Hutches are either mounted to worksurfaces or directly to a wall. Hutch uprights must be supported below surface by a desk leg or pedestal storage unit.

Addition of pedestal storage is required for freestanding straight desk shell applications, otherwise units are only suitable for use against a wall.

Fabrics

Select stock fabrics, in varying grades, available from Maharam, Guilford of Maine, Momentum and CF Stinson.

Fabrics are divided into three categories:

Panel: Suitable for vertical applications, OS fabric divider tiles (tackable) and fabric modesty dividers

Upholstery: Suitable for low storage and mobile pedestal cushions

Dual Use: Suitable for upholstery and fabric divider tile applications

Fabrics MUST be specified to match their application (ie. divider only fabric is not to be used on a seat cushion, and vice versa). COM fabrics can be specified provided they are rated for their intended application. Fabrics must not contain flame retardants. Upholstery fabrics must be rated CA117 compliant. Divider fabrics must be rated ASTM E84 Class A compliant. It is the specifiers responsibility to provide compliance documentation with COM requests. Heavy weight or fabric grades and patterns that vary substantially from typical properties may be unworkable. Three H recommends providing a sample in advance of order to qualify suitability and reserves the right to refuse fabric for any reason. Extended lead times may apply to COM orders.

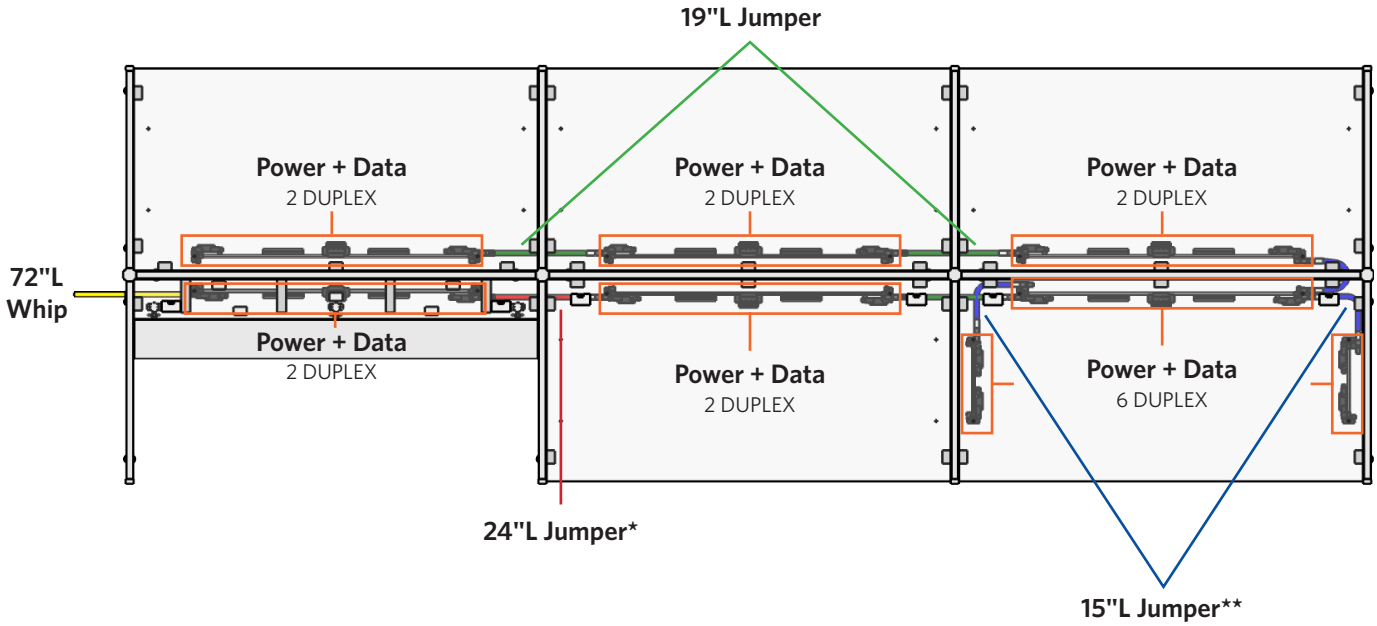

Power

MultiStations OS offers an optional UL183 listed modular 8 wire, 4 circuit power distribution system with integrated duplex receptacles. System requires hardwiring to building power supply by a qualified electrical contractor. Specifier must qualify that modular power systems meet local building and electrical codes applicable to the installation jurisdiction.

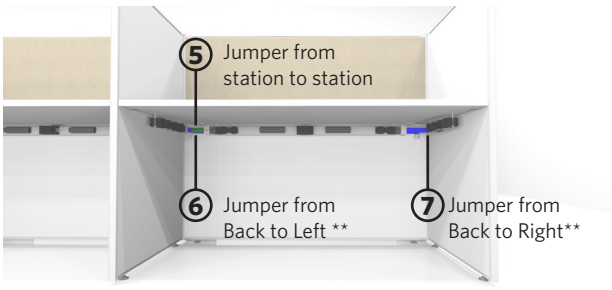

See Modular Power Application Guidelines for additional details.
