The Jordan Compact Recliner comes with the back adjustment lever which creates an infinite number of back adjustments within the chair. The back adjustment lever comes in a black plastic finish on the care-giver side of the arm. The standard position when ordering is left hand based on a position facing, the unit, unless specified otherwise.

FOOTREST LEVER
Jordan Compact Recliner comes with the footrest lever, which extends and closes the built-in footrest. The footrest lever comes in a powder-coated finish to match the casters. The standard position when ordering is a left hand position based on facing the unit, unless specified otherwise.

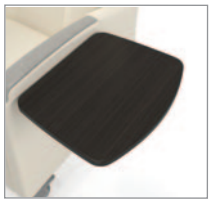
CASTERS
The standard caster is 4" in diameter, soft wheel, full swivel, with a lock that in a single action locks both the swivel and rotation of the caster.

CENTRAL CASTER LOCKING SYSTEM
Allows for single action locking of all four casters at one time. Casters are locked both directionally and rotationally, keeping the recliner in place when locked. The color-coded external foot pedal indicates Red for the locked position (when lowered) and Green for the unlocked position (when unlowered). The standard position for the foot pedal is located at the rear outside of the left (facing) arm panel. It can optionally be located at the front outside of the arm panel (either side) or at rear of right (facing) arm panel. Central locking casters are 4”diameter with soft wheel treads. Purchase orders must indicate Central Caster Locking System option, note the requested position, and include the upcharge

PUSH BAR
This is a standard feature on the Jordan Compact Recliner. Ergonomically designed to assist care-giving staff in the movement and operation of the recliner, and reduce back strain on the care-giver.

PATIENT TRANSFER ARM
The Patient Transfer Arm is designed to fold down where the arm is level with the chair seat. This design allows the caregiver to easily transport patients from the chair to bed. The arm is folded down by accessing the adjustment lever at the side of the chair. The Patient Transfer Arm is specified in a right or left handed position based on facing the unit. Please note, the Patient Transfer Arm cannot be located on the same side as IV Poles or the footrest lever or tablets.

POWER CONTROL
Optional motorized recline is available on the Jordan Compact Recliner. The motorized power features independent back and ottoman control. The control location is standard on the inside left (facing) of the arm, alternately can be specified on the right if required, must be clearly noted on the purchase order. Power can also be specified with a lithium battery pack able to run 200 cycles on a full charge.



THERMAL COMFORT
Providing warmth to patients undergoing chemotherapy and other treatments can be vitally important. Thermal Comfort is an option available on all Jordan Compact Recliners, and features a recessed controller located on the inside left arm(facing) of the recliner, unless specified otherwise (or opposite the Patient Transfer Arm option). It provides two heat zones: one in the seat and one in the back. Back and seat zones can be controlled independently, to one of two heat settings. Controls are conveniently placed for the user to access and include a safety time-out feature after 30 minutes. Access to a 110/120 volt, 15 amp(min) electrical outlet is required.

JORDAN COMPACT RECLINER | FEATURES & OPTIONS

SWING AWAY TABLET
The Swing Away Tablet (24” x 14 3/4” x 3/4”) is designed to be easily operated by the caregiver or user. The Break Away design allows for the tablet to be easily pushed away from the user in an emergency to gain quick access to the patient. The tablet has the ability to slide up and fold over and rotates 180 degrees. The kidney-shaped design is ideal for use as an eating, writing or work surface. The tablet must be specified on the arm opposite the Footrest Lever.

FLIP UP TABLET
The tablet's size is 18" x 14" x 3/4", and it can be located on either side of the recliner (must be specified if being ordered with the recliner). It is available in Beech and Maple Veneer, as well as Plastic Laminate with a Polymer edge. It folds flat (protruding 3" from the side of the recliner when flat). Please specify whether a right-handed or left-handed (facing)position is needed when ordering. Tablet must be mounted on the opposite side when a Patient Transfer Arm is ordered.

IV POLE & HOLDER
The Jordan IV Pole is height adjustable (in a range of 27"), and can be added in the field. It can be located on either the left or right side (facing) at the back of the recliner. The location must be specified at time of order.

FOLEY HOOK
This recessed, retractable hook system provides a mounting system for catheter bags. It is spring-loaded to automatically retract when not in use, to eliminate any hazard. The standard location of the Foley Hook is on the front of the arm opposite the Footrest Lever. When Swing Away Tablet is specified Foley Hook would move to the back.

FOOTREST PROTECTIVE COVER
This optional clear protective cover is sewn into (and over top of) the lower portion of the upholstered ottoman, providing a layer of protection from marring and damage caused by footwear, cleaning and medical equipment, etc. It has an anti-fog additive to maintain clarity, and is resistant to cleaning solutions.

FOOT TRAY
This option provides a concealed, pull-out tray to assist patients with ingress and egress. It features a non-slip tread and dedicated casters that prevent tipping when standing on the tray.

REMOVABLE COVERS OPTION
Jordan Compact Recliner are available with Removable Seat Covers & Removable Back Covers. Removable seat and back covers can be quickly installed on Jordan products that were originally ordered with the Removable cover option

COMBINATION UPHOLSTERY OPTION
When combination upholstery is specified with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics. When graded-in combination upholstery is selected, use the highest grade upholstery selected or contact Customer Service for a quote - please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. See Page 640 for details.

CONTINUOUS FOOTREST
The optional continuous footrest cover provides an easily cleanable surface. It also provides additional safety when in the upright position. Seat and cover can be replaced if worn or degraded. See pricing pages for upcharges.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Jordan products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Jordan products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Jordan and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

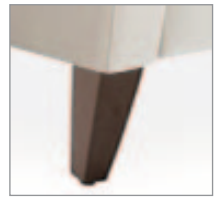
JORDAN | 3-POSITION RECLINER - FEATURES & OPTIONS

HIGH DURABILITY MECHANISM
Jordan 3-Position Recliner mechanisms are designed for high-traffic, intensive use in care-giving environments. They are built with high-strength steel, and include Delrin™ wear pads between moving components for added smoothness and longevity.

RECLINER - 3-POSITION MECHANISM
This mechanism provides 3 distinct user positions:
Position A - Seated with feet on the floor, footrest in down (closed) position. Seat-back angle is 104 degrees, and the back is reclined 20 degrees from vertical.
Position B - Footrest is fully extended, back is in mid-position. Seat-back angle remains at 104 degrees, and the back is 25 degrees from vertical.
Position C - Full recline with footrest fully extended. Seat-back angle is opened to 125 degrees, and the back is 45 degrees from vertical.

MECHANISM WITH TRENDELENBURG
This mechanism provides the same positions described above, as well as the additional Trendelenburg position: full recline with footrest fully extended, seat-back angle remains at 125 degrees, but the back is now 65 degrees from vertical - resulting in the feet being above the head. It is activated by a foot-release lever that is accessible from either side of the recliner.

CLEANING & INFECTION CONTROL
Specifically designed to ease the cleaning and disinfection of the recliner and the floor underneath. Upholstery covers can be made removable, and individual components are automatically removable, to enable thorough cleaning and disinfection.



ENHANCED CUSHIONING
The Jordan Recliners have been upgraded with a softer seat, a more pronounced headrest, and contoured back shaping for improved support. These enhancements, along with the addition of dual-density foam, make these recliners the leader in patient comfort.

PUSH BAR
This is a standard feature on the Jordan 3-Position Recliner when ordered with casters. Ergonomically designed to assist care-giving staff in the movement and operation of the recliner, and reduce back strain on the caregiver.

ARM OPTIONS
Jordan features 8 arm style options; fully upholstered, fully upholstered with urethane or solid surface arm cap, wood, wood with urethane or solid surface arm cap, full urethane and cushioned arm rest. The arm cap option provides enhanced durability and protection for the arms. The arm cap is field replaceable if damaged or degraded.

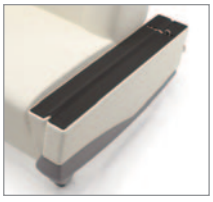
LEGS
Jordan Recliners are available with wood legs - in either Beech or Maple. Jordan recliner legs feature floor-saver glides. Floor-saver felt glides, non-slip rubber glides, metal glides and plastic glides available at an upcharge.
See Page 645 for more information.

CONTINUOUS FOOTREST
The optional continuous footrest cover provides an easily cleanable surface. It also provides additional safety when in the upright position. Seat and cover can be replaced if worn or degraded. See pricing pages for upcharges.

JORDAN | 3-POSITION RECLINER - OPTIONS

FOLEY HOOK
This recessed, retractable hook system provides a mounting system for catheter bags. It is spring-loaded to automatically retract when not in use, to eliminate any hazard.

IV POLE & HOLDER
The Jordan IV Pole is height adjustable (in a range of 27"), and can be added in the field. It can be located in any of four locations (left or right, front or back) -if ordered with the recliner, the location must be specified at time of order.



CUSHIONED ARMREST
The Cushioned Armrest was designed to maximize patient comfort during infusion treatments. The extra padded and wider arms provide comfort and support over long periods of time. Arms can be ordered in Krug standard healthcare rated grey vinyl or in coordinating textiles.

FLIP UP TABLET
The tablet's size is 18" x 14" x 3/4", and it can be located on either side of the recliner (must be specified if being ordered with the recliner). It is available in Beech and Maple Veneer, as well as Plastic Laminate with a Polymer edge. It folds flat (protruding 3" from the side of the recliner when flat). Please specify whether a right-handed or left-handed position is needed when ordering. Tablet must be mounted on the opposite side when a Patient Transfer Arm is ordered.

SWING AWAY TABLET
The Swing Away Tablet (24” x 14 3/4” x 3/4”) is designed to be easily operated by the caregiver or user. The Break Away design allows for the tablet to be easily pushed away from the user in an emergency to gain quick access to the patient. The tablet has the ability to slide up and fold over and rotates 180 degrees. The kidney-shaped design is ideal for use as an eating, writing or work surface. The Footrest activation lever is specified either left or right handed based on a position facing the unit and opposite to where the tablet appears.

PATIENT TRANSFER ARM
The Patient Transfer Arm is designed to fold down where the arm is level with the chair seat. This design allows the caregiver to easily transport patients from the chair to bed. The arm is folded down by accessing the adjustment lever at the side of the chair. The Patient Transfer Arm is specified in a right or left handed position based on facing the unit. The Patient Transfer Arm cannot be located on the same side as footrest lever or accessories. Dual patient transfer arms cannot be specified with CCLS or accessories.

FOOT TRAY
This option provides a concealed, pull-out tray to assist patients with ingress and egress. It features a non-slip tread and dedicated casters that prevent tipping when standing on the tray.

THERMAL COMFORT
Providing warmth to patients undergoing chemotherapy and other treatments can be vitally important. Thermal Comfort is an option available on all Jordan Recliners, and features a hand-held controller located on the inside arm of the recliner (please specify right hand side or left hand side -facing). It provides two heat zones: one in the seat and one in the back. Back and seat zones can be controlled independently, to one of two heat settings. Controls are conveniently placed for the user to access and include a safety time-out feature after 30 minutes. Access to a 110/120 volt, 15 amp(min) electrical outlet is required.

POWER CONTROL
Optional motorized recline is available on the Jordan 3-Position Recliner. The control location is standard on the inside left (facing) of the arm, alternately can be specified on the right if required, must be clearly noted on the purchase order. Power can also be specified with a lithium battery pack able to run 200 cycles on a full charge.

CASTERS
The standard caster is 4" in diameter, soft-wheel, full swivel, with a lock that in a single action locks both the swivel and rotation of the caster. The Central Locking caster has the same features, with a hooded design.

CENTRAL CASTER LOCKING SYSTEM
Allows for single action locking of all four casters at one time. Casters are locked both directionally and rotationally, keeping the recliner in place when locked. The color-coded external foot pedal indicates Red for the locked position (when lowered) and Green for the unlocked position (when unlowered). The standard position for the foot pedal is located at the rear outside of the left (facing) arm panel. It can optionally be located at the front outside of the arm panel (either side) or at rear of right (facing) arm panel. Central locking casters are 4”diameter with soft wheel treads. Purchase orders must indicate Central Caster Locking System option, note the requested position, and include the upcharge - see pricing pages for upcharge info.

REPLACEMENT & REMOVABLE COVERS
Jordan 3-Position Recliner chairs are available with removable seat and back covers for an upcharge. Removable seat and back covers can be quickly installed on Jordan products that were originally ordered with the removable cover option. Removable seat and back covers can also be installed on Jordan products that were not originally ordered with the Removable cover option, with some simple staple removal on the original seats and backs.

COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

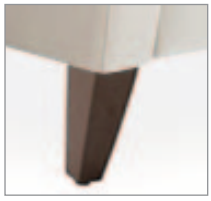
JORDAN | RECLINER PLUS FEATURES & OPTIONS



HIGH DURABILITY MECHANISM
Jordan Recliner Plus mechanisms are designed for high-traffic, intensive use in care-giving environments. They are built with high-strength steel, and include Delrin™ wear pads between moving components for added smoothness and longevity.

JORDAN RECLINER PLUS MECHANISM
This mechanism provides Infinitely Adjustable positions: Position A - Seated with feet on the floor, footrest in down (closed) position. Seat-back angle is 102 degrees. Position B - Footrest is fully extended, without compromising the upright position of the back. The seat-back angle remains at 102 degrees. Position C - is the range of infinite adjustability from the seated position of 102 degrees back angle to the fully reclined position at 133 degrees. The Infinitely Adjustable Back angle can be locked in any position with the back adjustment lever that goes to a maximum of 133 degrees when fully extended.

MECHANISM WITH TRENDELENBURG
This mechanism provides the same positions described above, as well as the additional Trendelenburg position: full recline with footrest fully extended, seat-back angle remains at 125 degrees, but the back is now 65 degrees from vertical - resulting in the feet being above the head. It is activated by a foot-release lever that is accessible from either side of the recliner.

LEGS
Jordan Recliners are available with wood legs - in either Beech or Maple. Jordan recliner legs feature floor-saver glides. Floor-saver felt glides, non-slip rubber glides, metal glides and plastic glides available at an upcharge. See Page 645 for more information.

ENHANCED CUSHIONING
The Jordan Recliners have been upgraded with a softer seat, a more pronounced headrest, and contoured back shaping for improved support. These enhancements, along with the addition of dual-density foam, make these recliners the leader in patient comfort.

PUSH BAR
This is a standard feature on the Jordan recliner when ordered with casters. Ergonomically designed to assist care-giving staff in the movement and operation of the recliner, and reduce back strain on the caregiver.

BACK ADJUSTMENT LEVER
The Jordan Recliner Plus comes with the back adjustment lever which creates an infinite number of back adjustments within the chair. The back adjustment lever comes in a black plastic finish on the caregiver side. The standard position when ordering is left hand based on a position facing, the unit, unless specified otherwise.

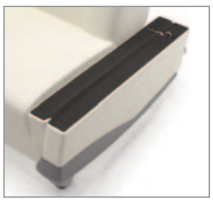
FOOTREST LEVER
Jordan Recliner Plus comes with the footrest lever, which extends and closes the built-in footrest. The footrest lever comes in a powder-coated finish to match the casters. The standard position when ordering is a left hand position based on facing the unit, unless specified otherwise.

ARM OPTIONS
Arms are available in wood, wood with urethane arm cap, wood with solid surface arm cap or full urethane. The urethane provides enhanced durability and protection for the arms and is available in three color options; Black, Grey and Taupe. The urethane arm cap is field replaceable if damaged or degraded.

JORDAN | RECLINER PLUS FEATURES & OPTIONS

FOLEY HOOK
This recessed, retractable hook system provides a mounting system for catheter bags. It is spring-loaded to automatically retract when not in use, to eliminate any hazard.

IV POLE & HOLDER
The Jordan IV Pole is height adjustable (in a range of 27"), and can be added in the field. It can be located in any of four locations (left or right, front or back) -if ordered with the recliner, the location must be specified at time of order.



CUSHIONED ARMREST
The Cushioned Armrest was designed to maximize patient comfort during infusion treatments. The extra padded and wider arms provide comfort and support over long periods of time. Arms can be ordered in Krug standard healthcare rated grey vinyl or in coordinating textiles.

FLIP UP TABLET
The tablet's size is 18" x 14" x 3/4", and it can be located on either side of the recliner (must be specified if being ordered with the recliner). It is available in Beech and Maple Veneer, as well as Plastic Laminate with a Polymer edge. It folds flat (protruding 3" from the side of the recliner when flat). Please specify whether a right-handed or left-handed position is needed when ordering. Tablet must be mounted on the opposite side when a Patient Transfer Arm is ordered.

SWING AWAY TABLET
The Swing Away Tablet (24” x 14 3/4” x 3/4”) is designed to be easily operated by the caregiver or user. The Break Away design allows for the tablet to be easily pushed away from the user in an emergency to gain quick access to the patient. The tablet has the ability to slide up and fold over and rotates 180 degrees. The kidney-shaped design is ideal for use as an eating, writing or work surface. The Footrest activation lever is specified either left or right handed based on a position facing the unit and opposite to where the tablet appears.

PATIENT TRANSFER ARM
The Patient Transfer Arm is designed to fold down where the arm is level with the chair seat. This design allows the caregiver to easily transport patients from the chair to bed. The arm is folded down by accessing the adjustment lever at the side of the chair. The Patient Transfer Arm is specified in a right or left handed position based on facing the unit. Please note, the Patient Transfer Arm cannot be located on the same side as IV Poles or the footrest lever or tablets.

POWER CONTROL
Optional motorized recline is available on the Jordan Recliner. Plus. The motorized power features independent back and ottoman control. The control location is standard on the inside left (facing) of the arm, alternately can be specified on the right if required, must be clearly noted on the purchase order. Power can also be specified with a lithium battery pack able to run 200 cycles on a full charge.

THERMAL COMFORT
Providing warmth to patients undergoing chemotherapy and other treatments can be vitally important. Thermal Comfort is an option available on all Jordan Recliners, and features a hand-held controller located on the inside arm of the recliner (please specify right hand side or left hand side -facing). It provides two heat zones: one in the seat and one in the back. Back and seat zones can be controlled independently, to one of two heat settings. Controls are conveniently placed for the user to access and include a safety time-out feature after 30 minutes. Access to a 110/120 volt, 15 amp(min) electrical outlet is required.

CASTERS
The standard caster is 4" in diameter, soft-wheel, full swivel, with a lock that in a single action locks both the swivel and rotation of the caster. The Central Locking caster has the same features, with a hooded design.

CENTRAL CASTER LOCKING SYSTEM
Allows for single action locking of all four casters at one time. Casters are locked both directionally and rotationally, keeping the recliner in place when locked. The color-coded external foot pedal indicates Red for the locked position (when lowered) and Green for the unlocked position (when unlowered). The standard position for the foot pedal is located at the rear outside of the left (facing) arm panel. It can optionally be located at the front outside of the arm panel (either side) or at rear of right (facing) arm panel. Central locking casters are 4”diameter with soft wheel treads. Purchase orders must indicate Central Caster Locking System option, note the requested position, and include the upcharge - see pricing pages for upcharge info.

FOOT TRAY
This option provides a concealed, pull-out tray to assist patients with ingress and egress. It features a non-slip tread and dedicated casters that prevent tipping when standing on the tray.

REMOVABLE COVERS AND REPLACEMENT COMPONENTS
Jordan Recliner Plus chairs are available with removable seat and back covers. Removable seat and back covers can be quickly installed on Jordan products that were originally ordered with the Removable cover option. Removable seat and back covers can also be installed on Jordan products that were not originally ordered with the Removable cover option, with some simple staple removal on the original seats and backs..

CONTINUOUS FOOTREST
The optional continuous footrest cover provides an easily cleanable surface. It also provides additional safety when in the upright position. Seat and cover can be replaced if worn or degraded. See pricing pages for upcharges.

JORDAN | SLEEP RECLINER FEATURES & OPTIONS

HIGH DURABILITY MECHANISM
Jordan Sleep Recliner mechanisms are designed for high-traffic, intensive use in care-giving environments. They are built with high-strength steel, and include Delrin™ wear pads between moving components for added smoothness and longevity.

JORDAN SLEEP RECLINERS MECHANISM
This mechanism provides Infinitely Adjustable positions: Position A - Seated with feet on the floor, footrest in down (closed) position. Seat-back angle is 102 degrees. Position B - Footrest is fully extended, without compromising the upright position of the back. The seat-back angle remains at 102 degrees. Position C - is the range of infinite adjustability from the seated position of 102 degrees back angle to the fully reclined position at 133 degrees. The Infinitely Adjustable Back angle can be locked in any position with the back adjustment lever that goes to a maximum of 175 degrees when fully extended.

MECHANISM WITH TRENDELENBURG
This mechanism provides the same positions described above, as well as the additional Trendelenburg position: full recline with footrest fully extended, seat-back angle remains at 125 degrees, but the back is now 65 degrees from vertical - resulting in the feet being above the head. It is activated by a foot-release lever that is accessible from either side of the recliner. Not available on Recliner Plus.

ENHANCED CUSHIONING
The Jordan Recliners have been upgraded with a softer seat, a more pronounced headrest, and contoured back shaping for improved support. These enhancements, along with the addition of dual-density foam, make these recliners the leader in patient comfort.

CLEANING & INFECTION CONTROL
Specifically designed to ease the cleaning and disinfection of the recliner and the floor underneath. Upholstery covers can be made removable, and individual components are automatically removable, to enable thorough cleaning and disinfection.

PUSH BAR
This is a standard feature on the Jordan recliner when ordered with casters. Ergonomically designed to assist care-giving staff in the movement and operation of the recliner, and reduce back strain on the caregiver.

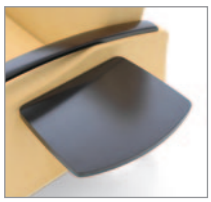
BACK ADJUSTMENT LEVER
The Jordan Sleep Recliner comes with the back adjustment lever which creates an infinite number of back adjustments within the chair. The back adjustment lever comes in a black plastic finish on the caregiver side. The standard position when ordering is left hand based on a position facing, the unit, unless specified otherwise.

FOOTREST LEVER
Jordan Sleep Recliner comes with the footrest lever, which extends and closes the built-in footrest. The footrest lever comes in a powder-coated finish to match the casters. The standard position when ordering is a left hand position based on facing the unit, unless specified otherwise.

ARM OPTIONS
Jordan features 8 arm style options; fully upholstered, fully upholstered with urethane or solid surface arm cap, wood, wood with urethane or solid surface arm cap, full urethane and cushioned arm rest. The arm cap option provides enhanced durability and protection for the arms. The arm cap is field replaceable if damaged or degraded.

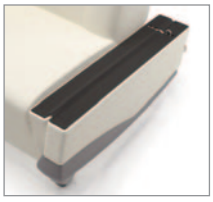
LEGS
Jordan Recliners are available with wood legs - in either Beech or Maple. Jordan recliner legs feature floor-saver glides. Floor-saver felt glides, non-slip rubber glides, metal glides and plastic glides available at an upcharge.
See Page 645 for more information.

CONTINUOUS FOOTREST
The optional continuous footrest cover provides an easily cleanable surface. It also provides additional safety when in the upright position. Seat and cover can be replaced if worn or degraded. See pricing pages for upcharges.



FOLEY HOOK
This recessed, retractable hook system provides a mounting system for catheter bags. It is spring-loaded to automatically retract when not in use, to eliminate any hazard.

IV POLE & HOLDER
The Jordan IV Pole is height adjustable (in a range of 27"), and can be added in the field. It can be located in any of four locations (left or right, front or back) -if ordered with the recliner, the location must be specified at time of order.



CUSHIONED ARMREST
The Cushioned Armrest was designed to maximize patient comfort during infusion treatments. The extra padded and wider arms provide comfort and support over long periods of time. Arms can be ordered in Krug standard healthcare rated grey vinyl or in coordinating textiles.

FLIP UP TABLET
The tablet's size is 18" x 14" x 3/4", and it can be located on either side of the recliner (must be specified if being ordered with the recliner). It is available in Beech and Maple Veneer, as well as Plastic Laminate with a Polymer edge. It folds flat (protruding 3" from the side of the recliner when flat). Please specify whether a right-handed or left-handed position is needed when ordering. Tablet must be mounted on the opposite side when a Patient Transfer Arm is ordered.

SWING AWAY TABLET
The Swing Away Tablet (24” x 14 3/4” x 3/4”) is designed to be easily operated by the caregiver or user. The Break Away design allows for the tablet to be easily pushed away from the user in an emergency to gain quick access to the patient. The tablet has the ability to slide up and fold over and rotates 180 degrees. The kidney-shaped design is ideal for use as an eating, writing or work surface. The Footrest activation lever is specified either left or right handed based on a position facing the unit and opposite to where the tablet appears.

PATIENT TRANSFER ARM
The Patient Transfer Arm is designed to fold down where the arm is level with the chair seat. This design allows the caregiver to easily transport patients from the chair to bed. The arm is folded down by accessing the adjustment lever at the side of the chair. The Patient Transfer Arm is specified in a right or left handed position based on facing the unit. Please note, the Patient Transfer Arm cannot be located on the same side as IV Poles or the footrest lever or tablets.

COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

THERMAL COMFORT
Providing warmth to patients undergoing chemotherapy and other treatments can be vitally important. Thermal Comfort is an option available on all Jordan Recliners, and features a hand-held controller located on the inside arm of the recliner (please specify right hand side or left hand side -facing). It provides two heat zones: one in the seat and one in the back. Back and seat zones can be controlled independently, to one of two heat settings. Controls are conveniently placed for the user to access and include a safety time-out feature after 30 minutes. Access to a 110/120 volt, 15 amp(min) electrical outlet is required.

POWER CONTROL
Optional motorized recline is available on the Jordan Sleep Recliner. The motorized power features independent back and ottoman control. The control location is standard on the inside left (facing) of the arm, alternately can be specified on the right if required, must be clearly noted on the purchase order. Power can also be specified with a lithium battery pack able to run 200 cycles on a full charge.

CASTERS
The standard caster is 4" in diameter, soft-wheel, full swivel, with a lock that in a single action locks both the swivel and rotation of the caster. The Central Locking caster has the same features, with a hooded design.

CENTRAL CASTER LOCKING SYSTEM
Allows for single action locking of all four casters at one time. Casters are locked both directionally and rotationally, keeping the recliner in place when locked. The color-coded external foot pedal indicates Red for the locked position (when lowered) and Green for the unlocked position (when unlowered). The standard position for the foot pedal is located at the rear outside of the left (facing) arm panel. It can optionally be located at the front outside of the arm panel (either side) or at rear of right (facing) arm panel. Central locking casters are 4”diameter with soft wheel treads. Purchase orders must indicate Central Caster Locking System option, note the requested position, and include the upcharge - see pricing pages for upcharge info.

FOOT TRAY
This option provides a concealed, pull-out tray to assist patients with ingress and egress. It features a non-slip tread and dedicated casters that prevent tipping when standing on the tray.

REPLACEMENT & REMOVABLE COVERS
Jordan Sleep Recliners chairs are available with Removable Seat and Back Covers for an upcharge. Removable seat and back covers can be quickly installed on Jordan products that were originally ordered with the Removable cover option. Removable seat and back covers can also be installed on Jordan products that were not originally ordered with the Removable cover option, with some simple staple removal on the original seats and backs.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Jordan products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Jordan products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Jordan and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

Note: Some vinyls, leathers & upholsteries are not suitable for application on Jordan seating.
The approval process is as follows:

1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order. For Maharam or Momentum, Krug will obtain the upholstery cover sample.

2. The sample will be reviewed and the customer advised if the upholstery cover is unsuitable.

3. The COM upholstery cover or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

CONTRASTING BACKS, SEATS, ARM PANELS, RECESSED FRONT PANEL & BACK PANEL

Combination upholstery (more than one upholstery cover within the same unit) is an option on all Jordan upholstered products. When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list per unit and $67 list** per unit for three fabrics. When graded in combination upholstery is selected, use the highest grade upholstery selected or contact Customer Service for a quote -please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

WEIGHT CAPACITIES

Jordan weight capacities are as follows:
Jordan Glider - 350 lbs

CLEAN OUT
Jordan Glider seating models have a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

STEEL SEAT FRAME
The structural seat frame is made from welded steel with a powder-coated finish that allows Jordan Glider to well exceed ANSI/BIFMA standards.

METAL-TO-METAL CONNECTIONS
Steel seat frames are joined to other components, in Jordan Glider products, with hardened steel bolts and inserts, ensuring exceptional durability and strength, and easy reconfigurability, as well as on-site replacement of damaged or degraded components.

HORIZONTAL MOTION
The Jordan glider is designed to move the patient in a smooth, flat arc that is gentle, soothing and safe. The position of the feet is maintained on the floor throughout the glider motion, rather than being raised up down in a rocking motion.

WALL SAVER DESIGN
The angle of the back and the rear legs are designed to keep the back away from the wall, in a locked position, to prevent wear and damage to both the chairs and to the walls of the facility.

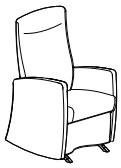
ARM CAPS
The optional arm cap provides enhanced durability and protection for the arms. Available in Urethane or Solid Surface, either is field removable if it becomes damaged or degraded.

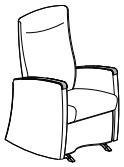
HEADREST
The headrest has a dual density foam for both comfort and support, and can be upholstered in matching or contrasting material. It is removable to allow for cleaning and replacement.

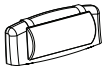
RECESSED FRONT PANEL
The Glider's front panel has an attractive arc that serves an important function: to provide safer ingress and egress by allowing the patient to get their feet underneath their weight. This is augmented by arms that have been designed as softly rounded handholds, to safely and comfortably support the weight of the patient while entering and exiting the chair.

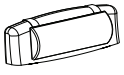
TWO WIDTHS
21" and 24" widths are offered, allowing flexibility in accommodating patients of different sizes, and providing for the comfortable use of bolsters, pillows and other means of support for the patient.

MECHANISM
The mechanism is both replaceable in the field, and features a locking function so the glider can be used as a fixed chair.









REMOVABLE UPHOLSTERY COVERS
The seat and back covers can be specified to be removable, allowing for cleaning and repair, or replacement.

REMOVABLE AND REPLACEABLE COMPONENTS
All of the components - the seat, back, the arms, the arm cap, and the mechanism can be removed for cleaning, and replaced if damaged. Replacement Parts can be viewed on line at www.krug.ca.

COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks.

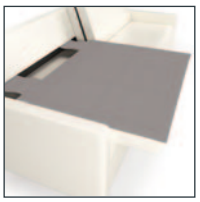
413 Jordan Lounge Sleeper

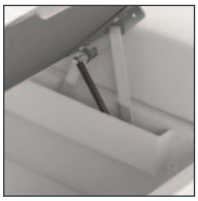
AMELIO & AMELIO MODULAR | SLEEP SOFA FEATURES

Amelio Modular is an innovative, patent-pending sleep solution that has been designed to allow hospitals to more cost-effectively address a constant reality: the need for change. Patient rooms are not static spaces, and Amelio Modular enables you to adapt them to changing needs. Each component of Amelio is a module, designed to be added or removed as space needs change: seat, table, storage and footrest modules can be added and removed to reconfigure the sleep sofa - to change overall dimensions, or change the functionality of the sofa - or to replace damaged components. No other sleep solution provides this innovative capability, which can substantially extend the useful life of the product, and allow it to continually evolve as your space is adapted to improve patient care. Use the link **Animation Video** to see a video demonstrating Amelio Modular's unique ability to change and evolve with you.

RAISED OFF THE FLOOR
Ample space (5.5", plus up to .5" of glide adjustment) between the bottom of the unit and the floor is designed to enable easier cleaning of the floor underneath.



ROUND STEEL LEGS
The 2" diameter steel leg is available in Silver Metallic, Polished Chrome, Matte Black, and White and have an adjustable glide. Amelio units with legs feature 5 legs in total, with the 5th leg located in the rear middle of the unit, providing greater structural strength and durability. Amelio 5.5" high. Amelio Modular 3" high.



REMOVABLE BACK COVER
Amelio backs are standard with a zipper allowing access to the sleep surface cushion straps. These straps are released by simply peeling back the velcro holding them in place.

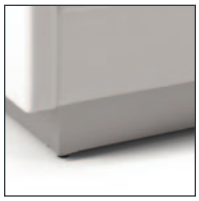
CLEAN OUT
A 5/8" space between the top of the seat and bottom of the back provide a clean out, for dirt and debris to fall or be swept into, going directly to the floor. The storage compartment also features vented bottoms that perform the same function.

FOLD DOWN SLEEPING SURFACE
The back cushions fold down to instantly transform this sofa into a full-length sleeper - without encroaching on additional floor space. It features comfortable foam with a moisture barrier and an PVC-free surface at a convenient and safe 22" height. Cushions are fastened in place, but can be removed for cleaning or replacement. Minimal seams are designed to support infection control.

HEAVY DUTY HARDWARE & CONNECTIONS
High strength steel mechanisms are joined to other components in Amelio Sofa sleeper product with hardened steel bolts and metal inserts, ensuring exceptional durability, strength and on-site replacement of damaged or degraded components.

GLIDES
Amelio & Amelio Modular sleepers feature floor-saver nylon glides. Floor-saver felt glides, non-slip rubber glides, metal glides and plastic glides are all available at an upcharge. See Page 645 for more information.

REPLACEABLE COMPONENTS
Healthcare furnishings are constantly subjected to intensive use, and even damage. Amelio Sofa sleepers are uniquely designed to allow virtually all major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats and Sleep surface cushions are removable (for repair and cleaning), and replaceable, as are legs, casters, arm panels, arm caps, front panels and storage mechanisms.



SLEEP SURFACE CLEANING
Amelio Sleep Sofas are standard with healthcare-rated PVC-free sleep surface. It is easily cleanable and acts as a moisture barrier on the top of the sleep surface. Sleep surfaces can be cleaned with warm water and mild soap. Water diluted to a maximum of 25% bleach and other intensive cleaning solutions (Virucide, accelerated peroxide) such as PerCept RTU, Zolvex, Clorox Wipes, Alpha HP and Virox can be used without affecting the color or integrity of the fabric. All cleaning products should be applied with a cloth, sponge or soft bristle brush.

CAL 133 & MOISTURE BARRIER
The sleep surface cushions are supplied with a standard moisture barrier applied to the top and sides of the foam cushions. CAL 133 and Moisture Barriers are available on the complete unit, please see upcharges in ordering notes.
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

AMELIO & AMELIO MODULAR | SLEEP SOFA OPTIONS

WOOD LEGS
The Amelio Sleep Sofa has the option of 2" round wood legs. All sofa sizes features a center leg for additional support and strength. An adjustable glide is standard on all legs. This helps ensure the furniture is steady and level on uneven floors. Not available on Amelio Modular Sleep Sofa.

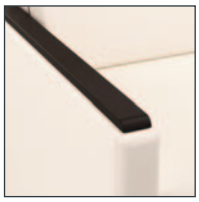
PLINTH
The base is clad in durable grey vinyl to resist damage and is designed to help prevent dirt debris and liquids from accumulating under the sofa sleeper. Plinth option is not available on Amelio Modular.

AMELIO CASTERS
4" Casters are available on the Amelio sleep sofa and feature five soft wheels, which lock and include an easy access foot activation and release lever. The casters can be locked both directionally and rotationally, keeping the sofa sleeper securely in place when locked.

AMELIO MODULAR CASTERS
3" dual wheel locking casters are available on Amelio Modular and feature 7 casters in total. The low profile soft wheels offer quiet and smooth performance.

STORAGE COMPARTMENT
An optional under-seat storage compartment features a cleanable interior surface with a vented plastic bottom, with a clean-out for debris and liquids. The venting provides air circulation that assists infection control. The spring-assisted, stainless steel mechanism holds the seat in the upright position to provide safe access.

COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).



REMOVABLE SLEEP SURFACE & SEAT COVERS
Removable upholstery cover options on seats and sleep surface cushions, to allow cleaning, repair and replacement. When ordering removable seat covers at time of order, the upcharge is **$242 list** per seat. Removable Sleep Surface covers are a standard product feature.

POWERDOC
The flush-mounted PowerDoc provides dual power/USB A & C outlets for multiple devices. It can be specified on the front of the Wide Arm, under the Adjustable Table, as well under the Fixed Table (in the valance, Not available with storage).

ARM STYLES
The Amelio Sleep Sofa comes available in either an arm, armless or wide arm version. Arms can be added to armless units in the field. Armed and Wide Armed versions are available as a fully upholstered arm or trimmed with optional arm caps. Footrest option not available with Wide Arms.

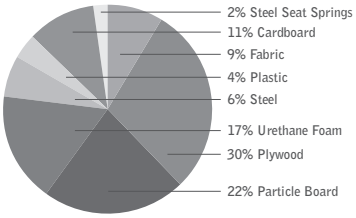
URETHANE ARM CAP
The optional Black, Grey or Taupe urethane arm cap provides enhanced durability and protection for the arms. This component is field replaceable if it becomes damaged or degraded. Not available on wide arms.

WOOD ARM CAP
The optional Wood arm cap helps to create a warm and inviting environment. Wood arm caps are field replaceable if they becomes damaged or degraded.

SOLID SURFACE ARM CAP
The optional solid surface arm cap provides enhanced durability and protection for the arms. This component is field replaceable if it becomes damaged or degraded.

THERMOFORMED ARM CAP
The optional thermoformed arm cap features a seamless surface and provides enhanced durability for the arms. The component is field replaceable if it becomes damaged or degraded.

SWING AWAY TABLET
The Swing Away Tablet (24" x 14 3/4" x 3/4") rotates 180 degrees and can fold to the side when not in use. The kidney shaped design is ideal for use as an eating, writing or work-surface. It can be specified left or right as seated on the standard width arm only. Available in Wood, Thermoformed or in ½" thick Solid Surface. Meets ANSI/ BIFMA x5.1 2011 (Static Load 150lb). Not available if foot rest option selected for Left / Right module on Amelio Modular.



