- Wire managers are available for vertical cable managers, cable carriers and maple cable basket; see page 765
- Refer to page 765 for available grommet/wire manager colors
- Refer to pages 328-329 for complete grommet locations and details

MONITOR ARMS

Clamp mount monitor arms cannot be used with modesty panel. It is recommended to field install a grommet mount model in a location to clear the modesty.

CONTROL BOX MECHANISM INFORMATION

- Motor per style:
  - straight line table desk has 1 control box, 2 motors
  - single column H has 1 control box, 1 motor
  - L-configurations desk has 1 control box, 3 motors
- Anti-collision function on control box will engage when a firm obstruction is detected and will stop worksurface travel
- Overheat protection will stop the unit should the motor overheat due to being heavily loaded or if driven continuously. Operation of the desk can resume in approximately 15 minutes
- Overload protection detects if the load is too heavy and will stop the unit. Remove the load and resume use
- Control box includes a 9' power cord with two-prong plug

IMPORTANT: The customer bears the responsibility to verify that the installation of Naviyd height adjustable desks complies with all local municipal electrical codes. Some municipalities require the worksurface and base to be sold as an assembly that is listed to UL 962. In these justifications, specify a Naviyd configured desk (base sold with a worksurface) model. Naviyd height adjustable bases (sold separately) will not bear the ETL mark. Base only models are available for use with specific Naviyd worksurfaces (sold separately) which align cut-outs, grommets, and screen brackets with the base understructure.

Naviyd height adjustable, base only models can accept other Kimball and National brand worksurfaces in ¾", ¹³⁄₁₆", and ¹⁹⁄₁₆" thickness. It is the customer's responsibility to maintain recommended safety clearances to minimize pinch/crush hazards when using other Kimball and National brand worksurfaces.

Field installed grommets and cutouts are recommended where standard locations may interfere with the base understructure. Worksurface size should not exceed the recommended size.

Use of non-Kimball and non-National brand worksurfaces are not recommended and is the sole responsibility of the customer and may void the product warranty.

PRODUCT PLANNING INFORMATION

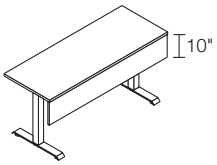
WORKSURFACE CLEARANCE

1" minimum clearance around the sides and back is required when placing height adjustable worksurfaces next to each other to minimize pinch/crush hazards. A clearance of less than 5/16" is acceptable next to a fixed wall or panel where the clearance is maintained through the travel range. Base feet are 23⅜" deep.

STATIONARY STORAGE PLANNING

Pedestals, overhead storage, or components should not be installed in the path of the height adjustable desks. Underside of desk frame to floor is 22 3/16" for standard height and 18⅞" for extended height models with the leveling glide in the lowest position.

MODESTY PANELS



Modesty panels provide user privacy and conceal electrical components. Modesty panels can extend the full width of the worksurface or be narrower than the surface.

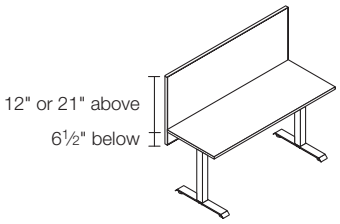
TFL modesty panels are ¾" thick and are edge banded in the same material and resin modesty panels are ¼" thick.

When using a narrower modesty panel than the worksurface width, it is recommended to use a center grommet or cut-out, because the left and right locations could sit outside the modesty depending on the width specified.

Modesty panels are not sized to fit 120° curved corner desks or the return side of height adjustable L-configurations. Specify a smaller width, such as 66" wide modesty for a 72" wide worksurface.

To avoid interference, do not place storage, and other objects beneath the desk with modesty panel.

PRIVACY SCREENS



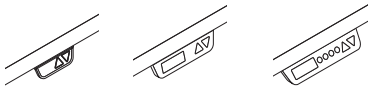
Fabric privacy screens with frame attach to height adjustable desk worksurfaces to provide space division and privacy above and below the worksurface. Privacy screens feature a tackable fabric surface (panel fabric) with an aluminum frame which is available in all paint colors. Attachment brackets are painted to match the frame. IMPORTANT: Privacy screens are prohibited on desks with C-leg bases as they are a tip hazard due to placement of the column being off center.

Privacy screens can be specified to span the full width, or they can be narrower than the desk worksurface. A center cut-out or grommet is recommended on the narrower application to avoid interference with the screen's mounting brackets.

Privacy screens can be mounted with a 1" maximum gap to manage cables and accommodate a clamp-mount monitor arm.

To avoid interference, do not place storage, and other objects beneath the desk with privacy screen.

CONTROLLERS



Standard Memory Programmable

Standard up/down switch ships with all height adjustable desk bases. Switch is 2" D x 2¾" W x ¾" H. Allows for upper and lower limits to be set to avoid collision with storage elements.

Memory control switch with display screen can be specified separately to replace a standard switch. It operates the same as the standard up/down switch. Memory control switch allows for a low position and a high position to be set to prevent the desk from interfering with obstructions, such as pedestals and overheads.

Programmable control switch with display screen allows up to four preset/saved height settings. Specify separately to replace a standard up/down switch.

All switches can be mounted on the left or right side of the work surface and are field installed.

BASE AND WORKSURFACE CONFIGURATION

- T-leg bases can be paired or are available configured with rectangular main or 120° curved corner worksurfaces
- T-leg L-configuration bases can be paired or are available configured with:
  - Rectangular main worksurface and a rectangular return (non-handed)
  - Rectangular main worksurface and a rectangular return (non-handed)
  - Extended straight (handed)
  - Extended cove (handed)

  Non-handed L-configuration models can be assembled in the field to accommodate left- or right-handed configurations
- C-leg bases can be paired or are available configured with rectangular worksurfaces only. IMPORTANT: C-leg bases are not available with 120° worksurface due to tipping hazard
- Single-column H component bases can be paired with 23" D x 36" W or 23" D x 42" W rectangular main worksurfaces

PRODUCT SPECIFICATIONS

WORKSURFACE

- Worksurfaces are sized on 6" increments for easy planning
- Laminate surfaces are 1³⁄₁₆" or 1⁹⁄₁₆" HPL (high pressure laminate) or 1⅛" TFL (thermally fused laminate), and feature a 3mm PVC rim or 6 veneer rim options
- Veneer surfaces are 1³⁄₁₆" or 1⁹⁄₁₆" plain sliced slipmatched cherry (Amber, Autumn, Mocha, Truffle) or maple veneer (Brighton, Caramel, Honey, Natural), plain sliced bookmatched walnut veneer (Clear Walnut, Cordovan, Judicial), quarter cut walnut veneer (Almond, Portobello, Sable), or quarter cut oak veneer (Sonoma). All veneer surfaces feature a 3mm wood rim or knife rim profile
- When specifying Clear Walnut, a clear coat finish, the natural wood characteristics of walnut veneer are visible. These characteristics include, but are not limited to, color and woodgrain variation.
- Refer to page 356 for rim profiles and colors
- Grain direction runs left-to-right unless otherwise noted
- Size modifications available at no upcharge; many WaveWorks component worksurfaces can be cut down in 1⁄16" increments. See component sections for specific models

FINISH APPLICATION

- All Veneer surfaces feature a semi-open pore matte finish

CHASSIS CONSTRUCTION

- All joints are securely fastened by screws, L-brackets, dowels, and concealed fasteners to ensure maximum strength
- Adjustable leveling glides are standard on all casegoods
- End panels and support panels are 1⅛" thick, modesty panels are ¾" thick
- Laminate modesty panels have vertical grain direction unless otherwise noted
- Wood modesty panels have vertical grain direction unless otherwise noted
- Laminate with horizontal grain (example: Sable Horizontal 792H) will always have horizontal grain direction
- Back panels are fully finished unless otherwise noted

SHELVES

- Shelves on open bookcases will be veneer, when ordering a veneer bookcase
- Doors on bookcases and above worksurface units come standard with touch latch
- Shelves are ¾" thick

PEDESTALS

- Full, lower height or mobile options available

DRAWERS

- Drawers feature 5-sided construction allowing for easy removal/replacement of drawer fronts
- Sides, back and front are ½" thick woodgrain vinyl wrapped
- Drawer fronts are 3-ply construction with matched woodgrain
- For interior drawer dimensions, reference page 363

DRAWER PULLS

- Available in 17 pull styles, refer to page 360 for pull styles and colors

DRAWER SUSPENSION

- Box and file drawers are equipped with black, full extension, progressive action slides
- Precision steel ball bearings combined with sequence slide movement ensures long lasting operation
- All suspensions have a lifetime warranty

FILING

- Drawers are equipped with black metal filing hardware that accommodates various filing requirements
- No-tool, easy installation allows for quick interchangeable filing capabilities
- Refer to page 363 for complete filing details

