter than worksurface (i.e. 54" rail for 60" worksurface).

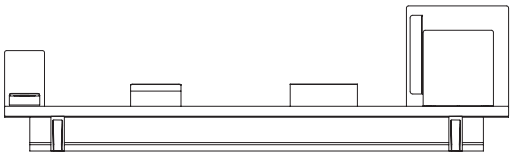
Rail Accessories

Side View

Top View



Phone/ Tablet Stand | Pencil Holder | Rail Mounted Shelf | Vertical Paper Tray



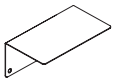
Front View

Rail Mounted Accessories

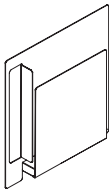
Not recommended for use on panel systems with attached worksurfaces due to fit up issues created with worksurface and panel. Adding accessory rail shifts worksurface — 3/16" away from panel along that edge. Forcing worksurface into place crushes fabric tile and with tiles of other material (steel, marker board, etc) is likely to scratch, dent, or otherwise damage tile during installation.

U9TM Phone/Tablet Stand (page 430)
- 6⅝"H x 4¾"W and angles back 1¾".
- Has a ¼" x 1" slot in bottom flange to allow for routing cables. Requires 1¾" space behind worksurface edge in order to be used.

U9TP Pencil Holder (page 430)
- 2⅝"H x 6"W x 3"D.
- Holds approximately twenty #2 pencils.



U9TS Rail Mounted Shelf (page 430)
- 8"W x 4½"D and sits 2⅝" higher than top of worksurface.
- Holds up to 8 pounds.



U9TF Vertical Paper Tray (page 430)
- Sits 12"H x 1½"W x 12"D from back of worksurface.
- Folder front stands 9" high from worksurface top, 1¼" space holds about 280 sheets of copy paper.

U9WTC Cord Organizer (page 430)
- Can attach to both bottom of worksurface or slides into rail.
- 4"W x ⅞"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

Universal Hook (page 430)
- Mounts to underside of worksurface and provides storage for bags, coats and purses. Can be used as a horizontal wire manager.

Extensions™

Extensions — Introduction

Extensions accessory line by Allsteel is designed to help you create your own space.

- **Create a unique space**

  Each person is unique, no one person works exactly like another, and different tasks require different tools. Extensions work tools allow each person the ability to create a unique environment that is all their own. Lots of paper to manage? Need active files within arm's reach? Want to maximize your worksurface space? Need light somewhere other than below a cabinet? Whatever the task, we have the tools to accommodate your workstyle.

- **Create a comfortable space**

  With a full line of organization, ergonomic, and illumination tools, Extensions allow you to create a comfortable, ergonomic work area. Organization tools keep important items visible and within your reach. Ergonomic tools help you stay comfortable while working. Illumination tools allow you to put your light where it suits you.

- **Create an organized space**

  Tired of all the piles of paper building up on your worksurface? Organization tools house your materials and keep them in an orderly fashion. With a combination of hanging or freestanding organizational accessories, Extensions let you manage everything from binders to paper clips.

- **Organization tools**

  Work tools are a durable metal construction. Extensions allow you to manage your workspace smartly with tools like the phone caddy to elevate the phone off the worksurface, landscaped mail box trays to minimize worksurface intrusion, folder holders and tool box pencil holders that hang off the slat rail and each other.

  Increase your efficiency with organization!

- **Ergonomic tools**

  Ergonomics is more than just comfort, it's flexibility and safety. The adjustable keyboard options allow users to maintain and vary comfortable wrist and arm positions throughout the day, whether typing or mousing. Monitor Arms offer versatile adjustability while providing optimum comfort for the eyes, neck, and shoulders.

- **Illumination tools**

  Sleek and flexible, our lighting components offer you several choices. Recessed task lights conserve space and feature electronic ballast for longer bulb life and cooler operating temperature. LED tasklights' slim design blends in with its surrounding while utilizing energy-efficient LED technology. The Link light offers award-winning style to a highly versatile and energy efficient light.

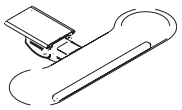
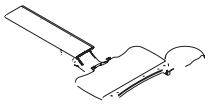
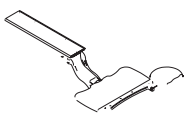
AKTSHORT Keyboard Support (page 433)



- Lift and lock intuitive height adjustment.
- Compatible with Altitude Height Adjustable Tables
- Positive and negative tilt for best ergonomic positioning.
- +10°/-20° tile adjustment and 360° rotation provides support of neutral position of shoulders, arms and wrists while accommodating multiple working postures.
- Surpasses ANSI/BIFMA standards.
- Black powder coat finish.
- Patented secondary slide and unique arm design provide minimal footprint.

AKTMID and AKTLONG Keyboard Support (page 433)





- Lift and lock intuitive height adjustment.
- Positive and negative tilt for the best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Non-handed mouse tray can be moved from right hand to left hand side.
- Surpasses ANSI/BIFMA standards.
- Black powder-coat finish.

Keyboard Spacer Kit (page 433)

- Keyboard Spacer Kit required for mounting under Altitude worksurfaces.
- Kit provides ten spacers and hardware for mounting keyboard supports beneath an external worksurface support channel.
- Spacers are 2⅛"H providing more room beneath surface for mounting.

CPU Hammock (page 433)

- Features 360-degree swivel with an 11" track.
- Load capacity is 75 lbs.
- CPU must be minimum of 3¼"W with maximum dimension of 64" in perimeter.
- Handy adjustment tool stores within unit.
- Safety feature prevents accidental release of straps and straps can be adjusted while CPU is installed.
- Can be used on Height Adjustable Tables as long as it is attached with spacer model AKMH. Take into account required leg room for users.

For specification information see page 432.

S *Shippable by small-package carrier.*

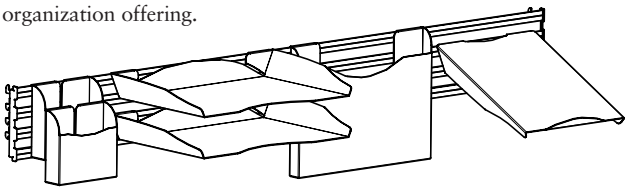
Allsteel's tool rail works in conjunction with a variety of accessories. Modular accessories free up worksurface space and provide orderly storage that is well within reach. Units can be arranged and rearranged to respond to changing workflow. The work tools that attach to the tool rail are:

- Mail Box
- Folder Holder
- Phone Caddy
- Binder Bin
- Tool Box
- Clip Caddy™
- Sidebar™ Personal Shelf
- Paper Wave™
- Gripper Clip

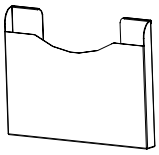
Additional accessories that work with the **tool rail work tools** aesthetically are:

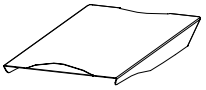
- Bookends
- Freestanding Mail Box

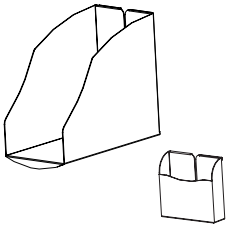
Coat hooks, marker boards and center drawers round out the organization offering.

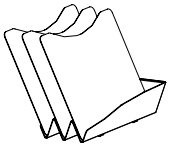


Tool rail, shown above, is height-adjustable in 1" increments using slots in panels or metal hutch. Tool rail shown with two tool boxes, two mail boxes, folder holder, and phone caddy. Folder holders and binder bins extend below a tool rail. Paper Wave and contents extend above a tool rail.









Tool Rails and Work Tools (page 437)
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.
- For use with Stride®, Terrace®, Concensys®, and Optimize™ systems.
- 5" high rail (widths coordinate with panels).
- Attachment via vertical reveals.
- Can be hung from wall track. Good solution for above copiers.
- Systems tool rail is off-modular — can be used on a panel of equal width or one size smaller.
- May span two panels of appropriate size, i.e., 60"W Tool Rail on two 30"W panels.

Tool Rail for Hutches (page 437)
- Will work on Universal, Terrace, Optimize, and Concensys system hutches produced after July 2, 2000 and Align™ metal hutches.
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.

Mail Box (page 438)
- Holds standard letter-size paper and inter-office envelopes.
- Minimal horizontal intrusion.

Folder Holder (page 438)
- Holds manila envelopes.
- Is capable of hanging on other folder holders to maximize space.
- Stores vertically for easy access to files.

Phone Caddy (page 438)
- Holds telephone at optimum ergonomic angle.
- Wire management cut-outs.
- Accommodates standard phone sizes.

Binder Bin (page 438)
- Holds folders, binders, and manuals.

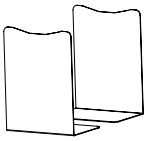
Tool Box (page 438)
- Holds pencils and other writing utensils, large post-it notes, and other desk top accessories.

Clip Caddy™ (page 438)
- Holds paper clips and other small objects.

Sidebar™ Personal Shelf (page 438)
- Holds office supplies and personal effects.

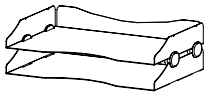
Paper Wave™ (page 438)
- Provides 3 fully divided slots for organizing files.
- Keeps papers from "bowing" at bottom.

Gripper Clip (page 438)
- Binds project papers together.
- Mounts to tool rail or tool tile.



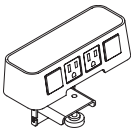
Bookends (page 438)
- Can be used on shelves or in cabinets.
- Used to hold books, binders, and catalogs upright.

Freestanding Mail Box (page 438)
- Incorporates similar aesthetic to mounted Mail Box.
- Mounting brackets allow for free access from front and back.
- Sold in pairs of two; will stack up to eight high.
- Individual mail box dimension = 1¾"H.
- Stacking brackets are black.

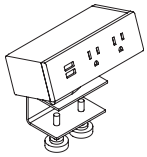


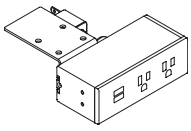
Coat Hook APMC6 (page 438)
- Hangs directly into slotted Stride®, Terrace®, Optimize™, or Concensys® panel frame.
- Use for coat or bag.
- Package of six.
- Available in black only.

Power/Data Modules — Clamp On Worksurface (page 444)
- On-surface mounting option, fits on any worksurface with a 4" overhang.
- 6' Power cord. UL Listed.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings. Many of the AMP, AT&T, Krone, Leviton and most commercial data terminals can be used.



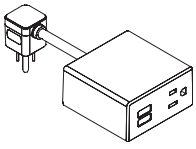
Power/Data Modules — Clamp On Worksurface (page 444)
- Worksurface clamp can be used on any surface with a 2½" overhang.
- Must be installed at time of initial worksurface installation if installing between a worksurface and panel.
- 6' Power cord. UL Listed.
- The USB hub allows simultaneous powering of 2 USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capacity is limited and may not charge all devices.
- Qi compatible wireless charging available on select models.





Power/Data Modules — Under Worksurface (page 444)
- Under surface mounting can be used on any surface with a 5" clearance.
- 6' Power cord. UL Listed.
- Hardware not included.

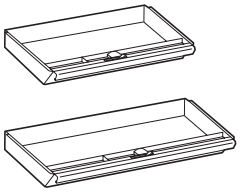
Worksurface Power/Data Module (page 444)
- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires ⅜" gap. Consider whether ⅜" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining ⅜" gap may not be possible with worksurfaces that are panel wrapped.



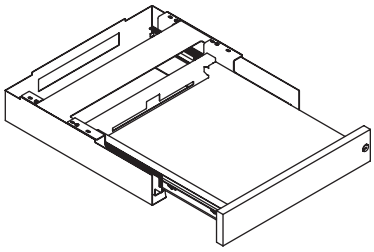
Miki Power Modules (page 444)
- Table top and undermount units.
- Hardware not included on undermount.
- 6' Power cord, UL Listed.
- 1 AC power and 1 dual USB configuration.

Vesta Mobile Power (page 444)
- 3 AC power simplex, 1 dual USB-A, 1 USB-C configuration.
- 10' Retractable power cord, UL Listed.
- Unit weighs 13 lbs.

Reference Page



Metal Center Drawers (page 439)
- All metal center drawers feature pencil trays with three compartments for storage.
- Center drawers will not fit in center of 24"D worksurfaces which are wider than 60" due to location of center support bracket.
- For locking specifications, see pages 342-343 in the Desking and Benching Price & Specification Guide.
- Ball-bearing slide suspension.

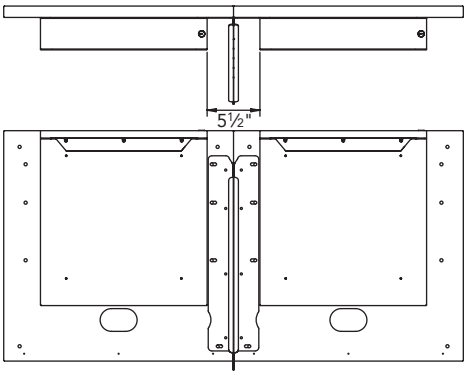


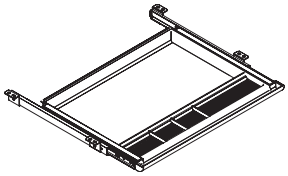
Laptop Drawer — U7WDA (page 439)
- Drawer body made of sheet metal.
- Drawer front made of ¾" particleboard with laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17⅞"W x 18"D x 3⅜"H Outside (interior 13"W x 16"D x 1⅞"H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/glides fully retracted is 24¾".
- Does not interfere with Further leg mounting plates so drawer can be placed directly next to either a system or table leg.
- When being placed next tower storage using the tower ell bracket (Z6LB) to support surface the drawer must be inset 3" to clear the ell bracket.
- Can be placed directly next to any support storage from any Allsteel product line (excluding towers).
- Flat brackets — drawer must be offset 3" from seam between surfaces to clear the bracket. See illustration at left.
- Can be used with rabbet edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

Flat Brackets

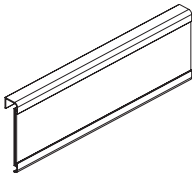
Front View

Top View





Polymer Center Drawer - ACD1 (page 439)
- 20½"W x 17"D x 2"H
- Available in black only
- Made from ABS.
- Minimum clearance for mounting: 23"W x 16¼"D x 2"H.
- Retracts on 16" ball-bearing slides.
- Can be used on worksurfaces with Height Adjustable Bases as long as it is attached with spacer model AKMH.
- Can store up to 25 lbs.



Name Plate (page 438)
- Comes in a 10-pack.
- Metal backer installs under a Terrace or Optimzie top cap, can be used with frameless glass.
- Cover is a transparent polycarbonate insert.
- Full plate is 8½"W x 2⅜"H.

For specification information see pages 434-435.

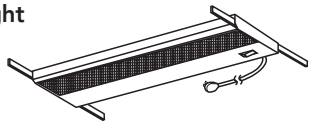
Allsteel Extensions offers Illumination in three styles — Undercabinet LED Light, Wand Light, and Link Light.

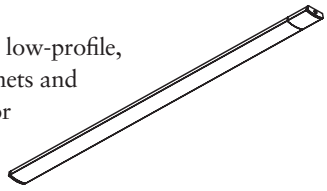
Recessed Undercabinet LED Light



Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with LED strips.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

Undercabinet LED Light

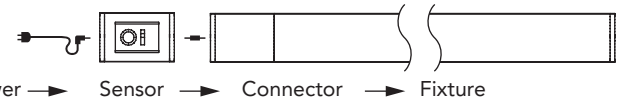


The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek ½" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

CONNECTION SEQUENCE*



*Cannot deviate from this sequence

Recessed Task Lights (page 442)

- Black Metal Construction with 9' long black cord attached to right rear corner of the fixture.
- LED strip comes installed within light.
  –50,000 hour life span
  –120V-277V
  –CCT 4000K
  –CRI 80+
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.

Undercabinet LED Lights (page 442)

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).
- 20W power supply for 20W 31" unit (.166 amps).
- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.

LED Light Combinations Must Not Exceed 60W in Combination	Power Usage
6X 17"	60W
3X 31"	60W
1X 31" + 4X 17"	60W
2X 31" + 2X 17"	60W

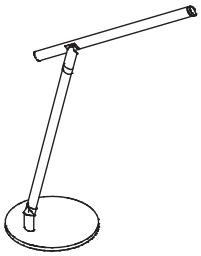
- The combinations that could max out 60W are featured above. *Daisy chained units have a power limit of 60W from one power entry. 17W units use 10W and 31W units use 20W.*
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).
  Example: Daisy-chain 4 – 17" undercabinet LED lights:
  Specify: 1 ALED17U60
  Specify: 3 ALED17UJMP30 with 10" jumper cord
- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).
- 3500K color temperature.
- 131 footcandles at 18" on ALED31U; 76 footcandles at 18" on ALED17U.
- Magnetic or screw-mount option — attachment hardware included.
- On 20 watt models, power drive is attached to plug: allow 1⅞"D space at outlet.
- On 60 watt models, power drive brick is in center of cord.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

Overhead Length	Suggested LED Sizes
24	17
30	17
36	17
42	31
48	17 + 17
60	31 + 17
72	31 + 31
Note: LED lights may need to be positioned along length properly to allow jumping to additional overheads. Suggested sizes above are recommendations for single overheads to provide as much light along length of overhead as possible.	

The suggested sizes factor in 4 inches of room for the power inlet and occupancy sensor (optional).

Reference Page

Wand™ Task Light



Wand freestanding task light offers a clean, simple design along with powerful LED technology to illuminate the workspace. The swivel base and arm tilt allow users to position the light just where they need it. The 7.7 watt LED light offers efficiency and long life, providing up to 25 years of daily use. The slim, sleek design makes it easy to integrate into any workspace. Wand task light is 97% recyclable. Occupancy sensor and/or charging models available.

Wand LED Freestanding Task Light (page 443)

- Available in Silver or White. 9'4" cord is Silver.
- Full range dimming from 100% – 10% with last state memory.
- Uses 5W at highest setting and as low as 1 watt at its lowest setting, providing 75 to 12.7 footcandles of light, respectively (16" above worksurface).
- 7½" round swivel base and 16½"H tilt arm allow versatile positioning of the 13" lampshade.
- Designed for 50,000 hours of life.
- Color Temperature: 3500K. Color Rendering Index (CRI): 80.
- Materials: aluminum arm and lampshade, steel base.
- Weight: 4.4 lbs. 97% recyclable, 76% post-consumer.
- Certifications: UL and CUL. TAA compliant.
- Occupancy sensor available with automatic shut-off after 15 minutes if no motion is detected.
- USB model features USB-A (1), USB-C (1) charging within base of unit.
- USB model also features occupancy sensor. 7.5W (A) & 18W (C) power consumption.

For specification information see pages 440-441.

Pivot Standard Weight Monitor Arms

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 18.75" extension, and 10" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Standard weight arms utilize a tension spring that allows for effortless adjustment of monitors to proper ergonomic positions.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6-17 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Pivot Clamp mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot or other monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Slider Mount

- Provides 11.8" of horizontal movement.
- Allows for wider monitors to be used on dual monitor arms and sit flush side by side.
- Not compatible with Pivot Heavy Duty Series.

Pivot Heavy Duty Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 20.75" extension, and 12" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 8-35 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 2 monitors weight 4-17.5 lbs each.
- Pivot Clamp mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot or other monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Post Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with 21" extension and 10.6" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6.5-17 lbs per arm.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ⅞" –2" thick surfaces; grommet mount requires hole diameter of 3⁄16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Silver color option with grey wire management only.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Single and dual models have a post height of 17.7"; Triple monitor model has a post height of 27.5".
- Monitor arms cannot be clamp mounted on 54"D Stride benching applications, ZG54ELN, (27"D worksurfaces) due to beam obstruction under the worksurface.
- Pivot is compatible with 54"D Stride benching applications when worksurface grommets are specified and Pivot grommet mount is installed.
- Pivot Clamp or Grommet mounts can be specified with 60"D (Z660ELN) and 72"D (Z672ELN) Stride benching applications.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

Pivot Counterweight Kit

- Counterweight Kit to be used with monitors weighing less than 6 lbs.
- Gray color only.
- Counterweight weighs 1 lb. 6 oz.

Pivot Conversion Kits

- Kit allows user to transform single monitor arm (Standard, Heavy Duty, or Post) into Dual Arm configuration
- Available in black and silver, Post arm only available in silver
- Required wire management included
- Once assembled, will aesthetically emulate dual configuration of chosen arm

For specification information see pages 446-447.

FSC Certified Wood at Allsteel

See page 451 for more information.

AWARE

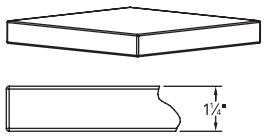
Aware Collection

Allsteel designed a flexible and comprehensive collection of active learning furniture. The Aware Collection consists of buffet and recycle credenzas, mobile and wall-hung marker boards, and unique shaped table tops that offer a timeless design. Look to the Aware Collection brochure for full details.

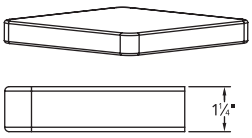
Materials and Edge Treatments

Aware tables offer functional flexibility and aesthetic versatility to provide one, simple solution for the entire office. The broad selection of materials and finishes ensure that the tables look beautiful in any application.

Laminate Edges

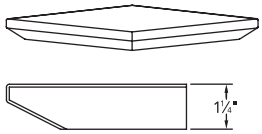


Flat Edge

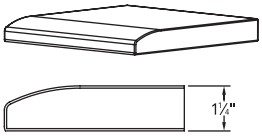


T-Mold*

Fluid Form Edge

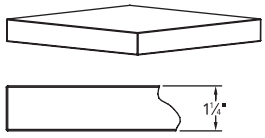


Knife Edge — All 4 Sides



Eased Edge — Front Side Only

Veneer Edge



Square Edge

T-mold tops will have a ¾" radius on all corners.

24"D or 30"D Knife edge rectangle tops feature a shaped edge on all four sides. Eased edge tops feature a shaped edge on one side.

Allsteel Fluid Form is an advanced surface material that offers a seamless solid base layer with protective coating. Its seamless 3-dimensional edge profile eliminates the need for edge banding or T-mold making it ideal for horizontal surfaces.

FSC Certified Wood at Allsteel

Forest Stewardship Council® (FSC) certification promotes the sustainable harvesting of forests worldwide. The FSC program sets requirements for the management of the forest and for everyone that handles the wood from forest to product. Allsteel has an FSC Chain of Custody and can provide FSC certified products to customers who choose to order them. FSC products can contribute to LEED projects. To order FSC products, the "FSC" option must be selected in the model code at time of order. For more information, please contact Customer Support at 888-255-7833.

FSC Trademark License code FSC-C014704.

Space Requirement Guidelines

Tables:

- 24"–30"W per person depending on materials
- 4' between tables
- Breakout Rooms 10–12 sq. ft. per person
- Computer Training 20 sq. ft. per person

Aware Tables — Maximum Space Reduction

Space reduction when storing:

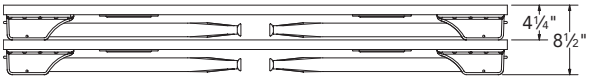
– up to 71% by nesting
– up to 82% with table truck
– up to 86% by folding

Percentage will vary with quantity and size of tables.

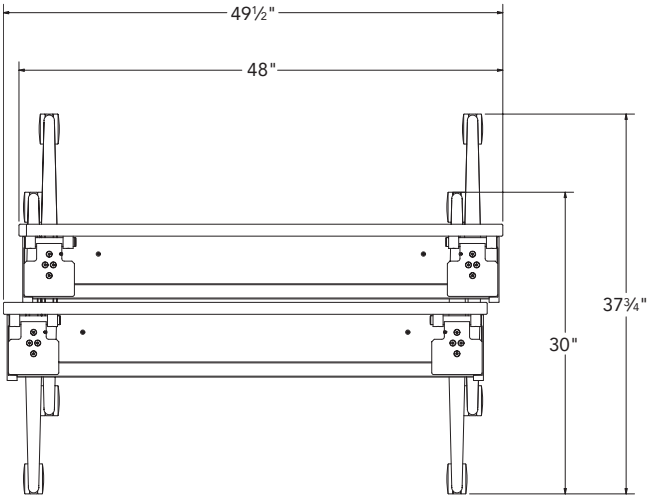
Space Savings With Nesting Tables

1. Start with table size in nested position:
   18"D table = 18"D
   24"D table = 24"D
   30"D table = 30"D
   36"D table = 36"D
2. Add 7¾"D for each additional nested table (no additional required if modesty panel is attached).
   Example: A 24"D table in nested position is 24"D.
   Add 9 additional nested tables
   (9 x = 69¾"D).
   Depth requirement for ten nested tables is 93¾"D.
3. Add 1½"W for each additional nested T-Leg table to the width of the widest table. Maximum 6" additional width. (3"W for V-Leg; maximum 12" additional width)
   Example: Ten 72"W tables are nested.
   72" + 6" = 78"W
4. Total space for 10 nested tables above is 93¾"D x 78"W.
5. Space saved by nesting is over __ square feet.
6. Table height of Aware nested tables:
   18"D table = 37⅞"H nested
   24"D table = 41⅞"H nested
   30"D table = 44⅞"H nested
   36"D table = 47⅞"H nested

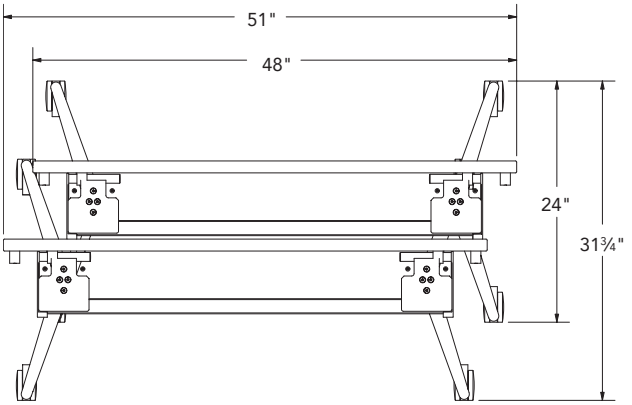
Folded Tables Standard — Side View



T-Leg Nested — Top View



V-Leg Nested — Top View



POWER/DATA PORT CUTOUTS FOR AWARE TABLES

When specifying Aware tables, grommets or power/data port cutouts may be specified for power/data. Grommets are available in plastic or oval (shown at right). If cutouts are specified, a pop-up power/data port must be specified for use in the cutout. Cutouts are unfinished and cannot be used as grommet openings. The chart below indicates which grommet or cutout options are available on Aware tables.

Code	Position
AGO	No grommets or cutouts.
AG1	Single grommet, centered left to right, 2"from back of surface.
AG2	Pair of grommets, approximately 3" in from each side, 2" from back of surface.
ATC	One cutout for Pop-up Power, centered left-to-right and front-to-back. Only on 30"D and 36"D tables. Do not specify on folding or nesting tables.
ATE	One cutout for Pop-up Power, centered left-to-right, 2" in from back of surface.

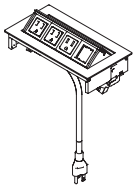
AWARE

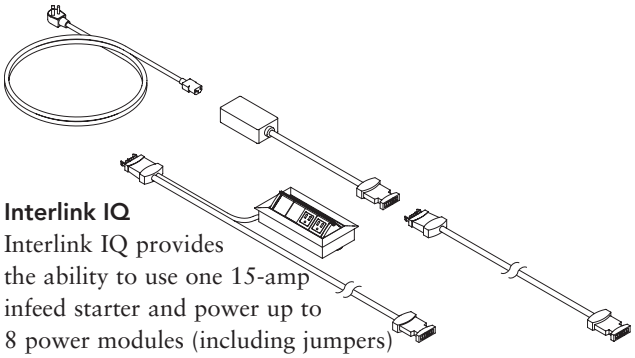
ELECTRICAL OPTIONS

Aware Tables offer three power options: Corded, Interlink IQ, or Hardwire. Installation and use of electrical systems, the number of receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national electrical codes. Verify code requirements before ordering. Chicago requires hard wiring. Chicago and New York do not permit use of Interlink IQ components.

Corded

Corded models plug directly into an outlet. Corded modules cannot plug into other corded power modules. In order to plug into other units the unit would need to be hardwired. When routing corded models to a wall outlet, the maximum amount of cord that can be exposed outside of the furniture is 6 feet. (New York, check local code.)



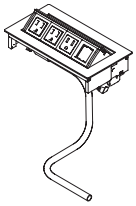


Interlink IQ

Interlink IQ provides the ability to use one 15-amp infeed starter and power up to 8 power modules (including jumpers) off of one infeed starter. Interlink IQ provides a visual indicator of system status. LED illuminates green when you are connected and ready to plug in. A red light indicates you have linked too many units. See page 454 for examples of multiple tables using Interlink IQ components.

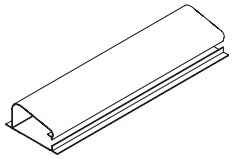
Hardwire

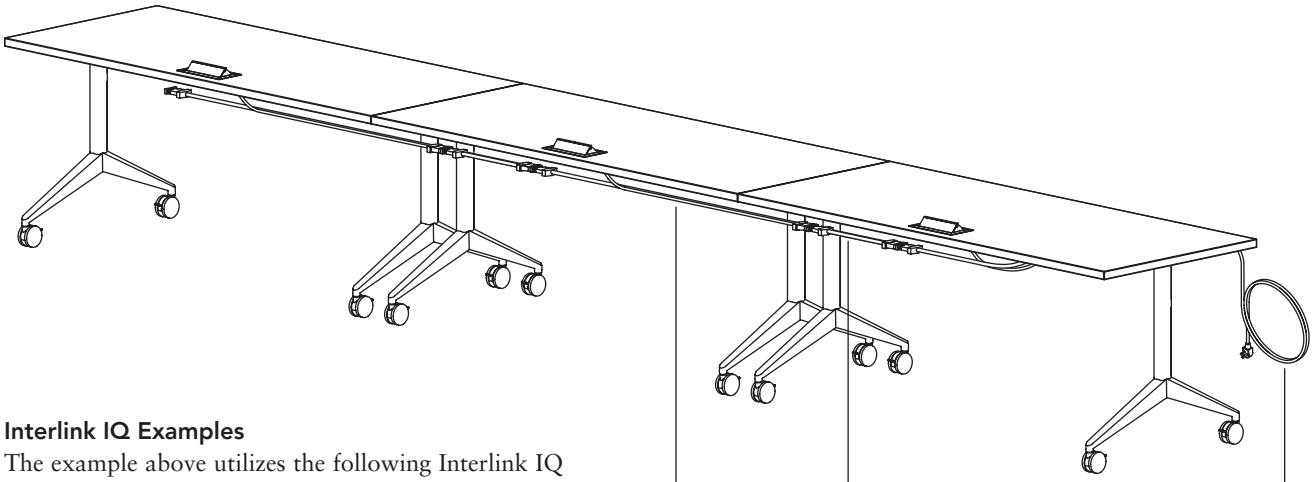
Hardwire models are provided with 10' of sealtight cable. Customer must furnish junction boxes, conduit, and additional wire to be in compliance with local and national electrical codes.



Wire Trough

Attach wire trough as needed to the underside of tables to support cords.





Interlink IQ Examples

The example above utilizes the following Interlink IQ components to power three 72"W Aware tables:

3 – Interlink IQ 60" Power Harnesses model number: AW4QH60P (provides two AC power receptacles per unit)

2 – Interlink IQ 36" Jumpers model number: AW4QJ36

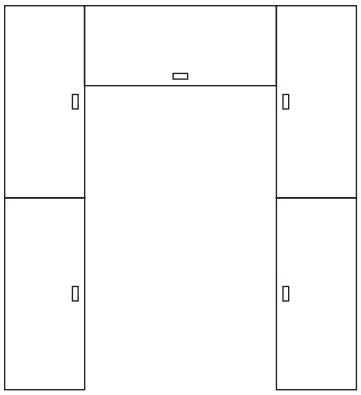
1 – Interlink IQ Starter model number: AW4QBI

The example below utilizes the following Interlink IQ components to power five 72"W Aware tables:

5 – Interlink IQ 60" Power Harnesses model number: AW4QH60P (provides two AC power receptacles per unit)

2 – Interlink IQ 36" Jumpers model number: AW4QJ36

1 – Interlink IQ Starter model number: AW4QBI



- Order folding legs separately — see options on page 458.
- Specify grommet location, type, and color — see page 454.
- Eased edge tops feature shaped edge on front side.
- Optional electrical components, wire trough, modesty panel, and ganging hardware ordered separately — see pages 475-478.

Leg Options for 24"D Table Tops 60"W – 96"W

- Order Top separately — see options on page 463. "T" suffix top for T-legs and "V" suffix top for V-legs.
- Leg finish options include painted (color specified) or polished. Legs require some assembly. Standing height models come with external stiffener.
- Legs are sold in pairs. Nesting models include beam, order width to match width of top.
- Select legs below with top from previous page to create either a seated height 29"H table or a 42"H standing height table. Glides provide ½" of adjustment.
- All casters are urethane tread locking casters. Choice of Black or Silver.

Leg Options for Polygon and Crescent Table Tops

- Order Top separately — see options on page 473. "T" suffix top for T-legs and "V" suffix top for V-legs.
- Leg finish options include painted (color specified) or polished. Legs require some assembly.
- All casters are urethane tread locking casters. Choice of Black or Silver.
- Legs are sold in pairs. Nesting models include beam.
- Legs below with top from previous page creates seated height 29"H table. Glides provide ½" of adjustment.

Modesty Panels:

- 9¾"H x ⅛"D.
- Modesty panel must be removed from tables prior to folding.
- Tables may be nested with modesty panel attached to table. Nesting depth of additional tables does not increase.
- Modesty panel is undersized by 9⅜" from width of table top.
- Nesting V-leg models require one size smaller modesty panel than T-leg. Example: 42"W Nesting V-leg table requires AW4HM36. See below.

Universal Hook

Mounts to underside of worksurface and provides storage for bags, coats and purses. Hooks can be used as a horizontal wire manager under worksurface.

Ganging Bracket

- One-step tool-free operation.
- Tables have pre-drilled holes for proper installation and alignment of ganging mechanism.
- Includes two ganging links and two screws. Recommend one package of 2 brackets per table.

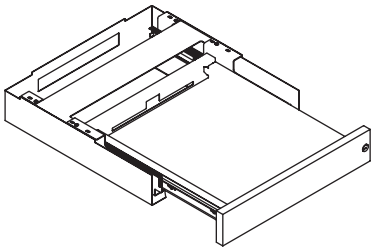
Reference Page



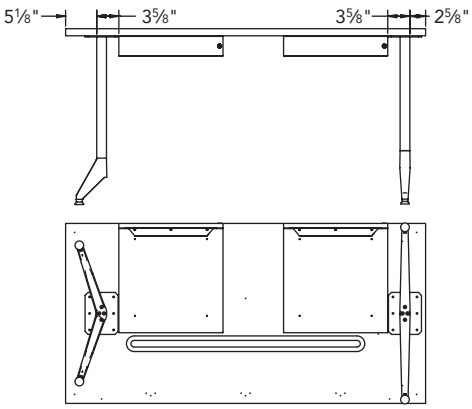
Laptop Drawer

- Drawer body made of sheet metal.
- Drawer front made of ¾" particleboard with laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17⅝"W x 18"D x 3⅜"H Outside (interior 13"W x 16"D x 1⅞"H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/ glides fully retracted is 24¾".
- Can be used with rabbet edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

Aware®

Front View

Top View



Aware Tables

- Can only be used on 30" deep surfaces due to interference with internal stiffener.
- Can only be used with fixed legs; no nesting or folding legs.
- Cannot be used with an external stiffener.
- T-legs- drawer must be offset from worksurface edge by edge to leg distance + 3¾" to clear leg mounting plate.
- V-legs- drawer must be offset from worksurface edge by edge to leg distance + 3¾" to clear leg mounting plate
- See illustrations at left.

Not on Merge® or Altitude® Tables

- Cannot be used with Merge tables due to interference with internal stiffener; and Altitude tables due to interference with external stiffener.

S ***Shippable by small-package carrier.***

Wire Trough

- Accepts cords for routing
- Wire trough adheres and screws to underside of table surface

Wire Manager Covers

- Attaches to leg and conceals power, voice, and data cables.
- Will not work on large T folding legs.
- Cable capacity shown on page 454.

Power/Data Ports

- Corded has 10' cord and plug.
- Hardwire has 10' cord.

Interlink IQ Electrical Modules

- Pluggable, single circuit electrical system
- UL recognized as a powered table system and meets the requirements of UL 962
- Interlink IQ modules require a minimum of one Interlink IQ starter.
- A maximum of 8 Interlink IQ power modules (including jumpers) can be "daisy chained" together in any combination off of one 15-amp infeed starter.
- System status indicator:
  - Red light indicates too many units connected
  - Green light indicates appropriate use
- All models include wire management clips and hardware
- Power harness includes 60" cord and 11" tail. Daisy chained tables in line over 60"W require 36" jumper between modules.

[S] *Shippable by small-package carrier.*

- 2- and 3-Bay credenzas ship fully assembled.
- Available in solid and woodgrain laminate colors. You can select one laminate for the case and a second laminate for the front doors and back panels. Credenza top including front edge is the same color as the case.
- Painted mesh in Designer White, Flint, or Silver at top and bottom of the front and back sides of unit provides passive ventilation.
- Edge guards on mesh and wire manager protects cords and fingers.
- Grommet models feature square Silver metal grommet.
- Six leveling glides on 72"W, four glides on 48"W. Leveling range is 1".
- Credenzas are constructed from ¾" thick high-pressure laminated particleboard with 1 mm edge banding and European cam-and-pin construction.
- Units are shipped with either lock cores removed or as non-locking. Core removable lock option allows key numbers to be easily changed in the field. Cores available in the Casegoods & Storage price list on page 54. Note: Middle cabinet on 3-Bay units do not lock.
- Shelves are painted metal. Base shelves are secured, except center shelf in 72"W credenza.
- Interior bay dimensions are 22"W x 28⅛"H x 22⅜"D. Secured bottom shelves are 19"D to account for ventilation and wire management. Rated for 50 lbs.
- Removable back(s) snap on for easy component installation.
- Bottom wire management channel runs entire width of credenza.
- Optional top hung drawers (8½"H) use full extension slides; limit of one drawer per bay. Drawers cannot be used in same bay with AV rack, waste pullout, and will limit size of refrigerator.
- Slide out A/V storage rack features EIA spacing with twelve usable rack spaces.
- Units ship with one adjustable shelf per bay. Shelves are adjustable in 6" increments.
- Additional metal shelves are field-installed using supplied template, maximum of three per bay.

- Mobile marker boards are available in porcelain or laminated glass.
- Mobile tack boards are two-sided with platinum fabric and silver frames.
- Feet are 24"D x 3"H on 50"H and 30"D x 3"H on 72"H units. The low profile foot fits under most footed panels and storage.
- Foot design allows multiple boards to be nested.
- Mobile boards have two locking casters.
- Boards are shipped with feet unattached in same package.
- Porcelain boards are two-sided white, magnetic, and can be used for projection. Smooth, dry-erase porcelain surface for easy writing and clean erasing. Low odor markers are not recommended.
- Laminated glass boards are two-sided white, non-magnetic. For best results use bold marker colors. Low odor markers are not recommended.
- Marker and eraser holder comes with suction cups for attachment.
- Optional hooks are designed to hold large easel pads with slots.

- Wall-hung marker boards are available in porcelain or back painted glass.
- Porcelain boards are white, magnetic, and can be used for projection. Smooth, dry-erase porcelain surface for easy writing and clean erasing. Low odor markers are not recommended. Slim frame design, front of frame is 5/32". Frame is anodized aluminum with mitered corners and extends ¾" from the wall.
- Porcelain boards can hang either vertical or horizontal. Galvanized steel Z-brackets are included. Wall fasteners not included.
- Glass boards are white, back painted glass that are easy to clean and erase. Constructed with ¼" tempered safety glass with beveled corners, polished edges, and a steel back. Boards are magnetic. Frameless, floating mounted board extends ½" from wall. For best results use bold marker colors. Low odor markers are not recommended.
- Wall-hung boards are designed to easily attach to a solid wall without exposed hardware for an integrated appearance.
- Hanging instructions provided. See glass note below.
- Marker and eraser holder comes with suction cups for attachment.

36"H x 48"W	**AW4WB3648G**	95	3.4	**$ 3284**

Note: If multiple boards are being installed on the same wall, use caution when positioning glass panels next to each other. Due to the weakest point of tempered glass being along the edges, the edges should be protected as much as possible. To insure a successful installation, leave a gap of one quarter inch between boards to prevent damage to the glass. Allsteel will not be held responsible for damage caused by improper installation.

Setting the table for change.

Today's corporate training room can take many forms, including lectures, brainstorms, and breakouts – sometimes requiring multiple transformations in a single day. Whether you're planning for an hour-long meeting or an aggressive all-day agenda with various room changes, the Aware collection can easily create the space you need right now and adapt to create the space you'll need in a few hours.

These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

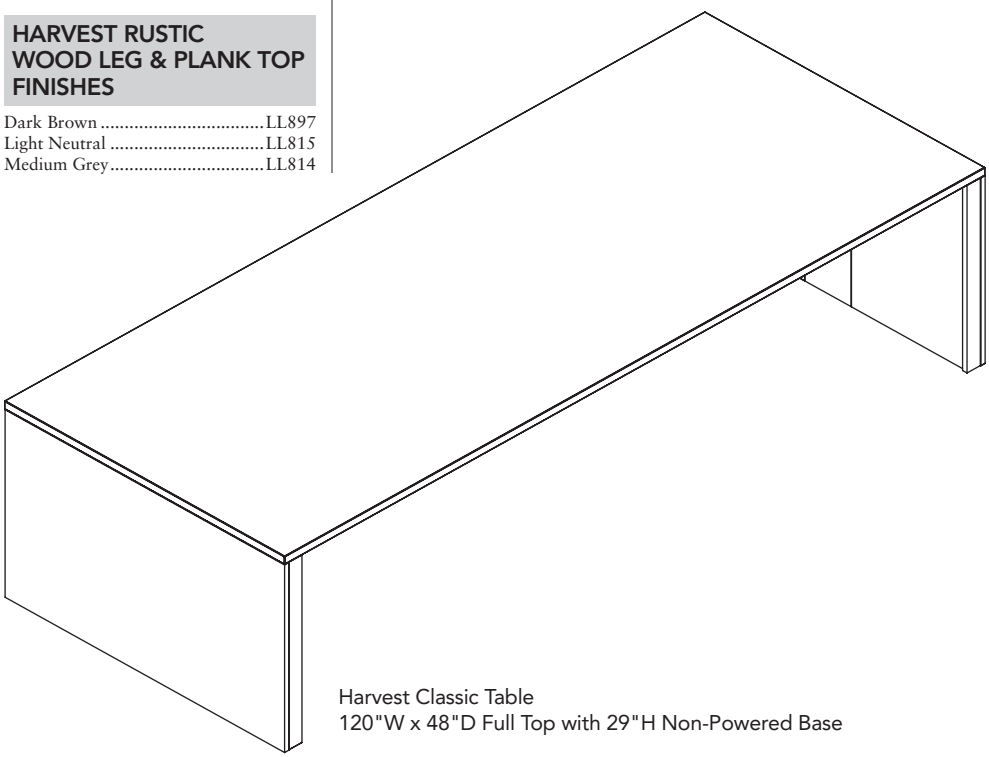
Horizontal surfaces to be full-fill, ClearTech finish.

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

NOTE: Refer to individual product pages for upcharges.

FSC Certified Wood at Allsteel

See page 451 for more information.



Harvest Classic Table
120"W x 48"D Full Top with 29"H Non-Powered Base

Harvest brings all the collaborative potential of a multi-purpose table to the corporate environment. It's welcoming. Useful. It invites conversation and interaction whenever people meet up. So it's easy to Harvest the best ideas.

