CIRCULATION DESK

Saratoga Series

General Description:

Unless requested otherwise, all of our desk components are built assembled at the factory using real wood joinery offering, years of service.

Most all of our desks are made custom to each application. Although the Saratoga series is a simple desk design with graceful bull-nose edges, it is a very customizable series. Some of the options to give this desk a unique appearance is color accent pin stripes, black or matching laminate toe kicks, canted front face or two tone designer patterns etched into the panels.

Herewith, you will see what is the most common size components requested for most installations. We are happy to make modifications to suite your needs. Like all of the Saratoga series, this desk is standard with a 5/8" thick, internal edge band, with a gentle arched bullnose milling on three edges of the 1" thick end panel. There is a slight inset face panel to allow easy foot placement for your patrons visit.

Doors on cupboards are custom hung at the factory as inset, or flush to the front edges of the cabinet. They are assembled stile & rail frames with flat panels or tempered glass lite insets. Complete, they finish 3/4" thick with 1-1/2" wide frames. Doors are hung utilizing euro-style hinges allowing adjustments in the field. Optional 3/4" thick flat wood panels can be substituted for the stile and rail frames.

Shelves: All adjustable shelves in cupboards are solid lumber core and adjust on 32mm centers.

Drawers are assembled with 3/4" thick matching hardwood drawer faces mounted as flat stock on 1/2" thick drawer sides all dovetailed and glued. Drawer glides are ball-bearing type glides mated to maximum weight capacity for the size drawer. File drawers are complete with a metal top frame on all four sides to accommodate hanging files without sag or deflection. Drawers are mounted inset, or flush to the front edge of the cabinet.

Work Surfaces have a 13/16" wide x 1" thick hardwood edge band with a flush, high-pressure laminate inset. Desks can be designed with individual work surfaces captured between the end panels or as continuous overlay panels installed across multiple units. Standard edge detail is bullnose, with many different profiles available. We can provide as options, all wood tops, solid surface material, marble or even some natural and man made stone to give your desk a personalized accent.

Mohawk Series

General Description:

Unless requested otherwise, all of our desk components are built assembled at the factory using real wood joinery, offering years of service.

Most all of our desks are made custom to each application. Although the Mohawk series is made to be our most economical platform with square edges, we have given this series some very unique variations. Such as exceptionally thick end panels, aluminum accent insets, acrylic standoffs and solid surface front facades. Many times we incorporate a flush face with the ends machined to be behind the front panels to give the desk a continuous, unbroken face surface. This treatment is referred to as the "Seneca" look.

Herewith, you will see what is the most common size components requested for most installations. We are happy to make modifications to suite your needs. Like all of the Mohawk series, this desk is standard with a 3/16" thick external edge band on 1" thick end panels machined square with eased edges. There is a 3" high x 3" deep toe kick machined into the bottom on the patron side of the desk.

Doors on cupboards are custom hung at the factory as inset (or flush) to the front edges of the cabinet. They are assembled stile & rail frames with flat panels or tempered glass lite insets. Complete, they finish 3/4" thick with 1-1/2" wide frames. Doors are hung utilizing euro-style hinges allowing adjustments in the field. Optional 3/4" thick flat wood panels can be substituted for the stile and rail framed doors.

Shelves: All adjustable shelves in cupboards are solid lumber core and adjust on 32mm centers.

Drawers are assembled with 3/4" thick matching hardwood drawer faces mounted as flat stock on 1/2" thick drawer sides all dovetailed and glued. Drawer glides are ball-bearing type glides mated to maximum weight capacity for the size drawer. File drawers are complete with a metal top frame on all four sides to accommodate hanging files without sag or deflection. Drawers are mounted inset, or flush to the front edge of the cabinet.

Work Surfaces have a 13/16" wide x 1" thick hardwood edge band with a flush, high-pressure laminate inset. Desks can be designed with individual work surfaces captured between the end panels or as continuous overlay panels installed across multiple units. Standard edge detail is an eased square edge, with many different profiles available. We can provide as options, all wood tops, solid surface material, marble or even some natural and man made stone to give your desk a personalized accent.

CIRCULATION DESK

Tioga Series

General Description:

Unless requested otherwise, all of our desk components are built assembled at the factory using real wood joinery built for years of service.

Most all of our desks are made custom to each application. The Tioga series is one of the most custom built in our series of standard product simply because the stile and rail hardwood frames will require symmetry across the front of the desk, facing the patron side. Perhaps the configuration will allow us to build your desk to be modular based on your project requirements or we may suggest common, overlay front panels to give the entire desk installation frame balance across many components.

Herewith, you will see what is the most common size components requested for most installations. We are happy to make modifications to suite your needs. Like all of the Tioga series, the stile and rail construction is 5/4-hardwood lumber to be milled 1" thick by 2 1/2" wide with the base rail 3" wide. The captured flat panel is 3/4" thick allowing for a 1/4" reveal. Raised panels can be substituted for the flat panels as an option. The inside face is a flat surface allowing the hardwood frame to be seen as heavy banding around the panel face to compete the stile and rail custom appearance.

Shelburne Series

General Description:

The Shelburne product line is a high-end system of furniture, with very unique characteristics as designed by Vermont furniture designers, **Beeken Parsons**. The desk will be unlike anything else available on the market, incorporating sub-assemblies of hardwood frame bents with 1-3/4" tall capitals, tapered 2-1/2" tall bases and 1-1/2" thick verticals between. The bents will capture matching veneer panels to form the front of the desk and serve to form a structure to house any type of storage component the client specifies. Each section will be custom made to specification for any height and width combination to accommodate both, the patron or staff. This custom desk will require site assembly with continuous work surfaces and endless options. We will ask to please supply us with your requirements and we will work with you to fine tune the design of your desk.

Power Management: These days everyone has unique requirements for power and/or data. We have partnered with a wire component manufacturer to bring you power/data to best fit your needs. All work surfaces will come standard with grommets for wire management. Under surface duplex outlets, data chases and flush surface mount "pop-up" terminations are all available upon request.

Custom design projects are easy as 1 - 2 - 3

It's typical for Hale to receive projects as rough sketches.

Step One: Our engineer develops a scaled floor plan meeting the specific requirements of the project (as shown).

Step Two: Once the floor plan is approved, a perspective drawing is produced to illustrate installation in the space (as shown).

Step Three: Upon approval, we fabricate bookcases to the custom specifications to complete the project.