CORD MANAGEMENT

- Round grommets, racetrack grommets and wire managers are optional on worksurfaces
- Round grommets optional on component end panels
- Half-moon grommet optional on component modesty panels
- Extended radius grommet optional on end panels of component pedestals
- Wire manager worksurfaces have a flexible PVC trough that allows cords and cables to be routed along the back edge and sides of worksurfaces
- Refer to page 361 for available grommet/wire manager colors
- Refer to page 362 for complete grommet locations and details
- Undersurface wire managers are available for additional cable management requirements; see pages 697 and 765 for options

LOCKING

- Black and silver lock cores are available
- Key Random means lock cores/keys are randomly (1-5) picked and factory installed in unit
- Key Specific means you can pick any number (1-200) for black or silver lock core/key. Must specify the lock core model separately; not factory installed and will ship separately
- Specify a change key to remove and change lock cores
- To order key specific lock cores, change keys, and master keys, reference page 750

TABLE BASES

- Bases are formed metal with a powder coat finish
- Mobile bases have locking casters, glides are standard on fixed height legs
- Refer to pages 663-696 for recommended base applications

CONFERENCE TABLES, TRAINING TABLES AND PERIPHERAL ITEMS

- For matching conference tables, training tables and peripheral items, see the Tables Price List

EZ ARRANGEMENT MODEL NUMBERS

- Specify quickly and accurately with National's EZ Arrangement models. In each series, the most popular options have been pre-selected for a complete L or U configuration. Just choose the left or right model number, add a finish and you're done

HEIGHT ADJUSTABLE DESKS

- Wood, laminate/wood and laminate options
- Wood models are all wood; Laminate/Wood models are laminate tops with wood rim and wood chassis; laminate models are all laminate
- When in raised position, leg will be exposed
- Rim options are all Waveworks options
- Control pad can be moved to right-handed (RH) or left-handed (LH) by the customer
- Height adjustable customer range: 27⅜"-43¾"
- Duty cycle: 2 minutes ON/18 minutes OFF
- Maximum load should not exceed 100 lbs. on the surface
- Power cord: Type A plug, max 10 A, 125 V; 78¾" length
- Modesty panels are inset 1⁹⁄₁₆" from edge of desk and 3⅜" from floor
- Modesty panel options full flush, full breakfront
- Overall dimensions of desk are undersized to allow for pinch points
- No pull or locking options

BUFFET CREDENZAS

- Models with trashcan will have 2 drawers and 2 sets of double doors. Trashcan will be housed behind one set of the double doors
- The side where trashcan is located determines the handed side (trashcan on left is a left model)
- One 7 gallon trashcan per model is included
- Models with space to house a refrigerator will have 2 sets of double doors (no drawers). Refrigerator will be housed behind one of the double door sets with ventilation
- The side where refrigerator is located determines the handed side (refrigerator on left is a left model)
- Refrigerator is not included
- Overall opening for refrigerator in a 36" high model is 22½" wide x 28¹⁵⁄₁₆" tall x 25¼"deep. Max refrigerator size is 21½" wide x 27¹⁵⁄₁₆" tall x 21¼" deep
- Overall opening for refrigerator in a 41" high model is 22½" wide x 28¹⁵⁄₁₆" tall x 25¼" deep. Max refrigerator size is 21½" wide x 32¹⁵⁄₁₆" tall x 21¼" deep
- Only locking cabinet is the side with an adjustable shelf
- Buffet credenza with refrigerator access will not be covered under standard warranty if unit is placed where vent will be blocked. Nor will the unit be covered under standard warranty for excess moisture because the unit has been designed to prevent this possibility

PULLOUT STORAGE

- Pull-out storage units are finished on all sides and top. A top is recommended for a finished aesthetic
- Available for left and right-hand applications
- Includes one full-depth shelf on top, one fixed and 2 adjustable shelves and one coat hook
- Simplex power unit is standard
- 2 depths of 24" and 30" with 2 height options of 41" and 53"

COMPONENTS

- Component models will ship bulk packed when applicable

- **ELECTRONIC LOCKS**

- Locks ship separately and require field installation
- Available in black or silver
- No pull option on electronic locker models
- Lock is always installed vertically
- Electronic locks feature motorized locking engagement with manual knob
- Battery Life—3 Months usage on Surface Mount
- Micro-B USB port (Android cable) for emergency power jump and battery

charging

- Charging available with wired USB charger or mobile USB power pack
- Keypad locks out for 15 minutes after 5 invalid attempts
- 3 USER MODES
  - Resident employee mode—the passcode will not expire and can be re-used
  - Multi-user mode—in resident employee mode, additional users can be added with each user separately identified for higher security applications (e.g. drug, evidence lockers)
  - Shared use mode—suitable for day lockers/hotel safe
- 2 METHODS OF USE
  - Keypad operation
  - Wesko eLock App (must be downloaded to a smartphone)
- Admin passcodes can be managed by keypad commands (via program mode) or with the Wesko App in Admin mode
- MUST contact Customer Service for administrative passcodes

GROMMET LOCATION OPTIONS

Grommets are available for factory installation in worksurfaces in predetermined locations as shown below. Simply specify the desired grommet style and location in the model number sequence. Refer to page 361 for options.

Round grommets are also available for field installation; see page 755.

- **If specifying a grommet in the center location of a component worksurface, be sure there is clearance under the grommet opening so as not to conflict with undersurface components**

Worksurface grommet locations:

Excluding the J-Desk and the corner unit, distance to the center of the grommet is the same for the G1 round grommet, G11 racetrack grommet or the CUT-G17 option.

Excluding the J-Desk and the corner unit, the same locations are available for the round or racetrack grommet and the cutout option.

- Wire manager locations: back, right or left, or back and left, or back and right; see page 361 for wire manager colors and upcharge
- When ordering a wire manager, a wire manager filler can be ordered separately; see page 554
- Worksurfaces can be ordered in 1/16" increments in depth and/or width to next smallest available size at no upcharge
- When ordering a worksurface with a size modification, specify desired depth and/or width
- For use with 23" or 29" deep pedestals
- Worksurfaces up to 72" wide can be used for table desking applications
- When using C-leg bases in a table desking application, left or right grommet locations will interfere with C-Leg
- To provide additional worksurface support when using in table desking applications, see undersurface support rails on page 550
- For undersurface wire managers, see page 765

PRODUCT SPECIFICATIONS

- Worksurfaces shipped with appropriate hardware by specifying worksurface type; see the specification guide for details
- Rim on all 4 sides of laminate and wood worksurfaces; unless a wire manager is specified then the rim would only be where the wire manager is not located
- Component worksurfaces can be used with assembled units
- Refer to page 362 for grommet locations; and page 361 for grommet options and upcharge
- Unsupported 1³⁄₁₆" worksurface spans should not exceed 48"; unsupported 1⁹⁄₁₆" worksurface spans should not exceed 60"; see page 550 for support options
- Refer to pages 741-784 for accessories
- If specifying wood, you must specify the same finish for all options

- TFL worksurfaces are 1⅛" thick
- Wire manager locations: back, right or left, or back and left, or back and right; see page 361 for wire manager colors and upcharge
- When ordering a wire manager, a wire manager filler can be ordered separately; see page 554
- Worksurfaces can be ordered in 1/16" increments in depth and/or width to next smallest available size at no upcharge
- When ordering a worksurface with a size modification, specify desired depth and/or width
- For use with 23" deep component pedestals
- To provide additional worksurface support when using in table desking applications, see undersurface support rails on page 550
- Worksurfaces up to 72" wide can be used for table desking applications
- For undersurface wire managers, see page 765

PRODUCT SPECIFICATIONS

- Worksurfaces shipped with appropriate hardware by specifying worksurface type; see the specification guide for details
- Rim on all 4 sides of laminate and wood worksurfaces; unless a wire manager is specified then the rim would only be where the wire manager is not located
- Component worksurfaces can be used with assembled units
- Refer to page 362 for grommet locations; and page 361 for grommet options and upcharge
- Unsupported 1⅜" worksurface spans should not exceed 48"; see page 550 for support options
- Refer to pages 741-784 for accessories
- If specifying wood, you must specify the same finish for all options

- For use with 23" deep pedestals
- Grain direction runs front-to-back
- Intended to be used when building an L or U configuration utilizing component worksurfaces
- For worksurfaces with grain direction running left-to-right, refer to pages 468-471
- To provide additional worksurface support when using in table desking applications, see undersurface support rails on page 550
- For undersurface wire managers, see page 765

PRODUCT SPECIFICATIONS

- Worksurfaces shipped with appropriate hardware by specifying worksurface type; see the specification guide for details
- Rim on all 4 sides of laminate and wood worksurfaces; unless a wire manager is specified then the rim would only be where the wire manager is not located
- Component worksurfaces can be used with assembled units
- Refer to page 362 for grommet locations; and page 361 for grommet options and upcharge
- Unsupported 1⅜" worksurface spans should not exceed 60"; see page 550 for support options
- Refer to pages 741-784 for accessories
- If specifying wood, you must specify the same finish for all options