MODELS AND OPTIONS

Select the seated table height models for meeting and conference rooms or touchdown areas. Or specify a standing-height version for project spaces or cafés. Harvest Classic includes an optional split top that facilitates cord management and power/data hubs that allow for easy access to technology. The sliding doors in the technology trough not only provide easy access to cords from below, but are painted to add an accent color to the space. A solid top can be specified when technology access isn't as critical. Harvest tables are available in laminate or veneer.

APPLICATIONS

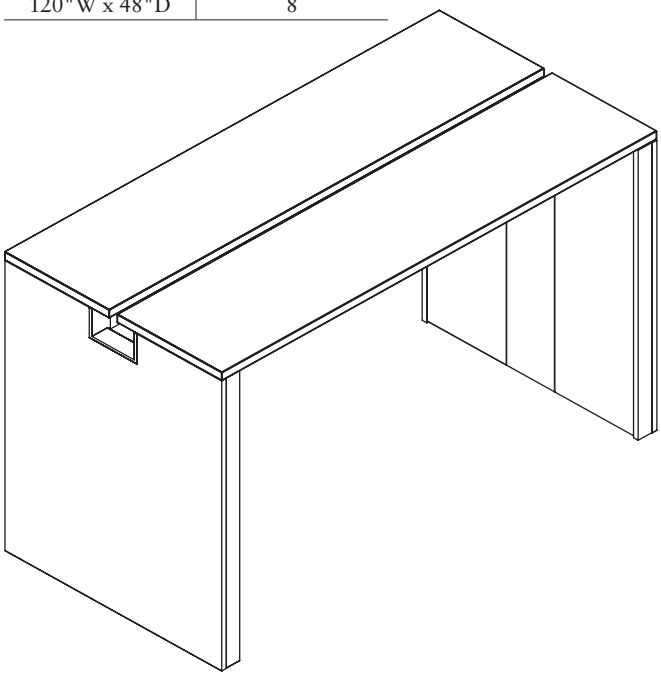
Place Harvest tables in cafés, atrium spaces, libraries, open-plan areas, and conference rooms.

KEY FEATURES

Harvest Classic tables are offered in a variety of sizes with power and data capability. Inspired by gathering spaces where people like to talk and share, like the dining room table or coffee area in the office, it invites conversation and interaction whenever people meet up.

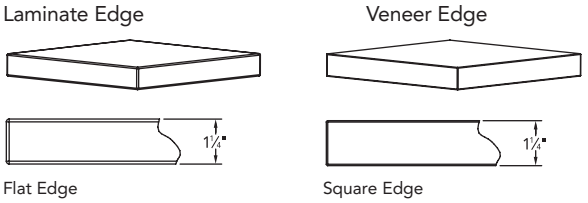
TABLE CAPACITIES

Table Top	Seating Capacity
72"W x 36"D	4
72"W x 42"D	4
72"W x 48"D	4
96"W x 36"D	6
96"W x 42"D	6
96"W x 48"D	6
120"W x 36"D	8
120"W x 42"D	8
120"W x 48"D	8



72"W x 36"D Split Top with 42"H Powered End Panel Base

MATERIALS AND FINISHES

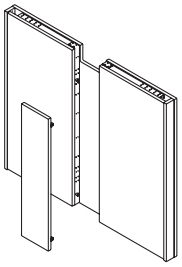


CLEARANCE DIMENSIONS

Between Bases

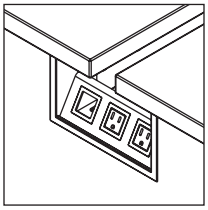
End panel bases are 3"D making clearance between bases 6" less than the width of top:

- 72"W top has 66" clearance
- 96"W top has 90" clearance
- 120"W top has 114" clearance



End Panel Bases

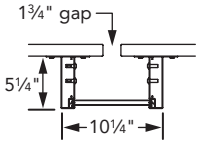
All end panel bases have a hidden center channel 7"W x 1½" D for routing cables from floor to trough. The end panel access door can be mounted flush to bottom for a clean aesthetic or rotated to provide a one-half inch offset to allow for additional cord and cable clearance.



Powered end panel models feature cutouts for mounting a power/data hub and align with end panel center channel and the technology trough of top. Full tops (without split) can be used with powered end panels. Cutout is finished with a PR6 Silver bezel.

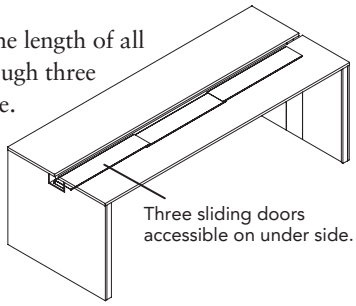
Split Tops

Split tops provide a 1¼" gap for routing cords and power adapters. Inside technology trough dimensions are 7"W x 3¾"D.



Wire Trough and Beam

A recessed wire trough runs the length of all table tops. It is accessible through three sliding doors on the under side. Sliding doors can be easily removed for cleaning.



Center trough with beam is 10¼" wide and extends 5¼" below top. Clearance under top and under trough:

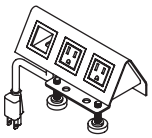
29"H End Panels provide 28¼"H / 23"H
42"H End Panels provide 40¾"H / 35½"H

Distance from front edge of surface to trough:

36"D Top is 12⅞"D
42"D Top is 15⅞"D
48"D Top is 18⅞"D

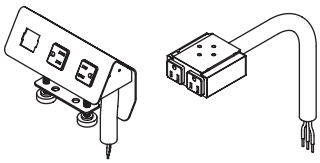
ELECTRICAL OPTIONS

Harvest Classic Tables offer three power options: Corded, Interlink IQ, or Hardwire. Installation and use of electrical systems, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes. See matrix on page 488 for suggested cord length requirements. Verify code requirements before ordering. Chicago requires hard wiring. Chicago and New York do not permit use of Interlink IQ components.



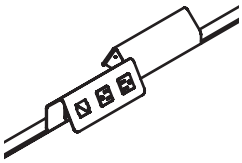
Corded

Corded models plug directly into an outlet and can be mounted back-to-back. Corded modules cannot plug into other corded power modules. In order to plug into other units the unit would need to be hardwired. When routing corded models to a wall outlet, the maximum amount of cord that can be exposed outside of the furniture is 6 feet. (New York, check local code.)



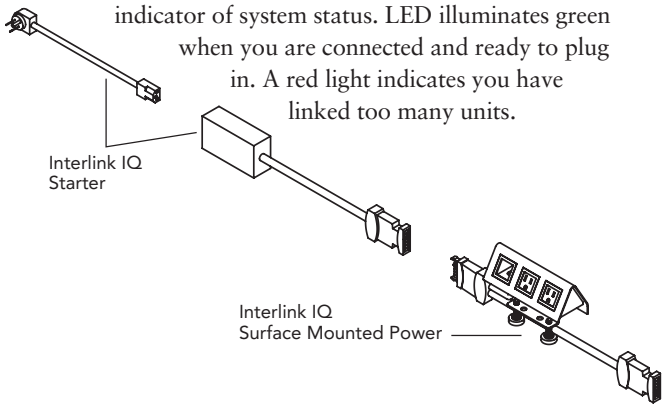
Hardwire

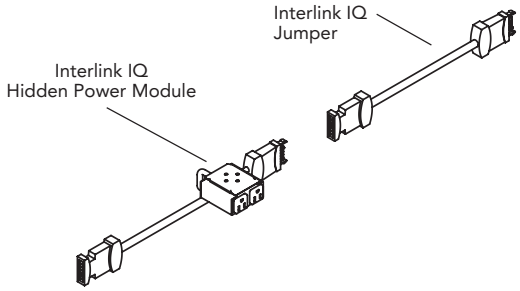
Hardwire models are provided with 20' of sealtight cable. Customer must furnish junction boxes, conduit, and additional wire to be in compliance with local and national electrical codes. Hardwire surface mounted modules cannot mount back-to-back and require units to be mounted side-by-side (see below).



Interlink IQ

Interlink IQ provides the ability to use one 12-amp infeed starter and power up to 8 power modules (including jumpers) off of one infeed starter. Interlink IQ provides a visual indicator of system status. LED illuminates green when you are connected and ready to plug in. A red light indicates you have linked too many units.





Interlink IQ Examples:

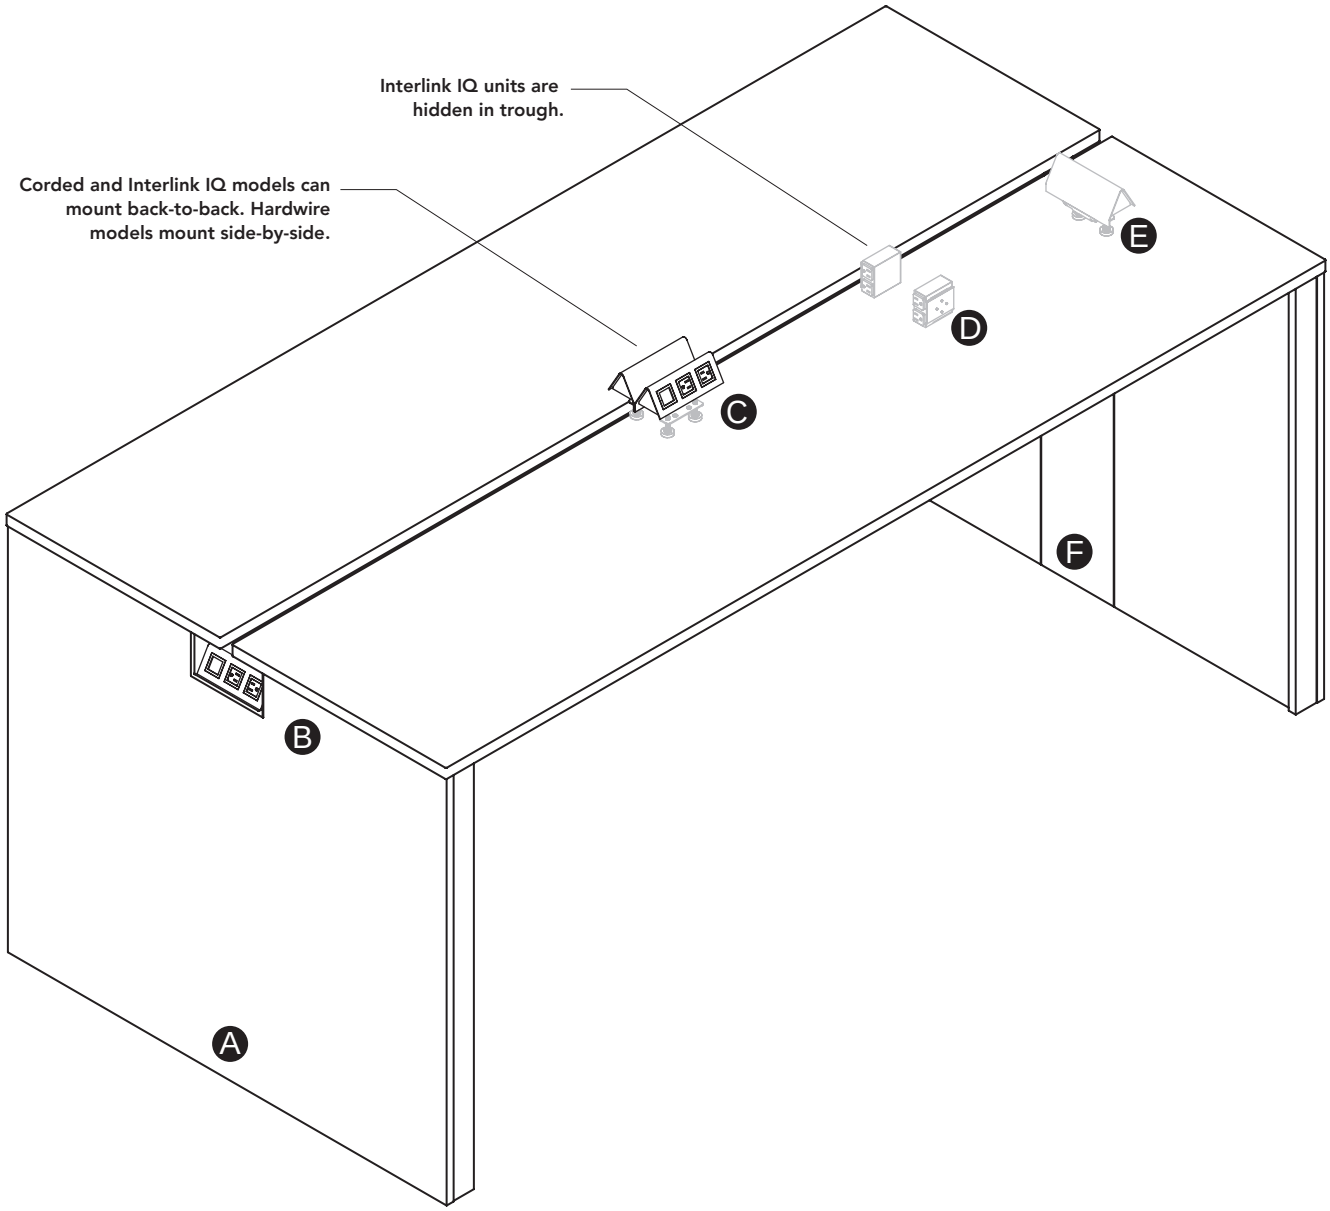
Example #1 – 120" Harvest Classic table with full top, power needed in end panels

- (1) **S913P06LS** – 6' Interlink IQ starter
- (2) **S913PLE** – Interlink IQ end panel power module
- (1) **S913P05LJ** – Interlink IQ Jumper

Example #2 – Two 120" Harvest Classic tables with split tops, power needed in end panels and throughout table

- (1) **S913P06LS** – 6' Interlink IQ starter
- (2) **S913PLE** – Interlink IQ end panel power module
- (4) **S913PLM** – Interlink IQ surface mounted power module
- (2) **S913HPLE** – Interlink IQ Hidden power module

Harvest Classic Electrical Routing



Harvest Electrical Cable Length Routing Matrix *Add length from "A" or "F" to power source to dimension below.*

Table Width:	Any	72" Wide Top				96" Wide Top				120" Wide Top			
Routing Paths: *(Reference illustration above)*	A to B	A to C	A to D	A to E	F to D	A to C	A to D	A to E	F to D	A to C	A to D	A to E	F to D
	F to E	F to C		F to B		F to C		F to B		F to C		F to B	
Table Height:	29½"H	66"	84"	102"	48"	78"	102"	126"	54"	90"	120"	150"	60"
	42"H	78"	96"	114"	60"	90"	114"	138"	66"	102"	132"	162"	72"

General Rules

- Corded power modules cannot plug into other corded power modules. Corded modules can plug into hardwired modules.
- Corded power running to a wall outlet is limited to 6' of cord exposed outside of the furniture. (New York, check local code)
- An Interlink IQ Starter is required for Interlink IQ components and can support a maximum of 8 power modules (including jumpers) in any combination.
- Chicago requires hardwire. Interlink IQ can not be used in Chicago or New York.

- All models below include rectangle top and beams with bottom access sliding doors to create a technology trough. Order the same depth end panel bases separately on page 490.
- Laminate tops have a flat edge that is color coordinated. Veneer tops have a matching square edge.
- Beams with sliding doors are painted metal and available in P1, P2, or P3 paint colors.

HARVEST

- Models below include two end panel bases and connecting hardware. Order matching depth tops that include beams and doors separately on page 489.
- Laminate end panel bases have a flat edge that is color coordinated. Veneer bases have a matching square edge.
- All end panel bases have a 7"W x 1½" D hidden center channel for routing cables from floor to trough.
- Powered end panel bases are power and data ready. Order electrical and data modules and cables separately. See page 491.
- Powered end panel base has cut-out for mounting end panel power/data module and space in the trough for routing cables.
- Non-Powered end panel bases do not have cut-outs.

HARVEST

- Harvest Classic tables offer three power options: Corded, Interlink IQ, or Hardwire.
- Corded models plug directly into an outlet. Corded modules cannot plug into other corded power modules.
- When routing corded models to a wall outlet, the maximum amount of cord that can be exposed outside of the furniture is 6'. (New York, check local code)
- In order to plug corded models into other units the unit would need to be hardwired.
- Interlink IQ modules require a minimum of one Interlink IQ Starter.
- A maximum of 8 Interlink IQ Power Modules (including jumpers) can be "daisy chained" together in any combination off of one 12-amp infeed starter.
- Interlink IQ provides a visual indicator of system status. LED illuminates green when you're connected and ready to plug in.
- Hardwire models are provided with 20' of sealtight cable.
- In hardwire applications customer must furnish junction boxes, conduit, and additional wire to be in compliance with local and national electrical codes.

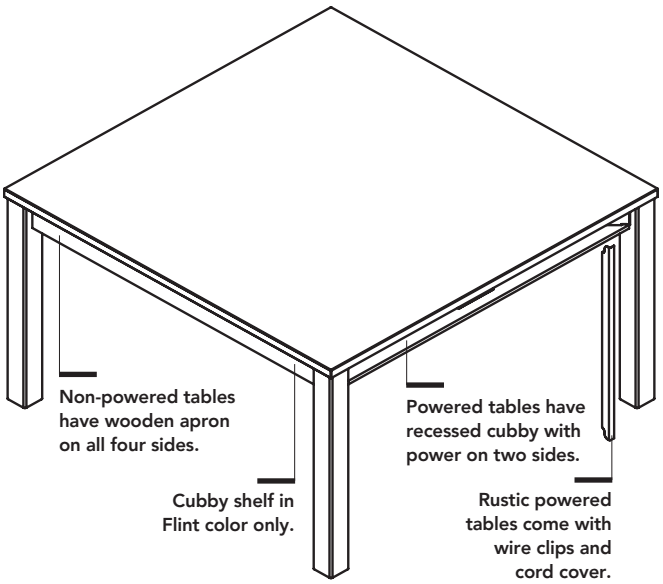
The Harvest Rustic table is designed to help you feel at ease hosting gatherings of all kinds. Seated- and standing-height tables are perfect for everything from the brainstorm to the weekly donut club. All the necessities of the office mixed with an appealing, familiar aesthetic. Bring your team together around the Harvest Rustic table.

MODELS AND OPTIONS

Harvest Rustic offers three wood finish options for the legs to mix and match a wide selection of laminate top finishes or select a rustic plank top in matching finish. Perfect for cafés, atriums, open-plan areas, and collaboration spaces.

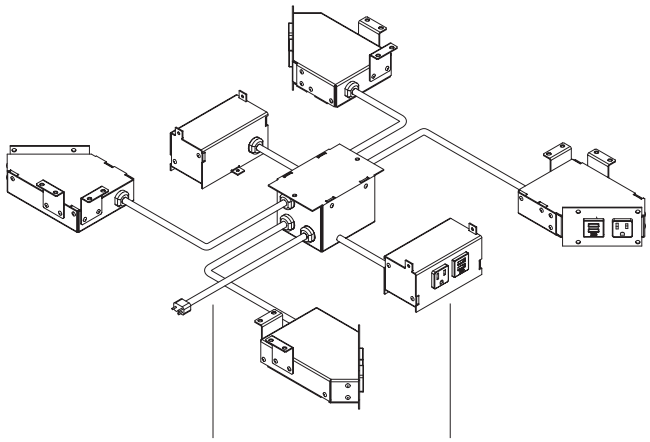
Choose between seated- and standing-height tables, square and rectangular shapes. Standing-height tables have a footrest for added comfort.

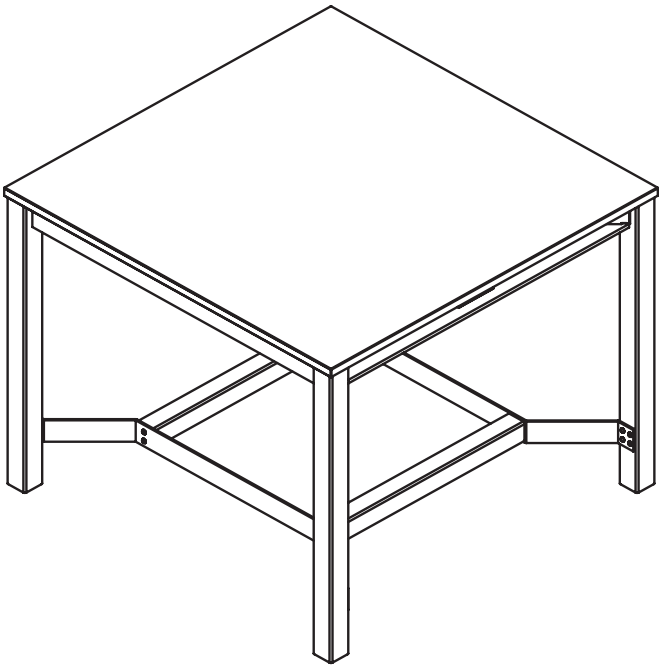
Harvest Rustic powered tables include built-in power and USB capabilities to power equipment.



POWERED TABLES

Each table includes six simplex electrical outlets and six double USB ports (illustrated below) that are recessed at 6 locations within the 12"D x 3"H cubbies located just below table top on the two longest sides. Cubby area provides ample room for power supplies, excess cord, phone, and other paper, binders, or supplies — keeping the table top clear for the work at hand.





NON-POWERED TABLES

Non-powered models feature a wooden apron on all four sides of the table (no cubbies). Without cubbies, non-powered tables cannot be easily converted to powered tables.

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

- Table comes complete with laminate or plank top with flat edges, solid wood legs — 29"H seated or 42"H standing height, painted metal support structure, and electrical — assembly required.
- Each powered table includes 6 simplex electrical outlets and 6 double USB ports recessed within the 12"D x 3"H cubbies located just below table top on the two longest sides. See page 492.
- See page 494 for non-powered tables.
- Cubby shelf color is not specified and comes in Flint.
- Electrical is corded with plug; for hardwired add "HW" suffix and $137 upcharge. Cord to power is 10' long from center of table top.
- Rustic powered tables come with wire clips and painted metal wire management cover for routing cable down table leg. Cover attaches with double faced tape.

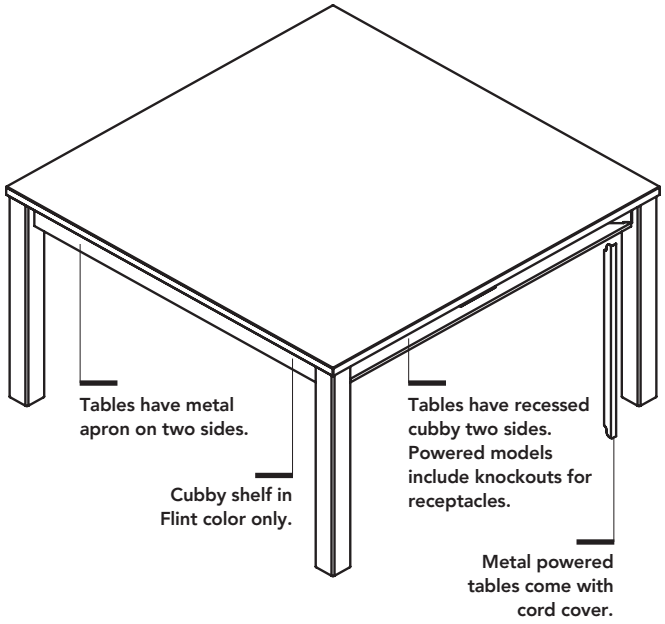
Reference Page *The Harvest Metal table is designed to help you feel at ease hosting gatherings of all kinds. Seated- and standing-height tables are perfect for everything from the brainstorm to the weekly robotics club. All the necessities of the office mixed with an appealing, familiar aesthetic. Bring your team together around the Harvest Metal table.*

MODELS AND OPTIONS

Harvest Metal offers numerous painted options for the metal legs to mix and match a wide selection of laminate and veneer top finishes. Perfect for cafés, atriums, open-plan areas, and collaboration spaces.

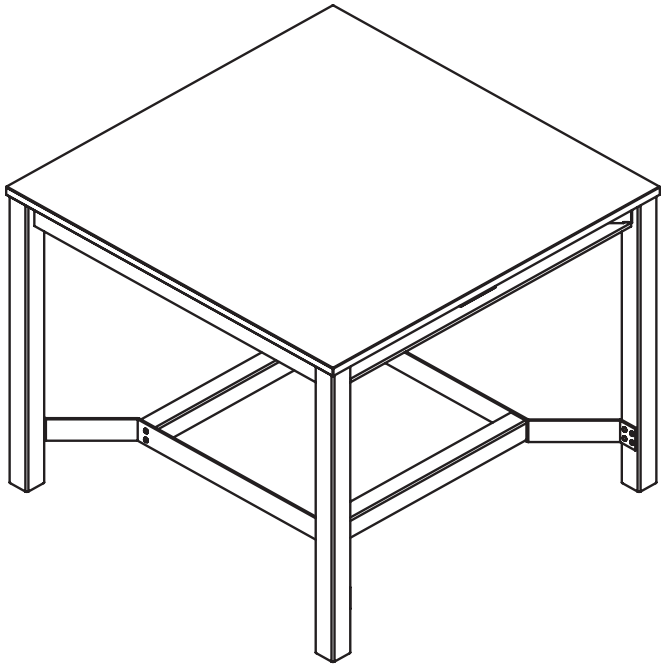
Choose between seated- and standing-height tables, square and rectangular shapes. Standing-height table has a footrest for added comfort.

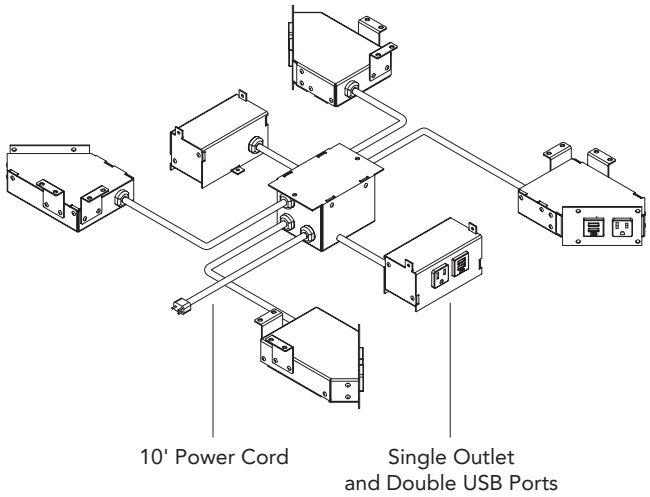
Harvest Metal powered tables include built-in power and USB capabilities to power equipment.



POWERED TABLES

Each table includes six simplex electrical outlets and six double USB ports (illustrated below) that are recessed at 6 locations within the 12"D x 3"H cubbies located just below table top on the two longest sides. Cubby area provides ample room for power supplies, excess cord, phone, and other paper, binders, or supplies — keeping the table top clear for the work at hand.





NON-POWERED TABLES

Non-powered metal models feature cubbies, but without any knock-outs for receptacles. Non-powered tables cannot be easily converted to powered tables.

- Table comes complete with laminate or veneer top, painted metal legs — 29"H seated or 42"H standing height, support structure, and electrical — assembly required.
- Each powered table includes 6 simplex electrical outlets and 6 double USB ports recessed within the 12"D x 3"H cubbies located just below table top on the two longest sides. See page 495.
- See page 497 for non-powered tables.
- Cubby shelf color is not specified and comes in Flint.
- Electrical is corded with plug; or hardwired add "HW" suffix and $100 upcharge. Cord to power is 10' long from center of table top.
- Tables come with painted metal wire management cover for routing cable down table leg. Cover attaches with double faced tape.

Structure

Structure rounds out the Allsteel table offering and supports a wide array of applications, from conference rooms to café settings and everything in between.

The tables are adaptable and interchangeable for use in multiple spaces. The combination of rich details and durable design creates an experience out of any activity at the office while elevating culture and brand. A variety of table top shapes, edges, bases, and finishes ensures a consistent aesthetic throughout the entire floorplan.

MODELS AND OPTIONS

Structure is available in five heights and ten top shapes.

APPLICATION

Use in open meeting areas, dedicated collaboration rooms, neighborhood spaces, cafés, large and smaller conference rooms, libraries, and lounge areas.

KEY FEATURES

Range of shapes, sizes, and configurations to meet the needs of any space available in an array of materials.

MATERIALS AND EDGE TREATMENTS

Woodgrain laminates will be aligned within ⅜" across seams unless otherwise noted in the price guide pages.

Laminate Edges

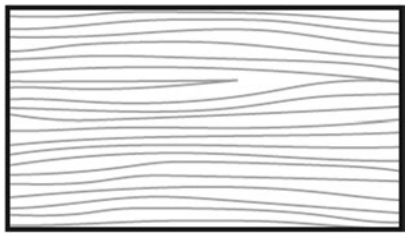
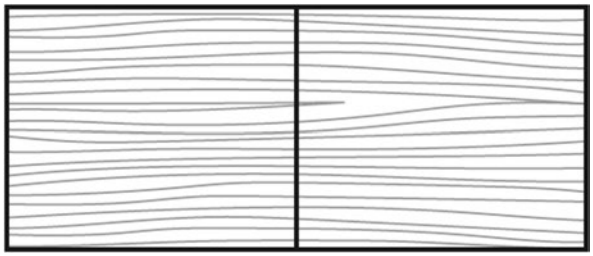
GRAIN DIRECTION AND ALIGNMENT

SINGLE-PIECE TOPS – Woodgrain laminates as standard product are always oriented with the grain direction running parallel to the length of the table top.



TWO & THREE PIECE TOPS – Tops longer than 96". Woodgrain laminates as standard product are always oriented with the grain direction running parallel to the length of the tabletop. Allsteel will create best match grain alignment but cannot guarantee a perfect match along the seam between the pieces of laminate.



SPECIAL TOPS – Specials for wide tables. Woodgrain laminates as specials wider than 60" are always oriented with the grain direction running parallel to the seam of the tabletop. Allsteel will create best match grain alignment but cannot guarantee a perfect match along the seam between the pieces of laminate on two and three piece tops.

RECOMMENDED COORDINATE COLORS

For Plastic Grommets on Laminate specify the same color used for the edge color; or the following plastic grommet color based on edge selected:

Branded Oak ..... Brownstone EY
Natural Maple, Fawn Cypress, Natural Recon ..... Muslin EU
Phantom Charcoal ..... Flint E9
Phantom Ecru ..... Loft EV
Portico Teak ..... Fossil EH
Shaker Cherry ..... Black E4
Skyline Walnut ..... Flint E9

For Plastic Grommets on Fluid Form specify either same color as painted legs/base; or the following plastic grommet color based on Fluid Form selected:

Auburn Cherry ..... Black E4
Natural Maple ..... Muslin EU

For Plastic Grommets on Veneer the color is predetermined based on finish selection.

All Maple veneers ..... Muslin EU
All Cherry, Walnut and Dark Rift Oak veneers ..... Black E4

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

All of Allsteel's tables are level® – 2 certified to the ANSI/BIFMA e3 Furniture Sustainability Standard. See www.levelcertified.org for more information.

NOTE: Refer to individual product pages for upcharges.

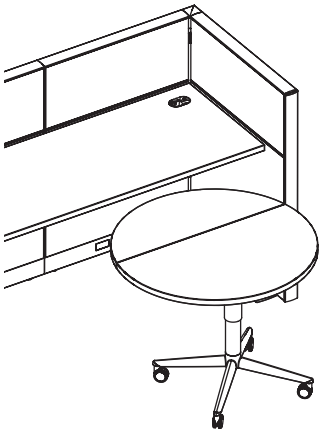
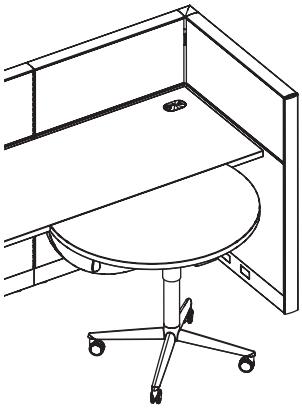
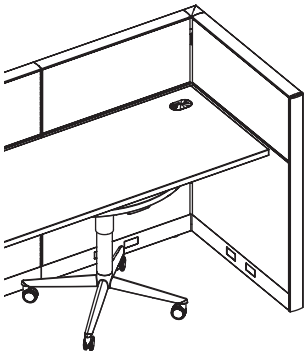
Table Media Mount

Structure

Structure Adaptive Tables convert any space into a meeting space.
Adaptive Tables feature a self-centering drop leaf and height-adjustable table top to provide a solution that quickly lifts, lowers, and docks to adapt to spontaneous changes in work and space requirements.



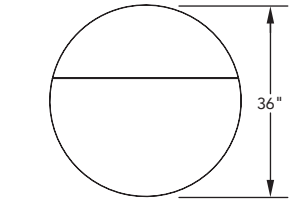




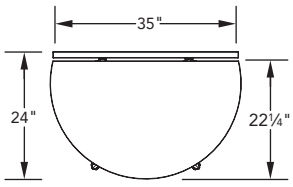
Add Workspace to Existing Worksurfaces

Adaptive Tables feature a self-centering drop leaf and height-adjustable table top allowing the tables to effortlessly dock next to existing worksurfaces. Simply drop the leaf, adjust the height, and dock. The drop leaf is designed to tuck under the worksurface while docking to provide a seamless transition from worksurface to table.

Adaptive table tops are 36"W with the drop leaf up and 22¼"W with the drop leaf down. The bases are 28" in diameter.



Round
w/Drop Leaf Up



Round
w/Drop Leaf Down

Store Tables Beneath Existing Worksurfaces

Adaptive Tables tuck beneath existing worksurfaces by adjusting the height. Adaptive Tables feature a gas cylinder to provide quiet, smooth movement. Simply pull the height-adjustment lever and push down on the center of the table top to lower the height of the table.

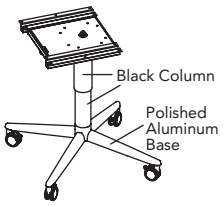
To raise the height of the table, simply pull the height-adjusting lever beneath the edge of the table top and the table will automatically rise. Release the height-adjustment lever to set the table height. Adaptive Tables adjust from 26"H to 33"H.

Convert Table Position from Docked to Freestanding

Adaptive tables quickly convert from a docked position to freestanding by simply pulling the drop leaf up. The self-centering mechanism ensures that the base remains in the center of the table top whether the drop leaf is up or down.

Combine Table Surfaces and Base Finishes

The wide variety of material options and base finishes allow Adaptive Tables to integrate seamlessly into any space. Table tops are available in laminate, with Flat Edge or Knife Edge treatments. Cast aluminum table bases are available with painted or polished aluminum finishes. Polished Aluminum models feature black vertical columns.



Structure tables exceed BIFMA Standards and are backed by the Allsteel lifetime warranty. Die-cast and extruded aluminum components are lightweight, yet highly durable. The self-centering drop leaf has a maximum load capacity of 125 pounds.

IN-SURFACE POWER

Corded

Corded models plug directly into an outlet and cannot plug into other corded power modules. In order to plug into other units the units need to be hard-wired. When routing corded models to a wall outlet, the maximum amount of cord that can be exposed outside of the furniture is 6 feet.

Hardwire

Hardwire models are provided with 10 feet of sealtight cable. Customers must furnish junction boxes, conduit, and additional wire to be in compliance with local and national codes.

Qi charging is available on Corded and Hardwire versions.

- Includes 3 Qi charging coils (5 watts each) for wireless charging.
- Units have LED indicator lights below the lid's surface.
- Units house power and charging USB inside. All units are Qi certified.
- Cut-outs are centered on single-piece tops.
- Cut-outs are available for round, square, and soft square tops 54" or greater.
- Cut-outs are aligned with the shape of the table.

.C0 - No Cut Out
.ATE - Small Edge Cut Out, 4" x 8"
.C1 - 1 Large Center Cut Out, 5" x 11"
.C2 - 2 Large Center Cut Outs, 5" x 11"
.C3 - 3 Large Center Cut Outs, 5" x 11"
.G1 - 1 Small Center Cutout, 4" x 8"

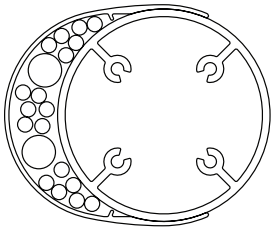
Structure

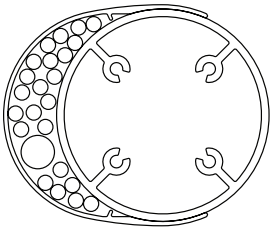
LARGE PEDESTAL AND X-BASE

2 electrical infeed (0.55" dia.) and 18 voice/data cables (0.25" dia.) at 60% fill ratio. Note: 3.5" diameter column with wire manager.



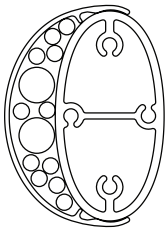
LARGE PEDESTAL AND X-BASE

1 electrical infeed (0.55" dia.) and 23 voice/data cables (0.25" dia.) at 60% fill ratio. Note: 3.5" diameter column with wire manager.



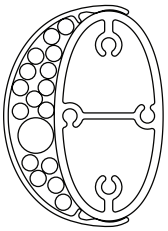
LARGE T LEG

2 electrical infeed (0.55" dia.) and 11 voice/data cables (0.25" dia.) at 60% fill ratio.



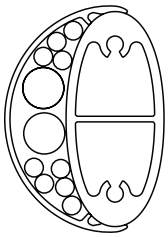
LARGE T LEG

1 electrical infeed (0.55" dia.) and 16 voice/data cables (0.25" dia.) at 60% fill ratio.



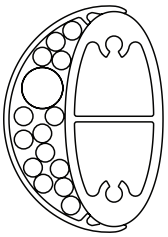
SMALL AND MEDIUM T LEG

2 electrical infeed (0.55" dia.) and 9 voice/data cables (0.25" dia.) at 60% fill ratio.



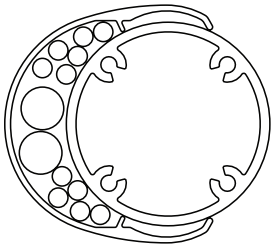
SMALL AND MEDIUM T LEG

1 electrical infeed (0.55" dia.) and 14 voice/data cables (0.25" dia.) at 60% fill ratio.



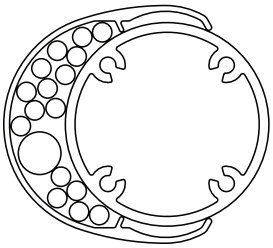
MEDIUM PEDESTAL AND X BASE

2 electrical infeed (0.55" dia.) and 11 voice/data cables (0.25" dia.) at 60% fill ratio.



MEDIUM PEDESTAL AND X BASE

1 electrical infeed (0.55" dia.) and 16 voice/data cables (0.25" dia.) at 60% fill ratio.



WOOD BASE ELECTRIC CAVITY GUIDE

All wood bases can accommodate cables. The below diagrams document the narrowest opening to plan for when considering which base to order. For the cleanest look and access on a cylinder, consider using AMPTCYLBWM, which includes a larger bottom cavity with door access.

Structure

- Order Base Separately.
- Order power units separately.
- Tops ship with pilot holes for locating supports.
- Reference page 503 for cutout locations.
- Middle seams on multi-piece tops are not edgebanded.
- External stiffeners are included with top models when required.
- Available in laminate (flat or knife edges).
- For 72" to 84" tops, the woodgrain direction runs parallel with the seam and will have greater alignment variations.

Structure

Media Tops

- A wall-mount bracket is used to fasten one end of the top to the wall (user to provide mounting hardware). See page 543.
- Order Base Separately.
- Order power units separately.
- Tops ship with pilot holes for locating supports.
- Reference page 503 for cutout locations.
- External stiffeners are included with top models when required.
- Available in laminate (flat or knife edges).

Panel Bases

- External support stiffeners that ship with tops will not be used with panel base models that include beams.
- Removable end caps allow access to route power and data wires from the floor to undersurface.
- See page 505 for wire routing capacity from floor to undersurface.
- Panel base glides provide ¾" adjustment.
- Power modules are ordered separately.
- 72"W top requires 2 single bases
- For tables 120" or greater, a set of beams is provided.

Cube Bases

- Removable end cap on seated height cube allows access to route power and data wires from the floor to undersurface.
- Hinged door on standing height cube allows access to route power and data wires from the floor to undersurface.
- See page 505 for wire routing capacity from floor to undersurface.
- Power modules are ordered separately.
- For tables 120" or greater a set of beams are supplied.
- External support stiffeners that ship with tops will not be used with panel base models that include beams.
- Integrated wire management is offered.
- Cube base requires 150 lbs. of sand or other ballast material per base for stability (supplied by customer).
- 72"W top requires 2 single bases.

Structure

T-Leg / Post-Leg / Community Bases

- T-leg table bases are available in painted or polished aluminum.
- T-leg available with glides or casters.
- T-leg casters are locking with urethane tread.
- T-leg glides provide ½" adjustment.
- T-leg bases require some assembly.
- AMPTGST support gussets are needed when ordering 60"W or greater tops with T-Legs.
- Height-adjustable post-legs adjust from 26½"H to 32½".
- Post-leg models contain four legs and ship two per carton.
- Post-legs require some assembly.
- Post-leg glides provide 1¼" adjustment.
- Community table legs come in kits of 2, 4, 6, or 8.
- Community legs provide a recessed channel with cover to route cords from floor to undersurface.
- Community leg glides provide 3" adjustment.

Structure

Adjustable Tables / Adaptive Tables

- Tables feature a self-centering drop leaf and height-adjustable table top. See page 502.
- Table tops are 36"W with drop leaf up and 22¼"W with drop leaf down.
- Tables adjust from 26"H to 33"H.
- Tables feature urethane tread locking casters.
- Round tables have a 35" interface when the drop leaf is down.
- Tables will allow slight rotational movement of the worksurface relative to the base because of the functionality of the height adjustable cylinder.

Structure

Cable/Wire Management

- Table Media Mount is used to mount a television to the end of a table top when not against a wall. Mounting hardware is provided for television sizes 32 to 50 with VESA Mounts of 100x100 to 200x200; for some televisions, additional hardware is required.
- The Wire Management Covers snap on to legs. See wire capacity on page 504.
- The Cable Management Tray attaches under the surface and is 4" deep to contain cables, a power strip and/or surge protector.
- Wire management channel has self adhesive backing to attach to panels or underside of surface.
- Each wire-management channel has 2 cavities that can hold six .22" dia. cables
- Wire basket models include basket and two vertical hanging supports made of .148" dia. steel wire.
- Verticals must be placed 18" or more apart from one another and must be within 15" from each end of the basket. Can hold a maximum load of 25 lbs.
- A cord management snake is used to route and conceal power/data cables from outlet to undersurface. Includes all mounting hardware and a plate to secure to leveling glide. Can house six .300" dia. cables.

Example: **SYSFS.APN911**

Description	Model	P1 Paint List Price	P2 Paint List Price
Touch-Up Paint — Brush			
Bottle of Touch-Up Paint with Brush — 0.5 oz.	APTK [S]	$ 90	$ 100
Touch-Up Paint — Spray			
Spray Can of Touch-Up Paint — 12 oz.	ARSLCC [S]	$ 90	$ 100

How to specify —

Select the Model Number from above.

1st Option:

Paint Color:

P1 P2 P3

See available Touch-Up Paint colors listed above. Some colors are limited to brush or spray.

A _____ . _____

Examples: **APTK.P02** **ARSLCC.P02**

[S] ***Shippable by small-package carrier.***

Cleaning instructions are listed on the back of our fabric cards and are available in written form upon request.