CUP HOLDER
Wide arms can be optioned with a 3.5" stainless steel cup holder and can be specified on either the left or right arm.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Amelio products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Amelio products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Amelio and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

CUSTOM SIZING

Amelio Sleep Sofa was designed for use with all floorplans, even the most challenging spaces. The Amelio Sleep Sofa is available in custom sizes in 1" increments between the size range of 68" - 84", please use next size up for pricing when ordering 10 or more units. For non-standard sizes in quantities less than 10 units or for other customization of Amelio, please contact Customer Service to obtain a special quote.

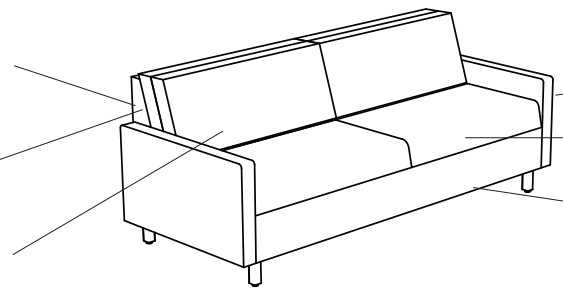
The flip-down sleep surface instantly transforms this sofa into a full-length sleeper, without encroaching at all on the footprint of the room, and without any mechanical operation. Sleep surface cushions are held in place with accessible straps - so that they are removable for cleaning and repair, but the cushions will stay in place when the unit is in use.

The Amelio Sleep Sofa unique construction and design provides comfortable daytime seating elements for guests. The split back design provides versatile sleeping options, one back section can be folded to create a parent supervised sleeping surface for a child or the complete back can be folded to accommodate overnight visitors.

CONVERSION FROM SOFA TO SLEEPER

The Amelio Sleep Sofa creates a sleep surface that does not impede the footprint of the patient room. The sleep surface cushions simply fold down to create a comfortable sleep surface.

COMBINATION UPHOLSTERY OPTIONS



When ordering combination upholstery or using COM fabric, please use the following fabric placement reference guide. Simply make a copy, note the fabrics and send in with the order

Outer Back Upholstery

Amelio outer back is standard with latex-free grey colored vinyl

Inner Back Upholstery

Back Cushions Upholstery

Arm Upholstery

Seat Upholstery

Front Panel Upholstery

The standard Outer Back upholstery supplied is a latex-free grey colored vinyl , a high-durability polyester fabric with a vinyl backer, designed to withstand impact and helps prevent the passage of moisture. The Sleep Surface is a hospital grade pvc free fabric.

AMELIO MODULAR | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 30.41%

POST-CONSUMER
RECYCLED CONTENT = 12.41%

Up to 27.41% of this Amelio tables product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Amelio products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Amelio products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Amelio and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

NOTE: Some vinyls, leathers and upholsteries are not suitable for application on Amelio seating. The COM approval process is as follows:

1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the upholstery cover is unsuitable.
3. The COM upholstery cover or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

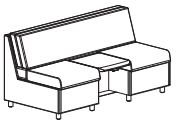
WEIGHT CAPACITY Amelio Sleep Sofa has been load tested to 750 lbs.

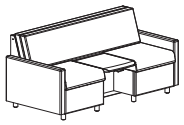
FOOTREST
The Footrest is available on left, right or both seats. The Footrest handle adds 3” per side to the overall width. The Footrest has a weight capacity of 75 lbs, and has a breakaway feature to avoid damage to the mechanism under excessive loading. Footrest option not available with Wide Arms.

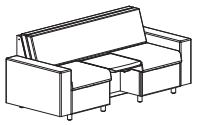
POWERDOC
A PowerDoc can be added below Adjustable Height Tables, below Fixed Tables (Not available with storage) and in the front of Wide Arms.

ADJUSTABLE CENTER TABLE
Tables are available in either Thermoformed Vinyl or in Solid Surface. Table has gas-assisted mechanism and has a range of 10.5”. Table capacity is 300lbs in the Sit/Sleep position and 150lbs in the raised positions.

FIXED CENTER TABLE
Tables are available in either Thermoformed Vinyl or in Solid Surface.







FIXED CENTER TABLE WITH STORAGE
Tables are available in either Thermoformed Vinyl or in Solid Surface.

SEAT MODULE WITH STORAGE
Available in left, center and right seat positions. Storage features a cleanable interior surface with a vented plastic bottom with a clean-out for debris and liquids. The spring-assisted, stainless steel mechanism holds the seat in the upright position to provide safe access.

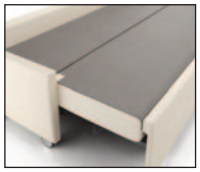
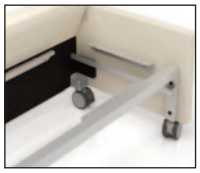
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION



level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Amelio products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Amelio products are supplied with air-emissions certified. Contact customer service for information.



FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Amelio and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

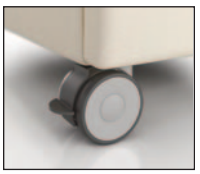
Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

AMELIO BENCH SLEEPER | FEATURES & OPTIONS

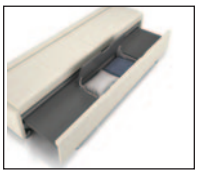
FOLD DOWN SLEEP SURFACE
The seat cushion folds out onto a forward extending platform to transform the bench into a full-length sleeper. It features comfortable foam with a vinyl surface. Cushions can be removed for cleaning or replacement.

STEEL CONSTRUCTION
A welded steel interior framework provides exceptional strength and durability for extended product life and problem-free usage. The platform over the framework is covered in an attractive, durable upholstered cover to support infection control and ease of cleaning.

STEEL LEGS
The standard base is a 3” tall round steel leg in Silver Metallic, featuring plastic glides. Floor-saver nylon glides, Floor-saver felt glides, non-slip rubber glides and metal glides are available at an upcharge, see Page 645 for more information.



LATEX FREE
Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people



REPLACEABLE COMPONENTS
Amelio Bench Sleepers is uniquely designed to allow major components to be field replaced, providing a very cost effective means to significantly extend the life of the product.

REMOVABLE COVERS
Removable seat and mattress covers are standard for easy cleaning or replacement.

LOCKING CASTERS
3” dual-wheel locking caster models are available.

STORAGE COMPARTMENT
Optional under-seat storage compartment features a cleanable interior surface with a vented bottom, and a clean-out for debris and liquids. The spring-assisted hinges hold the storage lid in the upright position to provide safe access.

ARM
Upholstered side arms can be trimmed with optional Grey & Black Urethane or Solid Surface Arm Caps to enhance the durability of the arms and provide a cleanable surface.

LAMINATE FRONT PANEL
Laminate can be specified for the front panel in Krug’s in-stock laminates with matching 3mm edging. See Page 643 for laminate selection.

WEIGHT CAPACITIES
Amelio Bench Sleepers has been tested and complies with ANSI/BIFMA x5.4-2012 standards.
Amelio Bench Sleepers has a load weight rating of 525lbs

CUSTOM SIZING
Custom sizes are available and can be quoted, with a minimum order quantity of 10 units per size. Custom depth dimensions may require a higher minimum order quantity. Please contact Customer Service for a special quote.

COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge of **$67 list** per yard.

The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

NOTE: Some vinyls, leathers and upholsteries are not suitable for application on Amelio seating.
The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the upholstery cover is unsuitable.
3. The COM upholstery cover or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Jordan products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Jordan products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Jordan and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

NOTE: Some vinyls, leathers and upholsteries are not suitable for application on Jordan seating.

The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the upholstery cover is unsuitable.
3. The COM upholstery cover or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

One-Seat Lounge Sleepers

Two-Seat Lounge Sleepers

JORDAN | LOUNGE SLEEPERS FEATURES & OPTIONS

HIGH DURABILITY MECHANISM
This product features a heavy-duty mechanism, made with heavy gauge steel and minimal moving parts - its designed to last, and is backed by a 5-year warranty on the mechanism itself, in addition to the lifetime warranty on the rest of the product. If it does become damaged or degraded, the mechanism can be field-replaced.

COMFORTABLE SLEEP SURFACE
A new, enhanced sleep surface is 87" in length, providing exceptional range to stretch out in comfort, with supportive cushioning that is specifically designed for sleeping.

CHAISE/OTTOMAN POSITION
In addition to the sitting and sleep positions, this position allows the user to sit (or even sleep) in comfort with legs elevated and supported.

EASY OPEN AND CLOSE
The sleeper is extended easily to either position, using a pull handle that is neatly tucked away when not in use. The sleeper can be quickly closed by raising the back, and then lowering the ottoman cushion into the storage position. Instructions for operating the sleeper are located on the front of the ottoman cushion.

WALL SAVER DESIGN
The shape of the arm is designed to keep the back away from the wall (in a locked position), to prevent wear and damage to both the chairs and to the walls of the facility.

CASTERS
Enhanced accessibility of the casters allows the caregiver or visitor to easily lock and unlock them. The 3" casters are soft, with a premium lock function, which locks both the wheel rotation and the swivel rotation to rigidly hold the unit in position.

LEGS
Jordan Lounge Sleepers legs are available in Beech and Maple wood as well as Grey Urethane and feature a non-slip rubber glide.

ARM STYLES
Jordan Lounge Sleepers feature 7 arm styles Upholstered Arm, Wood Arm, Full Urethane Arm, Wood Arm with Urethane Cap & Wood Arm with Solid Surface Cap, Upholstered Arm with Urethane Cap & Upholstered Arm with Solid Surface Cap. The optional arm caps and full urethane arm provide enhanced durability and protection for the arms. Urethane arm and arm cap are available in Black, Grey and Taupe colors. Solid Surface Arm caps are available in 8 colors shown on Page 643. The arm cap is field replaceable if it becomes damaged or degraded.

UPHOLSTERED ARM with URETHANE ARM CAP

UPHOLSTERED ARM with SOLID SURFACE ARM CAP

WOOD ARM

FULL URETHANE ARM

URETHANE ARM CAP

WOOD ARM with SOLID SURFACE ARM CAP

CLEANING AND INFECTION CONTROL
Specifically designed to ease the cleaning and disinfection of the sleeper and the floor underneath them - in the first opening stage, open access is provided to the floor underneath so it can be cleaned without having to move the sleeper. Upholstery covers can be made removable, and individual components are automatically removable, to enable thorough cleaning and disinfection.

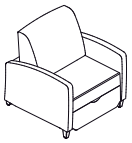
REMOVABLE & REPLACEABLE UPHOLSTERY & COMPONENTS
Seat, back and ottoman upholstery covers can be specified as removable, so they can be removed for cleaning, or replacement. The mechanism, casters, front kickplate, arm panels and caps - as well as seat, back and ottoman cushions - are field-replaceable if damaged or degraded - so the life of this product can be extended indefinitely, and made to look good as new.

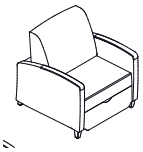
COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

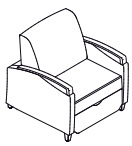
MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks.

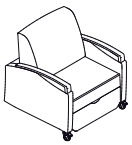
CONVERSION FROM CHAIR TO CHAISE TO SLEEPER (TO OPEN SLEEPER)

1. Chaise position - lock the casters and using the hand pull, pull the ottoman out. Lift pull handle up and out to fully extend the ottoman.
2. Sleep position - from chaise position, pull ottoman handle again away from chair to full extension. Lower the back manually forward into position.









CONVERSION FROM SLEEPER TO CHAISE TO CHAIR (TO CLOSE SLEEPER)

1. Chaise position - Lift the Sleeper back into it's upright position and push (using the ottoman kick plate) inward.
2. Chair position - Lower the ottoman into the tuck away position and continue to push the ottoman inward

JORDAN SIDE-OPENING SLEEPER | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT =34.75%

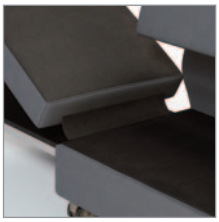
POST-CONSUMER
RECYCLED CONTENT =14.66%

Up to 35% of this Jordan Side-Opening Sleeper product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Jordan products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.



AIR-EMISSIONS
All Jordan products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Jordan and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

RECONFIGURABLE CUSHIONS
The side extending platform allows the seat and backrest cushions to transform the lounge unit into a full-length sleeper. When the unit is switched from sitting (chair) position into sleeping position, the back becomes an integral component of the sleep surface. This means the cushion does not need to be stored elsewhere. Cushions feature comfortable foam with moisture barrier, a PVC-free sleep surface and can be removed for cleaning or replacement.

TETHERED STRAP
The tethered strap feature is designed to keep the seat cushion securely in place, ensuring a tidy and comfortable seating experience. This durable strap is seamlessly integrated into the cushion design, allowing for effortless attachment to the lounge frame. The strap prevents slipping or shifting, even during extended use. The tethered strap offers long-lasting performance while maintaining the aesthetic appeal of the sleeper.

FULLY UPHOLSTERED ARM
Fully upholstered arm is field replaceable if it becomes damaged or degraded.

FULLY UPHOLSTERED ARM WITH URETHANE CAP
The optional urethane arm cap provides durability and protection for the arms. It is field replaceable if it becomes damaged or degraded. Urethane arm cap is available in three colors; Black, Grey and Taupe.

FULLY UPHOLSTERED ARM WITH SOLID SURFACE CAP
The optional solid surface arm cap provides enhanced durability, protection and cleanability for the arms. It is field replaceable if it becomes damaged or degraded. Solid surface arm cap is available in 8 standard colors. See page 11 for color selection.

LEGS
The standard base is a 3” tall round steel leg with nylon glides. Legs under the stationary arm have adjustable glides.

STEEL CONSTRUCTION
Welded steel interior framework provides exceptional strength and durability for extended product life and problem-free usage. The platform over the framework is covered in an attractive, durable upholstered cover to support infection control and ease of cleaning.

CASTERS
3” dual-wheel locking casters are optional. The low profile soft wheels offer quiet and smooth performance.

STORAGE COMPARTMENT
Optional under-seat storage compartment features a cleanable interior surface with a vented bottom and clean-out for debris and fluids. The spring assisted hinges hold the storage lid in the upright position to provide safe access.

LAMINATE FRONT PANEL
High pressure laminate can be specified for the front panel in Krug’s in-stock laminates with matching 3mm edging.

COMBINATION UPHOLSTERY OPTION
Jordan upholstered products are available with the option of specifying more than one upholstery cover within the same unit. When specified with upholstery of the same grade (or COM), an upcharge for dual fabrics, **$34 list** per unit is applied. **$67 list** per unit is applied for three fabrics. When graded-in combination upholstery is selected, use the highest grade upholstery selected or contact Customer Service for a quote -please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

CENTRAL CASTER LOCKING SYSTEM
Allows for single action locking of all four casters at one time. Casters are locked both directionally and rotationally, keeping the recliner in place when locked. The color-coded external foot pedal indicates Red for the locked position (when lowered) and Green for the unlocked position (when unlowered). The standard position of foot pedal is located at the rear outside of the stationary arm. Central locking casters are 4” diameter with soft wheel treads. Purchase orders must indicate Central Caster Locking System option and include the upcharge - see pricing pages for upcharge info.

Vinyl sleep surface is 1.6 yds

ORDERING NOTES:
NOTE: Some vinyls, leathers and upholsteries are not suitable for application on Jordan seating.
The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the upholstery cover is unsuitable.
3. The COM upholstery cover or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

COMBINATION/COM UPHOLSTERY OPTIONS
When ordering combination upholstery or using COM fabric, please use the following fabric placement reference guide. Simply make a copy, note the fabrics and send in with the order

The standard **Outer Back** upholstery supplied is a latex-free grey colored vinyl , a high-durability polyester fabric with a vinyl backer, designed to withstand impact and helps prevent the passage of moisture. The Sleep Surface is a hospital grade pvc free fabric.

EXTENDED SLEEP SURFACE

The Side-Opening Sleeper provides an effective sleep solution for tighter spaces: with a depth of less than 32” whether open or closed, it makes efficient use of wall space to provide a comfortable sleep-over function in patient rooms. The sleep surface extends to 80” in length in the standard size, and an optional storage area is provided underneath. The side opening is released with a hand activator at the side of the sleeper; The backrest cushion unfolds and converts into the sleep surface keeping all components with the unit when in the sleep position.

TO EXTEND SLEEP SURFACE

1. To activate side extending platform, release with the hand activator on the outside of the sleeper arm

2. Pull arm to easily roll out sleep platform.

3. Flip seat cushion over to sleep platform.

4. Unfold backrest cushion, converts into the extended sleep surface.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Solis products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

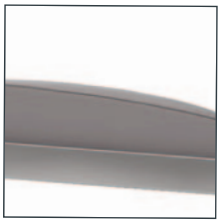
AIR-EMISSIONS
All Solis products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Solis and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

SOLIS BEHAVIORAL HEALTH | FEATURES

CLEAN OUT
All Solis seating models have a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquids to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.



STEEL SEAT FRAME
The structural seat frame is made from welded steel with a powder-coated finish that allows Solis to well exceed ANSI/BIFMA standards.

FLEX BACK
The ergonomically-designed back has a slight flexing action, which significantly enhances comfort.

WALL SAVER
The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility. Patient and Guest chairs with mesh backs are excluded as they do not have the wall saver feature.

HIGH DENSITY FOAM
Solis features dual density foam that is soft on the outside for comfort, dense on the inside for high durability. The seat and back foam features a compound curvature that supports healthy sitting postures, while also designed to ease ingress and egress.

SECURED WOODEN ARM
Solis Wood Arm caps are fastened to the side frames with tamper resistant security screws. Wood arms are available in either beech or maple hardwood and in 22 Krug standard finishes. Maple arm caps are available for an up-charge of **$84 list** per arm using beech pricing.

URETHANE ARM
Solis secured urethane arms are durable, comfortable, and long lasting. Urethane arms are available in three colors options; Black, Grey and Taupe.

TAMPER RESISTANT HARDWARE
All screws used on the Solis Behavioral Health units have been replaced with tamper resistant security screws.

GANGING
All Solis Freestanding chairs can be ganged using a ganging bracket. The powder-coated metal plate is fastened to the underside of the steel side rails using the pre-existing holes in the frame.

SECURED GLIDES
Solis Behavioral Health chairs have their glides secured in place to prevent their removal and damage.

BOTTOM STAPLE COVER/SHIELD
Solis Behavioral Health chairs come standard with a black painted plywood cover underneath the seat. This cover is designed to prevent access to the upholstery staples of the seat and to prevent the hiding of objects underneath the seat. The cover is also designed to allow for regular ganging hardware and proper seat ventilation. The cover is secured to the unit with tamper resistant security screws.

BACK STAPLE COVER STRIP
The Solis Behavioral Health back upholstery has been altered to allow a staple cover strip to be attached; this will prevent access to the upholstery staples. The cover strip is nylon coated galvanized steel with vinyl coated ends to prevent any sharp edges. The back cover strip is fastened to the unit with tamper resistant security screws.

TUBULAR STEEL CHAIR FRAME
The overall aesthetic frame of the chair is built from structural steel tubing, both elliptical and rectangular for exceptional strength and appealing design. The frame is electro welded and polished joints for ease of cleaning and a one piece look. Available in eight powder-coated finishes. Silver Metallic is offered as Krug's standard finish. For all metal finishes other than Silver Metallic, there is a minimum quantity of 30 units per color and are available for an upcharge of **$67 list** per seat/table. Microban anti-microbial finish is standard, with no upcharge, when frame finishes other than Silver Metallic is ordered. Solis Silver Metallic frames are available with an anti-microbial finish for an upcharge of **$67 list** per chair or table. Upcharges for quantities less than 30 units per color, per order can be obtained through Customer Service.

FINISH DURABILITY
The Krug Enduraguard finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of healthcare environments.

LATEX-FREE
Krug products are made with latex-free materials, to prevent the allergic reaction that latex causes in some people.

WEIGHT CAPACITIES
Weight capacities are as follows:
Guest & Patient Chairs (21" & 24") - **500** lbs
Plus Chairs (30" & 44") - **750** lbs

SLED BASE

KINETIC BACK OPTION
This optional feature provides the chair back with a very pleasant and comfortable rocking motion, which can significantly enhance long-term sitting for patients and guests alike. The durable spring-loaded mechanism provides a range of motion of 20 degrees, and can be field-installed or replaced. It's available on any Solis chair back - Guest, Patient and Multiple Seating - with the exception of the 30" and 44" sizes.

CLOSED ARM
Solis closed arm has an upholstered arm panel built into the side frame. It is between the middle rail on the side frame and the top of the arm.

FULLY CLOSED ARM (SLEIGH BASE ONLY)
The fully closed arm includes the regular closed arm, but also adds a second upholstered arm panel between the middle rail on the side frame and the sleigh base bottom. This feature is only available when the sleigh base option is selected.

FLOOR ANCHOR BRACKETS (SLEIGH BASE ONLY)
Floor mounting brackets are supplied to be secured to the bottom of the Solis sleigh base with tamper resistant security screws. The hardware to attach the brackets to the floor is not provided by Krug.

WEIGHTED SHIELD
In place of the Bottom Staple Cover, a weighted black coated steel version is also available. This steel shield is designed to add enough weight for the product to be a minimum of 80 lbs. The shield is also designed to allow standard ganging hardware as well as proper seat ventilation. This is all achieved while also covering/ preventing all access to the upholstery staples under the seat. The Weighted Shield is fastened with tamper-resistant security screws.

COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

ANTI-MICROBIAL FINISH
Solis Silver Metallic frames are available with an anti-microbial finish for an upcharge of **$67 list** per chair or table.

CAL133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified , the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information. CAL 133 and Moisture Barrier is available for **$67 list** per yard.

REMOVABLE COVERS & REPLACEMENT COMPONENTS
Optional Removeable seat and back covers can be quickly installed on Solis products that were originally ordered with the Removable cover option. Replacement seat and back covers can also be installed on Solis products that were not originally ordered with the Removable cover option, with some simple staple removal on the original seats and backs. Complete Mesh backs can be ordered and field replaced.

NO SPRING SEATS
The springs in the seat have been removed and replaced with a solid plywood seat pan, Additional foam has also been added in place of the springs for comfort.

TAMPER-RESISTANT SPLASHGUARD
All Solis seating models are available with a coated steel moisture barrier that covers and enclosed the underside of the seat (while still allowing air transfer and ventilation in and out of the seat cushion). The Splashguard replaces the Bottom Staple Cover on the underside of the seat. It is designed to still allowing ganging and has folded metal edges to prevent any sharp edges. The splashguard is fastened with tamper resistant security screws.

Post-Consumer
Recycled Content = 17.77%

Up to 55.77% of this Faeron Metal product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

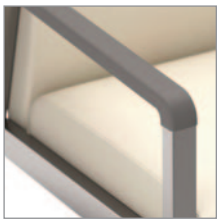
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Faeron products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Faeron products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Faeron and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

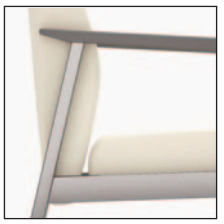
Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.



FAERON BEHAVIORAL HEALTH | GUEST & PATIENT SEATING | FEATURES

FLEX BACK
The ergonomically designed back has been designed with a slight flexing action for enhanced comfort and ease of ingress and egress.

WALL SAVER
The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and the walls of the facility.



POLYMER ARM
Faeron Metal Behavioral Health guest and patient chairs are standard with tamper-resistant polymer arms that are durable, comfortable, and long lasting. Available in black, grey and taupe.

SPRING SEAT CONSTRUCTION
Faeron Metal Behavioral Health guest and patient chairs are designed with spring seat construction and dual density foam for superior longevity, comfort and performance.

STEEL SEAT FRAME
Side frames, backs and seats are attached to a heavy-duty steel frame with tamper-resistant hardware. These components are removable and field replaceable.

CLEAN OUT
Faeron Metal Behavioral Health guest and patient chairs feature a clean out space that supports infection control by enabling debris and fluid to fall to the floor for easy cleaning.

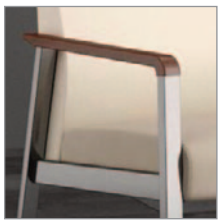
TAMPER-RESISTANT HARDWARE
Tamper-resistant hardware is utilized in the construction of all Faeron Metal Behavioral Health seating. The specific tools needed to remove components for maintenance or replacement are available for purchase from Krug.

INACCESSIBLE STAPLES
An inaccessible galvanized steel band with vinyl edges covers the staples on the back upholstery cover. It is installed with tamper-resistant hardware.

SECURED GLIDES
Faeron Metal Behavioral Health seating features tamper-resistant glides to minimize risk of removal and weaponization.

UNDERSEAT SHIELD
Faeron Metal Behavioral Health guest and patient chairs feature a metal under seat shield that minimizes the risk of access to the upholstery staples. It also minimizes the ability to hide contraband under the seat. The vented shield is compatible with ganging brackets and is installed with tamper-resistant hardware.

LATEX-FREE
Krug products are made with latex-free materials, to help prevent allergic reaction.



WEIGHT CAPACITIES
Tested to meet or exceed the BIFMA X5.4 Standard
Guest & Patient Chairs (21” & 24”) - 500 lbs
Plus Chairs (30” & 44”) - 750 lbs

KINETIC BACK
The optional Kinetic Back provides the chair back with a very pleasant and comfortable rocking motion, which can significantly enhance long-term sitting. The durable spring-loaded mechanism provides a range of motion of 20 degrees, and can be field-installed or replaced. It is available on any Faeron Guest chair back with the exception of the Plus sizes (30" and 44").

SOLID SURFACE ARM
The optional Solid Surface Arm provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in 8 standard Corian colors, and custom colors (at an upcharge). Arms are replaceable as a full side frame if they become damaged or degraded. Solid Surface not recommended for lower acuity environments.

WOOD ARM
Faeron Wood Arm caps are fastened to the side frames. Wood arms are solid Beech and available in standard and custom finishes. Arms can be replaced if they do become damaged or degraded.

CLOSED ARM PANEL
The side frames on Faeron Metal Behavioral Health guest and patient chairs can be enclosed to the center rail.

FULLY CLOSED ARM (SLEIGH BASE ONLY)
The side frames on Faeron Metal Behavioral Health guest and patient chairs can be fully enclosed to the base rail. This can be achieved with 2 panels showing the center rail or a single panel enclosing the center rail. This option is only available with the sled base.

FLOOR ANCHOR BRACKETS
For additional security, tamper- resistant anchor brackets are available to bolt the sled base to the floor. The hardware to attach the brackets to the floor is not included. This option is only available with the sled base.

SPRINGLESS SEATS
The springs in the seats can be replaced with an optional plywood seat pan and dual density foam.

SLED BASE
The sled base ties the front and back legs together with a steel rail. This option minimizes the risk of the chair being weaponized. Optional anchor brackets are available to bolt the base to the floor for additional security.

SUPPLEMENTAL WEIGHT
In place of the standard Underseat shield, an optional weighted black coated steel shield is available. The steel shield is designed to add enough weight for the product to be a minimum of 80 lbs. The shield is also designed to allow standard ganging hardware, seat ventilation and covers all access to the upholstery staples under the seat. The weighted shield is fastened with tamper-resistant hardware.

TAMPER-RESISTANT GANGING BRACKET
Faeron Metal Behavioral Health guest and patient chairs can be ganged together with a tamper-resistant powder coated metal bracket.

COMBINATION UPHOLSTERY
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

REMOVABLE COVERS
Faeron Metal chairs are available with removeable seat and back covers. Replacement covers can be quickly field installed on Faeron products that were originally ordered with the removeable cover option. Replacement seat and back covers can also be installed on Faeron products that were not originally ordered with the removeable cover option, with some simple staple removal on the original seats and backs.

CAL133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified , the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information.

ORDERING NOTES:
The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric or leather will be inspected when received at the factory, to identify any further concerns with its suitability.
Note: Some vinyls, leathers & upholsteries are not suitable for application on Faeron Metal seating.

COMBINATION UPHOLSTERY OPTION
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

Material Content:

Pre-Consumer
Recycled Content = 9.80%

Post-Consumer
Recycled Content = 17.63%

Up to 47.06% of this Faeron Metal product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Faeron products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Faeron products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Faeron and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

30” Plus - One Chair	3.0	0.9	2.0	0.96	3.20

ORDERING NOTES:
The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric or leather will be inspected when received at the factory, to identify any further concerns with its suitability.
Note: Some vinyls, leathers & upholsteries are not suitable for application on Faeron Metal seating.

COMBINATION UPHOLSTERY OPTION
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

ORDERING NOTES:
A drawing showing the configuration of the multiple seating and tables is required with each purchase order.

Combination Upholstery Option
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is $32 list per unit and $61 list per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

Material Content:

PRE-CONSUMER
RECYCLED CONTENT = 12.89%

POST-CONSUMER
RECYCLED CONTENT =7.84%

Up to 14.95% of this Faeron Metal product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Faeron products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Faeron products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Faeron and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

FAERON LOUNGE BEHAVIORAL HEALTH | FEATURES

ARM PANEL POLYMER BASE
Faeron Metal Behavioral Health lounge seating is available with a ligature-resistant, cleanable, Grey polymer base securely fastened to the arm panel.

PLINTH BASE
Faeron Metal Behavioral Health lounge seating is also available with an Grey polymer plinth base that restricts access to the interior of the chair and dirt and debris from accumulating under the chair.

WALL SAVER
Faeron Lounge models feature a wall saver feature. The angle of the back is designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

LIGATURE RISK REDUCTION
Faeron Metal Behavioral Health lounge seating has been designed with ligature-resistant features such as closed arm panels and legless base options to significantly reduce anchor points.

RESTRICTED ACCESS UPHOLSTERY
This feature provides complete closure and elimination of the standard clean out space between seat, back and arm panels in the - hindering the use of these areas for hiding contraband. This feature reduces the ability to utilize the product for ligature.

TAMPER-RESISTANT HARDWARE
Tamper-resistant hardware is utlilized in the construction of all Faeron Metal Behavioral Health seating. The specific tools needed to remove components for maintenance and replacement can be purchased from Krug..

INACCESSIBLE STAPLES
All staples on this product are covered and made inaccessible with a use of polymer underseat shield, fastened with tamper-resistant hardware.

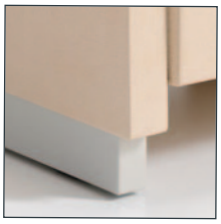
UNDERSEAT SHIELD
The polymer shield is attached with tamper-resistant hardware. It is designed to restrict access to the interior of the chair.

SECURED GLIDES
The glides are screwed in place using temper resistant screws to hinder their removal. They can be field-replaced with the use of tools.

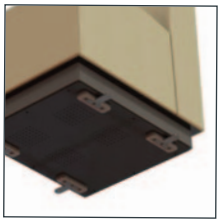
LATEX FREE
Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people.

FINISH DURABILITY
The Krug finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of healthcare environments.

WEIGHT CAPACITIES
Tested to meet or exceed the BIFMA X5.4 Lounge Standard
One-Seat - 500 lbs
One-Seat - Plus - 750 lbs
One-seat Wide - 500 lbs
One-seat Wide Plus - 750 lbs
Two-Seat - 625 lbs
Two-Seat Plus- 975 lbs
Three - Seat - 850 lbs
Three - Seat Plus- 1200 lbs



POLYMER ARM CAP
The optional Polymer Arm cap provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in Black, Grey and Taupe, and is replaceable if it become damaged or degraded.



WOOD ARM CAP
The optional Wood Arm cap provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in all standard wood finishes, and are replaceable if they become damaged or degraded.

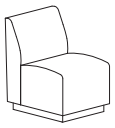
SOLID SURFACE ARM CAP
The optional Solid Surface Arm cap provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in 8 standard Corian colors, and custom colors (at an upcharge). Arms are replaceable if they become damaged or degraded. Solid Surface not recommended for lower acuity environments.

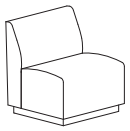
PANEL ARM METAL BASE
An optional powder coated steel panel base is available on Faeron Metal Behavioral Health lounge seating. The base is ligature resistant and installed with tamper-resistant hardware.

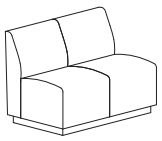
ANCHOR BRACKETS
Heavy duty tamper-resistant anchor brackets are available to secure the chair to the floor.

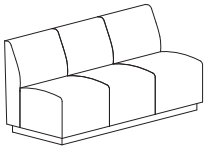
COMBINATION UPHOLSTERY OPTIONS
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

SUPPLEMENTAL WEIGHT
For additional safety and to minimize risk of weaponization, Faeron Behavioral Health Lounge can be specified with supplemental weight in increments of 10 lbs. at an upcharge of **$56 list** per 10 lb. increment.









REMOVABLE/REPLACEABLE UPHOLSTERY
Removable upholstery covers can be specified on this product, to facilitate cleaning and assist with infection control. They utilize tamper-resistant hardware, and inaccessible staples. Replacement upholstery covers have the same features, and can be field installed with tamper-resistant fastener tools.

CAL133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified , the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $874 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information.

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Zola products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

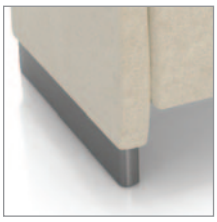
AIR-EMISSIONS
All Zola products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Zola and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

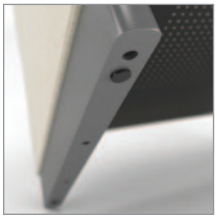
Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

ZOLA BEHAVIORAL HEALTH | FEATURES

TAMPER-RESISTANT HARDWARE
This is utilized on all connection points of the product that are (or potentially) accessible, hindering components from being removed or the product being dis-assembled. The unique tools for these fasteners are available from Krug for any maintenance and component replacement.

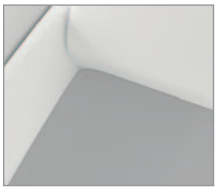


INACCESSIBLE STAPLES
All staples on this product are covered and made inaccessible with a secondary barrier, which is fastened with tamper-resistant hardware.



LIGATURE RISK REDUCTION
This product has been designed to minimize the ability to use it for ligature - the closed arm panels, the elimination of legs, and the option of Restricted Access Upholstery significantly reduce the points on the product that could be used for ligature.

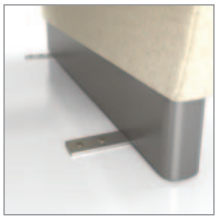
SPRINGLESS SEAT CONSTRUCTION
A very comfortable and durable sit is achieved without internal metal components such as springs - the high resiliency foam and heavy-duty suspension sheet webbing are materials used to deter harm or damage.



ARM PANEL BASE
This product has no legs (which could be used to cause harm or damage, or for ligature); instead the bottom portion of each arm panel is a 3" vinyl-clad runner. The durable covering is tightly secured, easy to clean, and will resist damage caused by cleaning equipment, etc.

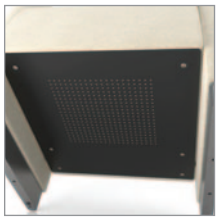
SECURED GLIDES
The glides are epoxied and nailed in place to hinder their removal. They can be field-replaced with the use of tools.

WALL SAVER
The position of the back in relation to the base of this product is designed so the back won't impact when the chairs are pushed against the wall - avoiding potential damage to both the chairs and walls.



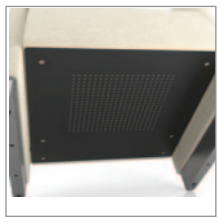
RESTRICTED ACCESS UPHOLSTERY
This feature provides complete closure and elimination of the normal gap between upholstered seat, back and arm panels in the seat area of the product - hindering the use of these areas for hiding weapons and contraband. This option further reduces the ability to utilize the product for ligature.

FINISH DURABILITY
The Krug ‘s proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of healthcare environments.



LATEX FREE
Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people.

WEIGHT CAPACITIES
Zola Behavioral Health weight capacities are as follows:
One Seat - 300lbs
Two Seat - 525
Three Seat - 750
One Seat Plus - 750
Two Seat Plus - 975
Three Seat Plus - 1150



ADDITIONAL FEATURES
- Lifetime warranty
- Certified to meet CAL 117 with most fabrics

FLOOR ANCHORING
This can be provided when the product is ordered, or can be added in the field. In both cases, the fastening hardware attaching the steel floor anchoring brackets to the product is tamper-resistant.

STEEL BOTTOM SHIELD
This hinders access to the interior frame and components. The powdercoated heavy-gauge steel has venting to allow circulation (venting holes are small enough to hinder use for concealment or ligature), and is fastened with tamper-resistant hardware. The Bottom Shield also adds weight to the product.

WEIGHTING
The option of additional weighting can be specified, to specific weight requirements. Additional weighting is achieved through steel plating that is fastened to the interior side of the Steel Bottom Shield, making it secure and inaccessible. This option increases total shipping weight to 87lbs.

PLUS UPGRADE
The offering includes a standard plus-size 1-seater model, as well as the option to specify plus weight rating for all other models in the offering - this provides a weight rating that exceeds 750 lbs, and includes additional seat support and an additional back leg on the 2- and 3-seat models only.

REMOVABLE/REPLACEABLE UPHOLSTERY
Removable upholstery covers can be specified on this product, to facilitate cleaning and assist with infection control. They utilize tamper-resistant hardware, and inaccessible staples. Replacement upholstery covers have the same features, and can be field installed with tamper-resistant fastener tools.

TABLES
A range of occasional tables designed specifically for behavioral health environments is included in this product offering, with a similar range of features and options to provide safety and security to patients and care-givers.

CAL133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified , the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information.