- Box drawers have full extension slides with ball bearing rollers
- All suspensions have a lifetime warranty

FILING

- See filing capabilities below

LOCKING

- Black and silver lock cores are available
- Key Random means lock cores/keys are randomly (1-5) picked and factory installed in unit
- Key Specific means you can pick any number (1-200) for black or silver lock core/key. Must specify the lock core model separately; not factory installed and will ship separately
- Specify a change key to remove and change lock cores
- To order key specific lock cores, change keys, and master keys, reference page 750

CONSTRUCTION

UNDERSURFACE STORAGE

- Outer chassis is a single piece U-case of 22-gauge cold-rolled steel
- Inner components consist of O-frame of 20-gauge cold-rolled steel

FREESTANDING LATERAL FILES/WARDROBE

- Outer chassis consists of 22-gauge cold-rolled steel
- Lateral file top is mechanically fastened

ARRANGEMENT MODEL NUMBERS

- Specify quickly and accurately using WaveWorks Metal Arrangement model numbers; see pages 564-587
- Arrangement models include all the components required to assemble the unit
- All components will ship separately

FREESTANDING LATERAL FILES

- Dual-interlock system ensures only 1 drawer may be opened at a time

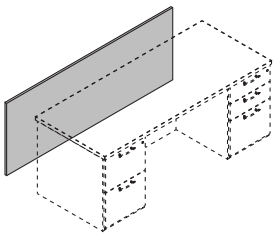
MODESTY PANELS

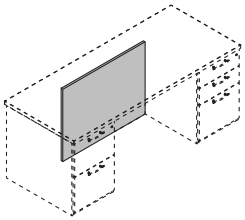
FULL OVERLAY MODESTY PANELS - METAL

- Main modesty panels are used in conjunction with component worksurfaces to create modular units, and specified to create a recessed modesty panel



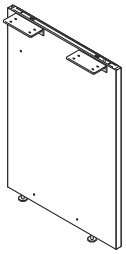
KNEESPACE MODESTY PANELS - METAL

- Gap between top of modesty panel and underside of worksurface is 1½"; gap between bottom of modesty panel and floor is 3";
- Modesty panel not applicable for attachment to suspended pedestals



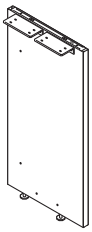
FULL END PANEL

- Designed for securement to modesty panel
- Intended use for single pedestal desks/credenzas



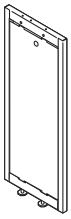
HALF END PANEL

- Designed for securement to modesty panel
- Utilize on all corner surfaces with cylinder leg and for continuous surface connections when needing additional support



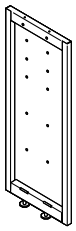
SUPPORT PANEL

- Designed for securement to modesty panel
- Utilize on 36" corner worksurfaces only with cylinder leg and for continuous surface connections



RETURN SUPPORT PANEL

- Designed for securement to modesty panel
- Utilize 1 return support panel for returns
- Utilize 2 return support panels for bridge units
- Use WW0827SRM to create 24" deep return
- Use WW1227SRM to create 30" deep return



CORNER POST

- Creates corner unit utilizing modesty panels
- Designed to secure modesty panels to corner unit
- Corner post must be used with modesty panels

PRODUCT SPECIFICATIONS

HORIZONTAL WALL RAIL AND FACEPLATE

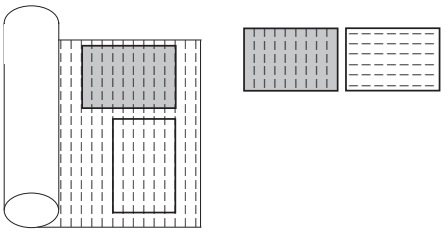
- Wall rail and faceplate are a powder coated aluminum extrusion
- Available in lengths of 72" and 144"
- Wall rails come in sets of 1 or 2 and include faceplate and alignment brackets
- Wall rails can also be ordered without faceplates
- When attaching worksurfaces to the wall rail without the use of tack board, marker board, or slat wall inserts, wall rail can be ordered without the faceplate
- Faceplate snaps onto wall rail to secure marker board, tack board and slat wall inserts in place; Inserts can be removed or replaced without removing wall rail
- Faceplate conceals alignment brackets, fasteners and provides a clean aesthetic look
- Wall rail is mounted horizontally providing tie in to appropriate load bearing studs
- Alignment bracket is required to align 2 adjacent sections of wall rail and is included with wall rails
- Alignment bracket is hidden from view once installation is complete
- Wall rails can be cut to size in the field
- WaveWorks and Epic worksurfaces can be attached to wall rails with worksurface brackets
- Worksurfaces that are attached to the wall rail can be ordered with or without a wire manager; Worksurfaces with a wire manager have a flexible PVC trough that allows cords and cables to be routed along the back edge or sides of worksurface

MARKER BOARD INSERTS

- Marker board inserts have erasable writing surface and are available in HPL or magnetic porcelain models
- Marker board inserts are available in white only
- HPL marker board and tack board insert models can be scribed in field
- Marker board, tack board and slat wall inserts include 2 trim channels

TACK BOARD INSERTS

- Tack board insert is available in fabric, see page 610 for fabric options
- Shaded rectangle portrays a railroaded tack board



SLAT WALL INSERTS

- Slat wall inserts are powder coated aluminum
- Slat wall inserts offer flexibility in placement of work tools; Combo slat wall inserts offer a slat wall insert combined with a tack board insert providing a multi-functional area and is an economical alternative when overhead storage will be used

ORGANIZER SHELF INSERTS

- Veneer organizer shelf inserts are plain sliced slipmatched cherry (Amber, Autumn, Mocha, Truffle) or maple veneer (Brighton, Caramel, Honey, Natural), plain sliced bookmatched walnut veneer (Clear Walnut, Cordovan, Judicial), quarter cut walnut veneer (Almond, Portobello, Sable), or quarter cut oak veneer (Sonoma).
- When specifying Clear Walnut, a clear coat finish, the natural wood characteristics of walnut veneer are visible. These characteristics include, but are not limited to, color and woodgrain variation
- All Veneer surfaces feature a semi-open pore matte finish

EXHIBIT TV MOUNT INSERT

- Single TV Mount included with laminate or veneer inserts
- Dual TV Mount available as an option on 60" inserts for additional upcharge

TRIM CHANNELS

- Quantity of 2 is standard with each board/insert
- Available in powder coat paint or fabric
- Provides an expansion joint, vertical cable manager attachment and compensates for out-of-plumb walls
- Trim Channels can be ordered separately for boards/inserts that have been scribed in the field

FULL END TRIM

- Full end trim is steel and powder coated
- Full end trim finishes the end of a run and connects the top and bottom wall rail

SINGLE END CAP

- Single end cap is steel and powder coated
- Single end cap finishes the end of a single wall rail by capping off the wall rail, perfect for when a wall rail is used without inserts and a faceplate

VERTICAL CABLE MANAGER

- Vertical cable manager attaches between the insert and trim channel
- Conceals and allows for power cords to be managed and routed from overhead to outlet

VERTICAL CABLE MANAGER FOR TV MOUNT INSERT

- Vertical Cable Manager attaches to the Exhibit TV Mount Insert
- Conceals and allows for power cords to be managed and routed from TV to outlet

WORKSURFACE BRACKETS

- Exhibit worksurface brackets attach worksurfaces to lower wall rail
- A worksurface bracket is required every 48" along back edge of worksurface
- Worksurface bracket is anodized aluminum

PLANNING TIPS

- Wall rails can be mounted at any height if not utilizing with WaveWorks or Epic vertical storage units
- Consider the worksurface load when planning support; For worksurfaces that will hold office equipment, such as printers and copiers, additional support other than standard worksurface brackets is recommended
- Undersurface storage and pedestals satisfy both storage and support needs
- Reconfiguring existing worksurfaces may require new supports or brackets
- When worksurfaces meet end-to-end, a support panel or undersurface storage is required for additional support of the front edge
- Perpendicular worksurfaces can use flat brackets and worksurface brackets to provide adequate support from 1 surface to the other at the worksurface joint
- Worksurface brackets and supports can be positioned anywhere along the worksurface without the limitations of pre-drilled or predetermined locations
- Knife rim adds 1½" per side to worksurface depth. Knife rim is not recommended on lower storage as it affects user's kneespace
- Consider where you specify a worksurface with Worksurface wire manager. When attached to Exhibit lower wall rail, do not use at the end of run for a cleaner aesthetic
- Tack boards may be field scribed to match Epic knife rim worksurface depth