CLEANING CODES

D Dry clean only.
L Clean with warm water and mild soap, using clean cloth, as soon as possible.
P Clean with detergent and water or perchlorethylene.
R Detailed recommended cleaning and/or disinfecting procedures are available upon request.
S Only pure, water-free solvents may be used. CAUTION: Use of water-based or detergent-based solvents may cause shrinking and/or permanent water stains.
SM Same as S. Do not brush.
SW Clean with water-based cleaning agents, foam or pure water-free solvents (Energine, Carbona, Renuzit, or other similar products). Vacuuming or light brushing is recommended to prevent dust and soil buildup.
W Water-based cleaning agents or foam may be used.
WS See SW.
X Brush or vacuum only.
XS Brush and vacuum only, NO liquid cleaners.

CLEANING VINYL

Vinyl-coated fabrics are perhaps the most maintenance-free fabrics ever produced and certainly will provide exceptional service life if given proper care. Almost all vinyl manufacturers now provide information concerning the necessary cleaning procedures for their products. In reality, all care and maintenance instructions are the same for all coated fabrics regardless of their manufacturing origin.

Everyday soil — A gentle mixture of any mild soap and warm water will generally dissipate most common soil from the surface. Using a soft cloth, wash the area to be cleaned and rinse. If stubborn dirt remains, such as a stain embedded in the grain of the vinyl, use a soft brush, and if necessary, a touch of cleaning powder. In both situations, rinse and dry with a soft cloth.

Gum — Remove as much chewing gum as possible prior to the application of Naptha or Kerosene, worked in with a soft cloth. If gum cannot be removed, ice may be used to harden the gum so that it separates itself from the vinyl surface. (This same method is also useful in removing wax.)

Ink Spots — You must work quickly! Magic Marker, India ink, and ballpoint pen immediately will affect pigments, and, for the most part, are difficult to remove. It is recommended that a solution of water and rubbing alcohol be applied and gently rubbed on the spot as soon as possible. Hair sprays containing alcohol are sometimes effective in emergencies for removing ink.

Nail Polish and Polish Remover — These products will immediately damage vinyl surfaces and, to retard further damage, should be carefully wiped clean.

Paint — Try to remove as soon as possible. It is not recommended that any paint removers or brush cleaners be used. Clean oil-based paints with a soft clean cloth and Naptha. To clean latex-based paints, use the same method as recommended for everyday soil.

Tar, Asphalt, Etc. — Petroleum-based products will stain all vinyl if allowed to stand too long. Clean as soon as possible with a cloth followed by the immediate application of Kerosene or Naptha.

Products are now on the market that are manufactured to enhance the beauty and service life of all vinyl. However, by using the methods described above with sensible care and attention, the consumer should enjoy years of satisfaction and pride with any vinyl-coated fabrics.

CLEANING LEATHER

Because leather is a natural product, it needs very little or no care during normal usage.

Spots and Spills — Wipe excess liquid up immediately with a clean, absorbent cloth or sponge. If necessary, use clean lukewarm water only and let dry naturally. If water is used, clean the entire area where the spot occurred. An example would be the entire seat cushion or the entire arm. Do not dry wet areas with hair dryers, etc.

Stubborn Spots and Stains — Use a mild, non-detergent cleaner such as bar or Ivory soap. Apply the soap to a clean, wet sponge and wash, then rinse well. Allow to dry naturally.

Butter, Oil, or Grease — Wipe excess butter, oil or grease off of the leather with a clean dry cloth, then leave it alone as the spot should dissipate into the leather in a short period of time. Do not apply water or try to wash a butter, oil, or grease spot.

DO NOT USE saddle soap, cleaning solvent, furniture polish, oils, varnish, abrasive cleaners, soaps, window cleaner, or ammonia water.

Allsteel, as an HNI company, adheres to the HNI Enterprise Sustainability Policy of 2008 and its related procedures. The Design for the Environment Procedure directs the product design process to consider potential environmental impacts of the product; including materials selection, packaging and transport, product use, and design for disassembly at the end of the product's useful life. The Manufacture for the Environment Procedure sets goals related to energy efficiency, waste recycling, air emissions reductions, worker safety, water efficiency, increased renewable energy, and chemical reductions.

The Enterprise Sustainability Policy sets goals and measures results, driven by the ANSI/BIFMA e3 Furniture Sustainability Standard and evaluated in the 3rd party certification called level®. Rigorous quantitative evaluation criteria cover four categories: materials, energy and atmosphere, human and ecosystem health, and social responsibility. The audit process evaluates the individual products, the manufacturing site(s), and the corporation. Allsteel's furniture is level 2 and level 3 certified to the standard. (ANSI is the American National Standards Institute, an organization that directs the transparent development process of national standards.)

In addition, Allsteel's products support requirements of LEED (Leadership in Energy and Environmental Design), the green building rating system. Whether a customer seeks to achieve LEED certification or just obtain the benefits without certification, Allsteel's products meet the standards set forth in LEED. Allsteel is proud to support sustainability initiatives in the building industry as a member of the U.S. Green Building Council (USGBC).

Allsteel complies with the Federal Trade Commission Part 260 Guide for the Use of Environmental Marketing Claims. Our third-party certifications support our environmental statements and our credibility. Third-party certification involves an independent assessment declaring that specified requirements pertaining to a product, process or management system have been met. Allsteel's third party certifications include BIFMA level® 2, SCS Indoor Advantage™ Gold, and FSC®. Select products are Cradle to Cradle Certified™ Bronze and/or have third party certified Environmental Product Declarations.

Nearly all of Allsteel's products are level 2 or level 3 and Indoor Advantage Gold certified. FSC® certified products are available; check price lists for details.

Price & Specification Guide 2022

Prices effective May 13, 2022

PDF updated April 21, 2022

Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

For information on Allsteel's warranty coverage, visit AllsteelOffice.com.

Monolithic Panel Systems

Specification and Price List

Effective May 13, 2022

- Software support packages furnished to the customer, either by Allsteel® or by another source, which support the sale of Allsteel products are superseded by printed price lists.
- Prices are subject to change without notice. All orders are subject to prices in effect at the time of order.
- Please refer to your Allsteel Dealer Sales and Discount Policies for order placement information, terms and conditions.
- Additional copies of this Specification and Price List are available upon request from Allsteel Literature Fulfillment at 1-866-255-7833.
- Ordering information appears at the bottom of each product page complete with examples on how to specify. Fabric and finish pages are referenced at the bottom of product pages.

This publication is available as an interactive or downloadable PDF at www.allsteeloffice.com.

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at **allsteelcomteam@allsteeloffice.com**.

Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.

   If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

   In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.

   You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

   HNI Textile Distribution Center
   COM Production Yardage — PO Number
   Docks 20-22
   301 Mulberry Avenue
   Muscatine, IA 52761

Monolithic Panel Systems

Information that MUST be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

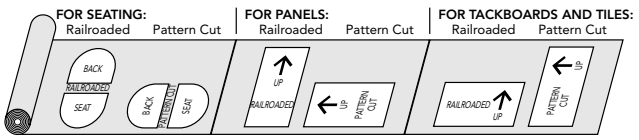
All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).



Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a $500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no $500 matching fee, however, there is a sample chip fee of $175 net for stains and $100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

  Allsteel Inc.
  Attn: Tailored Products Group
  2210 Second Avenue
  Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilsonart, Formica, Nevamar and Pionite laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

Everyday Advantage®

New terms and conditions for EDA:

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
   • Everyday Advantage Std-0125, Everyday Advantage Canada-0127
2. Everyday Advantage orders are not eligible for bid pricing.
3. Program discounting includes the complete Optimize, Further, Terrace, and Stride systems lines, private office solution, Approach and Involve storage. This program also includes Acuity, Access, Evo, Inspire, Lyric, Mimeo, Nimble, Quip, Relate, Seek, and Svelte, seating. Altitude, Aware, and Structure tables are also available, along with Align pedestals, lockers and metal storage and Essentials pedestals, and Radii storage lines. In addition, Extensions ergonomic accessories and lighting are part of the standard offering. All other product not called out is available for order on the contract but will receive standard discounting of 55%–65%.
4. All textiles and finishes except for veneer and some wood finishes are available, depending on quantity and selection, and may have extended lead times.
5. Everyday Advantage orders are not limited to a minimum or maximum.
6. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
7. Standard freight terms apply.
8. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

Allsteel Inc. reserves the right to amend or terminate this program at anytime with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- Camira, memos@camirafabrics.com 1.616.288.0655
- Carnegie, carnegiefabrics.com 1.800.727.6770
- CF Stinson, cfstinson.com 1.800.841.6279
- HBF Textiles, hbftextiles.com 1.877.494.5727
- Maharam, maharam.com 1.800.645.3943
- Ultrafabrics, ultrafabricsllc.com

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

NOTE: Refer to individual product pages for upcharges.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- Camira, memos@camirafabrics.com 1.616.288.0655
- CF Stinson, cfstinson.com 1.800.841.6279
- HBF Textiles, hbftextiles.com 1.877.494.5727
- Maharam, maharam.com 1.800.645.3943
- Ultrafabrics, ultrafabricsllc.com

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

FIT

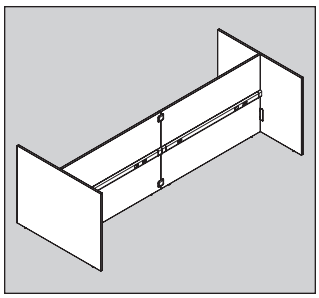
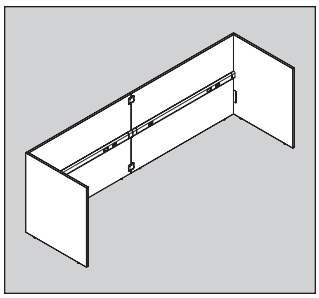
Building Horizontally with Fit Panels

Method 1—Opposing Returns



Method 2—Single-Sided Returns



Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1 — Opposing returns

- A parent run must be a minimum of 60" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.
- Dual-sided return panels must be a minimum of 60" combined width.
- Return panels must not be any more than 30" lower than the height of the parent panel run.
- Panel height measurement includes integrated glass, if used.

Method 2 — Single-sided returns

- A parent run must be a minimum of 60” and a maximum of 144” between return panels.
- A parent run less than or equal to 84”W must have a minimum of two return panels totaling 60” in combined width For every 7½” drop in panel height, 6” must be added to the minimum combined return length.
- A parent run greater than 84”W must have a minimum of two return panels totaling 84” in combined width.
- Return panels must not be any more than 30” lower than the maximum height of the parent panel run.
- Panel height measurement includes integrated glass, if used.

Panel Construction

- Made of 1⅛" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS.
- Available in woodgrain or solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 54"W. Horizontal grain is available on all sizes.
- Grain matching is not available.
- Fit Panels offer 2½" leveling capability.
- Available with and without the integrated glass option. Panels for use with glass offer a routed top edge.
- Glass is specified separately.
- Fit Panels for use with glass have separate model numbers.

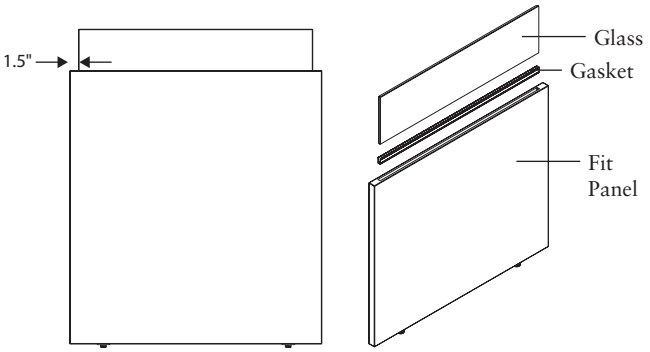
Panel Dimensions

- Depth: 1⅛"
- Nominal widths: 18", 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84" (actual width dimension will vary based on panel type, see Panel Specification page for details)
- Heights*: 30", 35", 42½", 50", 57½"
- Glass Heights: 7½", 13", 15"
- Leveling Glides: 2½" Range

*with levelers fully retracted

Panels for Use with Glass

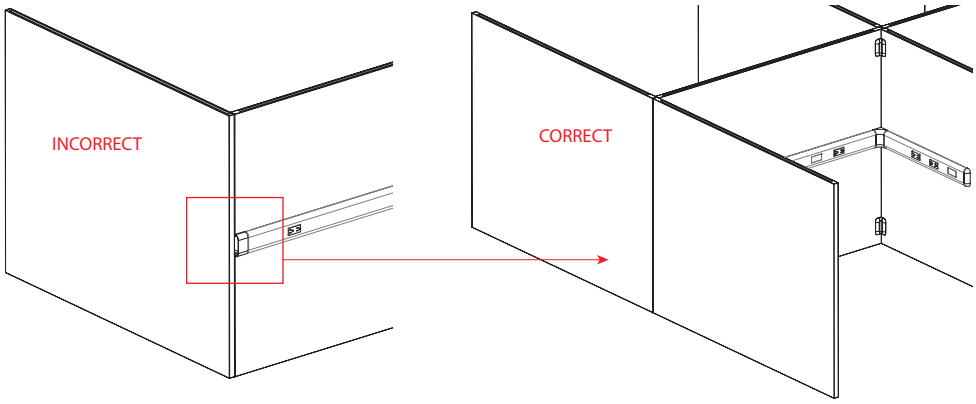
- Panels match construction of non-glass panels but have a routed top edge.
- Glass mounts directly into the panel route via a gasket.
- Single end panel routing is inset by ½" from each end of the panel and requires glass to be the same as the panel width.
- Spine, Mid, and Split End panel routing is inset around 1½" from each end of the panel, exact distance will vary with panel type. These panel types require glass to be 3" shorter than the panel width.
- Glass is available in 3 colors: Clear, Frosted, and Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H.
- Glass is available on all panel widths.
- Specify glass models separately from panel models.
- Glass Panels at 30"W and under are not UL listed.



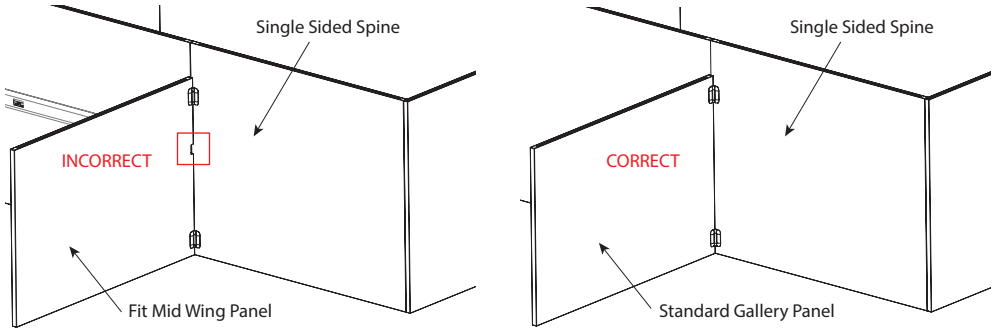
Standard Single Panel with Glass

Specifying Fit Panels

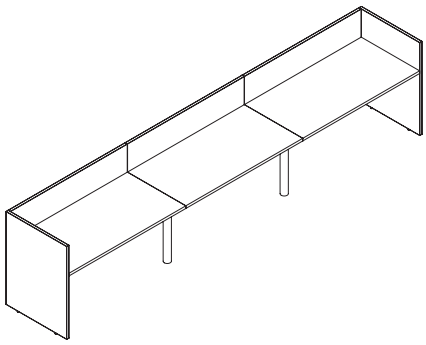
- Panels under 60"W are not available with power.
- Panels 60"W and greater are available with single- or dual-sided power.
- Spine panels are only available 60"W or greater and must be specified with power.
- Specify L- or T- Gallery-to-Gallery Panels when power is not needed in a single-piece end panel.
- Split End panels may be specified with or without single-sided power.
- When power is not needed in Mid Wing Panels, they must be specified with No Power AND the spine power height in order to allow electrical components to pass through the panel. Power can be specified at the Below Worksurface or Below HAT heights.
- A dual-sided powered spine must have an end panel that extends both directions:



- When using a mid wing on the EXTERIOR face of a single-sided powered spine, use a standard Gallery Panel. Connectors must be field-measured.



- Single spines can be used in a run in applications without mid panels to maintain standard widths inside each.



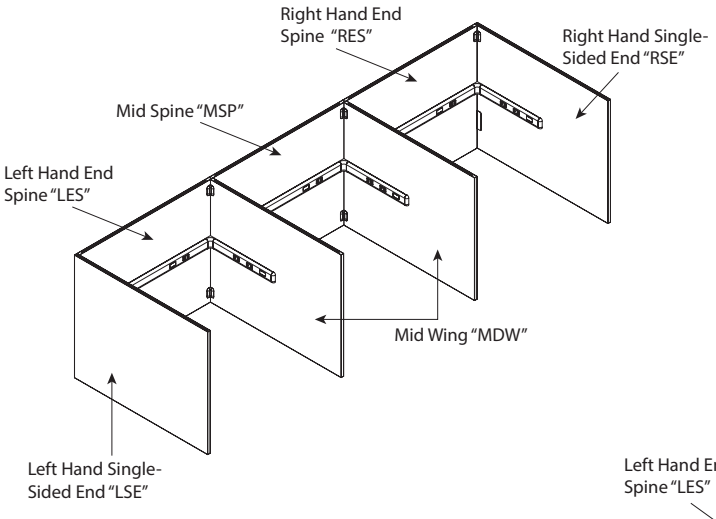
- When submitting a request to TPG, the full dot option logic must be provided.

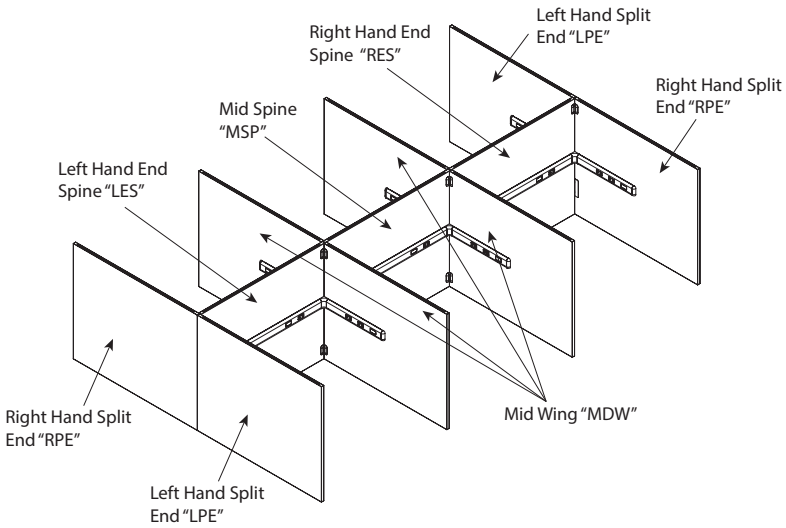
FIT

Specifying Fit Panels

- When specifying Fit Panels, the base model indicates the height and modular width needed. Model logic is 'GSYS' then 'height' then 'width.' (e.g., a 50"H by 72"W panel would be GSYS5072)
- The first dot option indicates the panel type (where the panel is located within the typical) and power options. (e.g., GSYS5072.MSPDW (Mid Spine, Power Below Worksurface))
- When a Single-sided End panel is ordered, a separate connector must be specified (GPLTBK) with any Allsteel standard paint color.
- When Split End panels are ordered, a separate connector must be specified (GSYSCONSE) with any Allsteel standard paint color.
- Due to the lack of connectors spacing out the panels, the true width of Fit panels must accommodate panel overlap. To allow for modular interior worksurface dimensions, the option codes must indicate how much overlap is needed, which is done by specifying 'panel type' explained below.

Panel Type Options are below:	True Panel Widths (ex: 72"W)
Mid Wing = "MDW"	Exact width (72")
Left Hand Split End = "LPE"	1/2 panel width overlap (72.56"W)
Right Hand Split End = "RPE"	1/2 panel width overlap (72.56"W)
Left Hand Single-Sided End = "LSE"	1 panel width overlap (73.125" W)
Right Hand Single-Sided End = "RSE"	1 panel width overlap (73.125" W)
Right Hand End Spine = "RES"	1/2 panel width overlap (72.56"W)
Left Hand End Spine = "LES"	1/2 panel width overlap (72.56"W)
Mid Spine = "MSP"	1 panel width overlap (73.125" W)
Single Spine = "SGS"	Exact width (72")





FIT

Specifying Fit Panels

Following the 'Panel Type', the option code includes a power specification.

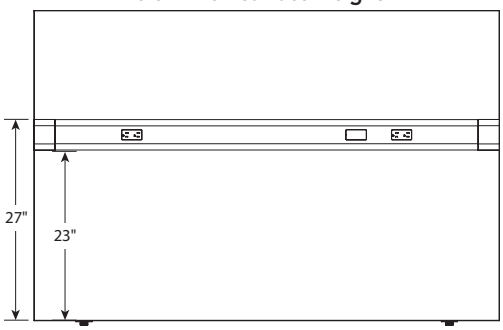
Power options for Spine Panels are below:
- Single-Sided Power Below Worksurface = "SW"
- Single-Sided Power Below HAT = "SH"
- Dual-Sided Power Below Worksurface = "DW"
- Dual-Sided Power Below HAT = "DH"

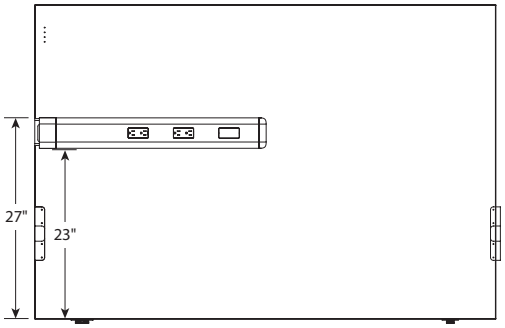
Power options for End Panels are below:
- No Power = "PN"
- Single-Sided Power Below Worksurface = "SW"
- Single-Sided Power Below HAT = "SH"

Power options for Mid-Wing Panels are below:
- No Power Below Worksurface = "PW"
- No Power Below HAT = "PH"
- Left-Handed Single-Sided Power Below Worksurface = "LW"
- Left-Handed Single-Sided Power Below HAT = "LH"
- Right-Handed Single-Sided Power Below Worksurface = "RW"
- Right-Handed Single-Sided Power Below HAT = "RH"
- Dual-Sided Power Below Worksurface = "DW"
- Dual-Sided Power Below HAT = "DH"

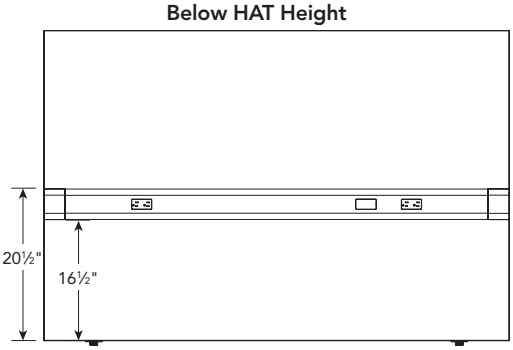
Electrical Rail (page 48)
- Panels 60"W and larger can be specified with integrated power.
- Rail offers 2 receptacle locations and an optional knock-out location for data.
- Includes attachment hardware for mounting onto the panel.
- Rail protrudes 1" from the face of the panel, with receptacles protruding an additional ¼". Note any potential interference with workstation components. (See Casegoods & Storage Pricer.)
- Rails must be specified to cover electrical components when using a powered panel.
- Spine panels require the rail to be specified at the same width as the panel.
- Powered Wing or End panels require a return rail since power is only integrated within the first 36" past the spine.
- Rails can be specified as single- or dual-sided.
- Can be painted any Allsteel Standard Paint color.
- Electrical can be placed at two different heights on the panel face, Below Worksurface and Below HAT, see dimensions below. Rail models are the same regardless of height.
- Below Worksurface is intended for use below fixed worksurfaces or above low storage.
- Below HAT is intended for use below a Height-Adjustable table.
- Ordering two single-sided rail models is not a substitute for one dual-sided model, and vice-versa.

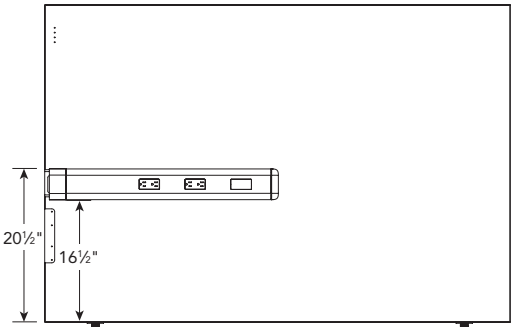
Below Worksurface Height





Below HAT Height





FIT

Specifying Fit Panels – Full Model Logic

Panels 18", 24", 30", and 36"W are available in the following configurations:
- Mid Wing, No Power Below Worksurface – 'MDWPW'
- Mid Wing, No Power Below HAT – 'MDWPH'

Panels 42", 48", 50", and 54"W are available in the following configurations:
- Mid Wing, No Power Below Worksurface – 'MDWPW'
- Mid Wing, No Power Below HAT – 'MDWPH'
- Left-Hand Split End, No Power – 'LPEPN'
- Right-Hand Split End, No Power – 'RPEPN'

Panels 60"W, 66"W, 72"W, 78"W, 84"W are available in the following configurations:
- Left-Hand Single-Sided End, Single-Side Power Below WS – 'LSESW'
- Left-Hand Single-Sided End, Single-Side Power Below HAT – 'LSESH'
- Right-Hand Single-Sided End, Single-Side Power Below WS – 'RSESW'
- Right-Hand Single-Sided End, Single-Side Power Below HAT – 'RSESH'
- Left-Hand Split End, Single-Side Power Below WS – 'LPESW'
- Left-Hand Split End, Single-Side Power Below HAT – 'LPESH'
- Left-Hand Split End, No Power – 'LPEPN'
- Right-Hand Split End, Single-Side Power Below WS – 'RPESW'
- Right-Hand Split End, Single-Side Power Below HAT – 'RPESH'
- Right-Hand Split End, No Power – 'RPEPN'
- Left-Hand End Spine, Single-Sided Power Below WS – 'LESSW'
- Left-Hand End Spine, Single-Sided Power Below HAT – 'LESSH'
- Left-Hand End Spine, Dual-Sided Power Below WS – 'LESDW'
- Left-Hand End Spine, Dual-Sided Power Below HAT – 'LESDH'
- Right-Hand End Spine, Single-Sided Power Below WS – 'RESSW'
- Right-Hand End Spine, Single-Sided Power Below HAT – 'RESSH'
- Right-Hand End Spine, Dual-Sided Power Below WS – 'RESDW'
- Right-Hand End Spine, Dual-Sided Power Below HAT – 'RESDH'
- Mid Spine, Single-Sided Power Below WS – 'MSPSW'
- Mid Spine, Single-Sided Power Below HAT – 'MSPSH'
- Mid Spine, Dual-Sided Power Below WS – 'MSPDW'
- Mid Spine, Dual-Sided Power Below HAT – 'MSPDH'
- Single Spine, Single-Sided Power Below WS – 'SGSSW'
- Single Spine, Single-Sided Power Below HAT – 'SGSSH'
- Single Spine, Dual-Sided Power Below WS – 'SGSDW'
- Single Spine, Dual-Sided Power Below HAT – 'SGSDH'
- Mid Wing, Right-Hand Single-Sided Power Below WS – 'MDSRW'
- Mid Wing, Right-Hand Single-Sided Power Below HAT – 'MDSRH'
- Mid Wing, Left-Hand Single-Sided Power Below WS – 'MDSLW'
- Mid Wing, Left-Hand Single-Sided Power Below HAT – 'MDSLH'
- Mid Wing, Dual-Sided Power Below WS – 'MDSDW'
- Mid Wing, Dual-Sided Power Below HAT – 'MDSDH'
- Mid Wing, No Power Below WS – 'MDSPW'
- Mid Wing, No Power Below HAT – 'MDSPH'

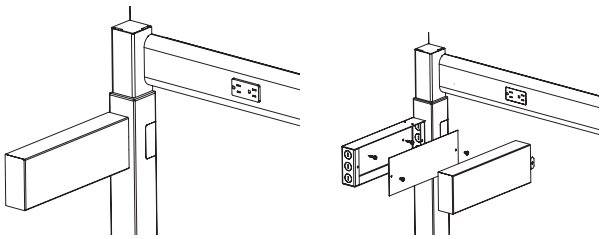
Rail Connectors (page 48)

- Rail connectors must be used at BOTH ends of each rail to create the proper transition.
- Rail connectors are painted metal and can be painted to match the rail color.

										GSYSRSL Straight In-Line Connection (No Mid Panel between Spine Panels)	**GSYSRL** L-Connection (Between Powered Spine and Powered Wing)	**GSYSRSC** Straight Corner Connection (Between Powered Spine and Non-Powered Wing)	**GSYSREC** End Cap (At the end of any Return Rail)	**GSYSRPL** L- Infeed Connection (Infeed between Powered Spine and Powered Wing)	**GSYSRPS** Straight Corner Infeed (Infeed between Powered Spine and Non-Powered Wing)

Rail Hardwire Infeed Connectors (page 47)

- Rail Hardwire infeed connectors are for use where a hardwired infeed comes into the rail.



Panel Connectors (page 47)

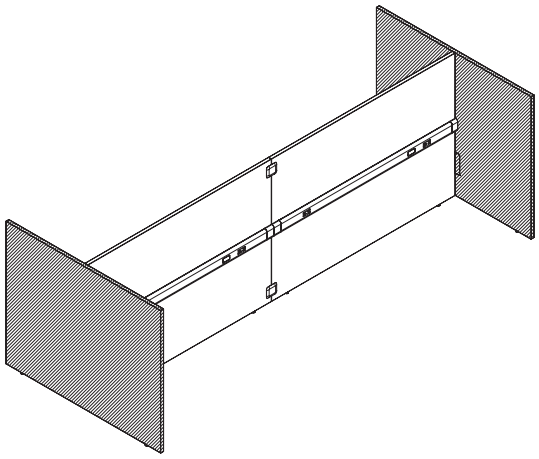
- Panel connectors must be used at each panel connection

						GSYSCONS Straight In-Line Connection (No Mid Panel between Spine Panels) No In-line panel connector is needed if 1 or more wing panels are connected to the spine at the panel intersection	**GSYSCONL** L-Connection (Between Spine and Mid Wing) Each Mid Panel requires 2 kits – unless storage is ganged at the base, then 1 kit is needed	**GSYSCONSE** Split Panel connection at the End of the Run (Split panels also require 1 L-Bracket kit GSYSCONL to be specified)	**GPLTBK** Single Powered Panel connection at the End of the Run (Single Powered panels also require 1 L-Bracket kit GSYSCONL to be specified)

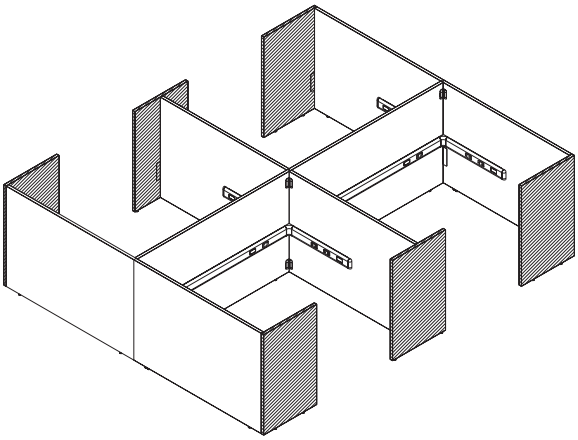
FIT

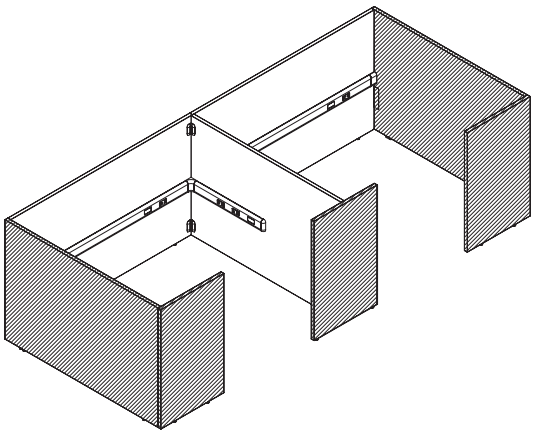
Reference Page

- For Non-Powered End Panels (Single or Dual-Sided), Gallery-to-Gallery 'L' or 'T' Models should be used. Gray panels indicate Gallery-to-Gallery.



- Gallery-to-Gallery Panels can also be connected to Fit Wing or End panels as an additional return. Gray panels indicate Gallery-to-Gallery.

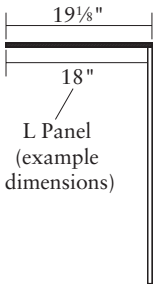




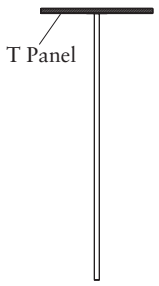
Reference Page

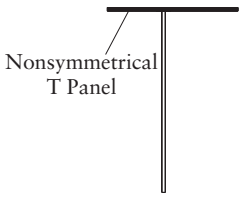
Gallery-to-Gallery Panels (page 139)

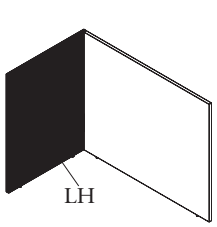
- Gallery-to-Gallery Panels connect to Fit panels and are available in L-, T-, and Nonsymmetrical T- configurations.
- When specifying Gallery-to-Gallery Panels, the installation template (GTEMP) is required. The recommendation is 1 template for every 30 panels. Templates are reusable.
- Gallery-to-Gallery Panels cap over Fit panels and are oversized by 1⅛" to maintain true interior dimensions.
- Gallery-to-Gallery Panels must be of equal or lower height than the Fit panel attached. The Gallery-to-Gallery Panel cannot be taller than the adjacent panel. If this is required, please reach out to TPG for a custom solution.
- Panel construction is the same as Fit panels.
- Can be specified with matching or contrasting edge.
- Woodgrain laminates can be specified with vertical grain up to 54"W. Horizontal grain is available on all sizes.
- Gallery-to-Gallery Panel widths are available in 3" increments from 18"W to 30"W and in 6" increments from 30"W to 78"W.
- Gallery-to-Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel.
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery-to-Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery Panels are secured with an inset flat bracket under a painted metal cover at the base and a hidden top connection.
- If Fit Panel L- connectors are preferred at Gallery-to-Gallery attachments for aesthetic reasons, they may be added.
- L- and Nonsymmetrical T- panels are handed.
- Additional support is required after every 60" in panel width (i.e., return panel, storage or worksurface tie-in, panel bracket, or foot).
- Nonsymmetrical T- panels are specified in the format GTyyxxzz. Substitute yy as panel height, xx and LH nominal length, and zz and RH nominal length.

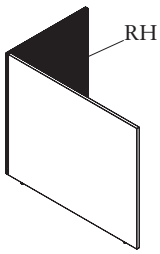


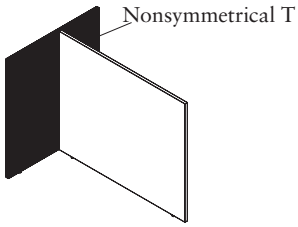
Note: Gallery-to-Gallery Panels cap over standard Gallery Panels and are oversized by 1⅛" to maintain modular interior dimensions. (ex: 18" panel is actually 19⅛"W)

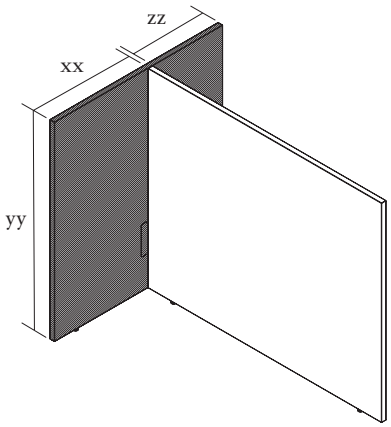






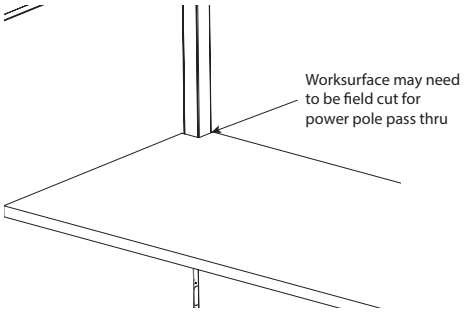


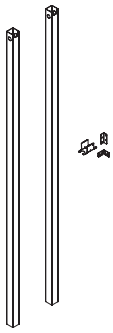




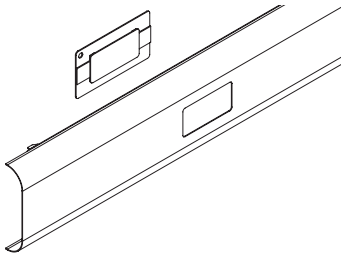
FIT

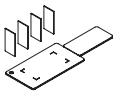
Reference Page



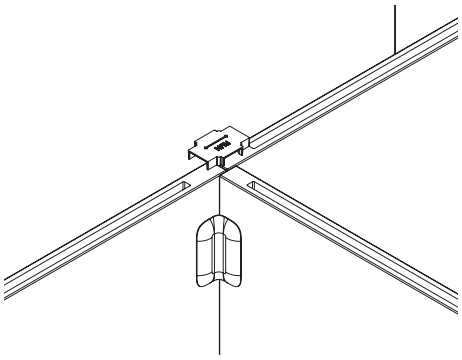


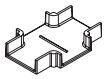
Power Pole (page 62)
- Ceiling power pole for use with ceiling in-feeds.
- Ceiling power poles connect to the rail inside of workstation, in this instance a mounted worksurface or HAT may need to be field-cut to accommodate. (See image at right.)
- Below HAT Power Pole is used to shroud a base or wall in-feed as it connects into a Below HAT Rail Height.
- Below Worksurface Power Pole is used to shroud a base or wall in-feed as it connects into a Below Worksurface Rail Height.
- Power Pole height is 13 feet.





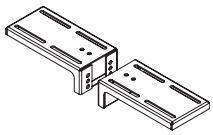
Rail Port Cover (page 62)
- Offered in a 2- or 12-pack.
- Used to cover a port location in a rail when a receptacle is not needed.
- Can be painted any Allsteel Standard Paint color.





Installation Template (page 47)
- At least one required at installation, recommended that at least one is ordered per project.

Wall Start ***(Coming soon!)*** (page 47)
- Wall Starts are 1⅛" by 1⅛" rectangular mounting posts that are meant to affix a Fit panel to a permanent building wall.
- Wall starts add 1⅛" to panel run.
- Attachment hardware not included.
- Must be specified at the same height as the connecting panel.

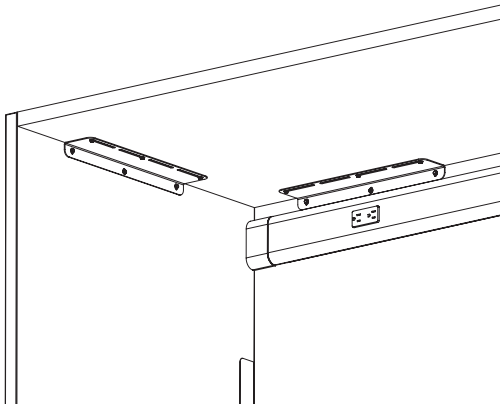


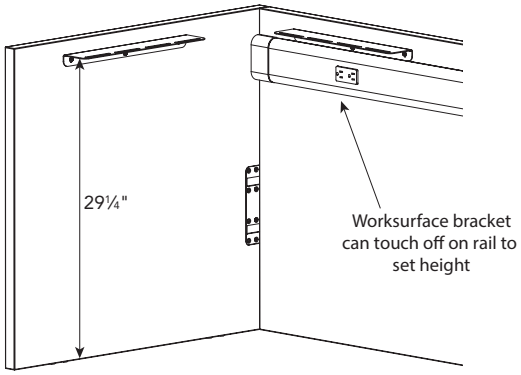
Countertop Brackets ***(Coming soon!)*** (page 50)
- Includes attachment hardware.
- Countertops are flush with the top of the panel and can be flush with the ends of the panel or shorter than the panel width.
- For straight countertops, two countertop brackets must be ordered.
- For corner countertops, three countertop brackets must be ordered.
- Will deface the panel.

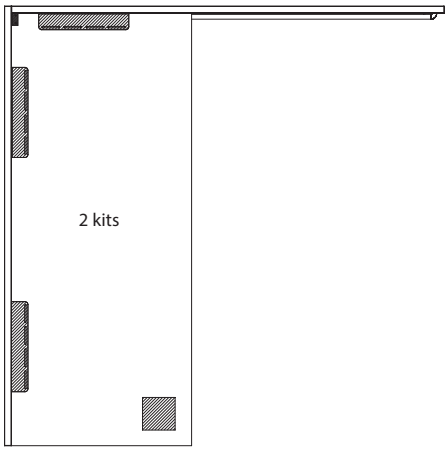
Reference Page

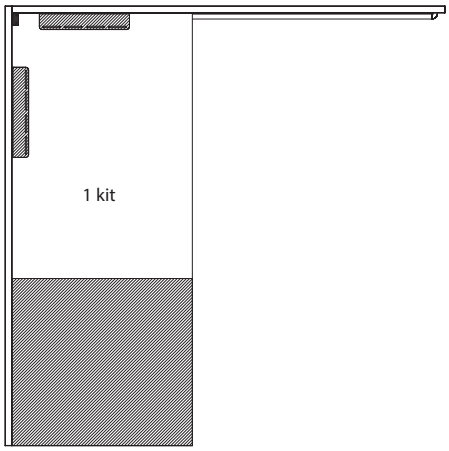
Worksurface Mounting Bracket (page 47)

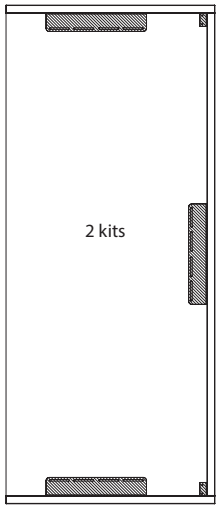
- Used to mount a fixed-height worksurface to a Fit panel.
- Can be painted any Allsteel Standard Paint color.
- A worksurface stiffener is required for surfaces 60"W or greater.
- One bracket kit (GWSBK) is required for each worksurface end attached to Fit panels.
- Sized to fit above a Below Worksurface power rail location and locate the top of a fixed worksurface at 29¼" above the floor. Or can be installed at any available height.
- When using a 30"H spine with a below worksurface rail, a worksurface or storage must be mounted at any panel-to-panel connection.









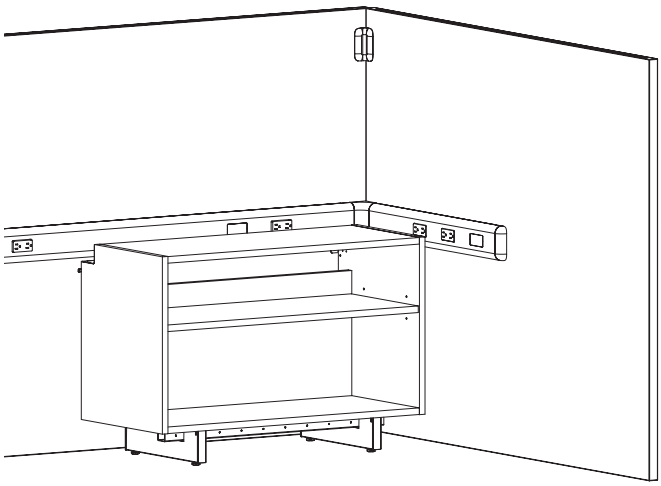


Storage Ganging Kits (page 47)

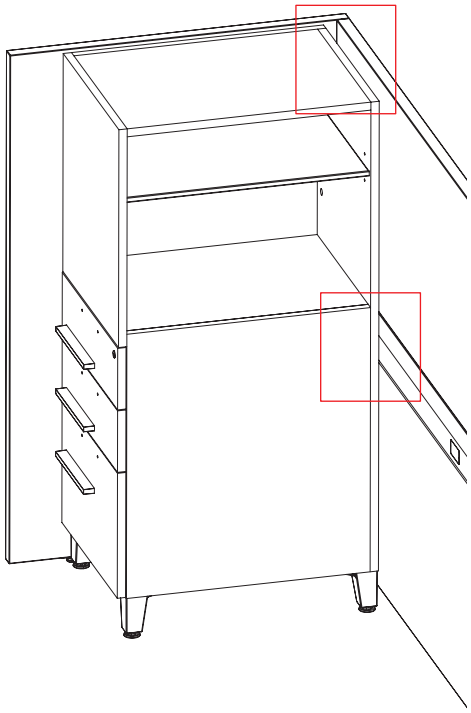
- The laminate storage ganging kit (GSGKL) is used to connect a Fit panel to a laminate storage unit.
- The metal storage ganging kit (GSGKM) is used to connect a Fit panel to a metal storage unit.