MATERIAL CONTENT:

Pre-Consumer
Recycled Content = 28.61%

Post-Consumer
Recycled Content = 9.91%

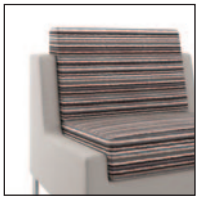
Up to 8.81% of this Leyton product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Leyton products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.



AIR EMISSIONS
All Leyton products are supplied air-emissions certified. Contact customer service for information and upcharges.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Leyton and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

ARM STYLE

Leyton Behavioral Health features two design styles Upholstered Armless, Upholstered Full Arm.

Upholstered Armless

Upholstered Full Arm

RESTRICTED ACCESS UPHOLSTERY

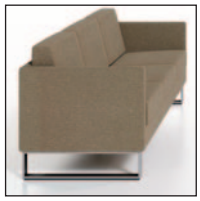
This product has been designed to minimize the ability to use it for ligature - the closed arm panels, the elimination of legs, and the option of Restricted Access Upholstery significantly reduce the points on the product that could be used for ligature.

TAMPER-RESISTANT HARDWARE

This is utilized on all connection points of the product that are (or potentially) accessible, hindering components from being removed or the product being dis-assembled. The unique tools for these fasteners are available from Krug for any maintenance and component replacement.

UNDERSEAT SHIELD

The polymer shield is attached with tamper-resistant hardware. It is designed to restrict access to the interior of the chair.



REPLACEABLE COMPONENTS

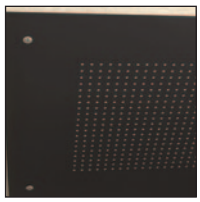
Leyton chairs are uniquely designed to allow major components to be field replaced, providing a very cost effective means to significally extend the life of the product. Seats, backs, arms and frames are field replaceable, with the only exceptions being the Upholstered Armless, Upholstered Full Arm and Upholstered Front Panel as it is one piece.

COMBINATION UPHOLSTERY

When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

SLED BASE

The sled base also features Polished Chrome structural steel with Black glides.



POLYMER PLINTH BASE

Leyton Behavioral Health lounge seating is also available with an Grey polymer plinth base that restricts access to the interior of the chair and dirt and debris from accumulating under the chair.

FLOOR ANCHORING

This can be provided when the product is ordered, or can be added in the field. In both cases, the fastening hardware attaching the steel floor anchoring brackets to the product is tamper-resistant.

SUPPLEMENTAL WEIGHT

For additional safety and to minimize risk of weaponization, Leyton Behavioral Health Lounge can be specified with supplemental weight in increments of 10 lbs. at an upcharge of **$54 list** per 10 lb. increment.

SECURED GLIDES

The glides are screwed in place using temper resistant screws to hinder their removal. They can be field-replaced with the use of tools.

CAL 133 & MOISTURE BARRIER

California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge. See page 628 for more information.

LEYTON | FINISHES & LAMINATES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
OAK	Light Oak SilverGrey on Oak Espresso Oak Harvest Oak Mahogany Mellow oak
MAPLE	Clear Maple Honey Maple Wheat Maple
WALNUT	Natural Walnut SilverGrey on Walnut Regular Walnut Dark Walnut Cordovan Walnut
CHERRY	Appalachian Cherry American Cherry Imperial Cherry Sable Cherry Light Cherry Medium Cherry Natural Cherry Standard Cherry
ANIGRE	Clear Anigre Medium Anigre
SYCAMORE	Clear Sycamore

Please note Cherry, Anigre and Sycamore species require a minimum quantity order, of 5 units for seating and 5 units for tables, per species.

PALETTE	Black White Sand Soft Green Steel Blue Slate

VENEERS
Leyton veneers are quarter cut, except for White Oak, which is rift cut - both quarter cut and rift cut veneers provide a straight grain appearance. The grain direction of the veneers on vertical faces is horizontal.

NON-STANDARD VENEER SPECIES
In addition to range of standard wood species, Leyton can be made with virtually any commercially available veneers. Please contact customer service for information and pricing on wood species not included in Leyton's standard offering.

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules.

Special finish upcharges on seating products are calculated on a grade 1 value. For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

KRUG FINISH
Leyton features the Krug's proprietary catalyzed varnish formulation, that has repeatedly shown through independent laboratory testing to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors and is uniquely suited to the demands of high traffic environments.

IN-STOCK LAMINATE
Krug's in-stock laminates are available on Leyton Table surfaces in 4 solid laminate selections. Laminate surfaces are self-edged.

SOLID LAMINATES
Designer White - Platinum - Earth - Charcoal

COM APPROVAL PROCESS:
The approval process is as follows:
1. A sample of the COM fabric must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric will be inspected when received at the factory to identify any further concerns with its suitability.

TATE BENCH BEHAVIORAL HEALTH | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

Bench Seating

Material Content:

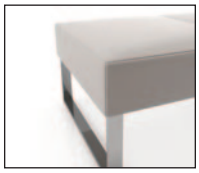
Pre-Consumer
Recycled Content = 9.09%

Post-Consumer
Recycled Content = 24.26%

Up to 26.97% of this Tate product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.



level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Tate products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Tate products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Tate and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

STYLE
Tate Bench features two design styles; Fully Upholstered & Full Gable End.

LEGS
Tate Bench legs feature polished chrome structural steel legs with non-marring glides. Legs are field replaceable.

LIGATURE RISK REDUCTION, FULL GABLE END
This option has been designed to minimize the ability to use it for ligature - the elimination of legs with the closed end, significantly reduce the points on the product that could be used for ligature.

TAMPER-RESISTANT HARDWARE
This is utilized on all connection points of the product that are (or potentially) accessible, hindering components from being removed or the product being dis-assembled. The unique tools for these fasteners are available from Krug for any maintenance and component replacement.

INACCESSIBLE STAPLES
All staples on this product are covered and made inaccessible with a secondary barrier, which is fastened with tamper-resistant hardware.

BOTTOM SHIELD
This hinders access to the interior frame and components. The bottom shield has venting to allow circulation (venting holes are small enough to hinder use for concealment or ligature), and is fastened with tamper-resistant hardware.

FLOOR ANCHORING
This can be provided when the product is ordered, or can be added in the field. In both cases, the fastening hardware attaching the steel floor anchoring brackets to the product is tamper-resistant.

SUPPLEMENTAL WEIGHT
The option of additional weighting can be specified, to specific weight requirements. Additional weighting is achieved through steel plating that is fastened to the interior side of the Steel Bottom Shield, making it secure and inaccessible. This option increases total shipping weight to 87lbs.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.

WEIGHT CAPACITIES
Tate Bench have the following maximum weight ratings:
2 seater - 975 lbs
3 seater - 1,200 lbs

TATE BENCH | FINISHES & LAMINATES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
OAK	Light Oak SilverGrey on Oak Espresso Oak
MAPLE	Clear Maple Wheat Maple
WALNUT	Natural Walnut SilverGrey on Walnut Regular Walnut Dark Walnut

PALETTE FINISHES
Black
White
Sand
Soft Green
Steel Blue
Slate

WOOD FINISHES TO MATCH STANDARD LAMINATES
Willow on Rift Oak
Portobello on Rift Oak
Ash on Rift Oak
Park Avenue Walnut
Chocolate on Walnut
Nutmeg on Walnut
Dune Maple

VENEERS
Tate Bench veneers are quarter cut, except for White Oak, which is rift cut - both quarter cut and rift cut veneers provide a straight grain appearance. The grain direction of the veneers on vertical faces is horizontal.

NON-STANDARD VENEER SPECIES
In addition to range of standard wood species, Tate can be made with virtually any commercially available veneers. Please contact customer service for information and pricing on wood species not included in Tate's standard offering.

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

LAMINATES

Krug's in-stock Laminates are available in 17 different laminate selections. Please note that 4 of the colors (Gingerbread, Portobello, Ash and Willow) have textured finishes and may not be appropriate for use in patient areas due to infection control concerns. Minimum order quantities and extended lead times may apply for exotic laminate colors, please check with customer service. Polymer Edge will be selected to match the worksurface. Krug's previous laminate in-stock program will be phased out as in-stock supply depletes. Please contact customer service for availability.

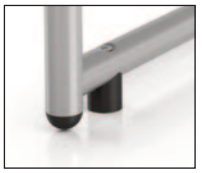
KARMA | BEHAVIORAL HEALTH FEATURES & OPTIONS

TAMPER RESISTANT HARDWARE
All screws used on the Karma Behavioral Health units have been replaced with tamper resistant security screws.

TAMPER-RESISTANT GLIDES
Karma chairs have their glides secured in place to prevent their removal and damage.

NON-ACCESSIBLE STAPLES
The Karma back upholstery has been altered to allow a nylon staple cover strip to be attached; this will prevent access to the upholstery staples. The back cover strip is fastened to the unit with tamper-resistant security screws.



SLED BASE
Sled base is an integrated rail spanning the front to back leg. Karma chairs with the Sled Base option do not stack.

TAMPER RESISTANT ARMS
Polymer arms are equipped with added hardware, internal to the tube frame making them tamper resistant to removal from the tube. Available in four colors (Black, Grey, Light Grey & Taupe)

ADDED WEIGHT OPTION
Karma can be supplied with supplemental weight on the bottom of the seat adding 23lbs to each chair. When chairs are weighted they cannot be ganged.

FLOOR ANCHORING OPTION
Sled base can be supplied with additional holes and bushings to allow for fastening to the floor.

ORDERING NOTES:
To specify Floor Anchor Bracket option, add "PA" to the model number following BH and **$406 list** to the pricing above.
Example; 720536BH**PA**29DB

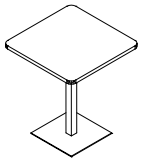
To specify Supplemental Weight option, please contact Customer Service for pricing and information.

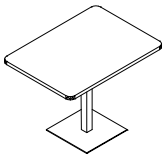
ORDERING PROCEDURE

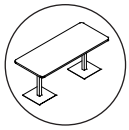
To order please specify the following:

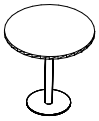
1. Select model number
2. Select top material
3. Select a color for top
4. Select base finish
5. Select edge profile

BASE FINISH









Round Disc Base, Brushed Stainless- DB-13
Square Plate Base, Brushed Stainless- SQ-13
Round Disc Base, White- DB-44
Square Plate Base, White- SQ-44
Round Disc Base, Matte Black- DB-14
Square Plate Base, Matte Black- SQ-14

MATERIALS

For a complete list of Solid Surface colors please see Page 643. Solid Surface is only available in the D Radius edge profile.

For a complete list of Laminate colors please see Page 643.

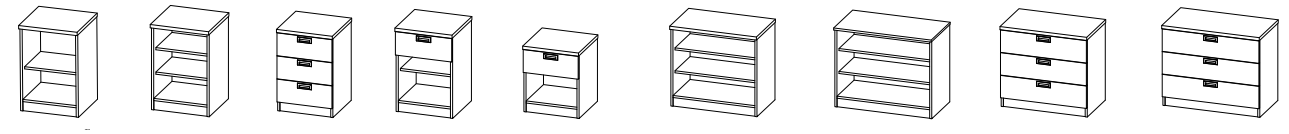
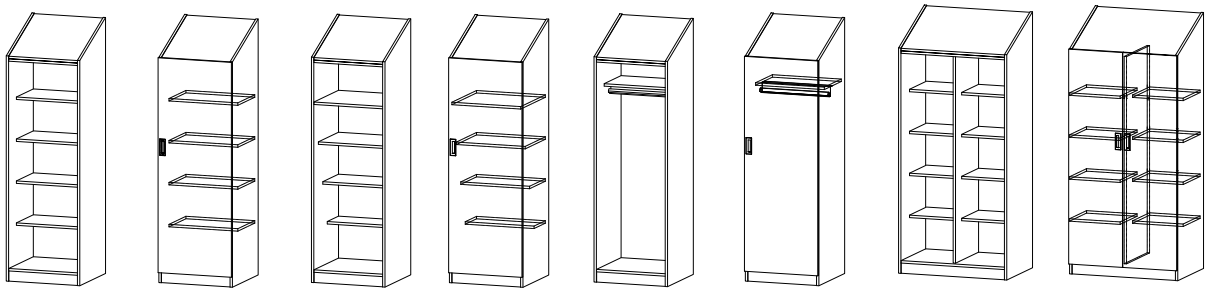
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

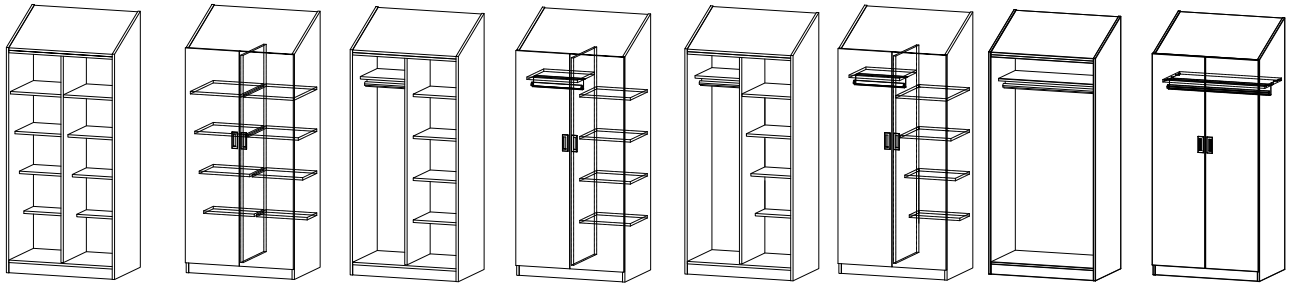
level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Juno products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.



AIR-EMISSIONS
All Juno products are supplied with air-emissions certified. Contact customer service for information.

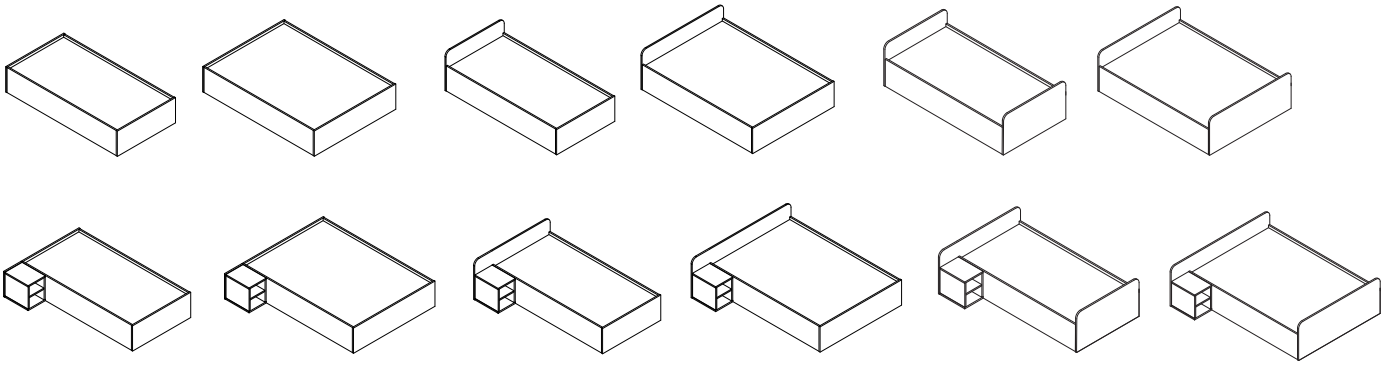


FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Juno and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.



Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

JUNO BEHAVIORAL HEALTH | STATEMENT OF LINE



STATEMENT OF LINE:

CUSTOM CAPABILITY
Krug offers standard products in customs sizes in addition to completely customized units.

CLEANABILITY
Juno Behavioral Health casegoods manufactured with Krug standard laminates can be cleaned with mild soap and warm water. Do not use steel wool, hot water, or any other abrasive cleaning product. For non-standard laminates, follow the manufacturers instructions. Solid surface tops can be cleaned with 5%? bleach diluted solutions.
https://krug.ca/wp-content/uploads/2023/11/Cleaning-Guidelines.pdf

ENVIRONMENTAL FEATURES
Juno Behavioral Health casegoods are manufactured with a significant amount of recycled content that contributes to both LEED credits 4.1 and 4.2. In addition, the freight packaging is recyclable and Greenguard certification is an option.

DURABILITY
Juno Behavioral Health casegoods are manufactured with ¾" low-pressure laminate panels that are glued and dowelled for superior strength, safety and durability. All exposed particle board has 3mm polymer edge-banding to restrict moisture and bacteria from seeping into the core. Tamper-resistant hardware is used to attach doors, drawers, pulls and J-bars..

TOPS
Tops on bedside tables, dressers and desks are 1" thick low-pressure laminate with particle board core and 3mm polymer edge-banding. Tops on wardrobes are ¾" thick low-pressure laminate with 3mm polymer edge-banding and feature a 25-degree slope.

DRAWERS
Drawers feature white metal sides with integrated glides for easy cleaning and disinfection and white low-pressure laminate backs and base panels. All exposed particle board has 3mm polymer edge-banding. Drawers are fixed and non-removable.

DRAWER FRONTS
Drawer fronts are 3/4" thick low-pressure laminate with 3mm polymer edge-banding and are installed with tamper-resistant hardware.

DOOR AND DRAWER PULL
Drawer pulls are inset to reduce ligature risk and are installed with tamper-resistant hardware
.
DOOR HINGES
Wardrobe doors are attached with a heavy gauge steel piano hinge that is ligature-resistant. The hinge is installed with tamper-resistant hardware.

SHELVES
Shelves on bedside tables, dressers and desks are inset 2", fixed and non-removeable. Shelves on wardrobes are inset 7", fixed and non-removeable. Reverse stair step shelving is also available on wardrobes.

BASE RAIL
Cabinets feature a ¾" low-pressure laminate base rail that restricts access to the underside of the cabinet.

PLATFORM BEDS
Juno Behavioral Health platform beds feature double wall construction and are completely enclosed. Non-removable, non-pickable caulking is installed around the deck perimeter, minimizing the risk of access to the core and reducing the risk of fluids seeping into the interior.

MATTRESS
The Juno Behavioral Health mattress has a durable tear, puncture and fluid resistant anti-microbial vinyl cover over a polyurethane foam core. Welded seams reduce the risk of bed bugs and the moisture barrier supports infection control..

HARDWARE
All hardware is tamper-resistant.

WARRANTY
Juno Behavioral Health casegoods have a lifetime warranty.

JUNO BEHAVIORAL HEALTH | OPTIONS

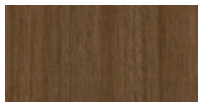
Anchor Brackets
Tamper-resistant anchor brackets are available to attach casegoods and beds to the floor for additional safety and security. Krug provides the hardware to attach to the casegoods and beds, but installer must provide hardware to attach to the floor.

Lower Wardrobe Shelf
Wardrobes with J-Bars are available with an optional lower shelf that is 12” above finished base panel.

Restraint Brackets
Four stainless steel restraint brackets are installed on both sides of the bed.

High Pressure Laminate
Casegoods can be specified in high pressure laminate for an upcharge.

STANDARD LAMINATE PROGRAM



All colors are available in laminate, and high-pressure laminate. Polymer Edge banding matches the laminate selections

KARMA | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:

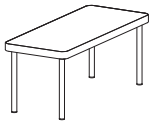
PRE-CONSUMER
RECYCLED CONTENT = 29.17%

POST-CONSUMER
RECYCLED CONTENT = 42.67%

Up to 46.67% of this Karma product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.



level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Karma products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Karma products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Karma and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

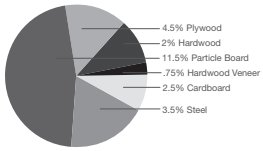
CRESSIDA | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:



PRE-CONSUMER
RECYCLED CONTENT - 36.34%

POST-CONSUMER
RECYCLED CONTENT - 26.4%

Up to 31.25% of this Cressida product is recyclable at the end of its useful life.

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT - 30.77%

POST-CONSUMER
RECYCLED CONTENT - 25.68%

Up to 27.88% of this Cressida product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

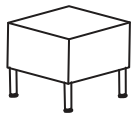
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

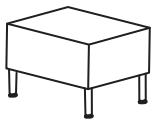
level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Cressida products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

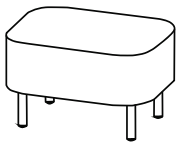
AIR-EMISSIONS
All Cressida products are supplied with air-emissions certified. Contact customer service for information.

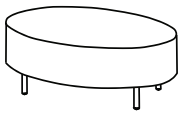
FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Cressida and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

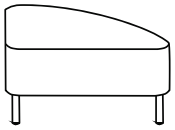
Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.





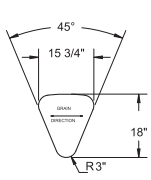




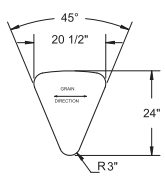


ANTI-MICROBIAL FINISH
Cressida wood surfaces include an anti-microbial finish that inhibits the growth of some molds and mildews. Surfaces coated in this finish support the reduction of fungal growth, and spores from germs, microbes and bacteria

STANDARD FINISHES
For a complete list of standard wood finishes, please see Page 642. Cressida tables are available in 22 standard finishes.



LAMINATE
Cressida Box-style tables are available in laminate with wood side or laminate side. See Page 643 for laminate information.



SOLID SURFACE
Cressida Box-style & Slab-style tables are available with 1/2" solid surface tops. Cressida Light-style tables are available with full solid surface tops, 1" thick. Please contact customer service for a quote.

ORDERING NOTES: When fastening two linking tables together, mounting hardware will be provided when ordered, that will include one leg per table (to a maximum of two legs), which will be mounted on the adjoining seam. Cressida Middle tables have the ability to be easily reconfigured, as they are universal and non-handed. They can be moved to a reverse position in almost any configuration to provide a high level of flexibility when specifying.

ORDERING NOTES:
Linking tables can be ordered in conjunction with any of the Krug Multiple Seating. Linking tables are connected to the Multiple Seating via Linking brackets. Hardware for tables can be used left or right handed.

The design of the tables for Cressida Multiple Seating allows for any table to be very easily added or moved to a new position within the configuration - or completely replaced - after the product has been first installed. The attachment of the tables is designed so that they can be readily be taken out of the configuration without any defacing of the adjoining seat frames.
Linking Tables also feature a universal, non-handed design:
They can be moved to reverse position in almost any configuration, providing a high level of flexibility for reconfiguring.

A drawing showing the configuration of the multiple seating and tables is required with each purchase order.

METAL FINISH OPTIONS
Silver Metallic frames are available with an anti-microbial finish for an upcharge of **$67 list** per arm frame pair or table. Additional Frame Finishes, which include anti-microbial finish, are available for an upcharge of **$67 list** per per arm frame pair or table. Available colors are: White, Parchment, Sand, Taupe, Warm Grey, Cool Grey or Black.
For all metal finishes other than Silver Metallic Standard, there is a minimum order quantity of 30 units per color. Upcharges for order quantities less than 30 units per color or custom metal finishes, please contact Customer Service to obtain a quote.

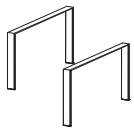
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Leyton products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.



AIR-EMISSIONS
All Leyton products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Leyton and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

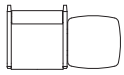
WOOD SPECIES
Solid Beech frames, and edges.
Veneer tops.

STANDARD FINISHES
For a complete list of standard wood finishes, please see Page 642. Faeron tables are available in 22 standard finishes.

LAMINATE AND POLYMER EDGE
Faeron tables are available in laminates with with Polymer edge.
See Page 643 for laminate information.

ORDERING NOTES:
Linking tables can be ordered in conjunction with any of the Krug Multiple Seating. Linking tables are connected to the Multiple Seating via U-Shaped brackets.

The design of the tables for Faeron Multiple Seating allows for any table to be very easily added or moved to a new position within the configuration - or completely replaced - after the product has been first installed. The attachment of the tables is designed so that they can be readily be taken out of the configuration without any defacing of the adjoining seat frames.



Linking Tables also feature a universal, non-handed design:
They can be moved to reverse position in almost any configuration, providing a high level of flexibility for reconfiguring.

Please note Faeron Laminate Linking Tables are not available on *KrugExpress.*
Wood Tops with Wood Edges are available on *KrugExpress* but with a minimum order requirement of 5 tables per order.

A drawing showing the configuration of the multiple seating and tables is required with each purchase order.

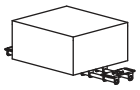
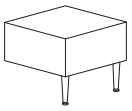
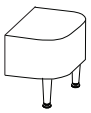
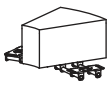
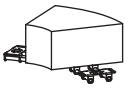
ZOLA | TABLES FEATURES











TABLES MATERIALS OPTION
Tables are available in veneer, plastic laminate, and Palette finishes - and an optional solid surface top. Tables feature leveling glides on every leg.

SOLID SURFACE TOPS
The Solid Surface Top option features Solid Surface material: composed of minerals, acrylic resins and colors, it is a non-porous, scratch and dent-resistant material that does not stain, and does not allow microbes and bacteria to penetrate the surface. Color is throughout the material, so surface scratches are not as visible.

POWER OPTION
The flush-mounted Power unit provides dual power/USB A & C outlets for multiple devices. It can be located on the front face of Middle or End Tables (not available on curvilinear models) To specify, clearly mark on the order and add **$679 list.**

UNDER-MOUNT POWER OPTION
The Under-mount Power unit provides dual power/USB A & C outlets for multiple devices. It can be located below tables.
See **Page 283** for pricing.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Jordan products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Jordan products are supplied with air-emissions certified. Contact customer service for information.

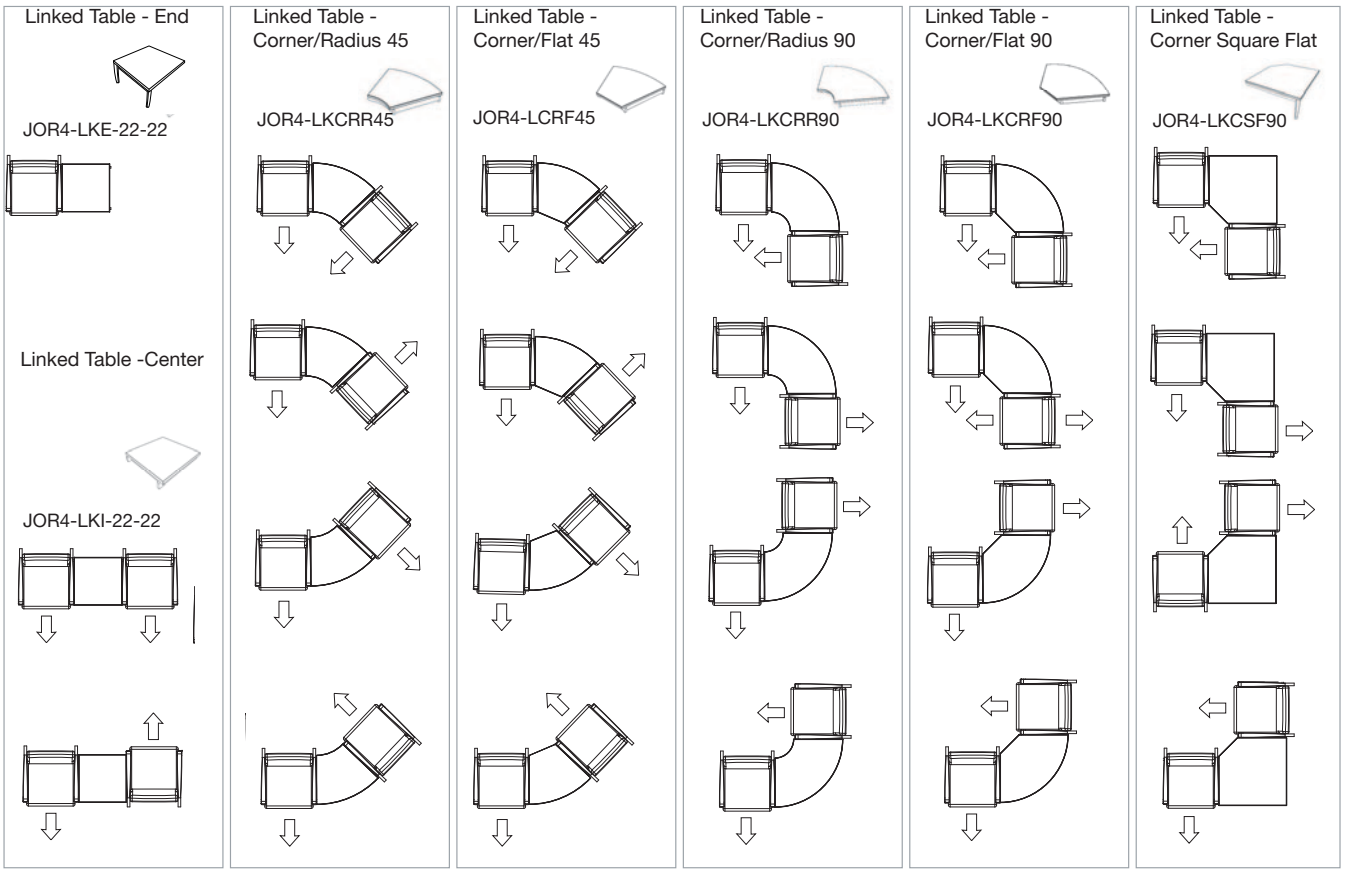
FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Jordan and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

WOOD SPECIES
Solid Beech & Maple frames, and edges.
Veneer tops.

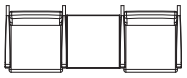
STANDARD FINISHES
For a complete list of standard wood finishes, please see **Page 642** . Jordan tables are available in 22 standard finishes.

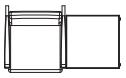
LAMINATE AND POLYMER EDGE
Jordan tables are available in laminates with wood or laminates with Polymer edge.
See **page 643** for laminate information.
Please specify species, Beech or Maple, for the base frame under the laminate top.

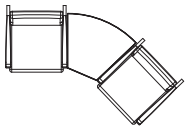


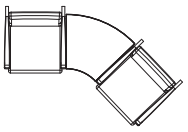
ORDERING NOTES:
Linking tables can be ordered in conjunction with any of the Krug Multiple Seating. Linking tables are connected to the Multiple Seating via U-Shaped brackets.

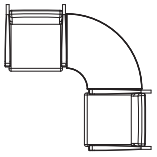
The design of the tables for Jordan Multiple Seating allows for any table to be very easily added or moved to a new position within the configuration - or completely replaced - after the product has been first installed. The attachment of the tables is designed so that they can be readily be taken out of the configuration without any defacing of the adjoining seat frames.

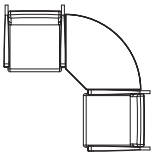


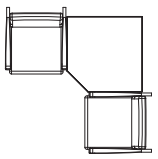












Linking Tables also feature a universal, non-handed design:
They can be moved to reverse position in almost any configuration, providing a high level of flexibility for reconfiguring.

Please note Jordan Plastic Laminate Linking Tables are not available on *KrugExpress.* Please specify species, Beech or Maple, for the base frame under the laminate top.
Wood Tops with Wood Edges are available on *KrugExpress* but with a minimum order requirement of 5 tables per order.

A drawing showing the configuration of the multiple seating and tables is required with each purchase order.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
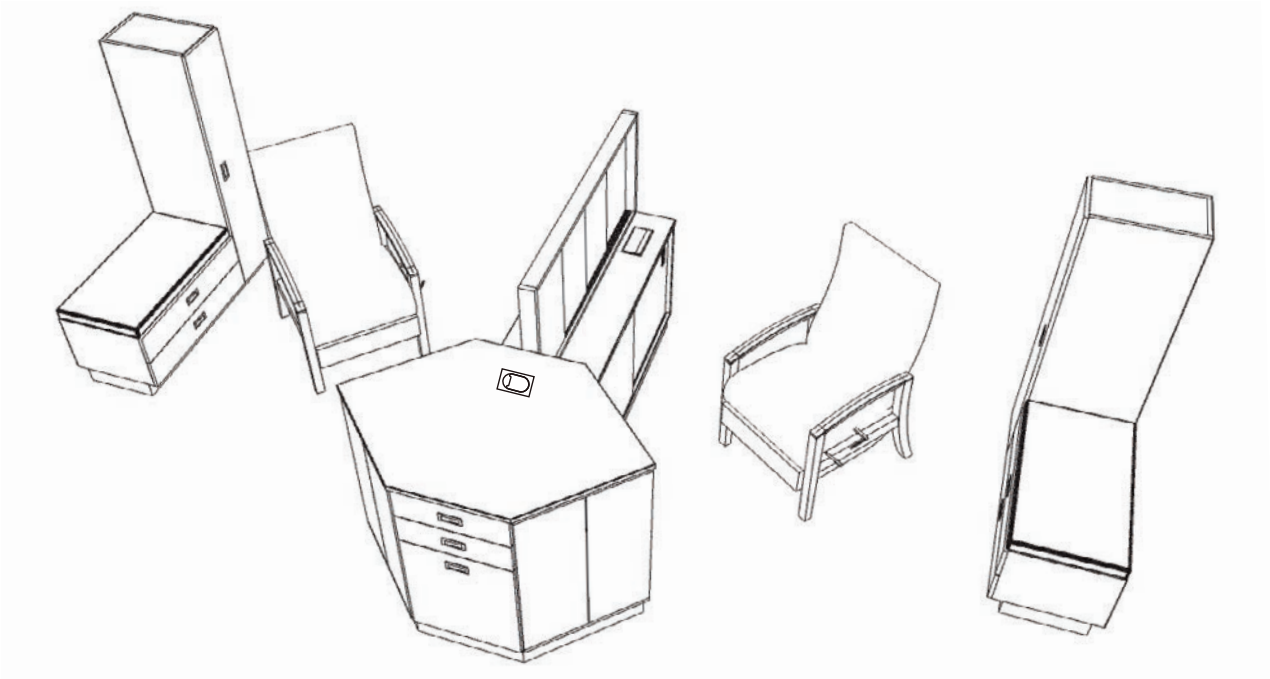
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Tranquility products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Tranquility products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations.Tranquility and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

Tranquility infusion bay furniture was designed to provide effective solutions for several applications including chemotherapy units within oncology departments, and areas administering renal dialysis.



Before actual product was even contemplated, extensive research was completed to understand the needs of the infusion patient and their supporting caregivers and family or friends.

Foremost among these needs was the requirement to provide the patient with privacy during their treatment sessions or the option to socialize and share experiences with a neighboring patient. And we wanted to put the patient in control of their choices to the largest extent possible. It was clear that the furniture needed to allow the patient to embrace nature where possible and that the product components should reflect natural elements. The furniture needed to contribute to a quiet and soothing environment in which the patient could comfortably relax, rest, work or enjoy a snack. We also learned the physical requirements of each of the patients, caregivers and family and friends. This included the needs for storage of belongings, supplies, and disposal of various types of wastes, as well as the supports for the treatment. Finally, it was clear that the product had to make maximum use of space, as cost-effectively as possible.

Tranquility is a highly-effective response to the needs. The core of the design is the use of sliding resin panels embedded with organic elements to divide patient bays. At the mutual agreement of neighboring patients, the resin panels can be slid open to provide an opportunity to visit and share experiences. The patient is provided with many options - swivel to take in an outside landscape, converse with another patient or a family member, rest in privacy, read, watch a movie, or work on their computer. There is ample storage for personal belongings. A warming blanket can be located in a drawer beside them. There is space for the caregiver to store supplies, dispose of wastes and maintain charts. The unique Combination Patient Entertainment/Nurses' Module provides space for TV and DVD for two patients as well as work space and storage for caregivers, all in one unit at a minimized footprint.

Tranquility – an outstanding solution for cancer care and other treatment applications.

TRANQUILITY | FEATURES & OPTIONS

BREADTH OF LINE:
The Tranquility infusion casegoods offering provides solutions from contemporary to transitional to traditional styling. The line includes wardrobes, benches, patient divider modules, sliding resin partitions, patient entertainment module, nurses' modules and combination patient entertainment / nurses' modules.

CUSTOM CAPABILITY:
Krug can offer both custom sizes of standard product and completely custom units. For more information, please contact Customer Service.

DURABILITY:
Cabinets are constructed of ¾" thick panels including backs. In contrast to cabinets constructed with 1/8" back panels, the Tranquility units are more robust and less susceptible to damage. All exposed laminate edges are covered with 2.5 mm polymer edgebanding in colors matching the laminates. This thicker edgebanding provides an increased level of durability on all edges as well as a 2.5 mm radius on the edge. The softer radius is less likely to bruise or cut the skin of a patient or caregiver.

LAMINATES:
"Laminate" is variously known in the marketplace as Thermofused Melamine, Low-Pressure Laminate or LPL. There are 2 solid color options and 7 wood-grain colors. Colors are available in laminate, high-pressure laminate or thermoformed vinyl. Polymer Edgebanding matches the laminate selection. Wood finishes to match the wood-grain laminates are available for Krug Healthcare Seating.

VENEER:
The Tranquility product is also available in maple veneer. The veneered version is available with the Delphine front.

AIR-EMISSIONS:
All products can be air-emissions certified. Upcharges and extended leadtimes may apply. Please contact customer service for more information.

WARRANTY:
All cabinets carry a limited lifetime warranty.

SUSTAINABILITY
Tranquility cabinets have a very high recycled content and contribute to both LEED credits 4.1 and 4.2. The packaging is recyclable. Non-urea-added core is available as an option and air-emissions certified product is also optionally available. FSC-certified wood may be possible on larger projects.

DRY FIT CONSTRUCTION:
Cabinets, other than the combination patient entertainment/nurses' modules and patient divider modules, are assembled with mechanical cams. This is known as dry fit construction. The result is that any panel can be replaced if damaged, unlike cabinets that are glued together where damage to any surface leads to replacement of the entire unit.