EXHIBIT

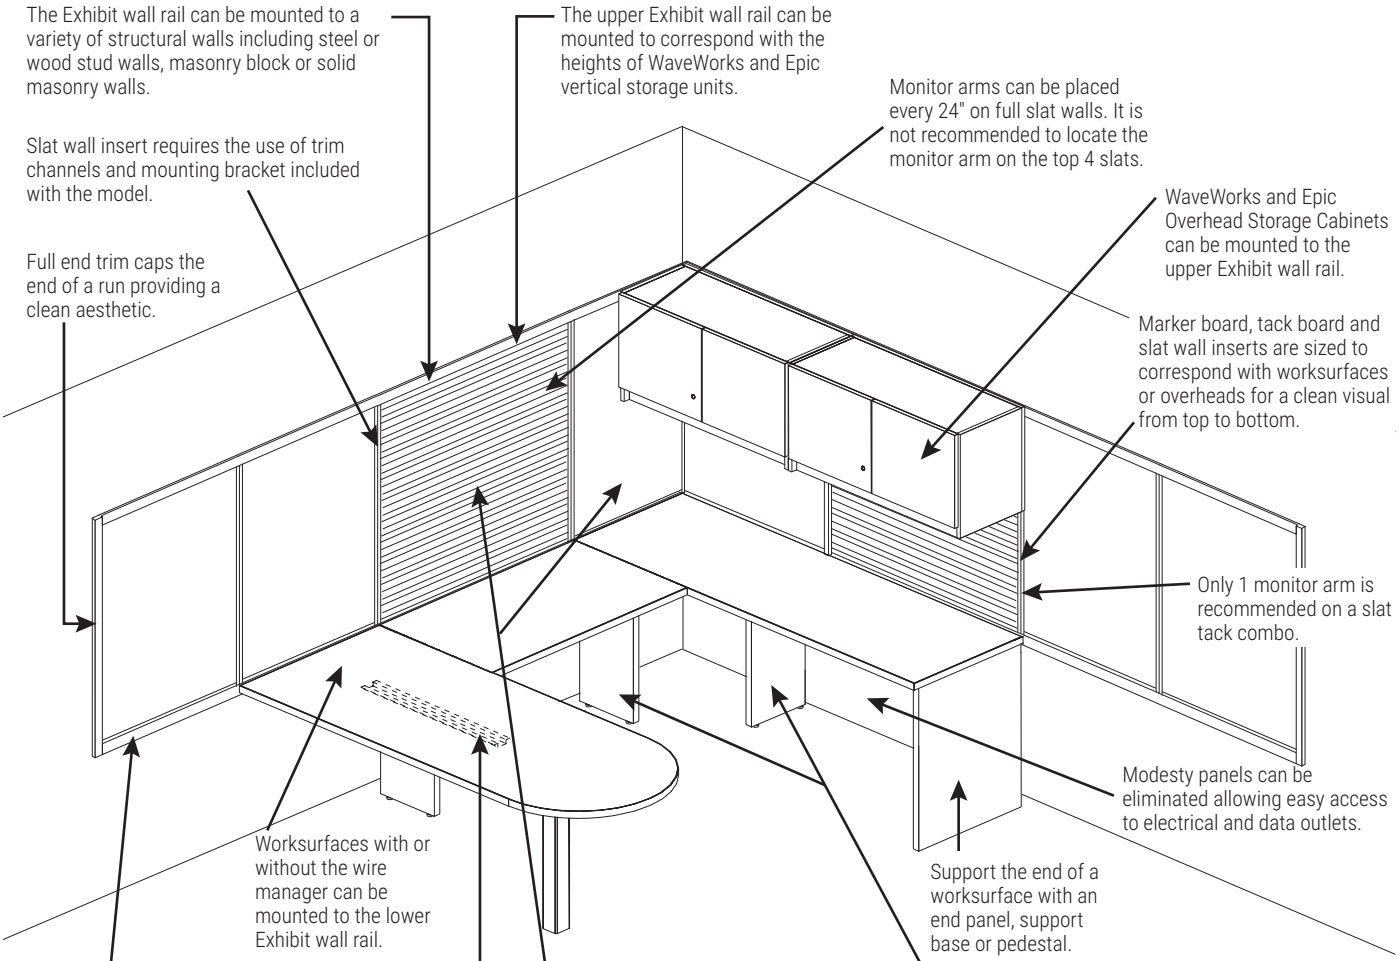
OVERVIEW

Exhibit is a series consisting of a horizontal rail, marker board, tack board, and slat wall inserts, and work tools.

Exhibit can be used in numerous applications. Here are a few examples of how it can be used with National Office Furniture products.

EXHIBIT WITH WAVEWORKS AND EPIC MODELS

The Exhibit rail is a horizontal rail that attaches to walls to accommodate WaveWorks and Epic worksurfaces and components. Attaching worksurfaces directly to the wall rail allows the reduction of modesty panels and opens the space for a clean aesthetic.



APPLICATION GUIDELINES

FASTENERS

- Fasteners must tie in directly to the substructure of a structural wall for proper attachment of Exhibit wall rail. National defines a structural wall as a load bearing wall constructed of materials such as poured concrete, concrete block, or studs

MINIMUM REQUIREMENTS

- Wood studs must be nominal 2" x 4" minimum
- Metal studs must be "C" channel, 20 gauge minimum thickness
- Metal or wood studs must be on centers no greater than 24" and have a maximum height of 14' restrained at floor and ceiling
- Interior walls must be designed to resist not less than a force of 5 lbs. per sq. ft. applied perpendicular to the wall. The deflection of such walls under a load of 5 lbs. per square foot shall not exceed 1/240 of the span for walls with brittle finishes and 1/120 of the span for walls with flexible finishes (per International Building Code sections 1604.4 and 1607.13)
- Exhibit wall rail may not extend more than 6" beyond the last solid attachment point
- Minimum width of Exhibit wall rail that can be attached to a wall is 16" mounted to studs 16" apart
- If an overhead is being mounted, the minimum width for Exhibit is 30" with the Exhibit wall rail being centered on studs 24" apart, so as not to extend more than 6" beyond the last solid attachment point

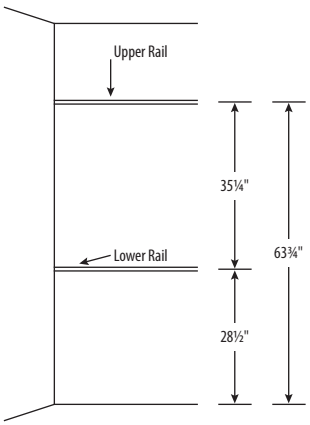
RECOMMENDED FASTENERS

- Selection and purchase of the proper attachment fasteners for your wall conditions is the responsibility of the installer

Type and Size	Description
Steel Studs (½" to ¾" drywall) Hilti® Toggler® anchor toggle bolts, ¼"–20 x 2" grade 5 bolts	
Wood Studs (¼" to ½" drywall) Meets or exceeds ANSI/ASME B18.6.4 and SAE J933. Pan head sheet metal screw	10-2 PHPMS
Solid Masonry Crown Bolt lag shields ¼" x 1½" Buildex Tapcon concrete anchor screw ¼" x 2¾"	
Masonry Block Hilti Toggler anchor toggle bolts, ¼"–20 x 2" grade 5 bolts Crown Bolt lag shields ¼" x 1½" Buildex Tapcon concrete anchor screw ¼" x 2¾"	

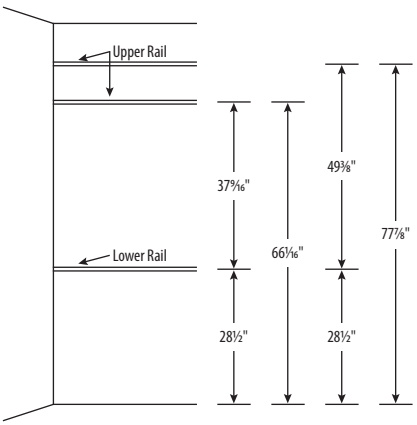
- Actual mounting height can be varied to meet specific needs; however, undersurface storage height must be considered
- Variations in the floor surface (peaks and valleys) should be considered, especially where horizontal placement is critical
- Exhibit wall rail extends ⅞" from the wall. This dimensional loss should be considered when space planning for components, when Exhibit wall rails are being used on 2 or more walls of a space
- Select worksurfaces and inserts can be field scribed to fit space
- In fixed wall Exhibit applications, choose your insert height based on your specific application or height of corresponding WaveWorks vertical storage. Consider the height of the cabinet and clearance between the bottom of the overhead and the worksurface

34" Tall Inserts



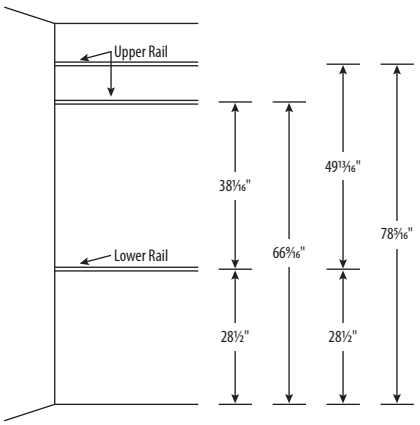
36" and 48" Tall Inserts

Compatible with WaveWorks and Epic 68" and WaveWorks 79" High WW Models



37" and 49" Tall Inserts

Compatible with WaveWorks 69" and 80" High WWN Models



- Conference and training rooms commonly use 49" tall inserts, but with Exhibit, you can use any of the 5 heights to achieve the customer's needs.