Credenzas & Towers

- Approach low credenzas w/ trough and Align low credenzas sit below rail. (Below Worksurface height only.)
- Rail will offset taller storage, like towers, from panel by 1".

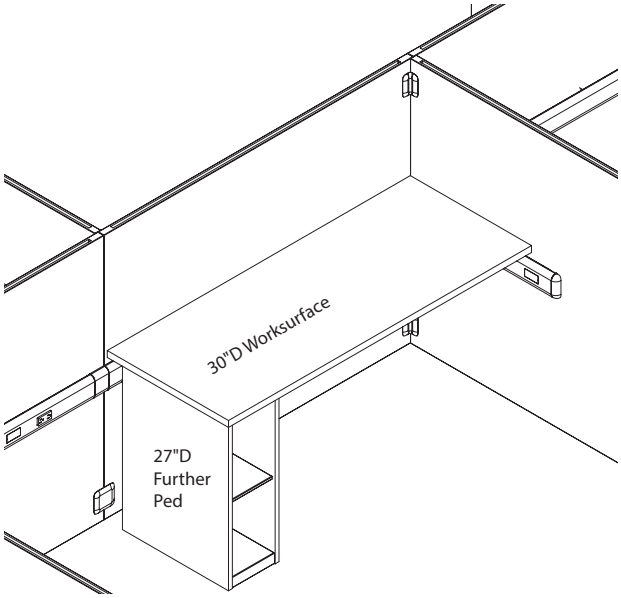


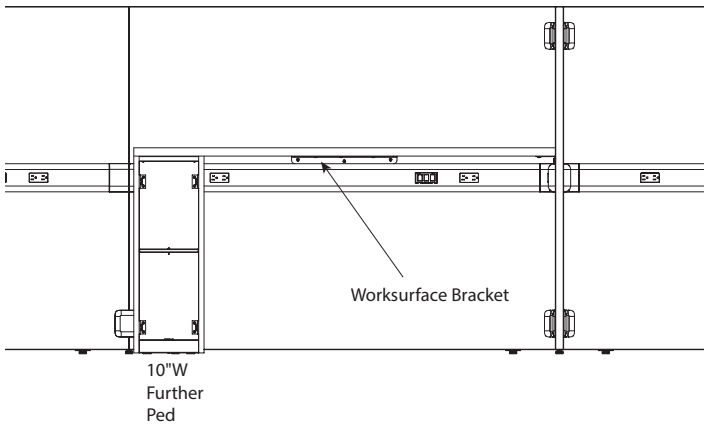
NOTE: A topper used on an Approach credenza may interfere with the ability to plug into the rail. Credenza will need to be offset from the panel.



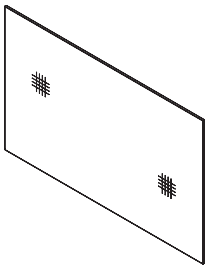
Support Pedestals

- Further, Involve, and Align support pedestals match height of worksurface brackets and can be recommended for worksurface support.
- Cannot use full-depth support storage that matches worksurface depth due to rail interference.

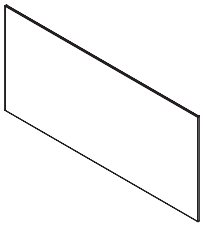




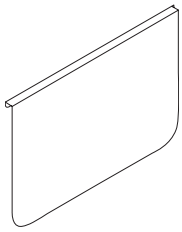
Reference Page



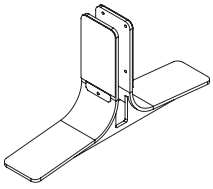
Tackboards *(Coming soon!)* (page 49)
- Provides tackable surface.
- Comes with steel-painted trim.
- Available in the following heights: 15", 22½"
- Available in the following *widths: 24", 30", 36", 42", 48", 54", 60"
  *Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Fit Panel. Mounting hardware included. Will deface the panel.



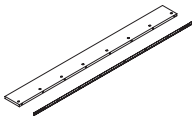
Magnet or Marker Boards *(Coming soon!)* (page 49)
- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Available in the following heights: 15", 22½"
- Available in the following *widths: 24", 30", 36", 42", 48", 54", 60"
  *Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Fit Panel. Mounting hardware included. Will deface the panel.



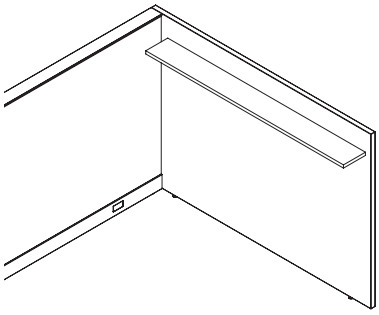
Hanging Magnet or Marker Boards *(Coming soon!)* (page 49)
- Hangs over Fit panel or sits on top of worksurface.
- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Cannot be installed back-to-back when hanging in the same location.
- Available in 30"W and in two heights: 20"H and 26"H.



Fit Panel Foot *(Coming soon!)* (page 49)
- Single foot provides rigidity to large wing panel.
- Available in any textured Allsteel paint.
- Foot extends 9" from either side of the panel.



Floating Laminate Shelves (page 50)
- 6" depth.
- ¾" thickness.
- Constructed of HPL laminate with 0.8mm ABS edgebanding.
- Available in solid or horizontal woodgrain laminate.
- Available with contrasting or matching edge.
- Widths available every 6" from 12" to 78"W.
- Widths from 54" to 78" satisfy a stiffener requirement and are meant to be mounted to a panel that is 6" wider than the shelf. (e.g., 84"W panel would accept a 78"W stiffener shelf.)
- Shelves narrower than 54"W do not act as a stiffener.
- Shelf stiffeners must be installed above the power rail to function as a stiffener.

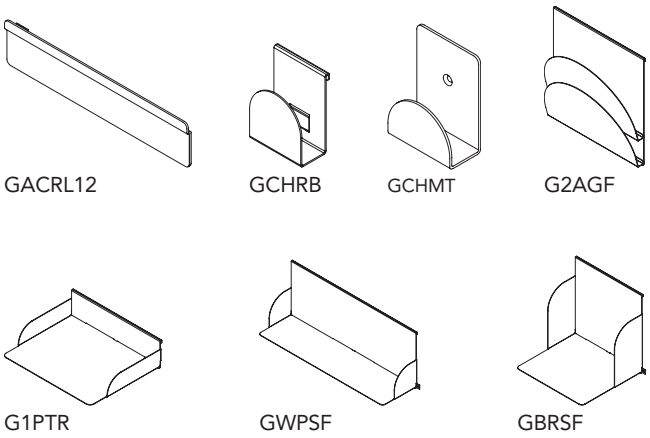


FIT

Reference Page

Accessory Rail and Paper Management *(Coming Soon!)* (page 50)

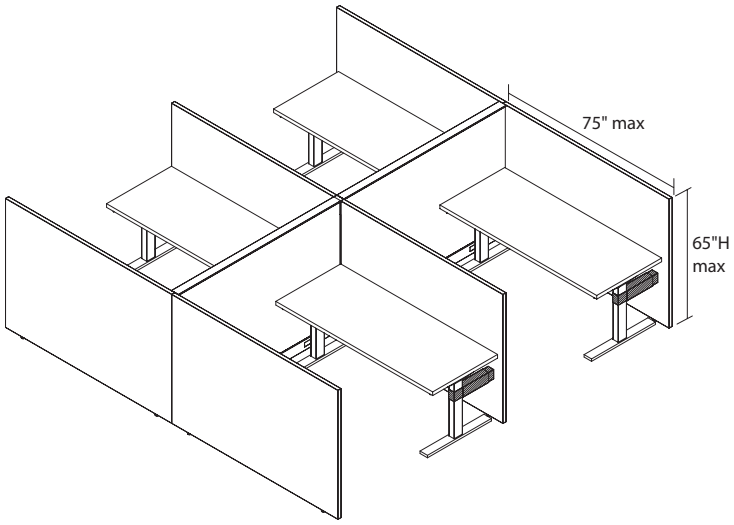
- Accessory Rail provides mounting for paper management accessories, listed below.
- Rail is 2.6"H and is available in the following widths: 12", 18", 24", 30", 36".
- Rails can be installed in any location on the Fit panel and can be placed in-line to span panel length.
- Rail and accessories can be painted any standard Allsteel paint color.
- Mounts directly to the Fit panel, attachment hardware included.
- Extensions accessories are NOT compatible with the accessory rail.
- These accessories are compatible with tool tiles.
- Includes a rail cover to hide hardware and provide magnetic surface.
- Compatible Rail Accessories:
  - Coat Hook (Rail-based, a mounted version is also available to attach directly to the panel)
    - Rail Based dimensions: 4"x 3"x 1¾"
    - Mounted dimensions: 4"x 3" x 1½"
  - Angle File (Triple, Dual, and Single heights)
    - Depth of 2"
    - Heights: Triple = 15⅓", Dual = 12⅓", Single = 9⅓"
  - Paper Tray (Triple, Dual, and Single heights)
    - Depth of 10"
    - Heights: Triple = 9⅓", Dual = 6⅓", Single = 3⅓"
  - Personal Shelf
    - 9⅓" x 24" x 10⅔"
  - Binder Shelf
    - 12⅓" x 12" x 11⅓"



Height-Adjustable Table Tie-In Brackets (page 50)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T-leg HAT.
- AGBKC to be specified for connection to a C-leg HAT.
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C-legs with a 30"D worksurface and a screen must be specified with T-leg brackets.
- NOTE: Wire chain cannot be installed on the same leg as the HAT tie-in bracket.

Max Height (with Glass): 65"H
Max Width: 75"W; No top size restrictions



FIT

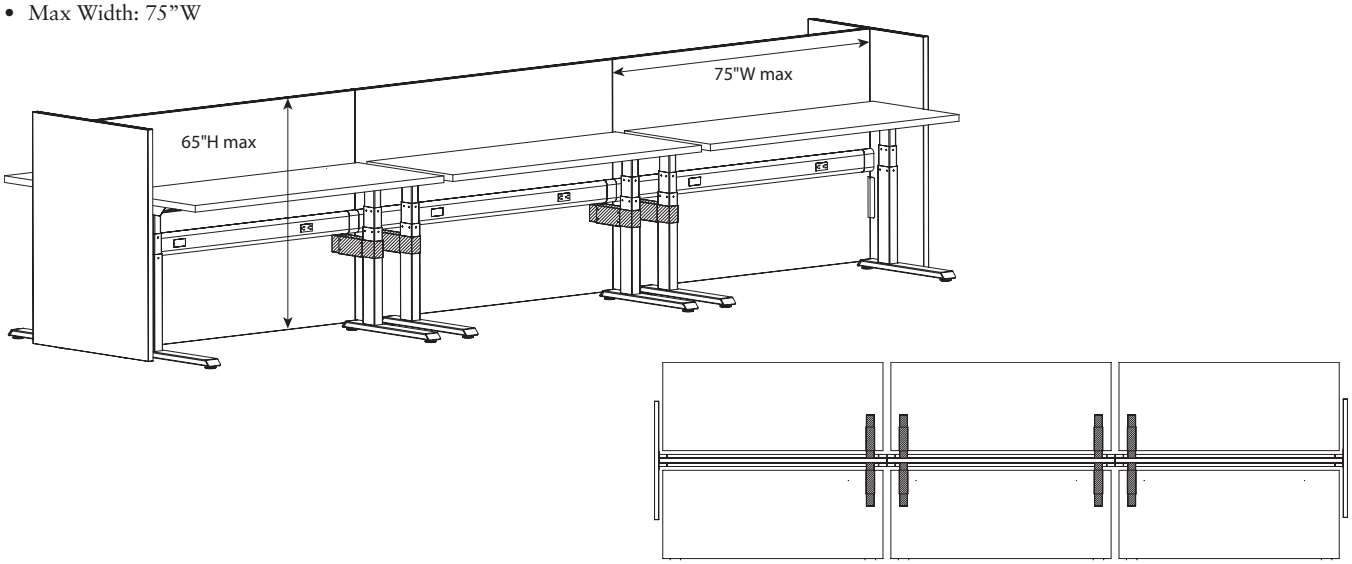
Reference Page

Dual-Sided Panel Bench

- Can be created using HAT brackets or Fit Panel Feet. Cannot be single-sided. No maximum run length.

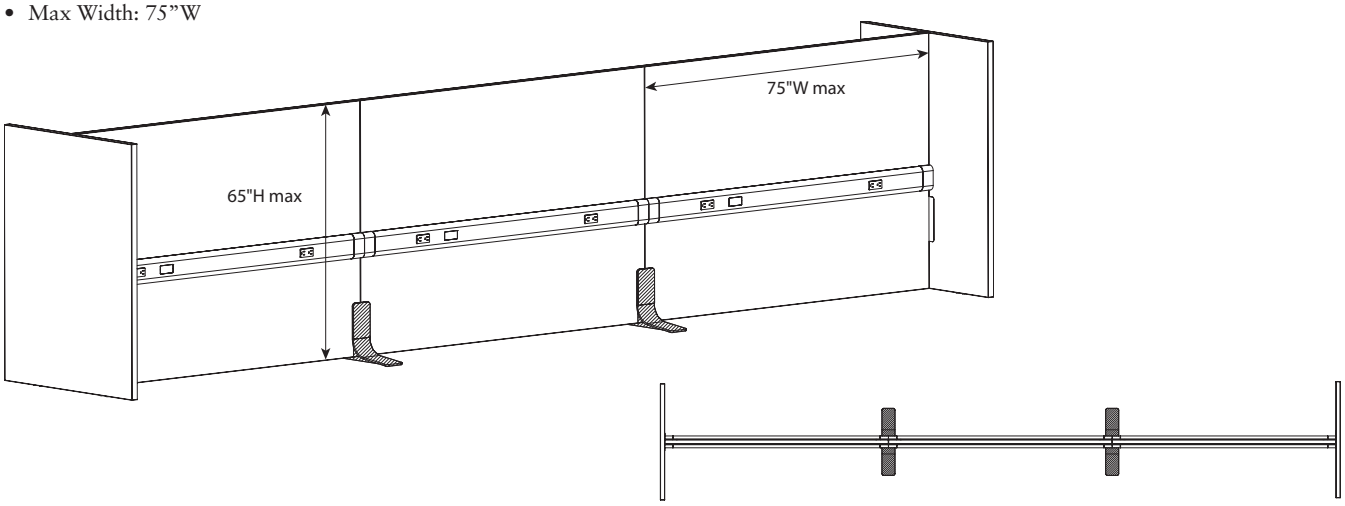
Height-Adjustable Table Tie-In Brackets (page 50)

- Max height (with Glass): 65”H
- Max Width: 75”W



Fit Panel Feet (page 49)

- Max height (with Glass): 65”H
- Max Width: 75”W



FIT

Electrical Systems

Fit Electrical Systems

Fit offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

- See pages 54-55 for a detailed explanation of each electrical system.
- All 3 systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian)
- Fit panels and electrical components are UL listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through panels.

Hardwire Junction Box – New York Code (page 61)

- Hardwire (New York Code) junction box is used when local electrical codes require hardwire entry.
- Separate junction boxes must be specified for single- or dual-sided power.
- For use with hardwire power infeed shrouds, models GSYSHWBH & GSYSHWBW.
- Unit must connect to a power or pass-thru harness positioned in the rail of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any 90-degree panel connection with an adjacent rail.
- Must order housing model U8SBKCH for junction box.

Hardwire Wiring Harness – Chicago Code (page 61)

- The junction box must connect into power harness within rail through a hardwire power infeed shroud at a 90-degree panel connection with an adjacent rail.
- Hardwire receptacles connect into standard mounting locations within rail.
- Power entry can be routed from the ceiling, via a Fit power pole, or from the floor into a junction box model.
- For single-sided applications use junction box A871500. For double-sided application use junction box 877600. Must order junction box housing model U8SBKCH separately in both cases.

Electrical Infeeds

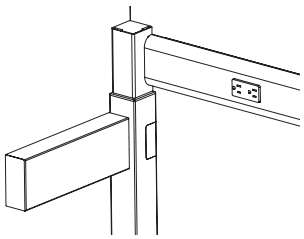
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communication and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.
- When using sealtight infeeds, an additional H-clip is needed to connect the infeed to the power harness, ordered separately.

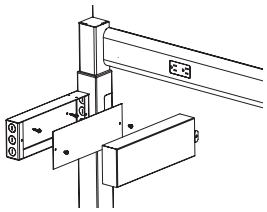
Ceiling Power Infeed (page 61)

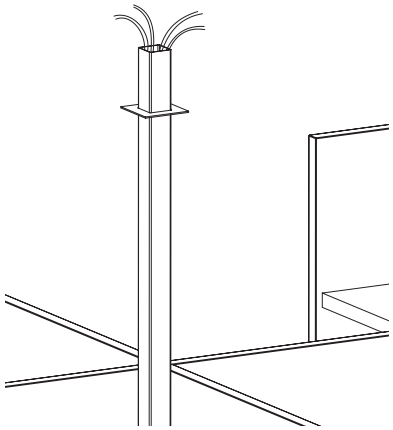
- Ceiling power infeed connects to a prewired electrical harness in the rail pathway, traverses through an adjacent panel, and terminates in the junction box at the top of the integrated power pole.
- Use power pole model GSYSPP.
- Most codes allow flex cables to be exposed after installation. Verify code requirements before ordering for exposed application.

Integrated Power/Communication Pole (page 62)

- Integrated power pole accommodates ceiling power infeed and communication/data lines.
- Provide capacity for routing power infeed and cables to the power rail.
- Conduit of the infeed cables serves as the division of electrical and communication cabling.
- Installs into Below Worksurface or Below HAT rail heights in a 90-degree panel connection.
- Single cavity with removable cover.
- Height: 13', Outside Dimension: 2" square.
- When using a ceiling power infeed, consider that the infeed must connect into an electrical harness.
- To power the prewired electrical system, from a ceiling power source, a ceiling infeed cable must be purchased separately.







To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power infeed needed.

Reference Page

* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

Flexconnect™ Electrical System Options

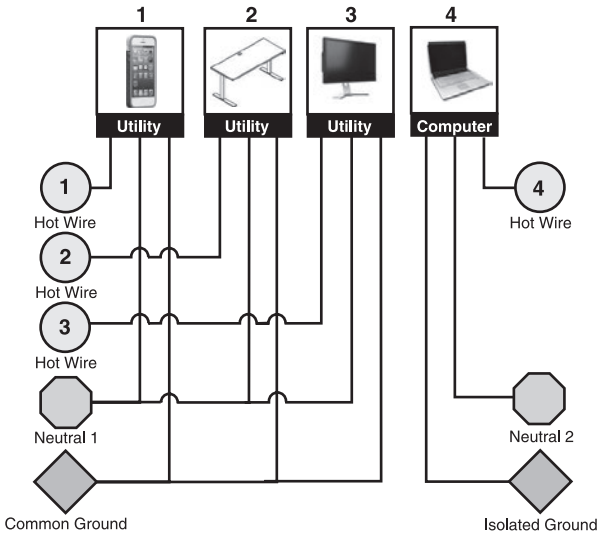
The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an “A” suffix and appear in a gray box in this pricer.

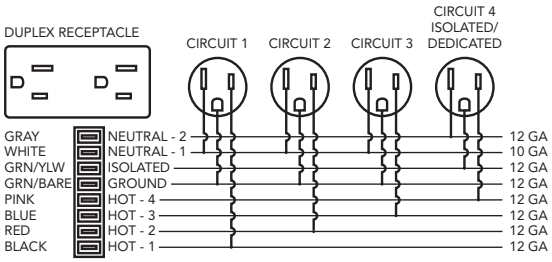
All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Fit panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 59.

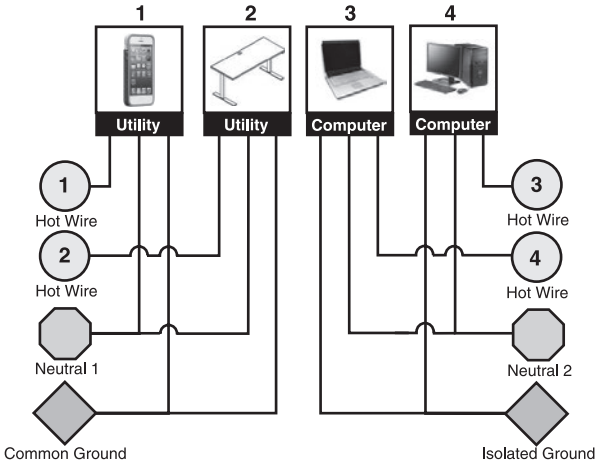
Four-circuit, 3 + 1 Receptacle Option



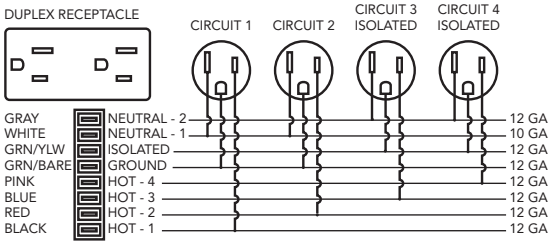
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



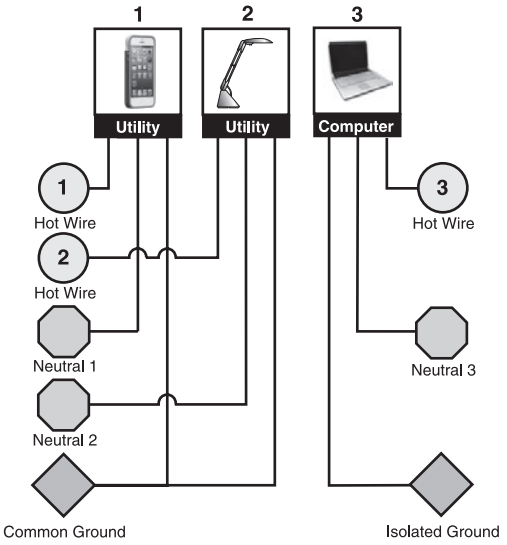
Four-circuit, 2 + 2 Receptacle Option



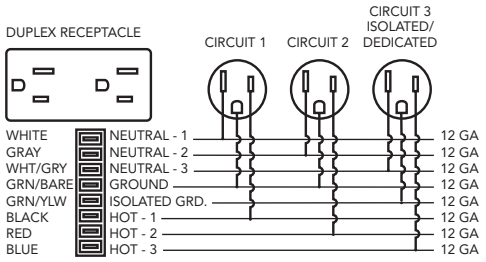
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Fit System Receptacle Usage					
Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A871501**	Common Circuit-2 (1) **A871502**	Common Circuit-3 **A871503**	Iso/Dedicated Circuit-4 **A871504**
	2 + 2	Common Circuit-1 **A871501**	Common Circuit-2 **A871502**	Isolated Circuit-3 **A871506**	Isolated Circuit-4 **A871504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

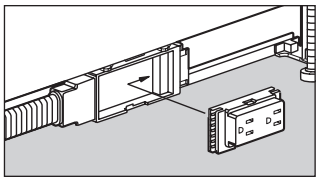
- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel Model Numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

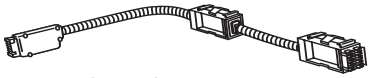
Duplex Receptacle

15 amp Receptacle

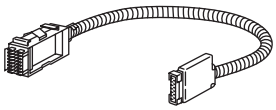
Power Harnesses and Pass-Thru Harnesses

Electrical power harnesses are used to distribute power in Fit panels. Harness power blocks snap directly onto brackets in base pathway. Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

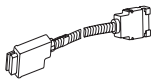




Electrical Power Harness



Electrical Pass-Thru Harness With Power Block



Electrical Pass-Thru Harness Without Power Block

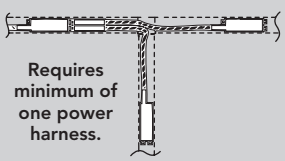
Electrical Power Harnesses (page 60)
- Electrical power harnesses are used to distribute power in panels.
- Fit electrical can only be located at one location.
- Specify harness length to match panel width.
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in the rail.

Electrical Pass-thru Harness With Power Block (page 60)
- Electrical pass-thru harnesses with power block have capacity to handle one duplex receptacle on each side of the panel when exposed.
- Specify harness length to match panel width.
- Power harnesses accept one duplex receptacle per panel side.

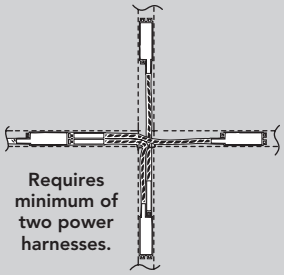
Electrical Pass-thru Harnesses Without Power Block (page 60)
- Specify harness length to match panel width.
- Electrical pass-thru cables distribute power through any panel(s) where receptacles are not required. Cable length cannot be stretched.

All electrical power harnesses and pass-thru harnesses will stretch 3½", allowing them to span "T", "X", and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.



Requires minimum of one power harness.



Requires minimum of two power harnesses.

Use of a ceiling infeed at this location requires an additional power harness.

FIT

Receptacles

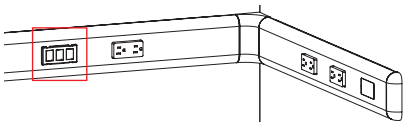
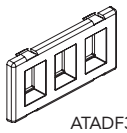
Pewter — P8D	Flint — E9
Platinum Metallic — PR2	Loft — EV
Salt — P8C	Silver — ES
Titanium — P8T	Silver — ES

Duplex Receptacles (page 61)
- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses with blocks.
- Duplexes are available in multiple colors. See page 64 for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical infeed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical infeed.

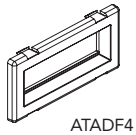
Single- vs Dual-Sided
- Different receptacles are required for single vs dual-sided power, see page 61 for models.

Data Components

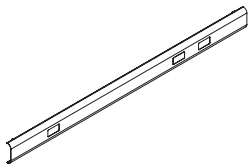


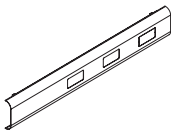


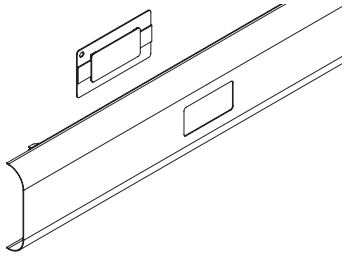
ATADF3



ATADF4



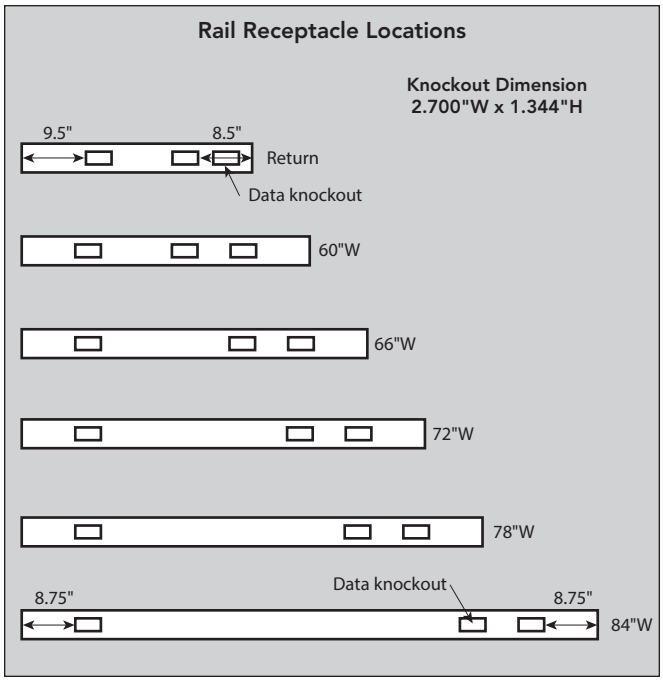




Data Faceplates (page 62)
- Fit not only provides space for voice and data cables, it also offers several means of mounting commercially available voice and data components.
- Commercially available modular data faceplates can be mounted in vacant rail receptacle openings.
- Due to rail depth, back-to-back data modules should not be used. Rail knockouts must be located on opposite sides in dual-sided applications.

Fit Rail Covers (page 48)
- Features additional knockout (offset) for improved utilization of power and data. Knockouts are 2.7”W and 1.344”H.
- Two power cutouts are available per powered panel for receptacle placement. Port covers are available (ordered separately) for unused receptacle locations.

Rail Port Cover (page 62)
- Offered in a 2- or 12-pack.
- Used to cover a port location in a rail when a receptacle is not needed.



Circuit Usage

Strategy 1

Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
  Circuit 1 — Calculators, fans, etc.
  Circuit 2 — Task lights (could be wired to wall switch)
  Circuit 3 — CRT or flat screen monitors
  Circuit 4 — CPUs

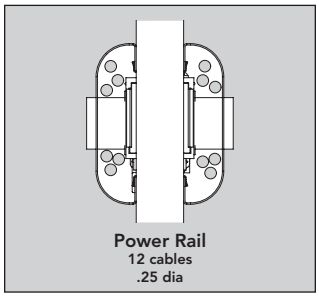
Strategy 2

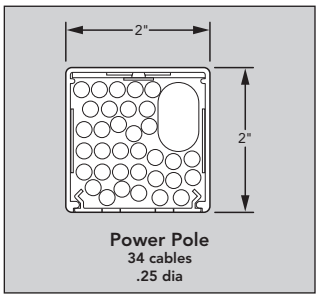
Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Rails are non-handed, so the data knockout may be installed on the left- or right-hand side of the panel. **NOTE:** Data may not be installed back-to-back in dual-sided applications.

Lay-in Cable Capacity





- The Fit power rail allows continuous voice and data cables to run through and between panels without interruption.
- The rail accepts up to 12 voice/data cables (¼" dia) at 60% fill when electrical system shares the rail.
- Cable capacity of the Fit power pole is 3.3 sq. in. for a total capacity of 34 cables of ¼" diameter.
- Cables can enter/exit rail through the ceiling power pole or the base infeed power pole.

Note: Cable quantities listed are at 60% fill ratio.

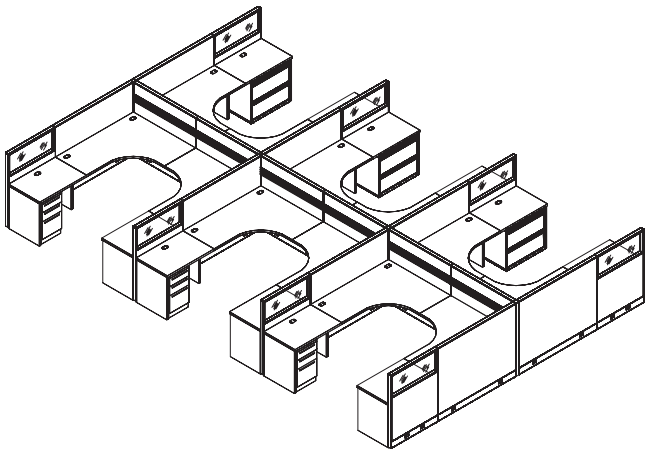
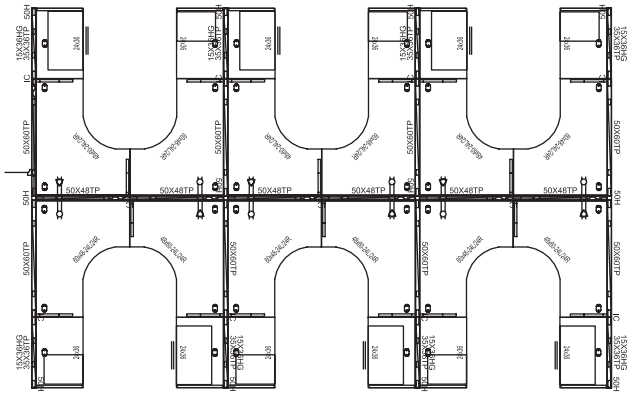
Optimize "U" Station 8' x 8'

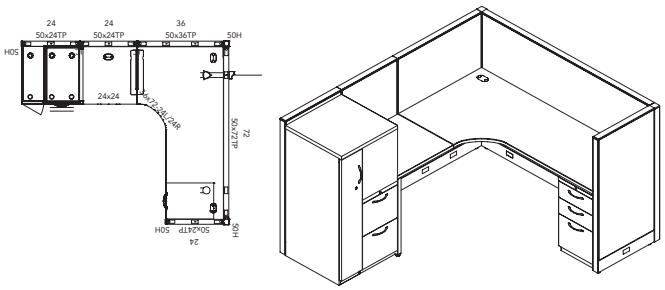
Provides seated privacy with ample storage and worksurface space.





Optimize "L" Station 7' x 6'

Storage tower allows lower panel height for an open feeling.



OPTIMIZE

Visit https://www.allsteeloffice.com/design-resources/idea-starters to view these typicals and more.

Workstations made easier.

Whether you're outfitting a call center, creating teaming areas, replacing a reception desk, or adding new stations for managers, Allsteel can help you make the most of your office with Optimize. By bringing together panels, worksurfaces, and storage in one cohesive offering, we've made it easy for you to create efficient, well-designed spaces. All you have to do is configure these quality components to fit the needs of everyone in your office. Let us show you how.

Optimize makes a good first impression.

In areas open to the public, choose panels, worksurfaces, and storage to define space and keep projects organized. In this reception/shared workspace, a transaction countertop welcomes guests and worksurfaces below provide ample space for computers and paperwork.

We help you put it all together.

An open configuration with lower panels and a small footprint is perfect for people who perform the same function and need to share information throughout the day. Optimize benching can utilize tool rails and monitor arms to keep items off the desktop. An integrated D-shaped worksurface makes it easy for workers to come together to collaborate and then quickly return to their personal work areas.

As work changes, Optimize changes with you.

Optimize helps workers adjust workstyles throughout the day, from concentrated work to team brainstorming. In team areas, each person can have ample privacy, roomy storage with overhead bins, as well as a spacious worksurface for individual tasks. When it's time to collaborate, a table within the workspace and mobile pedestals that double as seating make it easy to come together.

Make the most of your space.

With Optimize panels, worksurfaces, and storage, you can create stations that feel like private offices. Higher panels promote privacy along the aisle while glass stackers near windows bring natural light into the space. Plenty of enclosed, lockable storage above and below the worksurface holds sensitive information. A U-shaped worksurface arrangement creates a natural conference area to accommodate conversations with team members or clients.

Frame Dimensions (Actual)

Depth: 2⅛" (use 2¼" to calculate intersections in length of panel run)

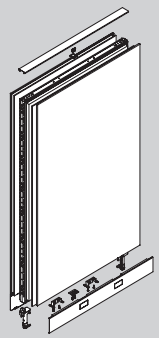
Widths: 20", 24", 30", 36", 42", 48", 60", 72"

Heights: 34¼", 41¼", 49¼", 64¼" (with levelers fully retracted)

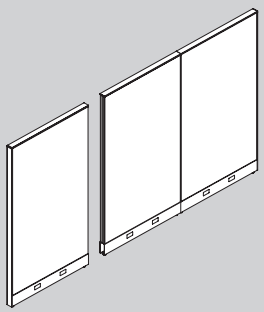
Leveling Glides: 2⅛" range

Stacking Panels: 15"H fabric and glass, 30"H glass

Frameless Glass Screens: 7½"H, 15"H



Panel frames are shipped with base pathway covers installed. Top trim is specified separately.

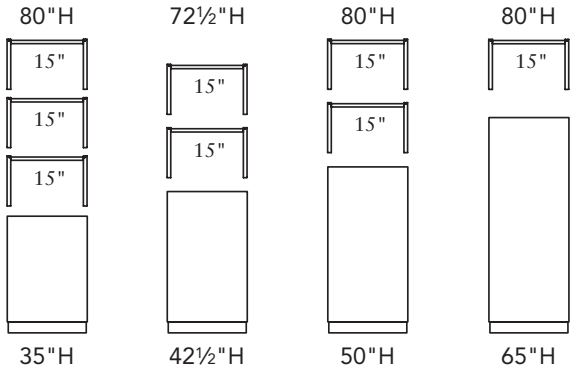


In-line connections between panels in a continuous run are accomplished with an in-line connector kit.

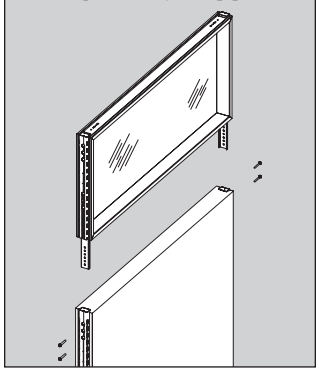
Tackable Panels (pages 72-73)

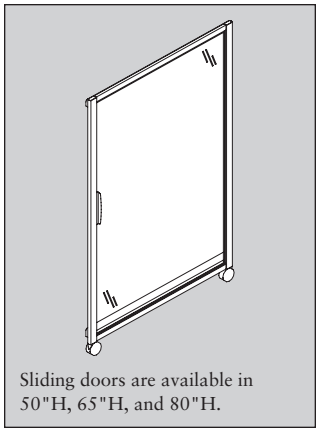
- Specifications: 4-sided, welded tubular steel panel frame.
- Panel frames include and are shipped with base pathway covers installed. Top trim is specified separately for all panel frames.
- Hardware included with connector kits.
- Available in 4 heights and 8 widths — add ⅜" for each panel vertical end trim.
- Panel frames can be leveled up to 2⅛". Actual panel height varies depending on position of leveling glides.
- Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.
- For adequate stability, one of two methods of stabilization shown on page 69 must be adhered to.
- Due to depth of panel, back-to-back data modules should not be used in the base. Optional 3-hole kickplates are available.
- Add 2¼" to panel run for each "L", "T", "X", or extended straight connector ("S").
- Acoustical panels meet BIFMA recommendations.
- Fabric selection for 72"W panels is limited. Fabrics that are unavailable on 72"W panels are flagged with a * on page 9 of this price list.

Building Vertically with Optimize Panels



Stacking Frame Connection
Glazed panels only in top position

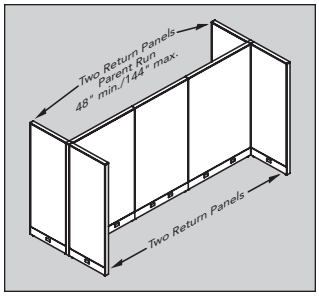




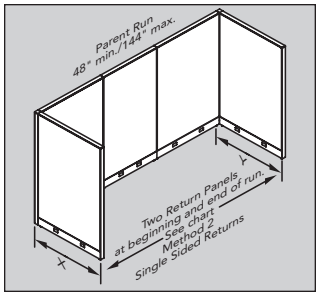
Sliding doors are available in 50"H, 65"H, and 80"H.

Building Horizontally with Optimize Panels

Method 1—Opposing Returns



Method 2—Single-Sided Returns



Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1 — Opposing returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels.
- The parent run must have a minimum of two 24"W return panels running in opposing directions on each end of run.
- Return panels must not be any more than 30" shorter in height than parent run.
- When using 120° connectors, 12" must be added to length of return panels as determined by methods 1 and 2.

Method 2 — Single-sided returns

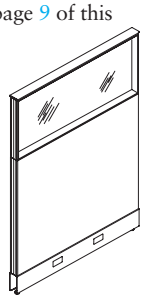
- A parent run must be a minimum of 48" and a maximum of 144" between return panels.
- The parent run must have a minimum of two return panels extending in one direction. Stack-ons may require additional length. See chart.
- Return panels must not be any more than 30" shorter in height than parent run.

Reference Page

Stacking Tackable and Glazed Panels (pages 72 and 74)

- When adding stacking panels, remove the top trim from the structural panel, and install top trim on top of the stacking panel.
- Stacking connection provides a solid connection, allowing the stacking frame to accept hang-on components, per Optimize configuration guidelines at left.
- Includes attachment hardware. Specify connectors separately.
- Only one stacking glazed panel can be added to top position of any Optimize panel of same width from 20"W to 72"W up to a maximum combined height of 80".
- End trim is specified in full end height to include height of base panel + stacking panel.
- Guidelines for using overhead storage with stacking frames are given on page 120.
- Stacking glazed panels feature clear or frosted tempered safety glass inserts (specified). Glass frame is painted to match trim.
- Stacking frames can be added to the top of same width 35"H, 50"H, and 65"H base panels up to 80"H; added to 42½"H panels up to 72½"H.
- Slot modularity will be lost on stacker used with 42½"H panels. If panel mounting slots are not being used, this is not an issue.
- Do not combine differing frame widths in a single stack. No spanning multiple frames.
- Stacking frames cannot be used as base frames.
- Fabric selection for 72"W panels is limited. Panel fabrics that are not available on 72"W panels are flagged with a "*" on page 9 of this price list.

Tackable Glazed Panels (page 74)

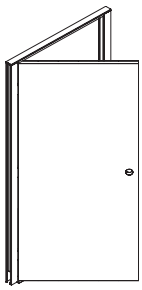


- Available 50"H and 65"H with 15"H clear or frosted tempered safety glass inserts (specified).
- Glass frame is painted to match trim.
- Top trim is specified separately.
- Cannot stack on glazed panels.
- Fabric selection for 72"W panels is limited. Available 72"W panel fabrics are flagged with a "W" on page 9 of this price list.

Glass Panel Mounted Screens (page 75)

- Frameless insert integrated into the base panel frame top trim.
- Replaces top trim on structural or stacking tackable frame.
- It is possible to span multiple frames when the combined frame width is equal to the panel mounted screen width.
- Can do variable height, must be used with grooved VH trim.
- Panel mounted screens are non-structural. Do not hang or stack on top of panel mounted screens.
- Available in ⅜" thick clear or frosted glass.
- To be included in overall height of panel with a maximum combined height of 80".

Door Panel Frame (page 75)



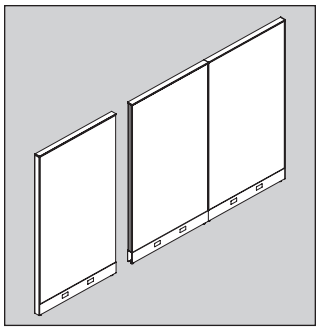
- The 80"H door panel frame includes 42"W frame, 36"W laminate door, hinges, and attaching hardware. Top trim is specified separately.
- See illustration at right.
- Lockset with knob or lever ordered separately.

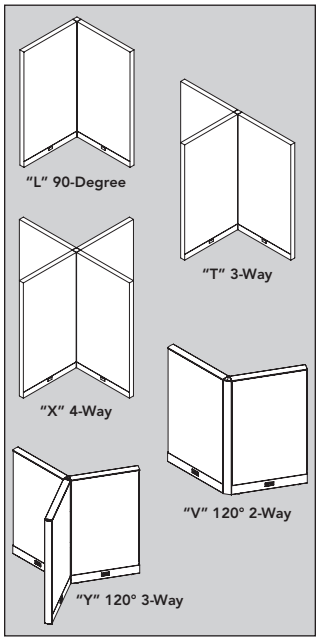
Optimize Sliding Doors and Mounting Kits (pages 71 and 75)

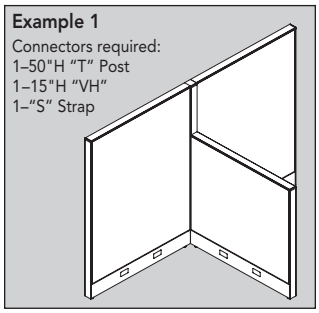
- Optimize sliding doors are available in 50"H, 65"H, and 80"H.
- See illustration and specification information on page 71.