SEALED CORE:
All unseen particle board edges that are not covered by an adjoining panel are edge banded (i.e. no exposed particle board). As with the vent covers noted above, this prevents moisture and bacteria from seeping into the core.

BASES:
Separate plywood 4" bases including leveling glides are supplied for cabinets. Bases are included in the component pricing and do not need to be specified separately. Typically the vinyl base molding used in the room would be applied. HPL cladding can be ordered as an option. HPL is grey unless otherwise requested.

MASTER KEY
Tranquility cabinets have the option to lock with a master key.
This must be specified on the order.

HIGH - PRESSURE LAMINATE BASES
Standard Tranquility base is plywood. Optionally, this can be clad in HPL.

CABINET MOUNT MARKERBOARD:
The Markerboards are 24" high by 12" wide (slightly narrower on 12" wide wardrobes). They can be mounted to the inside or outside of the cabinet door.

CABINET MOUNT MIRROR OPTION:
The Mirrors are 24" high by 12" wide and acrylic. They can be mounted to the inside or outside of the cabinet door.

DOOR AND DRAWER PULL STYLES:
The Indus pull eliminates a protrusion that could bruise a patient or caregiver. The finish is Silver Metallic.
Circa offers a very large grip. The pull could be accessed with a closed knuckle. It has a Silver Metallic finish.
Ravenna is an attractive transitional pull in satin nickel.
Padua is a traditional pull in antique brass.

BENCH:
The cushion for the bench is 3" thick. The plus version of the bench supports 500 pounds

SLIDING RESIN PANELS:
Krug can quote and procure a wide variety of Translucent Resin Panels, many of which are embedded with organic materials.

VENTS:
There is one 1" diameter vent for each drawer and each door set for air circulation on the benches & wardrobes. All vent holes are covered with plastic vents both inside and outside to eliminate exposed particle board, thus preventing moisture and bacteria from entering the core.

DRAWERS:
Drawers have white metal sides with white laminate bottoms and backs, and all exposed particle board edges are edge banded.
The unobstructed metal sides facilitate cleaning. Bumpers are installed on all drawers and doors to soften the sound of closing.
Large drawers use white Laminate sides and extension slides.

Locking Top Drawer or Door
Tranquility cabinets have the option to lock. They can be randomly keyed for security. The lock option is factory installed and must be specified on the order.

TOPS:
Tops can be laminate with polymer edgebanding, high-pressure laminate with polymer edgebanding or solid surface.
Tops on units over 40" high are laminate only.
Laminate and veneer tops are 3/4" thick. High-pressure laminate and solid surface tops are 1" thick and cabinets with those tops are 1/4" taller.

DOOR / DRAWER FRONTS:
Door / drawer fronts are 3/4" thick and 3 styles are available.
- Delphine - Laminate with Polymer Edge or Veneer
- Como - seamless Thermoformed Vinyl with white backs
- Bassano - seamless Thermoformed Vinyl with white backs (Como and Bassano fronts are not available on Patient Divider Modules)
- Veneer - veneer front with 3mm wood edge

TRANQUILITY | SPECIFYING

REQUIRED TO SPECIFY
After each product grouping in the following pages, there is a summary under the title “Required to Specify”. The summary lists the elements that need to be specified including Model Number, Base, Pull Style and Color, Body Style and Color,

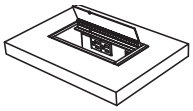
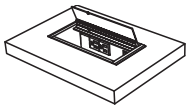
CABLING GROMMET Cabling grommet 159

A black cabling grommet with an opening in the cover provides a cable passage for cords. The removable cover serves to provide a large cable passage when required.
Cabling grommets can be combined with powerbars to provide cable management as well as connections for electrical/voice/data.
Black Rectangular grommet 4 1/8" x 2 11/16"
Cabling grommets can be located on the top and sides for the Combined Patient Entertainment/ Nurses' Module.
For other nurses' modules the location is top center/back.



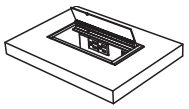
POWERBAR

Powerbar (Category 5/6 A)
The powerbar comes standard with 3 receptacles, 2 RJ45 ports and a 10' heavy duty power cord. 133
The powerbar is a UL/CSA - approved power/data powerbar, which includes three 115-volt electrical convenience outlets and two data ports - all easily accessed behind the touch latch door of the cable management cavity in the Combined Patient Entertainment/ Nurses' Module.



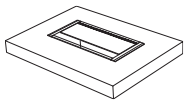
POWERPORT
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user's needs. It includes a UL approved electrical, voice and data power bar, containing two 115 - volt electrical simplex outlets which are accessible from the work surface, plus a utility outlet at the end for daisy chaining purposes. 3 data versions are available.

Power Port, 2-RJ45's, Category 5/6



88POWERPORT1
Port Includes: 2 simplex, 1 utility, 2 RJ45's, category 5/6, horizontal cable management. 416

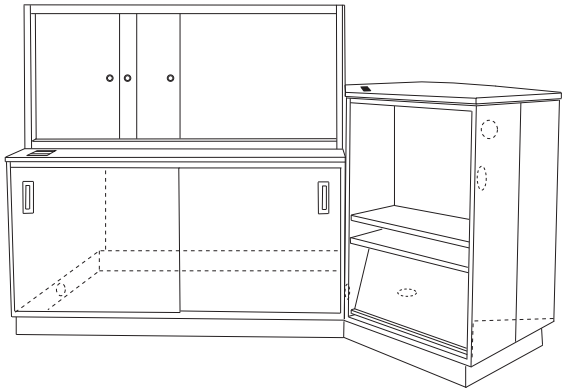
Power Port , RJ11/RJ45



88POWERPORT3
Port Includes: 2 simplex receptacles, 1 utility outlet, 1 RJ11, 1 RJ45, horizontal cable management. 416

PowerPort 4

88POWERPORT4
Port Includes: 2 simplex receptacles, 1 utility outlet, 2 USB charging ports, horizontal cable management. 432



Port

PORT
A service module having no power bar will serve as a large grommet. A hinged lid easily enables the passage of several cables and devices. 143

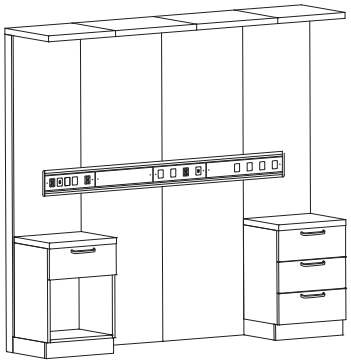
88PORT

CABLE MANAGEMENT

Cables from the top can enter the combined Patient's Entertainment/ Nurse's Module from a grommet located in the top or the side of the unit. The cables run behind the drawers and pass through a cable grommet into the cable management cavity. Electrically and data cables can be plugged in to the powerbar located inside.
Cables from the entertainment portion of this unit also can pass through a cable grommet in the side of the cabinet into the cable management cavity and are connected to the powerbar.
The powerbar cord runs inside of the base to the power source.
The Patient's Entertainment / Nurse's Module has a convenient touch latch door to gain access to the cable management cavity.
The powerbar cord runs inside of the base to the power source.

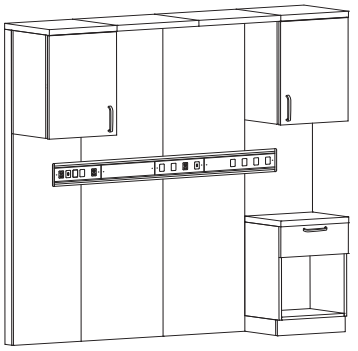
When using a PowerPort, the cables pass through these same grommets into the divider cabinet. A cable management trough is used to manage cables through the storage unit, with no interference with the items being stored.

CASEGOODS



587 Juno
611 Trevisa

JUNO & TREVISA | HEADWALLS AND FOOTWALLS



The Juno and Trevisa lines include a custom offering of modular headwalls and footwalls. The offering has been designed around 24", 30" and 36" wide modules that include a back panel, canopy (1 ½" thick) and cabinets. The overall height is 82". Cabinet height can be 20" (e.g. benches), 30" (e.g. bedsides, dressers and desks) or 36" (e.g. work counters, possibly including a sinks). The cabinets can be taken with slight modification from the Juno and Trevisa offerings of bedside tables, benches, dressers, desks, wardrobes and storage units. As well, other items such as floating shelves can be incorporated. In each case, the cabinet sits on a substantial 4" inset base. Bases are typically in grey laminate. Some combinations of the modules can be freestanding while others need to be fastened to the wall.
Fronts, top profiles and pulls from the Juno and Trevisa line can be incorporated into the headwall or footwall. The tops are only profiled on the front and there is no overhang at the sides. Tops can be laminate, high-pressure laminate, thermoformed vinyl or solid surface.
The modules are designed to accommodate wiring for lighting, TVs and to support other electrical devices such as computers. Similarly, there is space for plumbing.
Advantages of modular footwalls and headwalls may include improved depreciation for tax purposes, the ability to reconfigure at some future point, replaceability of individual components and even individual panels, consistency of design, colors and pulls with freestanding cabinets in the room, and the fact that design and construction meets the same healthcare standards reflected in the balance of the Juno and Trevisa lines. A limited lifetime warranty applies.

Please contact your Krug representative or customer service for a quotation on your specific project. The following are sample project configurations and associated list prices.

JUNO | FEATURES & OPTIONS

BREADTH OF LINE:
The healthcare casegoods lines offer solutions from contemporary to transitional to traditional styling. Juno is the contemporary version. The lines are extremely wide including 5 bedside table configurations, 3 dressers, 2 benches, 2 combination bench/wardrobes, 8 wardrobe/storage units, 4 TV units, 3 bookcases, 2 desks, a headboard and footboard, a marker board, mirror and corkboard, and 4 overbed tables. In addition custom modular headwalls and footwalls are offered.

CUSTOM CAPABILITY:
Krug can offer both custom sizes of standard product and completely custom units, including modular headwalls and footwalls.
For more information, please contact Customer Service.

DURABILITY:
Cabinets are constructed of ¾" thick panels including backs. In contrast to cabinets constructed with 1/8" back panels, the Juno units are more robust and less susceptible to damage. All exposed laminate edges are covered with 2.5 mm polymer edge banding in colors matching the laminates. This thicker edge banding provides an increased level of durability on all edges as well as a 2.5 mm radius on the edge. The softer radius is less likely to bruise or cut the skin of a patient or caregiver. Bottom panels extend under the side and back panels of cabinets with legs and on any units with 4 casters in order to maximize the ability of the cabinet to withstand heavy handling.

DRY FIT CONSTRUCTION:
Cabinets are assembled with mechanical cams. This is known as dry fit construction. The result is that any panel can be replaced if damaged, unlike in the case of cabinets that are glued together where damage to any surface leads to replacement of the entire unit.

VENTS:
There is one 1" diameter vent for each drawer and each door set for air circulation. All vent holes are covered with plastic vents both inside and outside to eliminate exposed particle board, thus preventing moisture and bacteria from entering the core.

SEALED CORE
All unseen particle board edges that are not covered by an adjoining panel are edge banded (i.e. no exposed particle board). As with the vent covers noted above, this prevents moisture and bacteria from seeping into the core.

DRAWERS:
Drawers have white metal sides with white laminate bottoms and backs, and all exposed particle board edges are edge banded.
The unobstructed metal sides facilitate cleaning. Bumpers are installed on all drawers and doors to soften the sound of closing.

ENVIRONMENTAL
Juno cabinets have a very high recycled content and contribute to both LEED credits 4.1 and 4.2. The packaging is recyclable.Non-urea-added core is available as an option and Air Emissions certified product is also optionally available. FSC-certified wood may be possible on larger projects

TOPS:
Tops are ¾" thick and can be laminate with polymer edge banding, high-pressure laminate with polymer edge banding, or seamless thermoformed vinyl.
- Edge A - Laminate with Polymer Edge, or High-Pressure Laminate with Polymer Edge
- Edge B - Thermoformed Vinyl or High-Pressure Laminate with Wood Edge
- Edge C - Thermoformed Vinyl or High-Pressure Laminate with Wood Edge
- Edge S - Laminate with T-Mold bumper or High-Pressure Laminate with T-Mold bumper

With Edge S the Overhang is 1/2" on all sides
Standard Top Overhang is 1/4" on 4 sides
Optional Top Overhang is 1/2" on 4 sides (to assist with movement of the cabinet) on other edges.
Tops on units over 40" high are laminate only

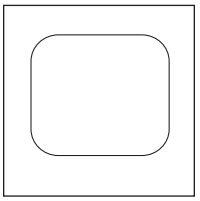
DOOR / DRAWER FRONTS:
Door / drawer fronts are 3/4" thick and 2 styles are available.
- Delphine - Laminate with Polymer Edge
- Lia - Thermoformed Vinyl

Headboards and footboards are high-pressure laminate on ¾" plywood with polymer edge banding. HPL and plywood are used in this application for added strength.

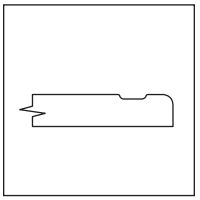
LEGS & BASE RAIL:
Cabinets are available with 4 ¼" legs (for ease of cleaning), or sides to the floor with a base-plate Style 1 that is either Laminate with Polymer Edge, or Seamless Thermoformed Vinyl, (based on the Door/Drawer front material selected).

DOOR AND DRAWER PULL STYLES:
Flex is an injection-molded plastic pull designed to offer some "give" or flexibility when inadvertently hit by a patient or caregiver. The color is similar to Silver Metallic.
The Circa offers a very large grip. The pull could be accessed with a closed knuckle. It has a Silver Metallic finish.
The Indus pull eliminates a protrusion that could bruise a patient or caregiver. The finish is Silver Metallic.

BENCH
The cushion for the bench is 3" thick.
Juno benches have a load weight rating of 200 lbs.

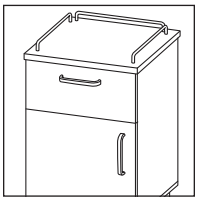


OVERBED TABLES:
There are 4 overbed table top shapes in either high-pressure laminate or seamless thermoformed vinyl, with 3 edge profiles (2 are spill-guard edges). There is also a version with a second drop-down surface. The overbed table offering includes 2 alternative steel base styles, each available in 5 standard powdercoat finishes. The overall height of the U-base including casters is less than 2" and the H-base is 3.25".
Baskets are a frequently ordered option. They are commonly used to hold urinals to keep them off table surfaces.



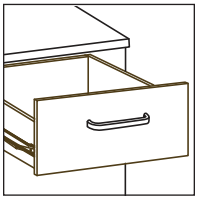
LAMINATES:
"Laminate" is variously known in the marketplace as Thermofused Melamine, Low-Pressure Laminate or LPL.
There are 1 solid color options and 5 wood-grain colors. All colors are available in laminate, high-pressure laminate or thermoformed vinyl. Polymer Edge banding matches the laminate selection. Wood finishes to match the wood-grain laminates are available for Krug Healthcare Seating.

VENEER
Many items in the Juno product line are also available in maple veneer and in a combination of veneer exterior surfaces and laminate interior faces. The veneered version is available with the Delphine front and "A" top edge profile. Both high-pressure laminate and thermoformed vinyl tops can be supplied as options with the veneered cabinets. Please contact your Krug representative or customer service for a quotation on veneered product.

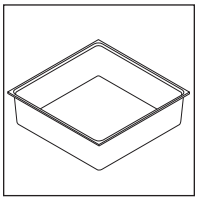


WARRANTY
All cabinets carry a limited lifetime warranty. Overbed tables have a 2-year warranty.

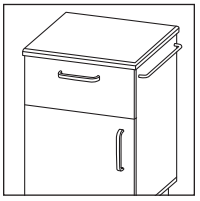
ROUNDED TOPS
A top with rounded corners is available as an option on bedside tables. There is a choice of laminate or high pressure laminate. The edge is polymer to match the laminate color. The overhang is 3/4" on all 4 sides of the top. (Tops specified with T-mold bumper are also rounded at corners. In these cases the overhang is 1/2" on all sides).



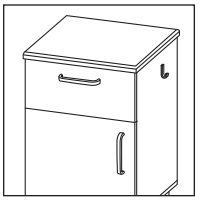
SPILL-GUARD EDGE
Juno bedside tables are available with the spill-guard edge surface on the thermoformed vinyl tops to collect liquids when spills occur.



GALLERY RAILS
Optional gallery rails are in satin nickel finish. There is a rail on each side and another across the back.

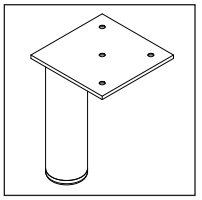


LOCKING TOP DRAWER OR DOOR
Juno cabinets have the option to lock. They can be randomly keyed for security. The lock option is factory installed and must be specified on the order.

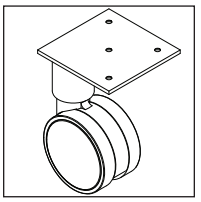


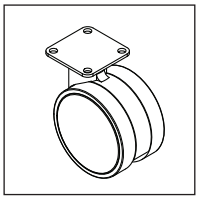
LAMINATE DRAWER
An optional white laminate drawer with a single-action 3/4-extension slide is available at no upcharge.
All edges are banded.

SEAMLESS DRAWER LINER
Juno bedside tables are available with the option of a plastic drawer liner. Ideal for infection control purposes, it can be removed, sterilized or replaced when damaged or degraded.

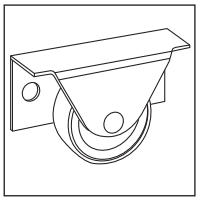


TOWEL BAR
The Towel Bar option fastens to the sides of the bedside tables. It is available in a satin nickel finish. The standard placement is the side opposite the hinge.

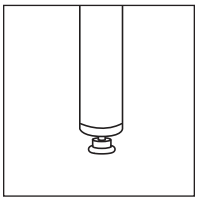




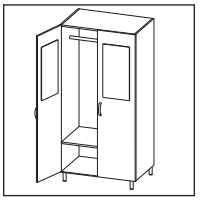
LITTER BAG HOLDER
The Litter Bag Holder option fastens to the sides of the bedside tables. It is available in a satin nickel finish. It holds small paper bags and can be field-installed. The standard placement is the side opposite the hinge.
shelf and coat rod for ADA compliance (shelf is 48" above the floor).

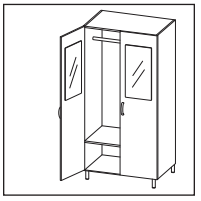


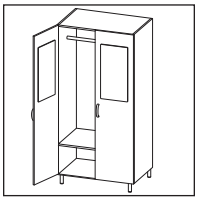
MASTER KEY
Juno bedside tables have the option to lock with a master key. This must be specified on the order.



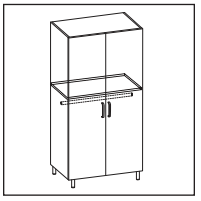
LEG / CASTERS:
Juno Bedside Tables have 5 base options - 4 legs with glides, 2 front legs with glides and 2 back casters, 4 swivel casters (2 locking), no legs and adjustable glides, or no legs and 2 hidden non-swivel casters at the rear of the cabinet.



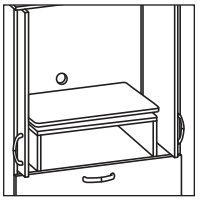




LEG LEVELER
An adjustable glide option is available for legs when there are 4 legs on a cabinet. This is standard on units without legs. This helps ensure the furniture is steady and level on uneven floors.



CABINET MOUNT MARKERBOARD
The Markerboards are 24" high by 12" wide. They can be mounted to the inside or outside of the cabinet door (inside is standard).



CABINET MOUNT MIRROR OPTION
The Mirrors are 24" high by 12" wide and acrylic. They can be mounted to the inside or outside of the cabinet door (inside is standard).

CABINET MOUNT CORKBOARD OPTION
The Corkboards are 24" high by 12" wide. They can be mounted to the inside or outside of the cabinet door (inside is standard).

LOWER MOUNTING COAT ROD AND SHELF (ADA)
Juno Wardrobes are available with the lower shelf and coat rod for ADA compliance (shelf is 48" above the floor).

PULL-OUT SWIVEL TV TRAY
Juno TV Units come with the option of a pull-out swivel TV Tray. The swivel tray is factory installed and must be specified at the time of order.

EXTENDED TOP OVERHANG
Rather than the standard 1/4" top overhang on all sides, this can be at 1/2" to facilitate moving of the cabinet for cleaning

REQUIRED TO SPECIFY
After each product grouping in the following pages, there is a summary under the title “Required to Specify”. The summary lists the elements that need to be specified including Model Number, Top & Edge Profile, Pull Style and Color, Body Style and Color,

TOP EDGE PROFILES:

CREDIT 7	Certified Wood (PLEASE ENQUIRE)	1 point

* This credit is only applicable if in total 20% of the combined value of the procured construction materials and furniture is manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Toronto, Ontario.

BREADTH OF LINE:
The healthcare casegoods lines offer solutions from contemporary to transitional to traditional styling. Trevisa offers transitional and traditional. The lines are extremely wide including 5 bedside table configurations, 3 dressers, 2 benches, 2 combination bench/wardrobes, 8 wardrobe/storage units, 4 TV units, 3 bookcases, 2 desks, a headboard and footboard, a marker board, mirror and corkboard, and 4 overbed tables. In addition custom modular headwalls and footwalls are offered.

CUSTOM CAPABILITY:
Krug can offer both custom sizes of standard product and completely custom units, including modular headwalls and footwalls. For more information, please contact Customer Service.

DURABILITY:
Cabinets are constructed of ¾" thick panels including backs. In contrast to cabinets constructed with 1/8" back panels, the Trevisa units are more robust and less susceptible to damage. All exposed laminate edges are covered with 2.5mm polymer edge banding in colors matching the laminates. This thicker edge banding provides an increased level of durability on all edges as well as a 2.5 mm radius on the edge. The softer radius is less likely to bruise or cut the skin of a patient or caregiver. Bottom panels extend under the side and back panels of cabinets with 4 casters in order to maximize the ability of the cabinet to withstand heavy handling.

DRY FIT CONSTRUCTION:
Cabinets are assembled with mechanical cams. This is known as dry fit construction. The result is that any panel can be replaced if damaged, unlike in the case of cabinets that are glued together where damage to any surface leads to replacement of the entire unit.

VENTS:
There is one 1" diameter vent for each drawer and each door set for air circulation. All vent holes are covered with plastic vents both inside and outside to eliminate exposed particle board, thus preventing moisture and bacteria from entering the core.

SEALED CORE:
All unseen particle board edges that are not covered by an adjoining panel are edge banded (i.e. no exposed particle board). As with the vent covers noted above, this prevents moisture and bacteria from seeping into the core.

DRAWERS:
Drawers have white metal sides with white laminate bottoms and backs, and all exposed particle board edges are edge banded.
The unobstructed metal sides facilitate cleaning. Bumpers are installed on all drawers and doors to soften the sound of closing.

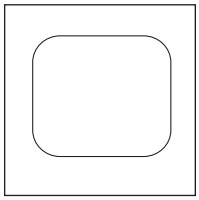
DOOR AND DRAWER PULL STYLES:
Flex is an injection-molded plastic pull designed to offer some "give" or flexibility when inadvertently hit by a patient or caregiver. The color is similar to Silver Metallic.
The Indus pull eliminates a protrusion that could bruise a patient or caregiver. The finish is Silver Metallic.
The Ravenna and Murano are attractive transitional pulls in satin nickel.
The Renzo knob pull creates a much different cabinet appearance. The finish is satin nickel.
The Verona and Padua traditional pulls are mounted with rosettes. Finish in antique brass. A complimentary brushed brass knob is used on doors.

TREVISA | FEATURES

TOPS:
Tops are ¾" thick and can be laminate with polymer edge banding, high-pressure laminate with polymer edge banding, or seamless thermoformed vinyl.
• Edge A - Laminate with Polymer Edge, or High-Pressure Laminate with Polymer Edge
• Edge B - Seamless Thermoformed Vinyl
• Edge C - Seamless Thermoformed Vinyl
• Edge D - Seamless Thermoformed Vinyl
• Edge E - Seamless Thermoformed Vinyl
• Edge F - Seamless Thermoformed Vinyl
• Edge G - High-Pressure Laminate with Wood Edge, or Seamless Thermoformed Vinyl
• Edge S - Laminate with T-Mold bumper or High-Pressure Laminate with T-Mold bumper. With this edge the overhang is 1/2" on all sides.
Standard Top Overhang is 1/4" on 4 sides
Optional Top Overhang is 1/2" on 4 sides (to assist with movement of the cabinet)
Tops on units over 40" high are laminate only

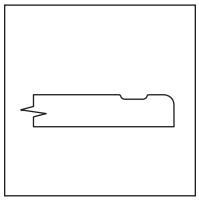
DOOR / DRAWER FRONTS:
Door / Drawer fronts are 3/4" thick and 7 styles are available.
• Delphine - Laminate with Polymer Edge
• Lia - Seamless Thermoformed Vinyl
• Como - Seamless Thermoformed Vinyl
• Assano - Seamless Thermoformed Vinyl
• Bassano - Seamless Thermoformed Vinyl
• Elba - Seamless Thermoformed Vinyl
• Rossano - Seamless Thermoformed Vinyl
Headboards and footboards are high-pressure laminate on ¾" plywood with polymer edge banding. HPL and plywood are used in this application for added strength.

BASE RAILS (material will be the same as the Door/Drawer Fronts):
Cabinets are available with 4 ¼" legs (for ease of cleaning), or sides to the floor with the following 4 front base-rail options.
• Option 1 - Laminate with Polymer Edge, or Seamless Thermoformed Vinyl
• Option 2 - Laminate with Polymer Edge, or Seamless Thermoformed Vinyl
• Option 3 - Laminate with Polymer Edge, or Seamless Thermoformed Vinyl
• Option 4 - Laminate with Polymer Edge, or Seamless Thermoformed Vinyl



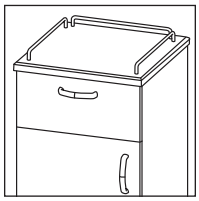
BENCH
The cushion for the bench is 3" thick.

LAMINATE COLORS:
There are 4 solid color options and 13 wood-grain colors. All colors are available in laminate, high-pressure laminate and thermoformed vinyl. Polymer Edge banding matches the laminate selections. Wood finishes to match the wood-grain laminates are available for Krug Healthcare Seating.



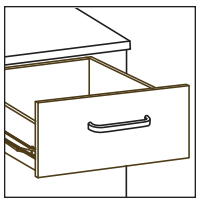
VENEER
Many items in the Trevisa product line are also available in maple veneer and in a combination of veneer exterior surfaces and laminate interior faces.
The veneered version is available with the Delphine front and "A" top edge profile. Both high-pressure laminate and thermoformed vinyl tops can be supplied as options with the veneered cabinets. Please contact your Krug representative or customer service for a quotation on veneered product.

ENVIRONMENTAL FEATURES:
Trevisa cabinets have a very high recycled content and contribute to both LEED credits 4.1 and 4.2. The packaging is recyclable. Non-urea-added core is available as an option and air-emissions certified product is also optionally available. FSC wood may be possible on larger projects.

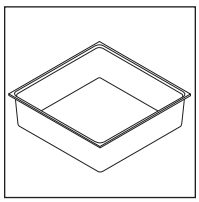


WARRANTY:
All cabinets carry a limited lifetime warranty. Overbed tables have a 2-year warranty.

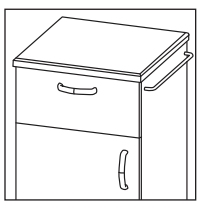
ROUNDED TOPS
A top with rounded corners is available as an option on bedside tables. There is a choice of laminate or high-pressure laminate. The edge is polymer to match the laminate color. The overhang is 3/4" on all 4 sides of the top. (Tops specified with T-mold bumper are also rounded at corners. In these cases the overhang is 1/2" on all sides).



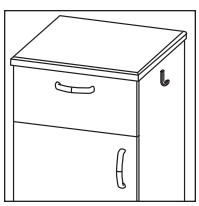
SPILL-GUARD EDGE
Trevisa bedside tables are available with the spill-guard edge surface on the thermoformed vinyl tops to collect liquids when spills occur.



GALLERY RAILS
Optional gallery rails are satin nickel finish. There is a rail on each side and another across the back.

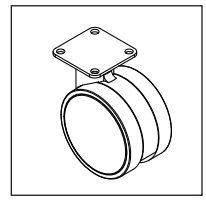


LOCKING TOP DRAWER OR DOOR
Trevisa cabinets have the option to lock. They can be randomly keyed for security. The lock option is factory installed and must be specified on the order.

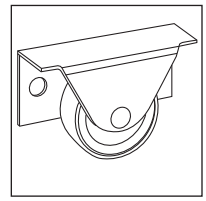


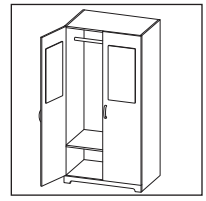
LAMINATE DRAWER
An optional white laminate drawer with a single-action, 3/4-extension slide is available at no upcharge.
All edges are banded.

SEAMLESS DRAWER LINER
Trevisa bedside tables are available with the option of a plastic drawer liner. Ideal for infection control purposes, it can be removed, sterilized or replaced when damaged or degraded



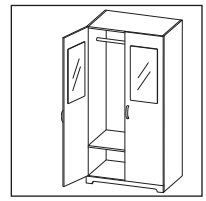
TOWEL BAR
The Towel Bar is an option on Trevisa and fastens to the sides of the bedside tables. It is available in a satin nickel finish. It can be field installed. The standard placement is the side opposite the hinge.



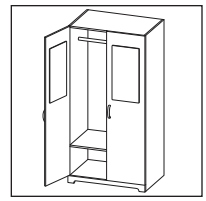


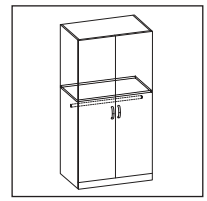
LITTER BAG HOLDER
The Litter Bag Holder option fastens to the sides of the bedside tables. It is available in a satin nickel finish. It holds small paper bags and can be field-installed. The standard placement is the side opposite the hinge.

MASTER KEY
Trevisa bedside tables have the option to lock with a master key. This must be specified on the order.

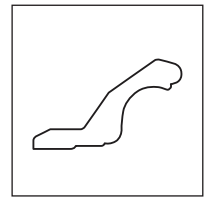


LEG / CASTERS:
Trevisa Bedside Tables have 3 base options - sides to floor and front base rail, 2 non-swivel back casters, or 4 swivel casters 2 of which are locking (there is no base rail in this case).

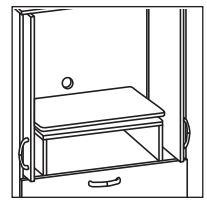




CABINET MOUNT MARKERBOARD
The Markerboards are 24" high by 12" wide. They can be mounted to the inside or outside of the cabinet door (inside is standard).



CABINET MOUNT MIRROR OPTION
The Mirrors are 24" high by 12" wide and acrylic. They can be mounted to the inside or outside of the cabinet door (inside is standard).



CABINET MOUNT CORKBOARD OPTION
The Mirrors are 24" high by 12" wide and acrylic. They can be mounted to the inside or outside of the cabinet door (inside is standard)

LOWER MOUNTING COAT ROD AND SHELF (ADA)
Trevisa Wardrobes are available with the lower shelf and coat rod for ADA compliance (shelf is 48" above the floor).

CROWN MOLDING
Crown Molding is available as an option for tall units. It is in thermoformed vinyl to match the cabinet. Crown Molding ships separately and is field installed. It is supplied for the front and two sides with mitered joints.

PULL-OUT SWIVEL TV TRAY
Trevisa TV Units come with the option of a pull-out swivel TV Tray. The swivel tray is factory installed and must be specified at the time of order.

EXTENDED TOP OVERHANG
Rather than the standard 1/4" top overhang on all sides, this can be at 1/2" to facilitate moving of the cabinet for cleaning.

REQUIRED TO SPECIFY

After each product grouping in the following pages, there is a summary under the title “Required to Specify”. The summary lists the elements that need to be specified including Model Number, Top & Edge Profile, Pull Style and Color, Body Style and Color,

TOP EDGE PROFILES:

Select one:

Edge A

Edge B

Edge C

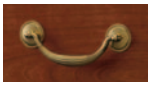
Edge D

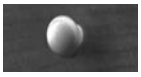
Edge E

Edge F

Edge G

Edge S
(only offered on bedside tables)





ORDERING NOTES:
Edge A is available in Laminate with Polymer Edge or High-Pressure Laminate with Polymer Edge.
Edge Profiles B, C, D, E, F & G are available in Seamless Thermoformed Vinyl. Laminate surface is not flush to the wood edge. Spill-guard Edge can be ordered on Edge Profiles B, C, D, E, F & G in Seamless Thermoformed Vinyl.
Edge S is available in Laminate with T-Mold bumper or High-Pressure Laminate T-Mold bumper.

DOOR AND DRAWER PULL STYLES:

Select one:	Flex - F	Indus - I *	Ravenna - R	Miro - M	Adriana - A	Padua - P	Verona - V
	No Upcharge Color is similar to Silver Metallic	$11 each Silver Metallic	No Upcharge Satin Nickel	$5 each Satin Nickel	No Upcharge Satin Nickel	$6 each English Antique Brass	$11 each Antique Brass

ORDERING NOTES:

Terms and Conditions
Net 30 days on approved credit. A late payment charge of 1% per month will be applied on overdue invoices. This charge will be pro-rated to the number of days past 30 days that the invoice is overdue. All applicable sales taxes are extra. Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Krug dealers. Acceptance of any order and terms of sale may be established at the discretion of Krug. Deposits are required on orders received from new accounts as well as on large or special orders. Krug reserves the right to discontinue designs, or to change designs, construction, prices, or materials without notice.

Customer Service Hours
Please note customer service hours are:
8:30 am to 5:00 pm est

Customer Satisfaction
It is the primary goal of Krug and our staff to ensure the complete satisfaction of our customers with our products and performance. If a problem arises with a Krug product after the expiration of the limited warranty period, Krug will exercise its best efforts to achieve the satisfaction of the customer in a manner that is fair to all concerned.

Order Acknowledgments
Each order will be acknowledged via e-mail or fax. This acknowledgments is the final agreement between Krug and the customer, superseding all previous communications regarding the purchase order. Where there is a discrepancy on a purchase order between a product code and a description, Krug will make every effort to resolve the discrepancy, but will be ruled by the product code ordered. Please check all acknowledgments for accuracy, and advise Krug of any discrepancies with a purchase order.

Order Cancellation
Krug reserves the right to not accept or allow cancellation of orders. All products are manufactured on a custom-made, make-to-order basis, and the purchasing, engineering and production of orders begins shortly after order placement - and the customer purchase order is a contract that authorizes Krug to manufacture the products. Acceptance of order cancellation (or partial cancellation) is solely at the discretion of Krug, and is dependent on the extent to which engineering, purchasing and manufacturing has been initiated by the time cancellation is requested. No order cancellations (partial or otherwise) are allowable more than 4 weeks from date of order placement (as order production is unable to be terminated by that point), and full payment of the acknowledged order value is required for any orders cancelled after 4 weeks. Cancellations may be allowable in less than 4 weeks after order placement, depending on the extent to which manufacturing has been initiated. An acceptance of order cancellation requires that the purchaser agrees to make payment for all costs incurred to the point of acceptance of cancellation. Cancellation charges include all costs for purchase of dedicated material and components, engineering costs for non-standard products, and all costs for manufacturing completed to that point, as well as a $367 net charge for processing of the original order and for processing of cancellation invoicing.

Pricing
Krug endeavors to ensure that all prices in this price list reflect accurately our current prices. However, errors do occur and will be rectified through notices to the field. Krug reserves the right to acknowledge pricing that may be different from the price list.

Storage Charges
Krug reserves the right to assess a nominal storage charge if a customer does not accept shipment of an order within a week of the ship date.

Warranty
Krug warrants the construction and the finish of all our products to be free from defects in materials and workmanship for the lifetime of their use. This warranty is applicable to products in use by their original purchaser. This warranty does not apply to components not manufactured by Krug including textiles, which are subject to the specific warranties of those manufacturers, if any. Textiles (fabric, leather, vinyl, or any other covering material) suppliers do not guarantee their products for durability and color fastness, and nor does Krug. Casters, mechanical and electrical components have a warranty of five years from the date of purchase. The Krug warranty does not apply to COM-specified materials, damage caused by a carrier other than Krug, or variation in wood finishes due to natural wood color variation. Krug cannot be held responsible for variations in fabric dye lots from order to order. All fabric is carefully inspected when it is received, but a degree of variation in color should be expected. Repairs or replacement of any defect covered under this warranty by Krug will be made, at our option and method, at no charge to the original purchaser during the warranty period. Krug's judgement is final and binding with respect to the nature or cause of defects or damage, and the necessity or manner of repair or replacement.

This warranty does not apply to defects or damage resulting from:
• normal wear and tear occurring with the use of the product
• negligence, misuse, excessive use, alteration, improper cleaning or repair
• substitution or use of incorrect or unauthorized components or material
• handling or installation that is incorrect, or that causes damage or defect
• damage incurred by a freight carrier other than Krug
• wearing of finishes and fabrics, and normal variations in materials (including dye lot variations)
• properties of natural materials, including wood and leather
• exposure to environments with uncontrolled temperature and humidity (products must be transported, stored and used in climate-controlled conditions)
Note, specific warranties for components and materials not manufactured by Krug:

Jordan Sleepers Heavy-Duty Mechanism, made with heavy gauge steel and minimal moving parts - is backed by a 5-year warranty on the mechanism itself, in addition to the lifetime warranty on the rest of the product. If it does become damaged or degraded, the mechanism can be field-replaced.
Juno and Trevisa Overbed Tables have a 2-year warranty.