WALL

- Trim when using full insert

BASES AND SUPPORT

SPAN BETWEEN TABLE LEGS

For leg-based applications, the maximum recommended span of an unsupported 1⅜" thick worksurface is 48" between legs. The maximum recommended span of an unsupported 1⅞" thick worksurface is 60" between legs. Additional support is recommended for deflection for longer distances. When using mobile legs with tops that are 60" and greater, undersupport rails are recommended.

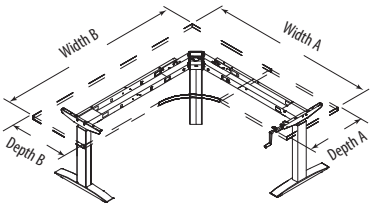
"L" ADJUSTABLE HEIGHT BASES

"L" ADJUSTABLE HEIGHT BASE AND WORKSURFACE MATRIX



- The "L" adjustable height base, extended corner component worksurface, and the rectangular component top worksurfaces are all specified separately; base can be used as right handed or left handed
- Extended corner can be ordered as left hand or right hand component tops
- Extended corner component tops should be configured as an extension so there are worksurface mounting brackets
- Rectangular component tops must be ordered in the vertical grain direction
- Epic or WaveWorks component worksurfaces can be utilized with the "L" adjustable height bases
- Rectangular component knife tops must be K1 models
- Not recommended to modify the size of the top from the standard size
- The following matrix shows what size extended corner worksurface and rectangular component top should be specified when ordering the Adjustable Height "L" Base

"L" CONFIGURATION WAVEWORKS WORKSURFACES

WAVEWORKS PRODUCT SPECIFICATIONS

WORKSURFACE

- Laminate surfaces are 1⅜" or 1⅜" HPL (high pressure laminate) or 1⅛" TFL (thermally fused laminate), and feature a 3mm PVC rim or 6 veneer rim options
- Veneer surfaces are 1⅜" plain sliced slipmatched cherry (Amber, Autumn, Mocha, Truffle) or maple veneer (Brighton, Caramel, Honey, Natural), plain sliced bookmatched walnut veneer (Cordovan, Judicial), quarter cut walnut veneer (Almond, Portobello, Sable), or quarter cut oak veneer (Sonoma). All veneer surfaces feature a 3mm wood rim

FINISH APPLICATION

- All Veneer surfaces feature a semi-open pore matte finish
- When specifying Clear Walnut, a clear coat finish, the natural wood characteristics of walnut veneer are visible. These characteristics include, but are not limited to, color and woodgrain variation

"L" CONFIGURATION EPIC WORKSURFACES

PRODUCT SPECIFICATIONS

- Worksurfaces shipped with appropriate hardware by specifying worksurface type; see the specification guide for details
- Extended corner worksurfaces should be configured as an extension so there are worksurface mounting brackets
- Rim on all 4 sides of laminate and wood worksurfaces; unless a wire manager is specified then the rim would only be where the wire manager is not located
- Refer to page 362 for grommet locations; and page 707 for grommet upcharge
- If specifying wood, you must specify the same finish for all options

DESKS+WORKSTATIONS+BENCHING+TABLES

Accommodate new ways of working by utilizing your existing products and blending new solutions into workspaces

Create space division by adding a screen to your workspace. Select the screen style that best fits your situation: set on surface, edge mount, clamp mount, full metal edge mount, or freestanding

- Select style and height of screen based on floorplate layout and occupancy density. Taller screens are appropriate when employees must be situated face-to-face or are near high traffic areas
- Create additional shielding by adding set on surface screens to stations that already have existing edge mount screens
- Screens are available in a variety of materials. Be sure to specify bleach cleanable fabrics or hard surfaces such as acrylic
- Bulk pack pricing available – save money and reduce onsite packing materials by choosing this option. Contact our By Design Product Modifications Team for a price quote.

Keep in mind that it is essential to balance the need for privacy and protection with the overall feeling of the workplace environment.

Note: If you require screens that move with a height-adjustable worksurface, you will have to remove center screens. National recommends a 1" clearance on all sides to avoid pinch point hazards

CHAIR FEATURES AND ADJUSTMENTS

National chairs offer various levels of adjustability. The diagrams below help you to easily understand the many options available so you can select a chair that best fit your needs.

ADJUSTABILITY FEATURES

A **Pneumatic Height Adjustment:** Allows the user to adjust the chair height quickly and easily.

B **Back Height Adjustment:** Allows the user to position lumbar support for desired comfort.

C **Seat Depth Adjustment (Seat Slide):** Allows the user to move the seat forward and back.

D **Tilt Tension:** Allows the user to control the amount of recline resistance.

E **Tilt Lock:** Allows the user to lock the back in upright position or release it to recline.

CONTROLS

F **Swivel Mechanism:** Chair swivels 360° only. Chair does not recline.

G **Swivel Tilt Mechanism:** Chair swivels 360° and back and seat recline simultaneously.

H **Knee Tilt Mechanism:** Chair swivels 360° and back and seat recline simultaneously. The pivot point is forward allowing user's feet to remain planted on the floor when reclining.

I **Synchro-tilt Mechanism:** Chair swivels 360° and allows the back and seat to move in a synchronized 2.3:1 ratio motion.

ARM OPTIONS

J **Fixed Arm**

K **Adjustable Arms:** Arms can be adjusted in height and width to best fit the user.

L **Fully Adjustable Arms:** Same adjustability as adjustable arms and also allows the arm pad to rotate.

M **High Performance Arms:** Same adjustability as adjustable and fully adjustable arms but also has depth and width adjustment on the arm pad.

WOOD FINISH COLOR MATCHING

Each piece of natural veneer offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. National carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

FABRIC COLOR MATCHING

National will always ship a satisfactory commercial match on fabric. Because of industry dye-lot variation, colors may not match exactly.

FIRE RETARDANT PRODUCTS

All National seating currently meets California Technical Bulletin #117-2013. For California Technical Bulletin #133 requirements, contact customer service for lead times and pages 9-13 for applicable fabrics. For TB133 pricing, go to NationalOfficeFurniture.com/TB133

Fabric listing for "no added" fire retardant fabrics can be found at NationalOfficeFurniture.com

SEATING FINISH

National's seating finishes can withstand cleaning solutions that include bleach, hydrogen peroxide (Virox), alcohol (CaviWipes, hand sanitizers), quaternary ammonium compounds (Virex, Ecolab A-456 II, Lysol,) and phenols (Wex-cide) when they are used in accordance with the manufacturer's label instructions.

CLEANING FABRICS:

CLEANING CODE S

- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

CLEANING CODE WS

- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

CLEANING CODE W

- Use water-based cleaning agents or foam.
- Cleaning by a professional furniture service is recommended.

CLEANING LEATHER:

REGULAR CLEANING

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

DEEP CLEANING

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Pat dry.
- Reference leather card for more information.

FABRIC CHARACTERISTICS

Different fabrics/constructions will respond better than others to specific seating applications. Certain fabrics/constructions are more prone to relaxing over time and can demonstrate characteristics such as wrinkling, pilling, fuzzing, and puddling. Some upholsteries may experience dye transfer (clothing dyes transfer to the seating fabric). This does not mean that the fabric or application is deficient, but rather it is an inherent characteristic of that fabric or application and is considered normal behavior.

LEATHER CHARACTERISTICS

Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristics of leather. Leather may experience dye transfer (clothing dyes transfer to the leather). This does not mean that the leather or application is deficient, but rather it is an inherent characteristic of that leather or application and is considered normal behavior.

NATIONAL SEATING FABRIC GUIDELINES

TEXTILE APPLICATION GUIDELINES

National has listed textile application guidelines for each seating series. These guidelines are intended to help educate you of certain fabric characteristics. **Please make a point to review these guidelines when ordering National seating with National fabrics.** Application of the upholstery will be depicted as on the swatch card unless otherwise instructed on the order.

TEXTILE APPEARANCE GUIDELINES

Please note that these guidelines are here to help you have the best looking product that National can provide to you. Guidelines 1–4 are simply explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

1 Due to thickness and or stiffness this textile may result in gathers and puckers around corners, contours, and certain seams.
2 Patterns are considered matched directional; however, decorative stitching, tufting/buttons, seams, and seat to back on corner, wedge, and diagonal units may not align due to pattern configuration.
3 Textile with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
4 Mohair, velvet, and chenille may be easily bruised or have the potential of crooked seams due to the heavy nap and flip.