Method 2 – Single-sided Returns

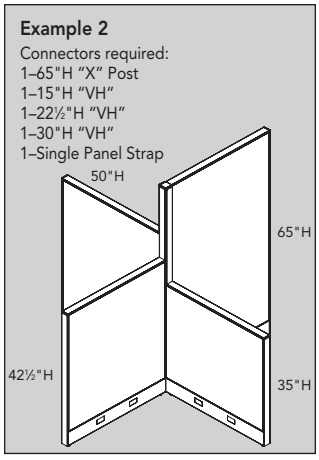
Single-Sided Panel Run	Minimum Return Panels Total (X+Y)	Minimum Return Panels Total (X+Y) with Stack-ons
48"-108"	84"	84"
114"-144"	84"	96"

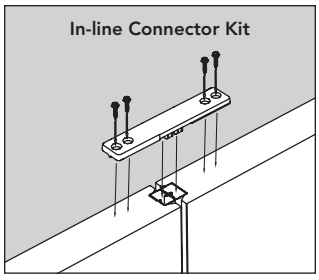


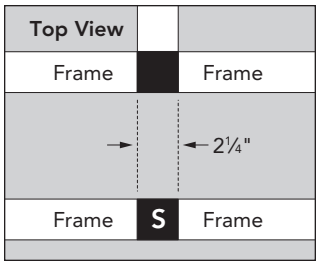




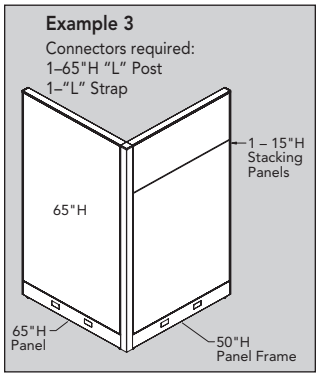
In variable height "T" connections as shown above, you would use the connectors as indicated.



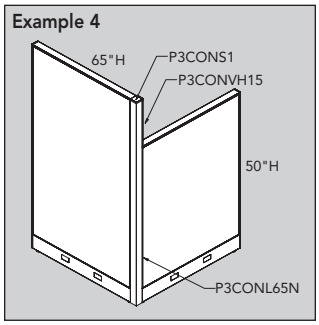




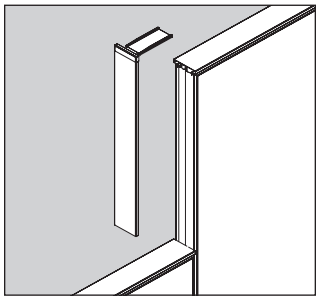
Extended Straight "S" Connection



Base connectors (includes base pathway) must be specified at base regardless of full height or segmented connection.



Example above represents Optimize variable height connection for 65"H to 50"H.



High-Low "H"

Connectors and Trim

In-line Connector Kit (page 76)
- In-line connections between panels in a continuous run are accomplished with an in-line connector kit. There is no incremental increase in dimension along the run.
- In-line connector kits include all parts required for connecting two panels of same height together.
- Kit includes in-line connector strap, hardware, and glide tower to glide tower screw.
- Order panel end trim kits to finish the end of every panel run (except when attaching panels to permanent walls).

"L", "T", "X", "S", "V", and "Y" Connectors (page 76)
- "L", "T", "X", "V", and "Y" connectors kits are used when connecting panels at intersecting runs. For "L", "T", and "X" connections connector kits, add 2¼" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.
- Specify connectors based on number and placement of panels.
- Connector posts are specified separately from connector straps—specify post based on tallest panel height and type of panel connection, specify straps based on connection of tallest panels (see variable height examples left).
- Connectors are made of extruded aluminum.
- Connector posts where power pole will enter need to be specified with single connector straps, model P3CONS1.
- Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections.
- Add 2¼" to the length of the run for every extended straight connector used.

Multiple-Height Connections (page 76)
- Multiple-height connections also utilize standard "L", "T", "X", and "S" connectors, in the height of the tallest panel. (See examples 1-4 at left.)

Panel End Trim (page 78)
- End vertical trim cover (includes top cap — adds ⅜" to run).
- Order to finish the end of every panel run (except when attaching panels to permanent walls).

Variable Height Connector Kits — Post Trim (page 78)
- Includes connectors, vertical cover, and attaching hardware.
- Order one per each panel height change in an "L", "T", "X", or "S".

Grooved VH Finishing Kit (page 78)
- For usewhen the base panel frame of a panel mounted screen is shorter than the adjacent panel

In-line Variable Height End Trim Finish Kits (page 78)
- End vertical cover (includes top cap).
- High-low "H" covers the exposed end of a panel when joining panels in-line of differing heights. Optimize profile adds ⅜" to length of panel run.
- Order one per each panel height change in an in-line connection.
- At the end of a panel run use panel end trim.

Wall Mount Kits (page 78)
- Wall mount kits provide a means to affix a panel run to a permanent building wall.
- Includes top cap. (Color must be specified.)
- Connector adds 1" to length of panel run.
- Anchor devices are not supplied with the wall mount kit. Refer to Optimize Installation Instructions for appropriate hardware.

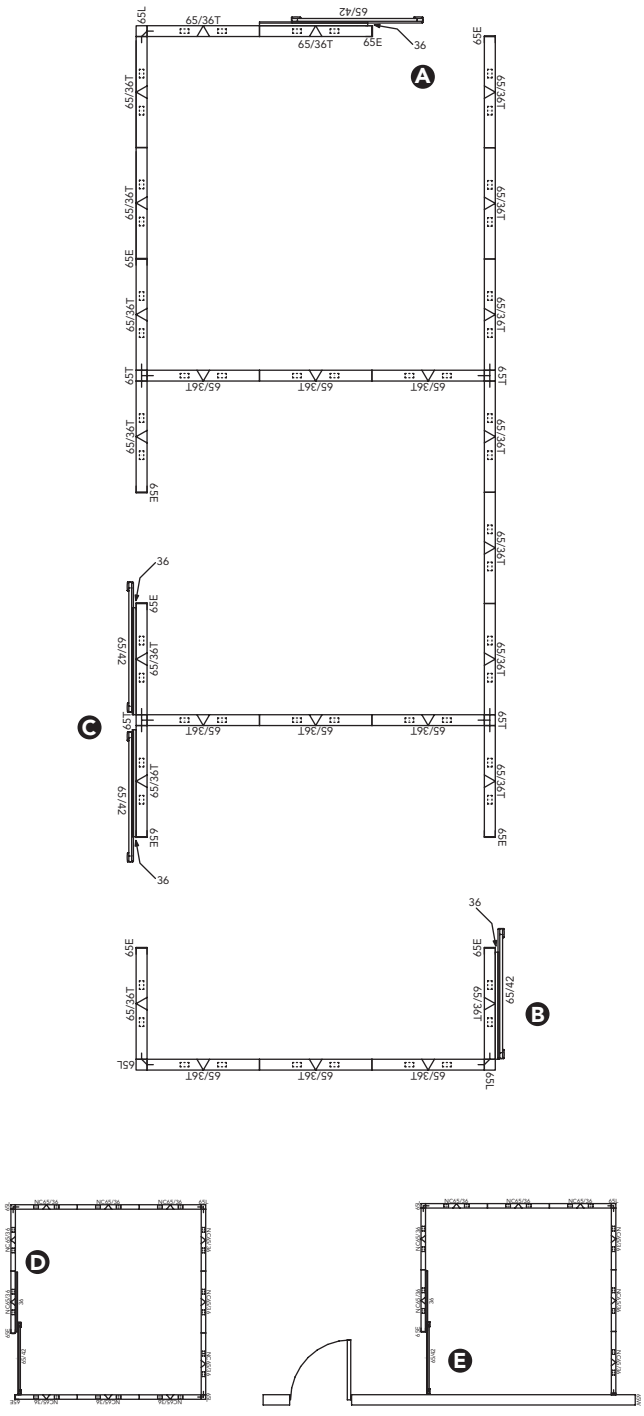
2-Way 120° Connector Kits (page 78)
- Includes top cap, connectors, vertical cover, and attaching hardware.

3-Way 120° Connector Kits (page 78)
- Includes top cap and connectors.

Reference Page

The sliding doors must be specified with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of P1 or P2 paint, the sliding door will create a unique look for any office environment.

The **sliding doors** *are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. They accommodate a 36"W opening and are 42"W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.*



General Guidelines for Use of Sliding Door (page 75)

- The system requires the ordering of both a door and a mounting bracket kit.
- All doors are 42" wide to accommodate a 36"W opening and are non-handed .
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48"W). Kits available in P1 and P2 paint.

General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 69). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening **(A)** where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42"W. If the panel is at a corner **(B)**, the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels **(C)** that are less than 42"W they will interfere with each other if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear **(D)** and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run that is positioned adjacent to a wall **(E)** or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.

For specification information see pages 67-71.

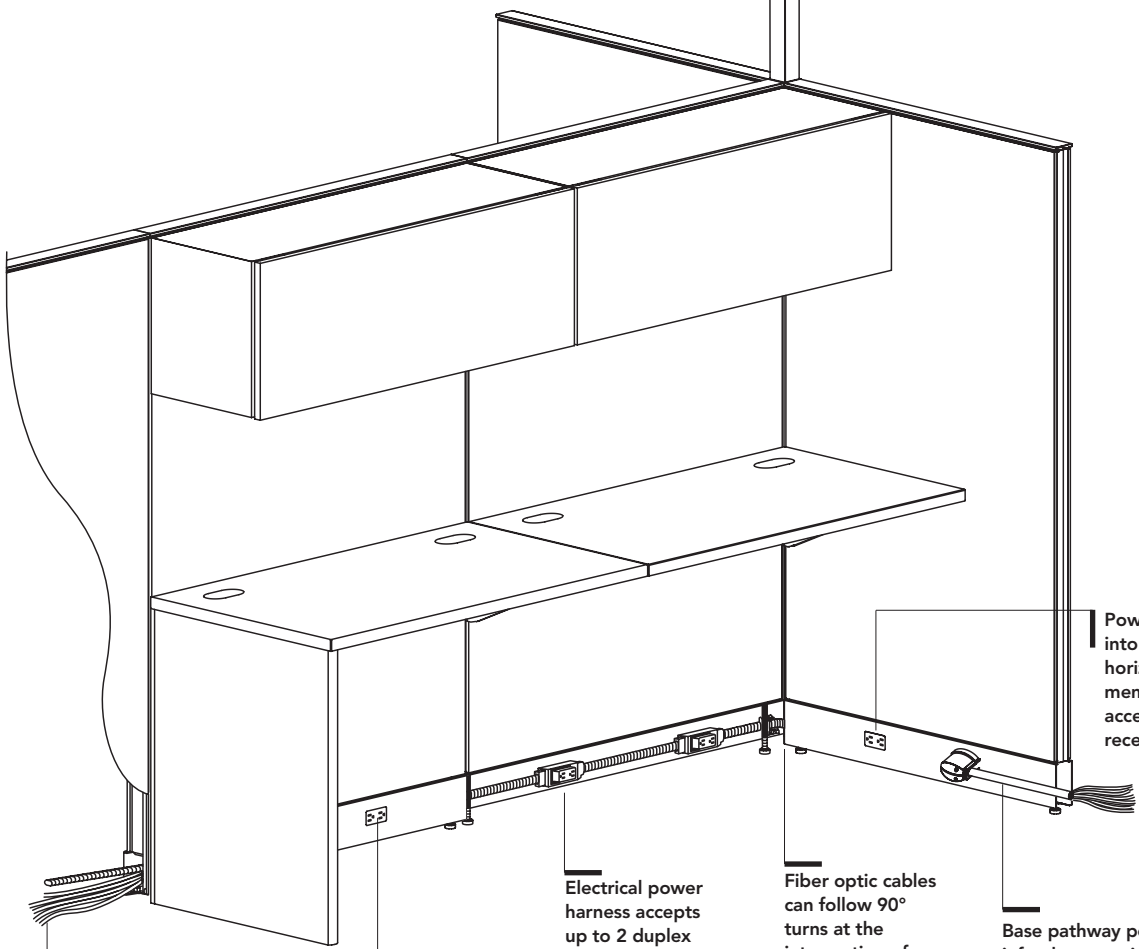
Reference Page

Optimize features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. The frame allows voice and data cables to be routed horizontally in the base pathway.



Electrical Systems

Optimize Electrical Systems

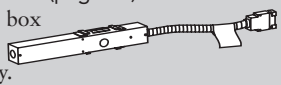
Optimize offers a choice of four electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- Eight circuits; two four-circuit systems provided back-to-back.

- See pages 81-82 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian).
- Optimize panels and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through panels.

Hardwire Junction Box – New York Code (page 89)



- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 30"W to 72"W.
- When used in 30"W and 36"W panels, power can be routed only in one direction.
- When used in 42" and wider panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction.
- Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.

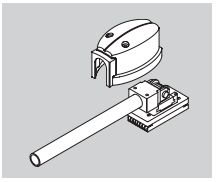
Hardwire Wiring Harness – Chicago Code (page 89)

- Hardwire (Chicago Code) wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components.
- The base pathway junction box (model A871500) clips direct into receptacle locations for single sided applications.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway.
- Power entry can be routed from the ceiling, via an Optimize power pole, or from the floor into a junction box (model A871500).

Electrical Infeeds

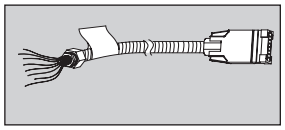
- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

Base Pathway Power Infeed (page 89)



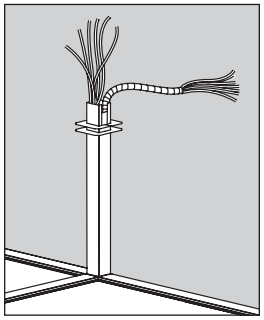
- Sealtight base pathway power infeed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.

Ceiling Power Infeed (page 89)



- Ceiling power infeed connects to a prewired electrical harness in the base pathway, traverses through an adjacent panel, and terminates in the junction box at the top of the integrated power pole.
- Use integrated power pole model P278PP.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

Integrated Power/Communication Pole (page 89)



Integrated Power and Communications Pole

- Integrated power pole accommodates ceiling power infeed and communication/data lines.
- Provide capacity for routing power infeed and cables to the base pathway of a panel.
- Conduit of the infeed cable serves as the division of electrical and communications cabling.
- Installs into 42½-65"H or 15"H stacking 90°, "T", and "X" connections.
- Integrated power pole includes trim kit.
- Single cavity with removable cover.
- Field-cut to desired length.
- Outside Dimension: 2" square.
- When using a ceiling power infeed, consider that the infeed must connect into an electrical harness located in an adjacent panel. (See page 89 for cable capacity.)
- To power the prewired electrical system, from a ceiling power source, a ceiling infeed cable, Model A871912, A871912C, A871912A, A871912AC, A871918, A871918C, A871918A, or A871918AC must be purchased separately.
- For applications requiring longer integrated power poles, a 156"H model is available.

To Order:

Reference Page

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
   - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity, and type of power infeed needed.

* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

Flexconnect™ Electrical System Options

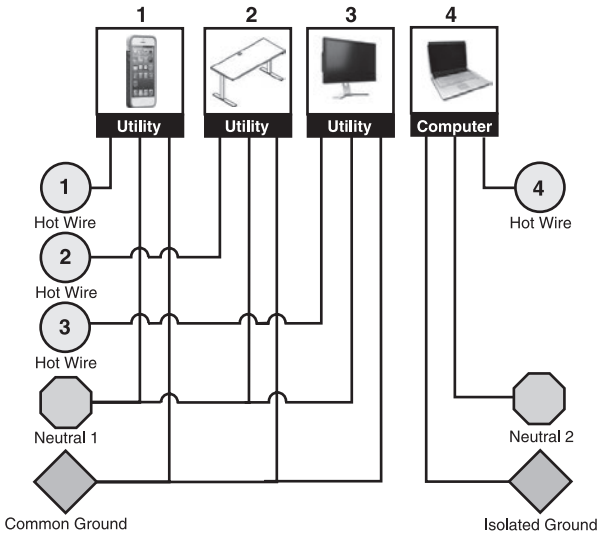
The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an “A” suffix and appear in a gray box in this pricer.

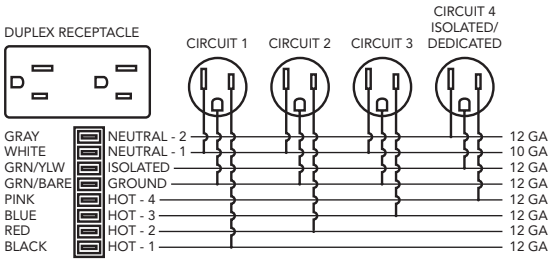
All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 200.

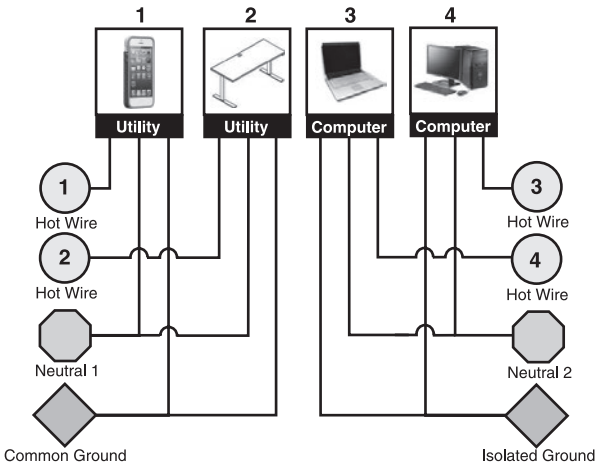
Four-circuit, 3 + 1 Receptacle Option



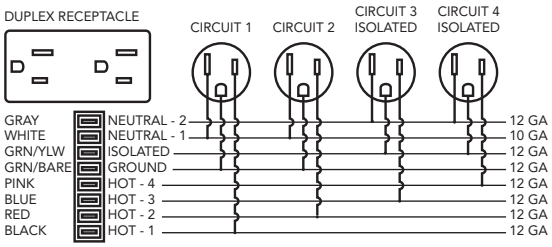
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



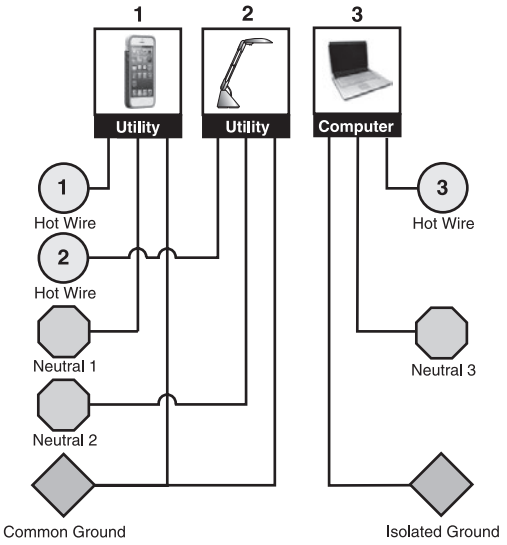
Four-circuit, 2 + 2 Receptacle Option



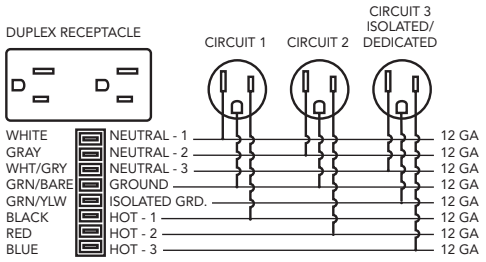
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix.



Optimize System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered

Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	**3 + 1**	Common Circuit-1 **A871501**	Common Circuit-2 (1) **A871502**	Common Circuit-3 **A871503**	Iso/Dedicated Circuit-4 **A871504**
	2 + 2	Common Circuit-1 **A871501**	Common Circuit-2 **A871502**	Isolated Circuit-3 **A871506**	Isolated Circuit-4 **A871504**
Three-circuit 3-Hot/3-Neutral/2-Ground	**w/separate neutrals**	Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

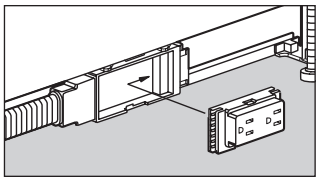
- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel Model Numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

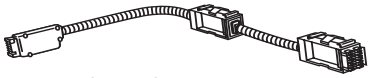
Duplex Receptacle

15 amp Receptacle

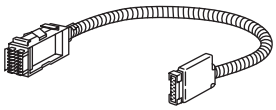
Power Harnesses, Pass-Thru Harnesses, and Dual Electrical Harnesses

Electrical power harnesses are used to distribute power in Optimize panels. Harness power blocks snap directly onto brackets in base pathway. Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

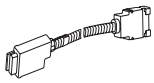




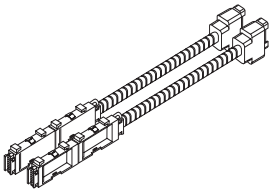
Electrical Power Harness



Electrical Pass-Thru Harness With Power Block



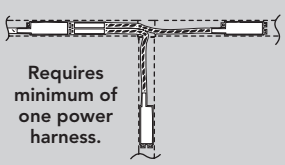
Electrical Pass-Thru Harness Without Power Block



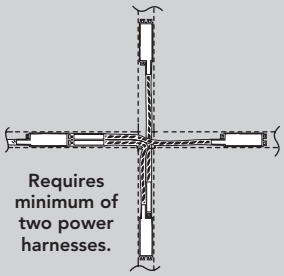
Dual Electrical Eight-circuit Power Harness Kit

All electrical power harnesses and pass-thru harnesses (except 20"W) will stretch 3½", allowing them to span "T", "X", "120°" intersections, and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.



Requires minimum of one power harness.



Requires minimum of two power harnesses.

Use of a ceiling infeed at this location requires an additional power harness.

Electrical Power Harnesses (page 88)

- Electrical power harnesses are used to distribute power in panels.
- Optimize electrical can only be located at base pathway.
- Specify harness length to match panel width.
- 24" power harness accepts one receptacle on each side of the harness, all other length power harnesses have power blocks to accept four duplex receptacles (two on each side of panel).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in base pathway.
- Use of a ceiling infeed requires one additional harness.

Electrical Pass-thru Harness With Power Block (page 88)

- Electrical pass-thru harness with power block have capacity to handle one duplex receptacle on each side of the panel when exposed.
- Specify harness length to match panel width or combined panel widths.
- Power harnesses accept one duplex receptacle per panel side.
- Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.
- All electrical power harnesses and pass-thru harnesses with power block will stretch 3½", allowing them to span "T", "X", "A" intersections, and "S" extended straight connections.

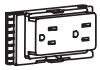
Electrical Pass-thru Harnesses Without Power Block (page 88)

- Specify harness length to match panel width or combined panel widths.
- Electrical pass-thru cables distribute power through any panel(s) where receptacles are not required. Cable length cannot be stretched.

Dual Electrical Eight-Circuit Power Harness Kits (page 88)

- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables.
- Specify harness length to match panel width.
- Requires two four-circuit infeeds.
- Uses four-circuit receptacles.
- Models must be positioned back-to-back in the panel — single-side use is not permitted.
- Components can only be routed in a single run — a single run can branch to single panel runs at "T" and "X" junctions.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to-back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity.
- Two power infeeds are required to connect the back-to-back runs. Power A8719xx must be connector to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed
- Power infeeds A8719xx must be routed from a panel wherein no power harness is positioned, into an adjacent panel where a power harness is positioned and connected to the end of a power block.

Receptacles



Duplex Receptacle

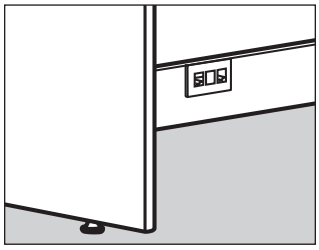
Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Designer White — PJW	Designer White — DW
Bungalow — P7C	Muslin — EU
Carob — P52	Black — E4
Champagne Metallic — PR5	Muslin — EU
Cinder — P7Q	Brownstone — EY
Fossil — P28	Flint — E9
Gunmetal Metallic — PR3	Brownstone — EY
Parchment — P93	Muslin — EU
Pebble — P8R	Loft — EV
Pewter — P8D	Flint — E9
Platinum Metallic — PR2	Loft — EV
Salt — P8C	Silver — ES
Titanium — P8T	Silver — ES

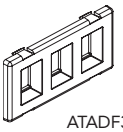
Duplex Receptacles (page 89)

- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses with blocks.
- Duplexes are available in multiple colors. See page 64 for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical infeed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical infeed.

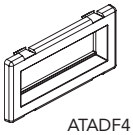
Data Components



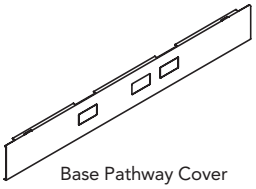
Voice/Data Receptacles



ATADF3



ATADF4



Base Pathway Cover

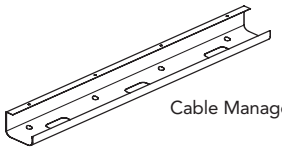
Data Faceplates (page 90)

- Optimize not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.
- Commercially available modular data faceplates can be mounted in vacant base receptacle openings.
- Due to panel depth, back-to-back data modules should not be used at the base on Optimize.

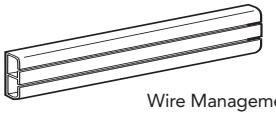
Optimize Base Pathway Covers (page 90)

- Features an additional knockout (offset) for improved utilization of power and data. Knockouts are 2.700"W x 1.377"H up to 60"W.
- Due to panel depth, back-to-back data modules should not be used in the base on Optimize.

Cable and Wire Management

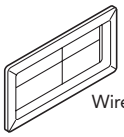


Cable Management Tray

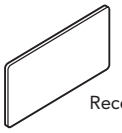


Wire Management Channel

Cord Retainer Clip



Wireway Grommet



Receptacle Cover

Cord Organizer

Cable Management Tray (page 90)
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 90)
- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

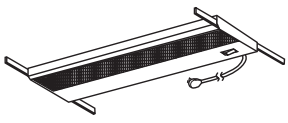
Cord Retainer Clip (page 90)
- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each task light cord.
- Package of 50. Available in Black only.

Wireway Grommet (page 90)
- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

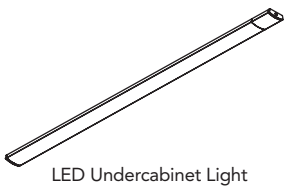
Replacement Receptacle Cover (page 90)
- Fits into unused receptacle opening in base raceway.
- Package of 25. Specify paint color.

Cord Organizer (page 90)
- Attaches to bottom of worksurface.
- 4"W x ⅞"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

Lighting



Task Lights

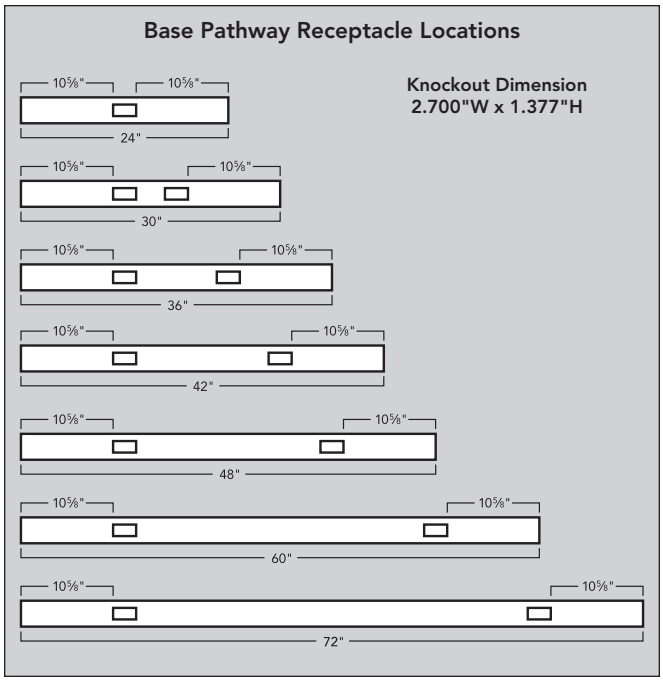


LED Undercabinet Light

Task Lights (page 314)
- Task lights can be recessed under storage cabinets or storage shelves, panel-hung, or freestanding.
- Three styles of recessed task lights in four sizes are available to correspond to cabinet or shelf width.
- All styles have 9' power cords in black, connected in the right rear corner.
- All models feature electronic ballast for longer bulb life and cooler operating temperature.
- Task lights with a fused plug to meet Chicago electrical code are also available.

Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

LED Undercabinet Light (page 314)
- LED undercabinet light can be mounted beneath overhead cabinets with wood screws or magnets.



Circuit Usage

Strategy 1

Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
  - Circuit 1 — Calculators, fans, etc.
  - Circuit 2 — Task lights (could be wired to wall switch)
  - Circuit 3 — CRT or flat screen monitors
  - Circuit 4 — CPUs

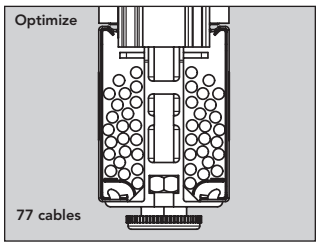
Strategy 2

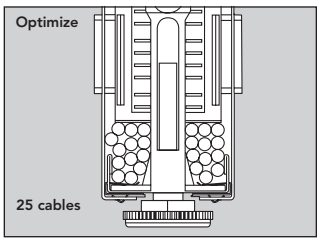
Circuits to Workstations

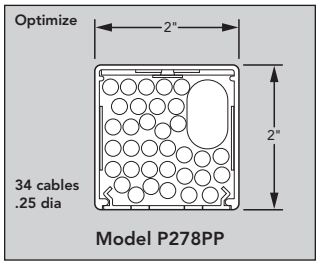
Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

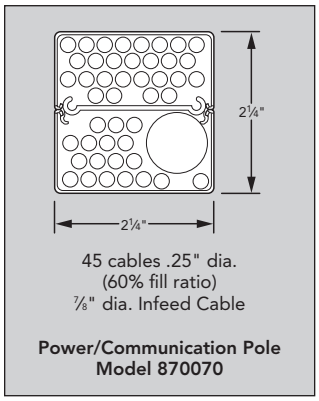
Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

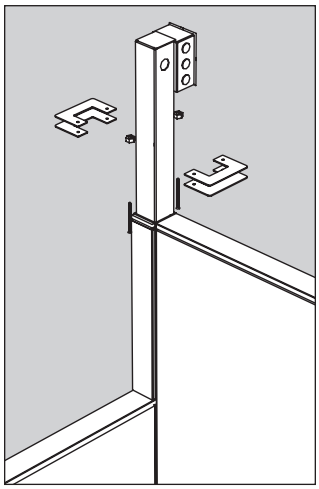
Lay-in Cable Capacity











- The base pathway allows continuous voice and data lines to run through and between panels without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Optimize base pathway accepts up to 77 voice/data cables (.25" dia.) (6.27 sq. in.) at 60% fill.
- When electrical system shares base pathway, the cable capacity in Optimize is reduced to 25 cables (2.03 sq. in.).
- Cable capacity of the Optimize integrated power pole is 3.3 sq. in. for a total capacity of 34 cables of .25" diameter.
- Cable capacity of the power pole/communication pole Model A870070 is 4.5 sq. in.
- Cables can enter/exit panel through underside of base pathway on frames.

Note: Cable quantities listed are at 60% fill ratio.

Office Equipment Typical Load Values

*Chart is recommended for planning purposes. Check device specifications for exact amperage. Consult with your electrician regarding the applicable configurations.

Examples of Component Usage based on the *Office Equipment Typical Load Values* Chart

Power Option 3+1
Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers
Utility Circuits 1, 2, 3: Height-adjustable tables and ancillary items

Power Option 2+2
Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers
Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

Power Option 3 (Circuit-separate neutrals)
Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

For specification information see pages 79-87.

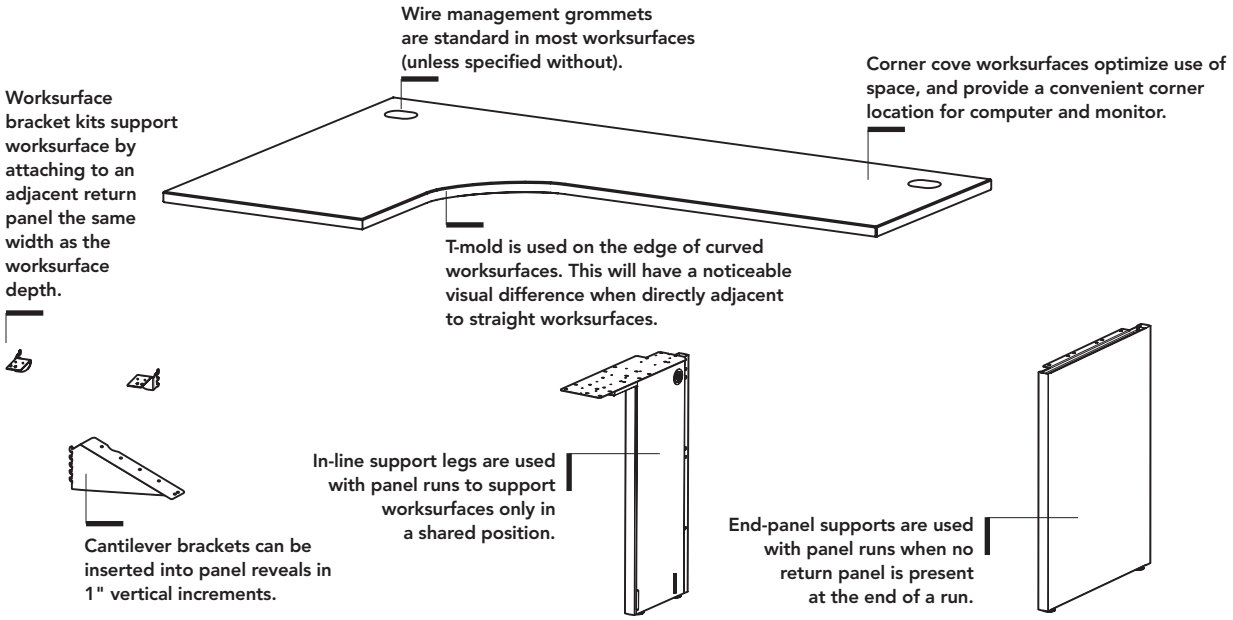
Grain direction on symmetrical corner worksurfaces runs at a diagonal.

Worksurfaces

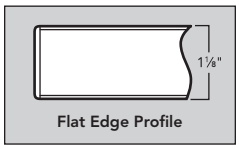
Reference Page

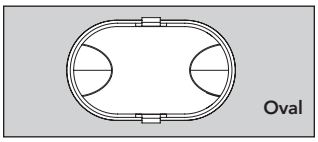
Worksurfaces are 1⅛" thick with particleboard core and with top surfaces finished in laminate. Bottom surfaces are covered with a backer sheet. Worksurfaces can be panel hung or used in freestanding applications. Modesty panels and appropriate supports are required to configure freestanding Cadence® desks.

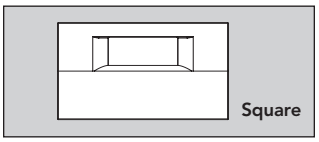


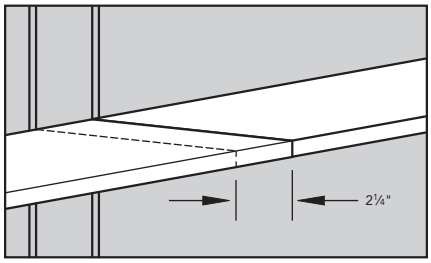
Worksurfaces

- **Laminate tops** offer flat edge trim in twenty standard colors (customer specified) to match solid or woodgrain laminates and to complement patterned laminates.
- **Optional wider width primary worksurfaces** are available for use with Optimize panel runs having a "T" or "S" connection — upcharge applies.









- **Wire management grommets** are standard in most worksurfaces (unless specified with no grommets) and specified in plastic or metal. Metal grommets are available in oval or square.
- Rectangular worksurfaces over 42"W have two grommets. Corner cove worksurfaces will have two grommets. Peninsula and corner worksurfaces have one. D-Shaped worksurfaces and countertops do not have grommets.
- Grommets on standard systems worksurfaces are located 6⁵⁄₁₆" from the side edges and 3⁵⁄₁₆" from the back edge.
- Add Suffix "N" to a model number for no grommets — no upcharge.

Supports

Worksurfaces can be configured at 29½"H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Support column*
- Flat brackets
- External support channel
- Worksurface bracket kits
- Height adjustable mechanisms
- Cantilever brackets
- In-line support legs*
- End-panel supports*
- Support storage units*
- Pedestal-to-panel attachment kit*
- Desk-to-panel attachment kit*
- Corner desk leg
- Bridge and return kits
- Modesty panels
- Gussets

*Units provide floor support.

Support Guidelines — See Drawings on page 93

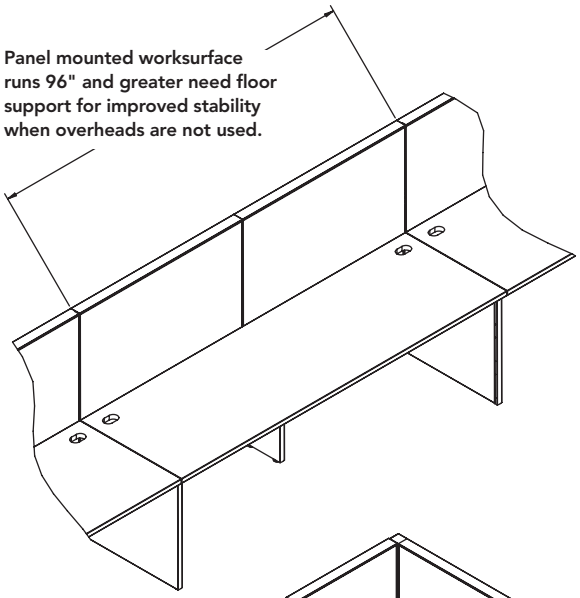
- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.

continued on next page

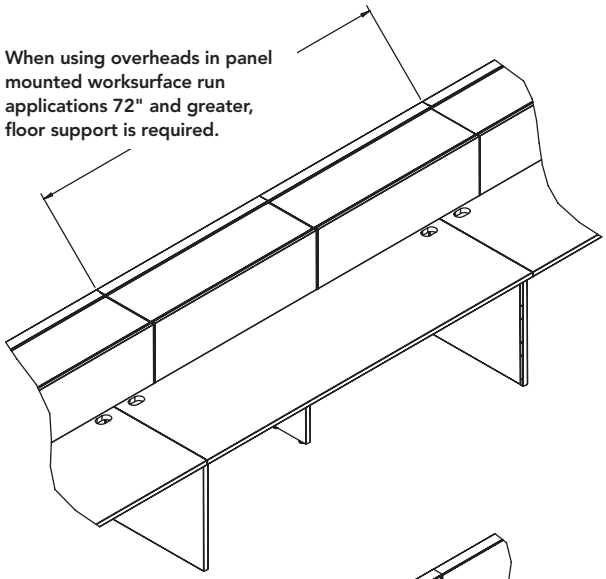
continued from previous page

- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Worksurface runs 60"W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 97 and 108.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72"W. See pages 98-106.

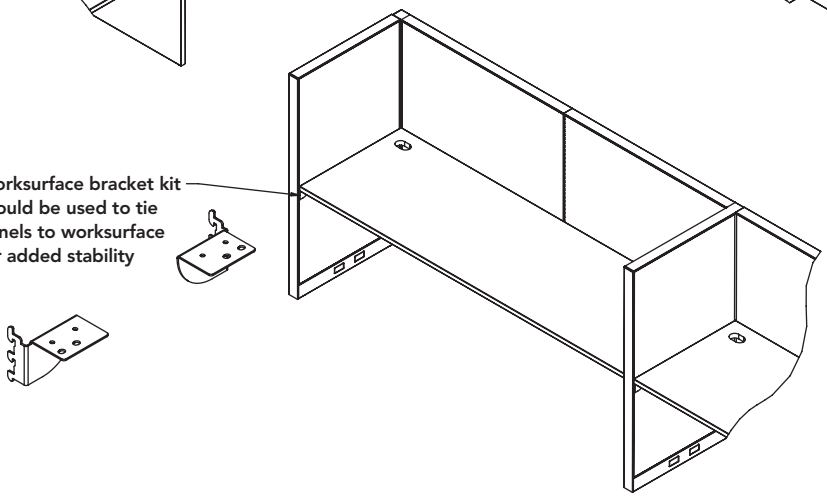
Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.

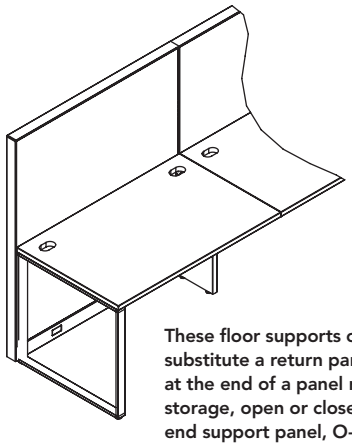


When using overheads in panel mounted worksurface run applications 72" and greater, floor support is required.

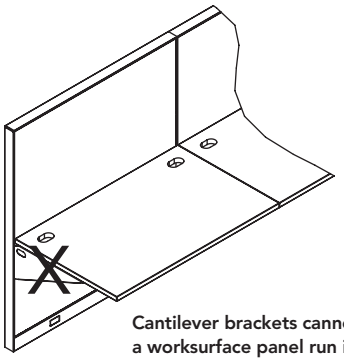


Worksurface bracket kit should be used to tie panels to worksurface for added stability



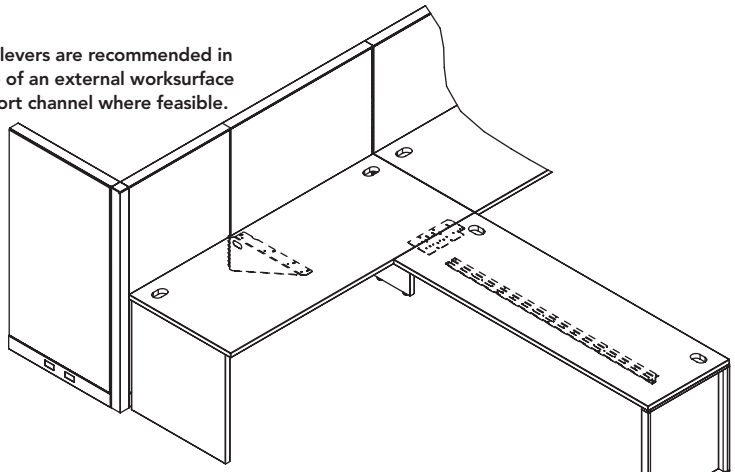


These floor supports can substitute a return panel at the end of a panel run: storage, open or closed end support panel, O-legs.



Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.

Cantilevers are recommended in place of an external worksurface support channel where feasible.



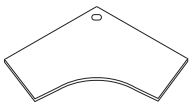
Worksurface runs 60"W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 97 and 108.