Blanket Wrapping
Krug will blanket wrap larger seating orders at customer's request. Please indicate on your purchase order and contact Customer Service.

Export Packaging
Krug is pleased to provide the option for export packaging on all our products, to provide additional protection from damage. For shipments overseas, a quote for export packaging can be provided, based on the products to be ordered and the delivery destination - please contact Customer Service or Bids & Specification Support for more information and a quotation. KRUG is not responsible for shipment damage occurring on overseas shipments

Export Packaging is STRONGLY RECOMMENDED for:
(A) all shipments outside of the lower 48 states and Canada.
(B) all shipments that will be held in storage for an extended period prior to installation.

Important: Please note that Krug will not be responsible for damage claims on product shipped or stored in the above conditions but where export packaging has not been utilized.

Dimensions
Dimensions are in inches and approximate, and subject to change without notice. Contact Customer Service if dimensions are critical.

GENERAL INFORMATION

Freight Terms and Conditions
1. All product is shipped FOB the Krug factory. Freight is either pre-paid to the destination or not pre-paid, depending on established customer specific freight terms.

2. Docks at the selected delivery location must be equipped to handle a 53' trailer. If a dock is inadequate for delivery by Krug, Krug will re-deliver to another local location and any additional costs will be charged to the customer.

3. For all deliveries, it is understood that Krug or its agent is making a dock delivery only (equipped to handle a 53' trailer), and any further work of truck unloading, delivery beyond the dock, installation, and removal of packaging is not authorized or paid for by Krug.

4. Drop shipments to the installation site, and timed deliveries, are available on larger shipments (full truckloads or slightly less) at no additional charge. Drop shipments or timed deliveries for smaller shipments may not be available, or if available will require a surcharge. Deliveries on an after hours basis, or on weekends, or any other special requirements, may be subject to a surcharge. Location and contact information, and the requested time of delivery, is required at least one week prior to the acknowledged shipment date. If this information is not provided one week in advance, or if the location or time of the drop shipment is changed less than one week in advance, a surcharge may be applied, and/or the drop shipment may not be scheduled. For deliveries requested Monday to Thursday after 5:00 pm, please apply a surcharge of $275/shipment. For deliveries requested Monday to Friday before 7:00 am, please apply a surcharge of $275/shipment. For deliveries requested Friday (after 3:00 pm) or weekends, please apply a surcharge of $551/shipment. (local times).

5. For all deliveries - whether to the Customer location or drop shipment - any circumstances that result in the delay of our carrier (including unsuitable receiving facilities, or facilities not open or available), service charges will be applied at the rate of $131/hour. Where re-delivery is necessary because of these circumstances, the full cost of re-delivery will be charged. If Less Than Truck Load is delivering, one hour is allocated to unload. Any additional time required to unload after the first hour is $131/hour. If a Truck Load is delivering the order, three hours is allocated to unload. Any additional time required to unload is $131/hour. Direct deliveries to site for large orders are possible, (must exceed $60,000 net), and accommodate 48 - 53' trailers. Krug is responsible for delivery to the approved delivery address. If an address change is required, this must be authorized by Krug 5 business days prior to ship date. Any additional delivery costs incurred after this time will be charged to the customer.

Product Strength and Durability Testing
All Krug products have been thoroughly tested, and exceed the testing requirements of ANSI/BIFMA seating standard.
Specific test results and documentation are available on request.

BIFMA INTERNATIONAL

Installation Support
For assistance please contact Technical Support at 1-888-578-5784 x216 or e-mail installationhelp@krug.ca and you will be directed to the appropriate installation support person.

Damaged Shipments
All Krug product is well engineered, carefully inspected, and expertly loaded onto our trucks at our Distribution Center. If you receive any damaged freight, we ask that you do not refuse the shipment. Krug is not responsible for damage to goods that occurs in transit or storage. It is the purchaser and/or receiver's responsibility to examine the goods upon receipt and to notify Krug of any damages, overages or shortages. Any discrepancies should be noted on the Bill of Lading. The delivering carrier will not accept responsibility for shortages or damages if signed "clear". Notification of concealed damage claims must be made to Krug Distribution within 5 days of delivery, along with digital pictures if available. All product and packaging must be available for inspection. Krug liability ceases after 5 business days and Krug will not be responsible for concealed damages if shipments are left unopened. Krug is not responsible for the condition of product that is stored or installed in an environment where temperature and humidity are not controlled.

Field Product Report Authorization
Krug's written authorization, in the form of an FPR number, must be obtained prior to incurring charges of any kind if Krug is expected to pay these charges. This includes authorization for returns, field repairs and replacements, post field repairs, installation and delivery charges. Krug reserves the right to have its representative inspect product related to any request for such authorizations, prior to that authorization being provided. Deductions from invoices paid for any charges to Krug, without prior written authorization in the form of an FPR, will not be accepted. Digital photographs may be required to complete the FPR process.

Returns
No merchandise may be returned without Krug's prior written consent. In the event of an authorized return, a Field Product Report (FPR) number will be issued, and a restocking charge will apply. Return transportation charges must be prepaid. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packaged in its original or comparable replacement packaging to ensure protection of the product during handling and transportation. Returns on orders duplicated by the customer must be received in their original packaging to be accepted. Product being returned where Krug has authorized its liability for replacement or repair will be thoroughly inspected on its return, and the results compared to the reason for the return stated on the FPR. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

Custom Capabilities
Over 15% of our orders involve some type of custom work, and we invite our customers to make use of our extensive capabilities.

These include:
1) Dimensional customization of standard size products
2) Custom finishes
3) For larger orders, completely custom-designed products, as well as non-standard wood species can be specified.

Custom orders may require additional production lead times. Contact Engineering at the e-mail address engquotes@krug.ca.

Care and Maintenance Leather
Leather is a natural product and requires very little care during use. Most stains can be removed with a clean dry cloth. For stubborn spots and stains, use a mild non-detergent cleaner, rinse well and let air dry naturally. Do not use saddle soap, cleaning solvents, furniture polish, oils, varnish, abrasive cleaners, soaps or ammonia waters.

Fabric Upholstery
Professional upholstery cleaning is recommended.

LATEX FREE

Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people.

Customer's Own Material (COM/COL)
COM/COL must be received three weeks prior to the acknowledged ship date. Orders with COM/COL not received by the required deadline will be delayed. A description of the upholstery cover, including supplier name, pattern name, upholstery cover name and color number must be included with the purchase order.
COM/COL testing requires 3 business days and samples are to be directed to Customer Service. The customer has the option of providing the sample COM/COL before, at time of order, or once the sample COM/COL is received. If the customer does not send a sample for approval in advance of sending actual material, Krug will not be responsible for the cost of any upholstery cover or other material that it determines to be unsuitable for the product or our process.
When the COM/COL upholstery cover is received at Krug, it must be clearly identified with the upholstery cover name and color, and tagged with name of the Krug customer and purchase order number. Krug will inspect all COM/COL upholstery covers when received to determine if it will be suitable for upholstery. Where Krug feels that the upholstery cover or leather specified will compromise the quality or integrity of our products, customers will be contacted to direct these concerns. Further, Krug reserves the right to refuse to accept and use any COM upholstery covers or leathers that will compromise our products in any way that is unacceptable to Krug. Krug cannot assume responsibility for the durability or tailoring quality of customer's own material.
Yardage specified in this price guide is approximate. In the case of multiple product orders, multiply the number of items by the COM yardage specified to determine upholstery cover required, unless otherwise indicated. Additional yardage may be needed if the material is less than 54" wide, or patterned or striped and requires matching. All COMs are cut "up the roll" unless otherwise stated by the customer. All striped upholstery covers will be applied vertically unless otherwise stated by the customer and after approval by Krug. Krug will not be responsible for directional or positional problems with its application of COM material, unless it has been provided with explicit instructions by the customer. Special instructions should be sent to Krug Customer Service, including a sample (or photocopy) of the upholstery cover. Krug is not responsible for instructions sent with the upholstery cover rolls, or for the method of upholstery if no instructions have been provided.
Price increases and freight charges to COM/COL acquired on the customer's behalf will be passed onto the customer.

Application of Directional Upholstery cover
Some COM upholstery covers will be considered directional by Krug even though they are not considered directional by the supplier. All COMs are automatically cut "up the roll" unless otherwise stated by the customer (please see below).

Standard-Cut
"up the roll"

Non-Standard-Cut
across the roll "railroad"

COM/COL Shipping Procedures
For seating COM/COL upholstery covers, please send upholstery covers to:
Krug Inc.
111 Ahrens Street
Kitchener, Ontario
Canada N2H 4C2
Attention: RECEIVER
COM/COL orders cannot be scheduled into production until the upholstery cover has arrived and inspection is complete.

All packages must be clearly marked
"**For Customs Clearance by Willson International Custom Brokers**".

According to the North American Free Trade Agreement (NAFTA), goods shipped between the United States and Canada can qualify for exemption from all duties, or for a reduction in duties, if the goods can be proven to originate in either the United States, Canada or Mexico.
Canada Customs requires that a NAFTA Certificate of Origin and a Commercial Invoice be completed and sent with the upholstery cover shipment. The Commercial Invoice must clearly state the description of the upholstery cover, the selling price, the make-up or content, and the purchaser. The absence of these two documents will delay the shipments at the U.S./Canada border, thereby potentially delaying the customer order. If the total value of the shipment is less than $1200 U.S., Customs will accept a Low Value Statement of Origin in place of the NAFTA Certificate of Origin. The Low Value Statement must be signed by a representative of the exporting company. This statement may either be included on the commercial invoice or attached to the invoice. Krug is happy to answer any questions or concerns about COM/COL shipping procedures and the required documents.

CAL 133 & Moisture Barrier
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

C.O.L. Yardage
To calculate C.O.L. yardage required, please use the following conversions based on COM yardage: Leather must be ordered in square footage.
- 17 square feet in a yard
- Approx. 3 yards in a hide
- Approx. 51 square feet in a hide
- Please use grade 3 pricing for COL

Upholstery Cover Yardage Calculation
To calculate yardage required for COM and other non-standard upholstery cover orders, please contact Krug Customer Service at 1.888.578.5784. Unless otherwise stated, upholstery cover rolls are assumed to be a minimum 54" wide. Please use the guide below to calculate the percentage of extra upholstery cover required to cover large repeats. The repeat is calculated by adding both the vertical and horizontal measurements together and then referring to the chart below for extra yardage required.

FABRIC	Plain	2"-14" Repeat	15"-19" Repeat	20"-27" Repeat	28"-36" Repeat
54	0%	10%	15%	20%	25%
53-50	16%	20%	25%	30%	35%
48	16%	25%	30%	35%	40%
45	40%	50%	55%	60%	65%
36	50%	60%	65%	70%	75%

GRADED-IN UPHOLSTERY PROGRAMS

Krug has partnered with several textile brands to grade in their offerings, designed to provide a wide range of upholstery selections for our seating products.

Upholstery pricing and availability is subject to change without notice. We grade this upholstery according to the pricing of the fabric suppliers - when their pricing changes, the Krug grade may change.

When placing an order, a Krug customer must specify the complete upholstery number, along with the appropriate Krug model number and finish. Krug will supply the complete product at the prices listed. Orders specifying graded-in upholstery cannot be cancelled once the upholstery has been ordered.

Upholstery Grades
To determine the price of a product for graded-in upholstery, use the reference lists located on Krug's website under - Products - Textiles, to view the upholstery grade (1-9). Krug is not responsible for the discontinuation of this upholstery. Please contact Customer Service for information on upholstery not listed.

When two upholstery selections are specified for use on seating, the higher grade upholstery price will apply to the order.

High Performance upholstery; Polyurethane, Vinyl or Crypton, is particularly suitable for healthcare and other intensive-use environments.

Upholstery Samples
If you require additional samples or memos for presentation, please contact fabric supplier directly.

Flammability Standards
- Tunnel Test Surface Ratings Class A rating
- Class 1 UFAC
- Passes State of California Technical Bulletin CAL 117-2013

Please contact fabric supplier directly for further flammability information pertaining to specific upholstery.

Special Conditions
Acknowledgments will give the estimated delivery date of the finished product. Some upholstery is imported, and availability may affect estimated delivery time. For large projects, please contact fabric supplier directly for availability of yardage.

KRUG EXPRESS PROGRAM

PROGRAM DETAILS

KrugExpress orders are ready to ship by the date acknowledged. Delivery and shipping schedules may result in actual shipping of orders at a later date. Statutory holidays and scheduled factory vacations may add to acknowledged lead times of *KrugExpress* orders. Unless otherwise specified on the order, the customer's standard method of shipping Krug products will be utilized.

Available factory capacity for *KrugExpress* is filled by orders received on a "first come, first serve" basis. If the normal KrugExpress lead time is not available for your order because available capacity has been filled, you will be immediately advised of the earliest available ready-to-ship date. Please consult your Customer Service representative in advance if you wish to confirm the specific lead time availability for a *KrugExpress* order.

Orders must be received by midnight of a given day for that day to be considered the official day the order is received. Order lead times are acknowledged from the date the order is received, but not including the date the order is received.

KrugExpress orders must be "clean" when received in order to be considered officially received on a given day, and lead times will be acknowledged from the date orders are determined to be "clean".

Changes to *KrugExpress* orders are not allowed under any circumstances.

Orders for product on *KrugExpress* must clearly state: "*KrugExpress*".

COM and graded-in upholstery is available on Krug Express. Orders are scheduled on Krug Express, and given the best available date, when the upholstery is received at Krug. Some conditions apply.

SEATING & OCCASIONAL TABLES PROGRAM

Orders for seating products on the *KrugExpress* program may be subject to quantity maximums. Please contact Krug Customer Service for more information.

Quantity maximums are dependent upon available capacity, in order to insure that we ship all orders on time.
Please note that the CAL 133 option is not available on *KrugExpress.*

Only standard wood finishes are available for *KrugExpress* orders. Laminates are not available on *KrugExpress.*

Krug Express includes all Krug seating and occasional tables as well as Krug conference and casegood products to complement this seating offering.

WOOD FINISHES

Standard wood finishes are:

Finishes on Beech
Appalachian Cherry
American Cherry
Imperial Cherry
Light Cherry
Medium Cherry
Natural Cherry
Sable Cherry
Standard Cherry
Light Oak
Harvest Oak
Mahogany
Mellow Oak
Espresso
Cordovan Walnut
Natural Walnut
Regular Walnut
SilverGrey on Walnut
Dark Walnut
Clear Beech
Medium Anigre

Finishes on Maple
Clear Maple
Honey Maple
Wheat Maple

PALETTE
Palette finishes available for applicable products.
Black
White
Soft Green
Steel Blue
Slate

WOOD FINISHES TO MATCH STANDARD LAMINATES

Willow on Beech
Copper on Beech
Shiraz Cherry on Beech
Park Avenue Walnut on Beech
Chocolate on Beech
Nutmeg on Beech
Portobello on Beech
Ash on Beech
Dune on Maple

NATURAL CHARACTERISTICS OF WOOD

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

Custom Wood Finishes
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)

Special finish upcharges on seating products are calculated on a grade 1 value. For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

Dual Finishes
Add 10% list per item if specifying dual finish.

Standard Wood Finishes
No upcharge will be applied when specifying a finish available as standard on one species onto maple seating and occasional tables. Clear finishes are not available on other species since they are a clear finish on top of the natural veneer color.

LAMINATE PROGRAM

LAMINATES

Krug's in-stock Laminates are available in 17 different laminate selections. Please note that 4 of the colors (Gingerbread, Portobello, Ash and Willow) have textured finishes and may not be appropriate for use in patient areas due to infection control concerns. Minimum order quantities and extended lead times may apply for exotic laminate colors, please check with customer service. Polymer Edge will be selected to match the worksurface. Krug's previous laminate in-stock program will be phased out as in-stock supply depletes. Please contact customer service for availability.

IN-STOCK LAMINATES

Wood Grain Laminates	High Pressure Laminate Supplier
Champagne	Tafisa T492CR
Hardrock Maple	Formica 86992-58
Dune	Tafisa T491CR

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 28.83%

POST-CONSUMER
RECYCLED CONTENT = 21.67%

Up to 70.56% of this Callisto product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Callisto products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Callisto products are supplied air-emissions certified. Contact customer service for information.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

BREATHABLE MESH
Mesh Seats and Backs are available in 2 colors: Black and Grey.

UPHOLSTERED CUSHIONING
Upholstered Seats and Backs are available in a wide range of textiles, and seat features molded foam that is supportive for extended periods of sitting.

ADJUSTABLE LUMBAR SUPPORT
This optional feature provides enhanced support in the lower lumbar area of the back with 3” of adjustment range.

FIXED CANTILEVER ARM
This arm features Polished Aluminum with an integrated urethane pad surface.

ADJUSTABLE ARM
Height adjustment range of 2.5”. Arm pad forward/backward adjustment of 1.5”. Arm pad has a 3 position swivel of 20 degrees inward and 15 degrees outwards.

ARMLESS
Callisto models are available armless.

SELF-ADJUSTING SYNCHRO MECHANISM
The tilt feature adjusts automatically to the user’s weight. It includes a standard seat slider feature adding an adjustment range of 2”, and 4 position tilt lock with anti-kickback, and height adjustability.

BASES
Base options include Polished Aluminum and Black Polymer, and a soft wheel caster option.

STOOL BASE
A stool version is available on all Callisto models. It has a standard height adjustment range of 7.5”. Foot ring is Polished Chrome, and standard gas lift is Black.
The Seat Slider and Seat Slider Plus option is not available with the Stool base. Stool base is only available with a swivel mechanism.

WEIGHT CAPACITIES
Callisto has been tested and complies with ANSI/BIFMA x5.1-2011 standards.
Callisto has been load tested to 450lbs

OPTIONS

ADJUSTABLE ARMS PLUS
Height adjustment range of 2.5”. Arm pad forward/backward adjustment of 1.5”. Arm pad has a 3 position swivel of 20 degrees inward and 15 degrees outwards. Adjustable Arms Plus provides a width adjustment range of 3".

SEAT SLIDER PLUS
The optional enhanced seat slider, has an adjustment range of 3”. When the 3” seat slider option is selected a larger chair base is included. Seat Slider Plus option is not available with the Stool base.

COMBINATION UPHOLSTERY OPTION
When combination upholstery is specified with fabric of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit will be applied. When graded in combination upholstery is selected, use the highest grade upholstery selected or to obtain a quote for blended grading contact Customer Service (please provide the fabrics specified and location of where each fabric is to be applied on the product).

REPLACEABLE COMPONENTS
Callisto is uniquely designed to allow major components to be field replaced, providing a very cost-effective means to significantly extend the life of the product.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

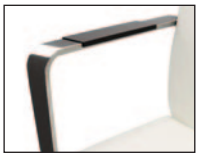
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION



level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. C5 products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All C5 products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. C5 and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

ARM STYLES
C5 features four styles of fixed arms; polished aluminum with polymer pad, polished aluminum with upholstered pad, full black polymer arm, and fully upholstered arm.

Polished Aluminum Arm with Polymer Pad

Polished Aluminum Arm with Upholstered Pad

Black Polymer Arm

Fully Upholstered - Leather or Fabric wrapped upholstered arm with detailed top stitching.

MECHANISM OPTIONS
Swivel-Tilt - Provides excellent value, durability and simplicity: forward and backward tilt, tilt lock, and 360 degree swivel, as well as vertical adjustment. Right side activated tension control. Available in Black only.

Knee Tilt - Right side activated tension control and vertical adjustment. Left side 4 position activated tilt lock. Available in Black powdercoat or Polished Aluminum.

BASE STYLES
C5 seating is available in two base options. Choose from a black nylon, or a polished aluminum.

Polished Aluminum

Black Glass Reinforced Nylon

Jury Base
The C5 series is available with a jury base. Jury base assembly consists of a black 9" diameter conical/cast base for permanently mounting a chair to the floor. Into the base is inserted a black pneumatic gas cylinder with self returning action from rotation, and self returning height feature when exiting the chair. Allows for full 360 degree rotation. Limited degrees of rotation are not available.

SEAT
The seat has been carefully researched and shaped to provide extended sitting comfort, with a foam density that provides an optimal combination of softness and firmness.

REPLACEABLE COMPONENTS
C5 chairs are uniquely designed to allow virtually all major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats, backs, mechanisms, arms, base and casters are field replaceable.

OPTIONS

COMBINATION UPHOLSTERY
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit. When graded in combination upholstery is selected, use the highest upholstery grade or contact customer service for a quote. Please provide the fabric specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

DIMENSIONS:
Height measurements of C5 tilter are taken with the pneumatic lift in the lowest position and with a standard height range gas lift. All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

COM APPROVAL PROCESS:
The approval process is as follows:
1. A sample of the COM fabric must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric will be inspected when received at the factory to identify any further concerns with its suitability.

WEIGHT CAPACITY:
C5 has been tested to ANSI BIFMA.
C5 is load rated to 300lbs

PRE-CONSUMER
RECYCLED CONTENT = 11.5%

POST-CONSUMER
RECYCLE CONTENT = 21.91%

Up to 47.7% of Aqua product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Aqua products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

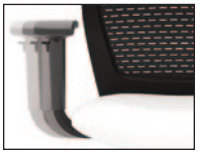
AIR-EMISSIONS
All Aqua products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Aqua and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

AQUA | FEATURES & OPTIONS

ARM STYLE
Four arm styles are available on Aqua - Armless, T-Arm, Height Adjustable T-Arm and Fixed Cantilever Arm.



T-Arm - A comfortable and supportive urethane pad, 10" in length by 3.5" wide, which can be field replaced if damaged, as can the entire arm.

Height Adjustable T-Arm - In addition to the same features as the T-Arm version, the arm pad has a 3-position rotation horizontally: center, left and right. The arm pad also adjusts forward and rearward in 5 positions, and is height-adjustable in 9 positions ranging over 4".

Cantilever Arm - The top surface of this arm has been proportioned to provide comfortable arm support, with a resting surface of 10" x 2".

ARM WIDTH ADJUSTMENT
Width adjustment is a standard feature on Aqua arm styles. T-Arms, and Height Adjustable T-Arms, can be width adjusted, operated by the handwheel located under the seat. The T-Arms are width adjustable in a range of 1.5" per arm, or 3" per chair. Cantilever arms can be width adjusted with tools instead of a handwheel, with adjustment range of 1" per arm, or 2" per chair.

MECHANISM OPTIONS
Synchro-Tilt Mechanism - There are 5 recline/lock positions, in addition to a full range of free-flowing movement. The forward position of the pivot point allows the back and seat to adjust in a 2:1 ratio synchronously, providing comfortable recline of the back with minimal incline of the seat.

Swivel-Tilt Mechanism - Provides excellent value, durability and simplicity: forward and backward tilt, tilt lock, and 360 degree swivel, as well as vertical adjustment - ideal for short-term use environments, such as meeting rooms, where numerous adjustability features may not be desirable or necessary. Aqua Stools are only available with a Swivel Mechanism.

Seat-Slider Option - Available on the Synchro-Tilt Mechanism, this offers a 2" range of forward and rearward adjustment of the seat, with a locking feature. The addition of the seat slider adds 1/2" to the height of the seat and arms.

BASE STYLE
Aqua seating is available with Black five star base and black gas cylinder, or optional Polished Aluminum five star base and chrome cylinder for an upcharge of **$42 list**. Both bases come standard with dual wheel black casters. Hard casters are the standard and soft wheel casters can be ordered for **$67 list** per chair. Aqua bases are also available with a fixed height option for an upcharge of **$42 list** per chair.

JURY BASE
The Aqua series is available with a jury base. Jury base assembly consists of a black 9" diameter conical/cast base for permanently mounting a chair to the floor. Into the base is inserted a black pneumatic gas cylinder with self returning action from rotation, and self returning height feature when exiting the chair. Allows for full 360 degree rotation. Limited degrees of rotation are not available.

MESH BACKS
Mesh Backs are made of breathable polyester elastomers, the Mesh Back has an ideal tension that provides comfortable lumbar and thoracic support for extended use and healthy sitting - enhanced further with the air circulation provided by the mesh's unique design, and an easy-to-clean surface. The mesh back is also replaceable. Mesh colors available:
• White • Warm Grey • Black • Sky• Clay • Neo • Sunset • Cardinal

UPHOLSTERED BACKS
A unique construction with a mesh suspension core, combined with extensively-researched ergonomic curvature, gives the Aqua back a form-fitting comfort and a thin profile that is designed for healthy long-term sitting.

BACK TENSION
Back tension on the mechanism is controlled with an adjustment knob under the seat. It has been designed to provide a range of back tension adjustment suitable for users of varying sizes and preferences.

REPLACEABLE COMPONENTS
Aqua chairs are uniquely designed to allow virtually all major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats, backs, mechanisms, arms, base and casters are field replaceable. Pricing and model numbers can be viewed online at www.krug.ca.

OPTIONS
COMBINATION UPHOLSTERY
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit. When graded in combination upholstery is selected, use the highest upholstery grade or contact customer service for a quote. Please provide the fabric specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

Height measurements of Aqua tilter and teller chairs are taken with the pneumatic lift in the lowest position and with a standard height range gas lift.
All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

The approval process is as follows:
1. A sample of the COM fabric must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric will be inspected when received at the factory to identify any further concerns with its suitability.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Dorso products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Dorso products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Dorso and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

DORSO E & T | FEATURES

ARM STYLES
Optional fixed cantilever or an adjustable black arm constructed of die cast metal with textured plastic arm pads. The adjustable arms feature seven height adjustment positions, with a total adjustment range of 2.75". All Dorso models are also available in armless versions.

E-LINE
Fixed cantilever and adjustable arms are available in Black, Silver Metallic or Polished Chrome accent finishes to match metal base. The fixed arm is also available in black textured plastic and upholstered fabric/leather version.

T-LINE
Fixed cantilever and adjustable arms are available in black textured plastic.

BASE STYLES

E-LINE & T-LINE
Dorso seating features optional Silver Metallic, polished Chrome or Black finish and dual wheel casters.

DORSO CONTROLS
All Dorso E-Line and T-Line come with synchro tilt mechanism. The tilt adjustment range offers five recline-lock positions, as well as free flowing movement. The forward pivot mechanism allows the back and the seat to articulate synchronously in a 2:1 ratio, so that upward tilt of the seat is minimized as the back reclines.

BACK HEIGHT
Back height adjustment is an option on Dorso E & T Line. It offers an adjustment range of 11 positions, over a 2" range of movement. Back height adjustment is operated while in the seated position, by placing the right hand on the right bottom of the chair back, and the left hand on the left bottom of the chair back. The back is lifted and clicked into the desired height. Raising the back to the highest position releases the back height lock so it can be lowered.

SEAT HEIGHT
In the seated position, a pull upwards on the height adjustment lever located under the seat of the user's right side adjusts the height up or down with a total height range of 4.5".

BACK TENSION
Back tension on the mechanism is controlled with an adjustment knob under the seat. It has been designed to provide a range of back tension adjustment suitable for users of varying sizes and preferences.

SEAT SLIDER
All Dorso tilters are available with an optional seat slider mechanism featuring a 2" range of adjustment front to back when seated. The lever to activate this feature is located under the seat of the user's right side and is activated by an upward pull of the lever.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

DORSO | E-LINE

Note: Some vinyls, leathers and upholsteries are not suitable for application on Dorso E seating.
For vinyls, please submit a sample to Customer Service for pre-approval process at time of order.

The pre-approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric or leather itself will be inspected when received at the factory, to identify and further concerns with its suitability.

ORDERING NOTES:
Height measurements of Dorso E are taken with the pneumatic lift in the lowest position. All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

DORSO T-LINE | DIMENSIONS & COM REQUIREMENTS

Dorso T - a strikingly modern chair design, provides a level of long term sitting comfort and support.

DORSO | T-LINE

Note: Some vinyls, leathers and upholsteries are not suitable for application on Dorso T seating.
For vinyls, please submit a sample to Customer Service for pre-approval process at time of order.

The pre-approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric or leather itself will be inspected when received at the factory, to identify and further concerns with its suitability.

OPTIONS
Height measurements of Dorso T are taken with the pneumatic lift in the lowest position. All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

DORSO T-LINE | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 7.91%

POST-CONSUMER
RECYCLED CONTENT = 18.91%

Up to 63.75% of this Dorso T product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION & AIR EMISSIONS CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Dorso products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Dorso products are supplied air-emissions certified. Contact customer service for information.

level® CERTIFICATION & AIR EMISSIONS CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Dorso products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Dorso products are supplied air-emissions certified. Contact customer service for information.

DORSO WEAVE | FEATURES

ARM STYLES
Optional fixed cantilever or an adjustable black arm constructed of die cast metal with textured plastic arm pads. The adjustable arms feature seven height adjustment positions, with a total adjustment range of 2.75". All Dorso models are also available in armless versions.

S-LINE
Fixed cantilever and adjustable arms are available in Black, Silver Metallic or Polished Chrome accent finishes to match metal base. The fixed arm is also available in black textured plastic and upholstered fabric/leather version.

N-LINE
Fixed cantilever and adjustable arms are available in black textured plastic only.

BASE STYLES
Dorso seating features injection molded, glass reinforced black nylon bases with dual wheel casters. Dorso seating features optional Silver Metallic or Polished Chrome finish. S-Line models feature steel upper and lower seat back exposed frame rail available in Silver Metallic or Polished Chrome finish.

DORSO CONTROLS
All Dorso S-Line and N-Line tilters come with a synchro tilt mechanism. The tilt adjustment range offers five recline-lock positions, as well as free flowing movement. The forward pivot of the mechanism allows the back and the seat to articulate synchronously in a 2:1 ratio, so that upward tilt of the seat is minimized as the back reclines.

SEAT HEIGHT
In the seated position, a pull upwards on the height adjustment lever located under the seat of the user's right side adjusts the height up or down with a total height range of 4.5".

BACK TENSION
Back tension on the mechanism is controlled with an adjustment knob under the seat. It has been designed to provide a range of back tension adjustment suitable for users of varying sizes and preferences.

SEAT SLIDER
All Dorso tilters are available with an optional seat slider mechanism featuring a 2" range of adjustment front to back when seated. The lever to activate this feature is located under the seat of the user's right side and is activated by an upward pull of the lever.

BACK HEIGHT
Back height adjustment is a standard feature on S-Line chairs, and an option on N-Line chairs. It offers an adjustment range of 11 positions, over a 2" range of movement. Back height adjustment is operated while in the seated position, by placing the right hand on the right bottom of the chair back, and the left hand on the left bottom of the chair back. The back is lifted and clicked into the desired height. Raising the back to the highest position releases the back height lock so it can be lowered.

BACK COLOR OPTIONS
Black • Warm Grey • Tan • Soft Beige • Winter White

level® CERTIFICATION & AIR EMISSIONS CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Dorso products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Dorso products are supplied air-emissions certified. Contact customer service for information.

DORSO S-LINE & N-LINE | FEATURES

ARM STYLES
Optional fixed cantilever or an adjustable black arm constructed of die cast metal with textured plastic arm pads. The adjustable arms feature seven height adjustment positions, with a total adjustment range of 2.75". All Dorso models are also available in armless versions.

S-LINE
Fixed cantilever and adjustable arms are available in Black, Silver Metallic or Polished Chrome accent finishes to match metal base. The fixed arm is also available in black textured plastic and upholstered fabric/leather version.

N-LINE
Fixed cantilever and adjustable arms are available in black textured plastic.

BASE STYLES
Dorso seating features injection molded, glass reinforced black nylon bases with dual wheel casters. Dorso seating features optional Silver Metallic or Polished Chrome finish. S-Line models feature steel upper and lower seat back exposed frame rail available in Silver Metallic or Polished Chrome finish.

DORSO GUEST SEATING
S-LINE
Dorso seating is available in three base styles:
Cantilever
4-Leg
4-Leg with twin wheel casters

Each is offered in a Silver Metallic or Polished Chrome steel frame.

N-LINE
Dorso seating is available in three base styles:
Cantilever
4-Leg
4-Leg with twin wheel casters

Each is offered in a Silver Metallic steel frame.

BACK HEIGHT
Back height adjustment is a standard feature on S-Line chairs, and an option on N-Line chairs. It offers an adjustment range of 11 positions, over a 2" range of movement. Back height adjustment is operated while in the seated position, by placing the right hand on the right bottom of the chair back, and the left hand on the left bottom of the chair back. The back is lifted and clicked into the desired height. Raising the back to the highest position releases the back height lock so it can be lowered.

BACK TENSION
Back tension on the synchro tilt mechanism is controlled with an adjustment knob under the seat. It has been designed to provide a range of back tension adjustment suitable for users of varying sizes and preferences.

DORSO CONTROLS
All Dorso S-Line and N-Line tilters come with a synchro tilt mechanism. One of the best engineered and most user-friendly chair controls, the synchro tilt mechanism is unique in providing a single, easy-accessed lever to adjust tilt lock positions and seat height. The tilt adjustment range offers five recline-lock positions, as well as free flowing movement. The forward pivot of the mechanism allows the back and the seat to articulate synchronously in a 2:1 ratio, so that upward tilt of the seat is minimized as the back reclines. The synchro tilt mechanism also features an anti-kickback lock release, providing a smooth transition from locked to unlocked tilt adjustment.

SEAT HEIGHT
In the seated position, a pull upwards on the height adjustment lever located under the seat of the user's right side adjusts the height up or down with a total height range of 4.5".

SEAT SLIDER
All Dorso tilters are available with an optional seat slider mechanism featuring a 2" range of adjustment front to back when seated. The lever to activate this feature is located under the seat of the user's right side and is activated by an upward pull of the lever.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

DORSO S-LINE & N-LINE | DIMENSIONS & COM REQUIREMENTS

Presenting one of the world's most advanced seating concepts: new technology that offers outstanding ergonomics in a strikingly modern chair design, while providing a level of long-term sitting comfort and support that has been the hallmark of European seating.
DORSO: Designed by Gabriel Teixidó

ORDERING NOTE
Add 0.5 yards for seating with leather wrapped arm option.

Note: Some vinyls are not suitable for application on Dorso seating. For vinyls other than Maharam's Lariat, or Momentum's Cashmere, please submit a sample to Customer Service for an approval process at time of order.

The approval process is as follows:
1. A sample of the COM vinyl fabric must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM vinyl will be inspected when received at the factory to identify and further concerns with its suitability.

ORDERING NOTES
All Dorso swivel and tilter models are available with an optional seat slider mechanism at an upcharge of **$84 list**.
Height measurements of Dorso are taken with the pneumatic lift in the lowest position. All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

Material Content:

PRE-CONSUMER
RECYCLED CONTENT = 4.67%

POST-CONSUMER
RECYCLED CONTENT = 17.3%

Up to 26.67% of this Cadence product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Me products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Me products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Me and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

Me brings new meaning to custom seating. Your comfort. Your style. Your chair.

With Me, options, styling and versatility are virtually endless, and comfort is superior. With Me, Krug has created a chair that not only provides unprecedented comfort and natural posture support, but also exceptional styling. Me is an adaptable seating solution for any management, task and conference environment.

ARM STYLES
Four arm styles are available on Me. In addition to the armless version, is the urethane over molded steel supported fixed cantilever arm, or the adjustable pad arms: urethane pad arms, or upholstered pad arms. Both adjustable arm versions feature: pivoting arms that adjust 30 degrees inward or outward, 1 1/2" left and right width adjustment control, and a 6 stop position arm height range with a total of 2.6" of height adjustment. When specifying leather on the upholstered arm pad version, the user has the option of a perforated arm pad (available when specifying Krug's stock leather only). When specifying polished aluminum bases on Me, the arm upright will also be finished in polished aluminum (on adjustable arm versions only).

BASE STYLES
Me seating is available in two base options. Choose from an injection molded, glass reinforced black nylon base or polished cast aluminum base, both with 2 1/4" dual wheel casters.

ME CONTROLS
Me features a standard synchro tilt mechanism that allows the back and the seat to articulate synchronously in a 2:1 ratio. This feature insures that the upward tilt of the seat is minimized as the back reclines. The mechanism that also features a standard tilt lock mechanism that allows the user an infinite number of recline lock positions. Simply push the tilt lock lever downward to lock and upward to free-float the back.

SEAT HEIGHT
In the seated position, a pull upwards on the height adjustment lever located under the seat of the user's right side adjusts the height up or down with a total height range of:
Standard gas lift: 4.25" without seat slider and 4.0" with seat slider.
Low gas lift: 3.5" without seat slider and 3.5" with seat slider.

BACK TENSION
The back tension adjustment knob is located on the front underside of the seat. A simple turn of the knob provides a range of back tension adjustment suitable for users of varying sizes and preferences.

UPHOLSTERY OPTIONS
With Me comes the ability to choose contrasting fabrics/leathers for the seat, upper and lower back sections, as well as the upholstered arm pads. This option allows for an endless possibility of custom designed seating options (see upcharges on the following pages). When specifying leather from Krug's in-stock leather program, the option to perforate the leather on the lower back and upholstered pad arms is available (see pricing on the following pages).

SEAT SLIDER
All Me adjustable arm versions are available with an optional seat slider mechanism featuring a 2" range of adjustment front to back when seated. The lever to activate this feature is located under the seat of the user's left side and is activated by a simple twist of the knob.

BACK HEIGHT
Me is available in three back heights: low, mid and high. Back height adjustment is a standard feature on all Me models. This feature offers an adjustment range of 11 positions over a 2 1/2" range of movement. Back height adjustment is operated while in the seated position, by placing the right hand of the right bottom of the chair back, and the left hand on the left bottom of the chair back. The back is lifted and clicked into the desired height. Raising the back to the highest position releases the back height lock so it can be lowered to the first and lowest stop position.