TEXTILE RESTRICTION GUIDELINES

Fabrics associated with guidelines 5 and 6 prevent us from upholstering the applicable chair series.

5 This textile cannot be used for glue application. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing or glue bleeding through the fabric.
6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.
7 This textile has an uneven/irregular surface and cannot be used with topstitch upholstering. The topstitch disrupts the visual appearance of the upholstery. You can contact By Design to see if it is possible to remove the model's top stitch in order to use the fabric.

ALLIANCE PROGRAM OVERVIEW

National has developed joint programs with Arc-Com, Carnegie, Designtex, Maharam, Mayer, Momentum, Stinson and Ultrafabrics to offer you quality office seating with exciting lines of designer upholsteries. This program enables you to issue just 1 purchase order, providing simplified ordering and the most convenient, yet complete, seating choices available from a single source. All Alliance patterns meet TB117-2013.

APPLICATION

Application of the Alliance Program upholstery will be depicted as on the memo sample or website. Toss bean bags are an exception as they are always upholstered up the roll. If a different application is desired the pattern will need to be custom quoted.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as COM.

LEAD TIMES/AVAILABILITY

Models specified with Alliance Program fabrics will be acknowledged with standard lead times based on the supplier's delivery schedule. Exceptions occur when extended lead times apply. Each supplier reserves the right to discontinue patterns and colors. National will not be held responsible for suppliers discontinuing patterns/colors or when minimum requirements apply. Contact customer service for availability before finalizing orders.

WARRANTY

Alliance Program fabrics are non-standard and are not covered under our warranty.

PRICING

Alliance Program graded prices are based on cost of material. Repeat is also accounted for and no additional charges required.

FABRIC AND CONSTRUCTION

Different fabric constructions will respond better than others to specific seating. Certain fabric constructions are more prone to relaxing and may demonstrate characteristics such as wrinkling, pilling and snagging. Some upholsteries may experience dye transfer (color transfer to the seating fabric.) This does not indicate that the fabric construction is deficient, but rather it is an inherent characteristic of that fabric construction and is considered normal behavior.

Important: The information provided was the most current information available at the time this price list was printed. Contact customer service for availability before finalizing orders.

TB133

California Technical Bulletin No. 133 – Flammability test procedure for seating furniture used in public occupancies. National has pre-approval for TB133 chair/alliance fabric combinations. Availability of TB133 on specific chair/alliance fabric combinations found at NationalOfficeFurniture.com/Alliance. Each listings denote TB133 applicability. Even though we try to present as accurate as possible, the supplier may change content ...without our knowledge. Customer needs to confirm information on this listing matches the content information with partner. If no test data is available for a particular fabric, the TB133 order will not be allowed. These pre-approved combinations can be ordered as standard product – no custom quote required.

To order seating to meet TB133 fire code, specify an "F" at the end of the model number.

If a fabric/chair has not been burn tested, the customer has the option of pricing for the testing will be $1,300 list, including shipping and services plus the chair price (test sample). TB133 testing requires customer will require a custom quote. The fabric/chair burn will determine whether future orders can be ordered as standard or custom quotes. Each instance may vary.

For alliance pricing, go to NationalOfficeFurniture.com/TB133

Certificates of assurance are available upon request. A letter of assurance verifies that a TB133 test was conducted on a combination of chair/fabric comparable to the requested chair/fabric.

COM (CUSTOMER'S OWN MATERIAL)

All seating can be upholstered with appropriate material furnished by the customer. All COM/COL must meet applicable codes and regulations, including TB117-2013, California Assembly Bill 2998, and California Proposition 65. For more information on California Proposition 65 and AB 2998 go to https://www.p65warnings.ca.gov/products/furniture-products and https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201720180AB2998, respectively. By selecting COM/COL, customer certifies that the material meets such codes and regulations. Customer is solely responsible for compliance and may contact a) fabric manufacturer to confirm certification or b) assistance from National Office Furniture.

National Office Furniture strives to create upholstered products with no intentionally added fire retardants. Written confirmation is required confirming that fabric or leather (COM/COL) provided by the customer does NOT contain any added fire retardant chemicals, preferably from the material manufacturer. National truly appreciates your understanding and support of this commitment. If you have any questions or comments, please contact your customer support representative(s).

Prices are listed under grade 2.

Yardage requirements shown in this list are based on the use of non-directional fabric 54" wide and the fabric being cut "up the roll." If the COM fabric is to be railroaded, please contact customer service for revised yardage requirements.

- When ordering 10 or more COM chairs, consult customer service for exact yardage requirements.
- Reference the end of each series for specific repeat COM yardage requirements.
- Directional covers, such as stripes, patterns, and plaids may not meet your satisfaction due to contoured shapes and tufting of some models. Should you require such a selection, orders are not subject to return. If in doubt, contact customer service prior to placing the order.
- Please refer to textile application guidelines listed on page 16 or the COM Approval Search/listing on NationalOfficeFurniture.com

CUSTOMER'S OWN LEATHER (COL)

National is pleased to cooperate with COL selections whenever this special need arises. Customer's own leather specifications for National seating shown within this price list are based on an average hide size of 45-50 square feet. Consult customer service for requirements for other hide sizes. Customer is responsible for the leather meeting the appropriate California TB117 Standard. Prices are listed under grade 3.

- Please note, leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.
- All square footage requirements are based on usable footage; the shape of a hide and the usable, clean footage may make it necessary for us to request more leather after COL is received.
- Calf hides must be at least 30 square feet of clean and usable matching hides. When specifying calf hides, add 15% to COL requirements shown in the price list.

COM DISPOSAL

- Leftover COM from an order is held for 4 weeks
- COM not tied to an order is held for 3 months

COM/COL EVALUATION

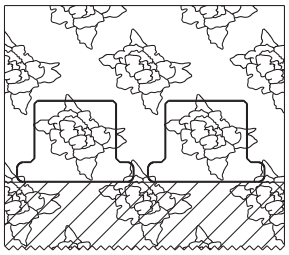
National reserves the right to inspect, approve, or reject any COM/COL. National approval signifies only that such textile/leather can be applied to the products for which intended. Such approval does not constitute any responsibility, liability, or warranty on the part of National as to appearance, behavior, durability, or tailoring of COM/COL.

COM DECORATIVE PATTERNS

- Yardage requirements are greatly affected by not only size of repeats, but also by the print or pattern.
- National cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.
- Refer to particular model in price list to find yardage required for pattern.

The line drawing below depicts 2 seat cushions in necessary/proper placement on a piece of decorative fabric. Please note the unusable fabric.

It is not always appropriate to place a seat pattern at the edge of the fabric. Due to this circumstance, please include an additional ½ yard per order.



COM DIRECTIONAL FABRICS

- Some COM fabrics are considered directional that may not be considered directional by the fabric supplier, due to the upholstering process used by National.
- Application of COM upholstery will be depicted as on the COM supplier memo sample or website. Toss bean bags are an exception as they are always upholstered up the roll. If a different application is desired the pattern would need to be custom quoted.
- Arc-Com/Carnegie/Maharam/Mayer/Momentum/Stinson/Ultrafabrics Alliance upholsteries will be applied as depicted on the supplier memo sample or website. Toss bean bags are an exception as they are always upholstered up the roll. If a different application is desired the pattern would need to be custom quoted.

TB133

California Technical Bulletin No. 133 – Flammability test procedure for seating furniture used in public occupancies. National provides pre-approval for TB133 chair/COM fabric combinations. The availability of TB133 on specific chair/alliance fabric combinations can be found at NationalOfficeFurniture.com/COMApprovalSearch. Even though we try to keep this document as accurate as possible, the supplier may change contents, finishes, etc...without our knowledge. Customer needs to confirm that the information on this listing matches the content information from the COM supplier. If no test data is available for a particular fabric/chair combination, the TB133 order will not be allowed. These pre-approved alliance fabrics can be ordered as standard product – no custom quote required.

To order seating to meet the TB133 fire code, specify an "F" at the end of the model number (Ex: N59AAF).

If the COM material you want is not in the COM database, please submit a sample per the instructions outlined on page 18.

If a fabric/chair combination has not been burn tested, the customer has the option of having it tested. Pricing for the testing will be $1,300 list, including shipping for testing services plus the chair price (test sample). TB133 testing requested by the customer will require a custom quote. The fabric/chair burn test results will determine whether future orders can be ordered as standard product or custom quotes. Each instance may vary.

For TB133 COM list pricing, go to NationalOfficeFurniture.com/TB133

Letters of assurance are available upon request. A letter of assurance verifies that a TB133 test was conducted on a combination of chair/fabric comparable to the requested chair/fabric.