Worksurfaces with Flat Edge

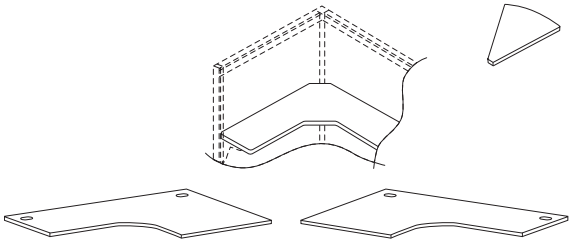
Primary Worksurfaces (page 107)
- Primary worksurfaces are available in 20", 24", and 30" depths up to 96"W. Worksurface spans greater than 72" require floor support.
- Nominal worksurface width is equal to nominal panel width.
- Wire management grommets standard, one for widths up to 42", two on widths 48"W and greater. Add "N" suffix for no grommets.
- Center support bracket included on 54"W-60"W. Other support hardware is ordered separately.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 20"D, and 24" cantilever on 24"D and 30"D worksurfaces.
- Width must correspond with panel width(s). For worksurface to span a "T" or extended straight connection add upcharge and suffix "TM" to model number.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence®, pages 98-106.
- The 9120 Program can be used to order HPL particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120"W x 36"D. See pages 114-115.

Bow-Front Worksurfaces (page 108)
- Two wire management grommets standard.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk. Refer to Cadence pages 98-106.

Corner Worksurfaces (page 109)
- One wire management grommet.
- Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces.
- Rear corner left-handed support bracket included. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.



120° Corner Worksurfaces (page 109)
- Standard with one wire management grommet in corner location.
- Rear support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

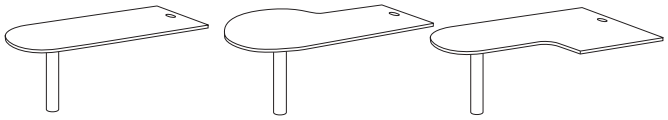


60° Pie Worksurface (page 109)
- Order support column and two flat brackets separately.

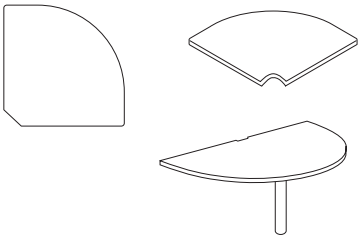
Corner Shelf (page 109)
- Diagonal leading edge = 10½"; diagonal depth = 22½".
- Includes panel attachment brackets.

Corner Cove Worksurfaces (page 110)
- Two wire management grommets standard.
- Rear corner support bracket included with all surfaces. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner. All other support hardware is ordered separately.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 98-106.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 24" cantilever on 24"D and 30"D worksurfaces.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Worksurfaces with Flat Edge

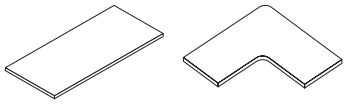


Peninsula, P-Shaped, and Jetty Worksurfaces (page 111)
- Wire management grommets standard.
- Support column ordered separately, column includes panel support brackets T6BK.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence® pages 98-106.



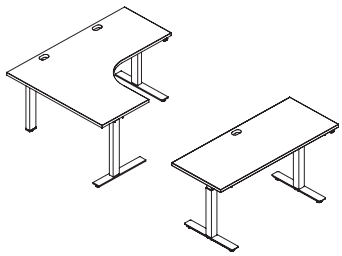
Quarter-Round Worksurfaces (page 112)
- Use to connect two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

D-Shaped Worksurfaces (page 112)
- Order support column and two 24"D in-line support legs separately.
- Not recommended for use with T6CB24L or T6CB24R for shared applications.
- Includes attachment bracket.

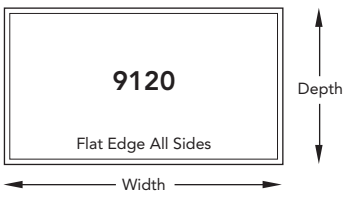


Countertops (page 113)
- Mounting brackets and attaching hardware ordered separately.
- Countertops are flush with panel top cap.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

Countertop Brackets (page 113)
- Countertop brackets must be ordered separately. Models P51500 and P51500-42 each contain one right-hand and one left-hand bracket.
- Specify paint color.
- Model P51500 brackets are for 35"H or 50"H panels. Model P51500-42 brackets are for 42½"H panels.
- Order two model P51500 or P51500-42 for straight countertops. Order three model P51500 or P51500-42 for corner countertops.

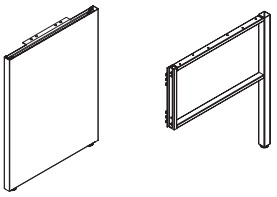


Height-Adjustable Worksurfaces
- For freestanding applications, see height-adjustable tables in the Seating, Collaboration, and Tables Price List.



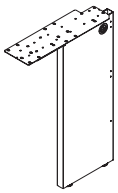
Non-Standard Worksurface Sizes (pages 114 and 115)
- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

Worksurface Supports



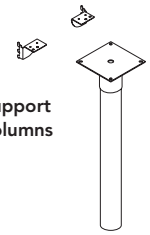
End-Panel, Closed End, and Open End Supports

End Supports and Bracket Kits (page 116)
- End-panels are 1⅝" thick. For use in place of panels at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end-panels.
- 11"D end-panel models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.
- Panel mounted end-panel supports are ordered for right- or left-handed application.
- Open end panel supports are non-handed and are only for panel mounted applications.
- End-panel models can be converted to freestanding with removal of panel mount bracket. End-panel bracket kit converts freestanding end-panel support model to panel mounted.



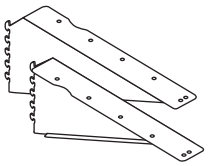
Support Legs

Support Legs and Bracket Kit (page 116)
- Support legs are 1⅝" thick. Leg portion is 12¾"D. Supports the junction of two worksurfaces.
- Non-handed for use at either end of worksurface.
- Provided with flat bracket.
- Worksurface in-line support legs are used to support worksurfaces only in a shared position. Worksurfaces require to the floor support every 72".
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Panel mounted models can be converted to freestanding with removal of panel mount bracket.
- Support leg bracket kit (non-handed) converts freestanding model to panel mounted.



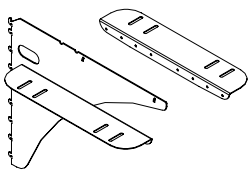
Support Columns

Support Columns (page 116)
- Used to support one end of curvilinear worksurfaces.
- D-shaped, P-shaped, peninsula, jetty, boomerang, and reef worksurfaces require support columns (ordered separately).
- Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.



Handed Cantilever Brackets

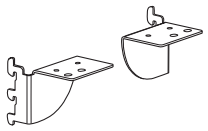
Cantilever Brackets — handed (page 116)
- Cantilever brackets are left or right handed. No assembly required.
- They can be inserted into panel reveals in 1" vertical increments.
- One size is used for both 24" and 30"D worksurfaces.
- 18"D cantilever are for use with 20"D worksurfaces and to support 24"D worksurfaces 66"-72"W that require a cantilever bracket for center support in panel mounted applications.
- 12"D cantilevers are only for use with 12"D secondary worksurfaces.
- Both left and right brackets are required in shared applications.
- Includes tie bracket and attachment hardware.
- Use with runs 72" or less — avoid installation on only one side of a straight connection except to support corner worksurfaces. Floor support is required for runs greater than 72". See page 93.
- Cantilevers can and should still be used in the middle of a worksurface run 72"W or less for proper support and to help prevent worksurface bowing. See page 93.
- DO NOT position at the end of a panel run.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended or peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.



Non-Handed Cantilever Brackets

Cantilever Bracket — non-handed (page 116)
- Assembly required. Includes attachment hardware.
- Includes two angle brackets for shared applications. Use two cantilever brackets when adjacent worksurfaces are positioned at different heights.
- One size is used for both 24" and 30"D worksurfaces.

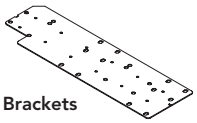
Worksurface Supports



Worksurface Brackets

Worksurface Bracket Kit — T6BK (page 116)
- Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.
- Kit includes one pair of brackets and attachment hardware.
- Freestanding pedestals can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

Worksurface Storage Bracket Kit — T6SB (page 116)
- Worksurface storage bracket kit (T6SB) is used for aesthetics where under-desk storage is immediately adjacent to the return panel. In all other applications use worksurface bracket kit (T6BK) to utilize worksurface threaded metal inserts.
- Black only.
- Kit includes one pair of brackets and attachment hardware.
- Brackets do not align with worksurface threaded metal inserts, and therefore require wood screws (included).

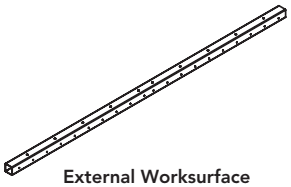


Flat Brackets

Flat Brackets (page 116)
- Includes bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Pedestal-to-Panel Brackets

Pedestal-to-Panel Attachment Bracket (page 116)
- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Works with Essentials™ and Involve® pedestals.



External Worksurface Support Channel

External Worksurface Support Channel (page 108)
- Is required on a systems worksurface for additional support for spans 60"W or greater. Width of worksurface span can be reduced by using support storage.
- Extends 1½" below the worksurface. Installs 7" from user's edge.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports. May require spacer kit AKMH.

Freestanding Desks
- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See Cadence® pages 98-106.

Cadence® Freestanding

Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.

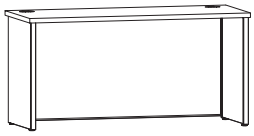
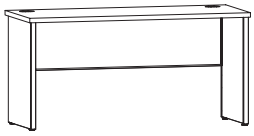
Configurations



Full Modesty



Half Modesty

Gussets

All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Optimize, Terrace®, and Concensys®, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel storage solutions and Extensions™ — work tools to provide personalized organization for every workstyle.

Systems integration — Cadence works in combination with Optimize, Terrace, or Concensys panels, extending the functionality of each product line.

Highly adaptable — Make the most of building architecture by using an existing wall to create a semi-private workspace.

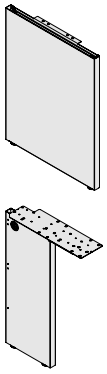
Space utilization — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

Team interaction — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

The Cadence choice

It works in the open plan, the private office, or in combination with Optimize, Terrace, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

Configurations



End Panels (E) and Support Legs (L)

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

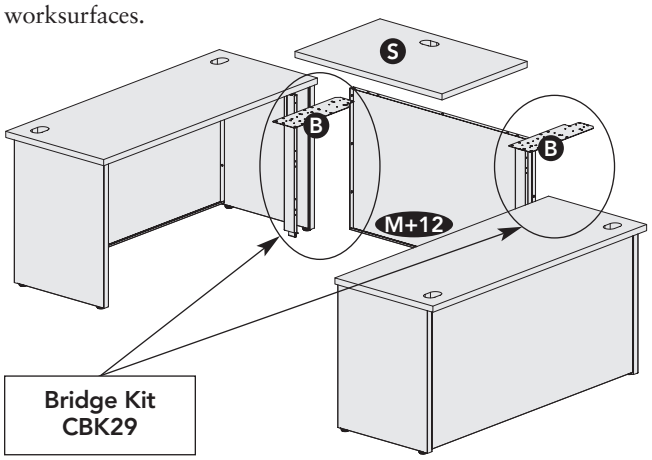
The 11"D end panel is used to freestand peninsulas, curvilinear shapes, and D-tops in panel applications.

Corner Desk Legs (C)

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits (B)

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.



There are some bridge instances where only half of a bridge kit is needed (e.g. using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

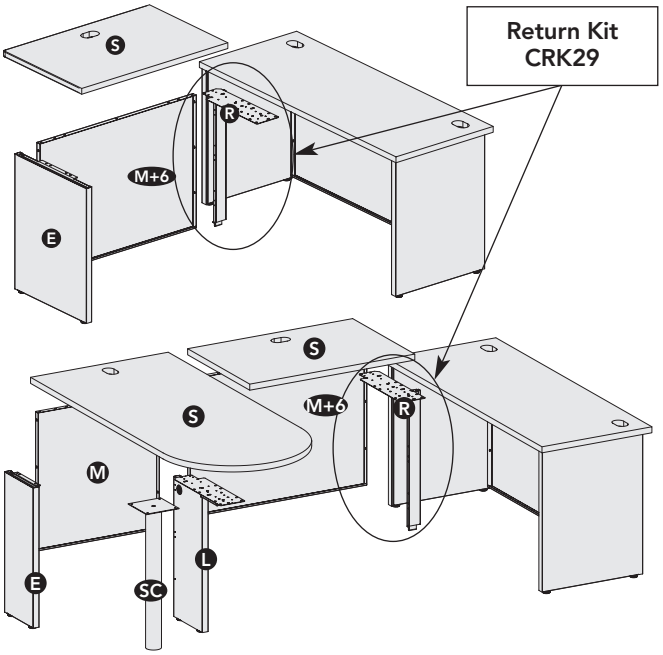
Surface (S)

Support Column (SC)

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

Return Kits (R)

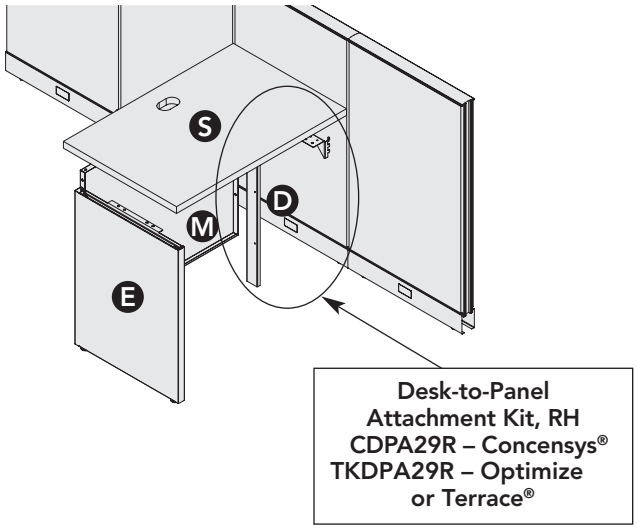
Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.



Desk-to-Panel Attachment Kits (D)

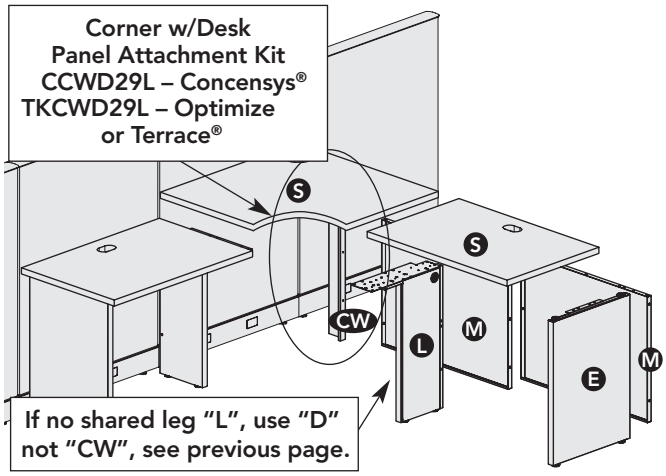
Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right hand unit attaches to right side of modesty).



Corner w/Desk Panel Attachment Kit CW

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

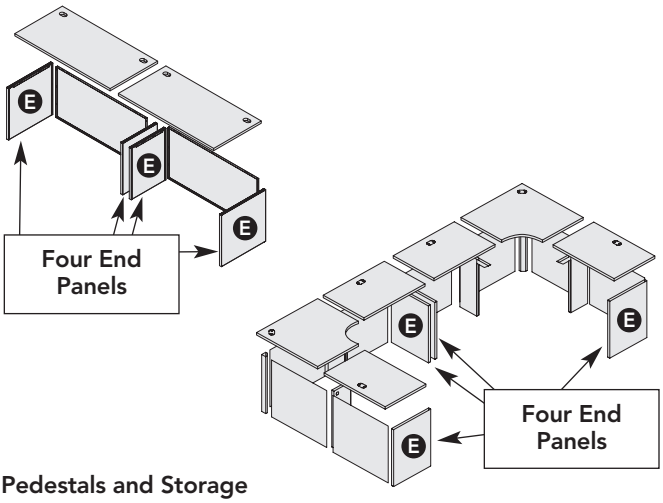


Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24"D full end panels may be used at the in-line junction on 30"D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.



Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 18"D or 20"D peds should be used with 24"D worksurfaces. 18", 20"D, or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional pull style and storage options under 24"D worksurfaces.

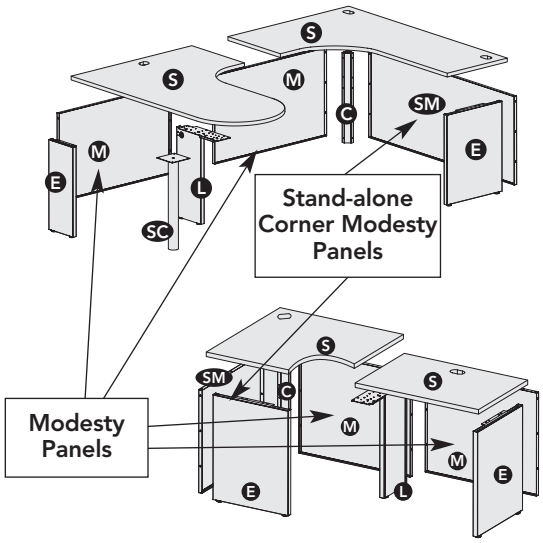
Modesty Panels M

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels SM

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.



Gussets G

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

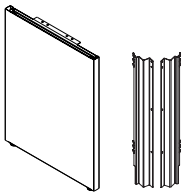
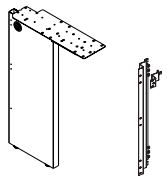
Cadence Supports



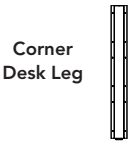
End-Panel Supports

End-Panel Supports (page 117)
- End panels are 1⅝" thick. For use at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Freestanding models can be converted to Optimize panel-mount with end panel bracket kit.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.



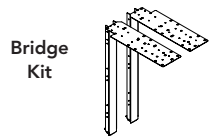
Support Leg

Support Legs (page 117)
- Support legs are non-handed. Supports the junction of two worksurfaces.
- Leg portion is 12¾"D and is 1⅝" thick.
- Flat bracket included.
- Levelers provide 2¾" vertical adjustment.
- Freestanding models can be converted to Optimize panel-mount with support leg bracket (non-handed).
- Must be connected into panel slots for panel hung applications.



Corner Desk Leg

Corner Desk Leg (page 117)
- Attaches two modesty panels at rear of corner desk.
- Leveler provides 2¾" vertical adjustment.
- See examples on pages 100 and 103.

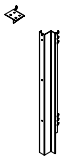


Bridge Kit

Bridge Kit (page 117)
- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.
- See examples on pages 99 and 103.

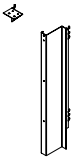
Return Kit

Return Kit (page 117)
- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat brackets and one modesty panel-to-end-panel bracket.
- See examples on pages 99 and 101.



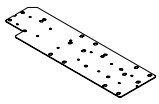
Desk-to-Panel Attachment Kit

Desk-to-Panel Attachment Kit (page 117)
- Used to connect a worksurface and modesty panel perpendicularly to a Optimize Panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit.
- "Hand" of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).



Corner w/Desk Attachment Kit

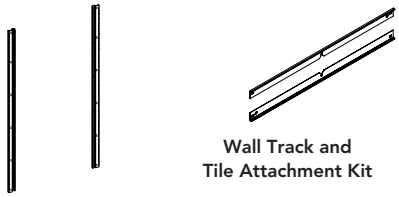
Corner w/Desk Panel Attachment Kit for Optimize (page 117)
- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Optimize panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- "Hand" of unit is determined from the user's side of the desk.



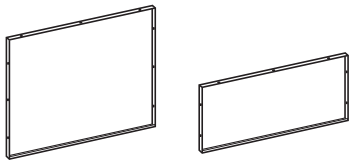
Flat Bracket

Flat Brackets (page 117)
- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Cadence Supports



Wall Track and Tile Attachment Kit



Full and Half High Modesty Panels

Freestanding Pedestals

- Can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

Freestanding Desks

- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See pages 98-104.

Pedestal Compatibility with Cadence and Panel-hung Worksurfaces

Cadence Desking	24" Deep	30" Deep
18"D Ped	Yes	Yes
19⅞"D Ped	Yes*	Yes
23⅜"D Ped		Yes
29⅜"D Ped

Optimize Wall Track/Tile Attachment Kits (page 117)

- Allows for mounting of system panel components on permanent wall structures.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Terrace® wall track tile attachment kit to install tiles onto Optimize wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- When using Optimize wall track and using Terrace tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

Modesty Panel (page 118)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel, and corner w/desk panel attachment kits.
- 29½"H units provide ¾" of space between bottom of modesty panel and floor.
- Actual width of 29½"H modesty panel is 3¾" less than the nominal dimension listed in the Systems Price List.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Refer to pages 98-104 to select proper width.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels or gussets can be used with corner or corner cove worksurfaces.

Stand-alone Corner Modesty Panel (page 118)

- 29½"H units provide ¾" of spacing between bottom of panel and floor.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Actual width of modesty panel is 6³⁄₁₆" less than the nominal dimension listed in the Systems Price List.
- Modesty panels are inset 2⅞"; when adding pedestals, consult chart below.

Pedestal-to-Pedestal Modesty Panels (page 118)

- Widths available to work with 60"W, 66"W, and 72"W worksurfaces to create freestanding double pedestal desk using two medal support pedestals.

Gussets (page 118)

- Provides easy access to wall outlets.
- Cannot be used with suspended pedestals.
- Gussets can be used on corner and corner cove worksurfaces.

Universal Modesty Panel (page 118)

- Mounts under peninsula, P-shape, jetty, and boomerang worksurfaces. Refer to chart below to select proper width.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8½" of privacy and is non-handed.
- Constructed of steel. No upcharge for Select paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1½" thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

For specification information see pages 91-106.
For non-standard worksurface sizes see pages 114-115.

ORDERING

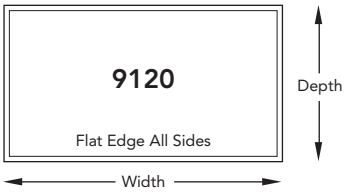
The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ⅛" increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number**
   Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)
   See grommet specification instructions on this page.
3. **Grommet Type:**
   P Plastic
   M Metal (add $11 per grommet for laminate)
4. **Grommet Color:**
   (Metal only)
   EL Matte Silver
   NOTE: Plastic grommet will match flat edge.
5. **Laminate Choices**
   See page 64.
6. **Flat Edge Color Choices**
   See EDGE COLORS page 64 for laminates.
7. **Exact Size**
   Specify the **EXACT Width** and **EXACT Depth** you require. Width and depth is specified in ⅛" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

⅛"	= 1	⅝"	= 5
¼"	= 2	¾"	= 6
⅜"	= 3	⅞"	= 7
½"	= 4	no extra increment	= 0

For example, when ordering a worksurface that is 34⅜"W x 20½"D, specification should be 345Wx204D.
Example: **9120R3624.G0.TM33.EU.345Wx204D**.



PRODUCT SPECIFICATIONS

- Flat Edge on all sides
- 45 lb. particle board
- 1⅛" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

Note: 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

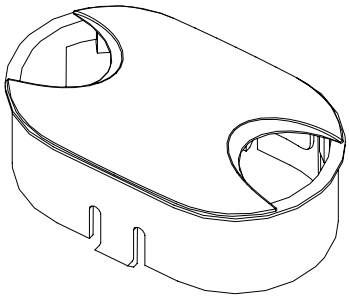
When spanning multiple freestanding storage units with one worksurface, add ⅛" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + ⅛" + ⅛" = 90¼" worksurface. Do NOT follow this rule if panel wrapping storage units.

CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program Worksurfaces.

GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate.



PRICING

One Grommet – GC, GL, or GR Position $17.00
Two Grommets – G3 or G4 Position..... $34.00
NOTE: Add $11 per grommet for Metal grommets with laminate.

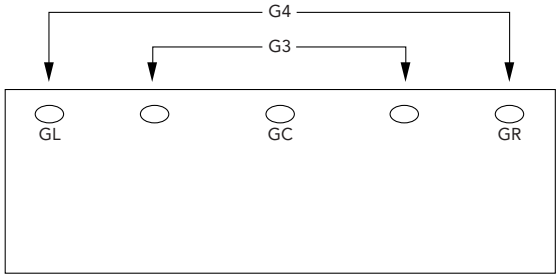
ORDERING

Specify grommet location and color.
Example: **9120R10836.GCP.TM33.EU.1022Wx326D**

Code Grommet Position

- GC Centered side-to-side – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- GL 6⁵⁄₁₆" from left side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- GR 6⁵⁄₁₆" from right side to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- G3 Pair of grommets each 18" from side edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center (Position G3 not available on tops 60"W or less.)
- G4 Pair of grommets each 6⁵⁄₁₆" from side edge to grommet edge – 3⅛" from rear to grommet edge; 4½" from rear to grommet center
- G0 No grommets

Dimensions are from grommet center line to top edge.



Rectangular Top

Grommet positions other than those shown above are considered non-standard.

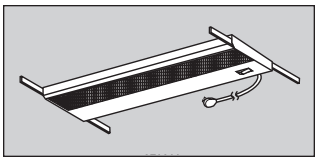
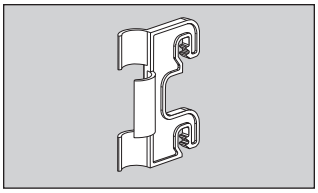
Height	4⅝" RTA models 5⅝"

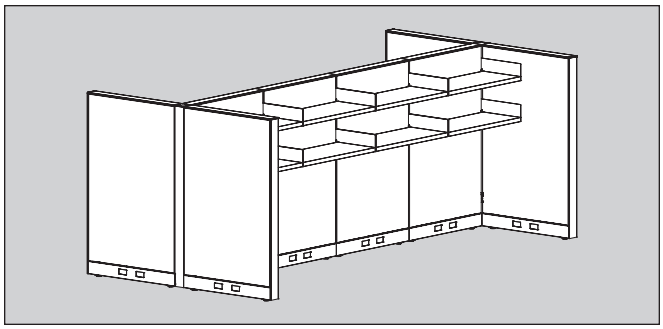


- **Task lights** can be mounted beneath storage shelves and overhead storage cabinets.
- Additional panel hung and freestanding lighting options are available.



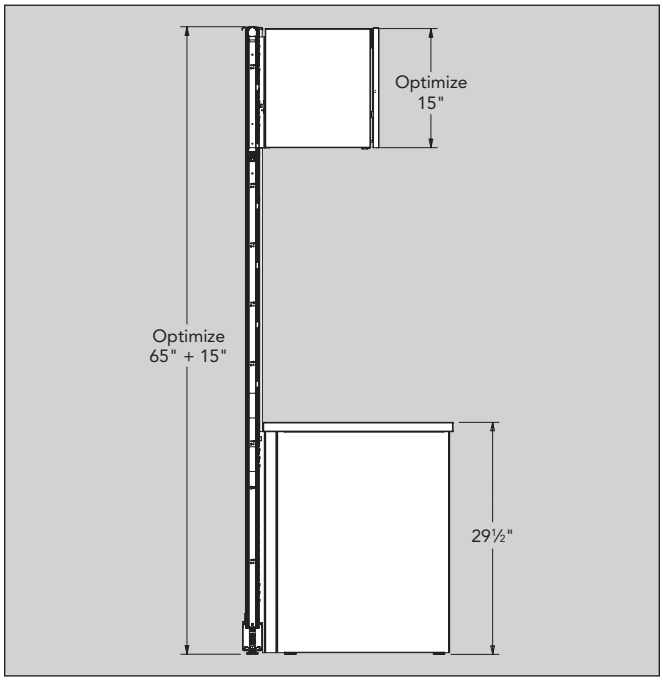
- **Cord retainer clips** fasten into panel slots to anchor power cords.
- Available in black only.
- Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.

Reference Page



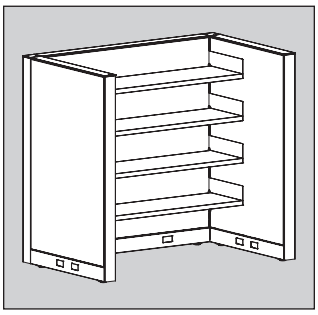
Specification Guidelines

- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Overhead storage cabinets and open storage shelves can be mounted on Optimize structural and stacking panels to a maximum height of 80"H.
- Base panel frames with stacking frames that have an overall height of 57½" will not accept overhead storage cabinets if spanning between stacker and base panel.
- Immediate adjacent panels must be equal height to panels with overhead storage cabinets on them.

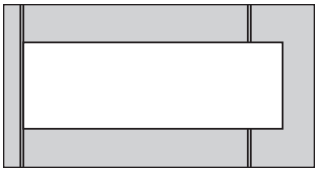


When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

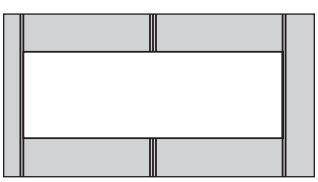
- Stacking panels can be added to any base panel up to 80"H.
- Stacking frames should be added to all the parent run panels, and to each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.



- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

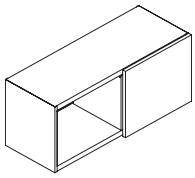


- **Assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets.
- One side of overhead must be held on-module.

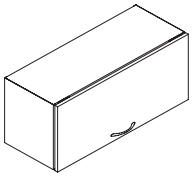


- **RTA overhead, RTA shelf, and receding door** width must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.

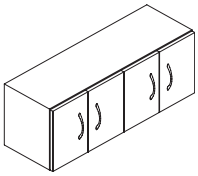
Overheads, Shelves, and Hutches



Sliding Door Overhead



Flipper Door Overhead



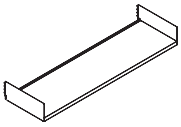
Hinged Door Overhead

Assembled Overhead Storage Cabinet (page 123)

- Steel cabinet with backstop.
- Available with sliding, hinged, or flipper door(s).
- Easy-Assist flipper door optional — requires minimal assistance in opening and closing.
- Easy-Assist flipper door not available on 60"W or 72"W cabinets — specify 2–30"W cabinets or 2–36"W cabinets.
- Self-engaging safety latch to secure cabinet to panel.
- Width can correspond with width of panel, or two panels joined with an in-line connector kit.
- Arch or square pull optional on flipper doors.
- 60"W and 72"W flipper door cabinets have two doors with two independent locks.
- 24"-36"W hinged door cabinets have 1 lock and 2 optional pulls, 42"-48"W have 2 locks and 4 optional pulls.
- Accommodates recessed task lighting (specified separately).
- For locking specifications, see pages 322-324.
- Cabinets are 14¼"D x 15"H.
- 15"H cabinets can also be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets.
- Sliding doors have a built-in pull.
- Sliding, Hinged, and Flipper Door Overhead Weight Limits:

24"W.....59 lbs.	42"W.....105 lbs.
30"W.....74 lbs.	48"W.....121 lbs.
36"W.....90 lbs.	60"W.....152 lbs.

- Mounting an overhead on frames that have an overall height of 57½"H is not recommended. Slot modularity in relation to adjacent panels may be compromised.



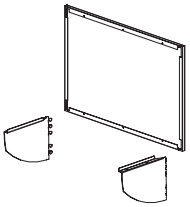
Open Shelf

Assembled Open Shelf (page 123)

- Metal shelf with back stop.
- Locking clips (2) standard.
- Will accommodate recessed task lighting (ordered separately).
- Weight Limits:

24"W.....61 lbs.	42"W.....108 lbs.
30"W.....77 lbs.	48"W.....124 lbs.
36"W.....93 lbs.	60"W.....155 lbs.

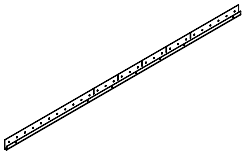
- Mounting an open shelf on Optimize frames cannot span base panel frame and stack-on frame — slot modularity is not maintained.



Upmount Kit for Overhead Cabinets

Upmount Kits for Assembled Overhead Cabinets (page 123)

- Consists of two upmount brackets, full back panel, and required installation hardware.
- Allows mounting of an assembled overhead cabinet up to 15" above height of panel.
- Specify "Z2" prefix model number upmount kits with 15"H, 35"H, 50"H, or 65"H Optimize panels; and "Z4" prefix model number upmount kits with 42½"H Optimize panels.
- Brackets require a clearance of 6½"below bottom of overhead cabinet.
- Width must correspond with width of panel frame or 2 panel frames joined directly in-line.
- Full back panel adds ½" to depth of overhead case.
- Full back panel only used when upmounting cabinet.
- Cannot be used with RTA models.

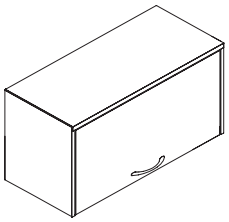


Horizontal Wall Track

Horizontal Wall Track (page 123)

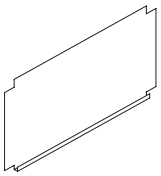
- Allows mounting assembled overhead cabinets on permanent wall structures ONLY. Attachment hardware not included.
- Cannot be used with RTA models.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- For use with 15"H sliding door overhead, field modification is necessary.
- Available in black only.

Overheads, Shelves, and Hutches

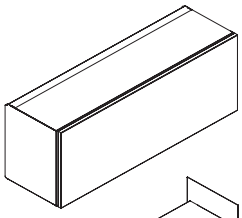


Assembled Receding Door Overhead Storage Cabinet (page 124)
- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or square pull optional.
- 60"W cabinet has 2 – 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 322-324.
- Cabinets are 13¼"D x 15"H. When door is recessed, interior dimensions are 12⅛"D x 11⅝"H.
- Weight Limits:

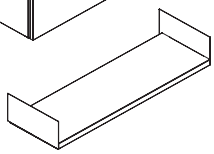
30"W ..... 70 lbs.	48"W ..... 110 lbs.
36"W ..... 85 lbs.	60"W ..... 138 lbs.
42"W ..... 100 lbs.	



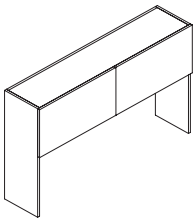
Receding Door Overhead Back (page 124)
- Optional for use with receding door overhead.
- Order width to match overhead cabinet.



Ready to Assemble (RTA) Flipper Door Overhead (page 124)
- Steel cabinet with open back.
- 60"W and 72"W cabinets have 2 doors with independent locks.
- Accommodates recessed task lighting — ordered separately.
- Random keying, for locking specifications see pages 322-324.
- Cabinets are 12"D x 15"H. Interior dimensions 11⅛"D x 12¾"H.

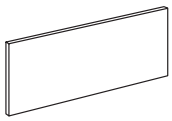


Ready to Assemble (RTA) Shelf (page 124)
- Metal shelf with locking clips.
- Accommodates recessed task lighting — ordered separately.



Stack-On Hutch

Stack-on Hutch (page 125)
- Have flipper doors with square horizontal edges.
- Universal model can be converted to an open hutch.
- Doors are standard with a core removable lock (60"W, 66"W and 72"W have two doors and two locks.)
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Hutches have clearance of 19¾" for computers, etc.
- Depth dimensions shown includes thickness of door.
- Universal model inside depth dimension is 12¾".
- Stack-on hutches accommodate recessed task lighting.
- For locking specification see pages 322-324.
- Chicago task light cords cannot be routed through the hutch end panels, due to the large size of the fused plugs.



Tackboards for Hutches

Tackboards (page 125)
- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 72"W tackboards are available in railroad cut only.

Metal Overheads

For specification information see pages 119-122.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- Camira, memos@camirafabrics.com 1.616.288.0655
- CF Stinson, cfstinson.com 1.800.841.6279
- HBF Textiles, hbftextiles.com 1.877.494.5727
- Maharam, maharam.com 1.800.645.3943
- Ultrafabrics, ultrafabricsllc.com

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

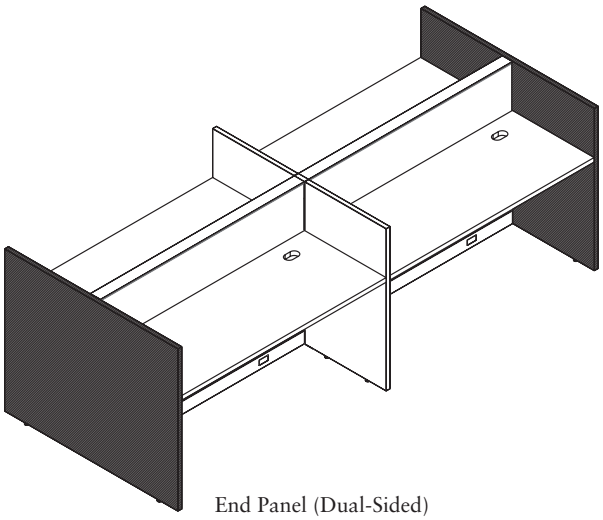
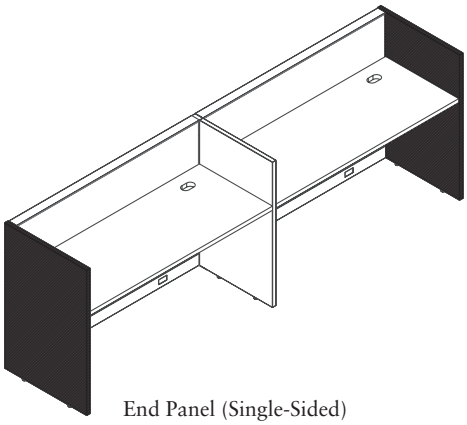
Gallery Panels

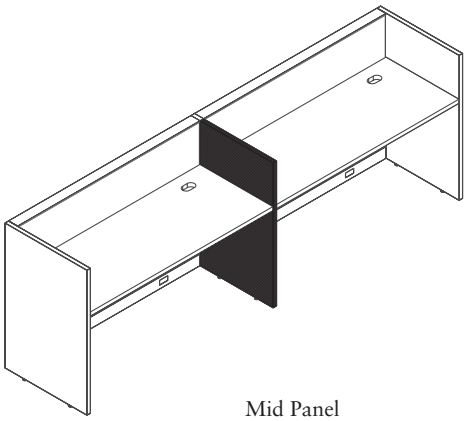
Gallery Panels are ideal for bringing natural wood elements to workstations and providing privacy. Allsteel Gallery Panels are designed to work universally across 5 product platforms. Please follow the product guidelines for proper specification.



End Panel (Dual-Sided)



End Panel (Single-Sided)



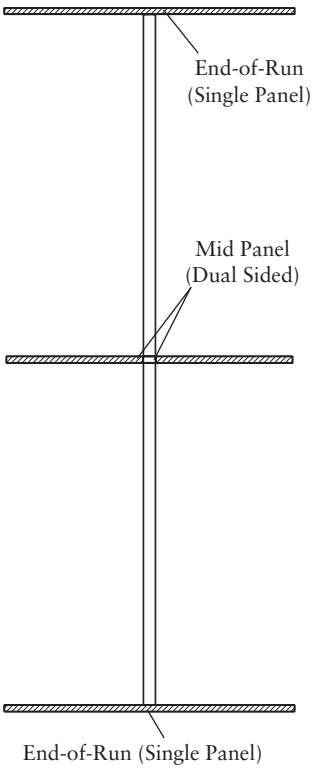
Mid Panel

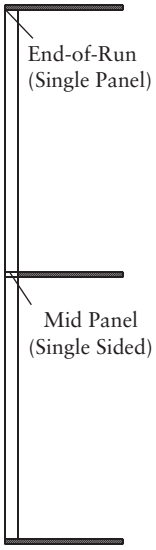
Gallery Panels

- Available to connect to Frame & Tile, Monolithic, Benching systems, and other Gallery Panels
- Standard Gallery Panels connect to Benching, Frame & Tile, and Monolithic systems, and Gallery-to-Gallery panels connect to other Gallery Panels
- Gallery Panels can be used in freestanding applications. See page 140 for specification requirements.

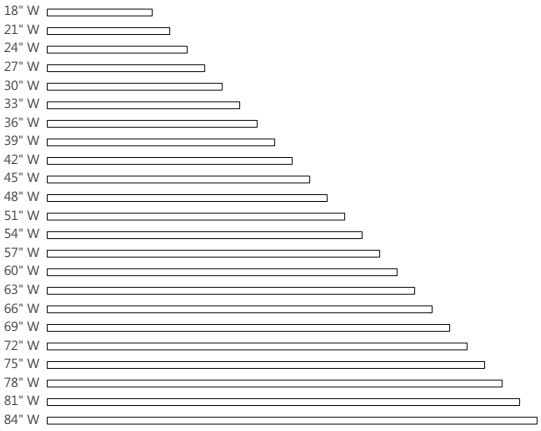
Standard Gallery Panels

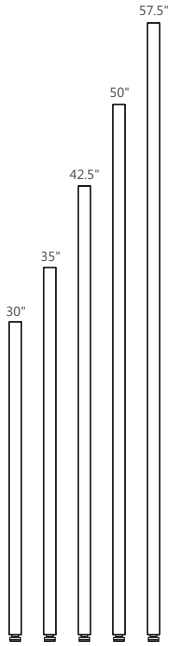
- Standard Gallery panels connect to Benching, Frame & Tile, and Monolithic systems and are available as End-of-Run Single and Mid Panels (panel systems only)
- Made of 1⅛" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 60"W. Horizontal grain is available on all sizes.
- Single Panel widths are available in 3" increments from 18"W to 84"W.
- Standard Gallery Panel sizes up to 84"W come as a single piece.
- Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Standard Gallery panel widths are true to size
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- All configurations are non-handed.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in gallery panel width (i.e. storage or worksurface tie-in)





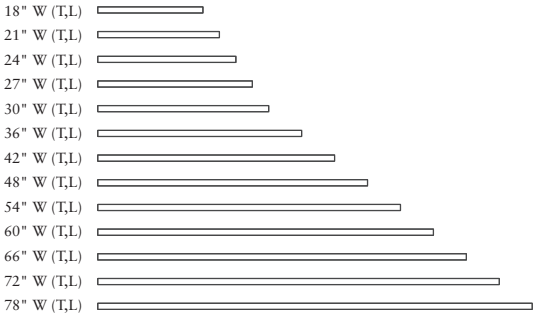
Standard Gallery Panel Widths





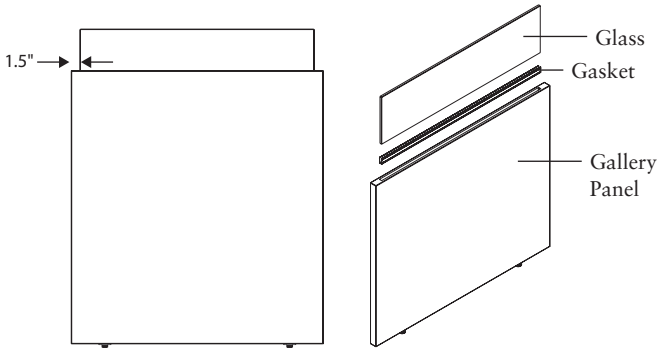
Gallery Panel Heights

Gallery-to-Gallery Panel L/T Widths



Standard Gallery Panels

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset 1½" from each end of the panel.
- Single-piece Gallery Panels for use with integrated glass require glass 3" shorter than the panel width.
- Glass is available in 3 colors: Clear, Frosted, Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H.
- Glass is available on all Gallery Panel widths.
- Specify glass models separate from Gallery Panel models.
- Glass Panels at 30"W and under are not UL listed.



Standard Single Panel with Glass

Find the Gallery Glass width appropriate for your Gallery Panel width.

Shaded example: For the 18"W Gallery Panel, Gallery Glass should be ordered with width of 15".