OPTIONAL GAS LIFT HEIGHT RANGES
Me is available with two gas lift ranges. Unless clearly specified on order, Me seating will be provided with the standard gas lift. The gas lift ranges measured from the seat height are as follows:
Non Seat Slider Versions: Standard gas lifts give a seat height of no greater than 16" when lowered and no less than 20" when extended. Low gas lifts give a seat height of no greater than 15 1/8" when lowered and no less than 18 5/16" when extended.
Seat Slider Versions: Standard gas lifts give a seat height of no greater than 16 1/4" when lowered and no less than 20 5/16" when extended. Low gas lifts give a seat height of no greater than 15 3/8" when lowered and no less than 18 15/16" when extended. If dimensions are critical, please contact Customer Service.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

Height measurements of Me are taken with the pneumatic lift in the lowest position and with a standard height range gas lift. All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

Note: Some vinyls are not suitable for upholstery on Me seating. For vinyls other than Maharam's Lariat, or Momentum's Cashmere, please submit a sample to Customer Service.

The approval process is as follows:

1. **A sample of the COM vinyl fabric must be provided to Krug Customer Service prior to or at time of order. For Maharam or Momentum fabric, Krug will obtain the fabric sample.**
2. **The sample will be reviewed and the customer advised if the fabric is unsuitable.**
3. **The COM vinyl will be inspected when received at the factory to identify and further concerns with its suitability.**

level® CERTIFICATION & AIR EMISSIONS CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Pan Am products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Pan Am products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Pan Am and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

ARM STYLES
Pan Am features three styles of fixed arms, including open urethane, closed upholstered and open upholstered versions.

BACK STYLES
Available with two different back options, Mid and High, Pan Am is perfect for desk and conference applications.

BASE STYLES
Featuring a five blade caster base with 2 1/4" hooded dual wheel casters, Pan Am bases are available in both glass reinforced molded nylon base and polished cast aluminum base. (upcharge applies.)

SEAT HEIGHT
In the seated position, a pull upwards on the height adjustment lever located under the seat of the user's right side adjusts the height up or down with a total height range of:
Standard gas lift: 3.5"
Low gas lift: 3.0"

TILT TENSION
A tilt tension knob is located under the seat for all versions of Pan Am. For Knee Tilt versions a push of the height adjustment lever toward the gas lift cylinder activates the tilt lock feature.

PAN AM CONTROLS
Pam Am is available with either a Swivel Tilt of Knee Tilt mechanism. All Pan Am seating features an adjustable tilt tension knob, and height adjustment lever. On the Knee Tilt version of Pan Am, the height adjustment lever also operates a forward tilt lock.

OPTIONAL GAS LIFT HEIGHT RANGES
PAN AM is available with two gas lift ranges. Unless clearly specified on order, PAN AM seating will be provided with the standard gas lift. The gas lift ranges measured from the seat height are as follows: Pan Am standard gas lift give a seat height no greater than 16.4" when lowered and no less that 20.2" when extended. Low gas lift give a seat height no greater that 15.04" when lowered and no less than 18" when extended.

OPTIONAL JURY BASE
Jury Bases assembly consists of a black 9" diameter conical/cast base for permanently mounting a chair to the floor. Into the base is inserted a black pneumatic gas cylinder with self returning action from rotation, and self returning height feature when exiting the chair. Allows for full 360 degree rotation. Limited degrees of rotation are not available

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

Note: Some vinyls are not suitable for upholstery on Pan Am seating. For vinyls other than Maharam's Lariat, or Momentum's Cashmere, please submit a sample to Customer Service for a pre-approval process at time of order.

The pre-approval process is as follows:
1. A sample of the COM vinyl fabric must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM vinyl will be inspected when received at the factory to identify and further concerns with its suitability.

Please contact Customer Service for more information on options for the Pan Am series. Height measurements of Pan Am are taken with the pneumatic lift in the lowest position. All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

LEED CI CREDITS

PRE-CONSUMER
RECYCLED CONTENT = 4.67%

POST-CONSUMER
RECYCLED CONTENT = 17.3%

Up to 26.67% of this Cadence product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

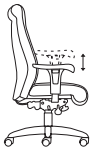
level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Cadence products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Cadence products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Cadence and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

CADENCE | FEATURES



RECLINE ADJUSTMENT
The recline adjustment on the Cadence series allows a 24 degree range of motion. The foremost lever located on the right-hand side (when you are in a seated position) engages a device to lock the back in any position within the chair's range of movement. Lowering the lever locks the back at any position within the range. Raising the lever releases the lock and the back will move freely through the entire range.

BACK HEIGHT ADJUSTMENT
(on selected models only)
The back height is adjustable on selected models of Cadence series. The mechanism adjusts the back while in the seated position. The adjustable height back has a 4 inch range of movement with an 8 position stop mechanism. Place both hands on either side of the lower back cushion and lift and click to the desired height. Raise the back to the highest position to release the back height lock and lower to the first and lowest position.

BACK TENSION
A hand wheel centrally located near the front underside of the chair controls the amount of tension applied to the back. Turning the knob clockwise when you are in the seated position lessens the tension. Turning the knob counterclockwise increases the tension.

ARM HEIGHT
(on selected models only)
A trigger release button located outside and below the arm pad adjusts the arm height. Depress the trigger to raise arm through its height range of 3.5 inches and 8 settings. Depress the trigger to raise the arm, release when desired height is reached to lock in position.

SEAT HEIGHT ADJUSTMENTS
The rear-most lever located in the right-hand side (when you are in the seated position) activates the seat height adjustment. Pull up on the lever to adjust seat height up or down through a range of adjustment of 3 inches.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge of $67 list **per yard.**
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Addison products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Addison products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Addison and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

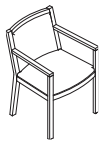
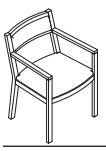
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION





level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Bali products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Bali products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Bali and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

HEALTHCARE DISCOUNT APPLIES TO THESE PRODUCTS

FAERON WOOD | GUEST, PATIENT, MULTIPLE & EASY ACCESS FEATURES

HEALTHCARE DISCOUNT APPLIES TO THESE PRODUCTS

CLEAN OUT
All Faeron seating models have a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

FLEX BACK
The ergonomically designed back has been designed with a slight flexing action, to enhance the level of long-term sitting comfort, and provide greater ease of egress.

WALL SAVER
The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

STEEL SEAT FRAME
Steel seat frames are joined to other components with hardened steel bolts and inserts, ensuring exceptional durability and strength. In addition they ease re-configurability and on-site replacement of damaged or degraded components.

SEAT COMFORT
Seats feature a spring suspension across the entire model range for exceptional comfort while high grade foam provides superior support and longevity.

PLUS UPGRADE
Faeron 30” and 44” models feature Plus Upgrade. Plus Upgraded seating has been engineered to support higher weight capacities, accommodating a wider variety of users.

GLIDES
Faeron’s Beech wood legs feature floor-saver nylon glides. Optional floor-saver felt, metal or plastic glides are also available see pricing pages for upcharges. Please see page 343 for more information.

FINISH DURABILITY
The Krug’s finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of healthcare environments.

LATEX FREE
Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people.

REPLACEABLE COMPONENTS
Faeron chairs are uniquely designed to allow virtually all major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats, backs, frames are field replaceable. Pricing and model numbers can be viewed online at www.krug.ca.

CUSTOM CAPABILITIES
Modifications in dimension, seat and back shape or thickness, and other modifications are possible with Krug's capability to customize for specific requirements and needs. We can also provide custom finishes.

WEIGHT CAPACITIES
Faeron weight capacities are as follows:
Guest & Patient Chairs (21” & 24”) - 500 lbs
Plus Chairs (30” & 44”) - 750 lbs
Easy Access Chairs - 500 lbs
Multiple Seating & Pre-configured - 500 lbs per seat
2-Seat Freespan - 625 lbs per unit
3-Seat Freespan - 750 lbs per unit

FAERON WOOD | GUEST, PATIENT, MULTIPLE & EASY ACCESS OPTIONS

ARM PANELS
Panel arms are available in semi and fully closed styles for optimum design flexibility.

URETHANE ARM CAP
The optional Urethane Arm Cap provides enhanced durability and protection for the arms. This is field replaceable if this becomes damaged or degraded and is available in three colors; Black, Grey and Taupe.

SOLID SURFACE ARM CAP
The optional Solid Surface Arm Cap provides enhanced durability, protection and cleanability for the arms.
This is field replaceable if this becomes damaged or degraded and is available in 8 standard colors.

SOLID SURFACE ARM FRAME
The optional Solid Surface Arm provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in 8 standard colors and replaceable as a full side frame if it becomes damaged or degraded.

COMBINATION UPHOLSTERY OPTIONS
Faeron can be upholstered in combinations of two or more upholstery covers on the same units: seats, backs and closed arm panels can be individually upholstered with a specific cover. When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded-in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote)

KINETIC BACK OPTION
Provides the chair back with a very pleasant and comfortable rocking motion, which can significantly enhance long-term sitting for patients and guests alike. The durable spring-loaded mechanism provides a range of motion of 20 degrees, and can be field-installed or replaced. It's available on any Faeron Guest or Patient chair back with the exception of the Plus styles (30" and 44").

CLEANABLE UNDER-SEAT SPLASHGUARD
All Faeron seating models are available with a plastic moisture barrier that covers and encloses the underside of the seat (while still allowing air transfer and ventilation in and out of the seat cushion). The Splashguard significantly enhances the germ resistance properties of the product, by enclosing the part of the chair that can be most susceptible to infection-causing pathogens. The Splashguard is a smooth, easy to clean surface, either while on the chair or when removed, and is also field replaceable.

GANGING
All Faeron freestanding Guest/Patient chairs can be ganged using a ganging bracket. The powder coated metal bracket is fastened to the inside face of each side frame. Ganging Brackets are available for an upcharge.

REMOVABLE COVERS
Faeron chairs (all sizes) are available with removeable seat and back covers. Replacement seat and back covers can be quickly installed on Faeron products that were originally ordered with the Removeable cover option. Replacement seat and back covers can also be installed on Faeron products that were not originally ordered with the removeable cover option, with some simple staple removal on the original seats and backs

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.

The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information.

44” - One Chair	2.9	1.5	1.6	0.8

Note: Some vinyls, leathers & upholsteries are not suitable for application on Faeron seating.
The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

ORDERING NOTES:
Combination upholstery (more than one upholstery cover within the same unit) is an option on all Faeron upholstered products. When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics. When graded in combination upholstery is selected, use the highest grade upholstery selected or contact Customer Service for a quote -please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

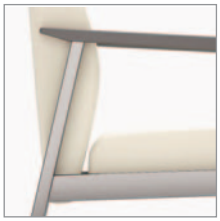
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Faeron products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Faeron products are supplied with air-emissions certified. Contact customer service for information.



FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Faeron and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

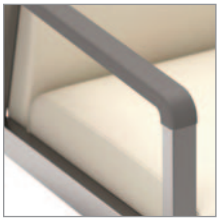
HEALTHCARE DISCOUNT APPLIES TO THESE PRODUCTS

FAERON METAL | GUEST, PATIENT, MULTIPLE & EASY ACCESS FEATURES

HEALTHCARE DISCOUNT APPLIES TO THESE PRODUCTS

CLEAN OUT
All Faeron Metal seating models have a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

FLEX BACK
The ergonomically designed back has been designed with a slight flexing action, to enhance the level of long-term sitting comfort, and provide greater ease of egress.



WALL SAVER
The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

STEEL SEAT FRAME
Steel seat frames are joined to other components with hardened steel bolts and inserts, ensuring exceptional durability and strength. The seats features a spring system that substantially enhances comfort and extends product life cycle. Seats are removable, and field replaceable.

SEAT COMFORT
Seats feature a spring suspension for exceptional comfort while high grade foam provides superior support and longevity.

POLYMER ARM
Faeron arms are durable, comfortable, and long lasting. They are made with injected polymer that is a solid color throughout the arm and are available in three color options: Black, Grey and Taupe.

METAL FINISHES
Faeron Metal chairs are available in two metal finishes; Sliver Metallic and Brushed Nickel.

GLIDES
Faeron's metal legs feature floor-saver nylon glides. Optional floor-saver felt, metal or Non-slip rubber glides are also available see pricing pages for upcharges. Please see page 343 for more information.

FINISH DURABILITY
The Krug's finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer and is especially suited to the demands of healthcare environments.

LATEX FREE
Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people.

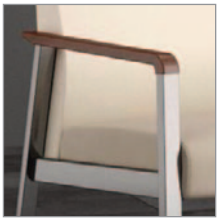
REPLACEABLE COMPONENTS
Faeron Metal chairs are uniquely designed to allow virtually all major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats, backs, frames are field replaceable. Pricing and model numbers can be viewed online at www.krug.ca.

CUSTOM CAPABILITIES
Modifications in dimension, seat and back shape or thickness, and other modifications are possible with Krug's capability to customize for specific requirements and needs. We can also provide custom finishes.

WEIGHT CAPACITIES
Faeron Metal weight capacities are as follows:
Guest & Patient Chairs (21" & 24") - 500 lbs
Plus Chairs (30" & 44") - 750 lbs
Easy Access Chairs - 500 lbs
Multiple Seating & Pre-configured - 500 lbs per seat
2-Seat Freespan - 625 lbs per unit
3-Seat Freespan - 750 lbs per unit

PLUS UPGRADE
Faeron 30" and 44" models feature Plus Upgrade. Plus Upgraded seating has been engineered to support higher weight capacities, accommodating a wider variety of users.

Faeron Metal Images | www.krug.ca



FAERON METAL | GUEST, PATIENT, MULTIPLE & EASY ACCESS OPTIONS

ARM PANEL
Upholstered arm panels are available in both semi- and fully-closed styles, and are field replaceable if damaged.

SOLID SURFACE ARM
The optional Solid Surface Arm provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in 8 standard Corian colors, and custom colors (at an upcharge). Arms are replaceable as a full side frame if they become damaged or degraded.

WOOD ARM
Wood arms are solid Beech and available in standard and custom finishes. Krug's wood finish is a proprietary high-durability formulation that has been shown to be an industry leader in abrasion resistance. Arms can be replaced if they do become damaged or degraded.

COMBINATION UPHOLSTERY OPTIONS
Faeron Metal can be upholstered in combinations of two or more upholstery covers on the same units: seats, backs and closed arm panels can be individually upholstered with a specific cover. When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded-in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote)

KINETIC BACK OPTION
The optional Kinetic Back provides the chair back with a very pleasant and comfortable rocking motion, which can significantly enhance long-term sitting for patients and guests alike. The durable spring-loaded mechanism provides a range of motion of 20 degrees, and can be field-installed or replaced. It's available on any Faeron Guest or Patient chair back with the exception of the Plus styles (30" and 44").

CLEANABLE UNDER-SEAT SPLASHGUARD
All Faeron Metal seating models are available with a plastic moisture barrier that covers and encloses the underside of the seat (while still allowing air transfer and ventilation in and out of the seat cushion). The Splashguard significantly enhances the anti-microbial and germ resistance properties of the product, by enclosing the part of the chair that can be most susceptible to infection-causing pathogens. The Splashguard is a smooth, easy to clean surface, either while on the chair or when removed, and is also field replaceable.

REMOVABLE COVERS
Faeron Metal chairs (all sizes) are available with removeable seat and back covers. Replacement seat and back covers can be quickly installed on Faeron products that were originally ordered with the Removeable cover option. Replacement seat and back covers can also be installed on Faeron products that were not originally ordered with the removeable cover option, with some simple staple removal on the original seats and backs.

METAL FINISH OPTIONS
Silver Metallic frames are available with an anti-microbial finish for an upcharge of **$67 list** per arm frame pair or table. Additional Frame Finishes, which include anti-microbial finish, are available for an upcharge of **$67 list** per arm frame pair or table. Available colors are: White, Parchment, Sand, Taupe, Warm Grey, Cool Grey or Black. For all metal finishes other than Silver Metallic Standard, there is a minimum order quantity of 30 units per color. Upcharges for order quantities less than 30 units per color or custom metal finishes, please contact Customer Service to obtain a quote.

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.

The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information.

GANGING
All Faeron Metal freestanding Guest/Patient chairs can be ganged using a ganging bracket. The powder coated metal bracket is fastened to the inside face of each side frame. Ganging Brackets are available for an upcharge of **$60 list** per chair.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

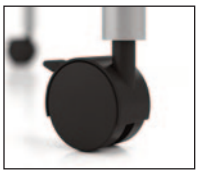
level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Krug products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Krug products are supplied air-emissions certified. Contact customer service for information.

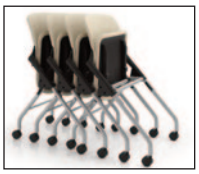
FEATURES

POLYMER BACK & SEAT
Libra chairs feature Black polymer seat and back. The polymer back provides contoured lumbar support and flex for greater comfort. The seat tilts down for the sitting position and flips up when ready to nest the chairs.

UPHOLSTERED SEAT & BACK
Libra chairs are available with upholstered seat and Black polymer back or upholstered seat and back.



FRAME
Metal frame finish is available in Black or Silver Metallic.



ARMS
Libra chairs are available in both Armless and Armed chair styles. Armed chairs feature a fixed, forward-sloping Black polymer armrest.

GLIDES
Libra features floor-saver nylon glides which are field-replaceable if damaged or degraded.

CASTERS
The twin-wheel casters promote easy storage and repositioning and are also available with a locking option.

NESTING
Libra chairs nest by raising the seat into its upright position, they can be nested with both the book rack and tablet in place.

REPLACEABLE COMPONENTS
Libra is designed to allow major components to be field replaced, providing a very cost effective means to significally extend the life of the product.

WEIGHT CAPACITIES
Libra has been laboratory tested to meet a weight capacity of 300lbs, for arm and armless versions.

OPTIONS

TABLET
Libra swivel folding tablet is available in Black polymer. The tablet is fastened to the left side (facing).

BOOK RACK
The wire book rack is available in Black or Silver Metallic to coordinate with the frame selection. It can conveniently remain in place when the chairs are nested but is also removable without tools if needed.

COMBINATION UPHOLSTERY COVERS
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit. When graded in combination upholstery is selected, use the highest upholstery grade or contact customer service for a quote. Please provide the fabric specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge of $67 list per yard. The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

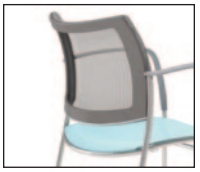
MOBI | FEATURES, OPTIONS, DIMENSIONS & COM REQUIREMENTS

ARMS
Arms are available in the full range of polymer colors: Black, White, Grey, Taupe, Yellow, Red, Blue, Green. Please specify when ordering.



ARMLESS

POLYMER SEATS & BACKS
Available Polymer colors: White, Grey, Taupe, Yellow, Red, Blue, Green and Black.

UPHOLSTERED SEATS & BACKS
Optional Removable covers can be quickly installed on Mobi products that were originally ordered with the removable cover option.

MESH BACKS
Available mesh colors: Grey, Black & White. Please specify when ordering.

STACKABILITY
Mobi chairs are stackable to a maximum of 8 chairs high on the floor as well as dolly.

LEGS & GLIDES
Mobi legs are structural steel legs in Polished Chrome with floor-saver nylon glides. Optional floor-saver felt, non-slip rubber and plastic glides are available at an upcharge.Please see page 343 for more information.

WEIGHT CAPACITY
Mobi has been tested and complies with ANSI/BIFMA x5.1-2011 standards. Mobi has been load tested up to 300lbs.

CADDIE
The Mobi caddie provides enhanced stackability, along with the ease of movement and storage. It has a durable tubular construction and 4 soft-wheel swivel, locking casters. Its design allows for the stacking and storage of all Krug stackable chairs.

COMBINATION COLORS
More than one polymer color can be selected in any combination for seats, backs and arms. Please specify when ordering.

OPTIONS

REPLACEMENT AND REMOVABLE COMPONENTS
Mobi is designed to allow major components to be field replaced, providing a very cost effective means to significally extend the life of the product. Mobi Chairs are available with Removable Seat and Removable Back Covers,

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Karma products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

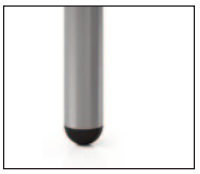
AIR EMISSIONS
All Karma products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Karma and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

KARMA | FEATURES & OPTIONS

DESIGNED FOR COMFORT
The seat features an enhanced standard foam thickness, combined with our proprietary webbing suspension system, to provide superior comfort and a longer life cycle. The back is contoured and angled to provide supportive sitting.



LIGHT GREY POLYMER BACK
Polypropylene backs are injection molded, with Light Grey pigment diffused throughout the mold, featuring a compound that provides UV resistance to fading and brittleness from exposure to light. Backs have a minimum wall thickness of 5 mm, providing excellent strength and shock resistance.

WALL SAVER
The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

POLYMER ARM
Karma arms are durable, comfortable, and long lasting. They are made with injected polymer that is a solid color throughout the arm and are available in three color options: Black, Grey, Light Grey and Taupe.

STANDARD GLIDE
Karma's black domed polymer glides are non-adjustable, and field-replaceable if damaged or degraded. Ideal for carpeted flooring.

STACKING
Karma stacks 7 high on the floor, and 12 chairs on the Caddie. The optional Underseat Cover can be specified to help prevent indenting of seat upholstery on chairs that will be stacked. Karma chairs with the Sled Base option do not stack.

TANDEM SEATING
Karma chairs, and in-line tables, are designed to be instantly converted to (or ordered as) tandem seating. Armed and armless chairs can be connected -when joining arm chairs the positioning prevents a pinch point between the arms. In-line tables can be configured between chairs or as end tables. And the tandem components can be easily removed to convert to freestanding.

REPLACEABLE COMPONENTS
Karma is designed to allow major components to be field replaced, providing a very cost effective means to significally extend the life of the product.

FRAME COLORS AVAILABLE
The Karma Leg is available in 2 standard finishes; Silver Metallic and Matte Black. Polished Chrome is also available for an upcharge.

WEIGHT CAPACITIES
Karma has been laboratory tested to meet a weight capacity of 500 lbs, in all versions: arm and armless, and all widths.

OPTIONS

SLED BASE OPTION
Optional Sled Base frames are available in Silver Metallic and Matte Black. The integrated steel rail spans between the front and rear legs which are fitted with black nylon glides. Karma chairs with the Sled Base option do not stack.

UNDERSEAT COVER
As an alternative to the standard dust cover under the seat, this option, in black polymer, closes off the underside of the chair, functioning as a cleanable Splashguard to protect the interior from moisture. It also assists in chair stacking, by distributing the weight to eliminate any indentations in the seat upholstery.

CASTERS OPTION
Karma features durable low profile 1 ½" diameter casters in black nylon offering an impressive 500lb load rating. Karma chairs with the caster option do not stack.

FLOOR-SAVER GLIDES
Karma's floor-saver glides are a larger, white, nylon glide incorporating a much larger surface area, and is a self-adjusting to help protect LVT, vinyl, tile, or hardwood where risk of marking might occur. Available in floor-saver felt as well. See pricing pages for upcharges.

NON-SLIP GLIDE
Features a much larger surface area and is also self-adjusting. It also features a softer outer coating to hold and prevent chair from sliding on LVT, vinyl, or tile flooring. Perfect for more slippery/smooth floor areas where prevention of chair movement is required.

COMBINATION UPHOLSTERY COVERS
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit. When graded in combination upholstery is selected, use the highest upholstery grade or contact customer service for a quote. Please provide the fabric specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

REMOVABLE COVERS & REPLACEMENT COMPONENTS
Optional Removeable covers can be quickly installed on Karma products that were originally ordered with the Removable cover option. Replacement covers can also be installed on Karma products that were not originally ordered with the Removable cover option, with some simple staple removal.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. See page 339 for more information.

CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Corfu products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Corfu products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Corfu and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

CORFU | FEATURES & OPTIONS

SUSTAINABLE DESIGN
Corfu is made with recycled materials, with an overall recycled content of 40%. Many of these same materials are also recyclable. Corfu is air emissions certified.

UNDER SEAT COVER
Each Corfu includes an underseat system for stacking: a grey polypropylene seat pan that nests into the seat below and protects it from the frame above. It also provides for easy cleaning and maintenance by covering the underside of the chair.

WOOD FINISH
Krug's Enduraguard™ finish is a catalyzed conversion varnish topcoat, combined with a vinyl polymer-based sealer, that in independent testing has been shown to have exceptional durability characteristics in its resistance to scratching, marring, and degradation from cleaning materials and other substances.

BEECH PLYWOOD
Wood seats and backs are made with European Beech hardwood veneers, featuring nine (9) plys of cross grain for added strength and durability.

STACKING
Corfu chairs are stackable, to a maximum of 13 chairs for the wood or plastic versions, and 10 chairs for the upholstered version, when stacked on the Corfu caddie. Corfu chairs are stackable to a maximum of 9 chairs for the wood or plastic versions and 6 chairs for the upholstered version when stacked on the floor. The upholstered versions stack to a height of 74" in the armless version, and 76" with arms. The non-upholstered versions stack to a height of 70" in the armless version and 72" in the version with arms.

CADDIE
The Corfu caddie provides enhanced stackability, along with the ease of movement and storage. Its design allows for the stacking and storage of all Krug stackable chairs. It has a durable tubular construction and 4 soft-wheel swivel, locking casters. This caddie is designed to stack and transport Krug's other stacking chairs.

GANGING
Corfu can be ordered with the option of ganging for the upcharge of **$34 list** per chair. Please specify ganging when ordering.

PACKAGING
Corfu packaging features recycled, recyclable cardboard. The arm and armless chairs are shipped 4 units per carton.

STEEL FRAME
Corfu seating is built with high strength steel castings and extrusions. Finish options are Silver Metallic and Polished Chrome. Legs feature Floor-saver nylon glides, metal glides are optional. Please see page 343 for more information.

PLASTIC COMPONENTS
Polypropylene seats, backs and other components are injection molded, with pigment diffused throughout the mold, and featuring a compound that provides UV resistance to fading and brittleness from exposure to light. Seats and backs have a minimum wall thickness of 5 mm, providing excellent strength and shock resistance. Corfu (Plastic Seat & Back) is available in six different colors. Please specify a color when ordering.
Color Selection:
White, Black, Grey, Red, Blue, Sand

OPTIONS

COMBINATION UPHOLSTERY COVERS
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit. When graded in combination upholstery is selected, use the highest upholstery grade or contact customer service for a quote. Please provide the fabric specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge. The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

Note: Some vinyls, leathers & upholsteries are not suitable on Corfu seating.

The approval process is as follows:
1. A sample of the COM must be provided to Krug Customer Service prior to or at the time of order.

2. The sample will be reviewed and the customer advised if the upholstery cover is unsuitable.

3. The COM upholstery cover or leather will be inspected when received at the factory, to identify any further concerns with its suitability.

WEIGHT CAPACITY
Corfu has been tested and complies with ANSI/BIFMA x5.1-2011 standards. Corfu has been load tested up to 350lbs.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Capri products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Capri products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Capri and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Manolo products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Manolo products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Manolo and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

SEATS
Manolo seats are available, with two back heights; Backless Seat and Low Back Seat, in Upholstered, Beech and Walnut veneers and Palette finishes.

BASES
Manolo Stool bases are available in two heights; Counter Height or Bar Height. Bases feature Polished Chrome structural steel base frames with plastic glides. Floor-saver felt glides are optional. Please see page 343 for more information.

WEIGHT CAPACITY
Manolo complies with ANSI/BIFMA x5.1-2011 test standards. Manolo has been load tested up to 300lbs.

FINISH DURABILITY
The Krug's finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of high traffic environments.

OPTIONS

CAL 133 & Moisture Barrier
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge of $67 list.

The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $917 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
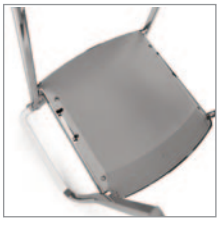
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Corfu products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Corfu products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Corfu and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

SUSTAINABLE DESIGN
Corfu is made with recycled materials, with an overall recycled content of 40%. Many of these same materials are also recyclable. Corfu is air emissions certified.



WOOD FINISH
Krug's Enduraguard™ finish is a catalyzed conversion varnish topcoat, combined with a vinyl polymer-based sealer, that in independent testing has been shown to have exceptional durability characteristics in its resistance to scratching, marring, and degradation from cleaning materials and other substances.

BEECH PLYWOOD
Wood seats and backs are made with European Beech hardwood veneers, featuring nine (9) plys of cross grain for added strength and durability.

STEEL FRAME
Corfu seating is built with high strength steel castings and extrusions. Finish options are Silver Metallic and Chrome.

PLASTIC COMPONENTS
Polypropylene seats, backs and other components are injection molded, with pigment diffused throughout the mold, and featuring a compound that provides UV resistance to fading and brittleness from exposure to light. Seats and backs have a minimum wall thickness of 5 mm, providing excellent strength and shock resistance. Corfu (Plastic Seat & Back) is available in six different colors. Please specify a color when ordering.
Color Selection:
White, Black, Grey, Red, Blue, Sand

UNDER SEAT COVER
Each Corfu includes an under-seat system for stacking: a grey polypropylene seat pan that nests into the seat below and protects it from the frame above. It also provides for easy cleaning and maintenance by covering the underside of the chair.

OPTIONS

COMBINATION UPHOLSTERY COVERS
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit. When graded in combination upholstery is selected, use the highest upholstery grade or contact customer service for a quote. Please provide the fabric specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge of $67 list per yard. The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

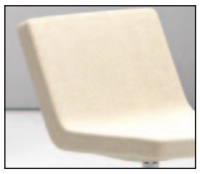
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Avatar products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Avatar products are supplied with air-emissions certified. Contact customer service for information.



FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Avatar and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

AVATAR | FEATURES & OPTIONS

STYLE
FIXED ARM

ARMLESS

LEGS
Avatar legs feature Polished Chrome aluminum foot with floor-saver nylon glides.

REPLACEABLE COMPONENTS
Avatar is uniquely designed to allow major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Chair legs, arms, table tops and bases are field replaceable.

FINISH DURABILITY
The Krug's finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of high traffic environments.

WEIGHT CAPACITIES
Avatar complies with ANSI/BIFMA x5.1-2011 test standards. Avatar has a load tested up to 300lbs.

OPTIONS

CAL 133 & MOISTURE BARRIER
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

All Cressida products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come.
Contact customer service for further information, pricing and leadtimes.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

CLEAN OUT
Cressida lounge seating models have a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

ARMS AND ARMLESS
Cressida features five arm options; Armless, Open Arm, Open Arm Polymer Arm Cap, Closed Arm, Closed Arm Polymer Arm Cap. Polymer arm cap is available in Black or Grey.

POLYMER ARM CAP
Available in Grey and Black colors, the Arm Cap is field- replaceable if necessary.

GLIDES
Cressida Lounge arm and armless versions feature floor-saver nylon glides.

WEIGHT CAPACITIES
Cressida weight capacities are as follows:
One-Seat-350 lbs
One-Seat (Plus) -750 lbs
One-Seat Wide - 350lbs
One-Seat Wide (Plus) - 750lbs
Two-Seat - 525 lbs
Two-Seat (Plus) - 975lbs
Three-Seat - 850 lbs
Three-Seat (Plus) - 1200 lbs

REPLACEABLE COMPONENTS
Cressida Lounge chairs are uniquely designed to allow virtually all components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats, backs and arms are field replaceable.

OPTIONS

CASTERS
Cressida Lounge is available with the option of casters. Caster option comes with the two rear casters locking as standard.

PUSH BAR
This is a option on Cressida lounge when ordered with casters, ergonomically designed to assist care-giving staff in the movement and operation of the chair, and reduce back strain on the caregiver. The push bar is powder-coated steel in Silver Metallic finish.

PLUS UPGRADE
Cressida seating is available with optional Plus Upgrade. Plus Upgraded seating has been engineered to support higher weight capacities, accommodating a wider variety of users.

TABLETS
Optional Tablets are available on the Cressida Lounge & Modular in veneer, glass, high pressure laminate, solid surface and palette finishes. The Cressida tablet can be fastened to the Cressida Lounge & Modular chairs by the Universal Tablet Mount (mounted left or right), to existing legs and features an elliptical shape of 16 1/2" x 11 1/2" x 3/4" in size. The Cressida Tablet has a turning radius of 360 degrees, which accommodates any worksurface angle.

COMBINATION UPHOLSTERY
More than one upholstery cover within the same unit, is an option on all Cressida upholstered products. When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics. When graded in combination upholstery is selected, use the highest grade upholstery selected or contact Customer Service for a quote -please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote.

METAL FINISH OPTIONS
Silver Metallic frames are available with an anti-microbial finish for an upcharge of **$67 list** per arm frame pair or table. Additional Frame Finishes, which include anti-microbial finish, are available for an upcharge of $67 list per arm frame pair or table. Available colors are: White, Parchment, Sand, Taupe, Warm Grey, Cool Grey or Black. For all metal finishes other than Silver Metallic Standard, there is a minimum order quantity of 30 units per color. Upcharges for order quantities less than 30 units per color or custom metal finishes, please contact Customer Service to obtain a quote.

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified , the product also features the compliance method and low flammability features of CAL 133. The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks.

REMOVABLE AND REPLACEABLE COVERS
Cressida Lounge Chairs are available with removable seat and back covers.

LEYTON | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 28.61%

POST-CONSUMER
RECYCLED CONTENT = 9.91%

Up to 8.81% of this Leyton product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Leyton products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Leyton products are supplied air-emissions certified. Contact customer service for information and upcharges.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Leyton and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
OAK	Light Oak SilverGrey on Oak Espresso Oak Harvest Oak Mahogany Mellow oak
MAPLE	Clear Maple Honey Maple Wheat Maple
WALNUT	Natural Walnut SilverGrey on Walnut Regular Walnut Dark Walnut Cordovan Walnut
CHERRY	Appalachian Cherry American Cherry Imperial Cherry Sable Cherry Light Cherry Medium Cherry Natural Cherry Standard Cherry
ANIGRE	Clear Anigre Medium Anigre
SYCAMORE	Clear Sycamore

Please note Cherry, Anigre and Sycamore species require a minimum quantity order, of 5 units for seating and 5 units for tables, per species.

PALETTE	Black White Sand Soft Green Steel Blue Slate

VENEERS
Leyton veneers are quarter cut, except for White Oak, which is rift cut - both quarter cut and rift cut veneers provide a straight grain appearance. The grain direction of the veneers on vertical faces is horizontal.

NON-STANDARD VENEER SPECIES
In addition to range of standard wood species, Leyton can be made with virtually any commercially available veneers. Please contact customer service for information and pricing on wood species not included in Leyton's standard offering.

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules.

ENDURAGUARD FINISH
Leyton features the Krug finish, a proprietary catalyzed varnish formulation, that has repeatedly shown through independent laboratory testing to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors and is uniquely suited to the demands of high traffic environments.

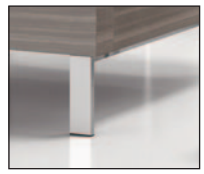
IN-STOCK LAMINATE
Krug's in-stock laminates are available on Leyton Table surfaces in 4 solid laminate selections. Laminate surfaces are self-edged.

SOLID LAMINATES
Designer White - Platinum - Earth - Charcoal

LEYTON | FEATURES

ARM STYLE
Leyton features four design styles Upholstered Armless, Upholstered Full Arm, Wood Surround Armless and Wood Surround Full Arm.

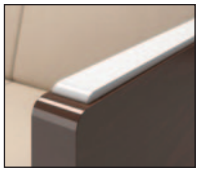
Upholstered Armless



Upholstered Full Arm

Wood Surround Armless

Wood Surround Full Arm



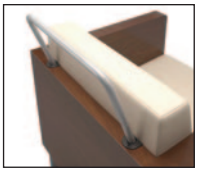
LEGS
Leyton Lounge and Tables feature Polished Chrome structural steel legs with plastic glides. Floor-saver nylon are optional. Glide recommendation chart on page 343.

REPLACEABLE COMPONENTS
Leyton chairs are uniquely designed to allow major components to be field replaced, providing a very cost effective means to significally extend the life of the product. Seats, backs, arms and frames are field replaceable, with the only exceptions being the Upholstered Armless, Upholstered Full Arm and Upholstered Front Panel as it is one piece.

WEIGHT CAPACITIES
All Leyton seating feature Plus Weight capacities.
One-Seat - 750lbs
One-seat Wide - 750lbs
Two-Seat - 975lbs
Three-Seat - 1200lbs
Leyton has been tested to ANSI / BIFMA.

PLUS UPGRADE
Leyton models feature Plus Upgrade. Plus Upgraded seating has been engineered to support higher weight capacities, accommodating a wider variety of users.

OPTIONS



Solid Surface Arm Cap

Leyton Lounge Full Arm version is available with an optional Solid Surface Arm Cap providing enhanced durability, protection and cleanability for the arms. This is field replaceable if it becomes damaged or degraded and is available in 8 standard colors.

TABLET

Leyton Solid Surface tablet can be specified left or right as seated. The tablet can be used alone or with solid surface arm cap and is 1/2” thick.

PUSH BAR

This is an optional feature on Leyton One Seat lounge chairs, designed to assist caregiving staff in the movement and relocation of the chair. It is Silver Metallic in color and retractable for ease of use. The Push bar is field replaceable if necessary.

CASTERS

Optional on Leyton lounge chairs are four - 4" diameter soft wheel swivel locking casters, featuring a large, easy-access foot activation and release lever. The caster locks both directionally and rotationally, keeping the chair securely in place when locked. Note: lounge chairs with casters are not designed or intended as patient transport devices.

CLEAN OUT

Leyton lounge seating models have an optional built-in clean out feature: a space at the back of the seat that allows dirt debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product. Clean Out option is available for an upcharge,

UNDER-MOUNT POWER

The Under-mount Power unit provides dual power/USB C & A outlets for multiple devices. It can be located below seats and tables.