STITCH-IT PRODUCT SPECIFICATIONS

APPLICABILITY GUIDELINES

- Toss pillows can only be stitched on 1 side
- If stitching on front and back of unit, Stitch-it patterns may not match at seams
- Patterned fabrics are not recommended; if customer chooses a patterned fabric, we cannot guarantee that the Stitch-it design will match the fabric pattern
- Mohair, velvet, and chenille fabric are not recommended with top stitching as the fabric may be easily bruised or have the appearance of crooked seams due to the heavy nap and flip

STITCH-IT THREADS

- When Matching thread option is selected, a thread color will be used that blends with the fabric
- Thread colors listed below are for the Stitch-it standard program, other colors are available through the By Design Product Modifications Program

GALLERY LAMINATE PROGRAM

PROGRAM DETAILS

The Gallery Laminate program is an on-trend collection curated from trusted laminate suppliers. As we know, trends come and go, sometimes quite quickly. When we see colors/patterns losing industry presence, we will delete and replace with new styles. Gallery Laminates that remain popular could possibly transition into the National Standard Laminate program.

- HPL, TFL, and PVC rims are included in the program
- For each Gallery selection made, an upcharge will be applied, based on the grade
- National orders and procures all Gallery Laminates
- Gallery Laminate program is not available on all products within our offering
- Due to Gallery Laminate size availability, some restrictions may occur. This is noted with bullets under impacted model numbers within the price list

GALLERY LAMINATE OPTIONS

GRADE 1 – 5% upcharge
G1001 Citadel
G1011 Pepperdust

GRADE 2 – 6% upcharge
G1002 Planked Raw Oak
G1003 Evening Notte
G1004 Kirsche
G1005 Midnight Run
G1006 Sepia Walnut
G1007 Serotina
G1008 Timeless
G1009 White Nebbia
G1012 Phantom Ecru

GALLERY ORDERING PROCESS

- Order Gallery Laminate in the same manner as ordering National Standard Laminate
- Six week lead time
- Same warranty as National Laminate

UPCHARGE DETAILS

The percentage upcharge is applied to each Gallery Laminate selection and the total is added to the original list price. Gallery Laminate Grade 1 incurs a 5% upcharge, while Gallery Laminate Grade 2 incurs a 6% upcharge. Please note, the same model may incur multiple upcharges based on the total number of Gallery Laminate locations selected on the specific model. Refer to examples below for further details.

UPCHARGE EXAMPLES

N93HTL3RR Fringe Bistro Table, Laminate Back, Right Table Arm
Bistro Table Laminate – G1008 Timeless (Grade 2) = 6% upcharge
Tablet Arm Laminate – G1008 Timeless (Grade 2) = 6% upcharge
Back Laminate - G1008 Timeless (Grade 2) = 6% upcharge
This example incurs an 18% list upcharge as Gallery Grade 2 Laminate was selected within 3 areas of this model

N93HTL3RR Fringe Bistro Table, Laminate Back, Right Table Arm
Bistro Table Laminate – 478 Platinum Grey (Standard NOF) = no upcharge
Tablet Arm Laminate – G1011 Pepperdust (Grade 1) = 5% upcharge
Back Laminate - G1003 Evening Notte (Grade 2) = 6% upcharge
This example incurs an 11% list upcharge as Gallery Grade 1 and Gallery 2 Laminate was selected within 2 areas of this model

N93TEN2724L Fringe End Table
Table Laminate - G1005 Midnight Run (Grade 2) – 6% upcharge
This example incurs a 6% list upcharge as Gallery Grade 2 Laminate was selected within 1 area of this model

N86PD1TLP Eklund Freestanding Nook
Tablet Arm Laminate- G1001 Citadel (Grade 1) = 5% upcharge
Console Laminate- G1001 Citadel (Grade 1) = 5% upcharge
This example incurs a 10% list upcharge as Gallery Grade 1 Laminate was selected within 2 areas of this model

CUSTOMER SPECIFIED LAMINATE (CSL) PROGRAM

PROGRAM DETAILS

National understands that some orders have specialized needs regarding laminate specifications. In order to better service our customers, National has partnered with suppliers to offer a CSL laminate program for **HPL worksurfaces only:**

- A **10% upcharge** applies to all CSL laminate orders
- National orders and procures all CSL customer specified laminates
- CSL program is not available on all laminate products within our offering
- Due to CSL sheet size availability, some restrictions may occur

CSL ORDERING PROCESS

- Laminate sheen level not to exceed 60º for maximum durability of worksurfaces
- Send purchase order and quantities to customer service
  Please include:
  1. Manufacturer's Name
  2. Laminate Name/Laminate Number
- Lead times may vary for certain laminates and quantities, contact customer service for details

CSL POLICY

- National reserves the right to decline a laminate which may not be suitable for application
- National assumes no responsibility for the durability, consistent coloration, or any other performance characteristic of a customer specified laminate

ARLINGTON

ARLINGTON PRODUCT SPECIFICATIONS

FRAME CONSTRUCTION

- Interior and exterior frame constructed of kiln-dried hardwoods, with joints double doweled and securely glued for maximum joint stability
- Tie screws are installed at all critical joints for added strength
- 48-E model side-to-side rails provide strength and mounting platform for the swivel tilt mechanism
- Guest conference models have seat joints supported with additional corner blocks secured with high tensile screws

SEAT AND BACK CONSTRUCTION

- High grade polyurethane foam covers high tension strip webbing for comfort
- 64X-GWXX back offers a high grade polyurethane foam covering a non-stretch suspension with an extra layer of suspension in the lumbar area for increased support

CONTROL MECHANISM/LIFT (48-EK)

- A standard knee tilt mechanism with a forward locking lever, features a heavy-duty adjustable tension spring for a variety of body sizes
- The standard pneumatic gas cylinder lift allows the seat to raise and lower 2½" and provides spring action for added comfort
- Fingertip adjustment is quick and easy

CONTROL MECHANISM/LIFT (48-ES)

- The standard swivel tilt control features a heavy-duty adjustable tension spring for a variety of body sizes. Made of heavy-duty steel, it operates on dual coil springs with self-lubricating nylon bushings and a quiet rubber stop cushion
- The standard pneumatic gas cylinder lift allows the seat to raise and lower 2½" and provides spring action for added comfort

BASE AND CASTERS

- A 5-prong, rigid steel understructure base ensures long life
- Caster posts fit directly into steel sleeves, greatly reducing caster socket failure
- A self-lubricating nylon hub liner is standard
- Decorative hardwood caps complement the chair design
- English hooded ball casters are standard

JURY BASE

- Pneumatic jury base
- Auto return swivel

GLIDES

- Guest models feature non-marring nylon glides

TUFTING

- Button tufting utilizes a metal prong unit pulled through both the foam and fabric, then inserted through a self-locking steel washer that is clinched for long life

TRIM NAILS

- Decorative antique brass trim nails are individually hand applied to the arm and seat base for a clean, tailored appearance

FINISH

- All finishes feature a catalyzed top coat which resists denting, peeling and reactions to chemicals
- Can be cleaned with a damp cloth
- When specifying Brighton, Natural, and Sonoma finish, variation in color is acceptable due to the nature of wood characteristics

WOOD SPECIES

- Maple

- Arms are die-cast aluminum available in polished aluminum or powder coated Cinder, Platinum Metallic and Satin Nickel Metallic
- Arm pads are soft black polyurethane

GUEST MODELS

- Arms are die-cast aluminum available in polished aluminum or powder coated Cinder, Platinum Metallic and Satin Nickel Metallic

CONTROL MECHANISM—KNEE TILT

- The standard knee tilt mechanism features a heavy-duty adjustment tension spring for a variety of body sizes and minimal rise of front seat edge; this allows the users feet to remain on the floor when the chair is in the reclining position
- The combination gas lift/tilt lock lever allows dual functions with a simple in/out movement for lockout and an up/down movement for height adjustment
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4" and provides spring action for added comfort

CONTROL MECHANISM—SYNCHRONOUS

- Synchronous control allows the back and seat to move in a synchronized 2.3:1 ratio motion
- Free float feature allows the chair to tilt freely
- A side activated telescoping tension adjustment handle provides a comfortable way to adjust back tension to meet individual needs
- The back angle can be locked in 1 of 5 positions
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4¼" and provides spring action for added comfort

SEAT SLIDE

- Seat depth can be adjusted to 7 different positions within a 2½" range

BASE AND CASTERS

- Die-cast aluminum 5-prong base available in polished aluminum or powder coated Cinder, Platinum Metallic and Satin Nickel Metallic
- Black, hard double wheel casters, which work on multiple surfaces, are standard
- Black, soft double wheel casters, for use on hard floors, are available at an upcharge

FINISH

- Wood models feature a catalyzed top coat that resists denting, peeling and reactions to chemicals
- Can be cleaned with a damp cloth
- When specifying Brighton, Natural, and Sonoma finish, variation in color is acceptable due to the nature of wood characteristics

WOOD SPECIES

- Hard maple

All Aurora models may be ordered to meet TB133 fire code.