Gallery Panel Width \ Gallery Glass Height	7.5"H, 13"H, 15"H

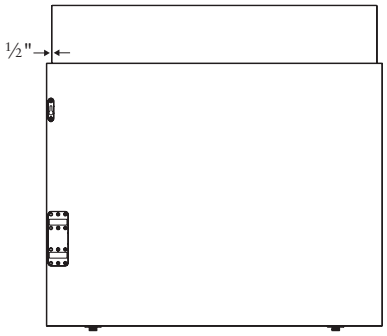
Gallery-to-Gallery Panels

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset ½" from each end of the panel.
- Gallery-to-Gallery Panels for use with integrated glass require glass equal to the panel width.
- Glass is available in 3 colors: Clear, Frosted, Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H
- Glass is available on all Gallery Panel widths. Glass panels at 30"W and under are not UL listed.
- Specify glass models separate from Gallery Panel models



Gallery-to-Gallery Panel with Glass

Find the Gallery Glass width appropriate for your Gallery Panel width.

Gallery Panel Width \ Gallery Glass Height	7.5"H, 13"H, 15"H
	Gallery Glass Order Width
18"W Gallery Panel	18"W
21"W Gallery Panel	21"W

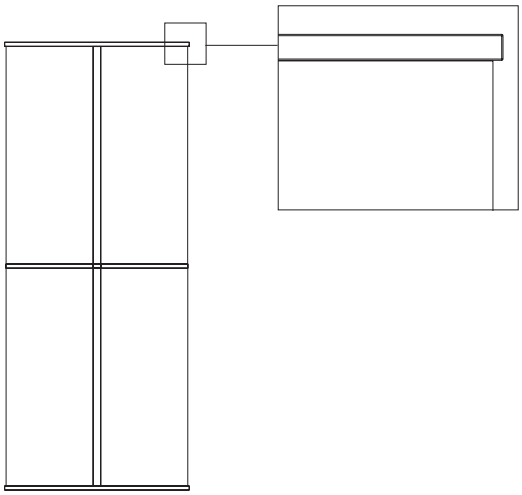
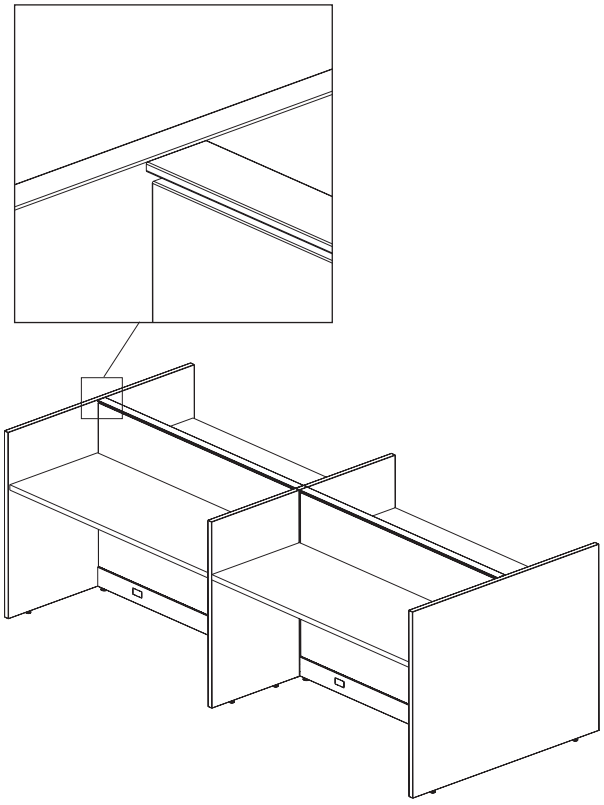
Optimize™ System - End Panel (Dual-Sided)

- Provides privacy to one or both ends of the system in a dual sided application.
- Single piece End Panels can be used for off-modular planning. Connector kit location must be field measured.
- End Gallery Panels cannot be shorter than spine panel.
- Optimize Gallery End Panels without integrated glass connect using P3CONGE connector kit.
- Optimize Gallery End Panels with integrated glass that match the height of the spine panel connect using P3CONGEG connector kit. (P3CONGEG only for use with dual-sided end panels with glass.)
- Must follow Optimize panel stability rules.

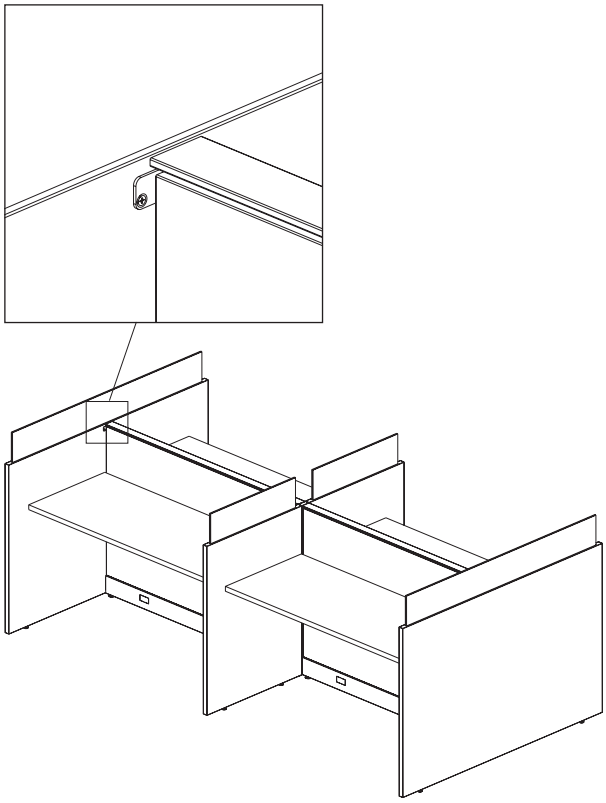
Front edge of Gallery Panel will sit ½" proud of front edge of worksurface on Optimize.



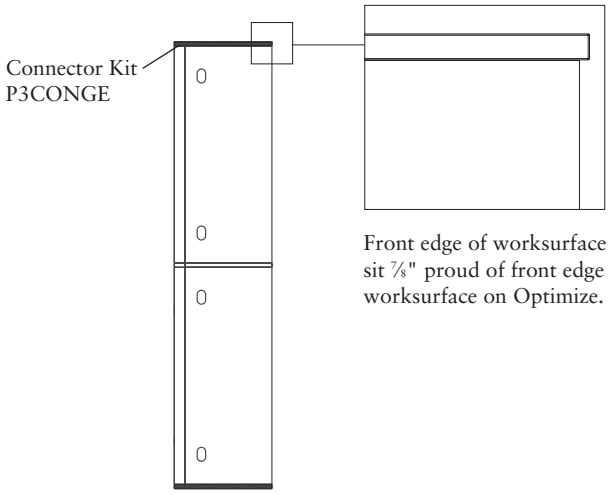
Detail of P3CONGE
Invisible connection on standard panels

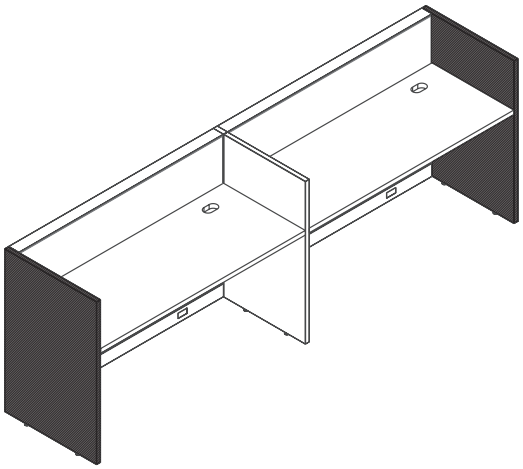


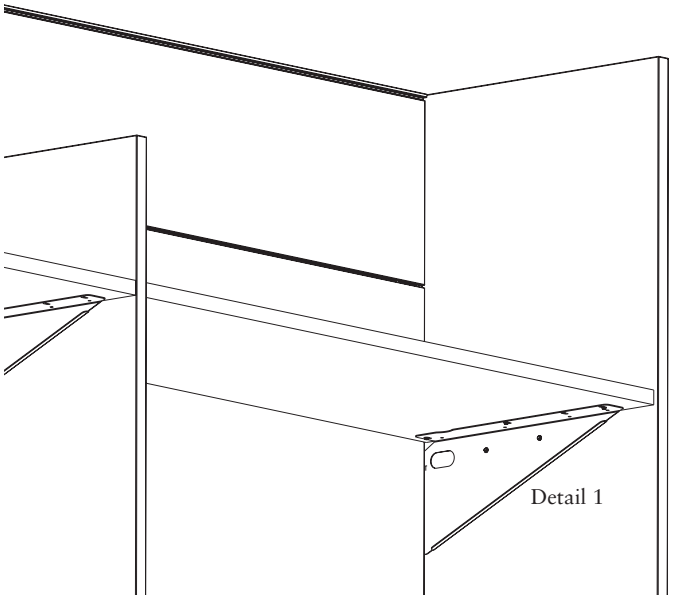
Detail of P3CONGEG
Visual of end connector on panels with integrated glass



- Provides privacy to one or both ends of the system in a single sided application.
- Single-Sided End Panels cap over the System panel. Accommodate for 2⅛" frame thickness when planning with Optimize panel system.
- All Optimize End Panels (Single-Sided) require connector kit P3CONGE to attach to parent run.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Due to thickness of the Optimize panel Single-Sided End Panel overhangs by approximately ⅞" in front of a worksurface.
- End Gallery Panels cannot be shorter than spine panel.
- Optimize Gallery Single-Sided End Panels both with and without integrated glass connect using P3CONGE connector kit.
- When using stackers on the spine, use stacker bracket provided with connector kit OR fixed worksurfaces with cantilevers must be tied to the Gallery Panels. (See detail 1 below.)

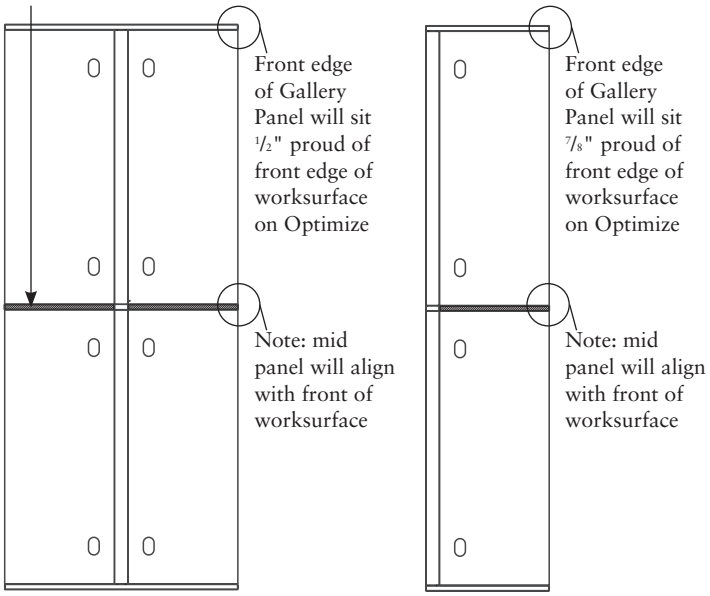






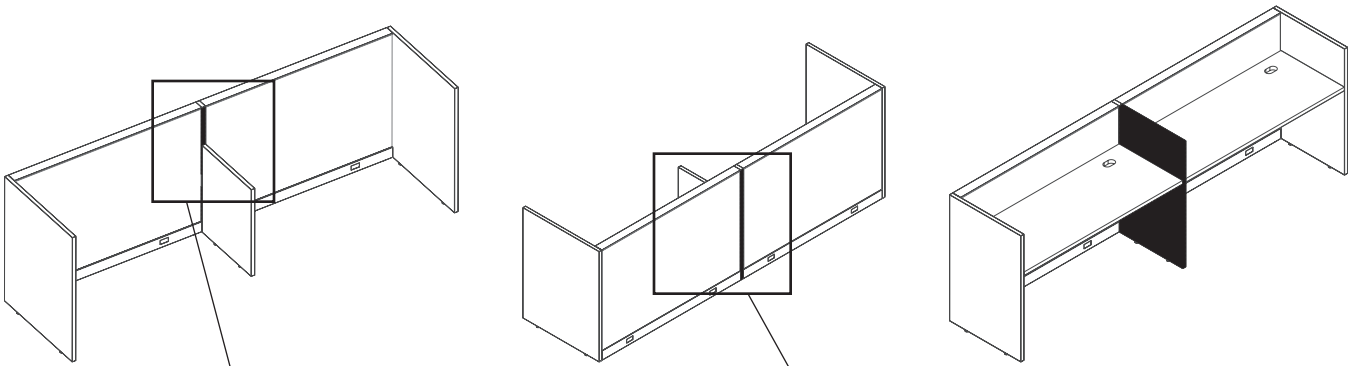
Gallery Panels

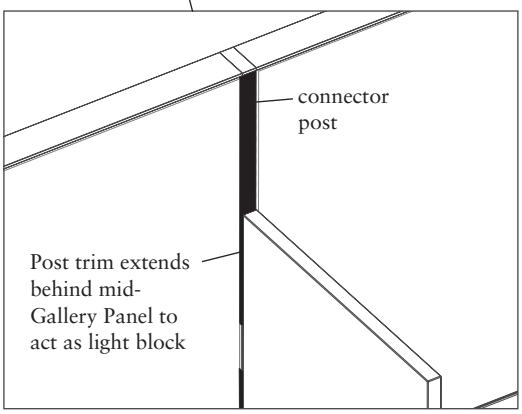
- Mid panels do not overlap parent system panel.
- When specifying single-sided Mid panels, one gallery panel single-sided mid connector kit is required to space the System panels out 1⅛". Kits include: Connector post, connector strap, bracketry and a top cap.
- When specifying dual-sided Mid panels, one gallery panel dual-sided mid connector kit is required to space the System panels out 1⅛". Kits include: Connector post, connector strap, bracketry and a top cap.
- Connector models must match the height of the parent run.
- Specify one mid-connector kit per "t" or "x" connection.
- When using a Mid panel, both panel frames in spine must be of equal height.
- Mid Panels may not vary in height of parent run by more than 15".
- Trims can be painted to match the System panel trims.
- Mid Panels are available in 18"-84" widths in 3" increments.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Spanning top cap available through Allsteel Tailored Solution Group.

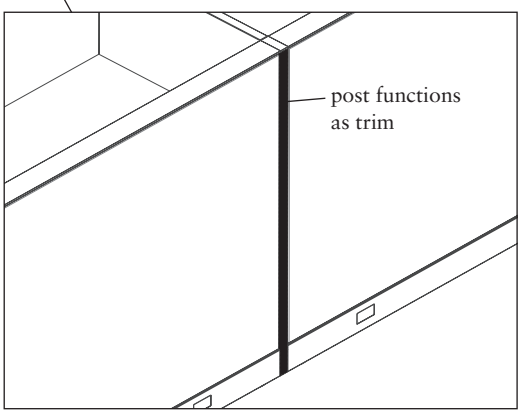


Dual-sided

Single-sided

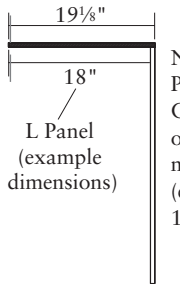




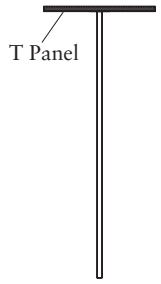


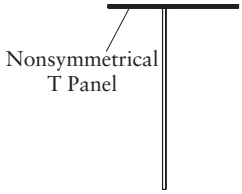
Gallery-to-Gallery Panels

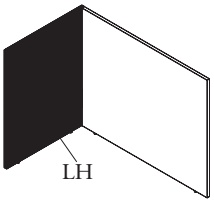
- Gallery-to-Gallery panels connect to other gallery panels and are available in L-, T-, and Nonsymmetrical T- configurations.
- When specifying Gallery-to-Gallery panels, the installation template (GTEMP) is required. The recommendation is 1 template for every 30 panels. Templates are reusable.
- Gallery-to-Gallery panels cap over Standard Gallery panels and are oversized by 1⅛" to maintain true interior dimensions
- Gallery-to-Gallery panels must be of equal or lower height than the Standard Gallery panel attached. The Gallery-to-Gallery panel cannot be taller than the adjacent panel. If this is required, please reach out to TPG for a custom solution.
- Made of 1⅛" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 54"W. Horizontal grain is available on all sizes.
- Gallery-to-Gallery panel widths are available in 3" increments from 18"W to 30"W and in 6" increments from 30"W to 78"W
- Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery panels are secured with an inset flat bracket under a painted metal cover.
- L- and Nonsymmetrical T- panels are handed.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in gallery panel width (i.e. storage or worksurface tie-in)
- Nonsymmetrical T Panels are specified in the format GTyyxxzz. Substitute yy as panel height, xx as LH nominal length, and zz as RH nominal length

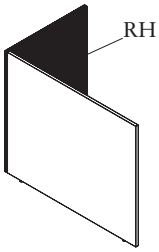


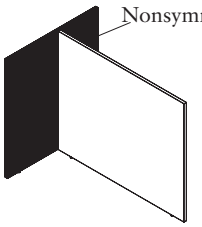
Note: Gallery-to-Gallery Panels cap over standard Gallery Panels and are oversized by 1⅛" to maintain modular interior dimensions. (ex: 18" panel is actually 19⅛"W)

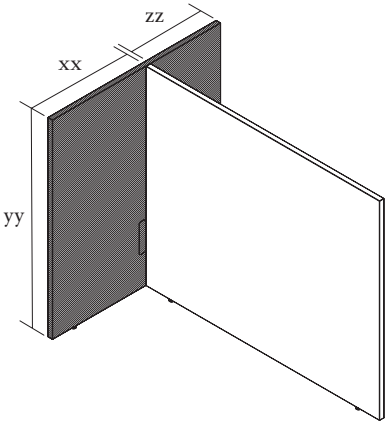










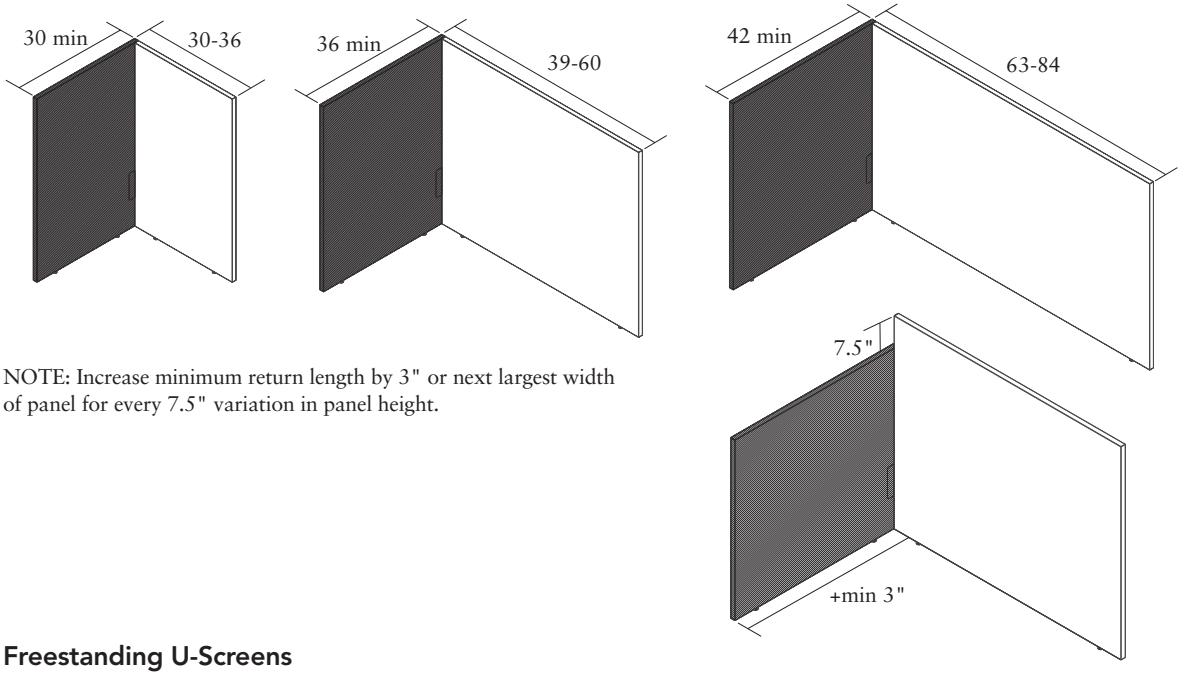


Gallery Panels

Freestanding Screens can be specified using Standard Gallery panels and Gallery-to-Gallery (depicted by the shaded panels in the illustrations below). Overall height, including glass, cannot exceed 72.5". Gallery Panel sizes 63"W or greater require storage or worksurface tie-in.

Freestanding L-Screens

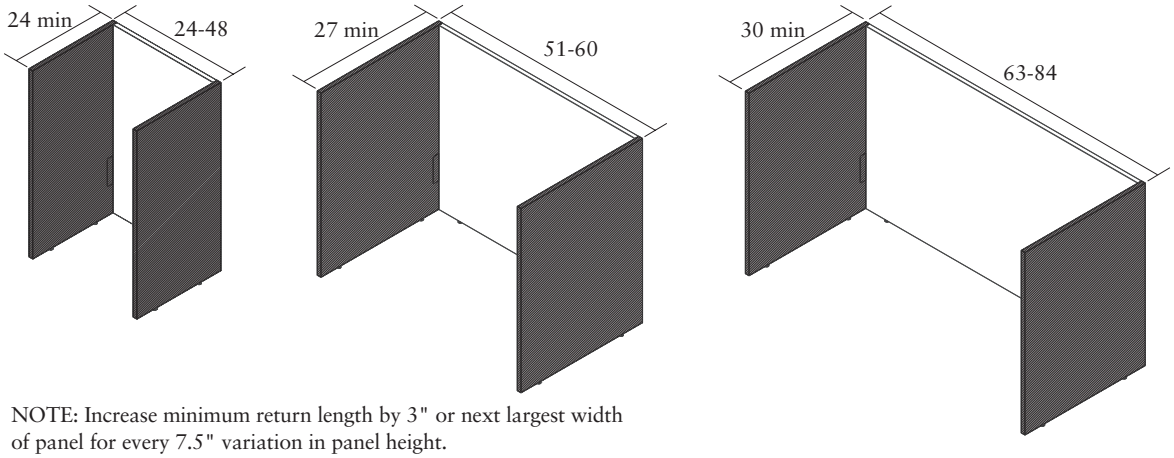
Parent	Minimum Return
18-24	Not Valid
30-36	30
39-60	36
63-84	42



NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

Freestanding U-Screens

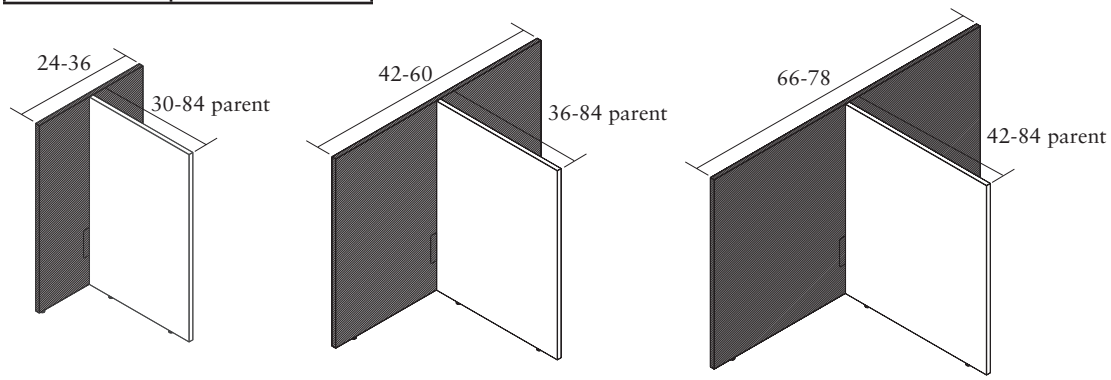
Parent	Minimum Return
18-21	Not Valid
24-48	24
51-60	27
63-84	30



NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

Freestanding T-Screens

T-Return	Minimum Parent
18-21	Not Valid
24-36	30-84
42-60	36-84
66-78	42-84

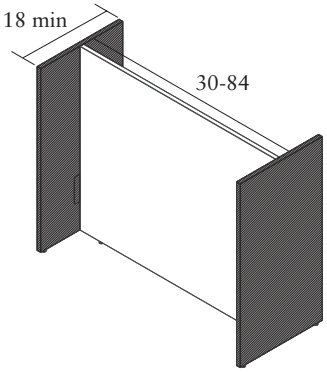


NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

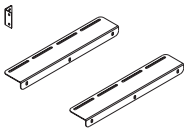
Freestanding H-Screens

Parent	Minimum H-Return
30-84	18

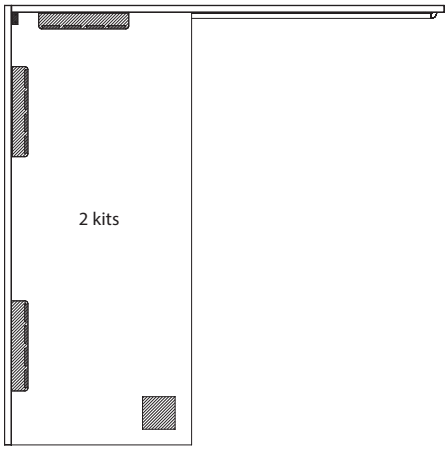
NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

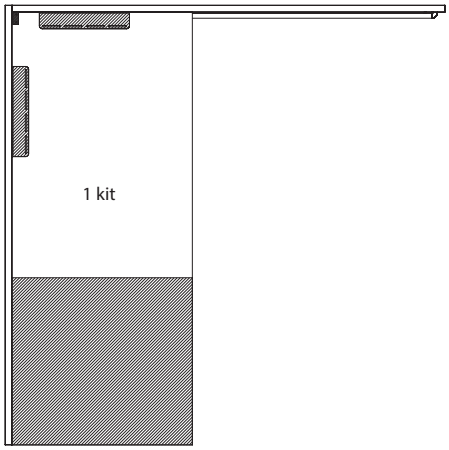


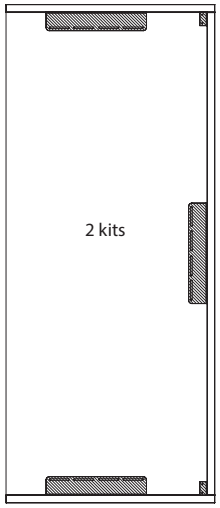
Reference Page

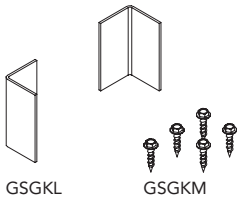


Worksurface Mounting Bracket (page 171)
- Used to mount a fixed-height worksurface to a Gallery panel.
- Can be painted any Allsteel Standard Paint color.
- A worksurface stiffener is required for surfaces 60"W or greater.
- One bracket kit (GWSBK) is required for each worksurface end attached to Gallery Panels.
- One bracket kit (GWSBK) includes two large L- brackets and one small corner L- bracket.

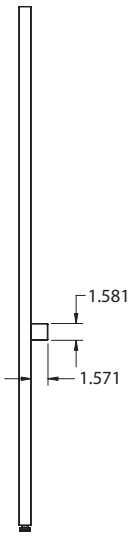






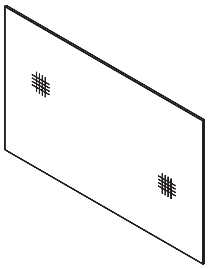


Storage Ganging Kits (page 167)
- The laminate storage ganging kit (GSGKL) is used to connect a Gallery Panel to a laminate storage unit.
- The metal storage ganging kit (GSGKM) is used to connect a Gallery Panel to a metal storage unit.



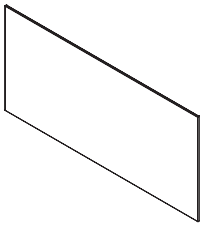
Gallery Panel Stiffeners (page 167)
- Required for single-piece panels 75"W and greater that are used in a wing or single-sided end condition and do not have a horizontally-mounted credenza.
- For panels 75"W and 78"W, order model (GSTFN7578). Stiffener width is 72".
- For panels 81"W and 84"W, order model (GSTFN8184). Stiffener width is 78".
- Attaches directly to one side of the Gallery Panel with a painted metal cover, attachment hardware included.
- Placement on panel face must be at least 18" above the floor but is not restricted to a specific location on the panel.
- Stiffener is 1½" x 1½".
- Available in any Allsteel standard paint color

Reference Page



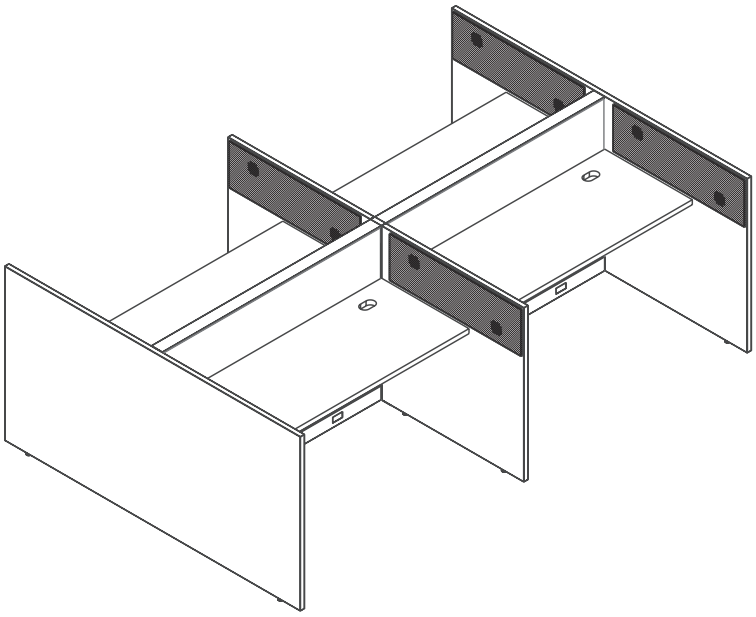
Tackboards *(Coming soon!)* (page 172)

- Provides tackable surface.
- Comes with steel-painted trim.
- Available in the following heights: 15", 22½"
- Available in the following *widths: 24", 30", 36", 42", 48", 54", 60".
  *Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Gallery Panel. Mounting hardware included. Will deface the panel.



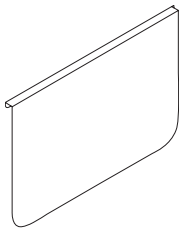
Magnet or Marker Boards *(Coming soon!)* (page 172)

- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Available in the following heights: 15", 22½"
- Available in the following *widths: 24", 30", 36", 42", 48", 54", 60".
  *Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Gallery Panel. Mounting hardware included. Will deface the panel.



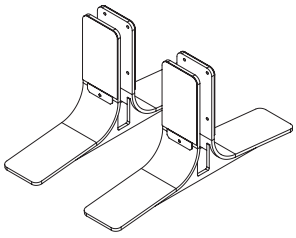
Tackboard Accessory on Mid and End Gallery Panels

Reference Page



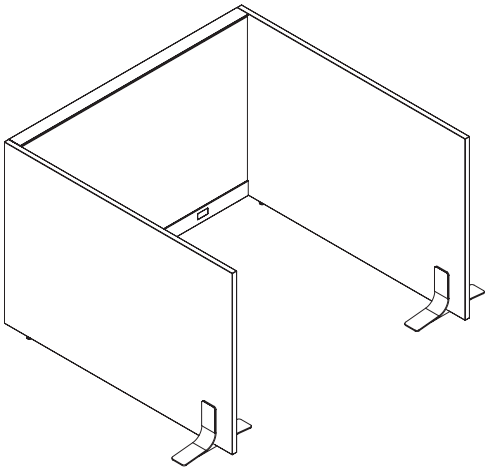
Hanging Magnet or Marker Boards *(Coming soon!)* (page 172)

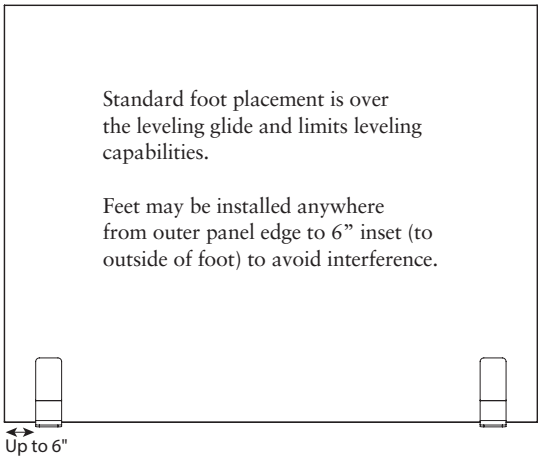
- Hangs over Gallery panel or sits on top of worksurface.
- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Cannot be installed back-to-back when hanging in the same location.
- Available in 30"W and in two heights: 20"H and 26"H.

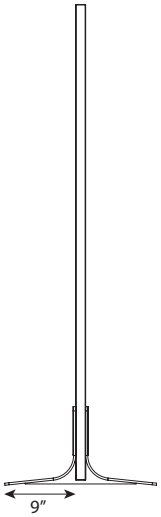


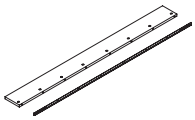
Gallery Panel Foot *(Coming soon!)* (page 172)

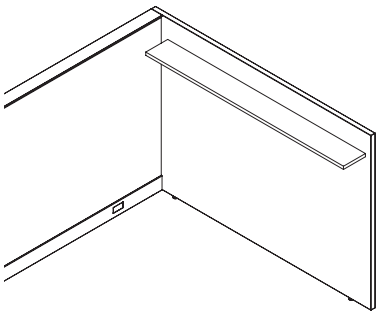
- Single foot provides rigidity to large wing panel.
- Using two feet on a single Gallery Panel allows for a freestanding application on panels greater than 24"W.
- Available in any textured Allsteel paint.
- Foot extends 9" from either side of the panel.







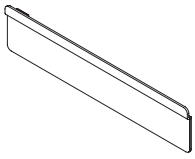




Floating Laminate Shelves *(Coming soon!)* (page 173)

- 6" depth.
- ¾" thickness.
- Constructed of HPL laminate with 0.8mm ABS edgebanding.
- Available in solid or horizontal woodgrain laminate.
- Available with contrasting or matching edge.
- Widths available every 6" from 12" to 78"W.
- Widths from 54" to 78" satisfy a stiffener requirement and are meant to be mounted to a panel that is 6" wider than the shelf. (e.g., 84"W panel would accept a 78"W stiffener shelf.)
- Shelves narrower than 54"W do not act as a stiffener.
- Weight capacity is 10lbs per linear foot.

Reference Page

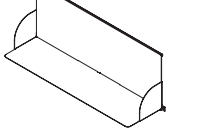


GACRL12

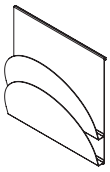
Accessory Rail and Paper Management *(Coming Soon!)* (page 173)

- Accessory Rail provides mounting for paper management accessories, listed below.
- Rail is 2.6"H and is available in the following widths: 12", 18", 24", 30", 36".
- Rails can be installed in any location on the Gallery Panel, as long as the rail does not extend beyond the top of the panel, and can be placed in-line to span panel length.
- Rail and accessories can be painted any standard Allsteel paint color.
- Mounts directly to the Gallery panel, attachment hardware included.
- Extensions accessories are NOT compatible with the accessory rail.
- These accessories are compatible with panel system tool tiles and rails.
- Includes a rail cover to hide hardware and provide magnetic surface.
- Compatible Rail Accessories:
  - Coat Hook (Rail-based, a mounted version is also available to attach directly to the panel)
    - Rail Based dimensions: 4"x 3"x 1¾"
    - Mounted dimensions: 4"x 3" x 1½"
    - Weight limit: 25 lbs
  - Angle File (Triple, Dual, and Single heights)
    - Depth of 2"
    - Heights: Triple = 15⅓", Dual = 12⅓", Single = 9⅓"
  - Paper Tray (Triple, Dual, and Single heights)
    - Depth of 10"
    - Heights: Triple = 9⅓", Dual = 6⅓", Single = 3⅓"
  - Personal Shelf
    - 9⅓" x 24" x 10⅗"
    - Weight limit: 25 lbs
  - Binder Shelf
    - 12⅓" x 12" x 11⅓"
    - Weight limit: 25lbs

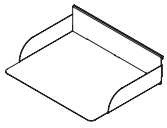
NOTE: When accessory tools are attached to freestanding Gallery Panel screens, excess weight may affect overall panel stability.



GCHRB

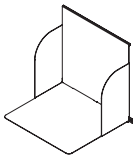


G2AGF



G1PTR

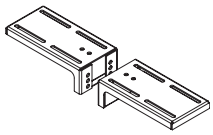
GWPSF



GBRSF

Wall Start *(Coming soon!)* (page 171)

- Wall Starts are 1⅛" by 1⅛" rectangular mounting posts that are meant to affix a Gallery Panel to a permanent building wall.
- Wall starts add 1⅛" to panel run.
- Attachment hardware not included.
- Must be specified at the same height as the connecting panel.

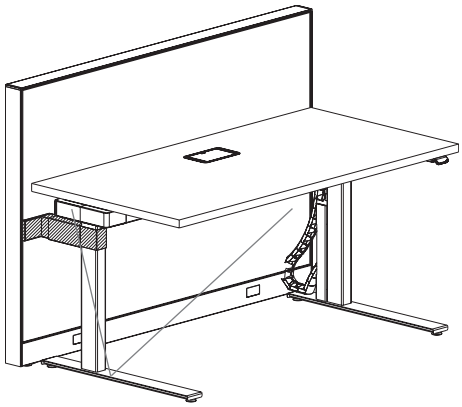


Countertop Brackets *(Coming soon!)* (page 171)

- Includes attachment hardware.
- Countertops are flush with the top of the panel and can be flush with the ends of the panel or shorter than the panel width.
- For straight countertops, two countertop brackets must be ordered.
- For corner countertops, three countertop brackets must be ordered.
- Will deface the Gallery Panel.
- May be used in conjunction with Stride, Terrace, or Optimize panels. When transitioning from a Panel spine to a Gallery Panel wing with a corner countertop, use countertop model of the panel system.

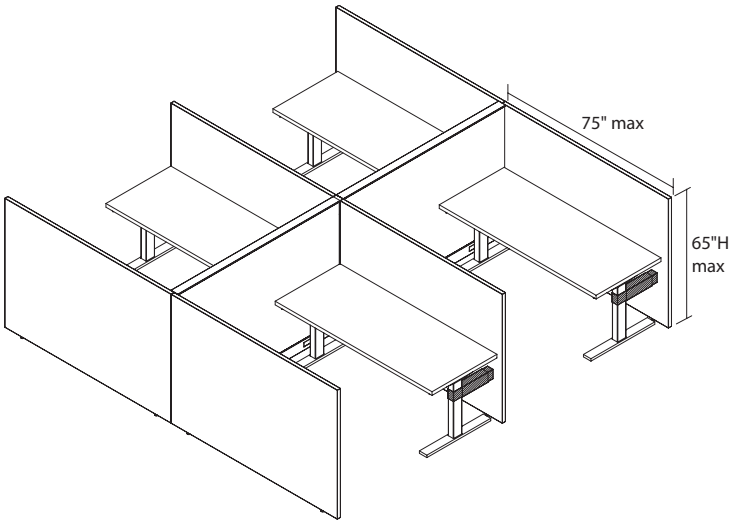
Height Adjustable Table Tie-In Brackets (Gallery Panels)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T leg HAT
- AGBKC to be specified for connection to a C leg HAT
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine.

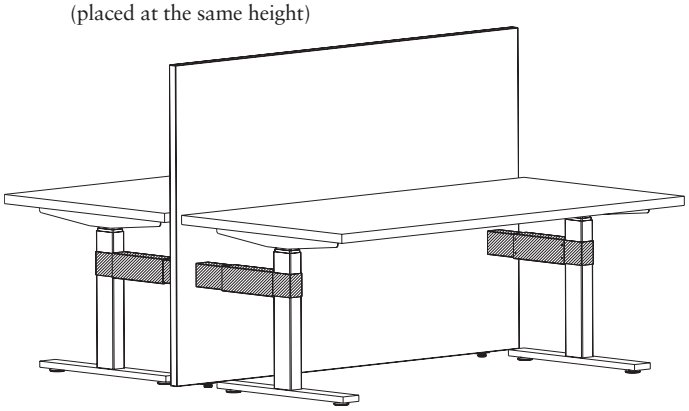


Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

SINGLE BRACKET
Gallery Panel Application:
Max Height (with Glass): 65"H
Max Width: 75"W; No top size restrictions



DUAL SIDED PANEL BENCH
Gallery Panel Application:
Max Height (with Glass): 65"H
Bracket Needed: Single Panel (75" max) with Brackets on each leg (placed at the same height)



Freestanding Gallery Panel Application

NOTE: For Essentials full finish offering please see Storage Price List.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

Concensys®

Reference Page

Strong, fast, and friendly. Concensys is simple, durable systems furniture that can be delivered in days instead of weeks.

Overview

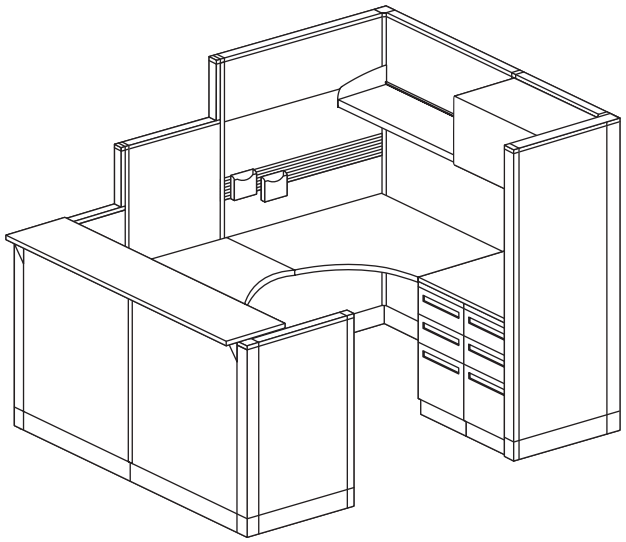
Concensys delivers exceptional quality at an attractive price. Its durable construction, ease of specification and installation, and quick ship delivery options make it the best in its class. Concensys features thin profile panels, multiple options for finishes and fabrics, and thoughtful, functional details.

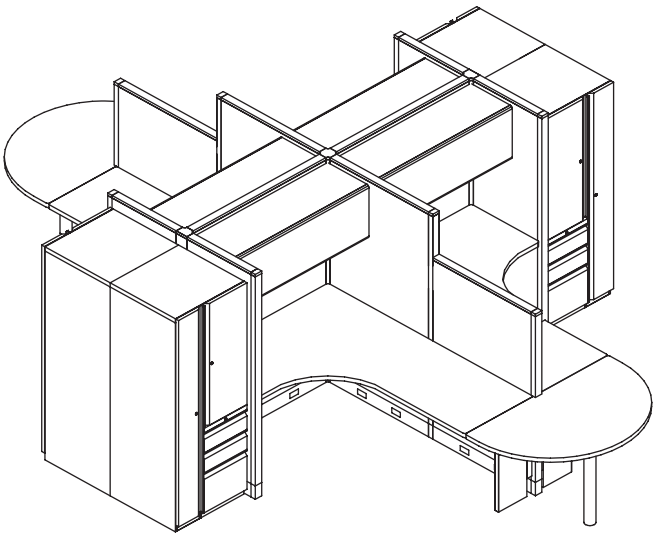
Stronger

With quality details rarely seen in comparable products, including welded steel frames, threaded metal inserts on worksurfaces, metal panel connectors, top caps and kick plates, and a lifetime warranty, Concensys is built to last through multiple reconfigurations and extended use. Plus, panels are shipped fully assembled to reduce installation time and costs.

