We regret this manufacturer is prepay-
and-add freight terms.

Open Market Services

Pricing Effective 10/15/2021

The process for sourcing open market or non-standard options would be the same as the process for products and services being offered under the contract. This is exemplified through our Sourcewell Service Program, which offers a variety of services previously unavailable on a predictable and stable price-basis. That being said, there are some aspects of this equipment (including concrete work and electrical work most notably) that must be ordered "open market". As a courtesy to the Members, we can arrange these services at cost-plus pricing. It is our intention with the continued success of this program to augment our Sourcewell Service Program to include these more complex services in the future to continue developing the most turnkey solutions for Sourcewell Members. Since there are many categories and subcategories that fall under the scope of this contract (and more still unforeseen), we can specially procure any items that fall in the scope of this contract, but brands or categories that we did not bid on. These products will be quoted separately for each request, and will be subject to a \$500 minimum order for specially procured items.