To order seating to meet the TB133 fire code, specify an "F" at the end of the model number (Ex: N65AAPF).

ELOQUENCE PRODUCT SPECIFICATIONS—EXECUTIVE

SEAT AND BACK CONSTRUCTION

- 11-ply, 1 piece solid molded plywood shell forms the seat and back
- 3" of high density foam covers the seat and 2½" of high density foam covers the back

ARM CONSTRUCTION

- Constructed of exterior beech with doweled and barrel nut joints
- Arms are attached to the seat and back with metal L-brackets
- Available with black protective polyurethane arm caps for added durability

CONTROL MECHANISM/LIFT

- The standard knee tilt mechanism features a heavy-duty adjustment tension spring for a variety of body sizes and minimal rise of front seat edge; this allows the user's feet to remain on the floor when the chair is in the reclining position
- The combination gas lift/tilt lock lever allows dual functions with a simple in/out movement for lockout and an up/down movement for height adjustment

BASE AND CASTERS

- Wood base features a standard 5-prong, rigid steel understructure to ensure long life
- Caster posts fit directly into steel sleeves, greatly reducing caster socket failure
- Decorative hardwood caps complement the chair design
- Black, hard double wheel casters, which work on multiple surfaces, are standard
- Black, soft double wheel casters are available for use on hard floors; upcharge applies to this option

FINISH

- Features a catalyzed top coat that resists denting, peeling and reactions to chemicals
- Can be cleaned with a damp cloth
- When specifying Brighton, Natural, and Sonoma finish, variation in color is acceptable due to the nature of wood characteristics

WOOD SPECIES

- Beech

All Eloquence models may be ordered to meet TB133 fire code.

To order seating to meet the TB133 fire code, specify an "F" at the end of the model number (Ex: N85CACF).

For TB133 pricing go to www.NationalOfficeFurniture.com/TB133

Please consult customer service for applicable Arc-Com, Carnegie, Designtex, Maharam, Mayer, Momentum, Stinson, or Ultrafabrics fabric.

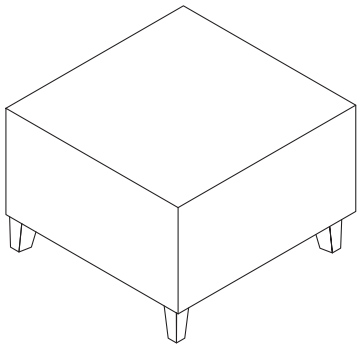
FRINGE TABLES PRODUCT SPECIFICATIONS



FRAME CONSTRUCTION

- Grade A slipmatched maple (Brighton, Caramel, Honey, Natural), or cherry veneer (Amber, Autumn, Cordovan, Judicial, Mocha, Truffle) or laminate with mitered corners
- Veneer features a semi-open pore matte sheen
- Wood legs finished with catalyzed top coat which resists denting, peeling and reactions to chemicals
- Can be cleaned with a damp cloth
- When specifying Brighton, Natural, and Sonoma finish, variation in color is acceptable due to the nature of wood characteristics

POWER GROMMET

- 3 power grommets available; specify cutout option and order electrical grommet model separately. See pages 639-640 for details and pricing
- Round black plastic grommet available

FUEL

FUEL PRODUCT SPECIFICATIONS

SEAT CONSTRUCTION

- 2½" of high grade polyurethane foam covers a solid contoured molded plywood seat panel for support and comfort

BACK CONSTRUCTION

- Injection molded polypropylene outer shell
- Blow molded polyethylene inner back shell designed with deep ribbing to provide extra support
- Backs feature 2½" of custom molded, controlled density polyurethane foam for consistency and good contoured support on all models
- Large and tall models feature solid molded plywood panels

BACK REST

- Back height can be adjusted by simply lifting up on the back
- The range of adjustment is approximately 2"

ARMS

- Loop arms have encased high strength steel uprights made of polyurethane

CONTROL MECHANISM—INTENSIVE USE

- Synchronous control allows the back and seat to move in a synchronized 2.3:1 ratio motion
- Free float feature allows the chair to tilt freely
- A side activated telescoping tension adjustment handle provides a comfortable way to adjust back tension to meet individual needs
- The back angle can be locked in 1 of 5 positions
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4¼" and provides spring action for added comfort

CONTROL MECHANISM—LARGE AND TALL MODELS

- Synchronous control allows the back and seat to move in a synchronized 2:1 ratio motion
- Free float feature allows the chair to tilt freely or be locked in the neutral position
- Standard pneumatic gas cylinder lift allows seat to raise and lower 4¼" and provides spring action for added comfort

BASE AND CASTERS

- Intensive use - Black, 5-prong fiberglass reinforced nylon base ensures long life
- Large and Tall - Feature a black, 27" 5-prong aluminum base tested using 4500 lbs. of force
- Hard, double wheel casters, which work on multiple surfaces, are standard

PERFORMANCE STANDARDS

- Intensive use models meet the Federal Intensive Usage Standard FED-STD 834
- Large and tall models meet BIFMA X5.11 Large Occupant Standard

QUICK DELIVERY PROGRAM

- All Fuel models available on Quick Delivery, including TB133

All Fuel models may be ordered to meet TB133 fire code.

LOUNGE

FRAME CONSTRUCTION

- Interior frame is constructed of plywood with tenon joints that are glued and stapled for maximum joint stability
- Extreme back is shaped by a 100% recycled plastic shell

SEAT CONSTRUCTION

- Seat cushions are attached and feature 5" high grade polyurethane foam placed on a webbed panel

BACK & ARM CONSTRUCTION

- Back consists of 2" high grade polyurethane foam stretched over coil springs
- Arms are integrated into the curve of the back and consist of 2" high grade polyurethane foam stretched over plywood frame

UPHOLSTERY DETAIL

- Due to dimensional design of the back, stripes and large patterns are not recommended, as they will appear distorted or wavy
- All models feature welt cord framing detail, referred to as piping. Small patterns are not recommended for the piping as it may appear distorted or wavy
- Available with contrasting fabric or contrasting piping
- To maintain a soft sit, comfort wrinkles are acceptable with certain fabrics
- On larger units, puddling may occur over time with certain fabrics

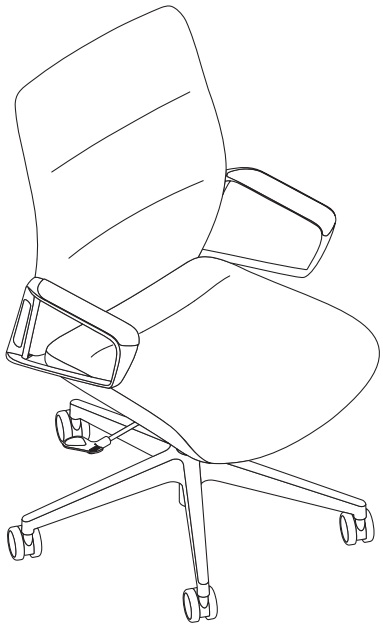
KARID PRODUCT SPECIFICATIONS



BACK CONSTRUCTION

- Back consists of a metal frame with a 1½" thick polyurethane molded foam overlay with horizontal decorative stitching

HEADREST CONSTRUCTION

- Headrest on high back unit has 4¼" thick molded foam

SEAT CONSTRUCTION

- Seat consists of a plywood core panel with a 4" molded polyurethane foam with piping around the seat edge

ARM CONSTRUCTION

- Static arms are aluminum with a polyurethane black arm cap

CONTRASTING FABRICS

- Contrasting fabric available on all models except the 48 hour Quick Delivery

CONTROL MECHANISM—SYNCHRONOUS TILT

- In synchronous one lock tilt, the backrest and seat pan of a chair recline at a different ratio. For every 2" of back recline, the seat angle tilts 1" (2:1 ratio) as you lean back. This minimizes the seat pan rise as you tilt, allowing your feet to remain on the floor while your gaze remains straight ahead
- Tension control allows for greater spring tension control for a firmer or softer tilting motion. Turn knob counterclockwise to decrease. Tension control is important so that a chair can be adjusted to accommodate users of different body types and sizes and for different work styles. It regulates the amount of resistance you feel when leaning back in the chair, and the effort required to recline backwards

HEIGHT ADJUSTMENT

- The pneumatic height adjustment raises or lowers the seat to the desired height
- Seat height should be adjusted to allow your legs to maintain a 90° angle to the floor or footrest. This keeps pressure off the back of your legs, so blood flow isn't restricted
- 5-star swivel base gives 5" of height adjustment and swivels 360°
- Base comes in polished aluminum or black nylon

CASTERS

- Black/polished 65mm, hard dual-wheel casters are standard
- Soft dual-wheel casters are available as an option on configurable task models