Faster

Standard production lead times average between two and three weeks.





Friendlier

A monolithic, slender panel design simplifies planning, specification and installation by reducing the number of parts and the wasted space of panel creep. Panels are available in seven widths, between 18" and 60", with an enormous range of fabric and finish options to maximize design flexibility.

The Concensys Choice

Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, the Concensys panel system unifies the essential elements of systems furniture in one high-value, best-in-class package. In a complicated world, Concensys is intentionally simple.

It's a quality selection made easy.

Panels

Tackable Acoustic

- Concensys Panels are 2⅛" thick and available in 5 heights / 7 widths — add ⅛" for each end cover.
- Frame designed with 4-sided, welded tubular steel.
- Acoustical panels meet BIFMA recommendations.
- Acoustical panels meet or exceed standards.
- Due to panel width, back-to-back data modules should not be used at beltline or in the base.
- Add 2¼" to panel run for each "L", "T", "X" or extended straight connector.
- Concensys Panels offer low profile painted/aluminum "P" top caps.

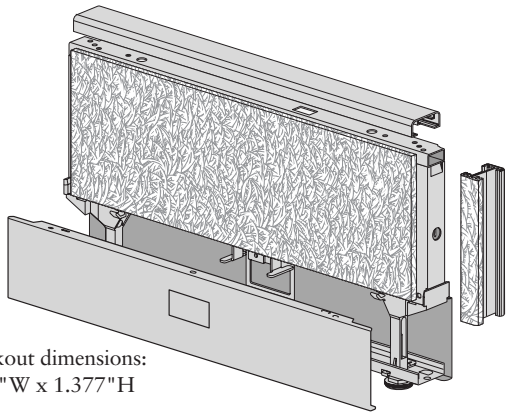
Note: Actual panel height varies depending on position of leveling glides (2¾" vertical adjustment).

NOMINAL PANEL HEIGHT	TOP CAP OPTION "P"
32"	30⅛"– 32⅞"
43"	40⅝"– 43⅜"
56"	53⅜"– 56⅛"
69"	66⅝"– 69⅜"
82"	79⅝"– 82⅜"

Maximum Receptacle Capacity in Panel Base Pathways

Widths	24	30	36	42	48	60
Maximum of 1 duplex per panel side	X					
Maximum of 2 duplexes per panel side		X	X	X	X	X

Concensys Tackable Super Acoustical design: 4-sided, welded, tubular steel panel frame.



- Knockout dimensions: 2.700"W x 1.377"H

European and United Kingdom Kickplates:

- Kickplates are available with receptacle openings for European and United Kingdom receptacles.
- Please contact Customer Support for details.

Panel Specification and Installation Notes

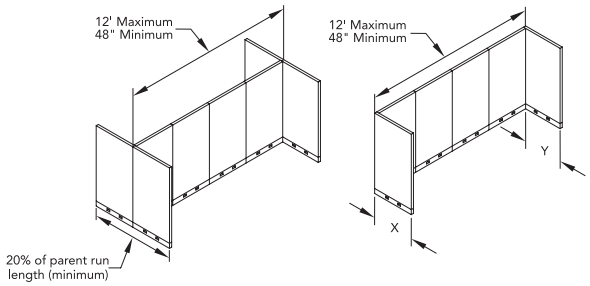
Panel Door/Locksets

- Door is standard as right-hand; can be field modified to left-hand.
- Configure into layout as an 82"H x 42"W panel (can be wall mounted same as other panels).
- Height of door = 77¾". Access width = 36".
- Door surface is laminate; color must be specified.
- A panel connected to a door with a straight connector kit should be an 82"H panel.
- Order Lockset separately.
- Standard lockset finish: polished brass. Keyed — one side. Two keys provided.
- A commercially available lockset with a 2¾" set-back for a 1⅜" thick door can be used.
- Lever-style lockset finish: brushed aluminum. Keyed — one side. Two keys provided.

Half-Glazed Panels

- Glass is clear, tempered safety glass.
- Bottom of glass is 29" above floor level with levelers fully retracted.
- Overhead storage components should be avoided on glazed and half-glazed panels.

For adequate stability, one of two methods of stabilization must be adhered to:



METHOD 1 — METHOD 2 X + Y ≥ 72"

Method 1: A parent panel run must be a minimum of 48" and a maximum of 12', and must have a minimum of two return panels totaling 20% of the length of the parent run, extended in opposing directions on each side of the parent run.

Method 2: A parent panel run must be a minimum of 48" and a maximum of 12', and must have at least two return panels (one at the beginning and at the end of the parent run) totaling 60+% of the length of the parent run, extended in one direction. The minimum length of return panels should total 72".

Note

- Return panels must not be more than 26" shorter in height than the parent run.
- When using 120° connections, 12" must be added to the length of return panels as determined by methods 1 or 2.

(Refer to pages 181-182 when using stacking panels.)

Working with Stacking Panels

Frame Dimensions (Nominal)

- Height: 13"
- Width: 18", 24", 30", 36", 42", 48", 60"

Stacking Panels — Fabric

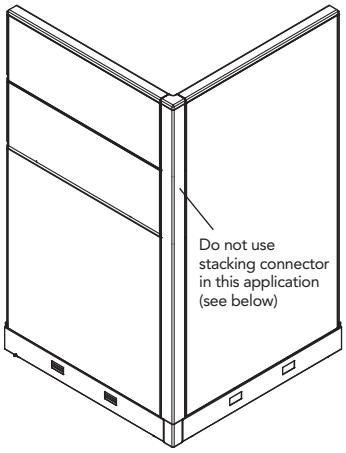
- Frame design with 4-sided, welded tubular steel.
- Utilizes top cap, attachment hardware, and screws from base panel installation.
- Can be added to any Concensys panel and door from 18" to 60"W.
- Must match base panel width.
- Specify connectors separately.
- End covers can be specified in full end height to include height of stacking panel or in 13"H.
- Maximum 2 high stackable.

Stacking Panel — Glass

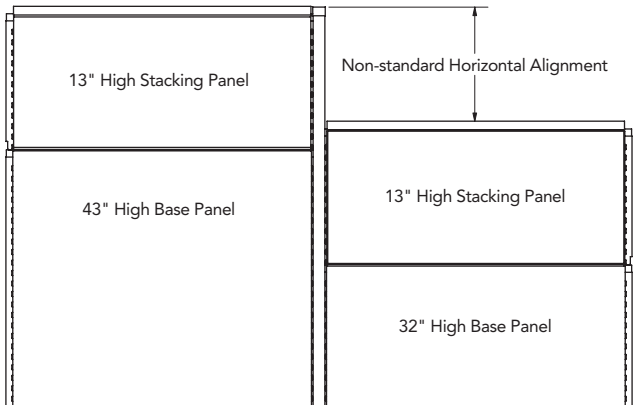
- Clear, double-pane tempered safety glass inserts.
- Frame and components are painted black.
- For best aesthetics, use black painted stacking connectors.

Building Vertically with Concensys Stacking Panels

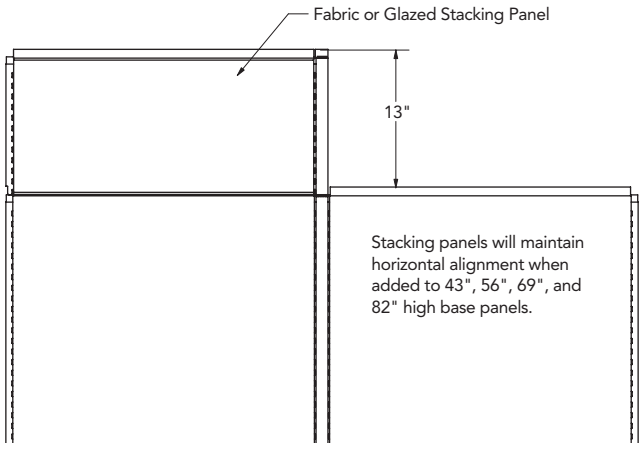
- No more than 2 stacking panels can be added to any straight base panel.
- Stacking panels accept overhead storage components (on the lower stacking panel). Refer to instruction sheet.
- Stacking panels can be used on any straight base panel. Adding stacking panels to 43"H, 56"H, and 69"H panels will maintain horizontal alignment between 56"H, 69"H, and 82"H panels, respectively. Horizontal alignment to other standard panel heights cannot be achieved with base support panels other than 43"H, 56"H, and 69"H. For example, stacking panels can be used on 32"H panels, but the resulting 45"H panel will not align horizontally with any existing standard panel height and is therefore not recommended. (See illustration below.)
- Variable height finish kit configurations must not exceed 39".
- Creating a variable height configuration will require a variable height kit.
- When adding a stacking panel to "fill in" an existing variable height configuration, additional connector brackets will be required.



Base panel connectors must be the same height or taller than the tallest adjacent base panel. Substituting stacking connectors is not permitted.

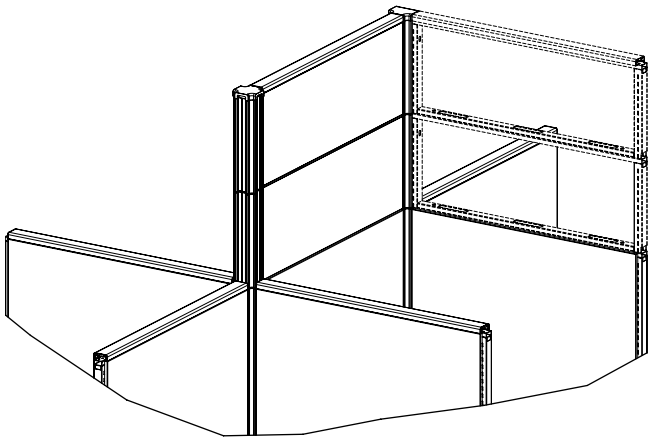


Not Recommended

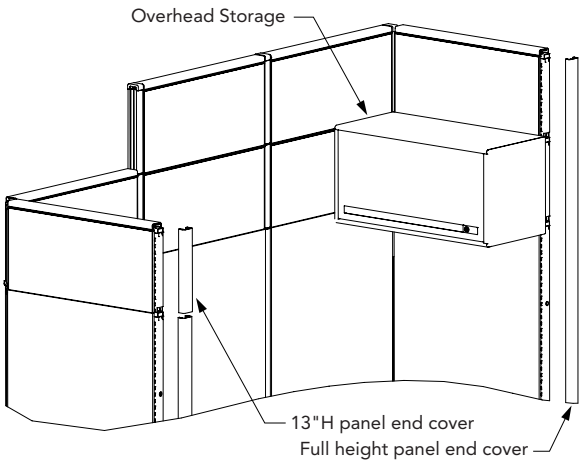


Recommended

Working with Stacking Panels (continued)

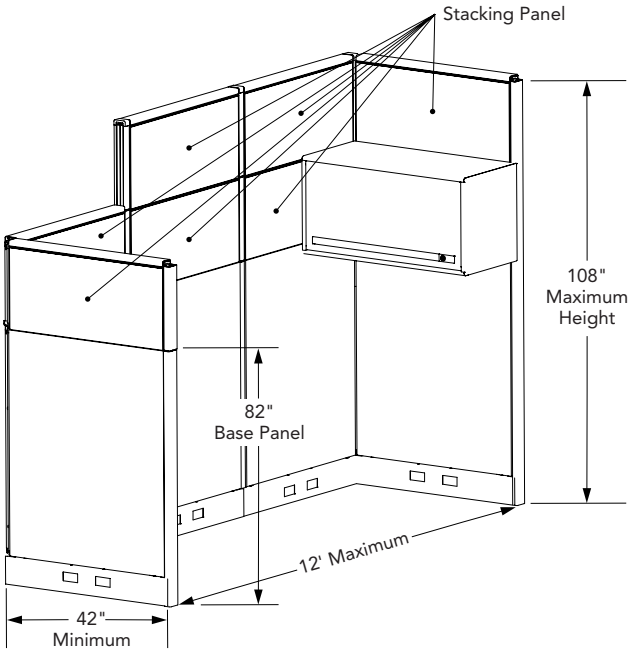


Single or double high stacking panel configurations must have adjacent return panels or full height connectors.



When using overhead storage on the end of a run, or on a return panel, a full height panel end cover is required for adequate stability.

When overhead storage is not used, a 13" panel end cover can be installed.



For adequate stability of Concensys panels with stacking panels resulting in an overall height above 82", one of the following methods of stabilization must be adhered to:

Method 1 — Refer to illustration above. The width of the parent panel run must be a minimum of 48" and a maximum of 12 feet and must have a minimum of two return panels that are a combined width of 42" wide, or wider, extending in opposing directions on each side of the parent run.

Method 2 — Refer to illustration above. The width of the parent panel run must be a minimum of 48" and a maximum of 12 feet and must have at least two return panels that are 42" wide, or wider, extending in one direction. The minimum length of return panels must total 84".

Note

- Return Panels must not be more than 26" shorter in height than the parent run.
- When using 120° connections, 12" must be added to the length of return panels as determined by methods 1 or 2.

Sliding doors for Concensys® *are a great addition to any new or existing installations. The sliding door is system specific; one model for Concensys with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of P1 or P2 paint, the sliding door will create a unique look for any office environment.*

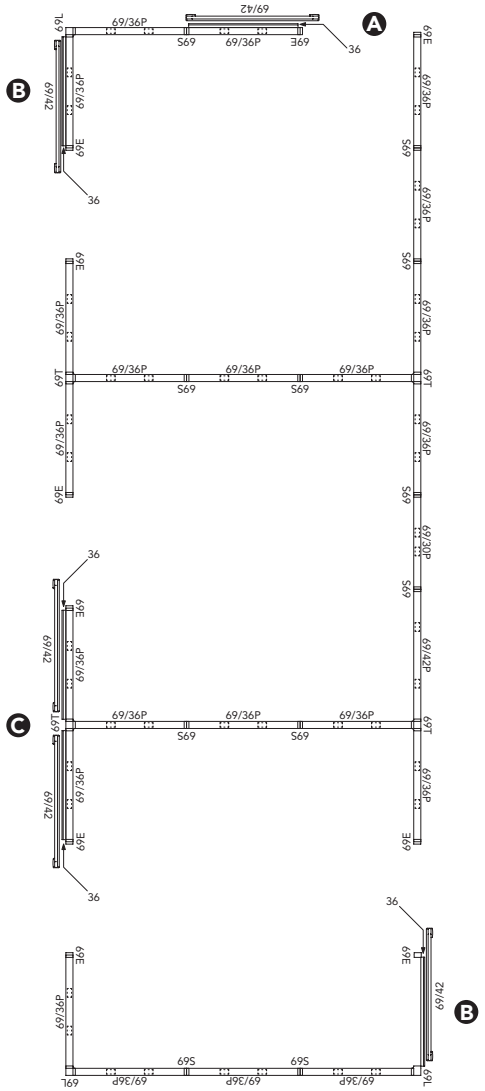
The **sliding doors** *are available in 69" and 82"H models and can mount to 30", 36", 42", and 48"W panels. They accommodate a 36"W opening and are 42"W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.*

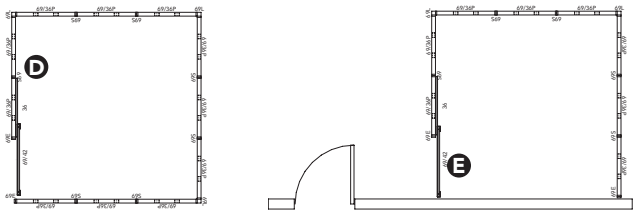
General Guidelines for Use of Sliding Door

- The system requires the ordering of both a door and a mounting bracket kit.
- The Door is system specific. The Concensys door works with Concensys only.
- All doors are 42" wide to accommodate a 36"W opening and are non-handed .
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48"W).
- Mounting bracket kits are system specific.

General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 180). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening **(A)** where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42"W. If the panel is at a corner **(B)**, the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels **(C)** that are less than 42"W they will interfere with each if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear **(D)** and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run this is positioned adjacent to a wall **(E)** or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a “T” connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.





Panels

Panels and Doors

"P" Suffix Designates Top Cap Style:

"P" Suffix — low profile, painted top caps

- Concensys "P" top cap panels are 2" less than nominal heights listed with glides fully retracted. See page 185.
- Concensys panels are 2⅛" thick.
- Refer to page 197 for cable management capacities in Concensys panels.

Tackable Acoustical Panels (page 187)

- Actual panel height varies depending on position of leveling glides. Refer to page 185 for full details.
- Use of stacking panels on 32"H panels will result in non-standard height — will require use of 13"H stacking connectors.
- All standard connectors are compatible with non-tackable panels.

Stacking Panels (page 188)

- 13" in height.
- Available in the following seven widths: 18", 24", 30", 36", 42", 48", and 60".
- Specify connectors separately.
- Stacking panel utilizes top cap from base panel (no top cap designator required).
- A stacking panel directly attached to a base panel will support overhead storage components.
- Up to two stacking panels may be used on a base panel.
- Glass panels are clear double-pane inserts of tempered safety glass.
- Glass frame and components are painted black.
- Use of stacking panels on 32"H panels will result in non-standard height — will require use of 13"H stacking connectors.

Half-Glazed Panels (page 188)

- Actual panel height varies depending on position of leveling glides.
- Half-glazed panels can accommodate stacking panels.
- Half-glazed panels are constructed of clear, double-pane tempered safety glass.
- Glass framework is painted black.

Door Panel (page 189)

- Actual panel height varies depending on top cap selected and position of leveling glides.
- Door is standard as right-hand; can be field modified to left-hand.

Sliding Door (page 189)

- One specific door model for Concensys.
- Sliding doors available in 69"H and 82"H and can mount to 30", 36", 42", and 48"W panels of same height.
- Doors are 42"W to accommodate a 36"W opening.
- Order system specific mounting kit for each door ordered.
- Threshold free design for best aesthetics and safety — eliminates potential for tripping.
- Sliding door ships non-handed. Handles are field installed to L or R hand.
- Handle pulls on each side of door are color matched to trim.
- Available in P1 and P2 paint.
- Doors are available in Frosted Translucent insert material only.

Sliding Door Mounting Kits (page 189)

- Mounting kits are specific to each system.
- Concensys bracket kits accommodate all top cap trim options.
- Order to match the width of the panel on which the kit is hanging.
- Available in P1 and P2 paint.

Connectors

Panel Connectors (page 190)

NOTE: Actual panel height varies depending on position of leveling glides (2¾" vertical adjustment).

NOMINAL PANEL HEIGHT	TOP CAP STYLE "P"
32"	30⅛"– 32⅞"
43"	40⅝"– 43⅜"
56"	53⅝"– 56⅜"
69"	66⅝"– 69⅜"
82"	79⅝"– 82⅜"

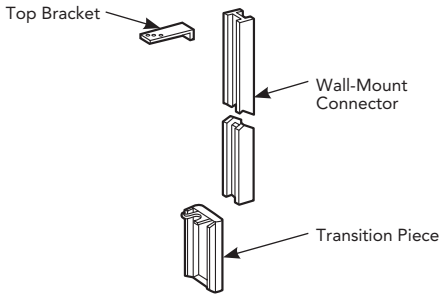
- Connector kits include all parts required for connecting and finishing — top bracket, vertical fabric-covered or painted filler, lower base plate filler, top cap trim, and necessary screws.
- "L", "X", "T", and extended straight connections provide space to pass a limited quantity of data cabling between the panel base pathway and top cableway.
- **Add 2¼" to overall length of run for each "L", "X", "T", or extended straight connection.**
- **Straight connector does not add to overall length of run.**
- Add 9/16" to panel run for each panel mount-to-wall kit. Adds 15/16" when brackets are used for modularity.
- One carpet gripper is included with end connector kits.
- Porting is standard on all straight connectors.

Panel End Covers (page 191)

- Order panel end cover kits to finish the end of every panel run (except when attaching panels to permanent walls).
- Panel End Covers add ⅝" to length of run.
- Stacking panel end cover utilizes top cap from base panel end cap.

Panel Mount-To-Wall Kit (page 191)

- Anchor devices are not supplied with the permanent-wall panel connector kit. Refer to Concensys Installation Instructions for appropriate hardware.
- Adds ⅝" to length of run (⅞" when mounted for modularity).



- Stacking panel wall mount kit utilizes top end cap from existing base panel wall mount.
- Black painted stacking wall mounting kit recommended for use with Concensys glass stacking panels.

Stacking Connectors (page 190)

- Height: 13".
- Available in standard Concensys profiles. Straight, "L", "T", "X", extended straight, and end covers.
- Stacking connector profile must match base panel connector profile.
- Upholstered connectors used between upholstered stacking panels.
- Black painted connectors recommended between glass stacking panels.
- Supplied with a spacer to match connector profile and horizontal reveal space.
- Stacking connector utilizes top cap from base panel connector installation.
- Painted connectors are designed for use with glass stacking panels.
- Each 13"H connector supplied with a profiled spacer.
- Add ⅝" to panel width for each end cover.
- Add 2¼" to panel run for each "L", "T", "X", or extended straight connector.
- 95" and 108" end connectors offered to support a single and double high stacking panel on an 82"H base panel. Not available in painted option.
- Use of stacking panels on 32"H panels will result in non-standard height — will require use of 13"H stacking connectors. See page 182.
- When stacking panel and connectors are added to existing base panels and connectors that also utilize integrated power poles, electrical and data wires must be pulled through the new stacking connectors.

Variable Height Finish Kits (page 192)

- Available in painted and fabric finish
- Must specify model for each variable height connection.
- Must order size that is equal to the difference in height between panels.

Tackboards (page 193)

- Use 13"H with half-height shelves hung on 56"H panels.
- Use 18"H with 69"H and 82"H panels.
- Tasklight cords can be concealed behind tackboards.
- Can only be used on one panel in a 90° junction.
- Brackets come attached for mounting.

Connectors

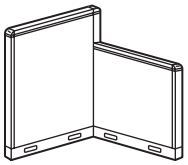
How to Order Variable Height Connections Using Variable Height Finish Kits

- For variable height panel connections.
  1) Order a standard connector kit straight, "L", "T", or "X" in the height and style of the tallest panel.
  2) Order the appropriate number of variable height finish kits.
- All variable height connection combinations can be accommodated by the models shown except as noted in the matrix below. Variable height panels cannot be connected to an extended straight connector.
- Low profile variable heights are ordered to finished height.

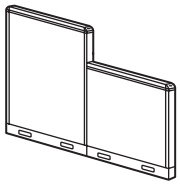
Variable Height Finish Kit Matrix					
		High Panel Height			
		82"	**69"**	**56"**	**43"**
Low Panel Height	**32"**		37"	24"	11"
	43"	39"	26"	13"	
	56"	26"	13"		
	69"	13"			

The examples below use 56"H and 43"H panels, reference above matrix to determine required height of finish kits for other height panels.

2-Way

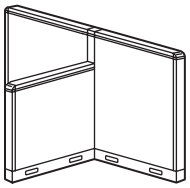


1 "L" Connector Kit (height of tallest panel)
1 13"H Variable Height Finish Kit

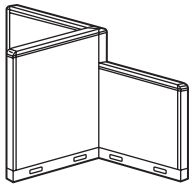


1 Straight Connector Kit (height of tallest panel)
1 13"H Variable Height Finish Kit

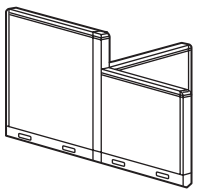
3-Way "T"



1 "T" Connector Kit (height of tallest panel)
1 13"H Variable Height Finish Kit

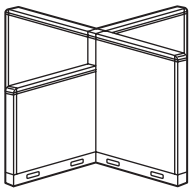


1 "T" Connector Kit (height of tallest panel)
1 13"H Variable Height Finish Kit

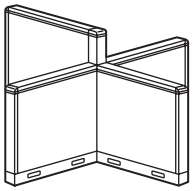


1 "T" Connector Kit (height of tallest panel)
2 13"H Variable Height Finish Kits

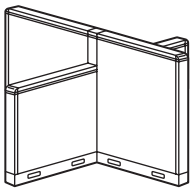
4-Way "X"



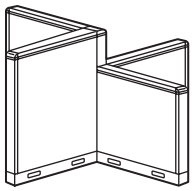
1 "X" Connector Kit (height of tallest panel)
1 13"H Variable Height Finish Kit



1 "X" Connector Kit (height of tallest panel)
3 13"H Variable Height Finish Kits



1 "X" Connector Kit (height of tallest panel)
2 13"H Variable Height Finish Kits

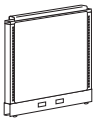


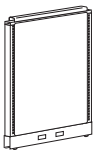
1 "X" Connector Kit (height of tallest panel)
2 13"H Variable Height Finish Kits

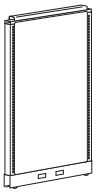
Panels

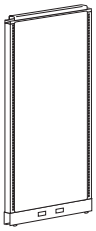
Concensys® — Tackable Acoustical Panels

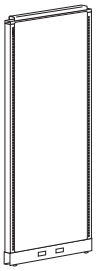
For specification information see pages 179-184.











Note: Actual panel height varies depending on position of leveling glides.

Nominal Height	Width	Model	List Price Grade A	Grade B	Grade C	Grade D	Grade E	Grade F

Electrical & Data

Reference Page

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
   - The four-circuit system (4-Hot/2-Neutral/2-Ground)
     - 3 + 1 option
     - 2 + 2 option
   - The three-circuit system (3-Hot/3-Neutral/2-Ground)
2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated and separate neutrals circuits.
4. Specify appropriate power harnesses* and pass-thru cables.*
5. Determine the location, quantity and type of power infeed needed.

* Select power harness models (A8712XX), Pass-thru cables (A8710XX) and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L" and extended straight connectors.

Flexconnect™ Electrical System Options

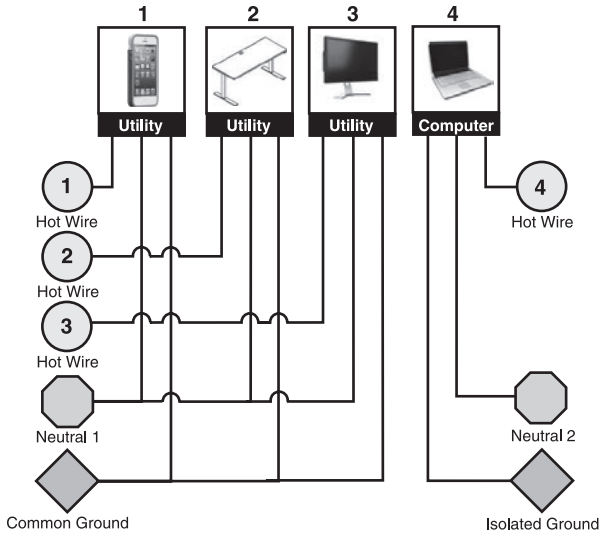
The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

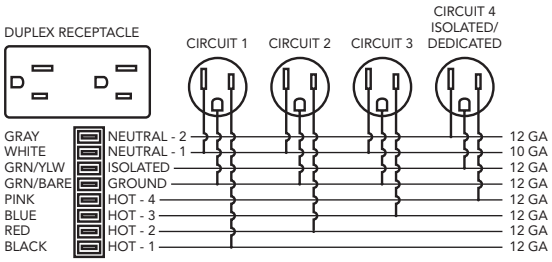
All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 200.

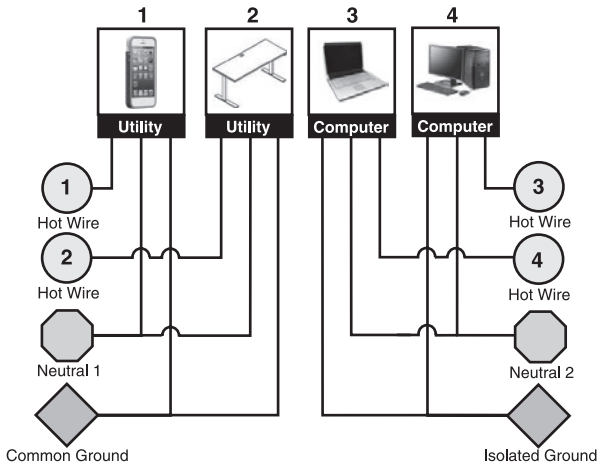
Four-circuit, 3 + 1 Receptacle Option



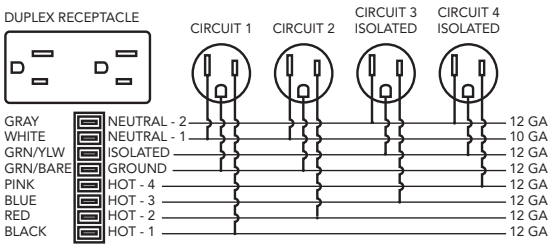
The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.



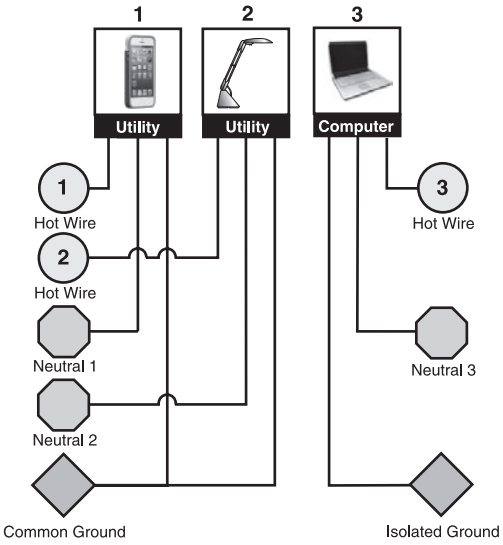
Four-circuit, 2 + 2 Receptacle Option



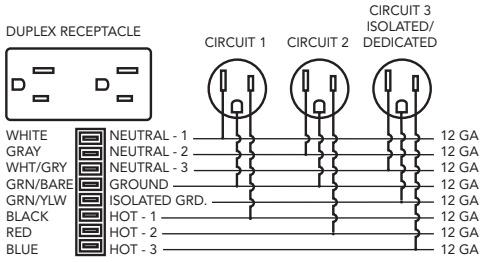
The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.



Three-circuit, separate neutrals



The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/ dedicated. The three-circuit components have model numbers with an "A" suffix .



Concensys Receptacle Usage					
Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4 Hot/2 Neutral/2 Ground	**3 + 1**	Common Circuit-1 **A871501**	Common Circuit-2 (1) **A871502**	Common Circuit-3 **A871503**	Iso/Dedicated Circuit-4 **A871504**
	2 + 2	Common Circuit-1 **A871501**	Common Circuit-2 **A871502**	Isolated Circuit-3 **A871506**	Isolated Circuit-4 **A871504**
Three-circuit 3 Hot/3 Neutral/2 Ground		Common Circuit-1 **A871501A**	Common Circuit-2 **A871502A**	Iso/Dedicated Circuit-3 **A871503A**	N/A

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

Duplex Receptacle

15 amp Receptacle

Electrical & Data

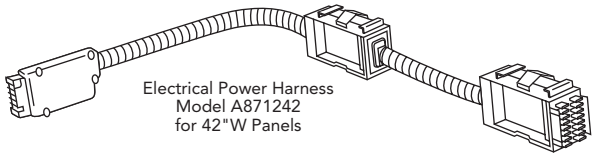
Reference Page

Concensys Electrical Applications

- Concensys panels are UL 1286 Listed.
- Electrical components are UL Listed and CSA Certified.
- It is the customer's responsibility to ensure that use of the pre-wired electrical system, the number of receptacles used on a given circuit, and connection to a building power source, be in compliance with all local and national electrical codes.
- A licensed electrician must make connections to a building electrical supply.
- To power all panels at a "T" connection, at least one power harness must be used; at a "X", at least two power harnesses must be used.
- Harnesses will stretch up to 3½", to span an extended straight panel connection.
- When multiple 18"W panels are connected at a "T" or "X" connection, an additional 18"W pass-thru cable is required.
- Use power harnesses in all panels adjacent to 18"W panels.
- Pedestals and lateral files, positioned under worksurfaces, may render some receptacles inaccessible, and may prohibit use of grommets.
- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.

Definitions of components:

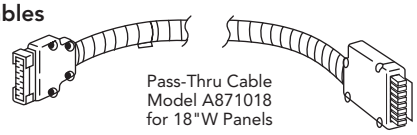
Electrical Power Harness



Electrical Power Harness
Model A871242
for 42"W Panels

- Used to distribute power in panels 24"W and wider.
- Can be mounted in the base pathway.
- Power distribution in either direction.
- Specify power harness to match panel width.
- Double-sided: receptacles can be inserted into both sides of power blocks.
- Use power harnesses in all panels configured adjacent to 18"W panels (if panel run is to be electrified).

Electrical Pass-Thru Cables

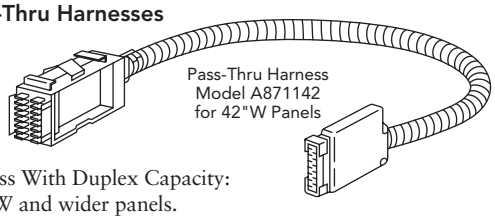


Pass-Thru Cable
Model A871018
for 18"W Panels

Pass-Thru Cable Without Duplex Capacity:

- For use in 18"W panels or when no receptacle is required. Specify to panel width.
- Cable length cannot be stretched.
- Allows power distribution through panels where receptacles cannot be positioned.
- When multiple 18"W panels are connected at a "T" or "X" connection, an additional 18"W pass-thru cable is required.

Electrical Pass-Thru Harnesses



Pass-Thru Harness
Model A871142
for 42"W Panels

Pass-Thru Harness With Duplex Capacity:

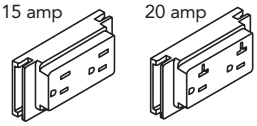
- For use in 24"W and wider panels.
- Use in panels where multiple receptacles are not required.
- Use when specifying both data and electrical at beltline height.
- Added feature: has capacity for one receptacle on each side of a panel. Feature offers future expansion and is an alternative to power harnesses.

Electrical Jumper Cables

- Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

All electrical power harnesses and pass-thru harnesses will stretch 3½" to span intersections and connections. Jumpers span from beltline to baseline, around corners, and back to beltline.

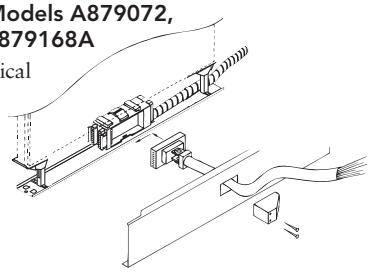
Duplex Receptacles



15 amp 20 amp

- 15-amp outlet configuration.
- Models A871601 and A871601A have a 20-amp outlet configuration required by some large copiers.
- Fit back-to-back into the power block(s) of power and pass-thru harnesses.
- Labeled with the provided circuit. Circuits connected to the Isolated Ground are identified with an orange triangle; circuits that do not share a neutral or ground have an orange circuit number.

Power Infeed Base/Ceiling Models A879072, A879072A, A879168, and A879168A



- Used to connect the panel electrical system to the building electrical supply Model A879168 or A879168A is used to connect to the building electrical supply, in a ceiling plenum area. Power pole A870070 must be ordered separately.
- A licensed electrician must make connections to a building electrical supply.
- Plugs into any receptacle position; can be rotated left or right.
- Conduit is UL Listed, black, liquid-tight conduit (outside diameter is ⅞").

Power Infeed Model A871972 and A871972A

- Used to connect the panel electrical system to the building electrical supply.
- A licensed electrician must make connections to a building electrical supply.
- Plugs into the end of a power block. The end-of-panel base pathway cover can be field cut to provide an access port.
- Model uses UL recognized flex-cable conduit — no portion can be left exposed after installation.

Power Infeed Models A871912, A871912A, A871918, and A871918A

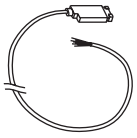


Illustration is representative of all A8719XX models

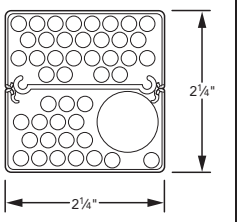
- Used to connect the panel electrical system to the building electrical supply, in a ceiling plenum area. Power pole A870071 must be ordered separately.
- A licensed electrician must make connections to a building electrical supply.
- Plugs into the end of a power block.
- Models use UL recognized extra-flex conduit.

Note: Infeed cables listed above may be field-cut to desired length. Remove UL Listing/Schematic label and reposition onto the usable length.

Electrical & Data

Infeeds

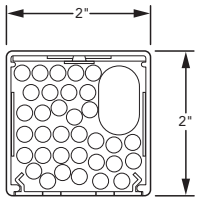
⅞" dia. Infeed Cable



Space for 45 .25" dia. cables.
(60% fill ratio)

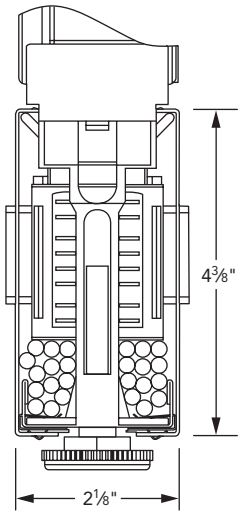
Model A870070
Power/Communication Pole
4.5 sq. in.

⁹⁄₁₆" x ⅞" o round Infeed Cable



Space for 34 .25" dia. cables.
(60% fill ratio)

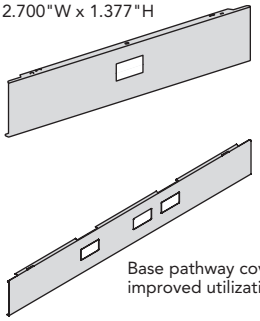
Model A870071
Integrated Power/
Communication Pole
3.3 sq. in.



25 CAT 6 with electrical
77 CAT 6 without electrical
(60% fill ratio)

Lower Base Pathway
(2.03 sq. in. below power block, 6.27 sq. in. w/o Power Block for routing CAT 6 data cables at 60% fill ratio.)

Knockout dimensions:
2.700"W x 1.377"H



Base pathway covers with additional knockouts are available for improved utilization of power and data.

Electrical & Data

Electrical

Electrical Components — Concensys (pages 194-195)
- Four-circuit components and three-circuit components (with suffix “A”) cannot be used together.

Electrical Power Harness (page 201)
- Harness will stretch up to 3½" to span a “T” or “X” connection, by stretching.
- Has an extra terminal connection that pass-thru cables do not have (increases connection capacity — required at some “T”/“X” junctions).
- Use power harness in all panels configured adjacent to 18"W panels (if panel run is to be electrified).
- To power all panels at a “T” connection, at least one power harness must be used; at a “X”, at least two power harnesses must be used. An additional power harness is required when using an integrated power pole.

Electrical Pass-Thru Harness (page 201)
- Used to distribute power in panels 24"W and wider.
- Receptacles can be inserted into both sides of power block(s).
- Harnesses will stretch up to 3½" to span “T” and “X” connections.

Jumper Cables (page 201)
- Electrical jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

Electrical Pass-Thru Cable (page 201)
- Used to distribute power in panels where receptacles are not required.

Dual Electrical Eight-circuit Power Harness Kit (page 201)
- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables.
- Requires two four-circuit infeeds.
- Uses four-circuit receptacles.
- Four-circuit components and three-circuit components (with suffix “A”) cannot be used together.
- Models must be positioned “back-to-back” in the panel — single-side use is not permitted
- Components can only be routed in a single run — a single run cannot branch to multiple panel runs at “T” and “X” junctions.
- Four-circuit jumper cables (A8713xx) can only be connected to a power block at one end of a run — power cannot be routed between a run in the base pathway area and a run in the beltline area, except at one end of the run.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to-back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity
- Two power infeeds are required to connect the back-to-back runs. Power infeed A8719xx must be connected to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed.

Duplex Receptacles (page 202)
- Receptacles are marked with circuit number.
- A871601 and A871601A have a 20 amp plug configuration.

Power Infeed Cables (page 202)
- A879072 and A879168 can be plugged into any power block.
- Conduit length: base infeed is 6' long, integrated ceiling infeed is 12' or 18' long and ceiling infeed is 14' long.
- Ceiling infeed (A879168) can be used with power pole model A870070.
- Integrated ceiling Infeed cable connects to a prewired electrical harness in the panel base pathway, transverses through the panel connector, and terminates in the junction box at the top of the integrated power pole.

Hardwire Applications (page 202)
- Used when local electrical codes require hardwire entry.
- A871400 or A871400A mounts into panel 30-60"W. When used in 30"W or 36"W panels, power can be routed in only one direction. When used in wider panels, a pass-thru cable for that panel width can be used to route power back in the opposite direction.

Pull-up Receptacle (page 202)
- 6' cord w/plug; circuit breaker; mounts in worksurface grommets.
- May interfere with the placement of optional pedestals.
- Included grommet may not match Allsteel worksurface grommets.

Power/Data Dome (page 202)
- Fits into existing grommet hole to provide two surface mounted receptacles and two data ports.
- May interfere with the placement of optional pedestals.
- Can be mounted into field-cut, 2¼" diameter hole.
- 6' black power cord.
- 2 simplex receptacles and 2 data positions.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings.
- Many of the AMP, AT&T, Krone, Leviton, and other commercially available data terminals can be used — terminals must be of a design that will snap into .695 x .650, .590 x .790, or .590 x .750 openings, in .064 max. thick faceplates.

(continued on next page)

Electrical & Data

Electrical *(continued)*

Power/Communication Pole (page 203)
- Double cavity used to route infeed cable 879168 from ceiling to panel base pathway.
- Conduit of the infeed cable serves as the division of electrical and communications cabling.

Integrated Power/Communication Pole (page 203)
- Installs into 43-82" high or 13"H stacking 90°, "T", and "X" connections.
- In addition to ordering the power pole, an appropriate trim/connector kit must be ordered.
- To power the prewired electrical system, from a ceiling power source, a ceiling infeed cable, model A871912, A871912A, A871918, or A871918A, must be purchased separately.
- Single cavity with removable cover.
- Field-cut to desired length.
- Outside dimension = 2" square.
- For applications requiring integrated power poles longer than 78", an extension kit is available. Contact Allsteel Customer Support for information.
- Not to be used with 120° or 135° connectors.

Trim/Connector Kits (page 203)
- Kit consists of:
  - Panel Top Transition Piece
  - 4" x 4" Junction Box and Cover
  - Drop-Ceiling Trim Plates
  - Panel End Brackets
  - Hardware Pack
- A wood option is not available: use a Flint colored model 87007XP.
- Can function at variable height junctures.

Concensys Connector Bracket Kit (page 203)
- Used to increase vertical cable capacity through the panel connectors
- Increases vertical wire capacity on a single "T" or "X" connector.

Data Port Kit (page 203)
- Allows field installation of additional data ports to Concensys technology panels.
- Knockout dimension: 2.700"W x 1.377"H.

Wireway Grommet (page 203)
- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

Wire Management Channel (page 203)
- Self-adhesive backing to attach to panels and underside of worksurfaces.
- Contains two cavities for routing wires.
- Note: Each cavity provides space for a maximum of six .25" Dia. cables. Total capacity = 1 sq. in.

Cable Management Tray (page 203)
- Attaches under the worksurface to contain cables. Hardware included.
- Metal tray shelf is 4" deep. Can hold most electrical power strips and/or surge protectors.

Cord Retainer Clip (page 203)
- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each tasklight cord.
- Package of 50. Black only.

Cord Organizer (page 203)
- Attached to bottom of worksurface.
- 4"W x ⅞"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

Base Pathway Covers (page 204)
- Features an additional knockout for improved utilization of power and data. Knockouts are 2.700"W x 1.377"H.

Data Faceplates (page 204)
- Fit into receptacle and data port openings in panel base pathway covers, or into data port (CDP).
- Due to panel depth, back-to-back data modules should not be used at beltline or in the base.

Specialized electrical may be available through Allsteel Tailored Products Group.