COMBINATION UPHOLSTERY

When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote)

REMOVABLE COVERS & REPLACEMENT COMPONENTS

Optional Removeable covers (with the exception of the Upholstered Armless, Upholstered Full Arm and Front panel) can be quickly installed on Leyton products that were originally ordered with the Removable cover option. Replacement covers (with the exception of the Upholstered Armless, Full Upholstered Arm and front panel) can also be installed on Leyton products that were not originally ordered with the Removable cover option, with some simple staple removal.

CAL 133 & MOISTURE BARRIER

California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. CAL 133 and Moisture Barrier are available for an upcharge, please see page 164.

The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

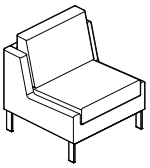
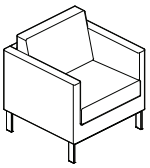
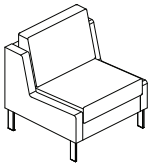
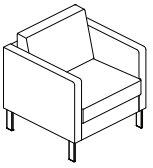
COM APPROVAL PROCESS:

The approval process is as follows:









1. A sample of the COM fabric must be provided to Krug Customer Service prior to or at time of order.
2. The sample will be reviewed and the customer advised if the fabric is unsuitable.
3. The COM fabric will be inspected when received at the factory to identify any further concerns with its suitability.

LEED CI CREDITS

MATERIAL CONTENT

PRE-CONSUMER
RECYCLED CONTENT = 6%

POST-CONSUMER
RECYCLED CONTENT = 12.12%

Up to 35.11% of Zola Modular product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION & AIR-EMISSIONS CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Zola products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Zola products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Zola and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

ZOLA | FEATURES & OPTIONS

INTENSIVE USE ENVIRONMENTS
Zola has been designed for healthcare and other intensive use environments, with some important features: removable and replaceable upholstery covers, an anti-microbial finish, the option of a urethane arm cap and a standard clean-out between the seat and back. Modular construction allows for complete cleaning and disinfecting of the entire unit, and air emissions certification, make Zola an excellent solution for healthy spaces and caregiving environments.

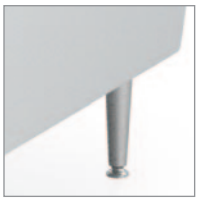
ZOLA LOUNGE & ZOLA MODULAR
Zola Lounge chairs are pre-assembled at Krug and cannot be reconfigured into Modular units. Arms and backs cannot be removed from the seat.

RECONFIGURABILITY
Zola Modular is designed to enable change: components are inter-changeable, reconfigurable, and replaceable. Metal-to-metal bracketry is designed for fast, easy reconfiguring, that does not damage or degrade the product, and new components can be added and added with ease. Both backs and arms can be reconfigured to either side of the unit. Its unique leveller provides exceptional leveling capability over large spans, and on uneven floors. Heavy duty casters provide seating with mobility.

LINKING BRACKET
The Zola seat-to-seat linking bracket is made of sturdy, powder-coated steel construction in a black finish. This linking bracket is fastened with metal to metal connections from the seat to another seat with hardened steel bolts to ensure exceptional durability and strength. Brackets mount underneath, and do not mar or damage the tables or seats. This feature is not available on the Lounge version.

REPLACEABILITY
Zola is built to last: its heavy-duty structure is designed for intensive use environments. When any component is damaged or degraded, it can be easily changed out on its own, instead of having to replace or repair an entire unit. Along with its use of recycled and recyclable materials, the replaceability of components means Zola can provide exceptional long term value, and be an investment in sustainability.

FINISH DURABILITY
The Krug's finish a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of high traffic environments.



WALL SAVER
The angle of the Zola Lounge back is designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the room. Zola upholstered chairs are built with a 1/2" clearance between the top of the back and the wall for the wall saver design. Please note wall saver is not a feature on the wood back versions.

CLEAN OUT
Zola chairs have a built-in clean out feature: a space at the back of the seat that allows dirt and debris to fall to the floor for easy clean up and maintenance. The clean out feature was designed so that it does not detract from the comfort or appearance of the product.

CASTERS
Optional on the Zola Lounge are the choice of:
a) Four - 3 1/4" dia hard wheel casters, consisting of two non braking on the front, and two braking on the back. Braking casters have a large , easy access foot activation lever.
b) Two non braking casters on the back, and two legs on the front. Casters are NOT available on the Plus product(s)

LEGS
Zola legs are Silver Metallic and feature Floor-saver nylon glides that are adjustable up to 1.25", which provide leveling capability over longer spans. Floor-saver felt glides, non-slip rubber glides & metal glides are optional at an upcharge. Please see page 343 for more information.

URETHANE ARM CAP
The optional urethane arm cap provides enhanced durability and protection for the arms. Urethane arm caps are available in two color options; Grey and Taupe. The urethane arm cap is field replaceable if damaged or degraded with the assistance of a skilled upholsterer.

SOLID SURFACE ARM CAP
The optional Solid Surface Arm Cap provides enhanced durability, protection and cleanability for the arms. This is field replaceable if this becomes damaged or degraded and is available in 8 standard colors.

FULL DEPTH BENCHES
Modular Curved Benches are offered in two depths. For a flush edge when joining a Modular Curved Bench to Modular seat with back choose the Full Depth.

PLUS UPGRADE
Zola seating is available with optional Plus Upgrade. Plus Seating has been engineered to support higher weight capacities, accommodating a wider variety of users.

WEIGHT CAPACITIES
Zola weight capacities are as follows:

One-Seat (Straight or curved)	- 300 lbs
One-Seat Plus	- 750 lbs
Two-seat (Straight or curved)	- 525lbs
Two-seat Plus	- 975 lbs
Three-seat	- 750 lbs
Three-seat Plus	- 1150 lbs

TABLETS
Optional Tablets are available on the Zola Lounge & Modular in veneer, clear glass, solid surface, high pressure laminate and palette finishes. The Zola tablet can be fastened to the Zola Lounge & Modular chairs by the Universal Tablet Mount (mounted left or right), to existing legs and features an elliptical shape of 16 1/2" x 11 1/2" x 3/4" in size. The Zola Tablet has a turning radius of 360 degrees, which accommodates any worksurface angle.

TABLES MATERIALS OPTION
Tables are available in veneer, plastic laminate, and Palette finishes - and an optional Solid Surface top. Tables feature leveling glides on every leg. See 373.

SOLID SURFACE TOPS
The Solid Surface Top option features Solid Surface material: composed of minerals, acrylic resins and colors, it is a non-porous, scratch and dent-resistant material that does not stain, and does not allow microbes and bacteria to penetrate the surface. Color is throughout the material, so surface scratches are not as visible.

LINKING TABLES
Zola Linking Tables can be fastened in the field to Zola Modular and Zola Benches with the table to seat bracket without compromising the upholstery. Zola Middle tables have the ability to be easily reconfigured, as they are universal and non-handed. They can be moved to a reverse position in almost any configuration to provide a high level of flexibility when specifying.

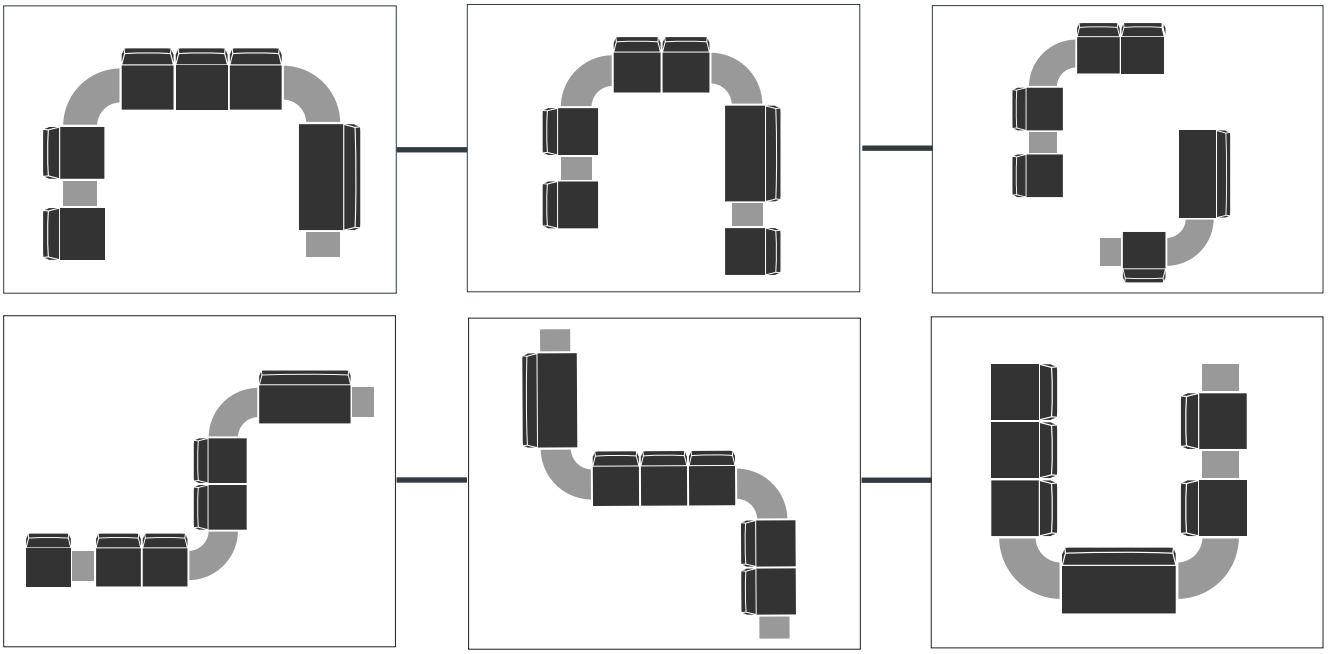
LINKING BRACKETS
The Zola table to seat bracket is made of sturdy, powder-coated steel construction in a Silver Metallic finish to match the legs and casters. This linking bracket is fastened with metal to metal connections from the seat to the table with hardened steel bolts to ensure exceptional durability and strength. Brackets mount underneath, and do not mar or damage the tables or seats. This feature is not available on the Lounge version.

POWER
The flush-mounted Power unit provides dual power/USB A & C outlets for multiple devices. It can be located on either side of the seat, seat front, (not available on curved fronts) as well as on the front face of tables as standard. See page 196 for locations and page 257 for pricing.

UNDER-MOUNT POWER
The Under-mount Power unit provides dual power/USB A & C outlets for multiple devices. It can be located below seats and tables. See page 257 for pricing.

COMBINATION UPHOLSTERY
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded-in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote)

REPLACEMENT UPHOLSTERY COVERS
Replacement upholstery covers can be easily fitted onto Zola Modular components (with the exception of Zola Curve backs) originally ordered with Removable Upholstery Covers. It is possible to use replacement covers on modular components originally ordered with standard upholstery covers, but this requires some removal of staples and other basic upholstery. Please note that the tailoring of replacement upholstery covers can be less exact and refined in appearance as original upholstery.



REMOVABLE UPHOLSTERY COVERS
Removable Upholstery Covers are available on most Zola Modular upholstered components, (with the exception of Zola Curve backs) at an upcharge. This feature allows for upholstery covers to be cleaned and disinfected, and allows them to be field-replaced with replacement upholstery covers. Please note that the tailoring of Removable Upholstery Covers can be less exact and refined in appearance than standard upholstery. Replacement and removeable covers, (supplied with Velcro) will tailor differently than the permanently stapled upholstery. Overall form and fit is identical, however minor dimensional build up due to the thickness of the velcro can occur. The velcro fastening build up is directed to the least noticeable face (usually the bottom edge of a component) where ever possible.

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks.

Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information. CAL 133 and Moisture Barrier is available for $67 list per yard.

ZOLA | RECONFIGURABILITY

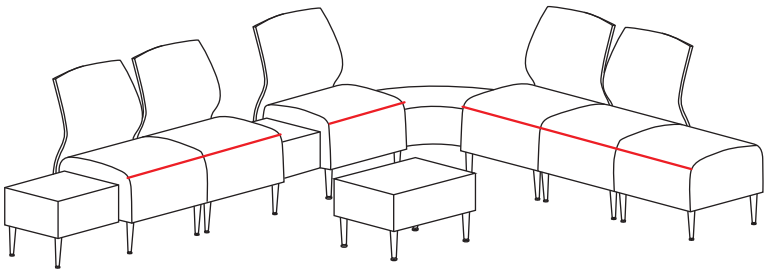
Zola is designed to enable change: components are inter-changeable, reconfigurable, and replaceable. Metal to metal bracketry and frames are designed for fast, easy reconfiguring, and new components can be added at any time. Its unique leveller provides exceptional levelling capability over large spans, and on uneven floors. Heavy duty casters provide seating with mobility. Each of the 6 sample configurations shown here use exactly the same components - highlighting Zola Modular has the ability to reconfigure again and again, in a myriad of different ways. Joining bracketry is underneath seats and backs, so no surfaces are marred or damaged when connected, and re-connected.

ZOLA | SEAM LOCATIONS

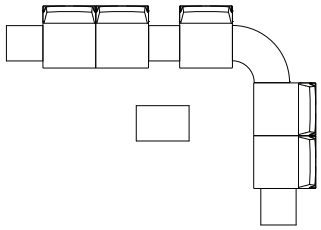
Due to the curved geometry of the upholstered backs, vertical seams are necessary for quality tailoring of the unit. Patterned Fabrics with "Distinctive details" - such as stripes, squares, straight lines and/or large details, will have noticeable changes in regards to the alignment of the patterns. 90 Degree units -both inside and outside curves are most noticeable. 60, 45 and 30 degree are also subject to this.

Approximate Dimensional Distortions on Patterns:

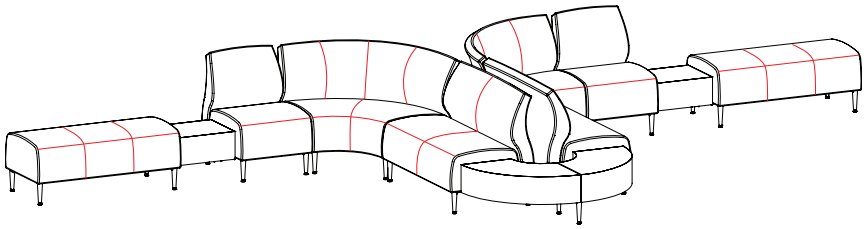
	Inside Curve	Outside Curve
30 Deg	1 ½"	1"
45 Deg	2"	1 ½"
60 Deg	2 ½"	2"
90 Deg	3"	2 ½"

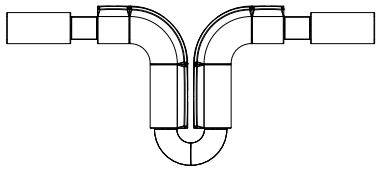


Zola seat photo indicates location of seam.



Inside Curve
Showing colliding stripes at the lumbar portion of the back, and opening stripes at the top and bottom.





Outside Curve
Showing colliding stripes at the upper and lower portion of the back, with opening stripes at the lumbar.

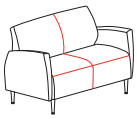
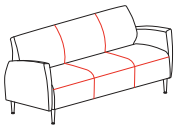
10 Units = Take the yardage for 4 units, multiply by 2, add yardage for 2 units
20 Units = Take the yardage for 4 units, multiply by 5
67 Units = Take the yardage for 4 units, multiply by 16, add yardage for 3 units

COMBINATION UPHOLSTERY





When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote)

ORDERING NOTES:

Please note, Zola Lounge chairs are pre-assembled at Krug and cannot be reconfigured into Modular units. Arms and backs cannot be removed from the seat. Zola Lounge chairs cannot be used in conjunction with Zola Linking Tables. Zola Plus Lounge Two-Seats and Three-Seats units have the same dimensions as the Regular Lounge Two-Seats and Three-seats. Zola Lounge chairs are not available with replacement components or covers. These options are only available on the Modular product.

One-Seat (Plus)	1.90	1.8	3.5	5.25	7	1.25	2.6	3.75	5.5

To calculate the COM Yardage for more than 4 units, take the largest multiple (4 units) and add the closest remainder. See below for example calculations.

5 Units = Take the yardage for 4 units and add the yardage for 1 unit
6 Units = Take the yardage for 4 units and add the yardage for 2 units
7 Units = Take the yardage for 4 units and add the yardage for 3 units
8 Units = Take the yardage for 4 units and multiple by 2
9 Units = Take the yardage for 4 units, multiply by 2, add yardage for 1 unit
10 Units = Take the yardage for 4 units, multiply by 2, add yardage for 2 units
20 Units = Take the yardage for 4 units, multiply by 5
67 Units = Take the yardage for 4 units, multiply by 16, add yardage for 3 units

Zola Modular Plus Two-Seats and Three-Seats units have the same dimensions as the Regular Modular Two-Seats and Three-seats.

COMBINATION UPHOLSTERY
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics will be applied. When graded in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote)

PACKAGING
All Modular Units, and tables will be shipped KD (Knocked Down)

Upcharge for Removable Upholstery Covers:

ORDERING NOTES:
The Interim Arm was designed to fit in between two seating units and therefore shortens the width between arms by 1" per seating unit. The interim Arm does not compromise the overall width of the combined benches. Zola Arms (left or right) are specified when seated. To specify Solid Surface Arm Cap add a "3" to the end of the model above, example ZOL3-MAL**3,** and clearly state color choice. (See page 342 for color selection)

ZOLA PRIVACY | ENVIRONMENTAL SUMMARY

LEED CI CREDIT

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 6.34%

POST-CONSUMER
RECYCLED CONTENT = 14.09%

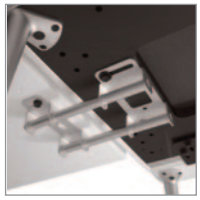
Up to 40.58% of this Zola product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION & AIR EMISSIONS CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Zola Privacy products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

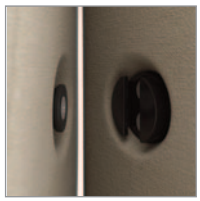


AIR EMISSIONS
All Zola Privacy products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Zola Privacy products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Contact customer service for further information, pricing and leadtimes.

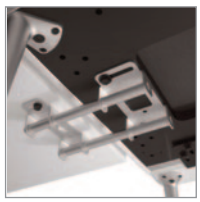
Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

REPLACEABILITY
Zola is built to last: its heavy-duty structure is designed for intensive use environments. When any component is damaged or degraded, it can be easily changed out on its own, instead of having to replace or repair an entire unit. Along with its use of recycled and recyclable materials, the replaceability of components means Zola can provide exceptional long-term value, and be an investment in sustainability.

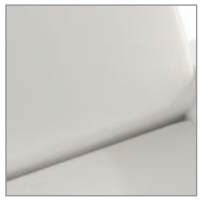


RECONFIGURABILITY
Zola is designed to enable change: components are inter-changeable, reconfigurable, and replaceable. Metal-to-metal brackets are designed for fast, easy reconfiguring, that does not damage or degrade the product, and new components can be added and added with ease. Arms can be added and reconfigured to either side of the unit. Its unique leveler provides exceptional leveling capability over large spans, and on uneven floors.

PRECONFIGURED
Zola Privacy can be specified in select preconfigured stand-alone arrangements. The offering includes one, two and three seat units in both Mid Height and Full Height styles. The units are pre-assembled with either full depth or semi-private side panels.



INTENSIVE USE ENVIRONMENTS
Zola has been designed for healthcare and other intensive use environments, with some important features: removable and replaceable upholstery covers, an anti-microbial finish, the option of a urethane arm cap and a standard clean-out between the seat and back. Modular construction allows for complete cleaning and disinfecting of the entire unit, and air emissions certification, make Zola an excellent solution for healthy spaces and care-giving environments. Plus styles are included in the offering.



BACK CONNECTION
The Zola Privacy back linking connectors are made of sturdy steel construction. It is a two part bracket fastened with metal-to-metal connections. Brackets are not visible when units are linked. Linked backs can only be reconfigured in the same start/center/end positions.

LINKING SEAT-TO-SEAT
The Zola seat-to-seat linking bracket is powder-coated steel construction in a black finish. This linking bracket is fastened with metal-to-metal connections from the seat to another seat with hardened steel bolts to ensure exceptional durability and strength. Brackets mount underneath, and do not mar or damage the tables or seats.

LINKING TABLE-TO-SEAT
The Zola table-to-seat bracket is powder-coated steel in a Silver Metallic finish to match the legs and casters. This linking bracket is fastened with metal-to-metal connections from the seat to the table.

CLEAN OUT
Zola Lounge chairs have a built-in clean out feature: a space at the back of the seat that allows liquid, dirt and debris to fall to the floor for easy clean up and maintenance. The clean out feature was designed so that it does not detract from the comfort or appearance of the product.

LEGS
The legs offered on Zola Lounge are Silver Metallic or Matte Black and feature Floor-saver nylon glides that are adjustable up to 1.25", which provide leveling capability over longer spans. Optional Floor-saver felt glides, Non-slip rubber glides or metal glides are optional at an upcharge. Caster leg is not available.

TWIN BACK
Zola Privacy is available in unique Twin Back models for both straight and curves styles. The one piece back-to-back design provides a clean, minimal solution for space division and maximizing seating.

COMBINATION UPHOLSTERY
When combination upholstery is with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and $67 list per unit for three fabrics will be applied. When graded-in combination upholstery is selected, use the highest upholstery selected or contact Customer Service for a quote (please provide the fabrics specified and a description of where each fabric is to be applied on the product in order to obtain a quote).

ANTI-MICROBIAL FINISH
Zola wood surfaces come with an anti-microbial finish that inhibits the growth of some molds and mildews. Surfaces coated in this finish support the reduction of fungal growth, and spores from germs, microbes and bacteria.

FINISH DURABILITY
Krug's finish, a proprietary catalyzed varnish formulation, has been repeatedly shown, through independent laboratory testing, to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors, and is uniquely suited to the demands of high traffic environments.

PLUS UPGRADE
Zola seating is available with optional Plus Upgrade. Plus Seating has been engineered to support higher weight capacities, accommodating a wider variety of users.

WEIGHT CAPACITIES
Zola weight capacities are as follows:

One-Seat (Straight or curved)	- 300 lbs
One-Seat plus	- 750 lbs
Two-seat (Straight or curved)	- 525lbs
Two-seat plus	- 975 lbs
Three-seat	- 750 lbs
Three-seat plus	- 1150 lbs

ZOLA PRIVACY | OPTIONS

PRIVACY SCREEN
Zola Privacy Screens are made of durable frosted acrylic and can be mounted to both mid and full height backs. Steel mounting hardware enables screens to be replaced in the field.

TABLET
Optional Tablets are available in veneer, clear glass, laminate and palette finishes. The Zola can be fastened by the Universal Tablet Mount (mounted left or right), to the single Zola leg, it is not able to mount on the Zola dual leg. The Zola Tablet has a turning radius of 360 degrees. Solid surface is available, contact Customer Service for pricing.

TABLES
Tables are available in veneer, high pressure laminate or Palette finishes - and an optional solid surface top. An optional flush-mounted Table PowerDoc provides dual power/USB A & C outlets for multiple devices can be located on the front face of Middle or End Tables (not available on curvilinear models). PowerDoc's have a 10' cord.

MODULAR ARM
Modular arms can attach to the left or right ends of seating units as well as interim locations between units. They are fully upholstered and can optionally be trimmed with urethane or solid surface arm caps.

URETHANE ARM CAP
The optional urethane arm cap provides enhanced durability and protection for the arms. Urethane arm caps are available in two color options; Grey and Taupe. The urethane arm cap is field replaceable if damaged or degraded.

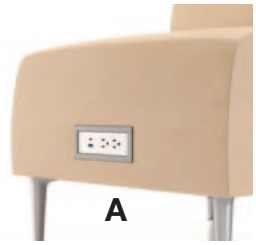
SOLID SURFACE ARM CAP
The optional Solid Surface Arm Cap provides enhanced durability, protection and cleanability for the arms. This is field replaceable if this becomes damaged or degraded and is available in 8 standard colors.

SHELVES & POWER
Back-mounted shelves can be specified in either 30", 36" or 42" and are available in veneer, laminate and Palette finishes (Solid surface overlay also available – contact customer service) The surface-mounted Shelf PowerDoc provides dual power/USB A & Coutlets for multiple devices. Units with Shelf Power are not available with Removable Cover option.

SEAT POWER
The flush-mounted power unit provides dual power/USB A & C outlets for multiple devices. It can be located on either side of the seat, or on the seat front (not available on curved fronts). See page 251 for pricing. Power unit color is white. Units with Seat Power are not available with Removable Cover option.

PRIVATE MODULAR SIDE PANEL
Side Panels can be specified (in either of two heights) as Start, Center and End locations of configurations to provide an additional degree of privacy and enclosure, and a resting corner position for users - a beneficial element in study, work and waiting area settings. Side Panels will only connect to Center seating units.

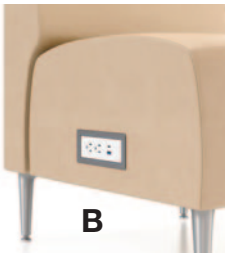
SEMI-PRIVATE MODULAR SIDE PANEL
Semi-Private Side Panels are shallower in depth than standard Side Panels and available in Mid and Full Height back styles. They are specified as Start, Center and Ends and only connect to Center seating units.
In configurations such as banquette settings with tables, they can offer users privacy while still permitting side entry to the seating.



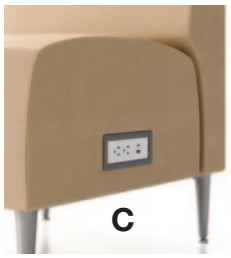
REPLACEMENT UPHOLSTERY COVERS
Replacement upholstery covers can be easily fitted onto Zola Modular components (with the exception of Zola Curve backs) originally ordered with Removable Upholstery Covers. It is possible to use replacement covers on modular components originally ordered with standard upholstery covers, but this requires some removal of staples and other basic upholstery. Please note that the tailoring of replacement upholstery covers can be less exact and refined in appearance than original upholstery.

REMOVABLE UPHOLSTERY COVERS
Removable Upholstery Covers are available on most Zola Modular upholstered components, (with the exception of Zola Curve backs) at an upcharge. This feature allows for upholstery covers to be cleaned and disinfected, and allows them to be field-replaced with replacement upholstery covers. Please note that the tailoring of Removable Upholstery Covers can be less exact and refined in appearance than standard upholstery. Replacement and removeable covers, (supplied with Velcro) will tailor differently than the permanently stapled upholstery. Overall form and fit is identical, however minor dimensional build up due to the thickness of the Velcro can occur. The Velcro fastening build up is directed to the least noticeable face (usually the bottom edge of a component) where ever possible.

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non-flammable upholstery covers, may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks.
Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of products and upholstery have already been tested. Please contact Customer Service for additional information.



ZOLA PRIVACY | POWER LOCATIONS



Seat Power

When ordering Seat Power clearly indicate required location using:

A - for front center of seat (not available on curved fronts)

B - for left side of seat (facing)

C - for right side of seat (facing)

D - for both left and right of seat

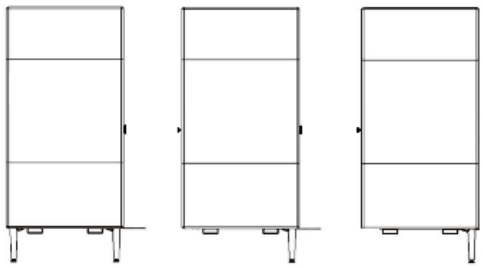
Units with Power are not available with Removable Cover option.

Shelf Power

Located mid-position on the shelf surface. Units with Shelf Power are not available with Removable Cover option.

Table Power

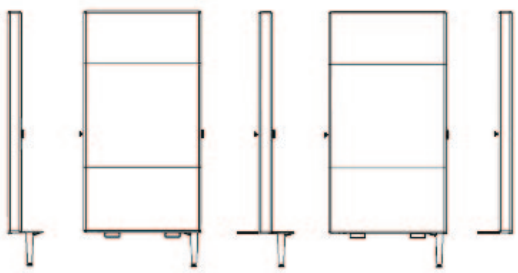
Located on the front face of the table as standard. To specify, clearly mark on the order and add **$679 list**.



Under-mount Power

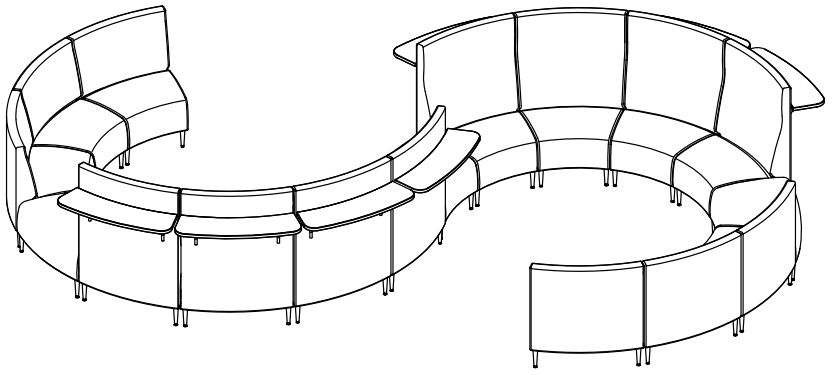
The Under-mount Power unit provides dual power/USB A & C outlets for multiple devices. It can be located below seats and tables.

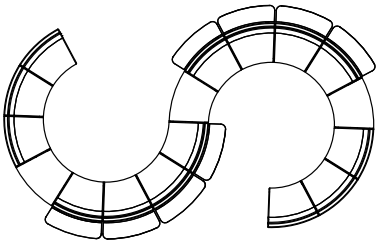
ZOLA PRIVACY | CONNECTING MULTIPLE UNITS



SEATING

Start, Center and End multiple units are used to configure continuous runs of seating. Units are specified from left to right (facing). Configurations must include one Start Unit and one End Unit and can be connected to any number of Center Units. Back connecting hardware is concealed once connected to the adjoining unit.





SIDE PANELS

Start, Center and End Panels are configured in combination with Center Seating only. Start and Center Panel kits contain additional legs which connect to the Center Seat Unit.

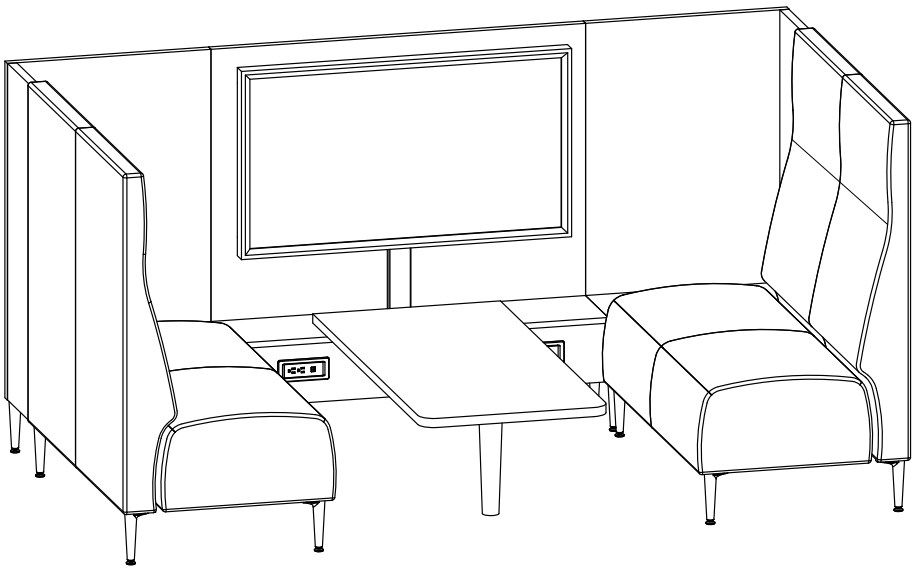
RECONFIGURABILITY
Inline Walls can be reconfigured within Zola Privacy seating configurations. Inline walls are comprised of 3 module types, a left and a right corner unit plus a center unit and are available in two depths - Inline Wall at 12 inches and Inline Table Wall at 28 inches. Inline Wall corner units and Inline Table Walls must connect to Start, Center or End seating unit.

BACK CONNECTION
Inline Corner Walls and Inline Tables connect to Zola Privacy seating using steel brackets. Seating must be specified as start, center or ends.

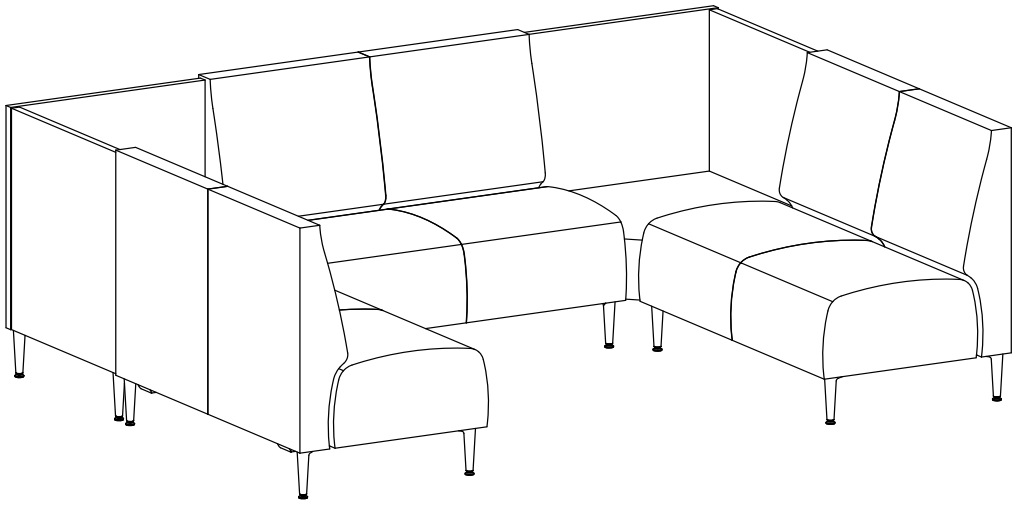
LEGS
The legs offered on Zola Lounge are Silver Metallic or Matte Black and come standard with glides that are adjustable up to 1.25”, which provide leveling capability over longer spans. Caster leg is not available.

MEDIA & POWER
Inline walls can be optioned with Media provisions and Powerdocs.

RUNOFF TABLES
Run-off tables are used in combination with Inline Walls and provide a fixed occasional height table between two seating units. They feature a single tapered metal leg with adjustable glide.



LAMINATE OR WOOD OPTIONS
Inline walls are offered in wood and laminate surfaces. They create a straight wall partition between two opposing seating units. Walls are available in Mid and Full Height back styles and are 12” in depth at the base.



SOLID SURFACE OVERLAY
The Solid Surface top option is priced as an upcharge to existing table price. Zola Solid Surface tables have a 1/2” thickness on top of the existing table, with a 1 mm overhang (soft radius vertical edge). Please see page 336 for color options.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Faeron products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Faeron products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Faeron and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

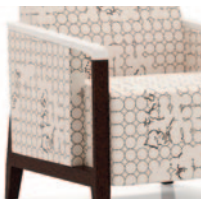
HEALTHCARE DISCOUNT APPLIES TO THESE PRODUCTS

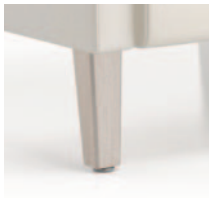
FAERON WOOD | LOUNGE FEATURES & OPTIONS

HEALTHCARE DISCOUNT APPLIES TO THESE PRODUCTS



WOOD ARM
Faeron Wood Arm Lounge chairs are available with optional Arm Caps in Urethane and Solid Surface. As well as a Solid Surface Arm.

ARMLESS
Faeron Armless Lounge seating can be specified with a full wood base providing an enhanced base profile.



UPHOLSTERED ARM
Faeron Upholstered arm lounge chairs are available with optional arm caps in Wood, Solid Surface and Urethane (Wingback lounge is not available with Urethane cap).

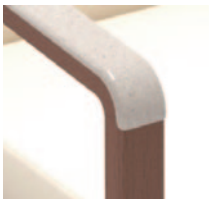
ARM PANEL
Arm Panels are available on Faeron Wood Arm Lounge seating in semi and fully closed styles for optimum design flexibility.

BEECH WOOD LEGS
Faeron Lounge legs and bases are solid Beech available in 22 finish selections. Faeron lounge legs feature Floor-saver nylon glides. Plastic glides and metal glides are optional at an upcharge. Please see page 343 for more information.

METAL LEGS
Faeron Upholstered Arm models are also available with Metal Legs; Silver Metallic or Brushed Nickle finish. Faeron lounge legs feature Floor-saver nylon glides. Floor-saver felt glides, non-slip rubber glides and metal glides are optional at an upcharge.

LOUNGE WALL SAVER
Faeron Lounge models include a wall saver feature in which the angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chair and the wall. Not included for Faeron High Back Lounge or Faeron Wingback Lounge due to back height.

CLEAN OUT
All Faeron Lounge seating has a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

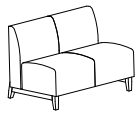


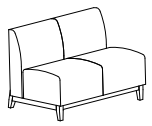
OPTIONS

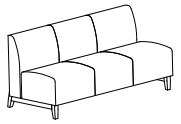
URETHANE ARM CAP
The optional Urethane Arm Cap is available on Wood Arm Lounge and Upholstered Arm Lounge and provides enhanced durability and protection for the arms. This is field replaceable if this becomes damaged or degraded and is available in three colors; Black, Grey and Taupe.

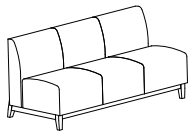
WOOD ARM CAP
The optional Solid Beech Arm Cap is available on Upholstered Arm and Wingback Lounge. This is field replaceable if this becomes damaged or degraded.

SOLID SURFACE ARM CAP
The optional Solid Surface Arm Cap is available on Wood Arm Lounge and Upholstered Arm Lounge and provides enhanced durability, protection and cleanability for the arms. This is field replaceable if this becomes damaged or degraded and is available in 8 standard colors.









SOLID SURFACE ARM
The optional Solid Surface Arm is available on Wood Arm Lounge and provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in 8 standard colors and replaceable as a full side frame if it becomes damaged or degraded.

COMBINATION UPHOLSTERY
When combination upholstery (more than one upholstery cover within the same unit) is specified with upholstery of the same grade or COM, an upcharge for dual fabrics is **$34 list** per unit and **$67 list** per unit for three fabrics. When graded-in combination upholstery is selected, use the highest grade upholstery selected or contact Customer Service for a quote

MOISTURE BARRIER & CAL 133
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method, in combination with non- flammable upholstery covers, that may enable products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of the uphostered components - thereby conferring sanitary and anti-infection benefits. So when CAL133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133. The application of this up-charge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL133 compliant. If the official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. .

REMOVABLE AND REPLACEABLE COVERS
Faeron Lounge Chairs are available with a Removable Seat & Back Covers.

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 8.09%

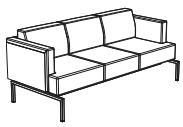
POST-CONSUMER
RECYCLED CONTENT = 15.29%

Up to 23.38% of Sutton product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION



level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Sutton products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Sutton products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Sutton and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

TATE BENCHES | FEATURES & OPTIONS

STYLE
Tate Bench features three design styles; Fully Upholstered, Gable End and Table End.

Fully Upholstered

Gable End
Tate Bench gable ends are 2” wide x 20” deep x 6” high on standard depth units and 2” wide x 25” deep x 6” high on deep seat units

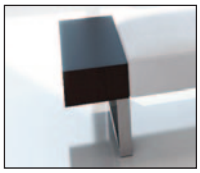

Table End
Tate Bench table ends are 10” wide x 20” deep x 6” high on standard depth units and 10” wide x 25” deep x 6” high on deep seat units.

LEGS
Tate Bench legs feature polished chrome structural steel legs with plastic glides. Floor-saver nylon glides are optional at an upcharge. Glide recommendation chart see page 338.

REPLACEABLE COMPONENTS
Tate Benches are uniquely designed to allow major components to be field replaced, providing a very cost effective means to significally extend the life of the product. Gable ends, table ends and legs are field replaceable.

WEIGHT CAPACITIES
Tate Bench have the following maximum weight ratings:
2 seater - 975 lbs
3 seater - 1,200 lbs

OPTIONS
Removable Covers
Optional Removeable covers can be quickly installed on Tate Bench products that were originally ordered with the Removable cover option. Replacement covers can also be installed on Tate Bench products that were not originally ordered with the Removable cover option, with some simple staple removal.

CAL 133 & Moisture Barrier
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

DIMENSIONS:
All dimensions are in inches and approximate and are subject to change without notice. Contact Customer Service if dimensions are critical.

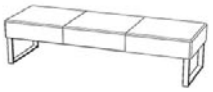
WOOD FINISHES
Standard wood finishes are:

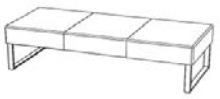
SPECIES	FINISH
OAK	Light Oak SilverGrey on Oak Espresso Oak
MAPLE	Clear Maple Wheat Maple
WALNUT	Natural Walnut SilverGrey on Walnut Regular Walnut Dark Walnut

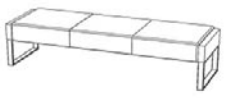
PALETTE FINISHES
Black
White
Sand
Soft Green
Steel Blue
Slate

VENEERS
Tate Benches veneers are quarter cut, except for White Oak, which is rift cut - both quarter cut and rift cut veneers provide a straight grain appearance. The grain direction of the veneers on vertical faces is horizontal.

NON-STANDARD VENEER SPECIES
In addition to range of standard wood species, Tate can be made with virtually any commercially available veneers. Please contact customer service for information and pricing on wood species not included in Tate's standard offering.







NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

ENDURAGUARD FINISH
Tate Benches features the Krug Enduraguard finish, a proprietary catalyzed varnish formulation, that has repeatedly shown through independent laboratory testing to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors and is uniquely suited to the demands of high traffic environments.

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 6.43%

POST-CONSUMER
RECYCLED CONTENT = 16.25%

Up to 38.93% of this Zola product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Zola Bench products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Zola Bench products are supplied air emissions-certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Zola and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

ZOLA | MODULAR & MODULAR PLUS BENCH STANDARD DEPTH

DIMENSIONS

	Overall Width	Overall Depth	Overall (Seat) Height	Shipping Weight	Cubes
One-Seat	23	22.25	18.5	28	5.2
Two-seat	46	22.25	18.5	48	9.4
Three-seat	69	22.25	18.5	64	14
One-Seat (Plus)	30	22.25	18.5	31	6.1
Two-seat (Plus)	46	22.25	18.5	48	9.4

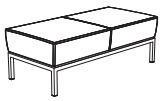
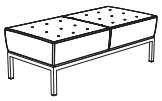
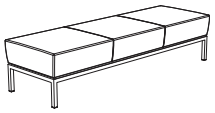
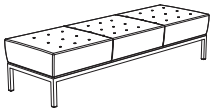
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION









level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Carlyle products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR-EMISSIONS
All Carlyle products are supplied with air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Carlyle and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

AVATAR | VENEERS & FINISHES

WOOD FINISHES
Standard wood finishes are:

Finishes on Rift Oak

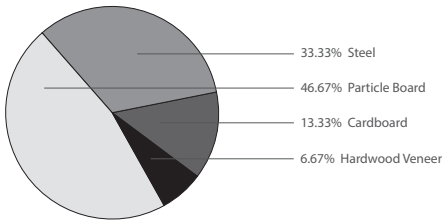
Light Oak
Harvest Oak
SilverGrey on Oak
Mahogany Oak
Medium Cherry on Oak
Mellow Oak
Walnut on Oak
Espresso on Oak

VENEERS
Avatar veneers are rift cut White Oak, which provides a straight grain appearance.

NON-STANDARD VENEER SPECIES
In addition to range of standard wood species, Avatar can be made with virtually any commercially available veneers. Please contact customer service for information and pricing on wood species not included in Avatar's standard offering.

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)



For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

FINISH
Avatar features the Krug's finish, a proprietary catalyzed varnish formulation, that has repeatedly shown through independent laboratory testing to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors and is uniquely suited to the demands of high traffic environments.

LEED CI CREDITS

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT = 29.17%

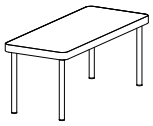
POST-CONSUMER
RECYCLED CONTENT = 42.67%

Up to 46.67% of this Karma product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

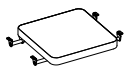
*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

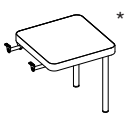
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION



level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Karma products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Karma products are supplied air-emissions certified. Contact customer service for information.





FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Karma and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

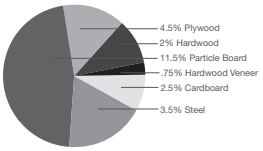
CRESSIDA | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

MATERIAL CONTENT:



PRE-CONSUMER
RECYCLED CONTENT - 36.34%

POST-CONSUMER
RECYCLED CONTENT - 26.4%

Up to 31.25% of this Cressida product is recyclable at the end of its useful life.

MATERIAL CONTENT:

PRE-CONSUMER
RECYCLED CONTENT - 30.77%

POST-CONSUMER
RECYCLED CONTENT - 25.68%

Up to 27.88% of this Cressida product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

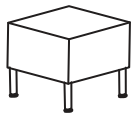
level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

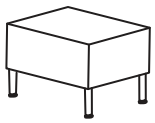
level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Cressida products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

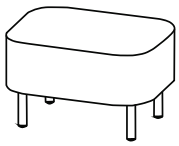
AIR-EMISSIONS
All Cressida products are supplied with air-emissions certified. Contact customer service for information.

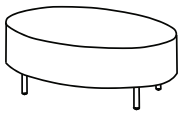
FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Cressida and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

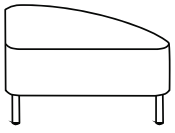
Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.





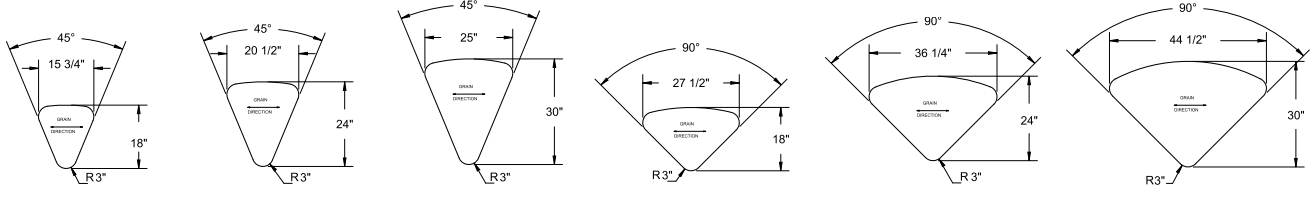






ANTI-MICROBIAL FINISH
Cressida wood surfaces include an anti-microbial finish that inhibits the growth of some molds and mildews. Surfaces coated in this finish support the reduction of fungal growth, and spores from germs, microbes and bacteria

STANDARD FINISHES
For a complete list of standard wood finishes, please see page 341. Cressida tables are available in 22 standard finishes.



LAMINATE
Cressida Box-style tables are available in laminate with wood side or laminate side. See page 336 for laminate information.

SOLID SURFACE
Cressida Box-style & Slab-style tables are available with 1/2" solid surface tops. Cressida Light-style tables are available with full solid surface tops, 1" thick. Please contact customer service for a quote.

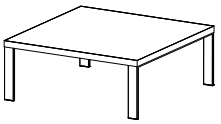
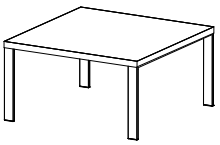
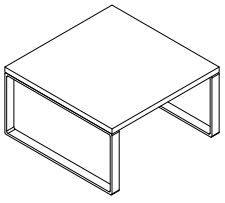
*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

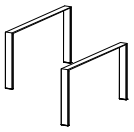






level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Leyton products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Leyton products are supplied air-emissions certified. Contact customer service for information and upcharges.



FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Leyton and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

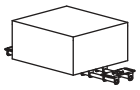
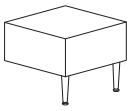
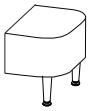
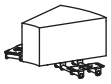
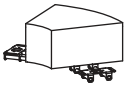
ZOLA | TABLES FEATURES











TABLES MATERIALS OPTION
Tables are available in veneer, plastic laminate, and Palette finishes - and an optional solid surface top. Tables feature leveling glides on every leg.

SOLID SURFACE TOPS
The Solid Surface Top option features Solid Surface material: composed of minerals, acrylic resins and colors, it is a non-porous, scratch and dent-resistant material that does not stain, and does not allow microbes and bacteria to penetrate the surface. Color is throughout the material, so surface scratches are not as visible.

POWER OPTION
The flush-mounted Power unit provides dual power/USB A & C outlets for multiple devices. It can be located on the front face of Middle or End Tables (not available on curvilinear models) To specify, clearly mark on the order and add **$647 list.**

UNDER-MOUNT POWER OPTION
The Under-mount Power unit provides dual power/USB A & C outlets for multiple devices. It can be located below tables.
See page 251 for pricing.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Sutton products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Sutton products are supplied air-emissions certified. Contact customer service for information.

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Sutton and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

PRADO | ENVIRONMENTAL SUMMARY

LEED CI CREDITS

PRE-CONSUMER
RECYCLED CONTENT = 60%

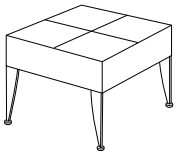
POST-CONSUMER
RECYCLED CONTENT = 15%

Up to 88.5% of this Prado product is recyclable at the end of its useful life.

	CONTRIBUTES TO	
CREDIT 2.1 - 2.2	Construction Waste Management	1-2 point(s)
CREDIT 3.3	Resource Reuse	1 point
CREDIT 4.1	Recycled Content	1 point
CREDIT 4.2	Recycled Content	1 point
CREDIT 4.5	Low Emitting Materials, Systems & Seating	1 point
CREDIT 5.1	Regional Materials*	1 point
CREDIT 7	Certified Wood (MUST BE REQUESTED)	1 point(s)

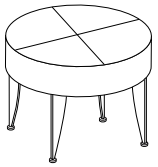
*This credit is only applicable if in total 20% of the combined value of the procurement of construction materials and in the furniture are manufactured within a radius of 500 miles. This credit will apply if the installation of the finished product occurs within 500 miles of Kitchener, Ontario.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION



level® CERTIFICATION
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Prado products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

AIR EMISSIONS
All Prado products are supplied air-emissions certified. Contact customer service for information.



FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It verifies that the material for our FSC® certified products only come from well-managed, FSC®-certified forests and other controlled sources. FSC® is dedicated to the promotion of responsible forest management worldwide helping to take care of forests for future generations. Prado and other Krug products can be specified with FSC® Certification. Contact customer service for further information, pricing and lead times.

Architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

GENERAL INFORMATION

Terms and Conditions
Net 30 days on approved credit. A late payment charge of 1% per month will be applied on overdue invoices. This charge will be pro-rated to the number of days past 30 days that the invoice is overdue. All applicable sales taxes are extra. Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Krug dealers. Acceptance of any order and terms of sale may be established at the discretion of Krug. Deposits are required on orders received from new accounts as well as on large or special orders. Krug reserves the right to discontinue designs, or to change designs, construction, prices, or materials without notice.

Web: www.krug.ca E-mail: solutions@krug.ca
Customer Service Hours
Please note customer service hours are:
8:30 am to 5:00 pm est

Customer Satisfaction
It is the primary goal of Krug and our staff to ensure the complete satisfaction of our customers with our products and performance. If a problem arises with a Krug product after the expiration of the limited warranty period, Krug will exercise its best efforts to achieve the satisfaction of the customer in a manner that is fair to all concerned.

Order Acknowledgments
Each order will be acknowledged via e-mail or fax. This acknowledgments is the final agreement between Krug and the customer, superseding all previous communications regarding the purchase order. Where there is a discrepancy on a purchase order between a product code and a description, Krug will make every effort to resolve the discrepancy, but will be ruled by the product code ordered. Please check all acknowledgments for accuracy, and advise Krug of any discrepancies with a purchase order.

Order Cancellation
Krug reserves the right to not accept or allow cancellation of orders. All products are manufactured on a custom-made, make-to-order basis, and the purchasing, engineering and production of orders begins shortly after order placement - and the customer purchase order is a contract that authorizes Krug to manufacture the products. Acceptance of order cancellation (or partial cancellation) is solely at the discretion of Krug, and is dependent on the extent to which engineering, purchasing and manufacturing has been initiated by the time cancellation is requested. No order cancellations (partial or otherwise) are allowable more than 4 weeks from date of order placement (as order production is unable to be terminated by that point), and full payment of the acknowledged order value is required for any orders cancelled after 4 weeks. Cancellations may be allowable in less than 4 weeks after order placement, depending on the extent to which manufacturing has been initiated. An acceptance of order cancellation requires that the purchaser agrees to make payment for all costs incurred to the point of acceptance of cancellation. Cancellation charges include all costs for purchase of dedicated material and components, engineering costs for non-standard products, and all costs for manufacturing completed to that point, as well as a $385 net charge for processing of the original order and for processing of cancellation invoicing.

Pricing
Krug endeavors to ensure that all prices in this price list reflect accurately our current prices. However, errors do occur and will be rectified through notices to the field. Krug reserves the right to acknowledge pricing that may be different from the price list.

Storage Charges
Krug reserves the right to assess a nominal storage charge if a customer does not accept shipment of an order within a week of the ship date.

Warranty
Krug warrants the construction and the finish of all our products to be free from defects in materials and workmanship for a period of 10 years from the date of purchase. This warranty is applicable to products in use by their original purchaser. This warranty does not apply to components not manufactured by Krug including textiles, which are subject to the specific warranties of those manufacturers, if any. Textiles (fabric, leather, vinyl, or any other covering material) suppliers do not guarantee their products for durability and color fastness, and nor does Krug. Casters, mechanical and electrical components have a warranty of five years from the date of purchase. The Krug warranty does not apply to COM-specified materials, damage caused by a carrier other than Krug, or variation in wood finishes due to natural wood color variation. Krug cannot be held responsible for variations in fabric dye lots from order to order. All fabric is carefully inspected when it is received, but a degree of variation in color should be expected. Repairs or replacement of any defect covered under this warranty by Krug will be made, at our option and method, at no charge to the original purchaser during the warranty period. Krug's judgement is final and binding with respect to the nature or cause of defects or damage, and the necessity or manner of repair or replacement.
This warranty does not apply to defects or damage resulting from:
- normal wear and tear occurring with the use of the product
- negligence, misuse, excessive use, alteration, improper cleaning or repair
- substitution or use of incorrect or unauthorized components or material
- handling or installation that is incorrect, or that causes damage or defect
- damage incurred by a freight carrier other than Krug
- wearing of finishes and fabrics, and normal variations in materials (including dye lot variations)
- properties of natural materials, including wood and leather
- exposure to environments with uncontrolled temperature and humidity (products must be transported, stored and used in climate-controlled conditions)

Blanket Wrapping
Krug will blanket wrap larger seating orders at customer's request. Please indicate on your purchase order and contact Customer Service.

Export Packaging
Krug is pleased to provide the option for export packaging on all our products, to provide additional protection from damage. For shipments overseas, a quote for export packaging can be provided, based on the products to be ordered and the delivery destination - please contact Customer Service or Bids & Specification Support for more information and a quotation. KRUG is not responsible for shipment damage occurring on overseas shipments

Export Packaging is STRONGLY RECOMMENDED for:
(A) all shipments outside of the lower 48 states and Canada.
(B) all shipments that will be held in storage for an extended period prior to installation.

Important: Please note that Krug will not be responsible for damage claims on product shipped or stored in the above conditions but where export packaging has not been utilized.

Dimensions
Dimensions are in inches and approximate, and subject to change without notice. Contact Customer Service if dimensions are critical.

Installation Support
For assistance please contact Technical Support at 1-888-578-5784 x216 or e-mail installationhelp@krug.ca and you will be directed to the appropriate installation support person.

Freight Terms and Conditions

1. All product is shipped FOB the Krug factory. Freight is either pre-paid to the destination or not pre-paid, depending on established customer specific freight terms.

2. Docks at the selected delivery location must be equipped to handle a 53' trailer. If a dock is inadequate for delivery by Krug, Krug will re-deliver to another local location and any additional costs will be charged to the customer.

3. For all deliveries, it is understood that Krug or its agent is making a dock delivery only (equipped to handle a 53' trailer), and any further work of truck unloading, delivery beyond the dock, installation, and removal of packaging is not authorized or paid for by Krug.

4. Drop shipments to the installation site, and timed deliveries, are available on larger shipments (full truckloads or slightly less) at no additional charge. Drop shipments or timed deliveries for smaller shipments may not be available, or if available will require a surcharge. Deliveries on an after hours basis, or on weekends, or any other special requirements, may be subject to a surcharge. Location and contact information, and the requested time of delivery, is required at least one week prior to the acknowledged shipment date. If this information is not provided one week in advance, or if the location or time of the drop shipment is changed less than one week in advance, a surcharge may be applied, and/or the drop shipment may not be scheduled. For deliveries requested Monday to Thursday after 5:00 pm, please apply a surcharge of $275/shipment. For deliveries requested Monday to Friday before 7:00 am, please apply a surcharge of $275/shipment. For deliveries requested Friday (after 3:00 pm) or weekends, please apply a surcharge of $551/shipment. (local times).

5. For all deliveries - whether to the Customer location or drop shipment - any circumstances that result in the delay of our carrier (including unsuitable receiving facilities, or facilities not open or available), service charges will be applied at the rate of $131/hour. Where re-delivery is necessary because of these circumstances, the full cost of re-delivery will be charged. If Less Than Truck Load is delivering, one hour is allocated to unload. Any additional time required to unload after the first hour is $131/hour. If a Truck Load is delivering the order, three hours is allocated to unload. Any additional time required to unload is $131/hour. Direct deliveries to site for large orders are possible, (must exceed $60,000 net), and accommodate 48 - 53' trailers. Krug is responsible for delivery to the approved delivery address. If an address change is required, this must be authorized by Krug 5 business days prior to ship date. Any additional delivery costs incurred after this time will be charged to the customer.---

Product Strength and Durability Testing

All management seating meets or exceeds the testing requirements of ANSI/BIFMA X5.1-2011. All lounge seating meets or exceeds the testing requirements of FNAE-80-214A. Specific test results and documentation are available on request.

Damaged Shipments

All Krug product is well engineered, carefully inspected, and expertly loaded onto our trucks at our Distribution Center. If you receive any damaged freight, we ask that you do not refuse the shipment. Krug is not responsible for damage to goods that occurs in transit or storage. It is the purchaser and/or receiver's responsibility to examine the goods upon receipt and to notify Krug of any damages, overages or shortages. Any discrepancies should be noted on the Bill of Lading. The delivering carrier will not accept responsibility for shortages or damages if signed "clear". Notification of concealed damage claims must be made to Krug Distribution within 5 days of delivery, along with digital pictures if available. All product and packaging must be available for inspection. Krug liability ceases after 5 business days and Krug will not be responsible for concealed damages if shipments are left unopened. Krug is not responsible for the condition of product that is stored or installed in an environment where temperature and humidity are not controlled.

Field Product Report Authorization

Krug's written authorization, in the form of an FPR number, must be obtained prior to incurring charges of any kind if Krug is expected to pay these charges. This includes authorization for field repairs and replacements, installation and delivery charges. Krug reserves the right to have its representative inspect product related to any request for such authorizations, prior to that authorization being provided. Deductions from invoices paid for any charges to Krug, without prior written authorization in the form of an FPR, will not be accepted. Digital photographs may be required to complete the FPR process.

Returns

No merchandise may be returned without Krug's prior written consent. In the event of an authorized return, a Field Product Report (FPR) number will be issued, and a restocking charge will apply. Return transportation charges must be prepaid. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packaged in its original or comparable replacement packaging to ensure protection of the product during handling and transportation. Returns on orders duplicated by the customer must be received in their original packaging to be accepted. Product being returned where Krug has authorized its liability for replacement or repair will be thoroughly inspected on its return, and the results compared to the reason for the return stated on the FPR. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

Custom Capabilities

Over 15% of our orders involve some type of custom work, and we invite our customers to make use of our extensive capabilities.

These include:

1) Dimensional customization of standard size products
2) Custom finishes
3) For larger orders, completely custom-designed products, as well as non-standard wood species can be specified.

Custom orders may require additional production lead times. Contact Engineering at the e-mail address engquotes@krug.ca.

Care and Maintenance Leather

Leather is a natural product and requires very little care during use. Most stains can be removed with a clean dry cloth. For stubborn spots and stains, use a mild non-detergent cleaner, rinse well and let air dry naturally. Do not use saddle soap, cleaning solvents, furniture polish, oils, varnish, abrasive cleaners, soaps or ammonia waters.

Fabric Upholstery

Professional upholstery cleaning is recommended.

Grade 2	$35
Grade 3	$48

LATEX FREE
Krug products are made with latex-free materials to prevent the allergic reaction that latex causes in some people.

CUSTOMER'S OWN MATERIAL - C.O.M.

Customer's Own Material (COM/COL)
COM/COL must be received three weeks prior to the acknowledged ship date. Orders with COM/COL not received by the required deadline will be delayed. A description of the upholstery cover, including supplier name, pattern name, upholstery cover name and color number must be included with the purchase order.
COM/COL testing requires 3 business days and samples are to be directed to Customer Service. The customer has the option of providing the sample COM/COL before, at time of order, or once the sample COM/COL is received. If the customer does not send a sample for approval in advance of sending actual material, Krug will not be responsible for the cost of any upholstery cover or other material that it determines to be unsuitable for the product or our process.
When the COM/COL upholstery cover is received at Krug, it must be clearly identified with the upholstery cover name and color, and tagged with name of the Krug customer and purchase order number. Krug will inspect all COM/COL upholstery covers when received to determine if it will be suitable for upholstery. Where Krug feels that the upholstery cover or leather specified will compromise the quality or integrity of our products, customers will be contacted to direct these concerns. Further, Krug reserves the right to refuse to accept and use any COM upholstery covers or leathers that will compromise our products in any way that is unacceptable to Krug. Krug cannot assume responsibility for the durability or tailoring quality of customer's own material.
Yardage specified in this price guide is approximate. In the case of multiple product orders, multiply the number of items by the COM yardage specified to determine upholstery cover required, unless otherwise indicated. Additional yardage may be needed if the material is less than 54" wide, or patterned or striped and requires matching. All COMs are cut "up the roll" unless otherwise stated by the customer. All striped upholstery covers will be applied vertically unless otherwise stated by the customer and after approval by Krug. Krug will not be responsible for directional or positional problems with its application of COM material, unless it has been provided with explicit instructions by the customer. Special instructions should be sent to Krug Customer Service, including a sample (or photocopy) of the upholstery cover. Krug is not responsible for instructions sent with the upholstery cover rolls, or for the method of upholstery if no instructions have been provided.
Price increases and freight charges to COM/COL acquired on the customer's behalf will be passed onto the customer.

Application of Directional Upholstery cover
Some COM upholstery covers will be considered directional by Krug even though they are not considered directional by the supplier. All COMs are automatically cut "up the roll" unless otherwise stated by the customer (please see below).

Standard-Cut
"up the roll"

Non-Standard-Cut
across the roll "railroad"

COM/COL Shipping Procedures
For seating COM/COL upholstery covers, please send upholstery covers to:
Krug Inc.
111 Ahrens Street
Kitchener, Ontario
Canada N2H 4C2
Attention: RECEIVER
COM/COL orders cannot be scheduled into production until the upholstery cover has arrived and inspection is complete.

All packages must be clearly marked
"**For Customs Clearance by Willson International Custom Brokers**".

According to the North American Free Trade Agreement (NAFTA), goods shipped between the United States and Canada can qualify for exemption from all duties, or for a reduction in duties, if the goods can be proven to originate in either the United States, Canada or Mexico.
Canada Customs requires that a NAFTA Certificate of Origin and a Commercial Invoice be completed and sent with the upholstery cover shipment. The Commercial Invoice must clearly state the description of the upholstery cover, the selling price, the make-up or content, and the purchaser. The absence of these two documents will delay the shipments at the U.S./Canada border, thereby potentially delaying the customer order. If the total value of the shipment is less than $1200 U.S., Customs will accept a Low Value Statement of Origin in place of the NAFTA Certificate of Origin. The Low Value Statement must be signed by a representative of the exporting company. This statement may either be included on the commercial invoice or attached to the invoice. Krug is happy to answer any questions or concerns about COM/COL shipping procedures and the required documents.

CAL 133 & Moisture Barrier
California Technical Bulletin 133 is a flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test. This process at the same time also provides the products with a Moisture Barrier - a treatment that helps to prevent the passage of liquids and moisture to inside of upholstered components - thereby conferring sanitary and anti-infection benefits. So when CAL 133 is specified, the product also automatically has a Moisture Barrier, and when a Moisture Barrier is specified, the product also features the compliance method and low flammability features of CAL 133.
The application of this upcharge and the compliance method does not mean that the specific configuration of product and upholstery cover are tested and officially certified as being CAL 133 compliant. If official certification is required, Krug will provide this (through an independent certified testing laboratory) at a charge of $962 per item, plus the cost of the product to be tested. Lead time for certification testing is typically 4-8 weeks. Krug assumes no responsibility for the testing of our products in combination with upholstery covers, or for the results of any testing conducted. Some specific configurations of product and upholstery have already been tested. Please contact Customer Service for additional information.

C.O.L. Yardage
To calculate C.O.L. yardage required, please use the following conversions based on COM yardage: Leather must be ordered in square footage.
- 17 square feet in a yard
- Approx. 3 yards in a hide
- Approx. 51 square feet in a hide
- Please use grade 3 pricing for COL

Upholstery Cover Yardage Calculation
To calculate yardage required for COM and other non-standard upholstery cover orders, please contact Krug Customer Service at 1.888.578.5784. Unless otherwise stated, upholstery cover rolls are assumed to be a minimum 54" wide. Please use the guide below to calculate the percentage of extra upholstery cover required to cover large repeats. The repeat is calculated by adding both the vertical and horizontal measurements together and then referring to the chart below for extra yardage required.

FABRIC	Plain	2"-14" Repeat	15"-19" Repeat	20"-27" Repeat	28"-36" Repeat
54	0%	10%	15%	20%	25%
53-50	16%	20%	25%	30%	35%
48	16%	25%	30%	35%	40%
45	40%	50%	55%	60%	65%
36	50%	60%	65%	70%	75%

GRADED-IN UPHOLSTERY PROGRAMS

Krug has partnered with several textile brands to grade in their offerings, designed to provide a wide range of upholstery selections for our seating products.

Upholstery pricing and availability is subject to change without notice. We grade this upholstery according to the pricing of the fabric suppliers - when their pricing changes, the Krug grade may change.

When placing an order, a Krug customer must specify the complete upholstery number, along with the appropriate Krug model number and finish. Krug will supply the complete product at the prices listed. Orders specifying graded-in upholstery cannot be cancelled once the upholstery has been ordered.

Upholstery Grades
To determine the price of a product for graded-in upholstery, use the reference lists located on Krug's website under - Products - Textiles, to view the upholstery grade (1-9). Krug is not responsible for the discontinuation of this upholstery. Please contact Customer Service for information on upholstery not listed.

When two upholstery selections are specified for use on seating, the higher grade upholstery price will apply to the order.

High Performance upholstery; Polyurethane, Vinyl or Crypton, is particularly suitable for healthcare and other intensive-use environments.

Upholstery Samples
If you require additional samples or memos for presentation, please contact fabric supplier directly.

Flammability Standards
- Tunnel Test Surface Ratings Class A rating
- Class 1 UFAC
- Passes State of California Technical Bulletin CAL 117-2013

Please contact fabric supplier directly for further flammability information pertaining to specific upholstery.

Special Conditions
Acknowledgments will give the estimated delivery date of the finished product. Some upholstery is imported, and availability may affect estimated delivery time. For large projects, please contact fabric supplier directly for availability of yardage.

KRUG EXPRESS PROGRAM

PROGRAM DETAILS

KrugExpress orders are ready to ship by the date acknowledged. Delivery and shipping schedules may result in actual shipping of orders at a later date. Statutory holidays and scheduled factory vacations may add to acknowledged lead times of *KrugExpress* orders. Unless otherwise specified on the order, the customer's standard method of shipping Krug products will be utilized.

Available factory capacity for *KrugExpress* is filled by orders received on a "first come, first serve" basis. If the normal KrugExpress lead time is not available for your order because available capacity has been filled, you will be immediately advised of the earliest available ready-to-ship date. Please consult your Customer Service representative in advance if you wish to confirm the specific lead time availability for a *KrugExpress* order.

Orders must be received by midnight of a given day for that day to be considered the official day the order is received. Order lead times are acknowledged from the date the order is received, but not including the date the order is received.

KrugExpress orders must be "clean" when received in order to be considered officially received on a given day, and lead times will be acknowledged from the date orders are determined to be "clean".

Changes to *KrugExpress* orders are not allowed under any circumstances.

Orders for product on *KrugExpress* must clearly state: "*KrugExpress*".

COM and graded-in upholstery is available on Krug Express. Orders are scheduled on Krug Express, and given the best available date, when the upholstery is received at Krug. Some conditions apply.

SEATING & OCCASIONAL TABLES PROGRAM

Orders for seating products on the *KrugExpress* program may be subject to quantity maximums. Please contact Krug Customer Service for more information.

Quantity maximums are dependent upon available capacity, in order to insure that we ship all orders on time.
Please note that the CAL 133 option is not available on *KrugExpress.*

Only standard wood finishes are available for *KrugExpress* orders. Laminates are not available on *KrugExpress.*

Krug Express includes all Krug seating and occasional tables as well as Krug conference and casegood products to complement this seating offering.

WOOD FINISHES

Standard wood finishes are:

Finishes on Beech
Appalachian Cherry
American Cherry
Imperial Cherry
Light Cherry
Medium Cherry
Natural Cherry
Sable Cherry
Standard Cherry
Light Oak
Harvest Oak
Mahogany
Mellow Oak
Espresso
Cordovan Walnut
Natural Walnut
Regular Walnut
SilverGrey on Walnut
Dark Walnut
Clear Beech
Medium Anigre

Finishes on Maple
Clear Maple
Honey Maple
Wheat Maple

PALETTE
Palette finishes available for applicable products.
Black
White
Soft Green
Steel Blue
Slate

WOOD FINISHES TO MATCH STANDARD LAMINATES

Willow on Beech
Copper on Beech
Shiraz Cherry on Beech
Park Avenue Walnut on Beech
Chocolate on Beech
Nutmeg on Beech
Portobello on Beech
Ash on Beech
Dune on Maple

NATURAL CHARACTERISTICS OF WOOD

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

Custom Wood Finishes
Add 10% list to your order for special finishes, minimum upcharge is $630 list per finish per order. (For example, on all orders up to $6300 list, an upcharge of $630 will apply, on orders $6300 and up add 10% list to your order.)

Special finish upcharges on seating products are calculated on a grade 1 value. For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

Dual Finishes
Add 10% list per item if specifying dual finish.

Standard Wood Finishes
No upcharge will be applied when specifying a finish available as standard on one species onto maple seating and occasional tables. Clear finishes are not available on other species since they are a clear finish on top of the natural veneer color.

LAMINATES

Krug's in-stock Laminates are available in 17 different laminate selections. Please note that 4 of the colors (Gingerbread, Portobello, Ash and Willow) have textured finishes and may not be appropriate for use in patient areas due to infection control concerns. Minimum order quantities and extended lead times may apply for exotic laminate colors, please check with customer service. Polymer Edge will be selected to match the worksurface. Krug's previous laminate in-stock program will be phased out as in-stock supply depletes. Please contact customer service for availability.

IN-STOCK LAMINATES

Wood Grain Laminates	High Pressure Laminate Supplier
Champagne	Tafisa T492CR
Hardrock Maple	Formica 86992-58
Dune	Tafisa T491CR
Copper	Tafisa T521CR
Shiraz Cherry	Tafisa T472CR
Park Avenue Walnut	Wilsonart 7984–38
Chocolate	Tafisa T498CR
Nutmeg	Tafisa T477CR
Nightfall	Pionite WX421

Textured Wood Grain Laminates	High Pressure Laminate Supplier
Gingerbread	Tafisa T556UR
Portobello	Tafisa T557UR
Ash	Tafisa T535AT
Willow	Tafisa T543AT

Solid Laminates	
Designer White	Wilsonart D354-60
Platinum	Tafisa T202CR
Earth	Tafisa T767CR
Charcoal	Tafisa T228CR

PHASE OUT LAMINATES

Almond - Black- Shadows - Edgewood Sycamore - Gunstock Walnut

Non-Stocked Laminates

For specific lead time and application questions, please contact Krug Customer Service for your requirement. Upcharges will be applicable for non-stocked laminates, depending on their cost. Non-stock laminates may require a minimum order quantity, please contact customer service. Stocked polymer edges only can be specified for use with non-stocked laminates or tops will be self-edged.

SOLID SURFACE PROGRAM

The Solid Surface option provides an enhanced durability, protection and cleanability. It is available in 8 standard colors and is replaceable if it becomes damaged or degraded. See individual products for list upcharge chart.

ORDERING NOTES: Glides options marked “n/a” are not available for that product due to leg style. Please see product pricing pages for optional glide upcharges.

GLIDE RECOMMENDATION BY FLOORING TYPE

Glide Material	Carpet	Vinyl/Linoleum	VCT	Rubber	LVT/LVP	Ceramic Tile	Concrete	Hardwood
Nylon - Floor Saver	⋆⋆	⋆	⋆	⋆	NR	⋆	⋆	NR
Felt - Floor Saver	NR	⋆	⋆⋆	NR	⋆⋆	⋆⋆	⋆	⋆⋆
Rubber - Non-slip	⋆⋆	⋆⋆	⋆	⋆	NR	⋆	⋆⋆	NR
Metal	⋆	⋆	NR	NR	NR	⋆	⋆⋆	NR
Plastic	⋆⋆	⋆	⋆	⋆	NR	⋆	⋆⋆	NR

⋆⋆ = Best Solution

⋆ = Acceptable

NR = Not Recommended

ORDERING NOTES: The above chart shows our recommendation based on a clean, professionally finished floor without dust or debris between the glides and the flooring.

BASE STYLES

Base Styles	Description
Black Nylon	5 blade glass reinforced molded nylon base with 2 1/4" hooded dual wheel casters.
Polished Aluminum	5 blade polished cast aluminum base with 2 1/4" dual wheel casters (upcharge of $115 applies.)
Seat Slider	Seat slider mechanism featuring a 2" range of adjustment front to back when seated. The lever to activate this feature is located under the seat of the user's left side and is activated by a simple twist of the knob.
Wood	5 blade steel bar stock base with finished wood caps and 2" black hooded dual wheel casters.
Chrome	5 blade polished chrome base with 2 1/4" dual wheel casters.
Jury Bases Jury Bases	Jury Bases assembly consists of a black 9" diameter conical/cast base for permanently mounting a chair to the floor. Into the base is inserted a black pneumatic gas cylinder with self returning action from rotation, and self returning height feature when exiting the chair. Allows for full 360 degree rotation. Limited degrees of rotation are not available.
